GUIDE TO THE FA8 BAMBARA FILE

/The FA8 Bambara file consists of four sources, all of which are translations from the French. 1:Dieterlen, an ethnologist, is an extended discussion of Bambara religion, cults, and associated practices. 2:Monteil, a government official, is a thorough discussion of two large Bambara groups, being concerned mainly with their history, religion, and cult groups. 3:Paques, a social scientist, is an ethnographic survey volume based mainly on the literature and containing much material not found in the other sources in this file. 4:Henry, a Roman Catholic missionary, is an account of the "mental" side of the Bambara, i.e., their religion, ethical system, and social organization, although data on the latter are rather skimpy.

This file is strong on data relating to history, religion, and non-material culture in general. The information on other cultural categories is complete enough to make the file adequate for cross-cultural purposes, though specific detailed information is lacking on many aspects of material culture.

No special marking decisions were made for the Bambara file. --Analyst/

Processed in 1960

/xiii/ Introduction

101 131 The Bambara tribes which form part of the Mandé group are at present spread out in French Sudan from the 11th to the 14th degrees latitude north and from the 7th to the 11th degrees longitude west. Three groups which have settled respectively in the circle of Issa Ber, in Kaarta, and in the circle of Odienné are noticeably separated from the central group which occupies the shores of the Niger around Bamako and Ségou.

105 The Bambara live in small villages in the savanna; they practice primarily agriculture (millet, digitaria /Fonio/, rice, maize, etc.), but also herding and gardening. The shore dwellers of the Niger are fishermen and live in symbiotie relationships with the Bozo who taught them fishing techniques and who are generally recognized as the first inhabitants of these regions.

173 The Bambara state that they came from Mandé. This region, where the successive capitals of the ancient kingdom of Mali were situated, has long attracted the attention of research workers (1). Moreover, it is "the center from which radiated forty-four tribes at present spread out in the area between the Atlantic coast, the Senegal, and the Niger, or to Dahomey" (2). The region indicated above also

121 This work deals only with the Bambara of Ségou and Kaarta since it has already been noted that, save for their specifically local history, [4] a study of their concepts and institutions is valid in general for all of the Bambara.

103 131 [133] It is exceedingly difficult, besides, to be entirely certain as to which of the Bambara actually belong to the Kaarta and Ségou areas since the two designations do not correspond to any very exact geographical region. When a native speaks of Kaarta or of Ségou, he only vaguely understands the terms, and this with good reason.

101 103 131 I have noted elsewhere (1) that, etymologically speaking, the

---

1. In my work Les Khassonké [The Kasonke], which appeared in the series, Revue du Monde Musulman.

101 103 131 word which we write and pronounce Kaarta means "country of the Karé" or, more accurately, "the group of the Karé." Wherever there are Karé people they are called, in the Soninké language, Karu-ta, [5] which is contracted to Karta. From this we made Kaarta because we misheard the long first "a." The word Kaarta designates a particular area only because of the people who inhabit it, and its value as a geographical expression is acquired only by extension. Among the natives the term is used for various areas within the region which extends from Goumbou to Koniakari and from Nioro to the Senegal River. On our maps, Kaarta is bounded by Kingui on the north, Diomboko on the west, Senegal and Bélédougou on the south, and Kaniaga on the east. However, all of these names of cantons themselves have very vague meanings.

101 103 131 614 For the purpose of the present work, the word Kaarta takes on a special meaning. The Bambara who founded a clan at Sounsaŋ-na in the Karé country are called Karta-n-ko in the Soninké language and Karta-n-ka-u (the Kaarta people) in the Bambara language. As a result, Kaarta has become the name of the areas occupied by the clan in its various peregrinations.

The "people of Ségou" acquired their name in quite a different manner, since they were named for Ségou, the capital of the clan. The country of Ségou should be understood strictly to allude to the to-da which, to be described in chapter 5, was, by and large the area surrounding Ségou and occupied by the chief and his family and followers. In a wider sense, the country of Ségou referred to all the territory under the authority of the Ségou clan. At the height of the clan's power, "the country of Ségou" occupied both banks of the Niger, following the axis of the river from Kangaba to Timbuktu.

101 131 631 Our European need to have things clearly defined may be satisfied by having the territorial limits of Kaarta and Ségou set forth on a map, but on the native level, with which this book is primarily concerned, such local definition has little relevance. These empires did not aim to dominate any given area but rather sought to exploit as large a number of individuals as possible without regard to country or race.

128 Note: In the following pages, as well as in the foregoing, words in Bambara or other Sudanese dialects which are used are italicized; see Chapter 7 for explanations. [Omitted in translation.]

[7] I. Origin

Name

101 The peoples with whom this work is concerned are known, generally speaking, by the name of Bambara, both to Europeans and to most of the natives. They call themselves Banmana or Bamana.

European writers have offered two theories to explain the etymology of the words Bambara, Banmana and Bamana.

According to one school of thought, the word Bambara derives from bamba or bamma (crocodile) and alludes to a tne (1) which is reputedly common to all natives known as Bambara. This theory is nullified by the fact that the taboo, which was supposed to be generally imposed, is actually imposed on only a few of the Bambara. Further, the suggested correlation has never been proved to exist between the name of the tne and either individual or collective denomination among the Bambara.

Other authorities suggest that, according to the Banmana themselves, the word Banmana means "rejection of a master" (ban-ma-na) and alludes to the legend which tells how, early in the thirteenth century, the Banmana left their native land and went to Toron in order to escape from the yoke of their Malinké conquerors. This etymology, which is linguistically defensible, would apply only to the people who immigrated to Toron, and it still does not tell us by what name they and their congeners were known before the migration.

---

1. A magico-religious taboo, see Chapter 2.

I have also been told that the words Bambara, Banmana and Bamana come from the Bambara root *ban'* or *ba*, meaning "to refuse." My informant, a Soninké, claimed that when their hegemony came to an end in the Ségou region, the Soninké noted a general rebellion among the serfs and said: "*u bara bango bè la*," which meant (1) "They have refused (to submit) [8] on all sides." And this same informant added that, when the rebels later returned and made peace with their masters, they put the following question: "*au mar' kan'*," meaning (2) "Under what conditions will you keep us?" The word Bambara would thus derive from the first expression and the word Marka (2) from the second.

I mention this interpretation as an example of the etymologies which are entirely made up by the informants and to which one can attach significance only after rigorous and critical investigation. In this case I have no doubt whatever that my informant's two expressions were invented for the occasion and that they are worthless; indeed, I cannot understand at all the translation of the second expression, *au mar' kan'*.

I am convinced that the natives simply do not know the origin of the name Bambara or its variants, or rather that they are incapable of explaining it.

However, it does seem likely that the words Bambara, Banmana and Bamana are actually derived from the same root *ba*. Thus, if the final *na*, a collective suffix, is removed from the word *banmana*, we are left with *banma*, a word which is comparable, morphologically speaking, to *finma*. The latter means "black" in Bambara and it may be replaced with *fin'* and *fi* without change of meaning: by analogy one is led to say that *ban'* and *ba* are, in the same way, equivalents of *banma*.

---

1. According to the aforesaid informant.

2. According to the same informant.

101 It is interesting to compare these two monosyllables with the Peul [Fulani] word bal, which also means "black" and which can also be spelled ba since its final l, like the n' in ban', is merely euphonious. The comparison is valid because Peul is by origin a Negro language native to the area and, further, because a comparative study of the Sudanese dialects has shown much mutual borrowing of words.

From all this I conclude that the term Bambara and its variants likewise signify "black men."

Further, foreigners and their half-caste or naturalized offspring, all of whom we include under the name Peul, ruled over western Sudan in early times, and it is reasonable to suppose that the name Bambara dates from that period and represents the name by which the Peul rulers designated the natives. [9] Or, it may be safer to say that the word Bambara and its variants derive from the same root ba, meaning "black," which came from an ancient dialect of which the modern Peul language is also an offshoot.

However that may be, the designation Bambara, which is used generally throughout western Sudan, has many meanings today. For the Moslem, the Bambara is the infidel, the pagan, the drinker of alcohol; for the pastoral peoples (Moors and Peuls), he is the farmer and also the Negro. For Semites and those who claim to be Semites, he is principally the Negro. For those who were or are rulers, he is the slave; and for all he is the primitive man who is socially inferior.

101
578 The word Bambara has shared the same fate as the word Peul in that it is used simply as an epithet: the name Bambara is applied to all pagans (1), farmers, slaves and black men. Indeed

(1) "... It is absolutely certain that in the minds of Sudanese Moslems in general and of those living at the mouth of the Niger in particular, the word Bambara is applied, not to any particular people, nor to a specific tribe, but rather to all Sudanese who have remained faithful to the native religion." (Delafosse, Vol. 1, p. 126).

101 578 the word has so thoroughly taken on a pejorative sense that its use may be a grave insult. What an insult it would be for a Moslem to be called a Bambara, i.e., an infidel, a pagan and an alcoholic!

101 In the strictest sense, however, the word Bambara is applied by the Malinké and, following their lead, by the French only to natives who speak the Bambara dialect and who call themselves Banmana or Bamana. Barring specific exceptions, we shall henceforth use the word in this limited sense in the present work.

x173 It is evident from the foregoing remarks that the Bambara belong to very ancient indigenous families; indeed, they themselves consider this to be so, and they are so considered by others.

Native informants are likely to say that the Bambara are former slaves of the Malinké; but they also say that the Somono are former slaves of the "Ségou people." Later on (see Chapter 4), we shall see in what sense [10] this slavery should be understood. It was a characteristic result of the political form of the native governments.

101 In addition to the general name given to them or accepted by them, which applies to one or another group, the Bambara are designated by terms expressing their geographic distribution. There are, for instance, those who live at Bélédougou (called Beledugu-ka-u); those in the Kaarta area (Karta-n-ka-u); those at Ségou (Segu-n-ka-u); those around Bani-n-ko (Bani-n-ko-ka-u). Each of these expressions also has a political connotation; Ségu-n-ka-u is often used for members of the ruling party, which holds power at and operates from Ségou, and only the context or the drift of the conversation will make it possible to know what people are actually being discussed.

Among themselves the various Bambara groups often describe one another by nicknames. The "Kaarta people" ironi-
[302] cally call the "Ségou people" Tlu-kene-u, "those with a single braid," because of a peculiar way of doing their hair, or Nya-ni-Nyéle-u, because Nya and Nyélé are popular names for women among the people around Ségou.

101 614 It is common, too, to call all the members of a clan by a name derived from that of a clan founder or ancestor. Thus, the

B 101 614 Kaarta people are called Nya-Ngolo-la after Nya-Ngolo, an ancestor of the chiefs of the clan; and the Ségou people are called Barama-Ngolo-la after Barama-Ngolo, an ancestor of their clan.

B S 101 [567] Nicknames are also used between individuals of different tribes. The Soninké often call the Bambara Dyon-ko (slaves) because, having long been engaged in the slave trade, they sold many Bambara as slaves (1). The Bambara generally call the Soninké Marka (for Mara-ka). They still use the term Marka dialan'u (dry Marka people) to designate the Soninké who abandoned their own dialect in favor of the Bambara dialect. On the other hand, they use the term Marka kan'-fo-la-u (those who speak Marka) for those among the Soninké who have retained their own dialect.

In the Ségou region, the Bambara use the expression Bani-n-kono-u (birds of the Bani) for the Soninké,people who live along the banks of [11] that river; their more general term for the Soninké is the surname Dyeme-ka-u, from Dyeme (or Dyime) meaning "a long-legged water bird" of the marabou species. According to the interpretation given to me, the names Bani-n-kono-u and Dyeme-ka-u allude to periodic journeys made by the Soninké to the large commercial centers to the south, especially Ouorodougou [Ouagadougou?].

The Ségou country was called Dyeme-ka-u by the Bambara during the period of the Soninké rule (1). On the other hand, when

the Bambara came into power, the Soninké called it Dyon-kadugu (land of slaves).

Origin

B
*173 The tradition which is generally accepted, and which was first reported by Raffenel and Quintin, has it that the ancestors of the Bambara of Ségou and Kaarta came originally from Toron, a region situated at the headwaters of the Milo and the Baoulé, both tributaries of the upper Niger. From there they presumably moved in a northeasterly direction and then spread out toward their present habitat and developed the empires of Ségou and Kaarta (2).

B
[174]

2. "An oft-reported tradition says that the Banmana came from Toron, the eastern province of Oussoulou, situated in the present colony of the Ivory Coast. It was on the route between Odienné and Sikasso, not far from the former. It seems, indeed, likely that the original habitat of the Banmana was located in the extreme southeast corner of the cradle of the Mandé family and that it extended from the right bank of the upper Niger, approximately near Siguiri, to the left bank of the upper Bagbé (or Bagoé), where it touched the territory of the Sénoufo [Senufo] people. The first conquests of the Mandingue [Mondingo]

F
101
103
double meaning is no less evident in the Tarikh-es-Soudan, especially on p. 161 of the French translation. The same double usage is evident in oral traditions.

Thus it is understandable that the word Mandé has come to be considered as an equivalent of our words "empire" and "kingdom" when they are used in a geographical sense, and that, as a result, the term has varied in application because it depended on an ever-changing territorial domain subject to the domination of successive ma.

M
F
103
642
However, it is not only from the geographical point of view that the term Mandé has remained indefinite or vaguely defined; the same uncertainty prevails on the political level. In a general way, Mandé is considered to be exclusively the empire of the Mandingue people, who are one of the subdivisions of the group called Mandé by the Europeans (1). In order to understand the meaning attached to the word "empire" in western Sudan, it is essential to place oneself on the native level and not on that of our European civilization from which the term is borrowed.

F
B
103
642
[614]
Briefly, the Sudanese empire is a system of clans. It is formed by bringing together of elements taken over from clans that have either disintegrated or are in the process of doing so. It acquires power and extension through the influence of the founder or, less frequently, of one of his successors, and then falls into decline at the hands of enemies or as a result of schisms which arise at the death of the ruler on whose success and "flair" its fortunes have depended.

F
B
101
103
It is this constantly repeated process of grouping, separation and regrouping which dominates the entire [15] history of the Sudanese empires and dynasties and which makes any study of the people so very difficult. The geographical nomenclature is,

---

1. Mandé, as the name for a group of peoples or of native languages, is unknown to the Sudanese; in this sense it is used exclusively by the Europeans.

French West African Natives FA2
Malinke FA27

F B 101 103 of course, dependent on these social facts. Often a region is named after the people who inhabit it as, for instance, is the case with Kaarta. It may also derive its name from a dominant political group, and when a region has been ruled by successive groups, it acquires a series of superimposed names even though the territories to which they apply may not necessarily be identical; this, too, applies to Kaarta -- a poorly defined region.

This explains how it came about that different empires were lumped together under the same name, Mandé (and other variants). The empire ruled by the Kefta chiefs was merely the last to arise and it presumably dates from the beginning of the thirteenth century.

B *173 M 173 One tradition has it that the ancestors of the founders of this thirteenth-century empire came from the east -- specifically from Kong (1). Under the leadership of Kabala Simbo Kefta, they settled in Dodougou, a canton whose capital was at Tabou and whose chief, a Bambara of the Konnaté dyamu maintained his power with the help of a militarized group called Mandinké. This was a group similar to those composing the sofa, ton-dyon' or furu-ba-dyon' who supported the fortunes of the clans of Ségou and Kaarta. In the Soninké language the word mandinké means, M [101] literally, "a person of the master's (or lord's or king's) household," and in the plural it means "the master's (or king's) people."

The canton of Kiri (2), adjoining that of Dodougou, was

---

1. I see in this precision nothing more than the usual polarization of which I speak on p. 45 , note 1 .

2. The Dodougou (abbreviated to Do) and the Kiri are, indeed, considered to be the oldest cantons of the so-called Mandé clan. In this connection, see Humblot, "Du nom propre et des appellations chez les Malinké ..." [On Proper Names

*173 we have just noted, would have formed an unbreakable bloc
614 if both elements had not been affected by the ferment of
dissociation referred to in the course of this study.

The to-da derived the larger portion of its prosperity from
[487] the Niger. Communication and transport could most easily be
maintained along this artery, and it was the need to make the
greatest possible use of the river that brought about the organization of the Somono.

Etymologically, the word Somono simply means "fisher-
[101] man." Like any trade practiced exclusively, professional fish-
[564] ing involves a certain loss of standing, and that is why the
Somono are said to be people of caste. This status is especially
due to the supremacy of the clan over the Somono, without whom
it could not have exploited the river.

After using force to annex them, Mamari added to their
614 number by assigning some of the furu-ba dyon' to the group, so
564 that the Somono were soon closely dependent on the furu-ba.
*173 At the orders of the fama and his agents, they were required to
[505] maintain ferry service across the river, to provide river transport
in both directions, and to pay a fee in kind on their catch, with
the understanding that they could continue to live according to
the traditional Somono customs.

In return, the Somono were under the protection of the clan and their leaders benefitted from the generosity of the fama. They would occasionally be given a share of booty. [324]

Little by little, the few original Somono families were lost in the flood of newcomers. These included: the furu-ba dyon' who had become Somono on orders from the fama; people of diverse origins who had adopted Somono status of their own accord because they found it better than their own; and finally, the children of both, who were Somono by birth.

It was likewise the exploitation of the property of the
[233] to-da that brought about a similar organization of the shepherds,
or Peul. Let us first note that this term has no ethnic significance;
it designates all who raise or watch over animals as a regular and
professional occupation. Here, too, there is a kind of loss of
standing, since a working shepherd could hardly do without a
sponsor and must attach himself to a master. This is the case for

[1] CHAPTER 1

DEMOGRAPHY AND TRIBAL AND SUBTRIBAL GROUPS

I. Nomenclature

A. European Definitions

101

Monseigneur Bazin, in his Bambara dictionary of 1906, gave us the etymology of *Banmana*, "men of the cayman," whereas *Mani* or *Mali* would mean "those of the hippopotamus," the two names having a totemic origin.

For Élisée Reclus in 1887 (*Nouvelle géographie universelle* [New Universal Geography], Vol. XII: *L'Afrique occidentale* [West Africa]), *Bamana* means "steep crag."

Delafossé (*Haut Sénégal-Niger* [Upper Senegal and Niger]) in 1923 makes a distinction between *Bambara* and *Banmana*.

The Banmana would commonly be called Bambara by Europeans and the other Sudanese. Bambara is the word used in the *Tarikh-es-Soudan* [History of Sudan]. The Moslems designate all non-Moslem Sudanese as Bambara. Thus, the Sénoufo [Senufo] are called Bambara by the Dioula of Sikasso; the non-Moslem Malinké are called Bambara by the Dioula of Odienné; similarly for the Gbanian and Dagari of Upper Volta, etc. That is why Delafosse prefers to 173 name the people of Ségou, Bélédougou, etc., as they name themselves, that is, *Banmana*, which supposedly means "the refusal of the Master," in allusion to the legend according to which the Banmana left their land of origin (Ouassoulou) at the beginning of the thirteenth century to escape the yoke of the conquering Malinké.

According to Monteil, Bambara comes from the root *Ba*, "black."

B. Native Definitions

The Bambara often designate themselves by terms which indicate their geographical distribution.

● 101 Example: Those of Bélédougou are the Bélédugu-ka-u;
Those of Kaarta are the Kaarta-n-ka-u;
Those of Ségou are the Ségu-n-ka-u . . .

Each of these expressions has at the same time a political significance. Ségu-n-ka-u means the people of the party in power at Ségou. The context alone determines which people are meant.

[552] [2] Among themselves, the Bambara factions sometimes call each other by nicknames: of the people of Ségou, the people of Kaarta say ironically, "those of Tu-kele-u" (those of the single braid), alluding to their coiffure, or else Nya-ni-nyele-u, "those of Nya and Nyélé" (Nya and Nyélé are women's names common at Ségou). All the members of a clan may also be grouped under a term derived from the name of the founder or ancestor of the clan: the people of Kaarta may call themselves Nya-Ngolo-la (the people of Nya-Ngolo, ancestor of the clan); the people of Ségou may be called Barama-Ngolo-la (the people of Barama-Ngolo, ancestor of the clan).

[186] There are also nicknames for individuals of other tribes. The Bambara are called Dyonko (slaves) by the Soninké, who long exploited the Bambara for the slave trade, while the Bambara in turn call the Soninké the Marka Dialan'u (Marka Seer), because they gave up their own dialect for the Bambara dialect.

II. Situation

A. Ethnic Classification

144

Delafosse has made a broad classification of the peoples inhabiting Upper Senegal and Niger. Unfortunately, this classification too often mixes language and physical traits. Thus, he puts the Bambara in the Mandé family, which is divided into three groups comprised of these main peoples:

First group (northern): three peoples, the Bozo, the Soninké (or Sarakolé or Marka), and the Dioula.

Second group (central): five peoples, the Kagoro, the Banmana (or Bambara, including the Somono caste), the Kassonké (or Mandingue [Mandingo]), and the Foulanké.

|3| To the east, they are found in the Bendougou, Minianka
619 (the banks of the Niger and the Bani to the south of San and Ségou being occupied by the caste of Somono fishermen), and Kénédougou regions.

To the south, in the Ouassoulou.

To the southwest, in the Manding, the Bélédougou, and Fouladougou regions.

To the west, in the Kangaran, the Bambouk, and the Guidimaka regions on the banks of the Senegal.

In short, the habitat of the Bambara lies within a large V formed by the upper Senegal and the upper Niger.

C. Neighboring Tribes

●|0| The Bambara are the most important people of the western Sudan and of the southern circles. Nevertheless, they are very mingled with other populations according to the regions we shall further define.

Among these other populations the principal ones are:

The Peul (Foula [Fulah], Foulbé [Fulbe], Fellata [Felata], a nomadic population found throughout West Africa from Senegal to the Egyptian Sudan. They speak the same language as the Toucouleur [Tukolor] Popular.

The Malinké, an important Mandingue people who speak a dialect close to Banmana and who are found in Guinea and in the Sudan (Satadougou, Nioro, Kayes, Bafoulabé, Kita, Bamako, Bougouni).

The Kassonké, who live in the Senegal Valley upriver from Kayes, are of mixed Malinké and Toucouleur origin; they speak a dialect close to Malinké.

The Sarakolé, Soninké or Marka, are an ancient people linked to the history of the empire of Ghana; they speak a Mandingue dialect related to Bambara. Those of Kouroumari speak Bambara and are of mixed Bambara blood.

[4] In Mourdiah, out of 14,000 Marka, a large proportion is Bambarized.

The Songhaï, a people of the middle Niger, have swarmed from the region of Niamey up to Lake Débo and Djenné.

101 The *Senoufo* or *Minianka*, an important people in the circles of San, Koutiala, Bougouni, and Bobo Dioulasso, speak Sénoufo.

The *Bobo* in the region of San, Bobo-Dioulasso, and Dedougou, speak Bobo but are divided into two large branches according to their dialects: the Black Bobo and the Red Bobo.

The *Dogon*, remainder of the ancient inhabitants of the Nigerian regions from Bamako to Lake Débo, live for the most part in Bandiagara and Douentza and speak Dogon.

The *Mossi* live in Ouahigouya, Kaya, Tougan, Fada, and the circles of Ouagadougou, Koudougou, Tenkodogo and Dedougou; their language is Moré.

The *Toucouleur*, originally from the middle Senegal, are numerous particularly in Senegal and Mauritania; they also live in the region of Kayes and Bafoulabé.

Finally, the *Touareg* [Tuareg] roam from Goundam to Gouré. Their proportion of white blood is weak; the same thing applies to the Moors, Arabized Berbers who are counted with their former black captives. The tribes of the Niger region are the Almoussakaré, the Attouajiten, and the Euddè; they speak Touareg.

III. Physical Characteristics of the Bambara

142 History and ethnology show us that the Bambara of today is the product of several peoples whose origin is still unknown to us. Yet, common biological characteristics have developed so the Bambara distinguish themselves physically from other peoples, either by color (they say they are less black than the Bozo and the Sarakolé), by the structure of the body and musculature (they are tall, robust, muscled . . . very different in that from the "feeble Peuls"), or by the form of the skull, with its receding forehead (that of the Peul is straight, "bulging and bumpy").

Tauxier, in his *Histoire des Bambara* [History of the Bambara], has given an anthropological description based on the work of the following authors: Quatrefages and Hamy, *Crania ethnica* [Ethnic Crania], 1882; Dr. Collomb, *Bull. de la Soc. d'Anth. de Lyon* [Bulletin of the Anthropological Society of Lyon], 1885; Hovelacque, *Les Nègres d'Afrique sus-équatoriale* [Negroes of Supra-Equatorial Africa], 1889; Dr. Verneau, *Les races humaines* [Human

771 If the Bambara have fought to safeguard their independence,
181 they have done so primarily to preserve their faith and keep their
fetishes. They have shown such great attachment for these, that their
● [101] conquerors have described them as rebels and applied to them the epithet
Bamba, synonym of Kafri. These religious struggles in themselves
allow us to state as an indisputable fact that before the arrival of the
Moslems the Bambara were animistic and sacrificed to genii. /69/

776 Did they have an exact and precise idea of their genii as they
811 do now? Apparently yes, for they always reasoned using themselves
as a basis of comparison so that in their minds the invisible, impalpable
genii to whom they sacrificed had a striking resemblance to man.
It is not a man, and yet it is one, they say unable to define their
concept or idea, ma si fa do (1).

1. Ma; "man"; si fa' "certain kind";
do; "it is."

776 The Moslem word djin translates this idea precisely, and the
782 Bambara use it in everyday language; but when the day of the sacrifice
comes, they become unaware of it and there remains only one word
-- ma, meaning "man." When they redden with blood the bark of
[824] the baobab (Adansonia digitata), the tamarind tree, the false cedar
(family of the cedrelaceae), etc., to obtain the good graces and protection of the genie who dwells there, they always confer on it the
title ma ("man"), and never that of djiné. "Ma n'zira ba, ma n'tomi
ba, ma djala ba; O great baobab man, O great tamarind tree man,
O great false-cedar man!" begins the formula used by the sacrificer
in offering victims and millet flour to the genie (2). They also have

114 2. In /J. Henry/, "Culte des
esprits chez les Bambara
/Spirit Worship among the
Bambara/," Anthropos, Vol. III,
No. 4 (1908), p. 1 /p. 702/,
note 1, there is an error in translation.

776
196 What is the meaning of the word *sa*? Could it be the original name of the Divinity? Since certain Bantu tribes have a high regard for snakes and dedicate a cult to them, some Europeans have wanted to see in it a translation of the word "snake." That is a great and fundamental error. The word *sa*, "snake," and the word *sa* in the sentences *sa* *bi* *fign*, *sa* *bi* *na*, etc., may have the same spelling, but [194] the pronunciation is different. The hard "s" of *sa*, "snake," is pronounced by opening the teeth slightly and protruding the lips, and the word *sa* *in* *sa* *bi* *fign*, etc., is pronounced by closing the teeth and pulling in the lips. Thus, these are two quite distinct words. Moreover, to claim the snake is, or has been, the Bambara divinity seems to me a piece of stupidity. If they do not claim any bond of real or physical kinship even with the animals that are their taboo, one must believe *a fortiori* that they would not claim /77/ an animal, even a snake, as Creator and sovereign Lord. Some Bambara have it as a family taboo, and a branch of the Mande people have such great respect for the python *Minia* (1) that now they are known only by the

776
825
[illegible]01

1. The Baganda of Uganda before they became Christian venerated the snake as the dwelling place of a demon. Their snake has a great resemblance to the animals that are family taboos for the Bambara, or better still, to the python *Minia*, taboo of the Mande branch commonly known under the name of *Minia*-*n*-*ka*. Since the *Minia*-*n*-*ka* derive their name from the word *Minia*, name of the snake that is venerated and an object of public worship, some have insisted that the *Bambara* or *Bamana* derive their name from the word *Bama*, meaning "cayman" /a species of alligator/. If the cayman, *Bama* in

776
825
101

the Bambara language, had given its name to the people, this animal would be taboo for them, as the Minia is taboo for the Minianka, and the Mani or Mali, the hippopotamus, is taboo for the Malinke. None of this is true of the cayman in Bambara country; it is in no way the taboo of the tribe. Moreover, the word Bamana could just as well come from the word bama, a kind of tench /a fresh-water fish of the carp family/ which is found in abundance in the Bani and the Niger. This idea has not occurred to the partisans of the cayman, who undoubtedly are not familiar with the fish called bama. The word Bambara comes from the word bamba which means "rebel" and, in the mouths of the Moslems, carries the meaning of Kafri. Bambara means "the rebel who has never submitted to Islam," and the Negroes of the west speak of Bamako or Bambako, "the river of the rebels." Father Copte, a student of the Bambara recognized by the Negroes of the Ségou, quickly understood this fact and noted it in his accounts in the Annals of the White Fathers. Mr. De Lafosse, an administrator most conversant with the native laws, customs, and ways, recognized it also, and I share their opinion concerning the name Bambara.

776
196
name of Minia-n-ka, the people of the Minia snake. But have the Minianka ever worshipped, or do they still worship, the snake as their

121 This work deals only with the Bambara of Ségou and Kaarta since it has already been noted that, save for their specifically local history, [4] a study of their concepts and institutions is valid in general for all of the Bambara.

103
131
[133] It is exceedingly difficult, besides, to be entirely certain as to which of the Bambara actually belong to the Kaarta and Ségou areas since the two designations do not correspond to any very exact geographical region. When a native speaks of Kaarta or of Ségou, he only vaguely understands the terms, and this with good reason.

131 I have noted elsewhere (1) that, etymologically speaking, the

---

1. In my work Les Khassonké [The Kasonke], which appeared in the series, Revue du Monde Musulman.

101 103 131 word which we write and pronounce Kaarta means "country of the Karé" or, more accurately, "the group of the Karé." Wherever there are Karé people they are called, in the Soninké language, Karu-ta, [5] which is contracted to Karta. From this we made Kaarta because we misheard the long first "a." The word Kaarta designates a particular area only because of the people who inhabit it, and its value as a geographical expression is acquired only by extension. Among the natives the term is used for various areas within the region which extends from Goumbou to Koniakari and from Nioro to the Senegal River. On our maps, Kaarta is bounded by Kingui on the north, Diomboko on the west, Senegal and Bélédougou on the south, and Kaniaga on the east. However, all of these names of cantons themselves have very vague meanings.

101 103 131 614 For the purpose of the present work, the word Kaarta takes on a special meaning. The Bambara who founded a clan at Sounsan-na in the Karé country are called Karta-n-ko in the Soninké language and Karta-n-ka-u (the Kaarta people) in the Bambara language. As a result, Kaarta has become the name of the areas occupied by the clan in its various peregrinations.

The "people of Ségou" acquired their name in quite a different manner, since they were named for Ségou, the capital of the clan. The country of Ségou should be understood strictly to allude to the to-da which, to be described in chapter 5, was, by and large the area surrounding Ségou and occupied by the chief and his family and followers. In a wider sense, the country of Ségou referred to all the territory under the authority of the Ségou clan. At the height of the clan's power, "the country of Ségou" occupied both banks of the Niger, following the axis of the river from Kangaba to Timbuktu.

101 131 631 Our European need to have things clearly defined may be satisfied by having the territorial limits of Kaarta and Ségou set forth on a map, but on the native level, with which this book is primarily concerned, such local definition has little relevance. These empires did not aim to dominate any given area but rather sought to exploit as large a number of individuals as possible without regard to country or race.

French West African Natives FA2
Malinke FA27

F 101 103 double meaning is no less evident in the Tarikh-es-Soudan, especially on p. 161 of the French translation. The same double usage is evident in oral traditions.

Thus it is understandable that the word Mandé has come to be considered as an equivalent of our words "empire" and "kingdom" when they are used in a geographical sense, and that, as a result, the term has varied in application because it depended on an ever-changing territorial domain subject to the domination of successive ma.

M F 103 642 However, it is not only from the geographical point of view that the term Mandé has remained indefinite or vaguely defined; the same uncertainty prevails on the political level. In a general way, Mandé is considered to be exclusively the empire of the Mandingue people, who are one of the subdivisions of the group called Mandé by the Europeans (1). In order to understand the meaning attached to the word "empire" in western Sudan, it is essential to place oneself on the native level and not on that of our European civilization from which the term is borrowed.

F B 103 642 [614] Briefly, the Sudanese empire is a system of clans. It is formed by bringing together of elements taken over from clans that have either disintegrated or are in the process of doing so. It acquires power and extension through the influence of the founder or, less frequently, of one of his successors, and then falls into decline at the hands of enemies or as a result of schisms which arise at the death of the ruler on whose success and "flair" its fortunes have depended.

F B 101 103 It is this constantly repeated process of grouping, separation and regrouping which dominates the entire [15] history of the Sudanese empires and dynasties and which makes any study of the people so very difficult. The geographical nomenclature is,

---

1. Mandé, as the name for a group of peoples or of native languages, is unknown to the Sudanese; in this sense it is used exclusively by the Europeans.

French West African Natives FA2
Malinke FA27

F B 101 103 of course, dependent on these social facts. Often a region is named after the people who inhabit it as, for instance, is the case with Kaarta. It may also derive its name from a dominant political group, and when a region has been ruled by successive groups, it acquires a series of superimposed names even though the territories to which they apply may not necessarily be identical; this, too, applies to Kaarta -- a poorly defined region.

This explains how it came about that different empires were lumped together under the same name, Mandé (and other variants). The empire ruled by the Keïta chiefs was merely the last to arise and it presumably dates from the beginning of the thirteenth century.

B *173 M 173 One tradition has it that the ancestors of the founders of this thirteenth-century empire came from the east -- specifically from Kong (1). Under the leadership of Kabala Simbo Keïta, they settled in Dodougou, a canton whose capital was at Tabou and whose chief, a Bambara of the Konnaté dyamu maintained his power with the help of a militarized group called Mandinké. This was a group similar to those composing the sofa, ton-dyon' or furu-ba-dyon' who supported the fortunes of the clans of Ségou and Kaarta. In the Soninké language the word mandinké means, M [101] literally, "a person of the master's (or lord's or king's) household," and in the plural it means "the master's (or king's) people."

The canton of Kiri (2), adjoining that of Dodougou, was

1. I see in this precision nothing more than the usual polarization of which I speak on p. 45 , note 1 .

2. The Dodougou (abbreviated to Do) and the Kiri are, indeed, considered to be the oldest cantons of the so-called Mandé clan. In this connection, see Humblot, "Du nom propre et des appellations chez les Malinké ..." [On Proper Names

*173 In addition to the traditions reported in what follows and emanating from the dyeli traditionists, Karé Tammoura and Gran Koaté, I was given the following explanations concerning the Kouloubali.

According to the first version, the sons of one Péné Kouloubali left Kéniéroba (1), northwest of Kangaba, in order to escape from the pursuit of their enemies. There were three brothers: Mamourou, the eldest, Nzan and Ngolo. They settled in Bani-n-ko at Dougouna, in the home of a blacksmith named Sékolo Balo. When their enemies followed them there, they fought for a year, and then Mamourou persuaded his brothers to flee. So they left, taking Sékolo Balo with them.

They crossed the Baoulé at Kana, thanks to the help of a poyon' who offered to ferry them since they had no boat. Ngolo, who was the last to cross, killed the poyon' and carried the body to Dionforongo (east of Barouéli) where he ate it.

●[103] The three brothers came to Ségou-koro-si-do (2), then to Sinsala, so named because of the "enclosure" (sinsa) built there by the Bozo, and better known as Sansanding. There, Mamourou advised separating, the better to elude their pursuers. Mamourou returned to Ségou-koro-si-do, and his descendants are the Kouloubali of that region.

Nzan settled near Ségala in a place called Sanabala after his wife Sanaba, by whom he had a son Nto. Nto had a son named Kéfa, who fathered Sama. The latter had four sons: Sara, who lived at Salaga; Touman, at Toumanbougou; Fara, at Diakoro; and Demba at Donguélé.

Ngolo settled at Kourouma, where he became one of the ancestors of the Kouloubali of that region. He married a Moorish

1. The period, undefined as always, certainly antedates the seventeenth century.

2. Si-do: "the forest of butter-trees," a place said to be near Ségou-koro.

[103]

History of the Empire of Kaarta

The Descendants of Nya Ngolo

*173 *Sounsan* (1). When Sounsan and his people had crossed
*173 the Niger with the help of the *poyon'*, they proceeded in the direction of Lamballaré (2). There, at the village of Darigo, Sounsan

[551]
[845]

1. As we shall see, the given name marks some event connected with the person's birth. It is common practice, when the delivery is difficult, to hang a rabbit's foot at the mother's side, hence the name Sounsan ("rabbit" in Bambara). The name Péné, used elsewhere, has the same etymology.

*173
564

Sounsan is said to have practiced the saddle-maker's trade at Kounando. It is told how one day he went with a *kulé* (a native carpenter) into the country to get some wood needed for a saddle. At one point the two became separated. The *kulé* found some honey and ate it, only to be taken sick. He threw up the honey on some stones and then went away. Soon after, Sounsan passed the spot and, seeing the honey, picked it up and ate it. When, on his way back, he learned how the honey happened to be there, he was so disgusted and cursed the *kulé* so roundly that, since that time, none of his people can touch a *kulé* with impunity. All members of that caste are thus *tne* (taboo) for that branch of the Kouloubali.

[103]

2. In the Soninké language, this is the name of the region watered by a swamp

*173
•103

(lambe, in the local dialect) which, south of Ouossébougou, has its source near Dongué and ends in a pool at Ouaha. In Soninké, "Lamballaré" means literally "on the edge of a watercourse," and the Bambara use "Kodala" in the same sense. In Sounsan's day, this was a small canton ruled by the Soninké of Darigo, a village called Douabougou (market) by the Bambara and situated on one of the branches of the Segabala (of the maps), a tributary of the Baoulé.

According to Raffenel (Vol. I, p. 365), the Soninké village was called Baïko, a name unknown to me and one which seems likely to have resulted from a mishearing of the name Darigo. In any case, its identification with Bammako, as proposed by Raffenel, is unacceptable.

*173 accepted the hospitality of a blacksmith, fa Siné Dyara, asking the latter's protection from probable pursuit by Barama Ngolo. Fa Siné was poor but he is said to have understood the language of the birds and, at the very moment when he was talking to Sounsan, a passing bird told him that powerful chiefs would descend from his guest. That is why he said to Sounsan: "I'm a poor man, but I'll do all I can for you and your descendants. In return, I ask that you promise -- for yourself and for them -- these things: first, that you never kill nor imprison any of my people; then [104] that, every time the head of your family changes, a wife and a horse belonging to the dead man be given to the head of my family."

[695] They swore on a copper anvil which was thrown into a well, and after that fa Siné told Sounsan where he was to settle.

Sounsan was still closely allied to some of the Taraoré, whose descendants now live in the Diangounté area. They gave him a wife named Dougo (1), who was the mother of his son Massa.

1. According to another version, Dougo

775 551 Like this first theory, the second, too, can be accepted, and the names can be translated as a lament of the parents to those who congratulate them: "He is without shame (doubtless he has come back to leave us again)." --"We may as well throw him away (i.e., will he not leave us shortly?)." -- "He is a worthless man (i.e., do you think he will not abandon us?)." -- "He is nothing (i.e., it all is the same to us whether we have him or not; will he stay with us longer than a breath which passes and disappears?)."

But whatever theory is accepted, the Negroes' belief in the reincarnation of children who died at the breast before having attained the use of reason remains unchanged. They are also generally unanimous in believing in the reincarnation of young men and women and men and women who die in the prime of life. Such persons have not completed the whole cycle of their existence and must begin it again.

And what of the old men? Do not they come back to life? When a child brings to mind the features of a deceased elder of the family, does it not receive his name? A Bambara never uses the name of a man whom he respects in vain or in an unsuitable manner; so a child animated by the soul of an old man is given a second name, a borrowed name, and the real name is known only by the father, the mother, close friends, and the one who bears it. However, many are given a most expressive name which testifies to this belief; they are called segi, sagi, "he who has come back to life."

764 775 The legends -- and there are many -- only confirm what I put forward; so need I cite any? An old man of Fobougou, a village about 30 or 40 kilometers from Ségou, not far from the Bani on the road that leads to Koutiala, was given magnificent funeral honors at his death. The fetishes were brought out of their dirty dens and bathed in the blood of victims; the women sang to the sound of the drum for three days running. It was a festival which lacked nothing, not even
775 d'lo, or millet beer. A few years later some young people of the village going in search of work went into the Tlébi (1) region,

1. The term Tlébi is used to denote the entire western region, including Bamako, Kati, Kita, Kayes, Bakel, etc., as far as the ocean.

SYSTEM OF TRANSCRIPTION

104

â,	an in "planche."	ŭ /u/,	ou in French
ẽ,	in in "dinde."	û,	un in French
ę,	ě in "jet."	č,	for "tch."
e,	e in "dé."	ǰ,	dj in "djinn."
ǫ,	o in "vol."	ñ,	gn in "hargne."
o,	o in "pot."		
õ,	o in "balcon."		

The native words transcribed in roman letters must be pronounced in the French manner.

In some cases, the translation only of Bambara expressions is put between quotation marks in order not to encumber the text. Moreover, this translation is literal in order to remain as close as possible to the Bambara thought even if it results in some awkwardness or turns of phrase difficult to understand.

614 "the people (of the clan) of Massa"; the Segu-n-ka-u (2).
631

2. From another point of view, Segu-n-ka-u means "the people of the country of Ségou."

"the people (of the clan) of Ségou."

104 Since we are always obsessed by our own system of or-
128 ganization, these terms appear in our writings as village (dugu),
canton or province (kafu), and empire (ton', which is a clan).

Because of the convenience of expressions that are familiar to us, we shall use this terminology in this study, and it seems essential to define briefly the value of these terms in native society in order to avoid ambiguity which, to say the least, gives rise to distorted delusions.

In Kaarta and the Ségou country before the time of the
173 two great clans whose history we have given and whose develop-
563 ment and operation we are about to describe, there were dugu
631 which usually had no connections or at most were joined in some
ephemeral kafu. These kafu were composed of a majority of Bambara mixed with Soninké and people of other races. The Soninké dugu were noted for their prosperity, sometimes even wealth, and this gave them a degree of pre-eminence over the Bambara dugu. This prosperity rested on the labor of a slave population that the Soninké had managed to acquire for the most part by commercial dealings.

This de facto hegemony usually had no corresponding political or administrative organization; its only outward sign was the scorn with which the Soninké regarded the less fortunate Bambara and, conversely, the sullen hostility of the Bambara toward the rich Marka (as they called the Soninké). As a consequence, local quarrels broke out from time to time which sometimes developed into bloody conflicts. The early history of the Massa-si clan is a good example of this state of affairs, to judge by the record in the chronicle cited above.

173 The Ségou-Kaarta regions, under the authority of Mandé
and Songhaï clans, were in this state, in semiobscurity because
631 they were outside the zone of direct administration by these clans.

/xiii/ Introduction

101 131 The Bambara tribes which form part of the Mandé group are at present spread out in French Sudan from the 11th to the 14th degrees latitude north and from the 7th to the 11th degrees longitude west. Three groups which have settled respectively in the circle of Issa Ber, in Kaarta, and in the circle of Odienné are noticeably separated from the central group which occupies the shores of the Niger around Bamako and Ségou.

105 The Bambara live in small villages in the savanna; they practice primarily agriculture (millet, digitaria /Fonio/, rice, maize, etc.), but also herding and gardening. The shore dwellers of the Niger are fishermen and live in symbiotie relationships with the Bozo who taught them fishing techniques and who are generally recognized as the first inhabitants of these regions.

173 The Bambara state that they came from Mandé. This region, where the successive capitals of the ancient kingdom of Mali were situated, has long attracted the attention of research workers (1).

Moreover, it is "the center from which radiated forty-four tribes at present spread out in the area between the Atlantic coast, the Senegal, and the Niger, or to Dahomey" (2). The region indicated above also

105 Identification

The Bambara (Bamana, Banmana) belong to the Mandingo branch of the Niger-Congo linguistic stock. They numbered 830,000 in 1933, but Urvoy (1942) estimates them at 1,200,000. Paques (1954) gives their number as about 1,000,000, but this figure excludes about 125,000 mixed-blood Fulani-Bambara, 15,000 Somono fishermen, and perhaps other special groups. Despite centuries of contact with Islam, the Bambara have remained almost exclusively pagan. Delafosse (1912) reported only 30,000 Moslems, mainly members of the Somono fishing caste, and Urvoy (1942) states that Moslems then numbered fewer than 100,000. The Bambara were subject to the old empire of Ghana and then to the Malinke empire of Mali (Melli). They gained their independence about 1670, when the Bambara kingdoms of Segou and Kaarta inherited the remnants of the Malinke state. These native kingdoms, in turn, fell before the expansion of the Tukulor around 1854-61.

Basic Economy

Primarily agricultural, with some irrigation and use of manure. The staple is "small millet" (Pennisetum spicatum; Paques calls it P. typhoideum). Next in importance are maize and sorghum (Andropogon sorghum and A. saccharus; Paques reports Sorghum vulgare and saccharine sorghum). Also of considerable importance are rice (both the African Oryza glaberrima and the Asiatic O. sativa), wheat (still in the experimental stage), fonio (Digitaria exilis and D. iburna; probably Bazin's "eleusine" is the same), bananas, manioc (Manihot dulcis), yams, and earth peas. Lesser crops include peppers, tomatoes, onions, squash, melons (Citrullus sp.), sesame (Sesamum indicum), beans (Phaseolus sp. and Vigna catjang), okra (Hibiscus esculentus or Abelmoschus esculentus), roselle (Hibiscus sabdariffa), peanuts (introduced from America in the 18th century), sweet potatoes, eggplant, peas, potatoes (since 1941), and gourds. Fruit trees include mangoes, papayas, oranges, limes. Textile crops include cotton, Hibiscus cannabinus, and recently sisal and kapck.

1:Murdock--2 E-4 (No date) 1958 Fl Africa
Bambara FA8
Bambara

105 There is considerable gathering of the fruits of Bassia parkei (for shea butter), Parkia biglobosa (for flour), baobab (Adensonia digitata), Kola (Sterculia acuminata), Corchorus, Cenchrus, Cassia, tamarind, Eriodendron anfructuosum, and Khaya senegalensis.

Cattle are kept in fair numbers (milk and butter used), but apparently almost exclusively by Fulani. There are numerous goats, sheep, dogs (eaten), and chickens, and a few donkeys, horses, and pigs. Bees are kept.

There is considerable fishing, especially by the Somono, and some hunting. Trade is important, and is largely in the hands of Moslem Marka. There are markets.

Sex Division of Labor

The men hunt, fish (though women fish in shallow water), clear land, plant crops, hoe (with some assistance from the women), and in general do the bulk of the agricultural work. The women, however, cultivate gardens, work in irrigated cotton, rice, and onion fields, and do most of the harvesting. They also gather (but men gather honey) and (according to Aubert and Paques) tend and milk cows (but Labouret says men do animal husbandry). Women care for poultry.

Property

Land ownership is invested in the local "chef de la terre" but is held in usufruct, without right of sale, in part by individuals and in part collectively by extended families. The latter also have collective property in houses, trees, livestock, and slaves.

Inheritance is patrilineal. Property descends to younger brothers in order of age, then to half-brothers by the same father in order of age, then to the head of the extended family for private property but to ElSo for family property. Monteil, contra Aubert and Ortoli, says that family property descends undivided to ElSo, is divided among daughters in default of sons, and goes to male collaterals in the absence of children.

Social Stratification

Bambara society is stratified into a class of warrior

105 nobles (including royalty), free commoners, slaves, and despised endogamous castes. The latter include smiths, tanners, woodworkers, hunters, fishermen (the Somono), and, lowest of all, "griots" (bards, musicians, and family archivists). Slave status is acquired by capture in war or enslavement for crime. The children of slaves are slaves, but if the father is free both the slave woman and her child become free.

Marriage

Marriages are arranged by the heads of extended families through an intermediary. Girls are betrothed in infancy. A bride-price is customary; it is paid by the head of the groom's patri-family to the head of the bride's family. It consists of 30,000 to 40,000 cowries (Gallieni), of eight cattle (Aubert), of goods including livestock and also of premarital agricultural bride-service (Paques). Marriage by exchange of women between two families is also quite common, being normally effected by the collusive abduction of one woman and the gift of the other in composition; in exchange marriages the bride-price is foregone, but ceremonial gifts are retained. Paques reports that a MoBr owes his SiSo a wife, normally giving the latter one of his own sister's daughters (cross-cousin marriage); in return the nephew owes him agricultural labor.

There is general, preferential, and exclusively nonsororal polygyny. The first wife is chief wife. Each co-wife has her separate quarters, and the Hu rotates. Secondary unions are preferential with ElBrWi and WiSi (only if Wi is dead), allowed with FaWi, FaBrWi, but forbidden with YoBrWi, SoWi, and WiDa.

Family

The residential unit is a patrilocal extended family (up to 80 or more members), occupying a compound. Each has a patriarchal head (fa), who administers the family property, directs collective agricultural work (about two days a week), and adjudicates disputes. He is assisted by a council of family elders, and is succeeded by his next younger classificatory Br, then his eldest So or BrSo.

105 Residence

Residence is patrilocal--in the extended family compound of HuFa. The heir to the headship of a patrifamily moves into the domicile of his predecessor.

Kin Groups and Exogamy

There is a definite tendency toward local endogamy.

Paques reports that cross-cousin marriage, especially with MoBrDa, is allowed or even preferential in some regions, forbidden in others. Aubert says marriage is forbidden with either maternal or paternal kin. Ortoli states that descent from a remembered common ancestor is a bar to marriage.

There are patronymic patri-sibs with totemic taboos, which are divided into lineages. Most sources state that the sibs are agamous, but Ortoli reports "clan" exogamy, by which he possibly means lineage exogamy. The core of each extended family is a minor patri-lineage.

Kinship Terminology (mainly from Paques, A from Aubert, K from Koelle)

Fa--fa. Mo, FaWi--ba (Paques also ma, na). Ch--dɛ́, denn (A), denge (K). Da--dem-muso (K). ElBr--kɔrɔ, koro (A). YoBr--doro (PK), doko (A). ElSi--koro-musso (A), nkoro-muso (K). YoSi--doko-musso (A), ndoro-muso (K). Wi--muso. Hu--t'ɛ, k'ɛ.

FaBr--benoro. MoBr--ben-nkɛ, benke (A). FaSi--ntene, tene-musso (A), bingi-musu (P). MoSi--ba-ko. Parallel nieces and nephews called "child." SiCh (m.s.)--be-ni, bare-ndi. GrFa--mokɔ, m'ke (A). GrMo--mo-muso.

Sibling terms extended to parallel cousins. Cross-cousin--Kalame, banindin (given by Aubert for "maternal cousin" as opposed to sibling terms for "paternal cousin").

Settlement Pattern

The Bambara live in compact villages and towns, usually composed of several slightly separated quarters, each surrounded by a mud wall. Two house types are reported: (1) round huts with cylindrical brick walls and conical

105 thatched roofs, and (2) rectangular houses with parapeted brick walls, flat terrace earth roofs supported by logs, and an interior court. Delafosse says the two occur concurrently, Arcin that the former occurs in the S, the latter in the N, Bazin that the former occurs only in contact with the Malinke, and other tribes with cone-cylinder dwellings, Urvoy that the former prevails in the W (S and SE of the Kagoro) but that the rectangular type with terrace roof is the usual Bambara type.

Community Organization

Patri-families (see Family) are localized as minor patrilineages. The quarters (see Settlement Pattern) are possibly localized lineages. Paques indicates that villages result from the growth and fission of patrifamilies, and that through a similar process districts of patrilineally related villages arise from one village. This suggests patrilocal clan-communities. Boys are circumcised and girls excised (clitoridectomy) shortly after puberty. Prior to this each sex is organized into age-grades (approximately infancy to 6, 6 to 10, and 10 to 15), membership in which endures for life. Each age-set has a head and other officials, and acts as a unit in collective work and festivals. Prior to initiation, boys and girls are paired off in pseudo-marriages (sex relations forbidden), and through this and collective labor a substantial degree of education and socialization are achieved.

Local Government

Each village has a headman (dugutigi), who is a "chef de la terre" or priest-chief, and is descendant of the original founders of the village. He adjudicates disputes assisted by a council of elders composed of the heads of quarters and extended families. He administers the land of the village, communes with the ancestors, and sacrifices at a special shrine which symbolizes the unity of the community. He is succeeded by his YoBr, then ElSo.

105 State

Villages are organized into districts under a district chief (fama), who is a member of the dominant "family" in the district; he is succeeded by his YoBr, then ElSo or BrSo. He is assisted by a "council of notables". Like a local headman, he represents the land and ancestors in a religious sense. He also dispenses justice, directs public works, and commands in war. He receives half of all war booty, a share in all wild and domestic animals killed, all gold and ivory, and fees from markets, pasturage, and ferrying. Recently there has been no political organization above the district level, but formerly, during the dominance of the great states of Segou and Kaarta, districts were grouped for administrative purposes into provinces headed by appointive chiefs (often sons of the ruler). The head of these states maintained a court and capital, and like village and district chiefs was believed to mediate with the supernatural.

Warfare

Each district chief has an army, used primarily for plundering and slave raiding. At periods in their history the Bambara have waged wars of conquest.

Kagoro

105 Identification

The Kagoro (Bagane) belong to the Mandingo branch of the Niger-Congo linguistic stock. They number about 21,000, of whom only 6,000 are Moslem. They speak Bambara and are said to be a mixture of Bambara and Fulani. Paques reports 27,000 in 1950. Lavergne du Tressan reports 27,000 in 1950 and says the Bambara are mixed with Soninke. Their territory has repeatedly been invaded by Soninke migrations, was the seat of struggles between the Soninke and the Malinke, and was later actively colonized by the Bambara. They are mainly scattered among stronger populations, but did have a small state in the 18th century. They are pagans.

Settlement Pattern

The prevailing house type is the cylindrical hut with brick walls and conical thatched roof.

/This is a general work by a well-known French ethnographer dealing with Bambara religion and its relations with other aspects of the culture. The main sections of the book are concerned with mythology, the gods, the individual and his religion, sacrifice and the altar, technology and religion, the cults, various rites, and divination. Dieterlen tries to relate each individual aspect of Bambara religion to basic philosophy and world-view. She also shows the relationship of Bambara religion to other religions in the Sudan, which resemble it in most basic aspects. --Analyst/

Foreword

114 The present work is part of a series of studies undertaken in French Sudan since 1931 by the Griaule Missions.

In the course of the sixth, seventh, and eighth expeditions (1946, 1948, 1949) the research dealt with the religious institutions of the Bambara. In this essay we have presented, with the necessary comments, the results of the inquiries conducted by the author, while taking into consideration the work of her teammates.

The information was gathered in the region of Bamako at Koulikoro, Kayo, and Kangaba; in the circle of Ségou at Konodimini, Banankoroni, Diammarabougou, Soroba, Massala, Toko, Shouola, Kokou Banankoro, Pelengena, Sama, Kala, Kalabougou, Ségoubougou, and Ségoukoura; and in the various quarters of the capital city. /Bamako/.

Some elements of the material described were gathered for the Institut Français d'Afrique Noire of Dakar.

115 The Bambara who collaborated regularly in the gathering of information are the following.

Dyodo Diallo, son of Zangué Diallo, notable of Ségou.
Mamadou Diara, director of the rural school of Bamako.
Bala Diara, of Banankoroni, farmer, hunter, diviner, chief of the Komo, chief of the Kworé.
Dji Diara, of Soroba, farmer, hunter, healer, chief of the Nama.
Bakonimba Koulibali, of Soroba, farmer, chief of the Komo.
Boï Koulibali, teacher at Konodimini.
Mousa Woulalé, of Pelengena, griot. /minstrel and herald/
Mousa Diara, of Sama, farmer.
Nadyè Dambèlè, of Konodimini, potter.

000 Numerous chiefs, notables, priests, and generally speaking, all those who were sources of interesting information were consulted. We thank them for their collaboration.

We also thank the Governor of the Sudan and the Administrators of the circles of Bamako, Ségou, and Mopti, /xii/ the Director of the Institut Français d'Afrique Noire for the facilities they have provided us.

This study was conducted under the direction of Mr. Marcel Griaule whom we thank for his help in the field and for his advice concerning the presentation of the material. We also thank Mrs. de Ganay who has collected some of this material.

177 121 substratum on which each tribe has grafted its original system. The study of this substratum would help define the problem of origins and influences.

After this, we have at our disposal the support of philology and above all the advantage of seeing the Bambara live their beliefs and of discovering their myths in a crude but expressive material as well as in numerous rites. The observations made over a wide field of inquiry serve as the basis for the presentation of this religious system.

114 121 The Bambara have been for a long time the subject of articles and works, of which we will give below a concise bibliography. The only author who, until now, has attempted to describe their beliefs as a system is L. Tauxier whose study of La Religion Bambara /Bambara religion/ takes into account to a large extent the works of the Abbé Henry and Ch. Monteil. However, through the descriptions of these different observers which are certainly conscientious, this religion appears as a composite of diverse and even inconsistent elements with no apparent link between them. Despite a uniform plan and a laudable absence of preconceived ideas, L. Tauxier has been unable to bring out the fundamental concepts of the people he observed.

In fact, the study of a present-day Negro religion runs into difficulties of various kinds stemming on the one hand from the necessity of going into the field and on the other hand from the largely esoteric character of the doctrine. These circumstances make this study essentially a work of discovery.

Indeed, Bambara religion, like all Sudanese religions, has an exoteric part, quite easily accessible, which observation conducted along scientific lines may reveal in detail. Rules of life admitted by all, beliefs openly professed, and public or private practices may be the object of detailed work. But this religion, like that of the neighboring peoples, rests upon a doctrine whose fundamental principles
[609] are known to elders and initiates who show considerable aversion to confiding in strangers, particularly whites. Such a situation explains the ignorance in which scholarship has remained for so long concerning the religious way of thinking of this people (1).

812 1. The Bambara themselves distinguish between two kinds of knowledge. The first, called doni fyẽma "knowledge (which has) wind" /xviii/ is superficial

812 and considered to be "the introduction to beliefs and customs." It belongs to adults who know little of cosmology. On the contrary, the second, called "deep knowledge" (doniya duna or kuru doniya), is restricted to priests, heads of families, elders of both sexes who are versed in "the science of the things of creation." It can only be acquired slowly in the course of successive initiations and through actual instruction which is sometimes diffused during the rites.

● 114 121 /xviii/ A rigorous method of observation which neglects no detail and which involves the use of close collaboration from the natives has brought forth a system coherent in all its parts and, it may be said, based on a metaphysics hitherto unknown. Taking the Bambara postulates as a point of departure, the sequence of events through the myths, the development of institutions and technology, their operation and the actual destiny of man in the cosmos all unfold in a logical framework.

On the other hand, this system is projected into the concrete in the form of symbols which borrow the most diversified aspects and which play an active role. The symbolism not only penetrates religious life proper by appearing in the sanctuaries, in the cult materials (shapes and sign writing), or during religious ceremonies (times and places, rituals, etc.), but is present in every aspect of secular life and daily behavior.

The metaphysics and the religion of this people offer a structural entity which includes all social, technological, and economic activities. In the following chapters, we shall attempt to clarify these principles and this system. We believe we may safely state that certain inconsistencies or contradictions presented by the religious system as it is described here are not due to Bambara thought—even though it is subtle and based on a dialectic—but to lacunae in the investigation.

773 [524] both the waters that flowed over the earth in the past and those that will spread over the world when Faro orders them (Fig. 4).

While awaiting that day, Faro continues his work. Taking the spiral route originally followed at the time of the reorganization of the world, every four centuries he travels about, inspecting the confines of the world, and then returns to the central point whence he surveys and governs the universe.

Chapter 2

The Representations

776 /34/ The duality of *glã*, in the microcosm that is man by his twin souls (*ni* and *dya*), is projected into the universe in the form of the pair, sky-earth, originally formed by the splitting of the spirit in two. The pair is represented by two supernatural powers, Faro and Pemba, to whom the principal Bambara cults are addressed.

Pemba is both spirit, strength, and matter. He is actually represented by an engraved piece of wood, symbol of plank originally responsible for the creation of all living things on earth. Theoretically, each family has one.

Faro, master of the word, reigns both in the sky and in the waters, which are the earthly reflection of the sky. In his capacity as master of the word and reorganizer of the universe, custodian of life, and guardian of souls, Faro, light and vibration, reigns in the seventh heaven. As master of the waters, he is described by the Bambara as a living being who has a body and is subject to metamorphosis. Yet to the initiated, he remains first and foremost a higher spirit, detached from contingencies and free in the exercise of the sovereign power conferred on him.

In order to understand fully the spirit of the Bambara religion, it is necessary to examine all the representations of these powers (1).

776 114 1. A few authors have summarily described Faro, in particular, L. Tauxier in *Religion bambara* (pp. 142-145), in

776
114
●

which he quotes Msgr. Bazin and the Abbé Henry. These authors have not disclosed the fundamental role of this power nor the area he covers.

It would be proper to compare here these representations with those observed by the Griaule missions in the Sudan such as the Nommo of the Dogon, the Domfé of the Kouroumba, and Faro or Yégou of the Bozo, and published in the following books and articles:

M. Griaule, Masques Dogon /Dogon Masks/; "Le Domfé des Kouroumba /The Domfé of Kouroumba/," Journal de la Société des Africanistes, Vol. II (1941), pp. 7-20. D. Paulme, Organisation sociale des Dogon /Social Organization of the Dogon/. S. de Ganay, Les Devises des Dogon /Dogon Device/; Le Binou Yébéné /The Yébéné Binou/. G. Dieterlen, Les Ames des Dogon; "Notes sur le Génie des Eaux chez les Bozo /Notes on the Water Spirit of the Bozo/," Journal de la Société des Africanistes, Vol. 12 (1942), pp. 149-155. G. Dieterlen and S. de Ganay, Le Génie des Eaux chez des Dogon /The Water Spirit among the Dogon/. M. Griaule, Dieu d'eau. Mrs. B. Appia has also published interesting observations in "Note sur le Génie des Eaux en Guinée /Note on the Water Spirit in Guinea/," Journal de la Société des Africanistes, Vol. 14 (1944), pp. 33-42.

/35/

Pemba

776 Pemba, born of primordial vibration, was originally a "globule," kuru, which whirled around to create the earth. While he was a whirlwind, a molecule broke off and became a seed, which fell onto the earth, sprouted and became the Acacia albida. The latter grew,

Spiritual Principles (1)

● 114 1. A few comments on the spiritual principles of the Bambara (in particular on the dya and the nyama) have been collected in the chapter entitled "Théorie des âmes" by Tauxier, La Religion bambara (pp. 14-25), in which the author appraises the works of the Abbé Henry and of Ch. Monteil. Some of the observations made in the following chapter have been summarized by the author in "La Personne chez les Bambara" and in "Note sur le tere chez les Bambara /Note on the Tere among the Bambara/."

It will be useful to compare this study of spiritual principles with the studies made among the Dogon and presented respectively by M. Griaule, S. de Ganay, and the author in Masques Dogon, Les Devises des Dogon, and Les Âmes des Dogon.

761 776 The Soul, ni, and the Double, dya:

[826] Faro controls the principle of life in water, which is his realm as well as the life-giving element par excellence. In the bodies of living beings, this principle has its seat in the blood. The blood of the sacrifices offered to the spirit (or failing that, the juice of the tomato, a transformation of blood) is a contribution to the reservoir of life controlled by Faro—life which he redistributes in all its forms throughout the universe. Water is the privileged element in which life may persevere indefinitely. Elsewhere, life is maintained only if water comes to nourish it.

761 776 842 833 Faro's creative function is materialized by each marital partner eating a tomato before sexual relations. This act is accompanied by the recital of a prayer. The juice of the fruit, which contains the body of the future child, transmits life according to the following mechanism:

761 776 842 824 Faro receives the offerings of tomatoes grown ritually in the consecrated fields, as well as the blood of victims slain in his name above the waters. Blood and juice, spreading over water, the fertilizing agent, are collected by the swallow, Faro's airborne messenger. Liberated in space, they return to the soil with fertilizing rain and penetrate the tomato seeds which thus contain a particle of generative power.

*173 814 217 212 These, in brief, are the difficulties encountered in dealing with sources for native historical tradition. When Islam introduced [25] a written language, there was created a new category of archivists, the marabouts. They have added this duty to many others; it cannot be proved that they have purged the job of its former vices, but it may be stated categorically that they have added a few new ones.

It is notorious that, in the Sudan, the Moslem traditionists have an ineradicable tendency to transpose everything into their own mentality. Further, since a manuscript gives a kind of quasi definitiveness to the oral tradition, including all its errors, it becomes almost impossible to eliminate these errors because of the unquestioning respect usually accorded a written document.

*173 814 [177] There are also the non-literate Moslem traditionists: ordinary dyeli who have been converted in the usual Sudanese fashion, as described in Chapter 6, and who have abandoned none of the characteristics of their caste. They have merely added a few peculiarities due to Moslem influence.

● 114 In drawing on these sources, European publications add new reasons for doubt. Most especially, because of a desire -- legitimate, in principle -- to bring some sort of order out of the incoherent mass of traditions, but also because of a need to make them fit a personal theory, the European author takes refuge in an hypothesis. Now there is no objection to this, assuming that the hypothesis on which the author bases his theories is clearly stated. Too often, however, the hypothesis is so well concealed or even so intricately entwined in the tradition that it is impossible either to discover what it is or to set an exact limit to its range. This new metamorphosis of tradition is not the least dangerous for historical truth.

115 *173 It is to two non-literate Moslem dyeli that I am indebted for the traditions concerning the Ségou and Kaarta clans. My interpreter, Souleïman Goundiamou (1), whose services as a guide and informant on native matters were invaluable to me, gave

571 182 with individuals in the same way as individuals deal with each other. They are not only moral persons, as we put it, but they are truly persons, [156] as evidenced by the Blacks' impulsive need for anthropomorphism.

812 Let us note, finally, that a Black does not abstract himself from surrounding nature; nor has he reached the stage of development at which man regards himself as a kind of intermediary between the natural and the supernatural. The Black is an integral part of nature and that is why he treats it like himself. Therefore, natural phenomena are subjected on his behalf to the same kind of ritual sequences as those followed in his own behavior.

Chapter 3

Communities

1. General Considerations

● 114 — 631 Native society is not simple, and Europeans studying these countries have used terminology which, not being defined, has obscured reality.

In particular, they have used the terms "kingdom" and "empire" to describe Sudanese states, and both authors and readers have taken these expressions to imply a social organization more or less analogous to those meant by these words in our country.

631 These empires or kingdoms, however, are simply clans, i.e., political groups that have imposed their authority on other groups whose members then become their tributaries, members of a caste, or slaves. Such an empire, if one wishes to use this term, has no exact geographical boundaries or, if one prefers, its boundaries are constantly changing. Furthermore, the country embraced by this term has two parts: territories which may be said to be under direct administration, in which the authority of the clan is directly imposed; and those territories whose position with respect to the ruling clan

596 614 The functions of the "fa." The duties of the fa are many and complex; for the sake of clarity, we shall study them under three headings: cult; relations between communities; administration of property (which will be studied in connection with community property).

596 614 782 Cult. Religion gives considerable strength to the family since nothing is decided without consulting the manes and the gods. Raffenel has given us a picture of old Niany praying to his manes on behalf of his absent son: "O my God, I command my son to your case since he has gone away on a mission important to all of us. Be with him on his journey. Preserve him from the wicked and from all misfortune so that he may once again enter by this door through which he departed and before which I am now kneeling. I implore you, O my God, to restore him to my love and to that of his mother, his brothers and his sisters (1)."

[114] 1. In spite of deviations due to Raffenel's desire to give a personal and literary touch to what he reports, the essential points of this prayer are accurate, and that is why I quote it.

[787] The chronicle of Kaarta tells us that old Sounson begged for early death as a sign that his lineage would be powerful in the future. Also, in order to make a prophecy come true, Deniba Bo submitted to the fatal blows of the Khassonké to make sure that his people would conquer the country!

After all, no one is free of fear of the gods, not even those whom one would take for brave spirits. Raffenel tells us that Bouo, his informant, feared the wrath of the god whose secrets he had revealed. The chronicle of Ségou tells that Ngolo, thinking he had aroused the wrath of his manes by encouraging evil desires in his eldest son, Ntyi, did not hesitate to sacrifice his [179] own grandson, the son of the aforesaid Ntyi, an atrocity which bears witness to a faith that was as profoound as it was barbarous.

175 of El Hadj Omar, up to April 6, 1890, the day French troups under Lt. Colonel Archinard delivered Ségou from the cruel Moslem occupation.

The Bambara did not long accept the French yoke. To put an end to their plots, the French resident, Captain Underberg, had to execute the king Mari Diara, an act which inspired several local revolts, chiefly in the Sénoufo region. But the new Fama, Bodian, supported by the French, was able to rapidly re-establish peace. Moreover, the destruction of the Toucouleur kingdom of Macina by Colonel Archinard deprived the rebel Bambara of all possibility of outside support. The Ségou kingdom was definitively pacified in 1893.

CHAPTER 6

SOCIAL ORGANIZATION

I. Traditional Structure of Bambara Society

A. Social and Political Organization

182 Traditional Bambara social organization is entirely tied up with religious organization; moreover, the social organization determines the whole economic organization to such an extent that the latter cannot be studied independently.

114 In fact, we still know very little about Bambara social organization. Some good records are available to us in the work of Monteil (1), Aubert and Ortoli (2), Délafosse (3), Labouret (4),

(1). Monteil, Les Bambara du Ségou et du Kaarta [The Bambara of Segou and Kaarta].

(2). Aubert et Ortoli, *Coutumier juridique de l'A.O.F.* [French West African Common Law].

3. Delafosse, *Haut-Sénégal et Niger* [Upper Senegal and Niger].

4. Labouret, *Les Mandingues et leur langue* [The Mandingo and Their Language].

etc., but these are still very fragmentary and incomplete. In addi- 177 tion, this society was completely disrupted by the French conquest, either by such radical measures as the suppression of slavery or by a natural evolution as a result of contact with European societies. Nevertheless, traditional structures retain their vitality, despite the effort to adapt them to European formulas.

178 The society seems to have oscillated between familial anarchy and the clan stage, according to alternating ranges of groupings, disassociation, and regroupings.

1. The Family

594 596 Concerning the Sudanese, Delafosse has already made the distinction between "the restricted family" and the "extended family." The restricted family is composed of the parents and children who live in the "hut." Taken alone, it does not represent a social unit. The true social cell is the extended family. This is the large united family made up of a group of restricted families whose heads recognize a common ancestor. This group, composed of agnates in principle, is the *ba-denya*, whose members live in huts within an enclosure: *gwa* or *so*. The two ends of this [51] enclosure rest on a *blõ* (vestibule) where the ancestors' altar is found.

601 612 According to Labouret, the Bambara distinguish three categories of family ties: the paternal line, the maternal line, and relationship by marriage. The child takes the *dyamu* (honorable name) of his father's group, but the terms applied to ancestors and descendants are the same as those of the maternal line.

"... Kinship includes the following generations: *tolo-mina*... *tolo-sama*... *tolo-ma-sama*: who seizes or pulls ears (a belief has it that if a great grandson pulls the ear of his great [829] grandfather, the latter becomes deaf);

771 the religious system which animates and explains it. The Bambara is an essentially religious being; all his acts are dictated by ritual duties or taboos, and he finds his true liberty only within the rules transmitted to him by tradition. To destroy his religion amounts to destroying his whole social structure as well as his soul. Inversely, every transformation of techniques will have grave repercussions, not only on the material life of the individual, but also on his inner life. In fact, the religion is itself part of a whole cosmological and metaphysical system which explains and orders every existing thing. The simplest and poorest object is a reflection of complex concepts which leave nothing to chance or to imagination, and we arrive at the paradox that the technical progress and enrichment introduced by the European civilization impoverish the over-all metaphysical representation, while the social evolution ends in detaching the Bambara from his traditional religion and makes of him a rootless being who will be the prey of badly understood ideologies, foreign to his nature and to his genius.

● 114 771 L. Tauxier (1), pursuing the studies of Father Henry and C. Monteil, has attempted a comprehensive description of Bambara beliefs. But in his exposition Bambara religion appears to be composed of disparate elements with no links between them. This impression is due in large part to the esoteric character of this religion, which certainly contains exoteric elements accessible to all, but whose fundamental principles remain known only to the elders and to the initiated who are reluctant to confide in strangers. The study of Bambara religion has been entirely renewed in these last few years by Mme. Dieterlen (2), who has known how to go beyond the superficial knowledge we had had of this people. She has introduced us to an admirably cohesive metaphysical system and ritual organization [81] In fact, "the Bambara metaphysic and religion offer a structured whole

1. L. Tauxier, *La religion bambara* [Bambara Religion].

2. G. Dieterlen, *Essai sur la religion bambara* [Essay on Bambara Religion].

771 If the Bambara have fought to safeguard their independence,
181 they have done so primarily to preserve their faith and keep their
fetishes. They have shown such great attachment for these, that their
[101] conquerors have described them as rebels and applied to them the epithet
Bamba, synonym of Kafri. These religious struggles in themselves
allow us to state as an indisputable fact that before the arrival of the
Moslems the Bambara were animistic and sacrificed to genii. /69/

776 Did they have an exact and precise idea of their genii as they
811 do now? Apparently yes, for they always reasoned using themselves
as a basis of comparison so that in their minds the invisible, impalpable
genii to whom they sacrificed had a striking resemblance to man.
It is not a man, and yet it is one, they say unable to define their
concept or idea, ma si fa do (1).

776 The Moslem word djin translates this idea precisely, and the
782 Bambara use it in everyday language; but when the day of the sacrifice
comes, they become unaware of it and there remains only one word
-- ma, meaning "man." When they redden with blood the bark of
[824] the baobab (Adansonia digitata), the tamarind tree, the false cedar
(family of the cedrelaceae), etc., to obtain the good graces and protection of the genie who dwells there, they always confer on it the
title ma ("man"), and never that of djiné. "Ma n'zira ba, ma n'tomi
ba, ma djala ba; O great baobab man, O great tamarind tree man,
O great false-cedar man!" begins the formula used by the sacrificer
in offering victims and millet flour to the genie (2). They also have

1. Ma; "man"; si fa' "certain kind";
do; "it is."

114 2. In /J. Henry/, "Culte des
esprits chez les Bambara
/Spirit Worship among the
Bambara/," Anthropos, Vol. III,
No. 4 (1908), p. 1 /p. 702/,
note 1, there is an error in translation.

●114

[194]

> Ma n'zira ba, etc., does not mean "great baobab of man." The real meaning is: "O man who is a great baobab." In writing it I prefer a "z" to an "a." Usually the Bambara soften the hard sound by a euphonious little "n." With a hard "s" the word sira cannot be distinguished from the word "tobacco": sira siramougou, "snuff tobacco"; n'ziremougou, "baobab flour."

776 a purely Bambara term to express their idea /of these spirits/, and
782 they to the word djiné; they call them gnéna.

776 782 177 198 Before the arrival of the Moslems, the Negro sacrificed to beings to whom they have attributed bodies and souls, although imponderable and invisible, who are intermediate between men and angels and whom the Arabs call الجنّ el djiné. But they also sacrificed to evil beings, superior to the former in power, whom they call boli. The legend of the boli, an ironic legend which I will tell in full when I discuss this matter, is sufficient proof of this belief. For the Moslems of the Sudan only two things here below /70/ are worthy of attention: Mecca (Makka) and Stamboul -- old Abdul Hamid, Sultan of Constantinople -- who in their eyes, as in the eyes of all Moslems of our colonies, is the great Pope of Islam. Everything that does not bear the stamp of Mecca, everything that does not come from Stamboul, is to be rejected and scorned. Thus the Bambara, fertile in expedients, quickly managed to find a way out of their discussions with the propagators of Islam: "All our boli come from Mecca," was their weapon of war.

776 177 198 The Bambara were pursued from every side, unable to perform publicly even religious ceremonies in honor of simple genii. Can one believe that they added others that were still more terrible? As conquerors the Moslems have always ruthlessly opposed idolatry, destroying its temples and overthrowing its altars. "Believe or die" has always been their motto and always will be as long as they feel

/xi/ Foreword

114 The present work is part of a series of studies undertaken in French Sudan since 1931 by the Griaule Missions.

In the course of the sixth, seventh, and eighth expeditions (1946, 1948, 1949) the research dealt with the religious institutions of the Bambara. In this essay we have presented, with the necessary comments, the results of the inquiries conducted by the author, while taking into consideration the work of her teammates.

The information was gathered in the region of Bamako at Koulikoro, Kayo, and Kangaba; in the circle of Ségou at Konodimini, Banankoroni, Diammarabougou, Soroba, Massala, Toko, Shouola, Kokou Banankoro, Pelengena, Sama, Kala, Kalabougou, Ségoubougou, and Ségoukoura; and in the various quarters of the capital city. /Bamako/.

Some elements of the material described were gathered for the *Institut Français d'Afrique Noire* of Dakar.

115 The Bambara who collaborated regularly in the gathering of information are the following.

Dyodo Diallo, son of Zangué Diallo, notable of Ségou.
Mamadou Diara, director of the rural school of Bamako.
Bala Diara, of Banankoroni, farmer, hunter, diviner, chief of the Komo, chief of the Kworé.
Dji Diara, of Soroba, farmer, hunter, healer, chief of the Nama.
Bakonimba Koulibali, of Soroba, farmer, chief of the Komo.
Boï Koulibali, teacher at Konodimini.
Mousa Woulalé, of Pelengena, *griot*. /minstrel and herald/
Mousa Diara, of Sama, farmer.
Nadyè Dambèlè, of Konodimini, potter.

000 Numerous chiefs, notables, priests, and generally speaking, all those who were sources of interesting information were consulted. We thank them for their collaboration.

We also thank the Governor of the Sudan and the Administrators of the circles of Bamako, Ségou, and Mopti, /xii/ the Director of the *Institut Français d'Afrique Noire* for the facilities they have provided us.

This study was conducted under the direction of Mr. Marcel Griaule whom we thank for his help in the field and for his advice concerning the presentation of the material. We also thank Mrs. de Ganay who has collected some of this material.

*173 These, in brief, are the difficulties encountered in deal-
814 ing with sources for native historical tradition. When Islam
217 introduced [25] a written language, there was created a new
212 category of archivists, the marabouts. They have added this duty
to many others; it cannot be proved that they have purged the job of its former vices, but it may be stated categorically that they have added a few new ones.

It is notorious that, in the Sudan, the Moslem traditionists have an ineradicable tendency to transpose everything into their own mentality. Further, since a manuscript gives a kind of quasi definitiveness to the oral tradition, including all its errors, it becomes almost impossible to eliminate these errors because of the unquestioning respect usually accorded a written document.

*173 There are also the non-literate Moslem traditionists:
814 ordinary *dyeli* who have been converted in the usual Sudanese
fashion, as described in Chapter 6, and who have abandoned none
[177] of the characteristics of their caste. They have merely added a
few peculiarities due to Moslem influence.

114 In drawing on these sources, European publications add new reasons for doubt. Most especially, because of a desire -- legitimate, in principle -- to bring some sort of order out of the incoherent mass of traditions, but also because of a need to make them fit a personal theory, the European author takes refuge in an hypothesis. Now there is no objection to this, assuming that the hypothesis on which the author bases his theories is clearly stated. Too often, however, the hypothesis is so well concealed or even so intricately entwined in the tradition that it is impossible either to discover what it is or to set an exact limit to its range. This new metamorphosis of tradition is not the least dangerous for historical truth.

● 115 It is to two non-literate Moslem *dyeli* that I am indebted
*173 for the traditions concerning the Ségou and Kaarta clans. My
interpreter, Souleïman Goundiamou (1), whose services as a guide and informant on native matters were invaluable to me, gave

1. Now chief of the village of
Ambidédi (Gadiaga).

115 me the benefit of his experience in translating these tales. I
*173 hereby thank him most sincerely.

As far as Ségou is concerned, Karé Tammoura's story does not seriously modify the known general outline, but all the same it differs from earlier publications in its essentially native feeling, which I have tried to preserve. It is very interesting, for instance, to see how step-by-step [26] an empire developed out of a fla-n-ton': this change in a strictly native form of association is most instructive. It shows in detail how one of these Sudanese empires -- and not the least of them -- was organized. It is essential to know this if one is to understand the political history of this country. Community, brotherhood, clan, slavery, Islam -- all essential and too-little-known factors of Sudanese society -- are there to be seen, alive and just as they are.

In spite of its weaknesses and its lacunae, I am therefore giving, without change, the story told by the dyeli Karé Tammoura. This Ségou Bambara has occasionally allowed himself to cover the truth with a Moslem veil, because he is a convert; but it is easy to discern the facts under the poorly applied make-up.

115 My informant for Kaarta was principally the dyeli Gran Koaté, who was also a native of Ségou and a Moslem. He was for a long time attached to the person of Ahmadou, son of Omar, with whom he resided at Ségou and at Nioro, where he acted as a close confidant and was sometimes charged with important missions.

124 I feel obliged to point out that these two informants are not entirely responsible for the lacunae in their stories. I had had these two learned men brought from Ségou to Djenné, where I was commandant of the circle in 1902. In spite of my desire to learn as much as possible from them, I had to consider the demands of my post, which left me little leisure, and also had to avoid keeping them too long away from their homes. Hence, I was forced to cut short their long speeches. I do not think that I missed anything essential, but undoubtedly there was much to be gleaned from what had to be sacrificed for lack of time. I hope that one of my more fortunate successors may be able to fill in the lacunae in the stories set down here.

/xiii/ · Introduction

[illegible] 131 The Bambara tribes which form part of the Mandé group are at present spread out in French Sudan from the 11th to the 14th degrees latitude north and from the 7th to the 11th degrees longitude west. Three groups which have settled respectively in the circle of Issa Ber, in Kaarta, and in the circle of Odienné are noticeably separated from the central group which occupies the shores of the Niger around Bamako and Ségou.

105 The Bambara live in small villages in the savanna; they practice primarily agriculture (millet, digitaria /Fonio/, rice, maize, etc.), but also herding and gardening. The shore dwellers of the Niger are fishermen and live in symbiotie relationships with the Bozo who taught them fishing techniques and who are generally recognized as the first inhabitants of these regions.

173 The Bambara state that they came from Mandé. This region, where the successive capitals of the ancient kingdom of Mali were situated, has long attracted the attention of research workers (1).

1. See J. Vidal, *Au sujet de l'emplacement du Mali (ou Melli* /on the subject of the Mali site/), pp. 251-268; *Le véritable emplacement du Mali* /The true site of the Mali/, pp. 606-619. This author designates by Mali I to IV the four villages of Dyélibakoro, Niani, Maninkoura, and Kangaba, which had been successively the royal city. See also Ch. Monteil, *Les Empires du Mali* /The empires of Mali/, p. 13.

Moreover, it is "the center from which radiated forty-four tribes at present spread out in the area between the Atlantic coast, the Senegal, and the Niger, or to Dahomey" (2). The region indicated above also

2. See D. Zahan. *Aperçu sur la pensée théogonique des Dogon* /Survey of theogonic thought of the Dogon/, pp. 113-133. This author gives the name of the tribes originating

has the name of Dyéliba and used to be /xiv/ called Toubla. The name of Kaba (1) given by all Sudanese to the ancient capital of Mali actually designates the village of Kangaba. But the oldest agglomerations known, before Dyéliba (Mali I according to J. Vidal), are situated in the regions of Kri Koroni and Ouanda.

---

in Mandé. See also S. de Ganay, *Notes sur la théodicée bambara* /Notes on Bambara theodicy/, pp. 212-213. "In the village of Manin Kaba, there exists what is called the *manti blo*, 'the vestibule of the Mande,' in which are arranged around the object called *pembele* twelve seats (*sigi yoro*) representing the forty-four 'races' of this common hearth."

This origin is well known to the Sudanese, but the number of tribes varies. In the course of the septennial ceremony of Kangaba (see p. 15 note 1) the *griot* say: "We were forty-eight; through the mixture of the winds, the races came out at the four cardinal points" (*an tumbi debe ni seki la, siaw bwora fyẽ nyamile seleke nami*).

1. The word *kaba* has its origin in *ni ya ka ba ko ye* "this is astonishing," an expression currently used concerning the sanctuary and the ritual objects it contains. The Dogon, who claim to originate in Mandé and who have dispersed into the cliffs of Bandiagara from agglomerations to which they had given the name Kani, explain this last term by giving it the meaning of "little Ka." These were, in a sense, relay stations between their original habitat and the one they now occupy. Concerning these migrations, see G. Dieterlen, *Les Ames des Dogon* /The souls of the Dogon/, pp. 9ff.

796 778 In the village of Kangaba a sanctuary, called mande blo "vestibule of Mande," or kaba blo "vestibule of astonishment," is the object of a septennial ritual attended by representatives of all the races /who are/ said to be of the same origin. There ceremony consists in rebuilding the roof of the sanctuary which shelters an object dolin, but only those persons of pure race belonging to the Kéita family (1) and the traditional griot of the chiefs of Mandé, the Dyabaté, are authorized to perform the ritual. Only they may penetrate the sanctuary and tread on its soil, which is said to be "heavier and more powerful than all things." (2)

551 1. The name of Kéita, for which various etymologies have been found, is that of the founders of the Mandingo empire. Cf. C. Monteil, Les Empires du Mali, p. 31, and L. Tauxier, Histoire des Bambara /Bambara History/, p. 40: "The first kings of Mali lived at Kangaba and were in fact Kéita."

By extension the name of Kéita may be adopted by individuals belonging to one of the tribes originating in Mandé. Thus a Dogon will take on as dyamu Kéita if he comes to live in Mandé. On the other hand, the heraldic device of the Kéita, which relates the high deeds of the Mandingo princes, includes the devices of almost all the tribes said to be of the same origin. This common origin may perhaps throw some light on the institution of regularized name changes observed in Black Africa, a problem which has claimed the attention of some authors; see in particular P. Humblot, Du nom et des appellations chez les Malinke /Names and nomenclature among the Maunke/.

778 376 2. Kangaba dugukolo ka gri féw be. The sanctuary is a round hut provided with two doors, one oriented to the east and the

778 other to the west, and covered with a
346 thatched roof in which is hidden an object
called *dolin*. The village is surrounded by
several sacred places: a *sunzun* tree to the
north; a well to the west; two stones, one
(*fara fi*) situated near the village and the
other (*fara gwe*) on the river's edge.

796 The septennial ceremony is performed
at night. Toward evening, the eldest of
the Kéita goes secretly to remove the
object *dolin* from the old thatch and hides
it. The new roof is made with materials
gathered by the descendants of Farako
Makan Kegni (straw, bamboo, and fibers)
while the women of the same relationship
plaster the walls. The Dyabaté *griot* who will
officiate provide themselves with a little
stick of *sunzun* wood about the length of the
ring finger with which they will rub their
teeth; the twigs must be cut by the elder
sister of the chief of the *griot* who gives her
in exchange /xv/ a loin-cloth of eight
[801] bands of white cotton and a number of cowries
in multiples of 8 such as 8,480.

The orators who will officiate during the night wear a white cap topped by a band of cotton of the same color and a yellow tunic (*wolo*) (see p. 20). Sitting inside the hut from which the old roof has been removed, facing east, they spit into a receptacle in order not to soil the ground. The Kéita remain outside the hut on a site marked by stones and covered with gravel collected in the river bed by young men. During the entire night, the *griot*, each in turn and encouraged by a relative, recite from the devices of all the tribes issued from Mandé. At dawn, they sing as they circle the construction; then the Kéita hoist up the new roof. Next, the elder

196 secretly replaces the object in the new thatch. A white ox is sacrificed at the well.

The information collected on this ceremony is still fragmentary but the color of the clothing worn by those officiating, that of the victim, the number of bands of the loin-cloth, and the number of cowrie shells given by the griot to his sister, the origin of the gravel used as the seat for the Kéita are evidence that we have here a ritual executed under the protection of Faro (see Chap. II)

175 As early as the fourteenth century numerous travelers described the Bambara /xv/as organized into small groups headed by a chief and more or less submitting to the neighboring empires. This state of affairs lasted until the period of the Peul invasion of this region (in the seventeenth century) which founded two kingdoms and created a local aristocracy of mixed Peul and Bambara blood. The first of these kingdoms was that of Ségou, the history of which is partly known (1). The investigations centered particularly in this area; the chief town which was a capital for a long time retains the traces of a well [197] organized legal system and religion. It is also in this area that, according to specialists, the purest dialect is spoken. (2)

1. On the history of the Bambara we refer the reader to the well documented volume of L. Tauxier. Histoire des Bambara.

[556 191] 2. The children of families sufficiently wealthy to afford it were formerly sent to Ségou to live with affinals in order to learn how to speak well an elegant and pure language.

197 212 The Bambara dialects belong to the sub-group of Mandingo languages of the Nigero-Senegalese group. (3) The Bambara know certain

3. See A. Meillet et M. Cohen. Les Langues du Monde /Languages of the World/, p. 546.

197 systems of signs and ideograms which may be considered as a sort of
212 writing and the study of which is currently pursued. The system from
which all the others supposedly stem, the *glã glã zo*, has 226 ideograms
which, according to informants, summarize the knowledge of the
[182] Bambara (1). On the other hand, the Bamba use a numerical system
based on twenty. Moreover, an analysis of the texts collected, some of them quoted in this essay, has brought to light an /xvi/ important number of words which, according to informants, belong to an ancient language of Mandingo origin, now used as liturgical language. It is not within the framework of this essay to present this material or to comment upon it, but it is appropriate to note that the study of this vocabulary would contribute to an understanding of religious thinking among the Bambara.

173 The Bambara have a rather clear idea of their early history and even of their prehistory. They describe their ancestors with precision and know the phases of development of their technology. These premises are necessary to an understanding of their religion which, like the other institutions, is especially linked to this technological development. Moreover, the only observable remains comprise household furniture and utensils, transient but perennial material whose forms and ornamentation indicate the metaphysical principles on which their way of thinking is based.

177 It is appropriate not to neglect those influences which have acted
121 upon the Bambara through their contacts with other Sudanese tribes

---

1. See. p. 21. This system and two of the ideograms, of which *to* designates the mash of boiled cereals and by extension nourishment in general, will be the object of a comment by M. Griaule and G. Dieterlen. "Signes graphiques des Soudanais. L'Homme. /Graphic signs of the Sudanese man/." *Cahiers d'ethnologie, de géographie et de linguistique, Hermann* (in press).

On certain types of writing observed among the Mandé and the Vai, see J. Février, *Histoire de l'écriture* /The History of Writing/, pp. 528-529.

177 connected since ancient times with the Mediterranean basin (1). The
121

1. We wish to draw attention to M. P. M. Schuhl's point and his allusion: "The premises which we owe at present to investigations like those of M. Griaule would seem to call for new syntheses and provide curious terms of comparison. Indirect influence from Greek myths on Sudanese mythology is, furthermore, not impossible." Essai sur la formation de la pensée grecque /Essay on the Formation of Greek Thought/, Presses Universitaires de France, 2nd ed., 1949, p. xv.

M. Schuhl recalls, on the other hand, the resemblances proposed by M. A. Jeanmaire, between Greek facts and some African institutions considered as survivals of a proto-Mediterranean civilization (Couroi et courètes), Lille, 1939.

Mali empires, in particular, by encouraging the expansion of Islam have maintained a center in the heart of the Sudan, which has left traces in the social and religious institutions of the Bambara.

However, it is difficult, if not impossible, at the present time to make a historical presentation of this religion or even to consider the problem of influences. We have with us the last phase of this religion and we know its development only through myths which, furthermore, do not make it appear to be a system established very early; it seems to have developed slowly with various additions which were felt and expressed in the myths. On the other hand the present religions of the Sudanese seem national; they form separate entities among the Dogon (2) the Bozo, the Kouroumba /Kurumba/, the

2. See M. Griaule. Dieu d'eau /water god/.

Minianka, the Sonray /Sonhrai/, and the /xvii/ Mossi. However, it is necessary to bear in mind the fact that their systematic observation, undertaken a few years ago, has brought to light a common

177 121 substratum on which each tribe has grafted its original system. The study of this substratum would help define the problem of origins and influences.

After this, we have at our disposal the support of philology and above all the advantage of seeing the Bambara live their beliefs and of discovering their myths in a crude but expressive material as well as in numerous rites. The observations made over a wide field of inquiry serve as the basis for the presentation of this religious system.

114 121 The Bambara have been for a long time the subject of articles and works, of which we will give below a concise bibliography. The only author who, until now, has attempted to describe their beliefs as a system is L. Tauxier whose study of La Religion Bambara /Bambara religion/ takes into account to a large extent the works of the Abbé Henry and Ch. Monteil. However, through the descriptions of these different observers which are certainly conscientious, this religion appears as a composite of diverse and even inconsistent elements with no apparent link between them. Despite a uniform plan and a laudable absence of preconceived ideas, L. Tauxier has been unable to bring out the fundamental concepts of the people he observed.

In fact, the study of a present-day Negro religion runs into difficulties of various kinds stemming on the one hand from the necessity of going into the field and on the other hand from the largely esoteric character of the doctrine. These circumstances make this study essentially a work of discovery.

Indeed, Bambara religion, like all Sudanese religions, has an exoteric part, quite easily accessible, which observation conducted along scientific lines may reveal in detail. Rules of life admitted by all, beliefs openly professed, and public or private practices may be the object of detailed work. But this religion, like that of the neighboring peoples, rests upon a doctrine whose fundamental principles [609] are known to elders and initiates who show considerable aversion to confiding in strangers, particularly whites. Such a situation explains the ignorance in which scholarship has remained for so long concerning the religious way of thinking of this people (1).

812 1. The Bambara themselves distinguish between two kinds of knowledge. The first, called doni fyẽma "knowledge (which has) wind" /xviii/ is superficial

812 and considered to be "the introduction to beliefs and customs." It belongs to adults who know little of cosmology. On the contrary, the second, called "deep knowledge" (doniya duna or kuru doniya), is restricted to priests, heads of families, elders of both sexes who are versed in "the science of the things of creation." It can only be acquired slowly in the course of successive initiations and through actual instruction which is sometimes diffused during the rites.

114
121 /xviii/ A rigorous method of observation which neglects no detail and which involves the use of close collaboration from the natives has brought forth a system coherent in all its parts and, it may be said, based on a metaphysics hitherto unknown. Taking the Bambara postulates as a point of departure, the sequence of events through the myths, the development of institutions and technology, their operation and the actual destiny of man in the cosmos all unfold in a logical framework.

On the other hand, this system is projected into the concrete in the form of symbols which borrow the most diversified aspects and which play an active role. The symbolism not only penetrates religious life proper by appearing in the sanctuaries, in the cult materials (shapes and sign writing), or during religious ceremonies (times and places, rituals, etc.), but is present in every aspect of secular life and daily behavior.

The metaphysics and the religion of this people offer a structural entity which includes all social, technological, and economic activities. In the following chapters, we shall attempt to clarify these principles and this system. We believe we may safely state that certain inconsistencies or contradictions presented by the religious system as it is described here are not due to Bambara thought—even though it is subtle and based on a dialectic—but to lacunae in the investigation.

/xix/ Organization of the Book

128 In the first chapter of this work we present the myths which form the framework of the religious representations. A deep knowledge of the cosmogony and myths is necessary to understanding the institutions as well as the most current rituals.

The second chapter analyzes the representations, particularly that of Faro, master of the word and holder of life, whose cult is general and who presides at all human activities.

The third chapter approaches the notion of the person and describes in succession the spiritual principles and the body which are dependent upon Faro, then the name, the device, and the taboos which integrate the individual into society. It also examines the dissociation of these various elements at the moment of death.

The fourth chapter summarizes the mechanism of the blood sacrifice, the most important moment of the ritual, which disposes of the elements making up the person as described in the preceding chapter. It also includes the description of the places where the cult is practiced and the original altars of the Bambara.

The fifth chapter deals with the origin, development, and organization of technology such as fishing, hunting, agriculture, weaving, the forge, and pottery, the performance of which is largely ritual in character and which support the religious representations.

The sixth chapter describes individual and family cults as well as those pertaining to the village as a whole. The great religious societies, which group individuals around the altars set up for specific purposes, are also examined. These cults, so different in appearance, bring into play the same representations, and the rituals involve comparable mechanisms of the forces brought into motion.

In the seventh chapter we give a detailed description of a certain number of rituals chosen from the most representative. A predominant place is reserved for those relating more directly to the "person": birth, circumcision /xx/ and excision, initiations, funeral, and ancestor cults. Among others, those concerning refuse, rain, and general rites called "the renewal of the year" are commented upon.

The eighth chapter presents an analysis of several methods of divination which appear as a synthesis of Bambara metaphysics and reflect in very subtle symbolism the entirety of their knowledge.

SYSTEM OF TRANSCRIPTION

104

ȃ,	an in "planche."	ũ /u/,	ou in French
ẽ,	in in "dinde."	ũ,	un in French
ę,	ě in "jet."	č,	for "tch."
e,	e in "dé."	ǰ.	dj in "djinn."
ǫ,	o in "vol."	ñ,	gn in "hargne."
o,	o in "pot."		
õ,	o in "balcon."		

The native words transcribed in roman letters must be pronounced in the French manner.

In some cases, the translation only of Bambara expressions is put between quotation marks in order not to encumber the text. Moreover, this translation is literal in order to remain as close as possible to the Bambara thought even if it results in some awkwardness or turns of phrase difficult to understand.

Chapter 1

MYTHS

13 The myths of the Bambara must be understood as a sum of knowledge, a kind of world view, and not as a sequence of fixed etiological stories. It may be said that they make up a metaphysics which includes a knowledge of the objects of creation as well as a knowledge of the principles of their state and action.

The knowledge of divine things takes its place within this ensemble but does not come first in time. The Bambara deals with creation and the cosmos, conceptualized as an entity peopled with deities, a cosmos of which he himself is the most significant expression. The following texts explain first the origin of creation, secondly the ordering of the perceptible universe, created from the primordial vibration, and finally the creation of originally immortal living beings on the earth molded by Pemba.

Domination of the mundane world and particularly of the human species was first assumed by one of Pemba's metamorphoses, the phallic tree balanza, which lived on blood and assimilated the strength of men. His reign was troubled by severe cosmic disorders provoked by the rebellion of the first-created female, Mousso Koroni. Today men are still subjected to the after-effects of these disorders. However, the fact that the tree abused its power caused Faro to rise up against it and vanquish it. Faro then reorganized the universe by establishing its boundaries and naming and classifying its component elements. On Earth, where death made its appearance due to the curse of the tree, the basis of this reorganization is the principle of duality, the "word" taught to men by Faro who from then on has the master of the Word and of restoring techniques which would, as needs arose, assure subsistence. The reign of Faro, whom henceforth men worshipped, was founded on order and measure and foreshadowed the "future words" which he is to disclose in the course of time.

/2/The sequence of mythical themes presents a structure of the cosmos; space and time; natural and supernatural worlds; categories, numbers, and the notion of the spatial and temporal cohesion of its elements (interdependence of phenomena). It situates the individual (body and spiritual principles) and in the psychological realm, describes

113 the slow evolution of consciousness (concept of pain), judgment (concept of responsibility and guilt), will (concept of the creative effort and work), all of which develop in man with the advent of suffering [761] and death. Death is felt to be an accident in the working out of the universal order, an accident compensated for in part by the conservation of spiritual principles and their reincarnation in accordance with the fundamental belief in the eternal resurrection of all things. The myth describes the first ritual, the rejuvenation, which ceases with the advent of death but is replaced by blood sacrifice which today is still the central practice of the rites (1).

> 1. Wherever possible the writer has avoided discussion of the details of myths so as not to distract the reader from the general line of the Bambara world view. But the scholar, in attempting to better understand the collective psychological processes of this people, may profitably study the numerous variant themes found among them.

The myths described below are the framework of the present-day Bambara religion and of the general cults to Pemba and Faro maintained by the people.

Preliminaries of Creation

1. The glã glã zo

112 The Bambara creation myths imply a philosophy of being and of the universe developed from the void, from nothing, fu (2).

[802]

> 2. This concept is expressed by a sign with the same name which can also be translated by "nothingness" or "zero" and is a part of the Bambara number system. See Fig. 1, No. 11. For a discussion of this sign denoting the continuity and proliferation of creation, see p. 102.

772 This knowledge, derived from the Kéita of Mandé, is called glã glã zo and describes the timeless and primordial state that preceded the stages of creation. The word glã which indicates the original void, connotes at the same time the ideas of movement, awakening, reawakening, and resurrection; glã is the principle of the inner universal movement of the cosmos and all that composes it. On the other hand, the term implies the idea that creation is continuous /3/ from the moment of its beginning and perpetually maintained in all things as well as in the universe taken as a whole (1).

[197] 1. The word glã belongs to the ancient language. The Bambara term closest to it in meaning is kununi, which means "reawakening, resurrection." Glã is the principle of the eternal resurrection of all things.

Glã, "full of its own emptiness and its emptiness full of itself," extended its power everywhere. It sounded "a voice of emptiness" which brought into being its double, dya; glã became two, thus indicating the primordial character of duality, the existential principle (2). The two gave forth a damp substance, zo zumale, "cold rust," which came out as invisible liquid vapor and formed hard shiny substances (3).

2. It is said: glã ye lankolo nye, lankolo nye glã ye, glã ye a yere ke lankolo fla ye, lankolo fla ye a yere ke glã ye; "glã is the emptiness, emptiness is glã, glã made itself into two emptinesses, two emptinesses made themselves into glã itself."

3. glã ye koloya a la ka kr zo ye, boli tumbi kę šiši ye bali ye, ka kę dyi sumale ye, ka kę zo yele gele ye; "glã made a substance which was rust come out of itself; this emission was invisible smoke which then became cold water, the latter becoming a hard and shiny rust." The informant translated the word zo as "rust."

And while comparing this matter to the product of oxidation in a metal, once it is released, he describes it as a crystal.

When all was filled with these frozen substances, *glã* emitted a power, *zo ñami*, which, rising and descending within itself, produced an inner breath called *fyẽ tasuma*, "fire of wind." The two *glã* crossed this vast content and the fire melted the substances (1). At the time of this first fusion "the vast *glã* gave a place to all things secretly and invisibly" (2).

1. "The two *glã* arose and melted away the voice of *glã*; creation spoke with the voice of *glã*"; (*glã flã wululila ke*, *glã kã yeke*, *dali ye glã kã fo*).

2. *kono glã ye sikiyoro di few be ma*, *gundo ni blika la*. The word "thing," a literal translation of *fẽ*, is used here in its most general sense.

The two *glã* then immobilized themselves, "gathering their energy into themselves," and, once more, everything became fixed and frozen. Then, a second time, they melted the substances, as though destroying the preliminary form in order to make another. These movements, called *glã glã*, bear witness to the very essence of *glã* which is the eternal resurrection of all things, and the repetition of the word expresses duality, the basis of creation. At the time of these two successive fusions, the *glã* fixed "four points," one at the moment of the first melting and the other three in the course of the second, all of which were placed in a state of "immobile action" (3).

3. The informant compares this stage of creation to a hand holding a pencil, the tip of which rests on a sheet of paper. The hand is poised as if to write, but is immobilized. The four points anticipate the cardinal points, beginning with the east (see p. 223).

772 Then *glã* released within itself a shuttling motion /4/, the repercussions of which gave the elements of the potential universe a soul. This movement also had the effect of situating the elements and of keeping them in place through the force of attraction (*mana*): "*glã* has stirred up the elements, they have taken their places, and heat has kept them in place" (1).

> 1. *glã ye few yereyere, u nye, u sikiyoro mine, funteni yu mana*. The informant compares this horizontal movement to one which might be applied to a surface pitted with cup-like depressions: the objects of creation, at first strewn about in disorder, would, under the effect of this shuttling movement, each place itself in a hole. *Mana* is translated as "attraction, " or "agglutination, " when it is used as a noun. It can also mean "to shed" and may designate the product of the shedding the exuvia; *mana* is thus a synonym of *folo*.

At the same time, the contact established between the two *glã* produced a kind of explosion out of which was ejected "a hard and powerful substance" which vibrated as it descended. Out of this vibration came, one by one, the signs which, attracted by the objects (as yet uncreated but about to be created) to which they gave name, placed themselves on the objects. Thus, each thing acquired its sign and its word, and "obeying the movement of *glã*, " each began to vibrate feebly within itself and in its assigned place.

When all things were thus assigned their places and potentially designated, another element detached itself from *glã* and placed itself on the objects in order to take cognizance of them: this was "man's foot" (or "the grain of the foot"), a symbol of human consciousness. As this element gained knowledge, it communicated this knowledge to all things which then became conscious of themselves. Thus, all things were designated and named silently before they came into existence, and were called into being by their names and their signs. But they did not know themselves as such except in man's consciousness, the "grain" or principle of the universe.

772 Then all things assembled and began to rumble in order to complete the creation of the universe. The glã remained within themselves and delegated to zo the responsibility of liberating the designated and animated objects which they contained and of which they had created the essence. Zo took possession of them and joined their elements into a huge ball, kuru, called yo yebali, "invisible yo": zo gave yo the principle of the seed and endowed it with attraction and power (1).

1. zo ye kise masa di yo ma, ka samani masa bla la, ka mineni masa bla a la.

Yo was the spirit, more exactly "the thought and action," that was to work out the creation, using the "signed objects" determined by glã.
772 /5/ The glã glã zo is represented by three engravings on wood.
532 The first, glã kele, represents the two glã in the shape of two spirals in opposite directions and with connected points of origin; below this is engraved "the object with four arms" from which issued the signs (2). These signs, 226 in number, are barely sketched out, showing that "the creation of glã takes place in the invisible, the unknown, the unrealized." The second, glã dya, is composed of 226 horizontal or vertical lines, the counterparts or "witnesses" of words. The third, glã zo, is an oval divided into seven compartments (a square in the middle and two times three lateral sections) in which the symbolic representations are clearly engraved. In the middle of the central square, there is an oval containing six signs which represent simultaneously "the egg of the world and yo, the creating voice."

[824] 2. Today this object is represented by a twig of Acacia albida, called "the wood that separates the signs," ti kla dyiri. Its bark is removed in such a way as to outline the multiplication sign enclosed in an oval representing the world.

772 2. The yo

The creation of the perceptible universe beginning with yo is conceived of as a progression in "thinking," tasi (3). This progression,

called oryo or oyo, is broken down into three stages: yo, the inner word, invisible spirit and inaudible voice, potentially containing all creation: o the transition from the inaudible to the audible;
[801] yereyereli, the creative vibration (4). The progression is represented by seven signs, 7 being the symbolic number of man (homo) "seed of the world." Indeed, this numeral is the sum of 3 (male symbol) and 4 (female symbol). The couple they form is itself the symbol of duality, the fundamental law of creation, since each human being is both male and female in body and spirit (5).

772 3. From ta (to do, in the ancient language) and si (to act). The Bambara freely translate tasi as "spirit of nothing" and give this stage, originating in nothingness and preceding creation, the name of tasi dyẽ, "world of the spirit of nothing."

4. The name oyo, given to this system, is a composite of o and yo, and when pronounced reverses the chronological order. This anomaly is recognized by the Bambara who explain it by the fact that yo,? designating an inaudible voice, cannot be pronounced before o which designates a perceptible noise. Thus, in reversing the chronological order, yo "remains in the secret of o" which is in accord with its nature.

831
774 5. The number 3 represents the penis and two testicles of the male body; the number 4 the four labia of the female body. On the other hand, man and woman are each endowed with two twin souls of different sexes; the soul of sex, opposite to that of its bearer, has its seat in the foreskin or the clitoris until the operation of circumcision or excision is performed. For further discussion of the duality of man and his

831 person, see G. Dieterlen, La Personne chez les
774 Bambara /The individual among the Bambara/
and infra, Ch. 3, The Person.

772 It is said that yo, the inner secret voice, "is born of itself, is known by itself, and comes out from itself /6/, out of the nothing which is itself" (1). Out of yo there will come only things that are themselves and that will be nothing other than yo. Each thing, being yo, proceeds like yo, only from itself. Hence, man is nothing other than himself, since he is a creation of yo and since yo's creations are by itself. Thus, there is nothing in the world besides oneself, since the person is yo, and yo is entirely contained in the person. As a result, each being is directly descended from yo with no intermediary; it is yo and exists only because it wills it. That is to say, man, the image of yo, alone has the will, alone has the capacity to bring forth action or creation, since these can be nothing but himself. "Who then," say the initiates, " can know himself, make himself known and manifest himself, other than through himself? Who then can manifest anything but himself?"

But yo, being at the origin of the inaudible and invisible things that are itself, is also in the unknown, hence in nothingness. And consequently, the same is true of man who is nothingness and can act only on the nothingness of himself.

Thus, yo, insofar as it was mind, was free in its ability to decide and to use its creative will. Its work, in nothingness, consisted in shedding, "for it was the continuous shedding of the world." When it
772 manifested itself by rotating on itself, it went five times to the four
801 "angles of its thought, " seleke miri, once to the "sky of its thought, " sã miri, once to the "earth of its thought, " dugukolo miri, thus communicating its power to them (2). The realization of this universe,

1. yo na na a yere la, bwora a yere la, dona a yere la, a be fu la min ya yere ye.

2. On the meaning of the number 5, see p. 25. Yo has endowed the "angles, " corresponding to the "cardinal angles" in the completed universe, with its greatest

772
801

strength for there the Bambara place the poles of attraction which, in the universe, uphold all bodies. It is said: "All bodies accept the force of attraction of the four angles," fari be bi sõ seleke nuni mana barika la.

which determined "the space of yo in its own thought," is expressed by the number 22: "yo, darkness of creation, in the depth of the secret space of night, master of the foundation of the 22 rotations, great bearer of vibration, great builder of the marrow of bones (1).

[782
843
821]

1. yo dali dyibi, šu kene gundo tyema, munumunu mu tani fla siki ba, yere done ba, kolow nye kono dlaba, kono being the ancient term for marrow.

This prayer is recited in honor of yo when a woman's pregnancy is first noticed; it is also recited at eclipses of the sun.

These 22 spirals stirred up all that yo contained in spirit; nugu, "entrails, intestines," which carried all things and man within itself; yalã, "seed of the air," which placed the voids in all /7/ parts of space"; fayâ, "seed of the wind"; sani, "seed of water"; yerẽ, "seed of fire"; yelẽgu, "seed of earthly matter" (2). The rotations of yo

2. fayâ, sani, yerẽ (in ancient language), and yelẽgu were at the origin of the four elements, air, water, fire and earth, all of which did not yet exist but were to appear later.

The seven elements composing yo are represented by signs, reproduced in Figure 1 (1 to 7).

put them in order and kept them under the force of attraction (mana). In other words, carried away by this whirlwind, both magnetic and creative, the elements became organized, one in relation to the other; in this way the 22 terms of the universe, as thought out by yo, were determined; these terms are also the 22 periods of its thought:

772
801

1. origin of the west, *klebi dyu*
2. origin of the east, *koro dyu*
3. origin of the north, *baba dyu*
4. origin of the south, *bani dyu*
5. the sky from above, *sã kaba*

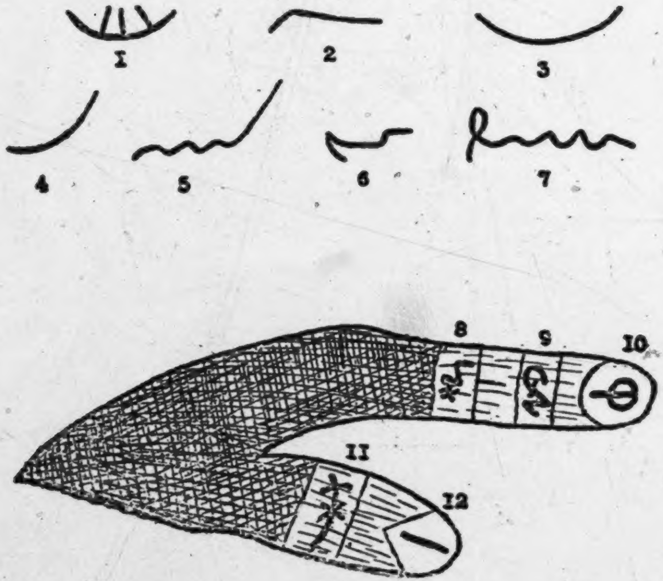

Fig. 1.—Bambara signs. From 1 to 7, signs of *yo*. From 8 to 12, signs of the king's thumb and index finger, representing the actual world and the future world (drawings by an informant).

6. secret space, *tyema gundo*
7. earth, *dugu*
8. center of the earth, *kotye dugu*
9. eye of the earth, *dugu nye*
10. mouth of the earth, *dugu da* (1)

[823]

1. The earth breathes through orifices called "mouths."

11. northwest, *seleke se* /8/ (literally: foot of the angle)

12. southwest, *seleke* *bolo* (literally: hand of the angle)
13. northeast, *seleke* (angle)
14. southeast, *seleke* (angle)
15. sun, *kle*
16. moon, *kalo*
17. male star, *dolo* *ke*
18. female star, *dolo* *muso*
19. mouth or mother of the star, *dolo* *da* or *dolo* *ba*
20. grain of rain, *sã* *kise*
21. secret rain, *sã* *gundo*
22. damp rain, *sã* *suma* (1).

> 1. It is said of these times: "*yo* says only *yo* above, one should imitate this; the world has moved to the west, the east, the north, the south, " *yo* *bi* *yo* *fo* *sana*, *ladeke* *ka* *kãka* *kę* *ǫ* *la*, *giri* *kera* *wa* *la*, *ni* *flaye* *la*, *ni* *kaye* *la*, *ni* *noro* *la*. The terms *giri*, *wa*, *flaye*, *kaye*, *noro* belong to the ancient language.

While whirling from the "angles" to the cardinal sides, *yo* thought out four worlds (2):

> 2. The four worlds are represented by a drawing made up of four concentric quadrangular figures, observed by the informant in the village of Kéré in Mandé. The Bambara conceive of space as a square with cardinal angles and sides (see p. 55 , Fig. 3).

The first, *dyẽ* *mana*, "the shedding of the world, " belongs to the time when *yo* "circulated within himself" in nothingness, and of which it is said: "*yo* was the shedding of the world; he made himself shed"(3).

> 3. *yo* *tunye* *dyẽ* *mana* *ye*, *o* *tumbi* *mana* *a* *yere* *la*.

The following world, *dyẽ* *gale*, "the first world, " is the universe about to be realized, the actual world, and it is said that its symbol

772
801

is 3: "The foundation of the first world was given to all things by *yo*, these things were constructed at 3." (1) In order to realize the world,

> 1. *dyẽ gale sikityoko dira fama yo fę few ma, ò few ye dlali ke saba la.*

yo had to use intermediaries which he created as such, but which were responsible for imperfection since the harmony of all things would have required that creation be directly willed and engendered by *yo* himself. The first constructed universe is thus 3: *yo* is 1, the intermediary is 2, the world itself is 3. As a result the whole creation is not equal to *yo*, for its perfection would have expressed itself by 2, that is to say by *yo* and the world with no intermediary (2).

> 2. This idea would seem to contradict the principle of *yo*'s identity with all creation. It should be taken to mean that the total work of creation also includes imperfection. The cause of this imperfection is precisely the presence of intermediaries created, so to speak, with this purpose in mind.

On the other hand, it is said that the actualized universe was constructed and perceived at 3, known at 4. When *yo* decided to create, in period one, nothing could know it, since it alone moved in the nothingness in which it placed its energies. When these energies united, they formed a new unity which, added to *yo*, made 2, that is to say the period two which was as yet unknown. These energies grew slowly heavier while "resisting in attraction," that is, ordering themselves. This was /9/ period three and things became perceptible. But not until period four did they become clearly known, that is, man became conscious of them. As a result, masculinity (symbol 3) in nature is considered the original stimulus in determining fertility. The fulfillment of fertility and the complete knowledge of it can only be accomplished through femininity (symbol 4).

But *yo*, being perfect, wanted perfection, and in attempting to achieve it, wished to reach 5. For this purpose, he went beyond universe 3 and reached 4. Since numbers were already the symbol of

772
801

things and (so to speak) the things themselves, 4, representing femininity, could not create by itself, for 4 does not exist in 3, symbol of masculinity. And in the universe as thought out by yo, nothing can be engendered without the help of complementaries or twins, whose prototype is the couple: masculinity-femininity.

World 4 is called dyẽ bana, "the refused world," for, in the face of difficulty, yo kept that creation within itself; it remains there as a potential and will return into the world called dyẽ nata, "the world to come," in which, reaching 5, yo will achieve a universe not in 3, like the actual one, but in 2 (yo and the world), without an intermediary. Hence its perfection, for it will be equal to its creator. This universe will be created in the opposite direction of the preceding one in the following order: south, north, east, and west. It will be established by the "great voice of one word" and characterized by the transformation of beings, a new distribution, the absence of error, a close contact with the essence of things, and perfect knowledge. For it is said: "In the world to come, all words will be changed. Solidity was not achieved in this creation, but union will be accomplished in the solidity of one word. Yo's course, yo's work, yo's sleep will penetrate every being. The second world is a new world, the world of one word" (1).

1. Dyẽ nata la, kumaw be bi yelema;
sikityoko ma kle dali ko la fara ñugã
na kę kuma dyotyoko kele nye; yo boli,
yo bara, yo suna, bi dõ ma be la;
dyẽ fla ye dyẽ kura ye, dyẽ kura ye
kuma kele nye.

This text is sometimes recited in the course of talks which follow religious ceremonies, and at times when the movements of creation are discussed. Many details of rituals and games indicate this preoccupation with a second universe. See Fig. 1, p. 22 and Fig. 4, p. 56.

Because yo has only constructed the first universe, men understand only half of its thought, the other half to be realized in the "second world."

772 801 After having thought out the universe and rotated upon itself to create the universe, *yo* "divided and distributed its 'Word." It placed three times 22 voices /10/ in *o*, which then entrusted one time 22 voices to *yereyereli*, out of which the finally conceived universe was to come forth. This deposit in *o* is none other than the change of the inaudible voice, *yo*, into an audible voice. When that voice began to sound outside of *yo*, still invisible and secret, the latter stopped moving and remained motionless within itself: *o*, in its sound, is the emissary of *yo*. And in that voice all things necessary to the building of the universe were proposed; all these things also potentially rumbled across the "angles of the world." When this primary movement reached its heighth, the *yereyereli*, the vibration, issued from it, and when the vibration existed and was shed, *o* stopped rumbling but was itself the spirit of movement: it is said: "*yere* came forth from *o*, *o* was its foundation" (1).

1. *yere bwora o la, o kera siki kele nye a ko.*

772 *Yo* being the immense and inaudible voice, *o* became the rumbling voice; finally *yereyereli*, the high-sounding vibration, formed the rays of light in space. The whole of the infinite trembled, shone, and resounded. After the *yereyereli* had filled space with movement, light, and sound, it ask *o* for its power and became "pregnant," bearing all it wanted and had to create: "The vibration had the power of attraction, the creator was secretly within it" (2). The present universe issued from the vibration, provoking "astonishment," *koni*, a term used to designate both the *yereyereli* and the creative principle it contained (3).

2. *Yereyereli tunye mana ma ye, daliba tumbi a kono gundo la.*
The Bambara imagined that the light and sound of this vibration were such that they were intolerable to vision and hearing; however, even though man cannot perceive the vibration, it exists nonetheless; "the egg of the world continues its vibration in sound and light."

772 3. On koni, see S. de Canay, Notes sur la théodicée bambara, pp. 188ff.

Creation of the Universe

772
773 At the center of yereyereli was the spirit, miri, in the spirit was the doing, wali; in the doing was the coming of all things, nali; and in nali was the division of all things, tali. These four terms also define the four basic elements of creation, respectively air, earth, fire, and water; air and fire being male, earth and water, female. (1)

1. "yereyereli was originally made up of four elements which enabled it to vibrate secretly," (yereyereli gale gale kono kera ni wale nani ye, o ya to a sera ka yereyereli šu a la).

The miri was also "the egg of the world in which nature was enclosed." It is represented by three ovals, all contained within each other; this figure also expresses the three /11/ rotations made by yereyereli at each of the cardinal points (in the following order: north, south, east, west), each rotation stirring up the four elements (2). The central oval, or so de, "son of the house," is the primordial grain which placed all things in the nature of the four elements. The intermediary oval, dyẽ wali gale, "the first action of the world,"

[801] 2. See Fig. 2, p. 34 . Creation is thus expressed by the numbers seven and 12, obtained by the addition and multiplication of three (male symbol, and number of rotations) and four (female symbol and number of elements). Seven is the symbol of man (homo) and of the principle of the universe; 12 is the symbol of the multiplication of beings and of the perpetual development of this universe.

772 773 represents fertility; it determines man, the principal thing of the universe, who has also received from it the capacity for thought and knowledge. The external oval, dyẽ ko, "gate of the world," is essentially mobile; rotating upon itself, it dilates or contracts, depending upon the births or deaths of the multiple-formed matter it contains. It is this oval that makes all things in the universe "unable to escape from the sight of the creator" (1).

1. fẽw be dyele ngala ka yeli kono.

772 801 773 The essential part of that which the yereyereli stirred up as it rotated was the spirit. The spirit, inflated by all its potential power, finally began to sound. "The spirit resounded in the midst of facts," (2) and as it was the strongest element in space, it held itself up alone

2. miri ye manga ti walew tyela.

and arose. Then it burst and from it poured elements which slowly separated, dispersed, and ordered themselves. It is said of this event: "In the old days, all things came out together" (3). These fundamental

3. folo kow bõñuana.

elements, numbering twenty-two, are at the origin of creation which is classified into twenty-two categories.

The Bambara use several methods to order and name these elements. First, according to the fundamental system of creative thought, yo, they divide the elements into three groups of seven, to which a twenty-second is added.

The first seven, dyẽ dyo kã gale, "the first voice of the building of the world," express yereyereli before knowledge, but containing all things with man, "seed" of nature, in the first place. The seven following elements, dyẽ dyo kã saba "the third voice of the building of the world," denote the beginning of the knowledge of yereyereli as masculinity and assures all fertility. It is at this moment that the term koni appears, attributed to yereyereli, and expressing awe before creation. The last seven, dye dyo ka nani "the fourth voice of the building of the world," contains "the complete revelation of the dispositions and situations /12/ of all that was created";

772 *yereyereli* then becomes known as femininity and assures the supremacy
801 of femininity over nature. The twenty-second element sums up these
773 three groups of seven and expresses total knowledge (1).

Another division of the elements determines the categories. The first seven are the *bõnuana* of which it is said: "The seven *bõnuana* came out first" (2). Then came twelve *bangini*, births or *bayeremani* "discoveries," of which it is said: "Twelve discoveries were left in space" (3). After them, there appeared three *ǰiginis*, foundations or *dyoli*, situations, of which it is said: "Three foundations ate up the world" (4). The first seven elements are the "states of the world"; the next twelve, "the foundations of the world"; the last three, "the words of the world's situation" (5).

1. The same progression of numbers as in the creative thought *yo*, characterizes the creation by vibration. Being 1, the vibration passed on to 2. At 2, it conceived invisible "light air" and the powers it contained were grouped together to form a whole. At 3, the powers became gravity, and the visible "heavy air" appeared. At 4, and only at that moment, creation, completely visible, was revealed to the consciousness. For further discussion of the "heavy air," see also S. de Ganay, *Notes sur la théodicée bambara*, p. 188.

2. *Bõnuana wolo fla bwora folo*. The word *bõnuana* means literally "come out together."

3. *Bangini tani fla bla ka kęnę da*.

4. *J̌igini saba ye dyẽ dũn*.

5. *dyẽ dyo tyoko; dyẽ sigi tyoko; dyẽ dyo ka*.

772 The seven bõnuana summarize the general characteristics of beings
801 and things:
773

1. keleña, unity;
2. makari, pity, mercy;
3. mako, necessity;
4. sinaya, aggression, jealousy;
5. fadena, rivalry;
6. maloya, shame;
7. sia, race, species, stock.

The twelve bangini, which follow, determine the qualities and destinies of the person:

1. ma ye ma ye, literally: a person is a person; gifts, possibilities of each, propositions and dispositions.
2. mako, mutual aid, simplicity, dignity, courtesy, wisdom.
3. sebaya, power, domination.
4. dyuguya, maliciousness, vulgarity, ferocity, difficulties.
5. kunanguya, bad luck, bad destiny, ill nature.
6. sira, road, guide, obedience, discipline.
7. ńafola, wealth, health, fertility.
8. adamadeña, brotherhood, humanity, liberty, kindness.
9. dahirime, food, material possessions.
10. saya, death, illness, infirmities, madness.

/13/ 11. šu, night, light and dark, secret, witchcraft.

12. kle, day, sun; all the boli altars of the Bambara.

The three jijini are respectively:

1. kun, the head that thought out the world.
2. ba, the womb that formed it.
3. fo, the word that created it.

772 Knowledge, fâ, was born of three foundations which finally became
773 detached from the spirit (1). Knowledge opened up, divided, and

78 1. The following prayer, relating to the fã, is sometimes recited: fango, ma dua, ma bo, fẽ mbina, fẽ nkumba, fẽ ndaba, fẽ semba, wolo tigi ye nye, djiri tigi ye nye, panve bwora na. O bwora mi, o nya nyimi senge do. Ntigi ye yereyere ye, ka bo miri kono, miri dane sandyi.

> 782 "Road of knowledge, I am not small,
> I am not big. A thing arrives, a thing with
> a large head, a large mouth, a large foot.
> I am the master of fertility; I am the master
> of trees. Where does it come from? It comes
> from the weariness of my seed. My master is
> the vibration, out of which came the spirit,
> the rain of which fertilizes."

772 contributed to the building of the visible world, especially engendering
773 particles, *monõ mõnõ*, which entered into the composition of the earth, and a radiance, *noro*, used for the formation of the sky.

At the same time, the spirit let fall upon the earth (still in the process of formation) a heavy object in the form of a globule, *kulu*, which was later named *pemba* (1). *Pemba*, moving as a whirlwind to the four cardinal points (south, west, east, and north), received twelve of the elements issued from the spirit. Then, with the help of the particles that came out of *fã*, he modeled lumps and mounds which gave shape to the earth.

But in the course of rising, the spirit had thrown upwards that which was later called *fãro* (2). Faro, who was then no more than vibration,

---

1. From *fẽ*, thing and *ba*, big.

192 2. The Bambara use either *faro* or *fãro*, from *fa* (creation) or *fã* (knowledge) in the ancient language. This double etymology indicates the closeness in their minds between the concepts of creation and knowledge (see p. 17). The suffix *ro* expresses the idea of a whole, a totality. Another etymology has been suggested by S. de Ganay, in *Notes sur la théodicée bambara*, p. 196. "...the words Fané (the name of a family of blacksmiths), Faro, *fan* (force), *fara* (stone), and *fari* (body) all have the same origin. Faro is the secret name of stone." This etymology

192

is interesting in that it accentuates the ties which, in the Sudan, bind the Faro of the Bambara and the Bozo, the Nommo of the Dogon, and the blacksmiths. See M. Griaule, Dieu d'eau (passim).

772 helped the spirit with ten of its elements and with the radiance from
773 fā to build the sky along an oriented trajectory. Faro first went to the west, then the south, the east, and the north, thus determining the celestial cardinal points.

/14/ The sky is distinct from empty space, kęnę, which separates it from the earth and which is the product of the "yereyereli's shedding after it had given birth to the spirit." The sky, composed of seven parts placed one above the other, was completed before the earth which itself is also made up of seven corresponding parts.

773 Although he had received the larger share of the elements disgorged by the spirit, Pemba could not finish his work alone. When the sky was completed, the spirit blessed Faro, precipitated him in the form of water along the trajectory followed by Pemba during his descent. This water fell drop by drop from the seventh part of the sky to the seventh part of the earth into which it streamed to gain knowledge of the earth's foundations. As Faro descended vertically, he left a globule in space which became the spirit of the air, Teliko (1); on earth, he deposited a particle which formed the spirit Soba (2). As he dripped between the mounds which made up the earth, he saw that the latter was not completed, so he filled the empty pockets with water, thus forming the hidden springs of today.

Then life appeared on earth. Faro, impregnated by the vibration which was potentially masculine and feminine, gave birth to twin daughters on a deserted hillock (3). As soon as they appeared, the

1. From teli, to go quickly.

2. Literally: so, house, ba, big.

823 3. Naked hillocks, walawala, and clearings are the scene of rituals concerning the twins.

113 first grass, *yayalẽ* (1), grew around them, and scorpions, entrusted with protecting the twins, came forth (2). After a time, an abundant dew that had collected spread over the hillock and formed a spring from which a stream began to run. At its head, the fish *kokoni* (3) appeared, directing the first flow of fresh water to run on earth. He was soon followed by another fish of the same species which took Faro and his children on its back; the stream carried them to their water homeland. The first of Faro's daughters gave birth to twins, one of whom was a male. Faro sent his messenger, the swallow, to place the soul or vital force of the twins in the birth waters. As evidence he kept their doubles, *dya*, in water in order to protect them against all evil. Of these twins the Bozo were born, and, like Faro's twin daughters, they could live in water and converse with him (4). Faro then created the fish /15/, which served as food for them, the crocodilians, and all the aquatic animals that people the seas and the running waters. Then he returned to the sky.

Of this first creation of earth and sky, it is said: "Pemba descended on earth; Pemba was the builder of all things. Faro's evidence came forth and spread over it; the great water (of Faro) descended and entered the eyes of the earth: in these places Faro made known his power" (5).

1. *Andropogon* (*Hyparrhenia*) *hirtus*.

2. The scorpion, weapon of the twins, attacks those who would harm them, for to attack a twin would be to offend Faro.

3. *Calrias* *senegalensis*.

4. The male twin mated with his sister who gave birth to the Bozo; the daughter mated with a man descended from Mousso Koroni (see p. 65).

5. pemba djigi na dugukolo ka, pemba dlala fĕwnye, faro ka šereya bwora o la, dyi ba djigini dona dugukolo nyena, yoro min faro ye a sebaya do o la. This text is recited in the course of the annual ceremonies of the Kworè (see p. 217).

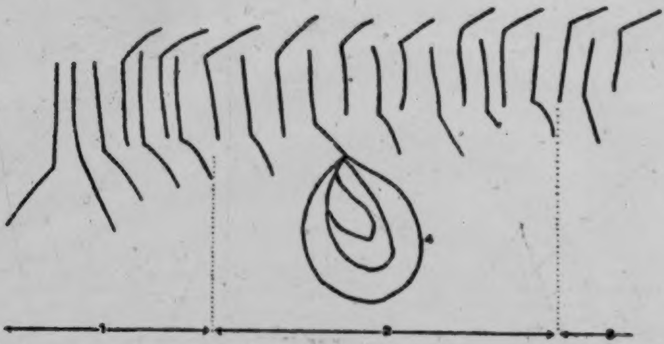

Fig. 2.—The twenty-two elements issued from the explosion of the spirit (4). They are divided into seven bõñuaña, twelve bangini (2) and three jijini (3). This drawing was made on the sanctuaries of Komo. (An informant's drawing).

The first phase of the formation of the world is commemorated each year by a drawing traced on the sanctuary of the Komo: it represents the spirit, miri, and the twenty-two elements of creation (Fig. 2). The vertical lines are read from left to right; they are bent alternately above and below to indicate that they belong alternately to Pemba and Faro, and also signify that each of the elements is the first of a series engendered by it. The miri is drawn in the center in the shape of a slanted pocket, the image of "yereyereli's pregnancy." The old man in charge of the ritual recites as he draws: "Pemba and Faro have situated and organized the world, the sky above was secretly made by Faro with the help of the spirit; Pemba descended on earth and was known very quickly; the humans ask your help, yereyereli, my two hands are behind my back" (1). /16/

113

1. *pemba ni faro ye dyễ dyokã ani dyễ dyotyoko kę, sankaba dlala faro fe gundola miri deme ni ko la, pemba djigini dugukolo ka, a dõ teli yala, dyobe na warilike yereyereli, mbolo fla yenko.*

Pemba's Reign

For seven years, Pemba was a whirlwind (1). Transformed into a acacia seed, he moved about in space, carried by the wind and entraining the rain; finally, exhausted, he came to rest on the earth which hid him under a few lumps of dirt and enabled him to germinate; a tree, the balanza (2), grew but soon died of drought. There remained no more than a sort of rectangular board lying on the bare earth. It was called *pembele*, also *ko kun*, "the head of things."

Pemba was alone on the earth in the shape of a tree root which potentially contained the creation of animals and plants. Beneath

---

1. This part of the myth concerning the *pembele* was collected by S. de Ganay and published in the *Journal de Psychologie normale et pathologique* under the title: "Aspects de mythologie et de symbolique bambara. /Aspects of Bambara Mythology and Symbolism/." We have made a few changes in the text.

[824]

2. *Acacia albida*. The Dogon give an equally important place to the *acacia albida* in the prelude of creation. The first materialization of the world rotated between two thorns of the tree, placed symetrically point to point. Its shape was that of a rotating, flattened out truncated cone made from the wood of the same tree.

773 him his own decomposition collected. As he occasionally moved about in a whirlwind, weary of his solitude, he said to himself one day: "The dust of my tracks will dissipate my nostalgia." Having spoken these words, his tracks came together and the wind pushed them towards the mound of earth and rotting wood. He kneaded this mass with his saliva, thus incorporating into it a breath-soul, *ni*; he gave it a shape and an immaterial double, *dya*. However, as he distrusted it, he turned the double over to Faro, master of sky and the waters, guardian of the *dya*. Then Pemba laid himself down upon the shape for four days. On the fifth day, he heard, coming from beneath him a high-pitched feminine voice which said: "Get up, I am exhausted." "No," he replied, "first I will give you a name so that you may be my wife."

This creature had a head with long, pointed ears and the torso of an animal; the rest of the body was human except the tail. Until her fall, she retained that shape.

In order that she might become the womb of future beings, the repository of knowledge and the stimulant to Pemba's thoughts, she had to assure him of her total love. She promised him this and thereupon received the name of *Muso koroni kundye*, "little old woman with a white head,"—little, for she had issued from him; old, for she was an emanation for him and therefore his equal in age; white, /17/ because, coming from him, she was as pure as he. Thus named, she got up and became his wife. Although he did not enter her, she received multiple inseminations from him and in exchange he took his own sap back. She gave birth to plants and animals, the first of which was the panther. All that she engendered had a soul or vital force, *ni*, and a double, *dya*, similar to those which Pemba had deposited in her as he kneaded her with his saliva. At that time, no being was articulated (1).

773 824 The earth began to swarm with beings who appeared without order as they were born at random; they all went to worship Pemba as their creator, calling him god, Ngala. The latter wished to assert his complete domination over this chaotic work /of creation/; so he asked Mousso Koroni to plant him in the earth. He immediately took

---

1. Such beings with supple, non-articulated limbs are called *mašibadẽ*.

773 root by his own power and became the first of all trees, the *balanza*, 824 green in dry season and dry in rainy season, and it extended his power (1).

773 The human beings born of Faro lived amidst the burning rocks and sought refuge under that tree, whose power was obvious to all since it needed no water to keep it green. They prayed to it and received from it directives for their lives. Since they were immortal, time did not exist. However, they figured their age according to their pilosity: at age 12, the public hair grew; at 22, the hair under the arms; at 36, the beard was black; at 52, the hair whitened. When he could count the four types of hair, his being was complete; but seven years later, he suddenly grew thin and lost his vitality, and his soul weakened; he was then an old man.

Men at that time knew no language and had no clothes. They lived naked and communicated to each other through gestures and grunts. At the instigation of Mousso Koroni, and in order to recognize [801] each other, they scarred their face with three or four lines, three being the sexual symbol of man (the penis and two testicles) and four that of woman (the four labia). In keeping with this, each person, according to his sex, would repeat his actions three or four times.

Men at that time received their food from /18/ the sky, thanks to the spirit Téliko, who, up in space, watched over Faro's waters. During the rainy season, he would send them stones from the seventh heaven containing karite nuts, *si kolo*. From these stones the women extracted oil which they ate with fruit. One day, during the dry season, a woman who had drawn oil from four nuts wiped her hands on the *balanza* under which she was seated alone. "This, I want," said the tree. From then on, all the women offered him oil and were imitated by men who later partook of the cult.

However, the *balanza* was no longer satisfied with only Mousso Koroni. It demanded that all the women give it their love. Therefore

---

1. The *balanza* is not Pemba in his totality, which is spirit, force, and matter. It is Pemba's earthly metamorphosis and, more especially, the image of his fertile masculinity. Pemba took the shape of the *balanza* in order to continue his work of creation and to bring death on the earth.

they all had to mate with it, thus increasing its vitality and power, for it fed on their sap just as it had with its first female. The latter became overpowered by jealousy and brought ill will into all things; she refused to share and no longer came near it, thus denying it the love and faithfulness she had promised. She betrayed it, isolated herself, and, refusing to cooperate in the work of creation, began to disturb it. This was the origin of her fall, her poverty, and her hardship for the balanza cursed her for her betrayal and rejected her whenever she attempted to go back to it.

She then knew such nostalgia and despair that a kind of madness seized her. She chased about the heavens, the space, and the earth from west to north, from south to east, plunging pieces of wood into the ground as she had done for Pemba in the hope that they in turn would become balanza.

Mousso Koroni had maimed herself on the pembele at the time she had sexual relations with it. In the course of her voyage, she wished to inflict the same wounds on others; her fury drove her to circumcise and to excise all the human beings she encountered with her teeth and nails. The violence of her actions caused in her the appearance of the first menses. (1) At the same time, she revealed to men all that Pemba had taught her and which should have remained secret; she communicated to all she touched the impurity of her betrayal. At her touch, the earth became impure and has remained so until today (2).

Pemba vainly pursued Mousso Koroni throughout the universe in an attempt to reclaim that which he had given her: power and /19/ knowledge. Faro, at his request, chased her in turn from east to south, from north to west; he caught up with her, vanquished her, and attempted to submit her to her creator. But she refused, declared herself free, and thus introduced disorder into creation: evil, unhappiness, and death were brought into the world by her.

1. Dyoli tumbi bo muso koroni, bolokoli gale ke to a fe na ni ma sone ye. "Blood came out of Mousso Koroni the moment she circumcised with her nails and teeth."

2. See p. 82.

113 After a long life of misery and madness, Mousso Koroni died, abandoned and anguished, without ever having seen the light. But men gained something from her misery: her efforts to keep from starvation with the origin of the agricultural techniques that she taught (1).

1. The part of the myth pertaining to the origins of agriculture will be related in detail by S. de Ganay, in Techniques et rites de l'agriculture chez les Bambara, /Agricultural Techniques and Rituals among the Bambara/, (in press).

During that time, life was multiplying on earth; the tree engendered beings with each of the women with whom it mated.

In the meantime other beings appeared on earth—spirits of the air who had become visible, having acquired bodies and become transformed, through contact with the impure earth, into men called mahalakillen (2). They had supple inarticulated limbs and were

2. Literally: fallen person.

similar to the beings brought into the world by Mousso Koroni Koundye. But the multiplication of living beings it wanted to dominate caused the balanza to seek an increase in its own strength, drawing it first from the genital secretion of women. As this became insufficient, a more powerful sustenance was revealed to it. An old man who was to marry a virgin one day lost his strength and could not consummate the sexual act. The young girl mated with the tree, which, having deflowered her, was covered with blood and became warm. The purpose of this warmth was to repel those women who had previously presented themselves to it; it signified that the tree wanted something besides their genital secretion. Seized with fear, women practices divining rites in order to learn its wish: the answer was that it wished blood.

The men, not knowing how to satisfy its desire, asked the eldest among them, who was a diviner, to put the dried blood of the virgin into the tree trunk. He first dampened the stained spot with water and rubbed the tree. On the third day, as he was doing this work, one of his hands caught on the rough bark; a vein in his wrist opened and his blood ran. After this, men offered the blood of their veins twice a year to the tree which would absorb the strength to regenerate itself. In exchange for this offering, the tree agreed to rejuvenate men when they reached the critical age of fifty-nine. But, in return, the tree required that the wives of all men become his wives. /20/ The power of the tree and the youthfulness of men resulted from this continuous exchange, but it was possible only through the medium of those women who were used as a tribute.

The first blood offering of men took place at the begging of the dry season. Grouped around the tree, with the eldest in command, they opened the veins of their right wrists without murmur or complaint and in the midst of chants, they sprinkled the trunk with blood. To give the blood of the right hand meant to give half of one's body and to entrust to the tree one's work and one's double, dya. As soon as the blood stopped spurting, that is, as soon as it seemed to have lost its strength, the wrists were bound with fibers of da, and the wounds healed without leaving any scars.

The stain of each offering was noted by the elder who learned to identify people according to the color of their blood. Then each man, his hands behind his back, licked the place he had bled in order to take back the blood to which the tree had given new life, leaving in the trunk the strong and dangerous element it previously contained.

During this ceremony the old men who wished to regain their youth assembled around the tree. Each one, in turn, climbed to the top and opened the veins of his left wrist, thus surrendering his last strength. Then he climbed down and the young men who were present pulled out the hair of his body, one by one, beginning with the public hair and continuing with the hair of the underarm, the beard, and the head. They finished off by taking out the body hair. The man who endured this was not to groan or cry out, but to sing in order to give himself courage, because suffering stoically borne was necessary to rejuvenation. His entire body was then beaten by the young men, the beating started with the nape of his neck; he fainted and became once more a seven year old child. The adolescents blew into his veins to activate his lungs and insufflated him with water so as to replace the blood he had lost.

The eldest son of the rejuvenated old man became the head of the family but could not inherit the women who, according to the pact, 113 belonged to the tree. In addition, the balanza required that the fourth daughter born in each family be entirely consecrated to it. Every virgin had to be deflowered by it on the eve of her marriage, and the act was ritually performed with the hand of one of the women belonging to the tree in such a way that the blood would run onto the trunk.

The cycle of births that followed these various matings was regulated as follows: when a woman's husband reached the age of /21/ fifty-two, she continued to have sexual relations with the tree. She gave birth to all sorts of animals and plants. After her rejuvenation, which occurred without ritual or suffering when she reached her fifty-ninth year, she regained her virginity (1). She was deflowered by the tree and gave birth to an animal or a plant, after which, having reunited with her husband, she would again engender men. When her husband grew old, she returned to the tree and the cycle began again.

The tree also demanded of women their menstrual blood and all births took place near it. When men learned to work stone and made their first axes, the tree ordered them to carve wooden phalli which they inserted into its trunk. The shape given to these objects varied according to a woman's vagina and age. The women feared these painful matings but had to submit to them without a tear, because the tree drew not only its strength from them as in the old days, but also a pleasure unknown to it before. Its strength grew still greater and its pleasure reached a peak when the balanza received the blood of the first virgin deflowered by one of the wooden phalli.

When the blood sacrifices were organized, the tree instructed men in other things. It taught them, in particular, to make fire by rubbing two stones together; to thank it they cut the veins of their right hands and gave it their blood.

The power of the balanza was then at its height. But the way in which it abused its creatures brought about its downfall. Indeed, at that time, men as well as women were not only exhausted from giving blood, but, because of a constant increase in population, they were dying of hunger. One evening a woman fainted as she passed by

(1) It would seem that women obtained rejuvenation in return for their genital secretion and menstrual blood which they constantly gave the tree.

a field of wild tomatoes. When she came to Faro, who was then in the earthly waters, suggested to her the idea of eating fruit. In her body, the fruit was transformed into blood and she regained her strength and got up. She went to bathe in the Niger, a region where famine had become so bad that sand was the only food. There Faro seized her, sliced off her nose and her navel, and opened her belly. He ate the red pulp which he found there. He counted the seeds of the fruit and found the number to be a multiple of seven. Each /22/ tomato carried within it both blood and the principle of duality (3 plus 4), both of these being the fundamental elements that made up the human being. Faro placed the principle of life in the tomato: men and women, informed of this transformation, ate the fruit to regain strength and continue feeding the balanza which, in return, rejuvenated them.

But Faro was opposed to this increase in power. He found it unfair and excessive that the tree enjoy both the domination of the world and sexual pleasure. He also considered the tree his tributary to some extent since water and the tomato, both of which belonged to him, were indispensable to the life of men and to the regeneration of their blood. He therefore made the tree understand the conditions under which he would continue to dispense water. He demanded that the tree stop the procreation of beings through women's mating with wood, and reserved for himself the power to procreate with the tomato as intermediary.

The balanza knew it was going to be vanquished; it foresaw that men were going to betray it and that their worship would now be given to Faro since water was essential to their subsistence and to the multiplication of plants. It knew also that this betrayal would bring about death, but that Faro would take over in his name the work of creation.

Nevertheless it uprooted itself and went to meet with Faro. "The struggle was as bitter as their words, as hard as their hatred, " but victory was Faro's.

Death

The women of the vanquished, who gave birth to the animals and plants, were the first to leave it after seven days and it called them back in vain. They went to live near the river; thereafter, without

773 intervention of any kind, they gave birth after drinking water in which Faro had secretly mixed tomato juice. They offered thanks by giving him three or four tomatoes, depending upon the sex of the child.

After the women, the men, too, gave up worshiping the tree. Instead of seeking wood elsewhere, as they had been in the habit of doing, they began to burn the twigs that fell under the balanza in order to maintain their fire, the fire it had given them.

The tree cursed them. They were thus preyed upon by illness and bad feelings: vindictiveness, hatred, jealousy. The wounds they /23/ inflicted upon themselves in order to give blood and regain their youth no longer healed and became infected.

773 A few among them tried to remedy this new state of affairs. Eight
825 of the eldest men went up to the balanza and, in spite of the heat it gave off in order to repel them, they made incisions on their tongues and offered it their blood. The tree was surprised and first gave out a sort of sigh, for it appreciated the sacrifice. Finally it spoke to them and announced the coming of death. But because of their submission and the sacrifice they had consented to, it transformed them into birds, tatugu kononi (literally: little birds of fire). In order to accomplish this, it demanded that they rub their backs against the tree trunk until all their blood was gone. The men cried out in pain in the process, but just as they were about to die, their souls were transformed into birds. Their flesh and skin penetrated into the tree; their bones mingled with the white bark and the marrow became the red fruit which, from that day on, ripened on the tree. Since that time, the "human flesh" which is the wood of the balanza is rarely put to profane use. These first eight elders transformed into birds were subsequently venerated by men (1).

[326] 1. In particular by all blacksmiths. Since their transformation the birds tatugu kononi supposedly live near the balanza and respect a certain number of taboos: they must not separate but must live communally outside of villages. They are responsible for fire; though incapable of lighting it, they have the power, by their very presence, to keep it up or to put it out. A twig of damp

773
825

> straw bursts into flames when one lights it while pronouncing their name. They also protect woman potters against burns. They are considered impure because of the earth in which they dig holes and because of the fire which is itself impure.

773 As the tree blossomed and bore fruit, the sacrifices, of which it was still the object, increased its yield: leaves and fruit contained the blood of men. The latter began to eat the fruit for it was appetizing and sweet. They also cut branches to feed their animals. The tree remained silent.

But soon men took advantage of it. One man climbed to its summit, cut off all its buds, and carried them away. Those who came afterwards were terrified to find the tree mutilated. The culprit was terrified by his own action and ran away to Mandé, but there the avenging force (nyama) that pursued him caught up with him and he dropped dead.

The people of Mandé, not knowing that they had broken a taboo and being ignorant of death, sheltered him, thinking he was asleep. They tried to feed him and rubbed the corpse with sorrel and oil. Thanks to these ministrations the body /24/ kept for a certain time, but at the end of ten days, it rotted. The force (nyama) it exuded attacked other men who in turn also died.

The deceased's parents came to fetch the body. They ate the flesh because since the arrival of death, the thunder stones that fell from the sky no longer contained karite nuts and they were beginning to starve. They carried away the dead man's bones.

When they returned to the tree, it ordered them to grind the bones and rub its mutilated branches with powder. It told them that from then on it would be useless to give it their blood; they would no longer be rejuvenated and they would all know death.

At the sound of these words, three men fell; four women who unexpectedly came by suffered the same fate. The seven corpses rotted around the tree that had taken their lives. This was the last sacrifice.

The tree announced that it was forsaking men but that it would continue to give the red fruit representing their blood poured over him in the past. And since then, the tree follows an annual cycle contrary to that of other plants: during the winter season it loses its

strength along with its leaves and fruit. But it blossoms in the dry season, after the harvest, just like a well-fed person who is afraid of nothing because the harvest is in. As it carries within itself its own sacrifices, it requires nothing of human beings.

After having been forsaken, men in desperation went up to a torrent to implore the invisible. But for two years they received no answer. They began to waste away and their patriarch went up to the tree to obtain its forgiveness. He prayed in vain and had to return to the water. Thereupon he heard the voice of Faro and the power of that first word caused him to faint. A little water brought him back to consciousness but he was terrified by a black shadow. Reaching out with his arms he prayed: "The tree has put darkness between you and us!" Then the shadow became white and the coolness of Faro entered his body. He went to fetch his people and Faro instructed them, saying: "I will give the necessary rain for farming, as well as the springs, the ponds, the torrents, and a great river, the Niger. But remember that all water is holy and must be revered. I cannot eliminate death, but I will compensate for it." And he taught them speech and their own language.

Faro said to the first of the eight oldest men, a patriarch thereafter known as kumabana (1): "You are going to die." Eight /25/ days later the old man, feeling his end near, went to the edge of the torrents and said to those who surrounded him and who listened respectfully:

"We did not have the power of speech; through Faro, we have received it. And now we must die. I did not expect this suffering, this sadness: all of you will know the same."

An old man questioned him; he no longer responded. Thinking that they might bring him back to life, the men threw the body into the river where it sank. The second old man, wishing to find it, threw himself in after it. But his body, with nose and navel cut up, floated to the surface of the water which became covered with

1. "End of speech." This word also means "there are no more words" in the sense of "outside of these words there are no others." Kumabana had complete knowledge.

773
171

1. In her *Notes sur la théodicée bambara*, Mrs. S. de Ganay has given a first version of the creation in which Koni (alias Pemba), conceived of as the only creator, gives birth to "female twins in the divine substance," Mousso Koroni and Faro respectively, the latter seen in his female aspect. This version is in line with Bambara thought which sees creation as founded on the principle of duality.

The version presented here is of interest because it is absolutely comparable to the Dogon creation myth and takes into account the identity of representations among both tribes. Indeed, in the Dogon myth, creative thought (the god Amma), having formed the "egg of the world," splits it into two placentae (*me*), each containing one of the Nommo twins, bearers of his word charged respectively with the creation of sky and earth. The same is true of Faro and Pemba (see p. 31). But the Nommo of the earth, having lost his female double, was transformed into an animal desperately seeking his double. As a result, disorder was introduced and the Nommo of the sky was charged with putting the confusion into order. To do this, he recognized the universe, reclaiming from the other Nommo the words Amma had entrusted him with. Among the Bambara, the same roles of Pemba, Mousso Koroni, and Faro are found.

To elaborate on this, Pemba and the *balanza* have their counterparts in the *yurugu* (*Vulpes pallida*) and the *senge* (*Acacia albida*), Mousso Koroni in the female being Yasigui, twin of *yurugu*, now represented by a dignitary of the Mask Society, the *yasigine*. Yasigui, like Mousso Koroni, revealed the words of the creator, that is, the language of Sigui. She circumcised and excised men and women and

173 blood. The body was then taken and placed in the crack of a baobab tree. Eight days later, the third old man drowned while bathing; the water turned red at the place of his fall.

When the fourth old man saw this, he concluded that Faro demanded sacrifices. He became the first priest of the cult which he established and which men have honored since that day.

Since this period each of the animal and vegetable species reproduced itself, and the random births of the first ages ceased.

The women, impregnated by Faro, gave birth to humans only. Moreover, they no longer gave birth to single beings as in the days of the balanza, but to twins in the image of those the spirit had engendered to populate the waters of the earth.

Twin births were the rule for a long time until the day men betrayed Faro. Then the spirit of the air, Téliko, decided to take his turn at controlling creation.

"The breath of living beings is mine," he said; "all men's joys come from me through the wind."

"Without me, nothing can live," answered Faro, "for to breathe one must drink; water is indispensable to life."

Deprived of air and water, men wasted away. They attempted to mediate, but Faro refused, "for the body of Téliko, in contact with impure earth, is hot and worn out by the wind." Nevertheless, Téliko, out of pride, decided to take his turn at visiting the boundaries of the world, and men, believing he would be the winner, abandoned Faro to follow him. The latter, sure of his own power, waited for his adversary to attempt the crossing of the seas. At that moment, Faro dashed him against a rock, depriving him of his virility and breaking his right arm which was unarticulated like those of all the creatures of that period.

/26/ After Téliko had recognized his defeat, Faro adjudged men guilty. He punished them for their betrayal but did not forsake them as the balanza had done. First he provided them with articulations necessary for the manual labor they were forced to perform from then on in order to survive. He eliminated the rule of double births and women gave birth to single beings, twins being reserved for rare, privileged individuals. But he replaced twins by the double dya who, from his home in the water, was entrusted with watching over the living and in particular with helping women in childbirth (1).

173
171
[821] taught certain agricultural techniques. In both tribes, the same star, Sirius (called sigi toto by the Dogon; sigi doto by the Bambara), represents them. The androgynous Faro is comparable in all ways to the Nommo, the universal monitor, custodian of the word and of life. The yurugu and the Nommo made voyages similar to those of Pemba and Faro. In particular, at the time of their descent on earth, the yurugu, and later the Nommo, used an "ark," koro, whose counterparts are Pemba's wood pembele and Faro's ark kuru, described by certain initiates (see M. Griaule, L'Arche du monde chez les populations nigériennes. /The ark of the world among Nigerian peoples/.

For both tribes, man "the seed of the world," is the image of the cosmos. The exact role of the seed of the Acacia albida does not appear clearly in the two myths, but in both cases, it is considered to be a first aborted creation.

Faro's Reign

173 Faro, having vanquished the balanza and overcome Téliko, took over the creation himself. He reorganized the whole universe and established the order under which it still functions today. /27/ He spread his word and his light; he named and classified all things: "All things (of the universe) are under the domination of Faro; eight hundred transformations are in his power" (1).

801
802 1. Fêw be be faro ka se kono, yelemani ba kele be a la a fe.

The number 800 which is "the end of the count," here expresses the infinite. In the so-called "eastern number system," now

802
801 used by most Sudanese, the principal units are 1, 80, 800, etc. Ten remains a secondary unit for counting from 1 to 79 and is combined with 80 for units of the other orders.

There is also the so-called "Mandé" number system, the principal units of which are 1, 60, 600, etc. in which 10 remains a secondary unit for the count from 1 to 59, and combines with 60 for units of a higher order.

On the other hand, it must be noted that the Bambara number system is vigesimal and reflects the concept of the person as identified with the 20 fingers of his hands and feet, and spiritually endowed with two souls of the opposite sex, each of which represents the number 10. If one follows this line of thought, 10 is the unit parexcellence (see p. 213, n. 2). The two counts, 60 and 80, in Sudanese metaphysics, are complementary in the sense that one, 60, is male (60 is three times the person) and the other, 80, is female (80, four times the person) (for a discussion on 3 and 4, see p. 19). In the tribes where generally only the count based on 80 is used, the count based on 60 is still used today in certain rituals (principally among the Dogon).

173 To carry through his plan, Faro undertook a voyage of reconnaissance to the ends of the world in order to name the cardinal points.

He first visited the east, and all the beings who lived there recognized his power and his wisdom. Comparing the luminous whiteness of this region to that of hair discolored by age, he gave it the name of koro, old, a word which also indicates that it was his first stop. He made the east the seat of death.

He then went to the west. As it was dark there, he named the inhabitants klebi maw, "people of the fallen sun." He made the

113 west, klebi, the seat of customs and of good and beautiful things.

He then started off in the direction of the north, taking eight epochs to cross the spaces and the depths. He named the north baba, "great river," for the distance was great, the water deep, and the area difficult. In the north, which he reached in the ninth epoch, he established the seat of his control and that of all royalty.

He then went to the south where evil creatures who had listened to Mousso Koroni and followed her advice spoke a language they had stolen (1). The tried to resist Faro, but he destroyed great numbers of them. Although the survivors submitted to him, he made their domain the seat of impurity and named it /28/ bani, "little river," to emphasize their weakness and their shameful failure.

The itinerary was measured in palms, sibiri, the unit of measurement being 22 palms (2). The distance separating the cardinal points, the height of the sky and the depth of the earth were measured in the same way.

During the same period he determined the seasons and created the regular alternation of day and night to replace the premordial darkness. Having measured space, he created time.

Faro then placed himself in the center of the universe: still actuated by a vibratory movement, he traversed in a spiral turning from right to left up to the outer boundaries, "where there is no more than a trembling of the surface." Then he returned along the same route, going from left to right in order to "place himself at the central point (3) whence he distinguished between beings and things" (4).

---

[171] 1. The Dogon have a similar notion of the theft of the language. See p. 47, n. 1.

[804] 2. sibiri nye, literally "eye of the palm." The Bambara palm is a length obtained with an open hand, from the extremity of the thumb to the extremity of the middle finger.

3. It is said of this act, faro tyema yera; or faro sigi yoro seleke nani tyela. "Faro

sat down in the middle of the cardinal
point."

4. A ye klali ke.

The first sky, kaba noro, is less pure than the others and the impure traces of Mousso Koroni's passage, in the form of clouds, have remained there. From that sky comes the wind which Pemba had placed there while pursuing her.

But the second sky, kaba dye, "the white sky," is fresh and already in Faro's power. It is the seat of the souls (ni) of men and animals. The Kwore spirits live there and strive to permit the passage of rain as it falls on earth from the seventh heaven.

The third, kaba fî, "the black sky," is the resting place of all spirits, and the fourth, kaba mana ("shedding of the sky," is the mirror of the other three. There, Faro does his daily "accounting" of the world.

In the fifth sky, koblekaba, "the red sky," Faro hands out judgments on those who have broken the laws. It is the sky of struggles, battles and victories—the sky to which the king offered sacrifices before going to war. It is also the sky of blood, fire, and hot and harmful winds.

In the sixth sky, suna kaba, the secrets of the world situation are kept (1). As its name indicates, it is also the sky of sleep. All the

1. Dyẽ dyoka gundo be sunakaba la.

souls of spirits and living beings sleep there, each in an allotted place. [827] Sleep /29/ is a purification of the soul and dreams are the directives given to it by Faro. Fainting spells, insomnia, and illness are the result of disturbances in the displacement of souls during sleep.

The seventh sky, wolõ fla kaba, is the site of Faro's reign and the seat of power, royal power in particular. From this sky, the realm of purifying water, Faro sends forth over the world the beneficial rain that brings a soul to the grain.

[821] The sun, to which Faro "holds the rope," penetrates the first sky in the morning and crosses all the others successively until evening when it skinks into the seventh. It is the god Pemba who, weary of his pursuit of Mousso Koroni, turns red. The stars are his pores, dilated by effort.

773 Empty space, or tyema, which separates the sky from the earth, remains under the domination of Téliko. It is the domain of air, the winds and insects.

773 823 The earth is divided into seven parts which correspond to the seven heavens and are as follows: (1) dugukolo, earth; (2) dugukolo fi, black earth; (3) dugukolo dye, white earth; (4) dugukolo mana, shedding of the earth; (5) dugukolo bele, "stone of the earth"; (6) dugukolo noro, soft earth; (7) dugukolo woloflã, the seventh earth.

On earth, Faro first created deep watery holes, the abysses of the sea and the rivers which he haunts. He himself dug the first well, the ponds, and the bed of torrents. He established the schedule of the rains which fall from the seventh part of heaven to the seventh part of the earth and constitute the purification and reparation of cosmic disorders.

773 825 824 He then classified living beings. In the east, wild and domestic animals, each group headed respectively by the lion and the horse; in the west, the birds; in the north, the fish with the miri (1) at their head, the sauria, and the batrachia; in the south, all plant life which ~~he~~ divided into three categories (2), indicating the purifying and medicinal power of each.

773 Men were also named and classified and the races distributed according to the quality of the blood into which Faro inscribed the destiny of each. He determined the castes, beginning with the slaves.

He then decided each one's foods and, to protect /30/ the species from destruction, he indicated the forbidden foods, animal and vegetable, which each category of beings had to respect.

1. Micralestes acutidens.

2. These are respectively: herbs, bin, headed by the narakata (Digitaria digitata); plants, fura, the first being the sindya (Cassia siberiana), and trees, dyiri, divided into three categories headed respectively by the karite, the baobab, and the nere (Parkia biglobosa).

773 Finally, he occupied himself with agriculture. In particular, he gave men, through the intermediary of the blacksmiths, the eight cereal grains that had been created simultaneously with man but had remained hidden in the sky (1). The eight grains became the basis for subsistence and are fundamental to the human being who carried the symbol of them on his collar-bone (2).

Everything on earth is represented in the water: living beings by their doubles or witnesses, dya; plants and minerals by an exact replica, which enabled Faro to exert constant control over the existence and actions of the beings placed in his power.

He put spirits as his representatives everywhere in charge of watching over the universal order.

[171] 1. A myth parallel to this can be found among the Dogon (see M. Griaule, *Dieu d'eau*). It makes the Bambara blacksmith into a civilizing hero, a metamorphosis of Faro, descended from the sky in an ark, *kuru*, and holding in his hand a mass containing the eight cereal grains. See M. Griaule, *L'Arche du monde chez les populations nigériennes;* S. de Ganay, *Notes sur la théodicée bambara*, pp. 194-196.

[171 243] 2. The eight grains are as follows: *sañõ*, small millet (*Pennicillaria spicata*); *keninge*, large millet (*Sorghum gambicum*); *kende*, red millet (*Sorghum magaritiferum*); *fini*, fonio (*Digitaria exilis*); *šyõ*, beans (*Vigna maniculata*); *tikaninkuru*, peas; *malo*, rice. The names of the seeds vary, but the same symbols occur among the Dogon. In the Bozo myth, the collar-bone is the receptacle for eight fish, represented by symbols on the forward part of canoes. See G. Dieterlen. *Les Correspondances cosmo-biologiques chez les Soudanais* /Cosmic-Biological Correspondences among the Sudanese/.

The Future Waters

173 The order of the universe prevails in space and time: the present order of things is but one phase thereof. When the "first running waters" covered the ground, Faro permitted only the primordial water to spread out; twelve waters remained hidden and they will rush forth and submerge the earth when he gives the order. The words they contain will be revealed and the "world to come" as thought out by *yo* will be realized.

Meanwhile, in the expectation of these "future waters," men must provide themselves with objects that will save them; the Bozo and some Bambara have canoes, shepherds have their gourds, spinners their spindles, and women their wooden stools (1). The coming /31/ of the waters is represented by a drawing on these objects as well as on a number of other everyday tools (Fig. 3).

173 524 This drawing serves as the framework for a game, the *sumangolo*, which the Bambara of all ages and both sexes play in order to "contribute to the progress of the world."

This game bears the name of the ancestor Soumangolo who traveled throughout the universe to find out and reveal to men "the

---

[192] 1. It is significant that *kuru* (canoe), *kuruni* (spindle), and *kuruni* (stool) come from the same root. The word *kuru* designates the original globule in which Pemba descended, and which later became the wood *pembele* in the shape of a trough; it also designates the case or ark used by the mythical blacksmith, bearer of the nutritive [171] seeds. See p. 53, n. 1. The word *kuru* should be compared to *koro* which, in the Dogon language, has the general meaning of case, box, wooden receptacle, trough and canoe, and which also designates, among these people, the vessel in which the blacksmith descended. See M. Griaule. *L'Arche du monde chez les populations nigériennes*, p. 117, n. 3.

173 location and disposition of the waters" (dyi walew and dyi kono few).
524 During his voyage, "he was unable to reach the central springs of the sky," and that is why they have remained unknown to men. /32/ But he visited "the waters of the cardinal angles" from which there emanates a vapor that determines the seasons and the temperatures. Then he studied "the waters of the cardinal sides" and asked Faro to let them stream over the earth. He crossed them in order to explore them and instruct men about them. It is said: "Soumangolo of creation has shown to people and things the ponds, rivers and old ponds" (1).

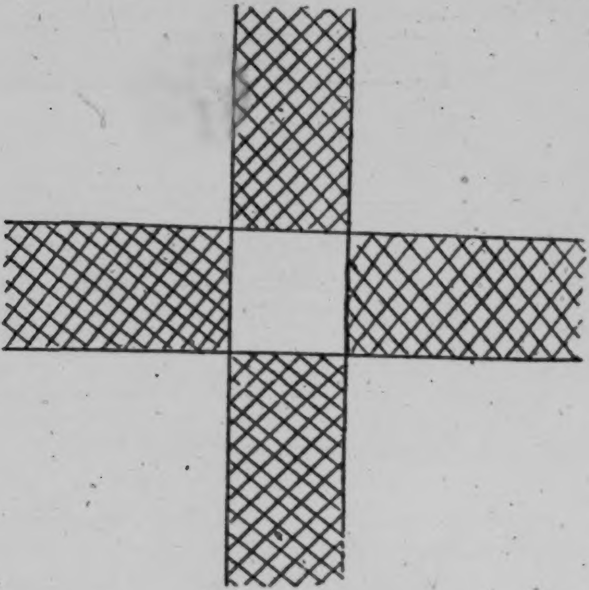

Fig. 3.—The arrival of the "twelve future waters." The central square represents the world and its four cardinal points, the arms of the cross, and the expansion of the waters. This drawing is made on a great number of objects and tools.

1. Dali sumangolo ye ko, ba, ko koro kono ko dyira ma ni fe͡w la.

73
524 The game consists in the player crossing the three waters that come from each of the cardinal sides. (1) The drawing represents /33/

1. See Fig. 4. This figure is drawn on the ground: the central square represents the universe and the branches of the cross are the waters emanating from the cardinal sides and divided within each group into three parts.

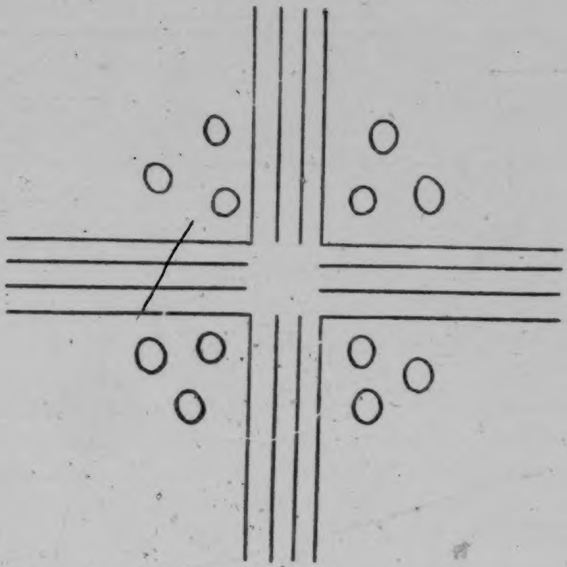

Fig. 4. —Game of the sumangolo, symbolizing the "arrival of the twelve future waters."

Three or four pebbles, depending on the sex of the player, are placed in the angles.

The player turns his back on the drawing and sings: "The little man has left the dance; the little man, the bad man has left the dance; another has not danced; may the difficulty of the water cease (tyeni bwora do la; tyeni, tyendyugu bwora do la; tye were te do ke nin kelenko; dyi geleya ka ta). He then names the three parts of water in the branch of the cross, while his partner

773
524
points them out successively with his finger, saying: "cross the pond" (*ko tike sumangolo*), "cross the river" (*ba tike sumangolo*), "Soumangolo's descent is over" (*sumangolo yigi bana*). The partner removes the pebble immediately adjacent to the branch pointed to and asks: "Is this it?" (*nin wa?*). The player must answer: "Yes! Soumangolo." The game is again taken up in the same way at the starting point. When the onlooker places his finger on the now empty space, he asks: "Is this it?". The player must answer: "No! Soumangolo." The second pebble is removed and, to the same question, the player must then answer: "Yes! Soumangolo." Then follows the same chant, the same mimicry to get at the third pebble, which is also removed. The game is started over again in the same way, at the same starting point, and the second branch of the cross is reached. This continues until the four groups of pebbles placed in the angles are eliminated. The player who has answered without making a mistake is the winner; supposedly he has victoriously crossed "the twelve future waters."

The immediate effect of this game is to place the winner in a favorable position: his earnings increase; his enterprises succeed. But this is not all: it represents a cosmogonic operation of a high order. In the old days, *sumangolo* was [789] played to bring about rain in times of drought; every person playing it today contributes to the actual functioning of the universe as well as to the realization of future times awaited by men. [796] In certain villages the ancestor Soumangolo is celebrated yearly by a hearty feast at which millet beer is drunk and all day long the villagers play the game bearing his name.

The *sumangolo* is part of a series of figures, sometimes geometrical, which serve as the base for cosmogonic games of semi-ritual character such as the one described above.

773
[524] both the waters that flowed over the earth in the past and those that will spread over the world when Faro orders them (Fig. 4).

While awaiting that day, Faro continues his work. Taking the spiral route originally followed at the time of the reorganization of the world, every four centuries he travels about, inspecting the confines of the world, and then returns to the central point whence he surveys and governs the universe.

Chapter 2

The Representations

776 /34/ The duality of glã, in the microcosm that is man by his twin souls (ni and dya), is projected into the universe in the form of the pair, sky-earth, originally formed by the splitting of the spirit in two. The pair is represented by two supernatural powers, Faro and Pemba, to whom the principal Bambara cults are addressed.

Pemba is both spirit, strength, and matter. He is actually represented by an engraved piece of wood, symbol of plank originally responsible for the creation of all living things on earth. Theoretically, each family has one.

Faro, master of the word, reigns both in the sky and in the waters, which are the earthly reflection of the sky. In his capacity as master of the word and reorganizer of the universe, custodian of life, and guardian of souls, Faro, light and vibration, reigns in the seventh heaven. As master of the waters, he is described by the Bambara as a living being who has a body and is subject to metamorphosis. Yet to the initiated, he remains first and foremost a higher spirit, detached from contingencies and free in the exercise of the sovereign power conferred on him.

In order to understand fully the spirit of the Bambara religion, it is necessary to examine all the representations of these powers (1).

776
114

1. A few authors have summarily described Faro, in particular, L. Tauxier in Religion bambara (pp. 142-145), in

776
114

which he quotes Msgr. Bazin and the Abbé Henry. These authors have not disclosed the fundamental role of this power nor the area he covers.

It would be proper to compare here these representations with those observed by the Griaule missions in the Sudan such as the Nommo of the Dogon, the Domfé of the Kouroumba, and Faro or Yégou of the Bozo, and published in the following books and articles:

M. Griaule, *Masques Dogon* /Dogon Masks/; "Le Domfé des Kouroumba /The Domfé of Kouroumba/, " *Journal de la Société des Africanistes*, Vol. II (1941), pp. 7-20. D. Paulme, *Organisation sociale des Dogon* /Social Organization of the Dogon/. S. de Ganay, *Les Devises des Dogon* /Dogon Device/; *Le Binou Yébéné* /The Yébéné Binou/. G. Dieterlen, *Les Ames des Dogon*; "Notes sur le Génie des Eaux chez les Bozo /Notes on the Water Spirit of the Bozo/, " *Journal de la Société des Africanistes*, Vol. 12 (1942), pp. 149-155. G. Dieterlen and S. de Ganay, *Le Génie des Eaux chez des Dogon* /The Water Spirit among the Dogon/. M. Griaule, *Dieu d'eau*. Mrs. B. Appia has also published interesting observations in "Note sur le Génie des Eaux en Guinée /Note on the Water Spirit in Guinea/, " *Journal de la Société des Africanistes*, Vol. 14 (1944), pp. 33-42.

/35/

Pemba

776

Pemba, born of primordial vibration, was originally a "globule, " *kuru*, which whirled around to create the earth. While he was a whirlwind, a molecule broke off and became a seed, which fell onto the earth, sprouted and became the *Acacia albida*. The latter grew, 776 dried up, and fell; soon the only thing that remained of it was a block of wood called pembele. Out of its own substance, pembele created a female being, Mousso Koroni, and with her engendered all living things on earth, except for the human beings born of Faro. But following the disturbances created by Mousso Koroni, Pemba had to give up his power, and his Word became the property of Faro, who was entrusted with the reorganization of the universe.

Pemba was known to men who submitted to him on earth before they became aware of Faro who had remained secretly in the heavens (1). They worshipped him as their god and named him Ngala Pemba, god Pemba, or Koni, to recall his origin and the awe inspired by creation (2).

The Pembele

778 776 At the present time, religious leaders and heads of families use the pembele to represent Pemba; it is a block of wood, the image of the original plank (3). This object has a hollow dug out in the center, called sele dẽ, reminiscent of the hole at the bottom of the grave where the corpse is placed (4). Three times 22 slanted lines

---

1. It is said: " Faro is a celestial being from above; if one says Pemba, it is because he has been seen on earth" (faro ye sana fẽ ye; a fo pemba ye a ka yeli ye dugu la).

2. The secret names of Pemba are innumerable.

3. The symbolism of the pembele, summarized below, has been studied by S. de Ganay in "Aspect de mythologie et de symbolique bambara."

4. See p. 248.

778
776
are engraved in the hollow; below it, two groups of seven lines, divided in the left section into 3 and 4, and in the right /36/ section into 4 and 3. The 22 lines on the left represent Pemba, the creator; the 22 lines on the right, the transmission of his word and his power to Faro. The 22 central lines are "a testimony to the foreknowledge he had of all things (1)," and the symbol of the great works he accomplished at the dawn of creation.

1. See S. de Ganay, Aspect de mythologie et de symbolique bambara, p. 192.

The two groups of 7 lines represent Pemba, 3, and Mousso Koroni, 4, in order to recall how Pemba, originally androgynous, "separated himself from his feminine part so that the two parts might unite as male and female to produce living things"(2).

2. See S. de Ganay, op. cit., p. 195.

The wooden plank, in addition, is engraved at each end with 22 notches which are, to the left, Pemba and his words, and to the right, all the words entrusted to the spirits and still unknown to men.

The object, taken as a whole, is the image of the universe: its upper surface, upon which are inscribed the lines, is the sky; its lower surface is the earth; the four sides are the four directions of space. It is also the first grave ever dug for the ancestor; the sele dě concentrates "the active and latent energies." Here "the pembele can be considered as thought which is constantly unfolding and which, starting from its own substance, stretches out into time to entrust itself finally to Faro in the guise of the word" (3).

3. See S. de Ganay, op. cit., p. 191

Finally, the pembele summarizes the myth of the creation and organization of the world by the series of 22 lines that decorate it; the duality expressed in the double engraving of 7 lines; its shape, reminiscent of the primeval plank, generator of life on earth; and the wood of which it is made—wood from the balanza tree, formerly master of creation.

All these characteristics justify the name of Ngala, god, which is given to the pembele, for it possesses in addition all the power and

776 strength (*nyama*) of the divinity it represents (1).

778

1. That strength is particularly active at the angles of the plank and thus takes on the name *boy nyama*, "venomous *nyama*."

778 The *pembele* is an altar, a guarantee of prosperity, life, and the spiritual and material patrimony of the group to which it belongs. There are different types of *pembele*: those belonging strictly to families, on which the meat eaten by the family is carved, and those belonging to sanctuaries, which must be engraved with symbolic marks. The small board used for circumcisions bears the same name; it /37/ recalls Mousso Koroni's mutilation on the *pembele* and the origin of the removal of foreskin and clitoris from the human body (2).

2. See p. 38.

The role of Pemba, as promoter of the force, *nyama*, which activates all beings, and as the hypostasis of the earth, is illustrated by the ritual use the Bambara made of the *pembele* which represents Pemba.

[764] After each death, the head of the family gathers the force, *nyama*, which emanates from the corpse, and entrusts it to the *pembele*, "which preserves it until a birth occurs in the family." A parallel ritual bestows the force of the dead ancestor on the newborn child (3).

3. See p. 253.

At the time of the ceremonies relating to the large *pembele*, "all the participants bring a small piece of meat which, after having been placed on the plank, is eaten raw so that fire may not destroy the beneficial *nyama* emanating from the divinity itself" (4).

4. S. de Ganay, *op. cit.*, p. 199.

Finally, "in cases where it is necessary to obtain a maximum of *nyama*, infinitesimal slivers of wood are taken from the corners of the board, where its force is concentrated... However, if this practice is abused, the *nyama* of the earth becomes diminished. It is

778 understandable that the strength of the large pembele should be preserved intact since it represents the world. No ritual concerning it is celebrated alone by the man in charge without the presence of a council of elders. Its four corners can be scraped only under worthwhile circumstances for, according to the informant, the god pembele will not tolerate his being used for trifles. As the corners are gradually scraped off and consequently the nyama contained in these corners is reduced, the earth becomes worn out. And if the earth should lose its nyama, all would be empty of its substance; the millet would still grow but its stalk would yield no grain. . . women would bear no children, no longer having any nyama. Bereft of strength, people would no longer be able to fight. The earth would subsist, but would be sterile" (1).

1. S. de Ganay, op. cit., p. 200.

The Balanza

824 The tree balanza, the plant form of Pemba's metamorphosis, vanquished by Faro, is no longer worshipped by men. However, the Bambara's attitude towards it and certain ritual gestures of which it is /38/ sometimes the object, recall the time when, after having spread its domination over all creation, it introduced death to the human species.

[761] In certain settlements, the belief is that whoever rests in its shade dies, the tree having taken his dya. In others, women still make it [782] offerings of karite oil, despite advice from men who have informed them of its inefficacy. They lie at its base, simulating illness, agony, and then death to recall the painful events that have brought them to men; finally they touch the ground successively with each of their four principal articulations as a sign of submission, before smearing the tree trunk with the oil they have brought. In still others, [843] in order to recall that births used to take place near the tree, pregnant women are presented by their husbands to the tree to each childbirth.

The fields surrounding the settlements in the region of Ségou are covered profusely with balanza. The device of Ségou, which tells of the history of the town, enumerates the names of the trees planted at the time of its founding. This device also mentions kokuruni (literally, little humped back), the balanza of Banankoroni (pl. I, a),

824 considered as the founding ancestor transformed into a tree. The old men of the village come to the tree each year, leaning their backs [844] against its trunk, while the placentae of newly delivered women are hung on it (1).

824
245

1. The *balanza* groves around the Bambara settlements have attracted the attention of botanists. M. G. Roberty, in *Les Associations végétales de la vallée moyenne du Niger* /The Vegetable Associations of the Middle Nigerian Valley/, has studied their agricultural role: "The Dumosaeptum arboreitoides, cultivation under the *balanzas.* Artificial, well defined landscape. Trees losing their leaves during the rainy season, regaining them during the dry season, thorny, regularly spaced, but planted in the distant past. The *Acacia albida* loses its leaves in June and grows them again in December, thus furnishing shade in the dry season and humus in the rainy season. The Dumosaeptum owes it its permanent villages.... The date of the introduction of this very useful tree into the western Sudan remains shrouded in mystery, as is the time and method of its dissemination over cultivated fields. It is probable that the *Acacia albida* comes from eastern Africa, somewhere south of the equator. How did it come as far as the Bambara country without losing its original seasonal cycle? What sultan, or what agronomer of genius forced its multiplication around the Bambara villages? These questions remain, for the time being, without answers. The tales of the first European conquerors seem to have proved that numerous "*tatas,*" the enormous citadels of red mud, were enclosed by living *balanzas* fences with joined trunks... It is probable that their military use has preceeded everywhere their agricultural use... We have very little information concerning

> 824 245 the latter... We are familiar enough with the Bambara agricultural customs, but none of them would have brought about the spread of the balanzas, their regular spacing in the fields, and their protection from goats. In almost all the cases we have observed, the balanzas are of considerable age, development and density. There lies in this subject a fine dissertation topic for a young ethnographer and naturalist." (pp. 135, 136).
>
> The myths of the Bambara answer M. Roberty's questions.

/39/ Mousso Koroni

776 Mousso Koroni is the impure earth; she symbolizes all that is opposed to light: darkness, night, witchcraft. She is also the symbol of rebellion, disorder, and impurity. Pemba pursued her in vain in his effort to take back what he had given her: the "words" she had received from him were divulged to men in spite of him.

Although no cult honors her and no sacrifice is offered her, her name is cited in various ceremonies and mentioned in the chants; her actions are recalled by certain gestures in the ritual.

776 304 On the other hand, she is the initiator of the separation of the sexes realized in the human body by the removal of the foreskin and the clitoris, an operation which after her betrayal, she performed on all those she met. In this way, she placed them in the same state of rupture in which she found herself: a female principle as opposed to Pemba, the male principle. In addition, she is present in every human being in the form of an evil force, the wanzo, which she had communicated to all those she approached, and of which one must rid oneself through the methods she herself inaugurated: circumcision and excision (1).

1. See p. 95.

776 241 Mousso Koroni is also the originator of certain agricultural techniques which she taught men, and every year, in certain villages, she

776 241 is represented as making her nocturnal visitation at the time the grain is threshed. An old woman, dressed in rags, wearing old unmatched sandals, and carrying broken gourds, runs about the countryside simulating madness. She follows the mythological itinerary from west to south and from east to north, and then returns and sits down near the granaries (1).

776 857 Mousso Koroni's agricultural work and her unhappy wanderings are also represented in a children's ritual, carried out at night during the cultivation period. One of the players, the yukuri or dantoni (literally, little hunchback), wears sandals for ears, a hump at the small of his back, a cloth tail tied low about his waist. He goes begging from /40/ door to door, followed by all the uncircumcised of his neighborhood. He pretends to cultivate and to thresh grain while his companions intone chants recalling Mousso Koroni's mythical actions. After his round is finished and the presents of millet are gathered, the player, pursued by all the others, runs off and disappears amid catcalls.

776 241 783 But while this parody of cultivation, with its rituals and chants, recalls the phases of Mousso Koroni's disorderly life, the agricultural techniques she initiated earlier are in themselves an important expression of the reparation made to the confusions she had caused. Every hoeing by the farmer is a wound inflicted on the impure earth,

---

[171] 1. However, the very first agricultural techniques known as fyễ ti (literally, cultivation of the wind) are recalled, particularly among the Bozo, by random sowings of a certain number of wild grasses, then cereals, in the fields where the harvest is offered to Faro. Similar rituals are celebrated in certain Bambara villages. The techniques taught by Mousso Koroni came after those "of the wind," and precede that of millet cultivation.

For information on some agricultural rituals of the Bozo, see G. Dieterlen, "L'Agriculture rituelle des Bozo /Ritual Agriculture of the Bozo/," Journal de la Société des Africanistes, Vol. 20 (1950).

776 241 183 hence on Mousso Koroni. The ritual cultivation of millet, a noble activity to which every aristocratic Bambara must dedicate himself, is an institution which Faro taught in his time and constitutes a purification and a reordering of the soil (1).

Faro

Faro's Shapes

776 Faro was a "voice" before he materialized into a body. In his role as master of the word and reorganizer of the universe, he is represented by a spiral, *munu*, in which he occupies the point of origin at all times. The spiral is situated in the center of the cardinal points (2). Its vibratory unrolling represents "the displacement of Faro for the realization of all things in the universe."

776 292 This image is materialized in a basketry headdress, *yugu*, with a spiral of eight turns. The straw sprigs that form the spokes supporting the spiral symbolize the vibration; the intervals, *yugunye* or eye of the *yugu*, which separate them are rays of light, the spiral representing

---

1. *Dugukolo be be dyuruma*, "the whole earth is impure." But as only virgin soil is considered impure, it is also said: *dyurumu be be dugukolo ka forow sani nyala do*, "the whole earth is impure except for the cultivated fields." The word *dugukolo* (literally, bone of the earth) designates both the earth as a whole and the earth as matter. The same notions [171] concerning the impurity of the earth hold for the Dogon. See M. Griaule, *Dieu d'eau*, p. 94.

2. This "central point," which is also the firmament, is described by the Bambara as *sǎ tyema kolo*, literally, the bone of the middle of the sky.

776 the daily movement of the sun "which unfolds until evening." The
292 regularity of the rays symbolizes order and the classification of beings and things by Faro. The /41/ ends of the straw sprigs forming the spiral must remain free: they represent the infinite extension of Faro's realm and power. The hat is also a mask "which hides Faro's invisible face and through which he watches over the world" (1).

1. Today, a basket of considerably higher dimensions is made and used by women (See pl. I, b).

[643] The headgear yugu was formerly reserved for the king, who wore it under a turban. Certain deserving old men were also permitted to keep it. The rituals of making and wearing this headdress attest to the importance attributed to it. In particular, when an old man was [695] suspected of having committed a serious offense, his hat was pierced with four holes representing the four cardinal points. He was then made to wear it, thus submitting him to Faro's judgment; if found guilty, he died.

776 As the spirit of the waters, Faro is supposed to belong to the white race and his body to be half albino flesh and half copper (pl. I, c).

776 A myth relates how his physical being was formed.

773 When Faro caused the streaming waters to descend on earth, he manifested himself for a long time only by his voice. He had no body, and since he needed appropriate matter to achieve one, he bided his time in the waters of the sea.

The winged spirit Téliko, who had the body of an albino, wished one day, in his arrogance and jealousy, to cross the world in order to know it and to dominate it. Faro, warned by the dogfish, decided to seize his enemy's body to complete his own. The albino, who always flew, fed on his own substance. He chewed his own flesh and his bones were soon bare; the marrow came out of them. It turned into red copper which fell into the sea and nourished Faro.

While Téliko descended to the water level, the dogfish that was watching him sang in order to attract him. The albino, aware of the danger, climbed back to the highest heaven, attempting to continue his flight and to reach the ends of the world. But he quickly lost strength and after his dya had fallen into the waters, his body was

776 773 seized by Faro who, after giving the genitals to the dogfish, completed his own physical being. His head and torso were made of the albino's flesh; his tail was of copper, as were his breasts, the "essential organs that fed and revived the world."

Faro's head can be compared to that of a white woman: his eyes are black and piercing; his hair is black, straight and long like a horsetail.

/42/ His ears are two holes with no outer ear, but are protected by two fins. Two necklaces of copper and gold hang from his neck and act as receivers, enabling him to hear all sounds and all words: the copper necklace reports idle talks of little importance; the gold one, secret conversations and powerful words. Faro puts all that the receivers collect in his fins, which are also the mirror reflecting all that his eyes have seen, both good or bad. He looks, shuts his eyes, and puts out his tongue; the images penetrate into his fins and classify themselves according to the regular movements of his tail. Thus, images and sounds are chronologically inscribed and can be brought before him at any moment "like a card pulled out of a file." In this way he knows to what use he can put things and events.

Both his hands—the right one male and the other female—and the end of his tail are webbed. Without any apparent sex, the preeminence of the feminine shape usually attributed to him recalls that he once impregnated himself in order to give birth to twin girls at the time the first waters streamed onto the earth.

Faro's appearance, which is linked to the problem of his origin, has been the object of legends and tales among the people. While these have attracted the scholar's attention, they present a serious problem. The legends are truncated, episodic, and often childish versions of an imposing myth, which is perfectly constructed and often expresses a dogma.

776 773 171 Two examples will be given of legends whose only interest here is to suggest further research into myths forming the framework for collective symbols. One of these legends is Peul /Fulani/, and the other Touareg /Tuareg/.

1. At a time when the Niger was but a narrow, deep river, a pregnant Peul woman asked some Bozo fishermen, who usually ferried people on request, to take her across the stream. At first they refused,

using her pregnancy as an excuse. As she insisted, they took her in their canoe, left her on the other shore, and went away.

As soon as she had landed, she was seized with pains of her labor. The water of the river dried up at the point where it had been deepest. A voice came out of it, advising the woman to bear her child there. She went down into the pit after having left her clothes on the shore.

From her womb there first came forth milk, honey, and precious stones (*lulu*) which dropped onto the milk and honey as though on /43/ a straw mat. The woman was writhing with pain: the child finally appeared feet first and fell on the stones. His hands and feet were webbed.

As the water began to reappear, she attempted to get away, but in vain. Her husband, who had run up to the river's edge and had found her clothing there, saw her appear three times holding the child above the waters. She then disappeared, carried away by the current. Both she and the child became Faro spirits.

2. The village of Siyango, located fifteen kilometers from Nyono, has a very deep, perennial natural well called *ala* *kolo* *faro*, Faro of the well of god, "or *Mbata* *dyi*, " "water of *Mbata*." No one drinks its water. At the beginning of creation, a woman named *Mbata* lived alone and without water. She gave birth to twins. Exhausted and dying of thirst, she came out of the cave and, going down to the edge of the sand, prayed that God let her die if she could have no water. A spirit appeared and said to her: "God will entrust all waters to you; but he will first prepare you a home." A pit having been formed and filled with water, the woman stepped inside and was transformed into Faro. She then took her two children in with her; one became a male spirit and the other, a female spirit.

The pit extended underground through a kind of tunnel and Mbata, who had followed it down, came out again with so much water that the Niger was created.

The water of this well was soon forbidden to human beings, for if anyone looked at himself in it, Mbata would take hold of his shadow and make him fall. The corpse, using the underground passage, came out into the river. Those who threw themselves into the water sometimes also became Faro.

One day Mbata resumed her human shape and went to the market where she bought tomatoes. She asked those she met what they did for the spirit who owned the water they so much needed. She advised them to offer him copper and gold and to slaughter white rams at the well.

776 The following day, in order to give thanks to Faro, the villagers
773 went to the edge of the well to the sound of drums and sacrificed the
171 animal. The water swelled, seethed up, and formed a streat which
still runs into the Niger today.

The composition of Faro's body determines the behavior of men in the rituals performed in his honor. While the usual offerings of blood, tomatoes, raw cereal mash, and baked cakes are consumed by him and returned to the givers in the shape of material possessions (children, millet, rain) or spiritual possessions (preservation of the souls of the living and the dead), the choice content of the offerings or sacrifices, the albino and copper, are reserved only for him and help increase his strength and stimulate his action. /44/ He absorbs them for his own sake; thus it is said that: "copper and albino are the sacrificial privileges of Faro."

Manifestations of Faro

776 All the atmospheric manifestations in the sky are evidence of
821 Faro's presence and power. Rain, thunder, squalls, hail, and the
rainbow all demonstrate his action. The lightning that bursts forth
in the koblenkaba is a weapon, a small axe (sempere ni or dyele dẽ
čini) which he throws from the top of the sky. If lightning strikes,
it is a proof of his revenge. In the tree, the lightning hits the gecko
[825] (ala ǰugu), an evil animal which, when it lives in homes near the
hearth, supposedly stirs up fires of conflagration. When lightning strikes men, it is in punishment for the breaking of a taboo. The stone axes, found at the point where lightning strikes, are collected and kept in the sanctuaries of the rain altars, to be used in case of drought or in the course of seasonal rites. They are also placed in the seeded fields, so that their strength, by communicating itself to the seed, may be beneficial to germination.

776 On earth, Faro is conceived of as a unique being whose principal home is the Niger; he is present everywhere. In practice, the Bambara believe that a spirit haunts each torrent, pond, or well, each gourd of water, each dewdrop; they call him dyi tigi, "master of water."

776 He takes on many forms. He can be seen in the brush as a gazelle feeding on wild tomatoes and onions. As a ram with golden fleece and wearing ear ornaments, he travels underground along gold veins. As a young and seductive woman he goes to the villages to seduce the boys and take them away with him. He is the head of the fleeting torrent that runs after a rainfall; he is the seething and swelling of the currents. He can be recognized in the bluish haze that floats above the ponds. A stream that dries up is a sign of his anger.

Faro's Realm

776 821 At the beginning, the waters that originated in the "central springs of the sky" and streamed over the earth, were pure, clear, beneficial and "easy." But after Mousso Koroni's betrayal and that of the beings who listened to her, impurity was communicated to the earth /45/: the water that covered the earth clouded, changed color, and became "difficult." It either dried up or, on the contrary, flooded the land, drowning living beings.

[783] Today only the streaming rain water has preserved its character, more especially the first rain that falls at the beginning of winter. It is considered a purifying agent par excellence and is called dane sandyi, "water that sows," for it brings to the grains their soul, ni; the earth, sterile and "empty," becomes full and fertile, plants are reborn, animals and insects multiply (1).

[577] 1. A person who is generous and good is referred to as being like this first rain. It is also said of the spirit: "the spirit [is good like] the first rain" (miri dane sandyi).

The terrestrial waters, Faro's kingdom, are classified into seven distinct realms. They are in layers which correspond to the seven parts of the sky and earth.

[783] The first, dyi woyo "seething water," is surface water: it seethes when Faro makes himself known, and overflows in floods, as the heads of streams are swelled by the storm. It is also the lustral water used for purification and the water drawn for drinking.

776 821 The second, dyi ble "red water," is Faro's copper, a reflection of koblenkaba or "red sky." It is similarly the seat of the spirit's warlike or punitive activities. Water of wrath and vengeful action, it drowns the guilty. Through it, Faro strikes the bodies and health of those who do not recognize his dominion.

Faro prefers to sojourn in the dyi fi, "black water," where he keeps his secrets. It is to this water that one prays to seek grace. It is from the dyi fi that the twelve future waters will flow.

Calm and felicity reign in the dyi sumane, "cold water," where the fish live. The dya of earthly bwings are preserved in it.

While Faro drowns those he punishes in the dyi ble, it is in the madũ (literally, person, to eat) that their bodies rot or become the prey of fish.

The sixth category of water, kosira (literally, thing of fear) is a jail. In it Faro temporarily places all that comes under his domination.

The seventh water, dyi wolōflã, corresponds to the seventh heaven.

776 823 782 In the Niger, the places inhabited by Faro bear the general name of faro tyin. These are mostly deep depressions, well known to the shore dwellers, particularly the Bozo. /46/ Sometimes a consecrated stone, placed on the shore, receives the sacrifices offered to the spirit.

The most celebrated is a place called Souko, located upstream from Koulikoro near the village of Kayo. The local spirit engendered all that now lives in the river. Because of this he is worshipped by all Bozo and Somono fishermen, who used to send delegations to the annual sacrifice that took place during the dry season.

776 823 The Faro of Ségou lives in the Faka, a deep hole located close to the right bank, facing the town. Legend has it that the Faka is extended by tunnels: one links the river to the Bani while the other opens out at Dya and was used by the founders of the settlement in mythical times.

[825] The Faka is placed under the guardianship of a crocodile to which each year the inhabitants offered victims. At the bottom of the hole there is a fat blind scaleless polyo, which the fishermen always return to the water if they catch it in their nets "because it is Faro's gate-keeper." In olden times, a flat stone upon which were traced a representation of Faro and black dots equal in number to the inhabitants of Ségou was visible in the deepest part of the waters. [782] On this occasion an albino was sacrificed (by slitting his throat) and the first fruits of the harvest were offered to the spirit.

776 On market day, a gourd filled with river water, called *fle ndinye*
823 *faro*, is placed close to the shore where the canoes land. To drink a
mouthful of this water is equivalent to a sacrifice to the spirit. The
782 drinker gives a cowrie as alms to the beggar who drew the water, for
"never can [Faro's] water be bought or sold" (1).

1. *Ma ti dyi fere ma ti dyi sã.*
See pl. II, b.

At Sama, the *faro tyin* is a kind of natural corridor located amidst the rocks bordering and overhanging the left bank of the river.

[825] The finches nesting there warn the boatmen of the place's sanctity by flying off; the boatmen then stop to pray. In passing, they throw an offering and those who have broken taboos purify themselves by washing. Each shows the spirit all that he carries with him. Two nearby trees, *faro sõndyiri* or "trees of Faro's sacrifice," are used to tie up the white bulls at twilight. The following day, they are thrown alive into the river with millet mash and cola nuts. At the bottom of the passage, on a fairly smooth surface, the image of Faro described above was drawn each year in the course of the ceremony celebrated by the society of the Komo.

/47/ Faro also haunts ponds and wells. In the village of Nango a natural well was revealed to a hunter by a white ram which appeared out of a thicket. The village was built after the discovery of the water hole where the inhabitants now worship the spirit.

In the village of Siyango, the water of the well in which Faro resides is tabooed, the site of the well being the seat of all the religious ceremonies of the villagers. There the newborn are presented,
and deaths and marriages announced. The sick are treated by being
[755] made to drink the well water and wash in it. From his herd, each
person offers every year an animal which is thrown alive into the pit.
[681] Finally, those condemned to death are executed by drowning in the
same spot.

Faro's Auxiliaries

776 Faro has placed spirits as his representatives in the skies, in space,
773 on earth, in the trees, and in the rocks of the mountains. They see

176
113
to it that all things proceed in good order. In addition he is accompanied by auxiliaries who participate in his work.

The most important of these is his "secretary," the bolokuruni, a blacksmith of the black race who had lost the use of his hands and who went to live with Faro after his crippling.

This blacksmith lived on earth at a time when craftsmen did not know the use of tongs and used to seize the red iron in their bare hands to carry it to the anvil. The man who was to become Faro's companion had reached an advanced age and was still practicing his art when one day both his wrists were broken by the hammer of a clumsy apprentice. Mad with pain, he ran to the river and threw himself in to ease his suffering. Seeing that in his grief the man had turned to him, Faro took pity on him and kept him at his side. His body was never found and a diviner told his family the happy event of his disappearance.

The bolokuruni accompanies Faro and assists him in his incessant labor. He is the one who consults the register in Faro's fins in which everything is inscribed. "The requested image is sent from the fins into the pupil of Faro's eye which the blacksmith watches." As this image is reflected in the servitor's eye, he uses it according to the orders he receives. Thus he verifies daily the count of those living and dead.

176
825
/48/ The spirit has numerous auxiliaries among the animals. His airborne messenger is the swallow. It never rests upon the impure earth and its wings, reproduced on the headdress of the old men, symbolize the words it carries. The scorpion's stinger is the weapon given by Faro to the original twins: whoever attacks or wounds a twin is stung by this insect. The crocodile is the executor of Faro's important works: it kills those guilty of breaking taboos, or chases undesirables away from the river's edge. The scaleless fish, called kokoni, directed the first streaming of the waters on earth (1). The tneni (2) is Faro's "ordure" which it is the duty of someone to sweep

---

1. See p. 33.

2. Alestes nigrilineatus.

776 825 up (1). The small miri (2), "mother of fish," is regarded as the creator and guardian of all fish. Its name is associated with all prayers that are recited on the waters. The dodo (3) is Faro's messenger in the waters and transmits his orders and directives, and the polyo (4) is the gatekeeper, controlling those who wish to penetrate into the spirit's domain.

776 824 Certain plants are in constant communication with him. The yayale (5), "Faro's grass," grew on the mound where the mythical twins were born. The tomato, ngoyo (6), is assimilated in the blood. It carries within it the potential embryo for its seeds are multiples of seven, the number of duality. It is by means of the tomato that Faro impregnates women for it possesses, like humans and animals, a ni and a dya. When it has a double bloom, the two twin tomatoes are given to the women so that they may bear twins. If the fruit is single on the stem, it is split in two to be cooked and eaten. The gesture of splitting separates it symbolically from its dya which is thus returned to Faro (7).

1. The ordure has its use in religious life. See p. 258.

2. Micralestes acutidens.

3. Tétrodon fahaka.

4. The polyo fi is Herterobranchus longifilis; the polyo ble is Heterobranchus bidorsalis.

5. Andropogon (Hyparrhenia) hirtus.

6. Lycopersicum cerasiforme, the native tomato (pl. II, a).

776
824
> 7. Only vegetables whose spiritual essence does not have to be preserved are cooked, "for to cook is to shatter the soul."

776 In each village are grown one or several small fields of tomatoes,
824 called "Faro's fields," or "fields of twins." The fruits of these fields
244 are reserved for the worship of the spirit (1).
782

> 1. On the site of the ancient village of Soroba, at the edge of a pond located near the present-day village, there are two rectangular fields of tomatoes dedicated to male twins and four square fields dedicated to female twins in the village. Each year the villagers gather at the edge of the pond for a ceremony. The symbolic words relating to twins are recited and a prayer is said, to be followed by ablutions.
>
> The fruit that is harvested is offered to the spirit by squashing it on a neighboring tree trunk.

776 /49/ All metals belong to Faro. The seven /sic/ principal metals
823 are the following: copper (male), brass (female), gold, silver, tin, and iron. Copper and brass come from the fifth sky (koblenkaba). They descend at each thunderclap and, along with the "thunderstones," penetrated into the soil. They were discovered by a diviner at the bottom of a pond that had dried up because of a broken taboo. Be-
[301] cause of their divine origin, copper and brass represent "Faro's sounds." These sounds twist themselves around the spiralled copper or brass earrings that everyone wears and penetrate the eardrum, thus making it possible to hear words. Gold plays a part in the building of certain altars (boli) to which it confers strength and stability.

The sacrifices made with or on copper, brass, or gold have a restraining influence on the spirit for they are of his own essence.

No woman wearing copper, brass, or gold jewelry, may cross the Niger without opening her luggage out of deference to the spirit, for "all ornaments belong to him and often must be returned to him after death.

[784] It is taboo to bring metal into contact with cow's butter, an oily substance that does not allow water to penetrate.

Ba 776 436 Legend has it that cowrie shells, widespread throughout Black Africa and used as money, come from the deep water where Faro keeps his fortune. Faro "sleeps on a bed of cowrie." Their mythical origin explains their role and both the economic and religious value attributed to them.

Ba 776 823 The black earth of the river banks, bogo fi, such as that found on the sea shore in sandy places, contains the strength of the spirit and is used in numerous rites. Smeared at the base of the interior walls of the huts, it symbolizes Faro's presence in the bosom of the family. It serves to decorate the headdress of the circumcised (1). Those who live far from the Niger or from any source of water pray to it as if addressing Faro.

Ba 776 173 Some men occupy a privileged position in their relationship with the spirit. The first are the eight mythical ancestors, the eldest of whom is Koumabana. They received the word of the spirit, transmitted it to their descendants, explained before dying the new order of things, and instituted the cult.

At present they are still venerated as the prototypes of /50/ the human being in his new environment. Along with immortality, man lost the heavenly food which, until then, had been sufficient to nourish him. The articulated limbs which were provided for him dedicated him to manual labor, the techniques of which were taught him little by little. On the other hand, in the spiritual domain a deep change also occurred. In primitive times, man lived an almost animal existence and was without any responsibility. His abandonment by the balanza brought him suffering and death, but with them, his consciousness, symbolized by Faro's "word," developed. Along with death, illness, sorrow, bad instincts and the hard daily labor, there appeared also man's feeling about his own person and his place in an ordered universe, governed by Faro, as opposed to primitive chaos.

The eight ancestors taught men to venerate Faro, to ask him for all they needed, and to thank him for all they received. Therefore their names are invoked in most prayers and the episodes of their lives are told to the young to whom their works are held up as an example.

Bo 776 773 Mention should also be made here of the special position held by the Bozo who were born to the mythical girl twins, daughters of Faro (2).

---

1. See p. 233, Fig. 14.

2. See p. 33, n. 4.

Bo 776 173

In many cases, this origin enables them to intervene with the spirit, where others are helpless. Born as twins of the master of the waters, the Bozo never suffered the contamination caused by Mousso Koroni which affects all other men. Because of this fact it is possible for them to establish communication with the spirit at the bottom of ponds or in the river and to seek out the bodies of those drowned. The fishing rights conferred on them by Faro were never contested by the conquerors who settled on the shore of the Niger during the historic period.

Numerous articles or essays have already been published on the Bozo. Their language and fishing techniques have been studied. However, inquiries into their religion and the image they have of themselves prove very difficult. This is caused, on the one hand, by their apparent conversion to Islam and, on the other, by their reticence in discussing their traditional system. Such a contribution, however, will be indispensable to scholarship in the study of certain aspects of Sudanese metaphysics, particularly that of the Bambara and the Dogon. The myths of both groups mention the apparition of the Bozo on earth as coinciding with the beginning of /51/ Faro's actions which, in turn, coincides with the development of techniques among the Bambara, and with the "third word" of the Dogon (1).

1. See M. Griaule, Dieu d'eau.

In addition, the "joking relationships" which they maintain with the Dogon and which go back to the origin of a whole system of tribal and intertribal alliances clearly indicate the importance of the symbolic role conferred upon them (2).

2. See p. 119, n. 1.

Ba 776 782

Whenever he feels the need, Faro carries women and young girls off to his watery home. Many disappearances in the course of river crossings by canoe are attributed to him.

In olden times, each year a young virgin, chosen for her beauty by the griot of the village, became the wife and servant of Faro. In most cases she was willing and proud to become his eternal companion. On a designated day, wearing her finest jewelry, she was

776 brought to the middle of the river and thrown in while the villagers
782 prayed the spirit to give the village his protection and to bring rain
to future harvests.

Faro's Taboos

776 All of Faro's subjects, in particular the Bambara of both sexes and
784 of all ages, are requested to respect a certain number of taboos.

The black earth, bogo fi, of the river banks, used ritually in many instances, would be excellent in pottery making. The women potters, however, cannot use it because it blackens in the process of baking. No pottery that has been fired may be washed in those places haunted by the spirit (1).

1. At Ségou, numerous drownings are blamed on the increasing frequency with which this taboo is broken.

[262] Butter in many places is forbidden by Faro and may not be preserved in water. (2)

2. This taboo is linked to the relation between Faro and the Peul, but the nature of their relationship has not been clarified.

No one crosses the river without opening his luggage and presenting Faro with the gold, copper, or food it contains. As a rule, the wearing of metals is forbidden in those places haunted by the spirit.

776 The principal taboo concerns menstrual blood which was originally
784 caused to flow because of the sins and impurity of Mousso /52/
841 Koroni. No menstruating woman may visit the places inhabited by
Faro; none may draw water, wash clothes or cooking utensils, or cleanse herself in any of these spots. In addition, a man whose wife is in such condition must refrain from appearing at religious ceremonies or, if he is a priest, from performing the ritual.

In this part of Africa, as in many others, menses are conceived of as a necessary flow of empty blood, impure because it has not contributed to the formation of the foetus, the embryo of which each

776 784 841 woman carries within her. (1) Deprived of Faro's essentially impregnating power and contrary to its generating action, this blood is considered evil, and all that recalls it or comes near it is excluded from the ritual.

Faro's Character, Role, and Deed

776 The principal characteristics of Faro's deed in creation are: omnipotence, omnipresence, and benevolence. Everything, whether animate or inanimate, depends on him in time and space.

The Bambara are extremely sensitive to Faro's power over the universe. They say: "Neither by day nor by night does Faro stop his incessant work." He sees to the efficient workings of the order which he inaugurated and which requires constant attention. His time is divided: from dawn until evening he occupies himself with the earth and its inhabitants; the next twelve hours' work is devoted to aquatic animals and members of his own family. Procreation depends on his will; it is he who, in the sky and in the water, controls the physical and spiritual life of all beings: the soul and vital force. In due order, with which the humans cooperate by observing his laws, he maintains life and makes the new bodies participate in the functioning of the universe according to a regular rhythm. Souls are reincarnated, assuring the continuity of spiritual forces in the world. The same power directs all acts of individual and social life: birth, circumcision, excision, initiation, marriage, agricultural work, voyages, war or peace.

Throughout the development of individual life, it is Faro who maintains man's physical integrity: he gives him health, necessary to
753 action. Sickness is always /53/ considered a loss of strength which the individual must ask Faro to restore. The sovereign master of man's life, he has the power to take it away from him.

---

1. See G. Dieterlen, "Mécanisme de l'impureté chez les Dogon" /The Mechanism of Impurity Among the Dogon/ *Journal de la Société des Africanistes*, Vol. 17 (1947), pp. 82 ff.

776 773 At death, he takes back the spiritual principles of the diseased and preserves them in water so as to reintegrate them into another body, thus using forces which are eternally reusable. The product of the "shedding" (mana or folo) of souls which remain on the altars is for him in a way of constantly verifying the account of those living and dead who are entrusted to him.

On earth, men are indebted to him for all they possess. He gave them language, an expression of thought, and taught them its usage, having warned them against the misuse and evil use of words.

The techniques of survival, another expression of "Faro's words," so necessary to their lives since they have to provide the means for their existence, were revealed to them by the spirit. He helped them with his sovereign power, either by directly providing them with new tools, or by inspiring some of them to develop new techniques by putting to use observed facts. In this way, he gave the Bozo fishing nets which enabled them to catch the first recorded animal food, the fish; likewise, he encouraged among the Bambara the discovery of weaving through observing the spider's web.

He also gave men certain seeds which became the origin of farming, such as cotton and fonio, both of them being known before millet and the other cereals.

782 As proprietor of cowrie shells and metals, he is the master of wealth, distributing it as he pleases. Thus, one who owns precious metal is responsible to Faro for it and owes him a part of one's earnings. For this reason many offerings are made by throwing gold or copper into the river.

776 241 Faro's deed is essential where the Bambara's main activity, agricultural work, is concerned. Every man with dignity and nobility must cultivate the earth in order to honor Faro. Each stroke of the hoe is a wound inflicted upon the earth and a punishment for its impurity. Each stroke of the hoe humiliates Mousso Koroni and purifies the earth. Faro watches over the soul and the vital force of the seeds. Only he can provide rain necessary to germination, for rain contains the soul, (ni) of the cereal grains as does the water of ponds and streams which one collects in case of drought.

776 774 241 Millet receives its soul as soon as it gets the humidity of the earth, and from that time on, it accompanies the various stages of germination with utterances which, at the beginning of the world, could be heard. As soon as /54/ it has received the rain, the seed splits and says: "My place is assigned." Then the sprout comes out of the earth

776 774 241 with the words: "May I be protected." Finally the growth of the stem is accompanied by a third utterance: "May I be obeyed" (1). It preserves its soul until full maturity, that is, the moment is is harvested. When the harvester's blade cuts the spike or the cluster, the plant sends its soul into Faro's realm with these words: "Iron is forbidden my grain; soul, go away to the house of water" (2). Thus deprived of its soul, the millet becomes suitable for eating and it says: "If I were not dead, I could not be eaten; my breed cannot be lost: whether or not I am eaten, nothing can reduce me for my soul is in water" (3).

776 241 Many agrarian rituals are celebrated in order to assure Faro's protection. The high quality of the first fruits of the harvest offered to him indicates the importance of his role. It is in fact a payment made to him for the past harvest and in anticipation of the harvest to come.

776 He is also the guardian of the artisan's skill. The first object forged by the young blacksmith and the first spindle of thread woven by the young weaver are brought to him. Through this gesture, the individual entrusts him with both his work and his manual dexterity. After Faro has seen the work, he does not let the worker forget what he has learned and will help him perfect his skill.

Faro is a judge. Those who break the rules he has made are the object of his righteous wrath: those who are drowned or struck by lightning are always persons who have broken a taboo. Men submit most difficult cases to him as a last resort. Through the intermediary of the agents of different rituals such as the intermediary of the diviners, he answers requests and "settles the words." Most prayers 776 782 are addressed to him and in many cases the invocations end with his name. He is omnipresent, invoked everywhere, and the seat of his power, as of all others, is the seventh heaven, to which the Bambara

---

1. These are the three formula:
ndyora, nga kolosi, nga bunye.

2. Neke ye nkise tne ye, ni, ta dyi so la.

3. Ni nǎ sale te nti dũ, n šia tise ka tunu,
ndunaw ma dũn wo, fẽ te bwona, ni be dyi la.

776 782 address the following: "Seventh heaven, you are large, you are long; your west is red; your east is white; your north is great; your south is black; seventh heaven, you are the king of seats among all seats, you are the great generator of the power of all powers, you are the great discoverer of all secrets, you are the source of all /55/ fortunes, you are the place where the common weal may not be destroyed; source of all things, deliver me from sin" (1).

1. *Wolo flã kaba, i ka bo, i ka dyã, i kle bi ka ble, i koro ka dye, i baba ka bo, i bani ka fi; wolo flã kaba, siki yoro u la sikiyoro masa, fanga u la fanga ba sindi, gundow be ladyele fara be, nafolo be ladyele boyoro, dyẽ wari dũ bali yoro; ko be boyoro, hake tonye.*
This prayer is recited by the head of the family during childbirth, a grave illness, or a death. It was also used during rituals of the enthronement of kings or chiefs.

776 772 Pemba and Faro, the complementary principles, were both born of the spirit, *miri*, at the beginning of the universe. In considering the psychological aspects of their symbolic roles, one can understand why, despite the antecedence of Pemba's role, from time to time the Bambara say that "Faro is the eldest." For he represents, in the human microcosm, the will and wisdom capable of controlling the propulsion of sexual instinct as symbolized by the prolificness of the *balanza* as well as the violence and disorder of the emotions as expressed in Mousso Koroni's vertiginous chthonian voyage and her madness. The antithesis of the sexes, realized in the myth by the bodily separation of Pemba and Mousso Koroni, and their disagreements and quarrels which are the origin of all cosmic disorders, are compensated for by harmonious agreement and union, as established by Faro in his androgynous state. Faro is the dual vibration which, from then on, orders the universe; he is reason and moderation opposed to the overwhelming force of the *balanza*; he is the light of the spirit which triumphs over darkness and primordial gropings.

/56/

Chapter 3

THE PERSON

812 The Bambara conceive of man (*homo*) as the principle of nature. He is "the seed of the world" and as such reflects the totality of beings and things in their essence and in their situation. Like the universe, man is life, and like life, "he is maintained by the attraction of the cardinal angels." Universe and man are each the condition of the other: the totality of things upholds the human being in his place and situation and makes him persevere within himself. Man, on the other hand, is the basis, the "raison d'être," and the cause of the universe by virtue of his consciousness and the knowledge he has of himself.

In this way the principle of duality, contained in the original creative thought and realized in the universe by the sky and the earth, is reflected in the person. The human being shows in his body the separation of the sexes necessary to the multiplication of the species—a separation, expressed in the myth of Pemba and Mousso Koroni, that shows the disorders, the difficulties, and the conflicts implicit in such a situation. But through his twin souls, the human being brings about the ideal union of the sexes as expressed in the myth of Faro's androgyny.

812 928 Moreover, these mythical personalities are present in man: Faro through the *ni* and the *dya*, Pemba through the *tere* and the *nyama*, Mousso Koroni through the *wanzo*. It can also be said that the peregrinations of these beings and their pursuits in time and in the mythical regions are the expression of man's psychological states such as the inner explorations and conflicts necessary to man's defining himself within himself and with respect to the rest of the creation. In other words, they are the expression of the growing consciousness of self. The whole religious and social attitude of the individual testifies to the interplay of these various forces, between which he must maintain balance and harmony.

000 /57/ In this chapter we shall examine in succession the following elements that make up or determine the person: the spiritual principles (*ni*, *dya*, *tere*, *nyama*, *wanzo*), the parts of the human body related to them, and certain social attributes of the individual (given name, family name, device, taboo). Finally we shall consider the cathartic role of the institution of joking relationship founded on the notion of duality.

Spiritual Principles (1)

114 1. A few comments on the spiritual principles of the Bambara (in particular on the dya and the nyama) have been collected in the chapter entitled "Théorie des âmes" by Tauxier, La Religion bambara (pp. 14-25), in which the author appraises the works of the Abbé Henry and of Ch. Monteil. Some of the observations made in the following chapter have been summarized by the author in "La Personne chez les Bambara" and in "Note sur le tere chez les Bambara /Note on the Tere among the Bambara/."

It will be useful to compare this study of spiritual principles with the studies made among the Dogon and presented respectively by M. Griaule, S. de Ganay, and the author in Masques Dogon, Les Devises des Dogon, and Les Âmes des Dogon.

761 The Soul, ni, and the Double, dya:

776 Faro controls the principle of life in water, which is his realm
as well as the life-giving element par excellence. In the bodies of
[826] living beings, this principle has its seat in the blood. The blood of
the sacrifices offered to the spirit (or failing that, the juice of the
tomato, a transformation of blood) is a contribution to the reservoir
of life controlled by Faro—life which he redistributes in all its forms
throughout the universe. Water is the privileged element in which
life may persevere indefinitely. Elsewhere, life is maintained only
if water comes to nourish it.

761 Faro's creative function is materialized by each marital partner
776 eating a tomato before sexual relations. This act is accompanied by
the recital of a prayer. The juice of the fruit, which contains the
842 body of the future child, transmits life according to the following
833 mechanism:

Faro receives the offerings of tomatoes grown ritually in the
761 consecrated fields, as well as the blood of victims slain in his name
776 above the waters. Blood and juice, spreading over water, the fertili-
842 zing agent, are collected by the swallow, Faro's airborne messenger.
824 Liberated in space, they return to the soil with fertilizing rain and
penetrate the tomato seeds which thus contain a particle of generative
power.

761 776 842 After the marital couple has absorbed the fruit, a smooth-bodied embryo with nonarticulated limbs is formed in the maternal womb. /58/ It is at this moment that the couple consummate the sexual act in the course of which the woman "takes into herself the entire body of her husband": the upper part through the eyes, the lower part through the genital organs. The masculine seed located in the seven principal articulations (knees, elbows, ankles, and spine) transmits them to the embryo. The body, originally similar to the body of the spirit, thus becomes that of a human being.

The spirit restows the spiritual forces after the man has mated for the second time with his wife. If the woman bears a single child it means that the man, in the course of the second union, formed the double of the first germ, but was not permitted to procreate twins.

761 776 843 774 Faro disposes of the child's life and nature. He decides all that the child will be and will do, and determines his destiny from the moment the seed is placed by him in the womb. The foetus then develops with no further modifications until parturition, at which time it receives the spiritual principles, the soul, ni, and the double, dya, which will be his throughout his life. It is at this time that the inner relations of the individual to the social group to which he belongs intervene. Although Faro gives each child a new body, he animates this body with spiritual forces drawn from the family reservoir. The [775] newborn child is the direct heir to the ni and the dya of a deceased member of the family, actually of the one, whatever one's sex, who died shortly before the birth of the child (1).

1. The reincarnation of the deceased's spiritual principles, however, is not an absolute rule. Faro is the master of an infinite reserve of souls. Twins, albinos, and certain other children are born with the ni and dya as yet undetermined. They originate respectively in the second sky (kaba dye) and in water (dyi sumale). Further study on this particular point is necessary to complete this investigation.

761 776 774 775 The consequence of death was, in effect, to separate the corpse from the forces that animated it. The ni, by appropriate ritual, had been preserved on the altar of the ancestors (2), and the dya had left

the dying man to go into the water and place itself under Faro's protection. At the moment of delivery, both *ni* and *dya* return to the body of the newborn child who replaces the dead man, but they return in reversed order: the *dya* is returned to the body of the child and becomes his *ni*; the *ni* of the deceased mixes with the birth water spread on the ground which forms the shadow (*suma*) and will be his double, the twin (1). In the case of a boy, the *dya* will be female; in the case /59/ of a girl, it will be male. These movements are independent of the sex of the deceased as the spirit reverses the sexes when necessary. Each human being is thus both male and female
[828] through his soul and his double. This conception of human nature, which is fundamental to the Bambara, is expressed in the symbolism of numbers. The number seven is formed of three (male sexual symbol)
[801] and four (female sexual symbol) and represents the complete man. In addition, on another level, the number six is that of male twins, seven that of mixed twins (and the hermaphrodite), and eight that of female twins. The body of the newborn child is gently tapped
[844] by the number of strokes representing the above figures in order to call the child's *ni* according to its sex.

761
776
774
775
2. Grouped hierarchally, children, male adults, and women form religious societies or institutions, *dyo*. Each *dyo* is charged with the upkeep of altars which serve to preserve the spiritual forces of the group. (See p.

[844
824]
1. The blood of childbirth represents the excess tomato juice absorbed by the woman, that which remains in the womb after the formation of the embryo. On the eighth day after birth, the mother of the parturient woman squeezes three or four tomatoes (depending on the sex of the newborn) into a gourd which she then gives to the child's father. The latter makes his wife drink the juice to replace the blood which she has lost and which is considered impure.

774 827 The ni, which animates the body, is visible during the weeks following birth in the movements of the fontanel. It is also the breath, the respiration, the beating of the arteries. Like the dya, it is not indissolubly bound to the body for it leaves it during sleep in order to go to the sixth sky, sunankaba. When the person awakens, the ni returns [828] to the body and the dream is considered a memory of what it has seen, a premonition of an event concerning the individual, the family, or the village (1).

[781] 1. Great numbers of fish seen in a dream foretell an abundant catch; quarrelling signifies war; to swim suggests purification for an offense. The passage of crickets from west to east is the sign of a great battle or famine. In this last instance, the situation is so serious that the village is forewarned and each one must make an offering to a needy person saying these words: "I make this soul sacrifice to God in order that he save me (nye nin ye ni sakaka ye ka ngala ma a la ka mbo)." The village chief also offers a collective sacrifice.

774 The dya, the double or twin of the human being and its opposite sex, has a body: either the shadow on the ground or the image in the water. It may move alone or be forced to leave the person it is accompanying under Faro's order. When a crocodile carries off or wounds a man by order of the spirit, he first seizes his visible shadow on the surface of the water and his dya in the water. The same thing may be attempted by someone with evil intentions. In such a case the close contact which the dya as a shadow maintains with the impure earth makes it particularly vulnerable. In order to remedy this, the person concerned must look at himself in the water contained in a gourd; then, when his image is clear, he clouds it by tipping the receptacle; this puts the dya under Faro's protection.

/60/ The independence and vulnerability of the dya require, in the course of certain religious functions, that it be taken over by Faro for the duration of the ceremony.

Wild and domestic animals are endowed with a ni and a dya. Plants also have a ni. The ni of trees is situated in the buds and insures its growth and its life; that of cereals necessary to human life

774 is the object of constant concern during agrarian rituals. The role of the soul of plants is particularly noticeable in their medicinal uses. Drawing a remedy from a plant may cause its death, liberating its spiritual principles for the benefit of the sick man. Because of this, such an act is equated with a blood sacrifice.

With the exception of the *ngovo* tomato, plants have no *dya*. The shadow (*suma*) of a plant is not independent like that of a man or an animal. It exists only through light effects and its movements are caused by the air and the wind moving its leaves and branches. This is what the Bambara means when he says that the *dya* has a life of its own and depends on Faro, whereas the plant's *suma* depends on the spirit Téliko, master of the air.

774 An individual's *dya* can be known and his temperament and life
787 possibilities assessed by measuring his shadow on the earth at noon.
804 The unit employed is the little finger, which is a corporeal symbol
843 of the person. If a pregnant woman is thus measured, the sex of the child may be predicted.

When a boy or a girl gets married, it is said of them: *a ye a dya*
774 *furu*: "he (or she) has married his dya." For it is impolite to say that
[579] a person married anyone but his spiritual double. Besides, the union of the couple is repeated by the union of their *dya* which like them-
[595 selves are of opposite sex. In olden times, male twins married the
851] same woman and the latter's *dya* was taken over by Faro in the Niger. The child she conceived was the son of both husbands.

Some men do not marry. This is true of the Soma, the religious
589 diviner attached to the major Bambara societies. Initiated in the
791 course of a solitary sojourn in the bush, he left his *dya* with the invisible spirits. This is a prerequisite to the gift of double sight with which he is endowed as well as a protection against possible dangers to the *dya* when it remains in contact with the earth, or when it approaches other humans. The true spouse of the Soma is his *dya*: he may mate only with it on a fixed date when the spirits return it to him for this purpose. /61/

The *tere*

774 The *tere* was inflicted by Pemba on Mousso Koroni in order to diminish her power at the time he was pursuing her. This explains its complexity: it is at once the character of a man, his strength,

774 his consciousness, as well as that part of his being which, through the body, makes him sensitive to events. If man is vulnerable through his double, it is his *tere* that is affected by any breaking of taboos; it receives and submits to impurity.

1824 The *tere* has its seat in the blood and the head (*kun tere*). It develops in the foetus in the course of gestation and is composed in part of the parents' *tere* to which is added that of the deceased person whose soul and double the child has inherited.

774 553 787 The appearance of the child's *tere* is determined by the old men of the family in the course of the name-giving ceremony which takes place publicly on the eighth day after birth. After carefully examining the child's hairline along the forehead, the manner in which his eyebrows join, the shape of his eyes (the seat of intelligence), mouth, hands, and feet, one of the old men present announces in a loud voice the revealing signs of his character. The position of these signs makes it possible to say whether a child has a good or a bad *tere* and to make predictions about his life. A slight bald spot on the middle of his head will make him a rich man; a wide and deep skull will make him a chief. The old man then swings the child in the direction of the four cardinal points above the family altars and gives him the first name of the deceased person whose *ni* and *dya* he has inherited. Some of the hair, shaved off shortly before, is then thrown into the Niger by the father who pronounces the name while facing the river. The gesture and the word are meant to entrust the *tere* to the spirit of the waters and to ask his protection. On the same day the blacksmith marks out on the child's face the scarifications that act on his *tere*, giving him strength, courage, and virtue.

774 787 828 As the child grows, certain of his physical peculiarities are interpreted as characteristics of his *tere*. If he grinds his teeth while sleeping it means he will attack his parents; if he often takes hold of his left wrist with his right hand he will always be victorious. A girl who walks swinging her hands and throwing them behind and who raises dust with her feet while walking will destroy her husband's fortune. Some informants say that a person has several *tere*: /62/ one for his manner of walking, one for the way he carries his head, one for the shape of his limbs, and one for the breasts if the person is a woman (1).

---

1. The physical signs determining the *tere* are very numerous. On this subject see

774 D. Traore. "Le Tere chez les Bambara du
787 Ségou /The Tere among the Bambara of Ségou/,"
828 *Notes africaines*, January 1947, pp. 29-31.

774 Man is considered the bearer of a strong *tere*. Because he talks, is well informed, and knows good from evil, he is responsible for his own life and that of his family. The *tere* is the gaining of consciousness.

774 825 This aspect of the *tere* means that only domestic animals, whose life depends on man, are bearers of this principle. Wild animals "have a hard and barren life; they have to labor to feed themselves; so they do not have to bear the burden of a *tere*." All that lives independently of man is without a *tere*. (1)

The *tere* of domestic animals is not as powerful as that of man, but is also revealed by external signs. For instance, a horse that swings its head from right to left while it is tied up has a very bad *tere*; it is said to be its *duga fufa* (2). Such a beast is undesirable in a home for it "chases away happiness and success." A wounded domestic animal attacks its enemy with its *tere*.

774 784 827 The fact that the *tere* is that part of the person which suffers the consequences of impurity testifies to the bonds that unite man to the outer world. The *tere* is disturbed when a taboo, *tne*, is broken. If it is a good *tere*, it leaves the person; if it is a bad one, it becomes worse. On the other hand, the brezking of a taboo provokes a physiological change in the blood which loses its red color and becomes

---

1. However, according to certain informants, wild animals might also be endowed with several *tere* for different parts of the body. In this case, it would seem that the term designates especially the animal's physical peculiarities and not its consciousness, as in the case of man and domestic animals.

2. Literally, "the swaying of the hawk." It is said that when a hawk descends on its prey, it swings its head right and left in order to see the prey better.

774 pale. It is manifested by a loss of strength and by illnesses affecting
784 the body openings: the man becomes blind and deaf-mute. He may
827 also become paralyzed. Generally he does not die but is pursued by
ills until he purifies himself.

In addition, the *tere* changes when it is detached from its normal
774 support; it then becomes *nyama*, a force which acts outside the body.
Manifest in action, the fact can already be sensed in the spoken word,
the bearer of *nyama* which immediately affects /63/ the person to
whom it is addressed. The consequences of this action of the word
are manifold.

761 At the time of death, the *tere* is completely liberated. Transformed
into *nyama* which leaves the body, it then becomes a very active
774 form which, in certain cases, can attack whomever it considers
778 responsible for the death (1).

774 Sacrificial beings, men or animals, or plants for ritual use never
778 release a dangerous *nyama*. Their spiritual principles and forces
are channeled in the course of the ritual and directed toward the
benefit of a supernatural power through the altar. The same is true
of domestic animals immolated for consumption, in which case their
forces are used over again and their death causes no disorder since
it was foreseen by Faro's law concerning food.

On the other hand, the *nyama* of the bush animals (*nyama bakâ*) leave their dead bodies and pursue the hunter (2). To protect himself

---

1. This very visible but incomplete aspect of the *nyama* is the one that has been most studied heretofore. On this subject, see the works of the Abbé Henry, Ch. Monteil, H. Labouret, L. Tauxier. Furthermore, in the sky, in space, and on earth, there is a *nyama* independent of the *tere*. The nature of this general and vital element has not been completely clarified by investigation.

2. The sick man may be treated in the following manner: seven (or a multiple of seven) cowrie shells are thrown upon the hide of the animal

774
778

as an offering, which implies an apology with the understanding that the guilty man is given as many blows as there are cowrie shells offered. Next, the hide is soaked in water and washed. It is then secured so that it may not once again run away into the bush. These various operations are performed as often as necessary and until the crisis is over. On the other hand, this purification may be performed as often as necessary, but cannot be renewed in the case of a broken taboo.

the hunter carries an altar, *dozoboli*, suspended from his shoulder. Into it the animal's strength is channeled the moment it dies.

Every individual is, therefore, constantly faced during his lifetime with this active force which is liberated by the word, by certain acts, and by death. He must be in a position to fend off danger, to maintain his own *tere* which will help him if it is good, but which may on the contrary join the enemy forces and help them in their destruction if it is evil. Therefore, in the latter case the individual tries to change it by seeking the assistance and advice of the Komo diviner. But whatever happens, each individual, whether he wishes it or not, endures the attacks and the presence of numerous and varied *nyama*, because he has destroyed plants, trodden on insects, and wounded other living beings. Thus, he is at all times the bearer of displaced life forces that are foreign to him. Moreover, these forces find their way /64/ through him to all that he touches. He becomes a center of influences which first exert their action on his person and which he must take into account to maintain his integrity (1).

(1) Although this feeling is very distinct in the mind of the Bambara, it does not make him inactive. The responsibility is only serious in the case of a voluntary act of useless destruction. In all other cases, the rites counteract the inconveniences. The Bambara are responsible, but free.

The wanzo

778
304
The wanzo, an evil force created in the beginning by Mousso Koroni's impurity, was caused by the curse, of which she was the object after her betrayal, and which she communicated to the earth during her underground journey. After she had maimed herself on Pemba while having sexual relations with him, her jealousy pushed her into avenging herself on the women who mated with the balanza. Her madness and despair prompted her to pursue her betrayal to the very end. With nails and teeth she excised and circumcised the men and women she met during her travels. The wanzo she carried about thus penetrated the human species, making the operation necessary for all those to follow. Faro could not remedy this, but his protection is invoked for each child during the operation. The headdress of the circumcised symbolizes the sky and the purifying light.

At birth, each child receives the wanzo, "the word of Mousso Koroni," in its blood and on its skin at the moment of contact with the earth on which it is born. This force, also called kono nyama, "the nyama of the inside," is not to be confused with the tere but is of the same nature and is transmitted to everything the bearer touches. [826] Its seat is mostly in the foreskin of the man and the clitoris of the woman, and it represents the disorder in the individual: "it makes man such that he can live with no one, can stand no one, and cannot stand himself." In addition, it is opposed to fertility.

In order to become a stable individual, to marry, procreate, and to sacrifice, the child must be rid of his wanzo. This is achieved in the course of circumcision or excision and in the rituals that end the seclusion of those operated upon. The greatest part of its force runs into the earth with the blood of the mutilated organ. The rest of it escapes with the smoke of the fire over which the children jump (three or four times according to their sex) before returning to their homes. The act of abandoning their /65/ old clothes and putting on new ones at that time confirms their new status. But the wanzo does not disappear; it is channeled into the masks of the ndomo society to which the uncircumcised belong (1). Similarly, when a child dies before being circumcised, appropriate rituals have the effect of channeling the

---

1. See p. 222.

778 wanzo and directing it into the mask to prevent it from doing harm
304 (1). Thus, nothing of the individual forces is lost. The wanzo itself, harmful at the beginning, when properly channeled and directed, serves to consolidate the collective energies of the infantile societies based on it.

[582] Only when an adolescent has lost his wanzo is he permitted to marry; any individual would refuse to marry a partner who is not completely rid of it.

The Body

826 The Bambara have a notion of their bodies and the role of the different parts and organs. This notion is all the deeper because it is linked to that of the spiritual principles that animate it.

Indeed, the tere is determined by certain visible aspects of the body, while the ni and the dya also have sexes like the body. Therefore any study should include the links that unite the spiritual elements to the physical body in order to understand properly its state and function.

Blood, which together with breath is the seat of life, is also the vehicle of physical and spiritual forces that circulate with it in the veins and arteries. The blood sacrifice liberates these forces which sustain the altars, the soil, and the beings who receive them. Certain alliances are consecrated by an exchange of blood. The clear color of blood is proof of its purity: all infractions bring about a
[841] change and cause it to become pale. Menstrual blood, testimony to Mousso Koroni's impurity and of the momentary sterility of women, is the principal taboo of the supernatural powers that create and protect life.

826
828
827
The head, which contains thought, is an essential part of the individual and his symbol: "the head of the members of society" is represented by a stroke in the course of the rituals performed by members of the Komo or the Kwore. Man grows through his head just as a plant "grows through its head bud" (2). Man's head is protected

---

1. See p. 256.

2. The myth mentions the "head of the balanza" at the time that men broke the

826 828 [827] taboo by cutting its buds (see p. 43). The altars of the fields and of agricultural societies, tõ, watch over the "head of the millet."

/66/ and purified in order to maintain his health and prosperity. It is the seat of consciousness and will, and receives a share of the scarifications made at birth, which will exercise influence on the person.

826 Hair contains an important part of the individual's ni. It is therefore dangerous to mix it with the hair of another, for that would create a vital and indissoluble bond between the two parties. To burn it is equivalent to making an attempt on one's own life. It is buried or placed in a deep hole in the wall of the house for protection (1).

[832 789] 1. Many charms and magic spells are based on hair. In order to be loved by a woman, a man must mix some of her hair with his and place it under his head at night with a prayer. In order to keep his job, an employee does the same with his hair and that of his employer; he then sacrifices a victim over the ensemble so that the employer cannot fire him without risking his own life.

Hair and the pilose system play a part in the myth and were used to count the age of primitive men until the advent of death on earth. All the ancestors represented in the sanctuaries are bearded and hairy. Their appearance shows that, having become mortal, they lived at a time when rejuvenation no longer existed.

826 827 The pupil is the fundamental part of the eye. Its name, nyemani, "little person of the eye" (2), expresses its function. The pupil reflects and absorbs the person it sees. The image is a kind of double,

2. Man's pupil, according to information that is still obscure, was made with that of the serpent and was also called nye mani sa, "serpent of the little person of the eye."

826
827
a replica of the person seen, the double being received and preserved by the seer with the help of the registering mechanism of the eye. It is with his eyes that Faro inscribes in his memory the number of beings under his domination. It is through the eyes as well as through the genitals that woman is united to her husband during the sexual act. The individual who has broken a taboo is affected first through the eyes: he suffers from pains or becomes blind according to the degree of his offense.

The nose is the canal of man's breath or, respiration, ni na kle (literally, soul that ascends and descends), a term describing the very movement of life. The seat of breath is the solar plexus, kwa nye, "eye of the chest," also said to be ni dyuru ba, "the great rope of the soul." When Faro decides to take back the life of a man, he carries him off into the water and returns his corpse with the nose and the navel cut up. The mutilation of the nose reminds all that, as the master /67/ of the guilty man's life, he takes it away from him by taking away his breath.

The mouth and the tongue play a part in all the rites and symbols concerning the person. The voice is "in the throat" but man talks with the mouth. The word is a creator, an act; it carries a force, nyama, which inhabits the mouth, permeates the tongue and saliva, and transmits itself to everything it touches. It is Faro's word passing through the mouth, the word received in suffering in mythical times, which integrates the human species with the new order established in the creation.

Its organ is the tongue which, when represented in ritual objects, symbolizes it (1). Its vehicle is saliva: to spit is to give one's word, to seal an oath. The old men spit on seeds, after having promised an offering to the Komo; the sacrificing priest, before the libation, spits prechewed kola nuts onto the altar. Husband and wife spit their marriage oath. The power of the mouth finds its most powerful expression in the griot's recitation of the device (2).

---

1. The prayers recited during the initiation rites allude to the formidable nyama of the initiates' tongues.

2. See p. 112.

826 827 The mouth and tongue, ejectors of the word, can be compared in importance to the ear, a receptive organ. It is through the ear that man receives and remembers the word. Its role is comparable to that of the sex organs which eject life and receive it. The ear in itself has both sexes: male by its auricle, female by its orifice. This duality expresses the basic duality of man. That is why the corpse of an uncircumcised man is sometimes amputated at the ear rather than at the foreskin. [764]

826 301 Because of the symbolism of its shape and because of its function, the ear is adorned. Men formerly wore three copper rings on the right ear and four on the left, the number seven representing the complete being, male and female, ni and dya. Women wear four rings on each auricle or, if they can, twenty-two, which represent the twenty-two stages of creation, or the twenty-two generative categories. Sometimes, for both men and women, a single ring attached to the earlobe represents the mother of the other rings (1).

827 191 301 776 But the role of this adornment goes much further. As symbol of the word, it is through the ornaments that the spirit Téliko, master of sound, hears what /68/ is said to man. They attract sound and send it back to Téliko and Faro, who thus judge the acts and words of men. To wear earrings did not originally mean to adorn oneself, but to hear the spirits as well as to force them to hear what was said (2). Its second effect is to embarass the liar, the bearer of false news or evil words, by putting him in the position of being understood by the invisible, therefore of being judged by them. A pleasant or well-intentioned word benefits the one to whom it is addressed and this

---

[178] 1. In olden times, men and women wore cowrie shells on their ears in the place of copper rings, a custom which would seem to be still respected in certain villages today. These shells played the same part as copper.

2. Rings placed on musical instruments have the same purpose and also symbolize those worn by men. See p. 282.

827 191 381 776 gain is felt as a contribution to the beneficial *nyama*. "The spirit Téliko transforms the air emitted by the speaker into favorable *nyama*; upon hearing a good word, it would be necessary to stop one's ears so that this *nyama* does not leave the person who received it." Moreover, if a person opens his eyes wide while watching the speaker, "the latter's *nyama* is able to penetrate the body of the listener" and spread within it as a reviving tide. While this takes place, the good word saturates the air, helping the action of breathing, hence the life, of the listener. "One breathes," says an informant, "with the *nyama* of the words which enter through the eyes and ears." But this process is not one-sided. The good *nyama* returns to the speaker through his own eyes while he is looking at the other person. He is reflected in the person with whom he is talking and it is as though he were talking to himself. There is a beneficial exchange even when only one of the two actors speaks.

Inversely, a bad word or an insult upsets the listener and rebounds, acting upon the insulting person. This harmonious arrangement summarizes precisely and powerfully the universal movement, principle of life and strength for all beings. It comprises an individual movement provoked by the word which acts upon the body by developing and regularizing the rhythm of breathing, and a collective movement set off by the return of the word to the speaker. Because of the effect of the spoken word, exchanges are established that are favorable both to the rhythm of individual breathing and to the equilibrium of universal life. This effect is not limited to words in the strict sense; sight enjoys the same prerogatives as hearing and diction. If an object [431] belonging to a certain person is seen and coveted by another, the owner cannot refuse to give it to him. The act of seeing has established by itself, between the stranger and the object, a bond which is affectively stronger than that of ownership.

826 The articulated parts of the human body are just as meaningful as the head. The bones, more lasting than the flesh /69/ and a testimony, in the grave, of the life that has passed, are its foundation and framework.

The navel is the central point of the articulations: that is why Faro, when he drowns a person, returns the body after having slit the nose and navel. This double mutilation shows that he has reclaimed the head and the body of the guilty man. The articulations are the indication of man's condition in the new order. Where he was once

826 immortal with smooth limbs, he became mortal and hard working. As seats of the male semen, they transmit this condition to the embryo, formed in the maternal womb by Faro. The weariness felt in the limbs after the sexual act is proof of this transmission. As Locus of
[829] the virile semen, framework of the man, and a mechanism suitable for physical labor, the articulations are also the symbol of society. The chief's throne, in the shape of a knee, is the image of its owner's articulated body as well as that of the armature of the social body and of the grouping of individuals under his jurisdiction (1).

1. See p. 178.

826
823
201 The limbs represent the right and the left. Rectitude, firmness, and directed action are "right"; incertitude, the spirit of indecision, and inconsistency in behavior are "left." The right is male and symbolizes man's labor; the other is female. All gestures, profane and religious, and all representations of objects bear witness to this. Performing his first task in the fields before the rain, the farmer gives three blows with his hoe held in his left hand in order to absorb the impurity of the earth. After this, he works until the harvest with his right hand. To cross one's hands means supplication, to put them behind one's back means humiliation.

826
201
576 Each finger has its value. The little finger, *bolokoni lakare*, is "the son of the other fingers" and in it is concealed the entire strength of the hand; it "carries the *nyama* of the fingers." Hence its use as a measure of divinations. To point to someone with one's little finger means to belittle him with respect to those present. Thus one casts a spell (*korti*) against an enemy or an undesirable person with the little finger.

826
622 The index finger and the thumb of a chief, formerly those of a king, are marked on certain occasions with signs called *bolo ti doniya*, "knowledge of the signs of the hand." On the index are drawn three "acts of the world today" (*bi dyɛ̃ walew*) and on the thumb, two "things of the interior of the secret world" (*dyɛ̃ gundo kono fɛ̃w*), for it is said that "the knowledge of the signs of the hand /70/ is the road of the creation 5, the index is the world in 3 and the thumb is the new world" (1). The whole represents the worlds thought out by

826
622

1. Bolo ti doniya ye dali duru sira ye, bolokoni kumba dɛga ye dyɛ saba gundo ye, tyemasa bolokoni ye dyɛ dura ye.

yo, of which only the first is realized (2).

2. On the worlds thought out by yo, see pp. 23-26.

826
643 On another level, the signs of the thumb are related to powers and those of the index to royal domains (fig. 1, nos. 8-12):[2]

1. Sign zero (fu) represents the beginning of creation, the origin of all things. A curved segment extended from left to right denotes the dynamic quality of the universe. It is intersected by a multiplication sign expressing the infinite development of beings and things. But the vertical stroke crossing it on the left indicates both the cessation and the suppression of the whole (no. 11).

2. Sign of lightning. It expresses royal power and justice and is traced under the thumb ring of the king. The latter, when giving an order, would swing his hand, which means he is swinging lightning before those he addresses (no. 12).

3. Sign of the royal domain. The opening asserts the possible extension of the kingdom; the transversal bar is a protection of this kingdom from all destruction (no. 8).

4. Sign of the extension of this domain at the tree cardinal sides: east, west, and south (no. 9).

5. Sign of union. The oval represents the whole group of functionaries called tɔdyɔ and barodɛ, officers and councilors who administer the kingdom under the king's authority (no. 10).

826
[783] As the feet are constantly in touch with the soil, they take on its impurity. An individual who has gone through severe purifications will need to avoid putting his feet on the ground during a period of time occasionally quite prolonged, for "to place one's toes on the ground is to put one's soul in contact with the impure earth" (1). It

[291] 1. The invention of the shoe is mythically linked to the notion of the earth's impurity; the wearer must therefore avoid this contact.

[2] [p.22, category 116—Analyst.]

826 is also through the feet that a part of man's strength is deposited in the sweepings and rubbish upon which he treads. Their role as receptacles appears in the rituals concerning household refuse and the dirt on roads and paths.

Like the little finger, the small toe symbolizes the whole person. [301] It is sometimes adorned with a silver ring, symbol of the word, which recalls that man's body is the seat of the word extended within him from head to feet (1).

1. In olden times the ring on the small toe was made of red nyama fiber (nyama fu), which played the same role as metal.

831 826 The notion of the bisexuality of human beings is fundamental: the spiritual principles are sexed like the body, whose ambivalence /71/ is evident during childhood: the boy is feminine in his foreskin; the girl is masculine in her clitoris. One of the aims of circumcision [304] and excision is to help the child attain the sex to which it is apparently destined by removing the organ of the opposite sex. (2). But the initial duality of the soul and body is the very foundation of the human being. He is complete only if he originally received it, and he retains it even after the operation imposed by physical and social life, [774] for the soul of the opposite sex, though diminished in the body, remains present in the shadow, the dya. He also rediscovers his dual unity when he marries. A married couple are a unit for their dya [581] join as do their bodies in an act which is not merely physical and which realizes the ideal union of twins.

831 801 The sex to which one belongs dominates one's whole existence on earth. Objects and tools bear masculine or feminine marks, according to the rules of the division of labor. The numbers three (man) and four (woman) are abridged forms of the sex. "Primitive men" who, according to the Bambara expressed themselves mostly by gestures and signs, engraved their rare objects with the number of

---

[171] 2. The same conception is found among the Dogon; see M. Griaule, Dieu d'eau, p. 185.

831 lines or dots depending upon the sex of those who used them. Thus,
801 women marked their spindles with four lines whereas men twisted three
threads on their shuttles.

On the metaphysical level, man's body, "the seed of the world,"
826 is identified with the cereal grain. The Bambara separate cereal
824 grains into seven parts, corresponding to a division of the human
812 organs into seven groups (1). Man and grain are one and identical in
their substance. On the other hand, the basic foods, that is, the
eight principal cereals, are symbolically present in the collarbones
(kolo kalanjiri, or ka kolo). Man carries within him his subsistance,
and its location reflects the person's general condition (2). As proof
[783]
of /72/ man's spiritual integrity, these grains leave him when he is in a state of impurity. He is then drained of his substance and subsistence. Thepurpose of purification is to reestablish this wholeness.

812 Moreover, the bonds which unite the whole person, body and
561 spiritual principles, to the cosmos, are made clear by the fact that

---

1. The divisions of the grain are as follows: kungu, "little beard of millet," involucre; fara dye, "white bark," glume and glumales; fara fi, "black bark," bran and protein aceous bark; fara mugu, "farinaceous bark" (which corresponds to a milky diastatic zone); mugu dunta, "flour for eating," starch; kolo dye, "white bone," embryo; kise de, "son of grain," the micropyle from which the rootlet issues at the time of germination. The classification of organs in relation to these divisions is under study. We thank M. Pitot of the Institut Français d'Afrique Noire for the identification of the parts of the grain corresponding to the native divisions. In certain villages, grains
[782] undergo a process of hulling and the determined elements only are used in the making up of the ritually offered millet mash.

2. See p. 53, n. 2.

812 561 man's life passes through seven successive ages corresponding to the seven skies, the seven earths, the seven waters, and the seven stages of millet growth. The seven ages are: bilakoro, "an uncircumcised person"; kemẽkoro "a circumcised person of the last age grade"; tyebalẽ, literally, a big man; maselẽ, literally, a successful person; makoroba, literally, an elderly person; madeselẽ, literally, a person who cannot succeed, an old man; mabalẽ, an impotent old man.

812 561 796 These bonds are also confirmed annually for everybody in the course of the ritual called "the renewal of the year." By renewing the cardinal points, the Bambara add to the strength of these poles of attraction which are responsible for maintaining things within themselves and with respect to each other. At the same time they proceed to a "revival of the body and soul," including all from the youngest to the oldest. For the year to come, they take a fresh breath, a new life, and submit the body to internal and external purifications, making it adequate to fulfill its role.

Effects of Death on the Person

761 The first effect of death is to dissociate the elements that make up the person. The religious practices, imbued with respect for these elements, aim at organizing their preservation in order that they may not be lost to the deceased, to society, and finally, to Faro who controls life and assures the survival of souls.

The dya remains in the water where it will be kept until the birth of a child. But the ni, which escapes from the body with the last breath, is watched for by the head of the family who catches it and carries it to an altar. As we have seen above, it will return to animate the dya of the child who will inherit the deceased's spiritual principles, leaving behind it on the altar, a kind of exuvia, mana or folo, as a sign of the deceased's sojourn on earth.

The tere becomes transformed at death; liberated from the body, it becomes nyama which escapes and which may sometimes attack the living. Proof of this is the fear aroused by the sight of a corpse. /73/ It would seem that the tere's combination of strength and character is expressed by the activity of the nyama; but it is really dangerous only in the case of violent death (the murder of a man or an animal). In this case the nyama attacks the responsible party. If death is natural, the nyama, like the ni, is directed by the relatives and placed on the family altar (pembele) in the course of the

761 funeral rites. There it joins the ancestral forces, the aggregate of
which forms a whole whose power is used by the descendants during
the seasonal rituals for beneficial purposes.

The body is buried; it "belongs to the termites" and in the end only
764 the bones will remain and be honored as a testimony of the physical
761 life. Sometimes they are removed from the tomb, examined, and
prayed to before being replaced.

761 When a birth occurs in the family the newborn child, having in-
herited the *ni* and the *dya* of the deceased, receives his *nyama* pre-
844 served in the *pembele* and his given name, *toko*; thus one being replaces
another, using the same forces which are used over again and again.
Life transmits itself intact. Not only is it undiminished by death, but
the *dya*'s sojourn in Faro's residence is thought to be a "reviving," a
desirable and beneficial purification. Similarly, the passing of the
ni onto the family altars brings about a rejuvenation.

761 On the altars and in the tombs, the "exuviae and bones counted
and classified by Faro," are a valid testimony for eternity and serve
to maintain the integrity of the whole world of living and dead until
the final resurrection.

Attributes of the Person

The Name

551 The organization of the total family /famille indivise/ of the Bambara has already been the object of descriptive works (1). It is however, appropriate to mention it since certain elements such as family names, devices, taboos, and kinship relationships described as "joking" are related to the components of the person.

Socially, the person is first placed by his given name, *toko*, that of the ancestor who gave him his *ni* and his *dya*, or any other in the paternal or maternal line. The given name indicates the relation to a family group as well as /74/ the person's individuality. It is accompanied by the father's family name (*dyamu*), whose origin and

---

1. In particular Ch. Monteil, *Les Empires du Mali*; H. Labouret, *Les Manding et leur langue* /The Malinke and their Language/.

55/ etymology are often associated with an historical event (1). The most

1. On the historical aspects of the *dyamu*, see P. Humblot, *Du nom propre et des appellations chez les Malinké*; M. Delafosse, *Des soi-disant clans totémiques de l'Afrique occidentale* /The So-called Totemic Clans of West Africa/, Ch. Monteil, *Les Empires du Mali*.

familiar names are derived from those of the mythical families (2).

[73] 2. The Bambara myth mentions family names that were determined by Faro when he classified beings and things. It is still generally said of this event: "When Faro travelled, he broke the support for Mousso Koroni, and an agreement as to names was made by him" (*faro tama na muso koroni ǰigi kari la, dyama dyamu ko la dili kera faro fẹ*).

On the other hand it must be noted that a *dyamu*, which applies to a great number of total families living in various regions, is not always reserved for the Bambara groups only. The *dyamu* Kouloubali, for example, also belongs to certain Somono and some blacksmiths. This means that a *dyamu* is not only attributed to a family in its broadest meaning, but also to people apparently unrelated to it. Another typical fact makes it impossible for us to give the term "family" the meaning it has in our societies: a person changes his name when he leaves his country. A Dogon becomes Keyta when he goes to live in Mandé. A Bambara Traoré, if he goes to the land of the Wolof, becomes a Diop (3). Finally, an important family may

3. An investigation of this very important aspect of Sudanese social organization remains to be made.

have several names and devices.

551 Bearing a name confers on the bearer the obligation of respecting a taboo (tne or tana). He may neither kill nor, more especially, eat the animal or the plant that represents his name; any infraction of this rule affects his physical and spiritual integrity.

551 602 On the other hand, relationships commonly known as "joking relationships" are established between families respecting different taboos and bearing different names. One of the characteristic aspects of this kind of alliance is the fact that members of one family are in the habit of carrying out purification rites for members of the other in case a taboo is broken.

551 173 Stories relating the origin of family names are well known and there are several versions that have been published for the principal families (1). Some of these bring out not only the history of the head of the family, the first-named, but at the same time the origin of the taboo /75/ attached to the name or the origin of the kinship ties observed by the bearers of the name with members of another family.

In this respect, one of the versions concerning the Kouloubali is most suggestive:

"The Kouloubali are descended from a family called kuludyu which lived in an underground village in a place called kuluba (literally, big mountain) in Mandé. A famine which lasted for fifty-two years hit the region; the people did not know what to do and ate the leaves of trees in order to survive.

Two friends, called Konyo (literally, marriage) and Mbadun (literally, I eat), left their homes and set out on a trip to find food. They met three men and decided to join forces with them in order to escape this painful situation. Upon returning to the village, the newcomers, noticing the excrement of a hyena, joked about its white color: "You have only been eating bones, " they said. "But no, " laughingly answered the other two, " it is hyena excrement. " And they asked their new friends their names, adding that they themselves had none. Then together, they tried to make a fire. One night they noticed a flame apparently coming out of the branches of a kapok tree. The tree grew near a rock and the wind, by making

---

1. See among others L. Tauxier. La Religion bambara, pp. 119ff.

551/ its branch rub against the stone, caused sparks which ignited the kapok.
173 They then rubbed two pieces of wood against each other and managed to light a fire which they kept burning for six months. They jealously guarded their secret; men, some of whom still knew nothing of fire and who were in the habit of drying their meat in the sun, came to ask them for burning coals and gave them millet, salt, and domestic animals in exchange. They also gave them their daughters in marriage. One of the men, who belonged to the Diara family, asked them their family names. They answered that they had none. "What does that matter?" he replied. "You will live on a great mountain and take the name of Kouloubali." They then asked the name of their ally (senãnku). "We have none," said the new men, "but since this famine we have been living with friends."

They then decided to celebrate the marriage of Konyo with Diara's daughter and a new alliance (senãnkuya) was arranged between the two families. Later on, other members of the Diara family came to live with them, and a prosperous village grew up where the Kouloubali lived.

As their numbers had grown, the men decided to go to war to gain other arable lands. They vanquished the Toucouleurs /Tokulor/ of the Ségou region and ended up by taking the town, which they entered as conquerors.

One of the phrases of their device: kulubali kulu dyã tasuma /76/ "Kouloubali of the fire of the great mountain" is a reminder of both their geographical origin and their fortune.

The Device

551/ A device, barama, is generally attached to a name and, when pronounced, has the same kind of effective communication (1). Its

1. We refer the reader to the work of Mme. Solange de Ganay, Les Devises des Dogon, in which this important institution has been studied at length and commented upon. The characteristics of Bambara devices are similar. Without taking up the whole problem, it is appropriate here to define the effect of these devices on the person according to the Bambara concept.

551 course within the individual who hears it, its effect on him, and the return effect on the individual reciting it are all developed according to a known mechanism.

The barama, a word which may be translated as "encouragement," "compliment," or "flattery," is a narrative, usually in poetic form, relating the origin of the name and the exploits of the ancestors (1).

[576] 1. The device, in its entirety, is generally known only to the griot, but certain parts of it, certain traditional phrases known to all, are used as a greeting to its owner.

551
539 Thus one of the elements of the Diara device bears witness to the role of their ancestors:

"Diara, Zan of Nyaola, Yayiri of Nyaola, your grandfather curved the world like a sickle, straightened it out like a straight road; grandson of God on earth, Diara!" (2)

2. Dyara, nyaola za, nyaola yayiri, i moke ye ka dye kuru i ko woloso ka foni i ko sira tike nin dye; duguma ngala modẽ, dyara. Nyaola is a village. The name of Zan is always given to the eldest son in a family. The word dyara also means lion.

Another element exalts their courage in battle:

"Diara, Koné: if there is not a Koné among the warriors who will fight, the troop will be beaten (in advance). The lion has broken a great bone" (3).

3. Dyara, kone, kone če kele te kele min oye fele ye; dyara ye kolo ba kari. Koné is another of the Diara's dyamu; fele describes a group of men gathered together for the hunt or for war.

The Tangara device also recalls their history and their victories:

"Descendants of Falé, Kwonda, Méné: other brave men purchased their right to sit in the village; we, brave men, won it with our bow and arrows" (4).

551 4. Fale kwonda mene šiw, tow bomaw ye
539 dugu sã ka sigi, aw bemaw ya soro ni to ani
kala. Falé, Kwonda, and Méné are the names
of ancestors. The device is that of the Tangara
of the village of Barbé.

551 Moreover, the device also carries a statement of the bearer's
576 genealogy, burudyu (1). To say this genealogy is equivalent to
778 "attacking the /77/ ancestors." To speak of them, to quote them, and to tell their exploits honors them and pacifies them. In the course of the recitation "the air emitted by the speaker" is transformed by the power of the spirit, Teliko, into coolness which penetrates the ancestors (2). The same is true for supernatural powers. As soon as the Komo chief recites Faro's burudyu, "the air coming out of the chief's mouth is transformed into good nyama which penetrates Faro's body through his pupils and ears."

To tell a man his burudyu is to honor him greatly. He thinks of his ancestors, their fortune, and their glory; he is proud to be descended from them and is incited to do as well or better than they. The effect of the "good word" described above is due to the indirect but powerful action of the ancestors (3). The recitation by a third party has the effect of maintaining the individual in his being, of making him persevere by affirming it (4), for the device appeals to

1. The word ši, meaning race, is used to indicate the burudyu, which is comparable to the dambe of the Peul of Mopti.

2. Teliko ba sumaya se u ma. "Téliko makes coolness come to them."

3. However the soul (ni) of the cited ancestors is neither called upon nor displaced by the recitation. It is the vital force, nyama, which is put into motion here.

its possessor's soul, *ni*. If, at this moment, the person flattered is in a normal state, his device causes his "soul to swell and his body to harden, inciting him to courageous action and joy." If the contrary is true, anger or emotion takes the place of contentment and calmness.

The reciter receives in return the strength of the beneficial word which, having contented the person it was addressed to, contents him also. There is an exchange of *nyama*: that which the reciter sends out and that which he receives in return and from which he benefits.

551
576
778
564
That is why the recitation of the device is not always left to the individual's discretion. Because of its importance, it has become a public function generally reserved for the *griot* (*dyeliw*) who form a caste practicing endogamy and who earn their living by getting paid to recite the devices and adulations in daily life as well as during public or religious ceremonies (1). But the fact that they earn a salary for this service affects their dignity: nobody else ever recites the devices because nobody wishes to be taken for a *griot*, and nobody ever marries him. The *griot* is at once indispensable, feared, and despised. The mechanism of forces put into motion by his action makes it possible to understand the ambivalence of feelings of which he is the object.

/78/ When the words come out of his mouth, the *griot*'s *tere* is transformed into *nyama*, which becomes filled with a force called *kuma nyamu*, "*nyama* of words." This force goes from the head to the mouth of the speaker and reaches the person addressed. If a man is wealthy and powerful, it is said that he gets the "*nyama* from the mouth of those *griot* who flatter him." He is then forced to pay them for their encouragement. If he does not, they remain silent when

551
576
778
4. This effect is already obtained by the simple repetition of the family name with which one greets a man upon meeting him. It is common to hear the Blacks greet each other by repeating their *dyamu* to each other several times.

1. The recitation given by anyone other than the *griot* would be far from producing the same effect.

551 576 778 564 passing before his door and thus empty him of his *nyama*. The man grows thin and poor. The *griot* may bring about his death with evil words, their *nyama* attacking the heart, the chest, then the entire body of the victim.

The *griot*'s power over the person he flatters becomes more involved and varies according to what he is reciting. If he recites the *burudyu* several times, if he speaks at length of the ancestors, their *nyama* enters his mouth and is added to his own, thus reinforcing the power of the word. Thus, when the *griot* recites a *barama* without receiving payment, his *nyama* attacks the person spoken to. If this offense is repeated and if the *burudyu* is recited, the man is forced to pay if he does not wish to be attacked by the much more formidable *nyama* of the ancestors.

In these various situations, the *tere* of the person flattered intervenes: if it is good, it fights to defend the person, but if it is weak or wicked, it joins the ancestral forces and the person is doubly threatened.

The recitation is always made by the *griot* before a witness so that his action will be more binding and make the miser lose face. On the other hand, a man who pays the *griot* generously is looked after by the latter who sings of his generosity on all occasions and announces the sum he has received; often he does not hesitate to exaggerate the total amount received if he can hope to profit by doing so (1).

[784] 1. If the *griot* knows that the wealthy man he is addressing is miserly, he rubs his teeth with roots which he knows has the power to make his words even more effective.

[554] Sometimes a man reaches a secret agreement with the *griot* in order to gain prestige. He publicly gives him a considerable sum, part of which the *griot* returns the following day as agreed upon. The gift is so generous that none can surpass it.

[585 561] This practice is particularly apparent at the time of marriage. The men of the same age grade as the groom outdo each other in their gifts to the *griot*. The one who has given most passes for the most generous. Sometimes the *griot* invents a new *barama* on the spot even though he does not know the device.

551 576 778 564 The device is recited on numerous occasions. After a birth, the *griot* proclaim it in the course of the name-giving ceremony, addressing themselves to the father, then to the newborn child /79/ who thus receives it for the first time. At a marriage the *barama* of the two partners are alternatly recited. In everyday life, the recitation is carried on most frequently during religious ceremonies or feasts. In the hunt or at war, it has the effect of helping the participants and increasing their courage (1). In a meeting it is used to greet people bearing the same name, and if one of the assistants is to be particularly honored, the first words of his device are recited.

551 755 In case of illness, the ally (*senãnku*) (2) comes to the patient's side and recites his *barama* to encourage him and help him get well. If he is dying, the recitation, which is then the equivalent of a prayer, may help his soul return. After death, the ally, the *griot*, and the [764] blacksmiths come near the corpse to recite his *barama* in order to honor him.

551 576 539 The devices pertaining to the various crafts are used when addressing the artisan with whom one has business. Thus the blacksmith to whom one brings work is greeted first by his name to which is then added:

"*ini fara ani goni*, you are with stone and fire."

A person crossing a field will say to the farmer bent over the earth: "*i ni tye i ba ka kusebe daba*, greeting to him who handles the hoe well," or simply: "*i ni tye daba la*, greeting to him who is with the hoe." To the shoemaker one would say: "*bana ani ba golo*, (you are) with the acacia (3) and the goat leather."

[527] 1. If the *griot* recites it to a war chief and the town under attack is taken, he receives part of the loot.

2. See p. 119.

[386] 3. This refers to the *bana* or *boina* (*Acacia arabica*) used by the shoemaker to make a black dye.

551 The institution of the device, with all its elaborations, has the
576 effect of confirming people in their bodies, their spiritual principles, and their social functions. Except for the cases of emigration mentioned above, the occasions are rare indeed when an individual is obliged to change his name or device during his life. A woman keeps her father's barama even after marriage.

551 An illegitimate child receives neither the name nor the device of
his family. They may be given him later if the father makes himself
848 known. A Bambara who contracts a misalliance, for example, by
564 marrying the daughter of a blacksmith or a griot, will bring into the
783 world impure children who will never have a right to their father's barama (1).

552 We must add that the prerogative of having a device is not limited
782 to humans. All animate beings, many /80/ inanimate ones, the elements of nature, places, villages, plants, animals, and all the supernatural powers have theirs which men address during prayers.

The Taboo

784 One or several eating taboos, tne or tána, are attached to the
[551] family name and are observed by all who bear the name. According to certain initiates, the taboos were decreed by Faro when he determined the food proper to each species (2) after having classified the beings of creation. For the common man, the origin of the taboo is always the subject of a tale or legend and justifies the bonds between an ancestor of the family and the animal or plant designated. Most frequently, the animal has helped the man, has saved his life, or the other way around; or else, following some serious events, the ancestor was transformed into an animal or plant. Numerous versions of the origins of such bonds are given.

---

1. Such a child is said to be a sofali (literally, horse donkey), that is, a bastard.

2. See p. 52.

784 It has not been possible heretofore to consider all aspects of the various taboos. On the other hand, the great number of versions concerning their origin indicates that the current story, told to all who pass by, conceals much deep notions of the categories that indicate the bonds linking men to animals and plants (1). It would also be appropriate to study the relations between the species, between animals and plants and minerals in terms of the spiritual forces that animate them.

Whatever it may be, the taboo confers on man his title of nobility; not to possess one is degrading. It assures the protection of the group that observes it. Thus, the hyenas of Konodimini protect the village inhabitants who feed them.

Examples of taboo:

784
773
The Traoré family has crocodile flesh as its taboo. An ancestor called Makyon, having transformed himself into a crocodile, fed his family during a famine that lasted six years; he fished and brought the catch to the members of his family.

In the seventh year, since the famine still raged, the Traoré decided to kill him for food. In the morning, when he appeared with the fish he had caught, an old man advanced to attack him. /81/ The animal stopped him and predicted he would die if he pursued his plan. The man paid no attention and wounded the beast which had enough strength left, however, to return to the river. The old man regretted his act and the others tried to disassociate themselves from the responsibility. The following morning the crocodile came out of the river and died at their feet so that they might see what they had done. The guilty man was in turn killed by his family and the two corpses were buried together in the same shroud. When all was over, the chief revealed that Maydon /sic/ was a member of the family, that as a member of the same race he had been feeding his kin

---

1. See also L. Tauxier. La Religion bambara (Théorie des Ntana et des tabous /Theory of the Ntana and Taboos/), pp. 114-138.

784 during the famine, and that in the future the crocodile would be taboo
773 to the Traoré as a sign of gratitude for his gift and as an apology for
the murder committed.

The taboo of the Diara family is the lion, whose name they bear. In the olden days two old friends were always in the habit of hunting together with arrows and spears. In the course of a long famine, their weapons broke and they were not able to find others. In order to feed their families, they attacked wild animals with bare hands; the one would stun his victims with his fists, and the other would skin them.

Gradually the life they were leading changed their behavior. They no longer washed, their hair and beards grew, and thick hair covered their body. Their nails became so long and so hard that they used them to slice meat and to dig the earth. They even forgot the language they had spoken and only communicated by grunts.

They fought with the spirits to gain a foothold in those places ordinarily reserved for the latter. They no longer returned to their village. Their parents searched for them, but as soon as they saw people, they ran away. They ended by walking on all fours and appeared like the animals they pursued.

One day as they lay sleeping next to each other, they mated and the stronger one impregnated the weaker to give birth, a little later, to two lion cubs. The men who saw them in the bush with their offspring decided that hereafter they could not kill a lion for it had their blood in its veins. Even today, when a Diara meets a lion, the animal lies down, "so ashamed to be descended from the mating of two men who had become beasts."

184 These two examples, selected from many others, illustrate the relations between man and animal. These appear even more clearly in the mechanism set off by the breaking of the adopted taboo.

Indeed, the first consequence of any infraction is the offender's loss of the seeds in his collarbone, a symbol of his basic sustenance. He becomes "an empty granary" and, deprived of his strength, is unable to contend against that of the wounded animal /82/ attacking him. The pain he feels at that moment is proof of the state of his physical and psychic inferiority. Any breaking of a taboo affects first the eyes, then the other openings of the body.

784 If the animal is wounded, it delegates its *tere* to warn the guilty
783 man of the sin committed, but makes no attempt on his life since
it is his ally. On the other hand, its death liberates its *nyama* which

784 783 acts more energetically. But it is even more serious to eat one's taboo than to ill it, for then the person cannot get rid of his victim's nyâma and must suffer all the consequences.

The guilty person goes to the shore of the Niger and in a loud voice, discloses the facts to Faro while making him an offering (millet mash, copper, etc.), then he drinks a little water and goes home. If he lives too far from the river, he goes to a remote place and acts in the same way by spilling a little of his own blood as a sign of expiation. These acts have the effect of rectifying everything with Faro whom he has offended by breaking the established order. Next, he undergoes the purification rites. Their agent is his ally senānku and the rites are carried out at an intersection, dangu (1). The effect of such rites is to rid him of his victim's nyama, and then to reinstate the symbol of the eight life-giving cereal seeds in his collarbone: thus he recovers his lost strength. After his recovery, the old men of his family summon him and give him some stern advice for another breaking of the taboo cannot be atoned by any purification: the animal's nyama will no no longer leave the repeating offender who may die of it.

784 Voluntary infractions, which are very rare, of course bring about far more serious consequences for the person in question since his responsibility is involved. This is not so in the opposite case. If a man has eaten his taboo without knowing it during a meal taken at the home of another, the animal's nyama may attack those responsible: either the host or his wife becomes ill. The guilty woman must then [201] ask the man's forgiveness. On her knee and with her hands at the back, she discloses the facts to the person she has injured who may ask for time to think and make her wait in order to punish her. Otherwise he demands three kola nuts with which he carried out the dyanzani or "replacement." He throws them in the bush or gives them to the first poor person he meets. A few days later the responsible person is liberated.

---

[602] 1. See p. 183. In certain cases the purification may be carried out by a kinsman of an ascending generation and may include ablutions with water consecrated by a prayer addressed to Faro.

/83/ Joking Relationship

602 608 A very important institution is also linked to the family name. It concerns the ties called "joking relationship," dyo benatye (literally, agreement between us), which is integrated with the general kinship relationships designated in the Mandingo country by the term señankuya. But family relationships in the strict sense, called sindyi benatye (literally, breast milk between us), are to be distinguished from dyo benatye which, on the contrary, involves the members of two families, or even of two different peoples.

Thus, a Koulibali is a Kéita's señanku among the Bambara; Bozo and Dogon as well as Bozo and Somono are also señanku (1). To the

[1] Joking relationship called señankuya among the Bambara is termed mägu among the Dogon, dagana among the Bozo, etc. This important institution, which embraces all the tribes of the French Sudan, has already been the object of a number of studies. See especially M. Delafosse, Haut-Sénégal Niger /The Upper Senegal and Niger/, Vol. 3, p. 206; H. Labouret, "La Parenté à plaisanteries en Afrique occidentale /Joking Relationship in West Africa/"; D. Paulme, Parenté à plaisanteries et alliance par le sang en Afrique occidentale /Joking Relationship and Blood Alliance in West Africa/; R. Radcliffe-Brown, On Joking Relationships.

In the "Alliance cathartique /The Cathartic Alliance/," M. Griaule throws light on the Dogon-Bozo relations which are at the origin of the institution in the Sudan. This brings out the fundamental notion of the duality of beings and the principles that animate them. A Dogon and a Bozo are twins, each carrying a particle of the other in his body and soul. When he insults or purifies, he appeals to that part of himself in the other and the powers he communicates in this way come to the help of his partner.

602
608

The latest investigations on this subject have brought to light the following facts: Dogon and Bozo have, respectively, eight seeds and eight fish in their collarbones and thus they realize the distribution of the heavenly sustenance (see p. 53). This latter is evidence of their spiritual integrity and any breaking of taboos results first in depriving the person of his seeds or his fish. The purpose of the institution is to enable the ally to intervene in order to reinstate the nourishing substance in the body of the guilty person.

It should be stated here that in instances in which they are described by the same term (senãnkuya), kin relationships, which also involve joking exchanges, must not be confused with relationships between families (more exactly between names) or between tribes.

Moreover, within this last group, several types of alliances can be observed: some involve exogamy (Dogon and Bozo; Bozo and Peul, etc...); others exclude the possibility of carrying out purification rites. It will therefore be necessary to examine as many cases as possible before establishing any rules for this type of alliance.

Mandé, a Koulibali and a Tangara, bound by a long and durable friendship, decided to seal it in a lasting way. They opened their veins and put a little blood from one wound into the other, thus realizing the alliance through this exchange. They next prepared a meal which they ate /84/ together while pronouncing their oaths never to spill each other's blood.

In this way the dyo benatye (1) was consecrated between them and

1. Because of this alliance, members of the Kouloubali family were authorized by the Tangara of the village of Barbé (region of Mopti) to settle in the village. The

602
608 Tangara chief gave them land to build their houses and set up their fields. The two groups live in perfect understanding.

their descendants. Such an alliance is equivalent to kinship. It involves the absolute obligation never to covet the life or possessions of the *senãnku*. The two parties are obligated to mutual assistance in many cases: food, housing, material aid; help in case of war or lawsuit; obligatory presence at religious ceremonies; purifications in case a taboo is broken.

These rules imply that the alliance affects the individual not only in his social roles, but also in his spiritual principles. The *senãnku* is a kind of twin to each individual belonging to the other family. He has within himself a part of his partner and vice versa.

602 Because of this fact, the reactions set off by insult or by joking are singular: the *senãnku* will accept from the mouth of the other, without becoming angry, mockery which he would not normally tolerate. He cannot be affected by them since the words are addressed to that part of his being which comes from the person insulting him. Moreover, the joke or the insult, without touching his spiritual integrity, has the effect of confirming him in his position relative to the person addressing him and of affirming the state of both parties, thereby increasing their vitality. It determines movements of forces from which the two speakers reciprocally benefit, as from a kind word.

This proceeding is used on numerous occasions, particularly at the time a person achieves a new social status or a new grade. The *senãnku* jokes with a newborn child as soon as his name is given and, later, on the day he wears his first piece of clothing. The circumcised boys become allies and joke between themselves the day of the *daworo* which consecrates the age grade (1). On the evening of marriage, the young woman is the object of ritual sarcasm which marks her final introduction into the husband's family group.

602
783 The *senãnku* is the only one who, in certain cases, is able to carry out the purification rites made necessary by a broken taboo (*tne*). It is true that he carries in his collarbone—but only /85/ where his partner is concerned—twice the number of symbolic seeds,

---

1. See p. 241.

602 783 that is, sixteen. This fact qualifies him, by his gesture of purification and through his essential role as provider of sustenance, to restore the seeds that had left the guilty man's collarbone. If the offense is slight, the offender gives him millet, money, or an object. The wounded animal's nyama settles on the object, and the senãnku who receives it rids him of it without being affected himself. If the offense is more serious, the two allies go off together to a road intersection, dangu; then the senãnku takes a straw torch in the shape of a cross and circles the guilty man's head with it from left to right. The being who has been offended by the broken taboo can refuse nothing when confronted with this procedure. He removes the nyama he had inflicted and the man, powerfully aided by the forces of the purifying agent, recovers those he had lost, as symbolized by the seeds in his collarbone.

This cathartic role of reinstating subsistence forces into the human body is illustrated in daily life by the food prestations to which the partners are held. This is like the secular and materialistic representation of an invisible operation of purification.

The Person: Exceptional Cases

000 Certain physical peculiarities constitute the manifest evidence of a modification of the elements making up the person. It is appropriate here to examine the cases of individuals who are thus affected.

Twins

845 Twins, flani (literally, two little ones), are two new beings given to men by Faro and considered as his offspring alone. Because of this fact, twins inherit neither the ni nor the dya of a dead person, but they inherit new principles which come to them from the spirit. Moreover, their dya never leaves the water for the shadow, but remains in the hands of the spirit throughout their entire life. Because of this they are protected from all danger and from all impurity.

Such a birth is considered a blessing and is granted only to certain
privileged people called kunandi. It is announced by holding up the
[201] right and left forefingers without uttering a word, for its announcement would be so powerful that it would harm the newborn. Their mother wraps a white cotton band called dyala about her forehead to indicate the presence of the children's dya /86/ in Faro's hands.

845 [431] Everyone visits the parents' home and takes to them what gifts one can give for to give to twins is equivalent to giving to Faro.

845 553 851 The name-giving ceremony is carried out on the river bank if the village is situated close to the Niger, or otherwise on the edge of a pond. The children are brought by their parents who, between them, represent the number seven. They are bathed, their hair shaved off and thrown into the river, while the father says: "Mother Faro, your sons are born, here is their hair." (1) He then gives the cotton band,

1. *Ba faro i wolo dew kunsi ye nin ye.*

dyala, which was worn by the mother to the officiant who encircles the child's forehead with it while saying: "These two people are older than I am; let the nyama of the name which is to be given them leave with the *dyala*." (2) Then he gives them a special name. (3)

2. *Nin ma fla ka koro u ma, u čua dali nyama ka ta fini disa few dyala fę.*

[177] 3. Séni and Sinè for boys; Bintou and Wasa for girls. Among the Islamized Bambara this custom is also respected; the names given are always Alasan and Fouséni. This is most likely a distortion of the Arab names given to twins in Morocco.

845 851 The next day, carrying one of the children and accompanied by a woman in charge of the other, the mother goes begging for millet or cotton in the village. She holds two identical spoon gourds in her hands. The gifts, equal in weight and quality, symbolize the twins; they are placed on the spoons. Then crossing her hands, the woman pours them into the basket in which she carries the gifts (4).

4. All the symbolism of gifts made to twins, like that of the double pot (see below), confirms observations made in the Sudan on the relationships between gifts and trade. On this subject, see M. Griaule, *Dieu d'eau*, pp. 234 ff. It is interesting to note here that

845 each twin is the *dya* of the other and that
851 this term means "shadow of the body," "spiritual double," as well as "balance." To trade is *dyago*.

845 Three or four days after the name-giving ceremony, depending on
301 their sex, the twins are given bracelets of white metal representing
[531] their *dya*. Geometrical symbols of the universe, the sky and the earth, are engraved on each of these (1). The opening of the bracelet represents that of the incomplete terrestrial world. When the twins die
[766] they will be buried with the bracelets closed over their arms or their ankles to signify that they have penetrated a complete and closed world. Formerly the sacrifices to Faro were carried out with ornaments
845 borrowed from a twin. The person making the sacrifice presented
301 them to the /87/ river while saying: "The iron of the twins is witness
782 to the sacrifice offered to Faro." (2) After the ceremony, everyone gave white kola nuts to the twin; the interested party then went to the village square and waved in the air his arms bedecked with ornaments to spread to the four cardinal points Faro's beneficial *nyama* acquired in the course of the sacrifice. In certain areas twins wear a pendant in the shape of double slave fetters, called *dyõ neke*, "irons of the captive," or an amulet called *sinzin*, "support," composed of a little piece of wood carved in the shape of a double cup and preferably made by a Bozo. A man who has had twins three times
[778] must acquire a double pot which is always kept full of water and which becomes the object of an annual sacrifice (3).

---

1. This figure is formed by a rectangle divided into two equal superposed squares, including a multiplication sign in the lower square to represent the earth, and an open v in the upper square to represent the sky.

2. *Flani neke ye ma šere ye faro sõni la.*

3. See p. 124, n. 1.

845 Up to the time they are twelve, the children bathe themselves preferably in the Niger. They supposedly can walk on water and never run the risk of drowning.

The twins do not become separated from each other any more than
the *dya* is separated from the living being to which it is attached.
They wear the same clothes and eat the same food simultaneously.
Formerly male twins married the same woman. If one of them dies
845 at an early age, the blacksmith carves a small wooden doll called
778 *flanitokele*, which takes the name of the deceased and which the
mother puts on the mat next to the living child. The latter takes this
doll with him at the time of his circumcision and keeps it during the
period of his seclusion in order to bring it back to the parental home
whence it is never removed. When he marries, he sticks the doll
into the earth along with another piece of wood symbolizing the wife
of the deceased. Since twins are in a sense a living replica of Faro,
none can bother them without showing disrespect to him. On the other
hand, they are the object of attention and precaution on the part of
their family as well as their neighbors. Their presence is always
beneficial. Considered invulnerable, twins used to march ahead of
[728] troups in times of war and would serve as inviolable intermediaries
between the warring parties during truce.

The Hermaphrodite

826 The hermaphrodite, being both male and female, is to all extent and purpose his own twin. Consequently, he has no *dya* (1).

[825
304] 1. The hyena is considered a hermaphrodite; it can engender or conceive, depending on its size and strength: "the stronger impregnating the weaker." A tattooing system is based upon this belief.

/88/ The Albino

[143] Albinos of light or reddish skin and red hair are called *gombele* or *yepege*, this latter term being reserved for those who show the most accentuated characteristics.

826 The albino is supposedly born of sexual relations which took place
833 in the middle of the day when the sun is in the *koblenkaba*, sky of

826 Faro's wrath—a fact which constitutes a serious breaking of taboo.
[833] The consequence of this is to coalesce in the maternal womb the twins
originally granted to the woman by Faro and to decolorize the skin
of the being thus formed. Because of this fact, the albino, the
embodiment of twins, does not inherit the spiritual princples of a de-
ceased person and is also a new being given to men by Faro. But the
impurity he has acquired increases tenfold his tere and his wanzo,
which are so active that the circumciser must sacrifice on his own
[304] personal altars before performing the operation. From the ambivalence
of the albino, originally of the same essence as Faro but fallen be-
cause of the impurity transmitted by his parents, stem various customs
and representations. (1).

> 1. This ambivalence is also at the root of the belief that the albino is a being formerly provided with wings and able to fly (see p. 68, a quality he lost after his contact with the impure soil.

826 718 His body is believed to be endowed with special powers. The person who owns his skull will have a numerous family and prosperity; his hair brings wealth; the marrow of his bones provides gold and copper. If he is made to sit at a place where bones are buried, whatever one asks for is granted. His excrements, mixed with seed, have the effect of increasing the harvest for the year.

826 782 Because of the value attributed to the albino he is a choice victim for the sacrifices to Faro. His nyama is such that he can be sacrificed without prayer, the act itself constituting an efficacious invocation. Lacking living albinos, men often tried to appropriate the remains of a buried body.

/89/ Chapter 4

SACRIFICE AND THE ALTAR

782 To call upon spiritual forces and to influence them, the Bambara use prayer, offering, and sacrifice. They perform oral and manual

782 rites in all places at all times. They pray to the sky, to the cardinal points, and to the spirits; they sacrifice on rocks, on the earth, on trees, in water holes, as well as on altars sheltered in the sanctuaries, or located in private or public places. Every circumcised adult, father of a family, or owner of a house and arable land can be a sacrificer whose qualification is underscored by the red stain which sometimes adorns the walls of the main room of his house (1).

1. See pp. 171ff.

To the uninformed observer these rituals cover a great network of apparently unrelated beliefs. But actually it is otherwise. The rituals stimulate definite movements of forces which are integrated with those of the world.

Without trying to give a general picture of the manners, the times, and the places peculiar to Bambara rites, it is nevertheless important to study apart one of the most important mechanisms, namely the blood sacrifice. It constitutes the framework for the rituals and brings into play the principles and elements composing the living being (see preceding chapter), for it must be noted that the first sacrifices stated in the myth were human sacrifices.

A sacrifice takes place when the blood of the victim runs over a substance or an object containing the force of a supernatural power or of an ancestor. The words of the prayer pronounced during the immolation dedicate the victim to the power that comes to nourish itself on the blood according to popular belief. At the same time, they direct the life forces which escape from the body. The soul, ni, is channeled by the altar and will be kept there until resurrection. Its nyama, which gains in power as /90/ the agony is prolonged, is also retained by the altar whose strength it increases. The victim is thus completely emptied of its spiritual principles for "all the nyama are in the blood" (2) which it abandons.

2. Nyama be bi dyoli la.

782
826 In all cases, the sacrifice represents an exchange: the sacrificer receives in return a part of the strength of the one whom he supplants (3). The blood is the carrier of an active, dangerous element left on

the altar. At the time men gave the balanza their blood, they would let it dry and then, licking the trunk with their tongue, would reclaim it after it was rid of the element constituting the offering. All their active forces passed into the tree and a substance almost totally lacking in vitality was returned to them.

782 The blood sacrifices which were originally instituted on the trunk of the balanza are actually performed in the most varied sites: earth, trees, ponds, wells, etc. Moreover, as the Bambara developed their technology, they would sacrifice on those objects, utensils, or contrivances which they discovered or invented such as the forge and its tools, the loom, and agricultural implements.

782 The Bambara also have altars which may be classified into three categories:

778 1. The wood stumps called pembele, which represent Pemba. Many heads of families or of religious societies keep one of these (1).

A unique sanctuary at Massala is a pilgrimage center for Bambara from all regions who come in great numbers to take part in the annual sacrifice. Besides pembele, it contains two large pots, da, covered with sacrificial blood, which give the sanctuary its name. It is in this place that ordeals are executed, judicial questions settled, and serious illnesses treated.

2. The altars, made of stones crudely cut and occasionally engraved, have their origin in a mythical stone, issued out of the seventh part of the earth, and situated under the mound where Faro's female twins were born. Having a red color, it was itself a symbol of sacrifice. It divided itself and gave birth to all other sacrificial stones (Fig. 5 and Pl. V. b).

782
826
[171]
3. The mechanism of blood sacrifice among the Bambara is comparable to that observed among the Dogon and described by M. Griaule, "Remarques sur le mécanisme du sacrifice dogon (Soudan Français) /Remarks on the Mechanism of Dogon Sacrifice (French Sudan)/," Journal de la Société des Africanistes. Vol. 10, 1940, pp. 127 ff.

1. See p. 77 for a description of the pembele altars.

782 /91/ Actually the altars from the region of Ségou originate mostly
778 in Toko, a settlement situated to the south of the town where the king's
326 blacksmiths lived. The ancestor of these blacksmiths is buried in the
rocks which border Toko and from which the stones used as altar are

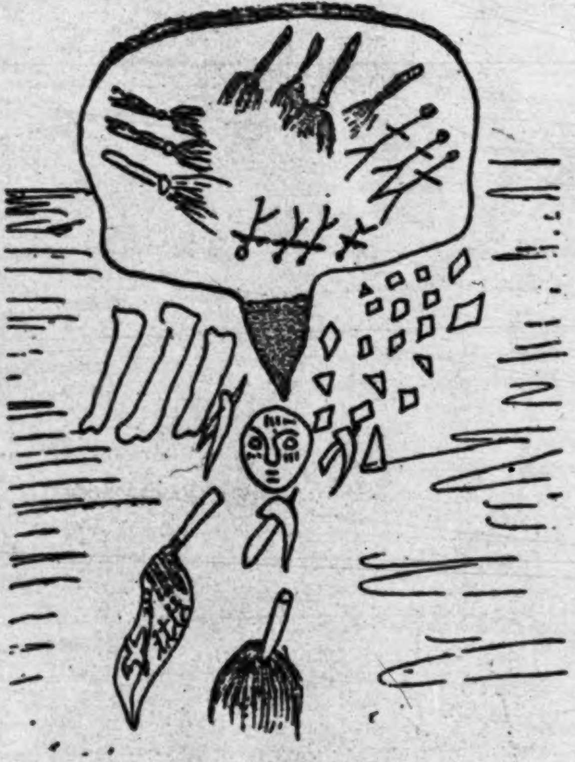

Fig. 5.—Stone altar, fara ba, of Banankoroni, consecrated to an-
[532 cestors. It is stuck into the ground above the skull and bones of
769] an albino, hoes, and a circumcision knife. The ritual drawing
traced during the ceremonies of the renewal of the year represents the torches and the whips of the Kworè, 3 men and 4 women, which recall the number 7, image of the creation (Informant's drawing).

carved. If a village chief wants to obtain one he sends a delegate to Toko. This emissary receives from the blacksmith the stone appropriate to the function of the altar and the quality of the person

782 requesting it. Thus, a black stone is given to those who have broken
778 a /92/ taboo, a stone of two colors to a stranger, and the red stone
[326] "rounded and polished by the ancestors" to those whom one wishes to honor.

The stone altars which are innumerable (both private and public ones) generally represent the ancestors. When they are placed in the fields they receive the sacrifices offered in their name for helping the crops. At the intersection of narrow roads and on the public square, they assure the stability of ancestral customs.

3. The Bambara also sacrifice on manufactured objects which bear the general name of boli (literally, to run) and which are the equivalent of the altars although they are of an entirely different nature than the preceding ones. Their origin is different. To the initiates they originate in the twelfth bangini which gave birth to the day (see pp. 30-31). In the shape of "globules" they were released in space by Faro as he descended to the earth; they were collected by the spirits of the air and of the ground into which some of them penetrated, and were later given to men (1).

173
782
778
1. The popular belief has it that the eight principal boli of the Bambara were brought back from Mecca by the famous Makanta Djigui, a personage whose name is cited in numerous prayers (particularly in the course of the ceremonies of the Komo).
L. Tauxier attributes this tradition to Islam influence under the reign of Soundiata's successor, Malinké Kankan Moussa, who made the pilgrimage to Mecca in 1324 (La Religion bambara, p. 287, n. 3).

The name of Makanta Djigui is cited in the device (burudyu) of the Komo: the chiefs of this important society carry their altars each year to the shore of the Niger near the village of Tikko on the spot where the historical canoe which transported him is said to have sunk.

173 178 182 It is possible that this figure played the role of a religious legislator by codifying certain beliefs and founding associations around the boli which, according to qualified informants, existed before his intervention. On this point see also L. Tauxier, La Religion bambara, p. 287, n. 3.

The versions of the voyage of Makanta Djigui, which the natives readily tell, are innumerable. See the Abbé Henry, L'Âme d'un peuple africain: les Bambara /The Soul of an African People: The Bambara/, pp. 131-133: Ch. Monteil, Les Bambara du Ségou et du Kaarta /The Bambara of Ségou and of Kaarta/, p. 170; D. Traore, Makanta Djigui, fondateur de la magie soudanaise /Makanta Djigui, Founder of Sudanese Magic/, pp. 23-25.

We have collected two versions of this episode, which we do not feel useful for presentation in this study.

178 182 The boli, also called nyana, are made with the most diverse materials: hyena tails, peppers, honey, coal, precious metals, parts of the body. Each element has its value, and its use is determined by its place in the categories: the time of its manufacture is also important. But whatever its composition, each boli, whose name expresses the universal movement of things, is a combination of elements representing the parts of the universe (1). /93/ It is,

1. At the present stage of this investigation the classification by categories of materials or elements composing the Bambara universe has only been outlined. It is only after the completion of this study that the exact role given the elements composing the boli will become clear and that the problem of the origin of these altars can be considered.

778 therefore, the symbol of the universe and the receptacle of the forces
182 which animate it. These forces, already very powerful at the time the *boli* is made, are constantly kept up, increased by the additions received in the course of the blood sacrifices of which the *boli* is the object. It becomes a concentration of forces, which gives back in proportion to that which it receives and of which the owner is the first beneficiary.

A *boli* is also an intermediate agent, permitting one to reach a supernatural power—an ancestor or a living being who impregnates it with strength by coming to consume the offering over it. Through the spilled blood, this strength reenters the victim as well as the sacrificer if he partakes of it.

Therefore a *boli* contains:

A part of the soul (*ni*) and the force (*nyama*) of the being to whom it is consecrated.

The *ni* and the *nyama* of the victims offered to it.

The *nyama* of individuals who, having broken the taboos dictated by the divinity, have died as a result.

The Bambara differentiate two kinds of *boli*: the most numerous, whose power is relatively benign, called *soni* (literally, to give little); and those which contrariwise are charged with powerful, truly dangerous forces, called *saraka* (1). The latter, by their power alone, supposedly kill the victims offered them without making it necessary to cut the victim's throat. It suffices to present to them the victims while reciting an appropriate prayer to make the victims die. It is then said that the "*boli* has made the blood come out" and this death is equivalent to a blood sacrifice (2). These *boli* also attack those whom a person has vowed to persecute.

It is said that a *boli* "is hot and has a dry throat" and that is why occasionally the ritual includes collecting the blood in a gourd in which [the *boli*] is allowed to soak.

---

1. The *čuafebla* is a *soni*; the *mbe ndyugu ka* is a *saraka* (see pp. 175 and 176).

2. If the victim does not die fast enough, the person offering sacrifice may "insult" the altar to force it to act.

778 782 Some *boli* are individual, sometimes inherited from an ancestor and consecrated to their owner whose strength they maintain. Others are collective and consecrated to supernatural powers which protect the life of the community.

778 782 784 The taboos relating to beings whose soul "impregnates" the *boli* and to the elements which compose them are decreed at the time /94/ of their making. They must be scrupulously respected by those responsible and by those officiating. The *boli* are generally placed in a sheltered spot either in sanctuaries or in an isolated room of the house, which no one enters without the permission of those responsible. This is done in order to avoid the dangers resulting from broken taboos which would affect the integrity of the *boli* as well as that of its owners. The handling of the *boli*, dangerous as it is, is restricted to priests, to the head of the family, or to the owner.

782 Victims most commonly offered on all altars are domestic animals such as fowl, cattle, sheep, and goats. However, on the altars of hunters and those of the uncircumcised, only wild animals are immolated.

The color of the victim is determined by the quality of the being to which it is consecrated as well as by the altar itself. Animals of [822] a red color are generally killed on the *boli* of religious societies, thereby increasing the *nyama* which they contain. White, the symbol of light and purity, is reserved for Faro.

782 787 The death of the victim is used as an occasion for divination. The throat is cut in such a way as to prolong the death struggle so that the officiating person may interpret the position of the body. The cutting process is followed by eating which has the function of communion. Furthermore, certain parts of the body (the liver) are left on the altar; others such as the jawbone, feathers, and hair are kept as tokens by the person offering the sacrifice.

782 The ritual is usually accompanied by offerings of boiled millet as "refreshment," since the blood is given to the altar as a nourishment. Kola nuts, chosen for their shape and color, are divided into two portions: the officiating person chews one half and spits it out onto the altar before eating the other half.

In former times, human sacrifice was also practiced. These took place in serious cases involving the kingdom, the king, or the chiefs. The usual victim was the albino.

782 As an example we will summarize below the ritual killing of albinos as it was practiced under the royalty. This underlines the mystical value of the victim and is an excellent example of the mechanism inherent in sacrifice; it brings out the ritual value of the details on each of which the Bambara place particular emphasis. Finally, it confirms the value and symbolism of different parts of the body as described in the preceding chapter.

782 826 /95/ The kings of Ségou were formerly provided with albinos by a man from the village of Pelengena who kept them prisoners and set them aside for this purpose. But this man exploited them by shaving their hair and selling it to the chiefs of neighboring villages as symbols of the men whom, sooner or later, they could reckon to have under their domination. The chief, having counted his subjects, war prisoners held as slaves as well as captives received as tribute, would prepare as many small sticks as there were men; then he would mix up these sticks with the hair and bury them all in the wall over the sill of the entrance to his home. The hair is supposed to represent beforehand an increase in the subjects of his domain and to help bring in the taxes.

But the albinos themselves were kept for the king who sacrificed them to Faro in cases involving the affairs of the kingdom.

1. When the king found himself in difficulties of an administrative nature, the victim was cut in half through the middle of the body at the level of the abdomen by means of a rope of the da fiber (1): his cries, gestures, and excrement were considered the vehicles of a nyama which "would eliminate the difficulty encountered by the king." No one was supposed to hear his cries which were not intended for human ears but for Faro, to whom suffering was also due. The king, above all, should not hear the screams under penalty of failing in his enterprise, and yet he had to be present at the torture and watch it with complete detachment.

[283 824]

The lower half of the victim's body was Faro's due. It was carried to the Niger by three men if the victim was a male, or by four if it was a female. One of them carried the body on his head.

---

(1) Hibiscus. The nyama fiber was considered impure and could not be used for the albino.

782 826 While keeping his eyes and his left hand closed, he walked without touching the ground with his toes in order to respect "the soul of that which he carried (1). At the edge of the river, the joints were broken, the marrow extracted and poured into the water. After placing their toes on the body, to "give a part of their soul to Faro," the men deposited it gently in the river, into which it sank while they loudly proclaimed the reason for their action. When they returned to their master, they brought him the spirit's gratitude and a little water from the river, which was poured over the royal seat (2).

1. To touch the ground with one's toes amounted to putting the soul of the victim's body in contact with the earth's impurity (see p. 102).

2. This offering was called *nasi*, "well-being."

/96/ The upper part of the victim's body was the king's and used for the needs of the state. The *tõdyõ* first blew into the mouth of the tortured victim so that the "air, in coming out, would take all his words to Faro." Then they buried his head under the king's throne and danced to the rhythm of drums.

[726 789] In case of war, the blood which had spilled during the sacrifice was collected by the *tõdyõ* and dried in the sun; then the residue was carried away and before the assault was thrown in the direction of the town to be attacked. The king who advanced with his army found, according to the formula, "his sacrifice before him" (*saraka bla ñe*).

782 826 789 2. In case the king was short of funds, the killing took place towards the west and was performed by sticking a bamboo stick into the throat of the victim so that blood would run over the cowrie shells which the king had earned himself "with his own sweat." Thus consecrated, the cowries "attracted gold, silver, and copper to the royal treasury."

The head was placed under the throne. The chest and lungs were dried, reduced to powder, and preserved in a bag which the king kept. When he received his tax-payers, he smeared his face and mouth with this powder, thus forcing the visitor to give. He rubbed his body with it before going to war, causing the warriors to say:

782 "To see the king is to see gold" (1).
826
789 1. *Fama* *yele* *ye* *sanu* *yele* *ye*.

He gave some of it to his wives and children who put it in their drinks in order "to inherit his place and his goods." This powder was offered at each sacrifice to Faro in order to fertilize the kingdom.

782 3. When a family was plagued by numerous deaths, they asked
the king to authorize the sacrifice of an albino whom he furnished
826 himself. The victim's tongue was dried, pounded to powder, seasoned
266 with pepper, and eaten by the father of the family to permit him to
"reclaim the words and the nyama of the deceased." The nose was
swallowed by the mother so that she might "reclaim the breath of the
dead children." The father then ate the broiled eyes to "preserve
lost sights." The dried ears were hung above the sill of the entrance
"so that death, upon hearing the funeral wails, might not return."
The skull was retained as a token and buried in the courtyard; a
wooden stick marked the burial place. The rest of the body was thrown
into the Niger, "for an ordinary man does not have the right to keep
that which is reserved for the king."

782 If the king permitted it, chiefs of the important villages /97/ also
826 placed the body of an albino under their seats "in order that their
622 authority be solid and enduring" (2).

2. Sometimes the sum total of the taxes raised in a village were given the parents of an albino in exchange for the child. Those who could not obtain a victim used an animal bone as a substitute and performed the ritual as though it were an albino. Regarding the chief's seat, see p. 178.

782 In certain serious cases, the albino was sacrificed on the altar of
826 Komo. This sacrifice was accomplished in silence for "a prayer unknown to the person sacrificing is in the blood of the albino" who is powerful enough to act without words.

/98/ Chapter 5

TECHNOLOGY

773 The Bambara who are conscious of the evolution of their civilization trace it far back in time. The history of their origin as well as the feats and exploits of their most distant ancestors are not only inscribed in their memories but also in present day ceremonies and often in the material products of the culture, secular as well as religious.

The invention and evolution of technology, in the course of which the spiritual and the material, revelation and human effort, all work together, give rise to legends and representations which are characteristic of Bambara psychology (1).

> 1. What we relate here concerning the origin of technology is exclusively a summary of what the natives tell. The context, in the form of practical daily rituals, of which the forge is the best example, is sufficient and requires no commentary.

According to Bambara thought, all technology is an atonement taught man by Faro, a palliative to cosmic disorder, generally induced by a broken taboo. Famine, war, epidemics, misery, and death, which such disorders bring about, are compensated for —as far as possible—by new technologies which are revealed as needs arise. All these exist potentially in the wooden club used to smash and beat the fiber, which was the first raw material used (2).

> [171] 2. The wooden club is a duplicate of the mythical blacksmith's hammer which contained the techniques and the cultivable grains (see p. 53, n. 1). The same origin of technology is given by the Dogon, see Dieu d'Eau, p. 84.

773 829 The first works were made by "primitive men, " ancestors of the Bambara of whom the following description is given:

773
829 "They were covered with shaggy body hair, beard and hair; their long nails resembled claws; their teeth resembled fangs. They knew no language and had no clothing to protect themselves from bad weather; they lived in holes dug in the /99/ ground or in habitable natural caves, at the bottom of which they slept and kept their prey. To defend themselves against wild animals, they placed wooden spikes and pointed rocks at the entrance of these quarters. These deep holes communicated with each other and together formed regular underground villages" (Fig. 6) (1).

[332]

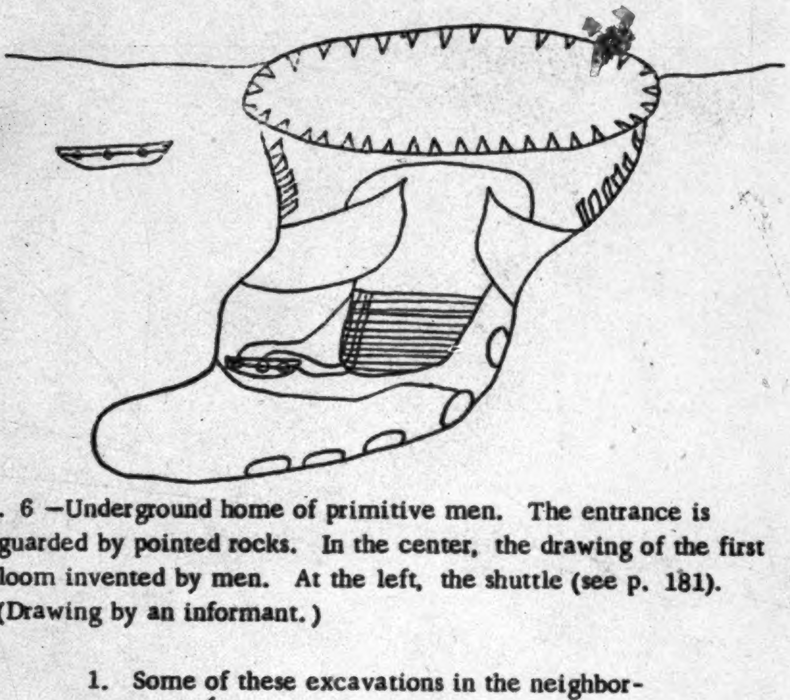

Fig. 6 —Underground home of primitive men. The entrance is guarded by pointed rocks. In the center, the drawing of the first loom invented by men. At the left, the shuttle (see p. 181). (Drawing by an informant.)

[172] 1. Some of these excavations in the neighborhood of Ségou, which may still be visited today, are venerated by the Bambara as ancestral homes.

Since they did not know language these men communicated by means of head gestures, movements of the feet and hands, and grunts. When a difference arose between them, before using their hands they drew back their lips and measured their long canines to determine who the winner would be. "Later they were given language, but

773 829 knowing its power, men at first used it sparingly. A question was never discussed twice. If a request was reiterated, after an objection, the party requested would bow and agree at the risk and peril of the person making the request."

Men first lived by gathering and later by fishing and hunting without tools, using only /100/ hands to seize their prey, and nails and teeth to tear and cut it. Gradually this primitive life changed; technologies developed one by one according to a chronology which the present Bambara still remember.

773 The first raw material used, according to a tradition which is not confined to the Bambara alone, was the fiber of the nyama tree (1)

[829] 1. Bauhinia reticulata (in the north), Bauhinia Thonningii (in the south).

(nyama fu) out of which were woven the first fishing nets, the first sling, and the first loincloth (2).

[17] 2. The Dogon also mention this fiber as the first material used by men. With them as with the Bambara, it has a ritual function. See M. Griaule, Dieu d'eau, p. 26.

When they began to work the soil, they developed a set of primitive wooden tools. At the same time, they invented a throwing weapon made of the same material. Wood remained in use for a long time; the invention of weaving and crude pottery goes back to this period. Later, they came to know stone tools, iron, and the forge. The art of house building, about which no myth has been gathered until now, seems to have developed much later, after the discovery of iron (3).

3. Certain parts of the investigation concerning technology have been summarized by the author in "l'Arme et l'outil chez les anciens Bambara /Weapons and Tools among the Ancient Bambara/, " Africa, Vol. 18, no. 2, pp. 105-111.

The study of this assemblage of tools and of their ritual use is most suggestive because they are a first indication of technological

773 evolution. They also indicate different stages in the development of the forms. These may be observed in certain museums of arts and crafts which, in some villages, are the sanctuaries where ancestral material is kept. Finally, in numerous ceremonies and in the education of the young, they constitute precious milestones in the history of the Bambara people.

Fishing and Hunting

773 226 According to tradition, the fishing net was the first instrument of technology taught men, and fish constituted the primeval food.

"One day, four women went to the shore of the Niger to collect sand which they used for bedding and which also served as food since they no longer received any from the sky. As they advanced, the sand drew back so that they soon found themselves very far from their usual stopping place. They /101/ then wished to return, but Faro prevented them from doing so and asked them to work for him, promising them a precious gift in return. They "swept up the spirit's excrements" for seven days; on the eighth day, "the words began with Faro." He showed them two fishing nets, *dyo*, and explained to them their manufacture and use. One had very fine loops, *dyonyemise* (literally, net of the thin eyes), and the other larger loops, *dyonyekumba* (literally, net with big eyes). Both were made of the fiber of the 825 *nyama* tree. The first was reserved for *tneni* (1) fishing, called "Faro's excrements," and the second for the capture of larger fish such as sheatfish, gurnard, and catfish.

"For seven days the women were taught by the spirit and his captive; on the eighth day they were liberated. Seven days after these events they began to fish and to nourish themselves with fish.

"But they soon abused the gift they had received. Taking turns day and night, and fishing without interruption at the very place of the revelation, they taxed the spirit's patience. The latter appeared to them above the water, holding his girl twins in his arms; he complained of their harshness, their stupidity, and the weariness they caused him. Reclaiming the secret he had given them, he indicated to them that fishing would hereafter be a man's job and that they would only have the right to sell the fish.

1. *Alestes nigrinileatus.*

173 226 "Despite their tears, the spirit gave the nets to three men who were present and repeated his teaching. The women left the water's edge while the men turned their new knowledge to account. But at the end of a few days the women became hungry; they went to ask for fish which for seven days was denied them. They then united with the fishermen and the Bozo people were the issue of these first marriages."

At first, fishing was reserved for the Bozo people alone and it was only later that the Bambara learned from the Bozo how to make and manage the fishing nets as well as how to carry out the numerous rites centered around them.

173 226 411 The Bambara practiced hunting and gathering before becoming farmers. It is interesting to compare the fishing net with the sling (ndõfere) now mostly used by children. One of its models (Fig. 7) is described as having been the most ancient of their weapons of the hunt and war. The central portion of this sling which in reality had the shape of a net /102/ (dyoba, literally, big net) woven from nyama fibers and similar to the one used by fishermen, was drawn out into two thongs. The right one (kinintegere, literally, tegere of the right) ended in a sort of a bouquet of wooden lamellae (tegere), making it easier to hold. The left one (missema, literally, little thing) or numan (literally, left) was free. The man would hold the weapon by both ends, putting stones in the net and "blowing on the right thong to give breath" to the sling. Placing his left foot forward, would twirl it rapidly and let go the left thong, thus releasing the projectiles.

[532]

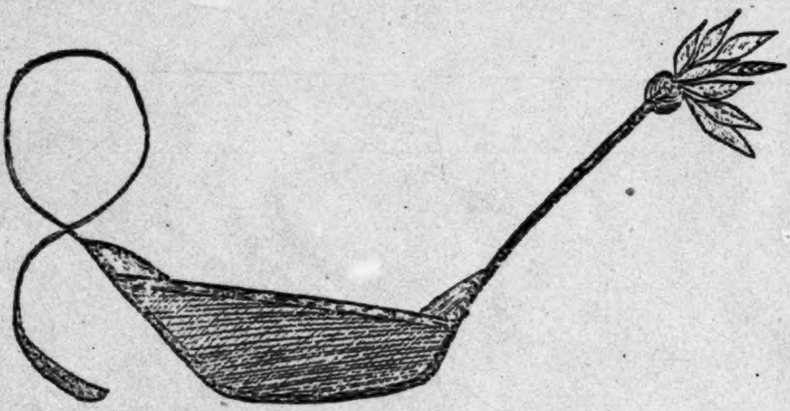

Fig. 7 — Sling (ndõfere) of the ancient Bambara (Drawing by an informant).

113 224 411 Propitiatory sacrifices were offered on the wooden lamellae and the blood ran along the thong into the net. In addition, the hunter would saturate his weapon with the blood of wounded or killed animals to give his contrivance the victims' strength and to increase his own skill.

The ndõfere was used for a long time as a military weapon.

Weaving

113 286 The invention of weaving is linked to the discovery of cotton cultivation. The latter appeared long before that of millet at a time when the only known tools were those of wood used to scratch /103/ the earth at the base of the wild grasses with which men nourished themselves (1).

The myth mentions simultaneously the appearance of cotton and the invention of spindles and shuttle; it does not mention the loom which appeared later. The tale of the manufacture of the first clothing also includes details on dyeing which seems to have been known at a very early date.

When the men returned from the bush where they had been cultivating the norolã sise (commonly known as cram-cram) and the narakata, a kind of couch grass which provided them with edible seeds, they would often abandon their wooden hoes at the crossroads in honor of the Soba spirit.

One day an old man who used to pass nearby was summoned by the spirit, saying: "To all of you who leave your hoes as you pass by, I wish to give something to hide your nakedness; but I will do it if you offer me a sacrifice."

The old man reported this incident to the men of his generation, who decided to sacrifice an albino at the crossroads. The spirit then told them to take the seed which they would find at the intersection of the roads and taught them how to sow and harvest it.

---

[171] 1. See p. 154. The Dogon admit the same priority of weaving over cultivation of cereal grains. See M. Griaule. *Dieu d'eau*, pp. 31ff.

773 286 "This," he said, "will be useful to you later as clothing." Men first made skirts of leaves and fibers which they used as loincloth. Then they sent their women to sing and give thanks to the spirit. When they had sown and harvested, they placed the cotton on the crossroads as a gesture of homage (1). The spirit then taught the wife of a farmer, who used to come and greet him everyday at noon. One day she saw at the crossroads a bird whose name means "little bird who spins the cotton of God" (ala ka kwori parata kono ni). It held white fibers in its beak, pulled them out with its feet, and rolled the thread thus obtained around the body with its wings. "Watch the bird," said the spirit. "In this way he spins and weaves in the sky in order to protect his eggs. Cotton should be used in this way. Your death is near. Begin work from tomorrow on this little stick," he added, pointing to a spindle, "and teach the women of your family and the children."

The woman first spun awkwardly and went down to the river to show Faro her work and to ask for help. A fish came out of the water and gave her a spindle whorl in the shape of a ball, showed her how to adapt it to the spindle, and explained to her its use and divine origin. It announced to her that hereafter similar spindle whorl would fall from the sky with the rain for the women who spun cotton.

/104/ Having resumed her work with this new tool the woman was successful in it and taught her companions. They then threw their first threads into the Niger as an offering to the spirit so that the secret might not be lost. All artisans did the same with their first piece of work (2).

---

1. This custom is still observed today.

[782] 2. Every first piece of work is thrown into the river as an offering to Faro. It is a guarantee for the artisan that his skill will be retained and that his technique will improve. Actually the young spinners of Ségou throw their first spindle into the river. In addition, the parata bird which taught weaving is captured, its wings and feet are roasted, and the powder is given to whoever begins the appreticeship so that it may be over rapidly.

773 Seventeen days after the apprenticeship the old woman died.

286 Her companions continued to spin but since they did not work on wood (1), they had to ask the men to carve spindles, thus revealing their secret.

Some time after this the spirit sent a spider to weave its web at the opening of one of the underground holes used for habitation (see Fig. 6), where lived a man called Bambou Diara. The latter watched the insect and they called in his friend, Kari Mariko. They wished to imitate the web by using the spider's thread which, however, proved too fragile to work with. They then asked the women for their cotton threads. Holding a twig of straw on which he had wound the thread, and having secured the warp, as had the insect, to the two rocks protecting the entrance, Bambou imitated the spider and made a kind of round fan, shaped like the web with coarse loops. When he had woven two, he joined them with a rope made of nyama bark, thus obtaining the first loincloth (mbogo nimba).

Kari Mariko had watched the work and had noticed the difficulty with which his friend threaded the woof through the warp. He got the idea of winding the thread on a thin stick more resistant than the straw and of placing this in a stone trough which would slide easily between the elements of the warp. This was the first shuttle (kuruni). He wound the thread on it in three bobbins, the symbol of masculinity, thus consecrating weaving as man's work. The threads were then stretched horizontally and the shuttle was used vertically, thus cutting across the warp each time it went up or down (Fig. 6).

All came to see the work of the two artisans and named the village where they lived the "village of intelligence, hakilidugu." They learned from them the art of weaving and today the names of the two friends are still invoked over the plate of food which each apprentice must eat before beginning his instruction.

Following the breaking of a taboo in the course of a fishing expedition on the river, the spindle whorls ceased to fall from the sky. Since then, fishermen /105/ produce them by mixing clay with karite oil and drying them in the sun.

---

[412] 1. Except for cooking, a woman never uses a knife, an object reserved for men.

173 286 [785] The loom was invented later. The positions of the warp and woof and the practice of breaks and knots were modified. The loom was formerly the object of nocturnal human sacrifices whereas the shuttle received lesser sacrifices in the day time (1).

1. At present, looms are set in the ground above a piece of pottery, the bottom of which is pierced before the pot is buried.

The stone on which women clean the cotton, kaba, represents the sky and recalls the divine origin of cotton and of the technology relating to it.

Clothing

291 Clothing which has intimate contact with the human body is a part of the person wearing it. On the other hand, the material of which it is made, and the various elements which compose it and which are associated with one or another aspect of Bambara metaphysics, exercise an influence on the wearer. The choice of clothing is rarely a matter of chance or individual taste and the various manifestations of social or religious life usually obligate people to wear appropriate clothing, the symbolism of which is linked to the action or circumstance under consideration. The role of the garment appears as early as infancy: a newborn wears around his loins a cotton thread, dyura dyuru, which is both a protection (for it "solidifies his spinal column") and a foreshadowing of what he will wear later. When he reaches the required age, a family reunion takes place on the day he is dressed for the first time. Before this, it is necessary for him to have dreamed of his first garment and to have talked to his mother of this dream; she then begins to spin the necessary cotton. Before dressing, the initiate proceeds with an ablution called mayadyi (literally, water of the person's action) in water taken from the Niger or from a pond of Faro's. The dressed child is told "that he is now a man and may become a member of the ndomo (2)"; then his kinsfolk tease

2. Society of the uncircumcised (see p. 222).

291 him and joke with him, indicating by semi-ritual jokes his accession to a new status.

291 Men's first garment was the skirt of nyama fibers (Fig. 8, A). The
173 bark was beaten and prepared by means of a club, a wooden club,
gosilande or kuruninde, which is /106/ supposed "to contain potentially
all human technology invented as the need arose." It is said of this
club that it is "the mold of perfection and the place from which all
useful things issue." The club was also originally a primitive instrument of rhythm (1); the hammering of blows "chased away the evil
[755] sounds emitted by Téliko at the time of his revolt." Even today, a
deafmute is seated near the gosilande which is prayed to so that he
may be rid of his infirmity. The clothing of a woman in labor, in
[844] order to purify it, is beaten with the gosilande at the same time the
infant utters its first cry. Dyed clothing is beaten not only to make
the color penetrate, but also to chase out any impurity.

When they first learned about cotton, and after the invention of weaving, the Bambara made garments which are in disuse today but of which they still make specimens for ritual purposes. In fact, with the exception of the loincloth, these ancient garments are worn only during religious ceremonies and their principal function is to represent the ancestors who were their progenitors.

291 The first garment woven was an imitation of the fiber skirt. The
173 men made loincloth (mboko nimba) still worn today by the uncir-
386 cumcised and dyed it yellow, wolo (2) (Fig. 8, B), a color which represents that which a certain disease gives to the black's skin,

[783] 1. kow dyele bwo yoro. On certain occasion when the Komo masks are brought out, the chief carries on his head the gosilande which represents the universe. Certain collective purifications are also executed with this instrument at the crossroads (see p. 186).

[824] 2. This dye is made with the leaves of the ngalama (Angeissus leiocarpus), which are boiled, dried, and pulverized. The powder is put in water.

291 773 386 which they got rid of by means of this dye. A live swallow was immersed in the liquid, which was obtained by soaking the leaves and to which was mixed ground charcoal, and later was released, thus consecrating the dye into which the loincloth was soaked.

291 773 The next garment was made of two strips, dyo kama (literally, shoulder nets), which were hooked on to each arm. The strip on the right arm, representing male, was attached by three thin straps (male number). The other was attached by four straps, four and left being female. The wearer would lie down over the strip on the right side

[532]

[787]

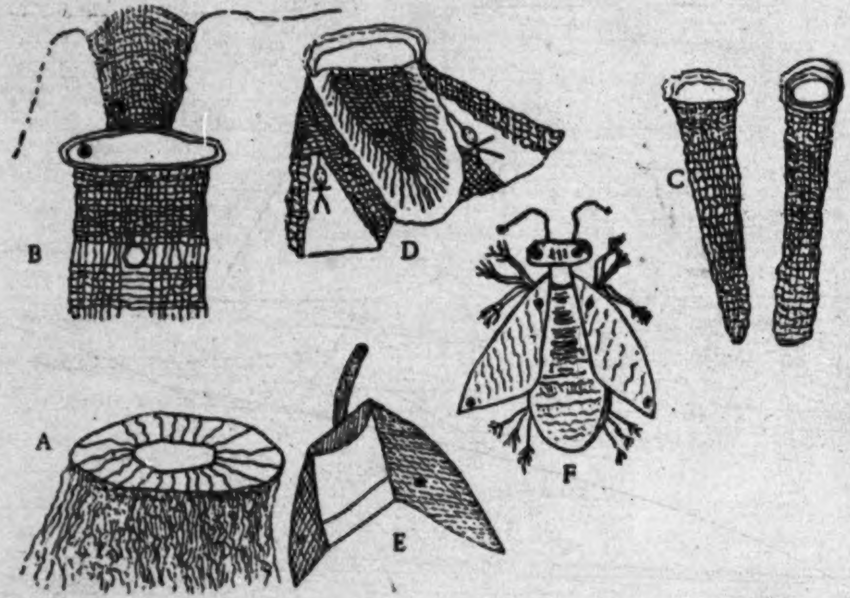

Fig. 8 – Ancient Clothing of the Bambara.
(A) The skirt of nyama fibers; (B) the loincloth; (C) the "shoulder nets"; (D) the tunic; (E) the bonnet are made of dyed and woven cotton threads. (F) the dung beetle, an insect which plays a part in geomancy. (Drawing by an informant).

and would cover himself with that on the left (Fig. 8, C).

Next, men made a kind of short tunic, wǫlǫ kama (literally, partridge wings), which was dyed red (Fig. 8, D). At the top of the openings where the arms passed were suspended /107/ two little figures (mani) carved out of wood. These represented the souls of the wearer, "took their life from the veins, and gave their strength to the

291 773 arms on which they rested." The center of the garment represented the chest, the liver, and the heart of the wearer; the horizontal threads the veins and arteries. The supporting collar, made of three bark fibers of the da tree, was "the individual's double during his sleep." Sweat was the offering made to this garment. In the cold season it was replaced by salt. . The first time a man wore this garment he would pray: "Garment, we wear you in the name of our old ancestors and in honor of those who created you."

The ancestors drawn on the sanctuaries and the granaries are all equipped with caps, banfla, which they wore in olden times (Fig. 8, E). At the top were affixed a wooden picket and a hyena tail, through which the sky gave its strength to man who in return /108/ would send his "through the wind." The cap (čema), made of strips of yellow dyed cotton, had wings (bamadae), symbol of the ears: the lines on the right wing assured numerous offspring and those on the left, a secure and righteous life. The wings also recall those of the swallow, the water spirit's messenger entrusted with carrying into the womb, at the moment of sexual union, the drop of blood containing the child's life and soul. The two indigo dyed spots on each wing are the symbol of this womb.

The cap as a whole (farofla) was the "link maintaining the life of man," who is himself represented by the line which encircles the cap. It protected him against cold, disaster, and death. It was also the symbol of Faro's home and power. When he received it, the wearer would say: "Wing of the cap, cap, son of Faro, I have drawn you with strength. Oh, swallow" (1).

1. Bamade, bonza, farode, ni be ke ola ni barikaye, nanale. The primitive clothes described above were observed by an informant at Bougoula and are presented to the postulants at the moment of their initiation.

After the invention of the loom, clothes were no longer made piece by piece. Bands of cotton made by weavers were used, cut up, fitted, and sewn—a technique still observed today throughout the Sudan.

291 773 531 There exists a "science of the bands," finew tno or finew dongo, which is familiar to all those who wear the traditional clothes. It

291 rests upon the knowledge of the symbolism of colors, drawings, and
773 numbers. The bands are numerous and each one represents one aspect
531 of metaphysics, one fragment of the myth. Thus, the story of Mousso Koroni is told in four successive bands (Pl. III, from 5 to 8). The wearing of the bands depends upon the physical or moral state of the wearer, upon his functions and activities (1).

1. We give below the description of a certain number of these bands, chosen from the ones most representative; we intend to publish a complete study of this aspect of a technique most revealing of Sudanese psychology.

291 The white band, finin muku dye, represents Faro, being as white
773 and luminous as the sky and the rays of the sun. White denotes wis-
531 dom and purity of the spirit, the purity of blood. The one who ap-
122 pears in public thus dressed is respected because he affirms thereby his desire to follow religious rules. It is also the color of offerings made to the spirit. A piece of white cloth is sometimes hung over the door of a home where people have just /109/ made a sacrifice. A sick man throws three white bands into the river, or gives them to a person poorer than himself. A white cloth, worn over a man's shoulder, "strengthens his nerves and articulations." At nightfall every evening, all the children put on a tunic of this color. Thus, despite the darkness, they are "in Faro's light" and will recognize each other in times to come as the children of one father, one family, one blood. The marriage veil is made up of eleven bands each measuring eleven cubits; these are not sewn together but rather basted in spirals. Thus dressed, the woman goes in the night to her future husband's village, in the luminous word of Faro and surrounded by the twenty-two elements of creation, the eleven spirals intersecting each other on the right and left. A dead person is also dressed in white: trousers with six strips representing man and his dya, and a hat with three bands. He is rolled up in a blanket of the same color and visitors place upon the corpse pieces of white cloth or cowrie shells. The whole signifies good will, sincerity, and devotion toward Faro of the deceased who must be "white under the earth" if he has not broken any taboos.

The opposite of white is indigo, konofi, which symbolizes darkness and impurity and which is worn in most cases where the spirit's

291 activity is not involved. Nevertheless, a woman puts on an indigo
773 loincloth the day she resumes sexual relations with her husband after
822 the end of her menses; she retains it until pregnancy. When she is sure
531 of her condition, she puts the loincloth in the sun to purify it and will
place the newborn child in it to remind him later that he owes his
[764 life to his parents. A dead person who has broken a taboo is buried
in an indigo shroud, the only reminder of light being a white cotton
784] thread which is placed on the corpse as an expression of apology and
forgiveness. Since indigo is taboo in most of Faro's sacred places, no
one wears it during sacrifices or religious ceremonies.

White and indigo complement each other. To twist a white and
[789] an indigo thread together to make a string used for holding an amulet
is to "roll together happiness and unhappiness, as in life."

The dye wolo is the color of yellow copper. It is in this color
that the newly circumcised are dressed after the operation and until
they are healed. Red, mbegu, is the color of copper and of blood.
Hunters who wear a tunic of mbegu are "covered with a garment of
blood." The band kayo (Pl. III, a, 1), in which are found these two
colors, indigo and white, reproduces the rainbow: the white intervals
are symbols of the word and of purity. /110/ A person making a
sacrifice sews a piece of this band on his clothing to indicate that he
is circumcised, that he is a hunter, and that he is truthful in his
actions and words. A band is hung at the gate of the northern entry
to the village in order to protect its inhabitants from dangers coming
from outside. A man wears it when he has been ill or has suffered
serious financial or family difficulties. On the altars, on the doorways,
the colors are represented by millet mash, blood, and kola nut extract.
[821 As the rainbow keeps away the rain and dries up water, the kayo
784] strip may not be worn near the river or during sexual intercourse, for
it is Faro's taboo.

The band sirakele (literally, a road) (Pl. III, a, 2) represents Faro's descent from the seventh part of the sky down to the seventh part of the earth, the indigo stripe being the dyi fi, "black water," the spirit's earth seat. When put on the loincloth of a married woman, it expresses her rectitude and the good behavior she intends to maintain towards her husband. When worn by a traveler, it prevents him from losing his way.

291 The buguni (1) (Pl. III, a, 3) is "the sun ray Faro gave to Pemba
773
821
531

---

1. The word designates the band's place of origin, Bougouni.

291 for his great earthly labors." When clouds form, it is said that Faro
773 "is showing the buguni in the sky" and the diviners advise each person
821 to wear a strip in homage to the spirit and to facilitate the coming of
531 rain. The geomaneer gently rubs the earth, where he is going to draw signs, with a cloth of this design. It is as though he has injected sun, light, and truth into the work he must execute on the impure soil.

291 This band is also called kolõso mako, "necessity of the mixture,"
773 or kami, guinea hen, whose plumage as well as whose fragility the band betokens. In this respect, the buguni symbolizes man's weakness and incompleteness. When placed on a convalescent's clothing,
[155] it signifies that the latter has lost some of his vitality during his illness. Dressed in this fashion, he goes to the Niger and bathes so that Faro might heal him. A man who has suffered severe financial losses also wears the buguni. At the market, in public meetings, he will not be made to pay his share of beer because of the band's silent language which is clearer than words. If a widower remarries, he sews a piece of it on his cap in memory of his first wife. The knife of the person offering a sacrifice is wrapped in the buguni, for it "never has enough blood," also in certain boli which continually crave it.

/111/ In conclusion, the squares of indigo cloth represent the void and darkness; the white ones, fulfillment and light. To wear the buguni signifies hope, the impure or weak man hoping to become pure, strong, and fulfilled.

The bugunimba (literally, large buguni) or nyedẽ (literally, threads of the eye) has the same symbolism. A wound is bandaged with it. A man who has broken a taboo wears a cap of this material; an illegitimate child also wears it. The buguni tyekorole which symbolizes the impurity of Mousso Koroni is used to implore Faro's help in great calamities and for misfortunes without remedy. Thus, the body of a stillborn child is covered with it.

291 The buguni nyama (Pl. III, a, 4), made of twenty-two alternating
773 indigo and white squares, symbolizes creation in its harmonious and
822 orderly entirety. Its separation into two layers recalls the duality of
801 nature, represented by a thin stripe through the middle. A happy man sews an entire strip into his tunic. The man who has difficulties of any kind divides it lengthwise and pins a small piece at the bottom of his garment.

291 The nyeba, "big eye," or koloso tyema, "mixed masculinity"
773 (with femininity), (Pl. III, a, 11) also represents creation, here sym-
822 bolized by the double layer of five indigo and white bands (1). At
801 the same time the cloth also symbolizes the complete man, said to be both masculine and feminine. A newborn child, but never an illegitimate one, is clothed in it.

The band soli (Pl. III, a, 5) represents the good conduct of Mousso
291 Koroni at the beginning of her life as well as her betrayal which
773 brought disorder on earth.

531 In olden times, people who had committed bad deeds were obliged to wear it. Today it is used as the shroud for a child who dies im-
[764] mediately after birth; a strip is sewn to the garment of a recently excised girl or to the loincloth of a woman insured in childbirth. When differences or conflicts arise within a family, a fragment is placed in amulets which the women must then wear.

The wutu nyekorotike (Pl. III, a, 6) pictures the disorderly voyage
[828] of Mousso Koroni, her despair and her madness. This pattern is reserved for insane people in order to warn others of their condition.

The band gombo (Pl. III, a, 7) recalls the pursuit of Mousso /112/ Koroni by the god Pemba into the depths of the sky and the earth.

The band tyatyeli (Pl. III, a, 8) a picture of Mousso Koroni's defeat, symbolizes human work. It is given to a courageous and energetic woman. It is circulated among those present at religious ceremonies and its mere presence indicates that nothing here below is obtained without work and that all stems from work. To wear this band strengthens the man who is entering upon a task in a village other than his own.

The band saki is the koblenkaba, "red sky." It symbolizes heat, anger, difficulties, and sorrows. It is woven at the time of marriage negotiations for the purpose of resolving any differences of opinion.
[844] A piece of it is dipped into the blood after birth and then thrown away in order to purify everything.

[822] The blue stripes of dyitala represent impurity, and the red stripes, purification by sacrifice. Whoever has broken a taboo wears the blue, and the red when he is purified. A piece of red cloth may be inserted into the vagina of a young woman, after she has lost her virginity or

---

1. On the value of number 5, see pp. 24, 25.

291 113 531 to replace the blood lost in childbirth; this piece is then burned to hasten the healing of the wounds.

The loincloth of a woman who has given birth to twins is made of the sukaba band with large, regular, alternating squares of yellow and indigo. The mother places on the garment as an offering a little of the millet mash she feeds her children for the first time.

The band nyoronga was formerly used for shrouds. The king would wear a whole garment of this or had three bands sewn onto his tunic when he went off to war; thus he wore his own shroud. A brave man would tie a piece of it to the barrel of his rifle to show his indifference in the face of death. A strip was tied to the right hand of those killed on the battlefield as a reward for having done their duty. Today, a shred of this band is hung at the door of a home where a death has occurred; People bandage a wounded limb with it before going to the healer's.

The wutu tyerokole with three stripes is worn by a child born after the death in infancy of numerous brothers and sisters. It represents the departure of these members of the family and their return in the newborn. Shaking such a band in the ~~air~~ honors the seventh sky and the seventh earth and asks their protection for the child. This cloth is never worn at funerals.

/113/ The kemba (literally, mother of scarifications) (Pl. III, a, 10) substitutes for scarifications when it has not been possible to perform them; on the other hand, this band is taboo to those who are ritually scarred.

The warabawolo (Pl. III, a, 12) represents the lion of the Diara: the first son of this family was born on this cloth. A boy born with a lock of hair on his forehead is seated on the cotton band to make him strong and rich. Formerly the king made a rug for his throne out of it. Since the lion is their taboo, the Diara do not have the right to wear it or even to see it.

Weapons and Tools

113 262 824 Originally, men lived by hunting and fishing. But hunger drove them to eat plants of which the first three are the yayalẽ, an aquatic plant commonly found on the shores of the Niger; the narakata, couch grass; and the norolã size, commonly called cramcram (1). Long

1. These three plants are respectively: *Andropogon* (*Hyparrhenia*) *hirtus*, *Digitaria debilis*, *Cenchrus catharticus*.

before the cultivation of cotton and cereals was known to them, the Bambara worked the soil with wooden sticks around the base of those grasses whose seeds they then sowed. As their stock of tools developed, they began to make the first hoes and axes. In the case of the Mandé Bambara (2) the origin of these tools is linked with the history of the

773
326
564

2. The names and the origin of tools of the Bambara of the Ségou region are different.

blacksmiths, *numu*, who form a kind of caste in this part of Africa as in many others. They practice endogamy, maintain joking relationships, *senankuya*, with other Blacks, and are in charge of certain cults dedicated to ancestors and to Faro (3).

3. On the myth of the divine origin of blacksmiths, see S. de Ganay, "Notes sur la théodicée bambara." See also *infra*, p. 53 n. 1

Before the discovery of metal, ancestors of the present blacksmiths worked with wood, then stone. From then on they bore the name of *numu*, a term which today is reserved exclusively for the artisans of iron, *jirifa numu* or *farafa numu*, according to whether they worked with wood or stone (4).

4. L. Desplagnes mentions the historical aspect of the origin and role of the Sudanese blacksmiths (*Le Plateau central nigérien* /The Central Nigerian Plateau/, p. 110).

The peoples issued from the intermixture of the *ou*, shepherds (*Getules*), with the *ar*, sedentary tribes (*Fari*), have already been pointed out in earliest antiquity by writers, historians, and geographers who called them Numidians. Salluste tells us that "The Faronsû, in mixing with the

113
326
564

> getules (gne-Toules), formed the nation of Numidians.
>
> But according to tradition, these half-breed Numidians, today called Noumous, were the first initiators among primitive peoples of the industrial arts; thereafter the title of Noumous was kept and applied to all blacksmiths."
>
> And in the footnote on the same page: "But in Nigerian countries, this term for blacksmith, Noumou, does not necessarily contain the notion of a metallurgist."

/114/ All blacksmiths said to be of "pure blood," that is to say those who belong to the three families of Fané, Koumaré, and Balo, are descended from the Gwonna, who came from the underground village of Gwondougou and to whom goes the glory of having discovered iron.

According to informants, the word Gwonna comes from gwã, a name usually given to the hearth of the forge, which designates precisely the place from which the ore is extracted and where it is treated. The high furnace is called gwã so. The gwã tuku munu, extracting blacksmith, is the only one able to perform important rites. The word Fané derives from fã, which designates the forge in its entirety. Koumaré comes from kuma, word. It is the Koumaré who are charged [537] with the responsibility of debating in council meetings or in public gatherings. The word Balo recalls the fact that the bearers came to settle in former days on the shores of the Niger, ba.

The Gwonna are senãnku of the other blacksmiths. Moreover, in the villages where they live together with other artisans, they are by right the chiefs of the Komo and guardians of the sanctuaries where the ancestral tools are kept. Only if they fail in their obligation will the blacksmiths belonging to other families assume these duties.

The titles of the Gwonna are linked to the mythical origin of the forge which is under the domination of the Téliko spirits, masters of the air and wind, hence of the bellows and fire.

773
564
326
They inherited them from the eight ancestors who, before the appearance of death, were transformed into bee eaters (tatugu kononi) by the balanza and who received the power to activate or to extinguish fire (1).

1. See p. 43.

The Téliko spirits, jealous of the independence of these new beings, resolved to subdue them and waged war on them. The birds, who had no weapons, bewailed and a Gwonna blacksmith took pity on them; he requested axes, hoes, and arrows from the men of his family and gave them to the birds, receiving in return the promise of revelations which would be useful to him. Having made this arrangement, the birds, armed with weapons, went to meet Téliko at the place called gonya. They used their weapons in a gigantic conflict in which neither adversary could vanquish the other.

/115/ The birds then returned to earth and thanked the blacksmiths by teaching them three secrets necessary to the good progress of their work:

1. How to build their altars by mixing in a panther skin cold water, iron, and a stone, soul of the forge.
2. How to protect from the fire the hands of women potters.
3. How to make and consecrate the circumcision knife.

Since these revelations, the Gwonna venerate these teachers, thus raising the number of their ancestors to sixteen: the first eight transformed into birds who had not the use of speech, and the eight others who received the word from Faro.

564
326
In each village the patriarch of the Gwonna holds the title of kotigi (literally, owner of things). He guarantees the custody of the ancestral tools deposited in a sanctuary and of the ritual objects which belong to the blacksmiths of the village, and which are kept in his home. In addition, he is the only one who may perform the rituals concerning these tools and the purifications.

The important position of the Gwonna family is translated into ritual. Whereas an ordinary blacksmith, after breaking a taboo, must request the intervention of the kotigi to purify himself, a Gwonna simply asks the members of his own family.

564 Every blacksmith is regarded as the holder of an excellent tere.
326 He is well-intentioned, affable, and never hurts anyone. It is easy
774 to make friends with him, to joke with him, even if one knows him
but a short time. The senankuya relationships which he has with other Blacks also contribute to the cordiality of these ties.

[304] The good tere of the blacksmith is brought into play particularly at circumcision which is preferably entrusted to a Gwonna. Being circumcised by a blacksmith causes the wanzo to diminish rapidly, hastens the healing, and improves the tere. A blacksmith is reputed to have the power of transforming himself at will into an animal or a plant. In those places where hyenas are venerated as the animal [825] protectors of a village (dasiri), they are always considered as the blacksmith's ancestors who have undergone metamorphosis. (1).

773
564 The ritual paraphernalia now preserved in each village comprise
326 models of all the tools manufactured by the blacksmiths since their
412 first appearance.

a. Wooden tools The craftsmen first used wood, gradually changing the shape of the objects. From a simple stick /116/ (generally in sunzun) (2) or from a rough-hewn block, they gradually made more perfect tools, obtaining the shape desired by rubbing and polishing on rocks.

773 The first weapon used in hunting was a throwing instrument in the
564 shape of a boar-spear, the semenkala (from kala, handle, Fig. 9, A).
326 Hewn from one piece, it comprised three distinct parts: (1) the
411 bulonda; (2) the semenu; and (3) the koli (literally, hook). Men
threw the object with all their strength at the pursued animal or else they dug into the earth where their prey was hiding with the pointed end (semena) which was often poisoned with a viper's venom. The weapon was the object of blood sacrifices carried out on the koli and destined to increase its strength.

---

1. Particularly in the village of Konodimi, situated 21 km. to the southwest of Ségou.

2. Diospyros mespiliformis. The wood of this tree is very hard.

173 The first agricultural tool was the yirewolo (literally, noble, Fig.
564 9, B), thus named because of its antiquity, mogokoroba (literally, old
324 person, ancestor).

41 b. Stone tools Later, craftsmen learned to use stone. They used
[172] neolithic axes called "thunder stones" (1) which were used as scissors.
Those of the Gwondougou were at all times famous for their solidity. The craftsmen worked together and when they had rough-hewn their models, certain individuals among them were delegated to sharpen these by rubbing them on a rock.

The farakun (literally, stone head) (Fig. 9, D) was the first axe the handle of which was invented by an artisan who, having poisoned the sharp edge of his tool, wished to try it out on a tree. He sank the stone into a young tree trunk with the idea that the leaves would dry up of themselves. But he died without having ascertained the result. Later a passerby, having tried in vain to remove the stone from the tree, cut the wood above and below it, and in handling this new tool, was surprised at its efficiency. The use of the hafted axe spread among men who utilized the fiber of the nyama to tie the stone to the wood. In addition, the stone could be separated quickly from the handle and used as a knife to cut meat or bones. The handle was used as a pointed stick with which to dig in the ground and to attack animals.

It is probable that hafting was also applied to wooden hoes made in two sections and used /117/ for a long time in areas where there was no hard stone. In fact, a myth concerning the discovery of the cultivation of cotton, which preceded that of cereal grains, mentions the fact that men used to take their handles home, but left the ends of their hoes at the crossroads each day in honor of the local spirit.

c. Iron tools Finally, the Gwonna discovered iron and developed the science of metallurgy (2).

---

(1) The Bambara, like other Blacks of the Sudan, attributed divine origin to certain neolithic axes (see p. 71. It would seem that a great many primitive tools had been found by them in the area at the time of their arrival.

773
564
326
412

2. The Blacks consider that the discovery of iron and metallurgy are due to the Gwonna. It is, however, not impossible that this technology was imported by craftsmen who came from the Mediterranean.

At a time when the men had left the village of Gwondougou, taking their altars with them, two girls left their home and went to live with two artisans of the Fané and Koumaré families.

[532]

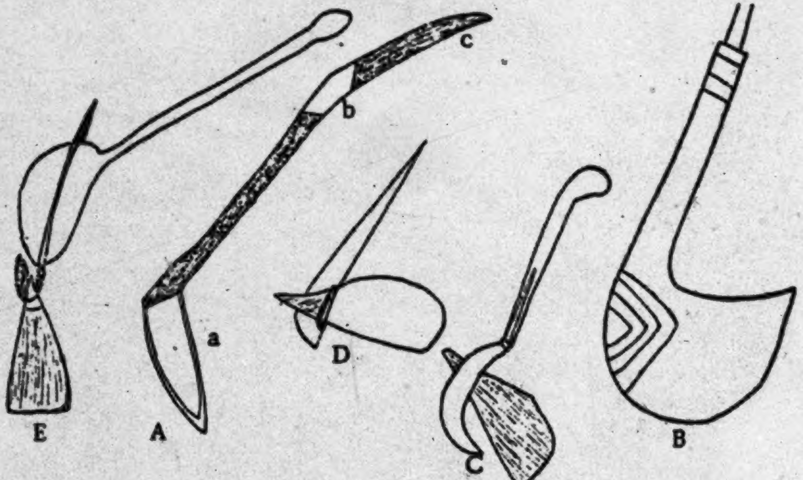

Fig. 9 —Weapons and tools of wood (A and B), of stone (C and D), of iron (E) of the ancient Bambara. (Drawing by an informant).

When the men returned to the village to get some hard stone which they would like to use, they were very much troubled not to find their girls. They dug the ground to search for them, thinking that they had been buried, since men in those days lived in laid-out underground holes. In the course of this work they discovered some rocks which were hitherto unknown to them and which are called farabele. The men thought these rocks beautiful and wished to use them. When placed in fire they were changed and became so hard /118/ that the hammers with which the men attempted to shape them split. The pieces of iron were then used as projectiles to replace the stones of the slings. But the blacksmiths, who had abducted the young girls and who had returned to the village with their wives, saw the new substance and suggested the idea of making axes out of it.

773 The first forged tool, the kongobwona (literally, to abandon hunger),
564 is still used by blacksmiths today as a ritual axe (Fig. 9, E).

326 It is made up of a wooden handle terminating in an enlargement
412 which forms its bulk, and pierced by a bent iron rod which in turn holds the cutting edge (farabye) of the axe proper. The handle is very long, allowing the man to work without bending over.

The tool justifies its name for it brought prosperity to the craftsmen. The symbolism of the different sections shows this: the enlarged part of the consecrated model, which each blacksmith keeps on his altar and which is the object of regular rituals, is hollowed out and holds money, millet, and copper. The iron rod which pierces it represents at its lower extremity the tongue of the oldest of the Gwonna, and at its upper extremity that of the youngest, thus recalling the actions and the words of those who discovered the metal for the benefit of all.

Later, blacksmiths manufactured other models of iron axes and hoes, copying those previously used, but reducing their size.

Each day the end piece of the wooden hoes was abandoned at the crossroads after they had been used in honor of the local spirit. The worker kept only the handle and carved a new tool for the following day. The handles of hoes and axes were considered to be people because they were impregnated with the vital force of those who held them. The farmer left the cutting edge (of stone or iron) in his field and brought home the handle which he placed on his mat at night.

Weapons and tools were the objects of regular sacrifices. The
[782] handle was removed and the blood of victims would flow first into the hole used to secure it, then on the cutting edge, while the officiating person recited a prayer.

773 Today, the assemblages of ancient tools are called makorobaw ka
564 minew (literally, tools of the great ancestor). Considered as the
326 most respectable and precious /119/ testimony of their civilization,
412 models of each object are kept in sanctuaries called makoroba so
778 (literally, house of the ancestors) which are generally natural caves or holes dug in the ground, reminiscent of primitive habitations. These tools are identified with the ancestors who used them and who were, long before the organization of religious societies, the object of a regular cult. That is why, in deference to this fundamental hierarchy, they are presented to the circumcised in front of the family altars (1) at the time of the initiation of the Komo. Similarly, they

---

1. Particularly in the village of Konodimini in the Ségou region.

773 are removed from the sanctuaries, honored, and replaced before the
564 Komo altars during the agricultural and funerary rituals; to fail to ob-
326 serve this rule would constitute the breaking of a taboo and entail
412 the most serious disorders.
778

In the course of the annual ceremony consecrating the dead, these tools are carried to the cemetery and receive as many victims as do the dead, for they represent the ancestors.

The kotigi brings them to the same place on two other occasions: during the agricultural ceremonies carried on after the growth of the ear of corn and after threshing the harvest. Axes and hoes are presented one by one at the tombs of the dead and then, reunited in the center of the cemetery, each of them is used once to cut a branch or to dig the soil. This ritual gesture recalls the use which the ancestors made of them.

The Forge

326
826 The blacksmith establishes his workshop under a shed, usually located in one of the squares or at the entrance to the village. It is the simplest of its kind and involves a minimum of equipment. The forge represents the craftsman: the furnace his body, the bellows his testicles, the blast pipe his penis, the fire his head. When the red hot metal is beaten with the hammer, a replica of the gosilande, which symbolizes the universe, the sparks are the lightning and thunder bolts.

326
778 The altar of the forge, sometimes situated to the west of the hearth, contains blackened hoe, pickaxe and axe handles, coal (fininkoro, literally, old coal) ashes kneaded with clay (buguri, literally, ashes of the hearth), all of which belonged to former owners, and finally an axe kongobwona called "mother of the altar," a smaller replica of the ancestral axes.

The bulk of the wood which holds the iron hooks and the blade /120/ is hollowed out and forms a kind of storage divided into three compartments.

The upper one contains money so that whatever happens, the blacksmith will have means to live.

In the central compartment are placed copper and iron, metals which the blacksmith works, as well as water, basic element and preferred seat of Faro, master of the word.

326 778 243 The lower compartment contains millet from a field called kongobwona foro, reserved for the needs of the cult of the forge. This land is placed under the guardianship of the patriarch belonging to the Gwonna family, and its upkeep is assured by the community. The seeds are given by each blacksmith to the old man who sows them himself. The work of cultivation and threshing is done communally. The millet is stored in the old man's granary and each blacksmith receives a share. This share is not eaten, but is put aside. From time to time the artisan takes a few seeds which he places as an offering, on his altar, and which remain for a time in the compartment reserved for them; then they are considered to have been eaten by the axe and are removed and replaced by others. Part of the millet is kept as seed for the following year.

326 778 789 Each compartment is open and the blacksmith may insert his fingers; if his earnings are insufficient, he rubs his body and tongue with the hand which he has just dipped into the pocket containing money; the price, set by the spoken word, will not be questioned by the client. If he goes to work in his field, he places his hand into the millet each morning to draw upon the strength it contains and to improve the results of his agricultural work. If he burns himself while working at the forge, he dips his fingers into the third compartment and cools himself in Faro's water. It is this same water which a young artisan must drink at the beginning of his apprenticeship.

326 778 776 The triangular iron, farabye, which constitutes the axe proper is placed under the power of three spirits belonging to the group of air spirits: Agayru who revealed iron to men; Tengu who taught them Faro's supremacy; and Gullé. The first two are the masters of the bellows and direct the work as a whole; the third does their bidding and teaches men the technology of ironwork (1). When the owner of the altar dies, the /121/ axe is removed and placed in the village sanctuary where the ancestral tools are kept. But the remaining objects are inherited by the son. [428]

---

1. The spirit would have refused to teach the blacksmiths the working of copper and gold, as these two metals belonged to Faro who reserved for himself the right to use them. Since iron was black he had abandoned its use to the spirits of the air.

326 778 . In addition, in each blacksmith's home, a replica of the *kongobwona* axe preserved in the common sanctuary, constitutes the family altar, passed on from father to son, on which the interested party offers to his ancestors regular or occasional sacrifices. Sometimes it also possesses a small iron plate upon which is engraved a drawing representing the creation and in particular the "spirals of the creative spirit at the cardinal angles," the multiplication sign, etc. The angles of this object are drawn up to indicate that the world is lifting itself up, awakening, and constantly reviving.

The forges of the village artisans are generally grouped in a public square, around a large anvil, *kula*, held in a wooden piece forming its base and buried deep in the ground (Pl. IV, b). In front of this communal anvil judicial affairs are settled, such as marriages or broken agreements; before it vows are pronounced and solemn promises are made to the *boli*. It is also here that the purifications for breaking taboos take place.

The blacksmiths are also communal owners of a certain number of ritual objects which are usually kept by the *kotigi* and brought out for religious ceremonies. Among these, the *nege dyun* (literally, mother of iron) (1) is a lump of iron forged in the likeness of the *semẽkala* (see Fig. 9, B), on which the *kotigi* draws small lines. Some of these lines represent the heads of each of the Gwonna blacksmiths; others, well separated from the first, recall the heads of the artisans belonging to other families. The whole symbolizes the total number of blacksmiths in the village. The *nege dẽ* (literally, son of iron) is a ritual bell also decorated with lines representing members of the blacksmith families.

After it has been made, the *nege dyun* is placed in the sanctuary of ancestral tools. It remains there two or three months in order to become saturated with the strength of the ancestors and from time to time receives the blood of sacrifices performed at night. It is after this period that it is placed with the *nege dẽ* in the *kotigi*'s home.

Each artisan offers individual sacrifices on the *kongobwona* axe kept in his home as well as on the objects /122/ contained in the altar of his forge; at the same time his tools receive libations of boiled millet mash.

1. Dyun means "mother" in archaic language.

326 778 796 In addition, each year the blacksmiths join together and offer a sacrifice on the communal anvil. All tools are placed around it, overflowed with the blood of the victims.

An annual ceremony which also brings the craftsmen together has the purpose of asking Faro to help in the cooling of the wrought iron and to give the water into which the iron is dipped the strength to fulfill its function. Assembled before the kotigi's forge, they bring a certain number of tomatoes which are first presented to the altar, then to the ancestral axe farakum on which each one in turn licks with his tongue.

Keeping their mouths closed so as not to let the strength thus gathered escape, they all walk toward the river, while one of the
[534 participants strikes up, on the ritual bell (nege dẽ) with a lump of
533] (nege dyun), the rhythm called klide fo (literally, rhythm of the sons of the testicles) (1) addressed to the one-arm blacksmith, the bolokuruni, Faro's companion. Once on the bank, the kotigi undresses and throws himself into the water. When re reappears on the surface, all the participants open their hands the better to seize the strength of Faro and his companion, which the man is supposed to bring back. They rush to help him dress and the one who succeeds in touching him believes he receives Faro's special favors.

The tomatoes are then squashed into a gourd and the pulp is thrown into the river at a deep spot where each participant draws water and drinks to communicate with Faro. The group then returns, bringing back in the gourd a little water into which each one dips his individual axe, starting with the patriarch who, at the end of the ceremony, drinks up the rest.

326 778 842 If a woman is sterile, she asks the help of the three spirits protecting the forge as they have the reputation of being very prolific. Without her presence, the blacksmith crouches before the altar with his hands spread out, his head lowered, and prays. The woman must then swear to respect scrupulously the taboo of the invoked spirits, which is to pronounce their name. She may also ask the blacksmith to implore the help of the ritual ashes of the altar.

[522] 1. Kli dẽ, "son of the testicle," is one of the ritual jokes addressed to the blacksmiths by their senãnku.

326 784 Taboos Provided with vital force and a soul, ni, the forge, a living being, is surrounded by taboos aimed at protecting its material and spiritual integrity.

These taboos, numbering seven, are peculiar to the forge and to the altars which it contains; they concern not only the /123/ blacksmiths, but also his clients, the passers-by, whatever sex they may belong.

[252] 1. None may cook meat on the fire of the forge; it would be equivalent to "eating the meat of the Soba spirits." To break this rule deprives the fire of its strength and causes the abdomen of the person breaking the taboo to swell (1).

1. It is said of the culprit: soko dyeni bala, fa ta sababu yala: "he is full of meat cooked on the fire of the forge."

2. No insult may be uttered near the forge, particularly if it is of a sexual nature (2). This would be equivalent to insulting the fire; the flame would waver and, despite the bellows, no heat would rise from the hearth.

2. Neni teke fã nda la: "Insults are not to be spoken at the door of the forge."

[201] 3. The sole of the foot and the palm of the hand are never presented to the fire, for the forge is alive and just as these same gestures made towards another human being would bring about physical disorders, so the various parts of the forge are vulnerable and may break (the hammer or anvil) or tear (the membrane of the bellows) (3).

3. Se ndege tere te jira fa na: "The tere of the sole of the foot must not be presented to the forge."

4. Any quarrel or misunderstanding disturbs the forge, upsets it, and harms the work (4).

4. Dadyuguya, filibatya, kunasirinlenya, konodyuguya te kẹ fã nda la: "Meanness,

326
784 hypocrisy, humiliation, and cheating are not done at the door of the forge."

5. Envy, jealousy, and ill humor are generally bad for the blacksmith who loses his "turn of the hand." He must "have a pure heart" (1).

1. Numu te keleya note i bolo na tye: "The blacksmith must not be jealous, otherwise his hand is spoiled."

6. A mirror must never be brought near the forge; it would take hold of its soul which resides in the axe at the altar (2).

2. Dugalle te gere fã na a kanana; ka fã ni tà: "The mirror must not be brought near the forge; it will take the soul from the forge."

[834] 7. Sexual relations near the forge prevent its functioning (3).

3. Noa te gere fa nda la: "No obscene action may take place near the door of the forge."

Breaking the taboos of the forge is equivalent to attacking the virility of the blacksmith, for the bellows are his testicles. Thus the artisans present themselves naked before the culprit to shame him; he is seated on the communal anvil and water in which large [783] millet (keninge) has been soaking is poured over his head to purify the instrument (4).

4. If the fault is irreparable, the kneeling chief crushes three grains of large millet (keninge) on the anvil, a gesture which symbolizes the death of the culprit whose name he pronounces at the same time.

326 /124/ The affected owner then proceeds to reconstruct his forge.
183 Having taken a piece of charcoal, a piece of iron, a piece of leather, and his tools, he goes to the kotigi to ask him to perform the necessary purifications. In the presence of the parents gathered around the forge and in front of the culprit, the kotigi officiating alone, crushes the iron, leather, and charcoal, and then goes to fetch the kongobwona axe kept in the sanctuary of ancestral tools. He places all this before the altar facing the east, and recites the following prayer over a gourd filled with water, which he holds in his hands:

"You forge, ancient thing, you belong to us, to us Gwonna; so and so has broken his taboo, I am his senãnku and am apologizing to you for this deed. I have said: forge; I have said: blacksmith of Gwondougou" (1).

1. E fã, fẽ koro, e ye an gwonna ta ye;
kari macina ye tnę tyẽ, ne ye senãnku ye,
nye delili kę a ko la; ngo fã; ngo
gwondugu numu.

The axe is then washed in water to which has been added some earth taken out of the hut. Next, the officiator completely demolishes the tainted forge and rebuilds it with the mud thus obtained while one of the Gwonna witnesses keeps a little of this earth in a piece of cloth as a testimony to the reconstruction.

The blacksmith slits the throats of two roosters over the new forge while the ingredients groundup by the kotigi are placed on the altar. The following day, accompanied by his parents, he goes to ask the chief of the Komo to proceed with the purification. The members of the society meet at his home and the masker whistles into the forge to chase away ultimately the miasmas provoked by the breaking of the taboo. The fowls brought by the participants are sacrificed on the forge and all join in drinking beer offered by the interested party. The following day, the chief of the Komo calls for the latter's wives. Each in her turn, they place their heads on the anvil, an act which chases away the nyama which they have been concealing since the offense was committed, and then leave on it, cowrie shells and kola nuts, as an offering.

Pottery

323 773 The ancient Bambara did not know about pottery. At the time they lived in caverns, they let their meat dry in the sun on the rocks. Next, they manufactured receptacles by hollowing out stones, of which certain unused millstones /125/ seen today are copies. When they had invented fire, they cooked meat by spitting it with skewers of green *sunzun* wood and by exposing it to flames and live coals.

Later, they shaped and dried vessels of coarse clay, imitating the hollowed-out stones. One of these vessels, which was exposed to the fire in order to cook the food it contained, was observed to have changed color, hardened, and become more resistant. In this way they developed the technology of making pottery at a time when they still had only wooden tools.

323 326 778 575 Since this technology is related to the invention of fire, the wives of the blacksmiths were the first to practice it.(1). Today they form a society (*tõ*) in each village and own many altars entrusted to the care of the head of the society.

The principal altar, the *ɗyo kala,* which represents the thumb of the potters, is made of wood carved in the shape of a thumb and engraved with symbolic lines. To learn her trade, each initiate is lightly touched on the head with it. The head of the society spills her blood over it in the case of a broken taboo affecting the society. But its principal function is to be the receptacle for the spiritual forces of the group: upon a member's death, this object, placed upon the corpse, gathers up the soul which escapes from the body.

[252] In certain villages, the pots with holes, *ñintin,* used for cooking couscous, are placed near the village upon the pile of ashes from the great hearth where the pots are fired (see Pl. IV, a); they also serve as altars at the time when the potters are consecrated.

323 561 575 Since her childhood the potter, following the example of her seniors, practices kneading and shaping little pots, *bokofani* (literally, little clay pots). After excision at the required age, she joins

1. The different techniques of pottery making were supposedly revealed to the village of Gwondougou (see p. 155) by the Soba spirits of the crossroads.

575
323 the society during a public consecration which she receives with
[561] several others, the group forming an age grade.

After an apprenticeship of seven days, the potters decide upon the date of the ceremony which is celebrated at the firing spot near the altars. Each member provides a hairpin (bandigi), which represents her on this occasion, and the skin of a hedgehog. Disrobed in front of the assembled villages, each girl is seated in turn on the altar as an aged woman examines her genitals to verify her virginity and the proper execution of the excision.

/126/ If the young girl is no longer a virgin, she is publicly de-
[831] clared dangade (literally, bastard) and finds herself automatically excluded from the society; she will never be able to receive the potter's title. Otherwise, a proclamation is made immediately to the great joy of the public. If the excision has not been judged
[304] sufficient, the patient is given the title of potter after having submitted to a new operation performed in such a way that the blood runs over the pottery (1).

575 An old woman then appears seated before members of the age grade
323 and instructs them. She tells of the origin and history of pottery,
867 apprising them of the difficulties of the craft such as fatigue, burns, etc. She teaches them patience towards the client and enumerates the rules which will have to be observed during their lifetime: to be pure in heart and to hate no one; not to undertake work shortly after having had sexual relations; to work in silence; to respect all taboos in general.

575 She then makes a libation of karite oil on the altar and rubs it on
323 the bodies of the initiates who must run their tongues over the pottery,
782 thus making an oath. Sheep, brought by the initiates' parents, are
431 then killed by having their throat cut over the hearth in the name of the potters while the elders of the society present to the initiates gifts consisting of several pots which they will sell for profit while waiting for their first work. This gift is moreover a sign of adoption.

323 The utensils are made with clay, mbogo pasa, taken from the
317 bottom of the watercourse or along the river's edge; they belong to
784

1. If excision is not possible, the operation takes the form of a wound inflicted with the hedgehog's skin (see p. 243).

323 Faro. These places have as taboos the wearing of indigo and pregnancy.
317 No pregnant woman may approach them without provoking the death
784 of the child she is carrying, thus ultimately impairing the durability
of pottery and seriously harming the society of which she is a member.

An annual sacrifice is offered by the potters at the end of the winter
323 season when, the level of the river having dropped and the banks
796 lowered, they return for the first time to collect the clay which they
need. Dressed in white, they bring out their hoes and the sickle with which they cut the damp grasses used to cover the pots on the hearth during firing, while the head of the society carries the altars. The objects are placed in a pile on a bed of nyama fibers used for separating them from the ground. The throats of two red roosters are cut open over this pile while a prayer is addressed to Faro, requesting authorization to take the /127/ mbogo pasa during the year, and seeking his protection and help for the work of the society's membership.

The potters make an annual offering to their altars on the day their husbands sacrifice on the forges. Immediately after the libations, they come and squat before the forge altar on which they throw some ten cowrie shells. They then go to the ñintin, undress, and present to it their genitals from the front and from the back, this gesture being an indication of their submission to the spirits of pottery which are the same as those of the forge. Still naked, they circle the pile of ashes left from the last firing and light a big bonfire; this fire attracts the bee eaters, tatugu kononi, which circle over the flames. They shoot some down with a sling, cook them, and reduce them to ashes which they mix with karite oil; they rub their bodies with this mixture before purifying themselves by going through the flames. As an offering to the spirits, they then throw pots on the fire which they put out before returning home.

323 The potters cultivate together a small ritual field in which a fe-
244 male twin sows white peas, tikaninkuru, symbols of their right hand.
The produce of this harvest is eaten communally on a mound, walawala, after an offering of several seeds is made to the altars and tools. A potter whose tools are broken by the fire must go through a purification with the products of this field.

326 The wives of blacksmiths, whether or not they are potters, are
304 skilled in practicing excision on young girls.

/128/ Chapter 6

THE CULTS

794 The purpose of the Bambara cults, whether they are of individuals, families, or villages, is to promote the functioning of the universe in an orderly way, which includes the preservation and conservation of individuals and the whole community in their spiritual or material forms.

The following chapter is not exhaustive. We have described a certain number of cults selected from the most representative. Under their apparently diverse aspects, shown in their purposes as well as in their modes, all are integrated into the system of Bambara thought.

I. Individual and Family Cults

778
794 Over individual altars sheltered within the family enclosure or preserved in the private room (*česo*) of their owner, the rituals of "maintaining self" are practiced. They assure the stability of physical (*čuafebla*, *čuafebyeni*) and social (*dyamana tigi ǰigi*) forces; they afford protection outside dangers (*mbe ndyugu kà*); they are the temporary containers of souls at the time of death (*kere la boli ni*).

Since man must, in many circumstances of his life, remedy any depletion of his strength, these altars represent repositories, relays, in which at least certain elements of his being are integrated. They permit him to regroup or revitalize his physical or psychical forces for his own well-being as well as for that of the community.

A. The *česo*

In the homes the movable altars are kept in a room called *česo* (literally, house of man), which is reserved for the /129/ owner and which contains, besides his weapons and agricultural implements, family altars, either collective or individual (1) depending upon

---

1. The following description is that of the house of Tètè, an important citizen of Banankoroni.

778 whether he is head of a family, head of a religious society, or a
794 bachelor.

These objects are hung from the ceiling or hidden away in corners from the looks of people and the risks of impurity. The walls of the room, daubed up to a third of their height /130/ with black earth,

[532]

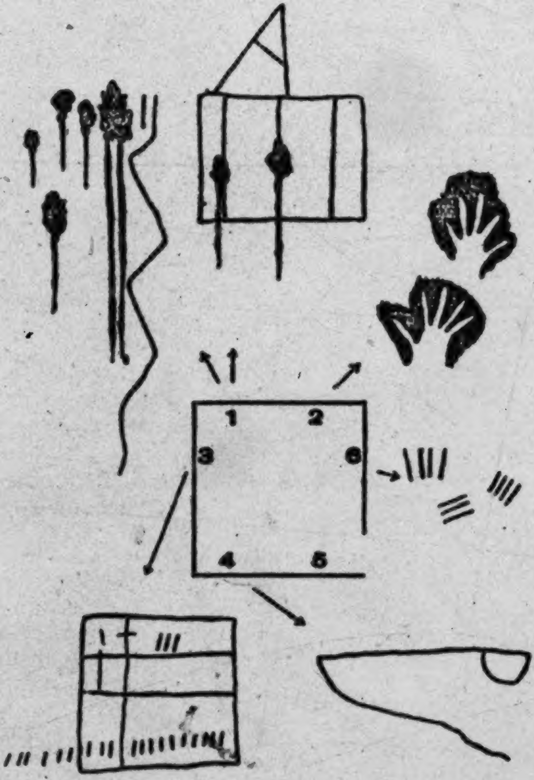

Fig. 10 — Diagram of the česo of Tètè, important citizen of Banankoroni and reproduction of the drawings on the walls: 1. The ancestors and their home. 2. The hands of the living. 3. The sky, space, the earth, and the 22 categories. 4. The Komo's whip. 5. A red stain. 6. The owner (three) and his two wives (four and four).

symbolizing Faro's presence and protection, are covered with paintings and drawings.

778 On one of the walls, small lines representing the ancestors and a
794 broken line representing the human person are drawn with millet mash;
on another, engraved with a sharp point, is a schematic geometrical
532 figure of the ancestral home; it is accompanied by the silhouettes of
two hands (see Fig. 10, 1 and 2), the hands of the living, "crossed
and reaching out to the world of the dead." The left hand, symbol
[826] of disorder, incertitude, and the variations of human conscience,
is placed below to the right of the other to recall man's obligation
towards his right hand, symbol of order, righteousness, fidelity, and
work (1). Thus arranged, the hands express complete submission of
the living to the ancestors.

Farther away are drawn the divisions of the universe (Fig. 10, 3) with the help of a square divided into three compartments symbolizing from top to bottom: the sky and water, the air, the earth.

In the upper square to the left, a line represents Faro in all his power, sole master of sky, water, and life. A horizontal line recalls his domination over the world. The lines that follow are his children. The total indicates the feminine form of the spirit.

All individual or family sacrifices offered to Faro are performed over his sign which the officiator rubs with copper and crushed tomatoes in order "to thank the spirit who protects his dya, and to pray to the spirit to give his wife children."

The central rectangle is the domain of Téliko: air and wind. The small line which vertically bisects the square on the left represents the spirit attempting to penetrate into Faro's plan to vanquish him. His defeat is indicated by the fact that the major portion of the line is situated in Téliko's domain, since the latter violated only temporarily the boundaries of his adversary.

The lower rectangle outlines the earth, seat of the Soba spirits. The row of 22 short lines which covers it recalls the 22 elements of creation, "the 22 things indispensable to man in this world."

On another wall, fire is indicated by two whips: that of Faro, lightning, and that of Komo, the law. They also recall "the power

1. In making this drawing the following words are repeated: "I place my right hand on the wall night and day," *neben kinin bolo da koko la ǯu ni kle*.

778 of the initiates' word" and are exposed to fire to increase this power
794 (Fig. 10, 4). Beside them, /131/ a large red stain, *dyoli ǰikin*,
painted in ochre, states that man is the sacrificer, that the cult has
532 immolation as its basis. Of such a man it is said that: "he reckons
with the proof of the blood (1)" (Fig. 10, 5).

1. *Dyoli tamaše mine ba*.

Above the bed which consists of a simple mat placed on the ground, three engraved lines symbolize the man and two four lines the two women who alternately share his bed (Fig. 10, 6).

778 In certain villages, the drawings are made by an instrument called
794 *ngwoni*, used during the rituals of the year's "renewal" (2).

532
413

2. Particularly at Banankoroni.

The point of baobab wood, which is used for engraving, is as slim as a slat and fits on to a kind of racket made of *sunzun* wood which holds a net of *da* fibers. The hide of a male goat, called *soni wolo ni* (literally, soul of the skin of sacrifice), and two handles of *ngolobe* wood (3) complete the assemblage. The net, made of sixteen cotton

3. *Combretum michrantum*.

threads dyed with red ochre, kolo, is called *ngwoni kene ba* (literally, great space of the *ngwoni*) and represents Faro.

778 Before being used, the instrument is washed with water which will
794 be used later to cook the food for the family. Next, tomatoes are
pressed on the net and the juice runs into the hide which forms a
532 pocket; holding the point in the right hand and the handle in the left,
one then makes the drawings on the wall of the *česo*. The seeds of the fruit remain in the pouch until the following year to serve as a testimony to the offering. Next, with a red hot knife the following lines are engraved on the object: four lines, representing Faro, and two 16 lines, multiples of four, the female symbol. After each cut, "a rag saturated with fresh water is placed on it to soothe the pain." The frame is saturated with kola nut extract and four dots, the womb of women, are also marked with a black stone, *kolofin*. An egg is then smashed on the object to "refresh the soul of the ensemble."

B. The Altars

778 794 Each family head wears a small altar called kere la boli ni (literally, little side altar), which maintains relations with the souls of the members of the family for which he is, in part, responsible. /132/ In case of illness he offers sacrifices on this boli for the recovery of the patient. In case of death, he keeps the soul in it temporarily before carrying it to the collective altar of the Komo (1). He also sacrifices on this altar at the time of sowing.

[763] If the family head is himself very ill, the altar is placed on his head in an effort to replace the soul which is escaping with that which the altar contains. [764] If he dies, it is placed on his chest to take in the soul which is then transported to the sanctuary of the Komo. At the end of seven days, the object is given to the deceased's eldest son who, upon becoming family head, sacrifices two goats to the Komo on this occasion.

The Čuafebla (literally, worn at the hip) is made by a father for his son when the latter attains maturity and is on the point of leading a man's life, farming his own field and founding a family.

If there is no Komo in the village, the father may make it earlier, right after the name-giving ceremony.

The altar is made of hyena tails, scorpion tails, and whole peppers tied with a little stick; it represents the owner's flesh and blood.

It receives an annual sacrifice at the time of sowing after the collective offering tothe Komo. This takes place in the family courtyard in the presence of all the members of the family (2). Moreover,

---

1. The society, the altars, and the role of the Komo are described on pages ff.

778 794 773 241 2. The cult rendered on this altar brings the intervention of the Sago spirit whose agricultural role is still obscure at the present stage of the inquiry. He taught men how to water their fields.

"Two birds konodyanfi began to circle and sing above the workers in the fields;

> 778 194 173 241 the latter abandoned their hoes in order to watch them. The birds fetched water with their beaks on the shore of a neighboring pond and returned to pour it at the foot of a millet stalk, the ear of which was not yet formed. The men put a mark on this stalk in order to recognize it and later observed that it produced a finer ear than the others. Imitating the bird, they dampened their plantings and watered their fields; their harvest was considerably improved by it. They kept up this habit and, in acknowledgment, produced a cult to the Sago spirit whose emissaries the birds were and who comes to slake his thirst at the Čuafebla."

778 194 it is the object of sacrifices when important business is being handled: marriage, private or administrative action, fight against an epidemic.

[428] A son may inherit his father's altar and keep it with his own which he wears tied to his hip.

The Čuafebyɛni (literally, little horn at the hip) is composed of a cowrie, taken from Faro's granary, copper which is the altar's soul /133/ (ni), pepper, charcoal, and honey. This mixture is introduced into a ram's horn decorated with cowries at its opening and often wrapped in a red cloth bearing the same ornamentation.

[782] The altar is consecrated on those of the Komo, over which it is passed seven times. The throats of victims are cut, their blood is collected in a gourd, and the boli dipped into it three times before being taken out in the sun to dry.

Its role is one of protection. Its owner carries it during the Komo ceremonies to defend himself against spells, korti, which may be cast by someone in the audience.

It also maintains the integrity of its owner's forces. If the latter faints or goes into a trance, he is returned to his normal state by completely renewing the ingredients which constitute it. When the horn is emptied of its contents, "both the soul of the altar and that of the man" are removed. The container is rinsed out with water from the

778 Niger after which the reconstitution of the altar is carried on and is
794 equivalent to "the taking on a new soul." Each family member comes
to the aid of the party concerned: the father gives copper, the women, peppers, the children, charcoal; a new cowrie is removed from Faro's granary.

778 The mbendyugukã (literally, I am on the enemy) is an individual
794 altar which permits its owner to overcome his adversaries and even to
154 attack their life.

The person who wishes to own one makes it after the death of an enemy. He goes secretly to unearth the corpse, shaves off its hair, cuts off its tongue and nails, and removes the eyes.

An elderly owner of such an altar takes it with him to the person who wishes to make one. The latter prepares and mixes the ingredients according to a special ritual and ties them to a hyena's tail. Before a witness who belongs to his age grade, the elder rubs the new altar on the old one seven times while reciting a prayer to consecrate it; he then returns it to its owner (1).

1. Because of its evil powers, the altar may not be made and entrusted to its owner except in the presence of a known witness.

The symbolism of the various parts composing it explain the use to which this altar will later be put. The tongue of the dead man contains his voice and gives to that of the owner the strength to convince those who contradict him in arguments as well as in council meetings. The eyes of the dead man permit him to see what others may not see, or even to blind his enemies by poisoning them with his nails. The hair, evidence of the other parts /134/ of the corpse, contains the nyama of the deceased and is an essential part of the mbendyugukã.

The owner of this altar, which excludes the number four, marries
[595] only three wives. Moreover, he cannot mix his own hair with that
of another without risking death.

Because of its aggressive character, the mbendyugukã demands
[782] victims, dogs or roosters, of red coloring. It gives to whomever owns
it a strength which will always be greater than that of his competitors in whatever he may undertake.

778 794 754 For this reason it receives sacrifices at the time when the fields are being worked, for trade, marriage, war, and hunting where the person risks his life; it helps to fight illness and death. Immediately after the first sacrifice, it captures the personality and aggressiveness of the dead man and puts them on its owner, making him doubly dangerous to those with whom he is in conflict. But on the other hand, the danger may turn against him and, to a greater extent than anyone else, he risks his life at the slightest broken taboo.

Furthermore, the Komo who disapproves of such operations may, if he considers it useful, loosen the dead man's nyama on the person who is using his spiritual forces and put him in danger of death. Thus a Bambara will hesitate a long time before owning such an altar; in fact very few individuals assume this heavy responsibility.

C. The Chief's Seat

778 622 In the courtyard of the home of a family head or village chief can be found a pile of wood stuck on the ground and called dyamana tigi ǰigi (literally, support of the owner of the world) (Fig. 11). This seat symbolizes at once the chief, his power, his social and religious role of supporting the group (1).

1. The seat described below was observed at Banankoroni in the courtyard of the village chief. A similar one is found at Soroba.

The pieces of bent wood which compose it are planted rather deep into the earth above a series of objects. One of these pieces, with a simple bend (in a) is called sinzin, support; the two others, shaped like a T, are called ǰigi ba ǰigi (in b) (literally, support of the big support).

762 766 The whole lies over the body of an albino (c) buried in a tomb having a ritual form, covered with ancient clothing dyed in wolo and speckled with small black spots made of /135/ bone ash (kolofin), which represent at the same time the embryo in the womb of women and Faro. The head is covered with the cap of primitive men (e).

In (d), three pickets, symbols of man, are stuck through the skin of the albino's forehead; this skin had been removed and seven ritual

622 178 scars symbolizing the person (three and four) are made on it. At the moment the skin is buried under the seat, the following prayer is recited:

"I have sworn in your names by striking on the siriku of Yamba by (burying) the skin from the right and left sides of the forehead; the skin from the forehead (seven times)" (1).

1. Tena wolo fla kini ani numa yamba

[532]

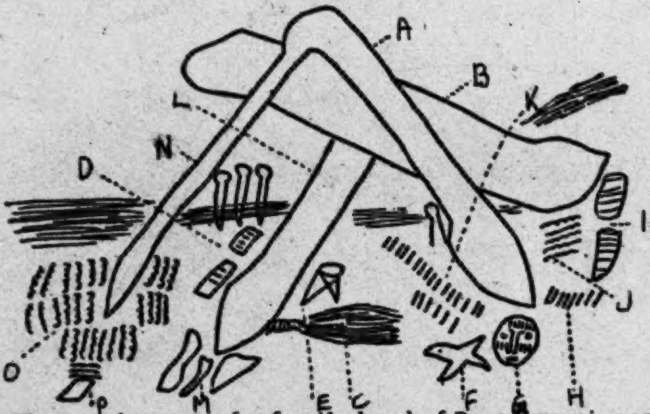

Fig. 11 — The wooden seat of a family head of Banankoroni, representing his joints. It is inserted into the ground in the courtyard above the bones of an albino, those of a child, and various symbolic objects. (Drawing by an informant.)

ka siriku nye di ka fo ani aw čua ye kena, tena wolo.

The prayer recalls here the acts of the fourth ancestor Yamba, who inaugurated the sacrifices of albinos to Faro, and his role as a chief beginning with this mythical period (see p. 46), a role which the present chief must fulfill with the same righteousness. The siriku is a small protective altar usually made from a hyena tail.

In (m) are placed the three principal bones of the albino; the two femurs and the right humerus, "so that the chief may have white

622 118 bones, " that is to say, that he may live to be so old that his bones will be visible through his skin which is transparent.

In (n) the bent part of the wood, called kuntigi tigiya jigi (literally, /136/ support of the chief's deed), is planted over the hair of the previously shaved albino (in o) from which it takes its strength.

[801] In (k), twenty-two small sticks are the symbol of the number 22, representing "the ensemble of words received by the ancestor Koumabana who was never caught unawares by anyone. " In depositing these sticks, the officiator expresses the wish that the chief may become unbeatable like the ancestor.

[801] In (h), eight small sticks of zekene wood (1) represent the eight ancestors; they signify that man must be, like Koumabana, master of words and that he must be "true to his word."

In (f), the bird tatugu kononi, master of fire, is buried. The prayer recited states that it must be able to penetrate into the earth and come out freely, for since mythical times it has played a decisive role in combats (2).

In (g) is buried the head of the first child to die in the chief's family, in order to recall the loss suffered and to avoid its recurrence. On the skull are marked the signs of the person: two times 3 and 7, or two times 4 and 7, depending upon the sex of the deceased. In (j) the hair is buried, a testimony to the misfortune and the loss which should be compensated for. In (e) is placed the skin of the forehead, divided into two pieces; the piece on the right signifies that Faro is free to give the child for as long as he chooses; on the piece on the left are engraved the eight signs of the word, recalling that Faro, master of the word, is also master of the destiny of the deceased, whose number has been reckoned among the dead. In (p) a small

---

[824] 1. Balanites aegyptica. This bush, according to popular belief, grows over the tomb of a man who died "with rancor and bitterness, as did Koumabana."

2. See p. 155. The chief, who is sometimes obligated to declare war, must be able to win it.

622 778 of polished stone called *fara yele*, "stone that rejoices, " expresses the wish that the chief's rule prosper.

The seat, taken as a whole, represents the chief's skeleton and his joints. It is erected upon various elements which sum up his ties to the ancestors and the supernatural powers, indicating his responsibility and contributing to the maintenance of his strength. It is situated in such a way that all the events in the courtyard take place around it. and that nothing which is said is out of earshot. As a center of the family household, as the symbol of the industrious and responsible man, it is the framework of the community which it upholds, just as the chief does through his physical endurance and moral firmness. The whole village "leans upon the chief's joint."

Each morning and evening, the *ǰigi ba ǰigi* and the *ba ǰigi* /137/ are greeted so that the chief may be strong, that his family may increase, that he may foster the ancestral beliefs. Offerings and [782] libations are made upon the seat and upon the body of the chief when his authority is questioned. In (b) tomato juice is being poured; in (a), representing the elbow or the knee, the water which has been used for ritual bathing of these same joints; at the foot, in (n), the fowls' throats are cut while the officiator, before pouring down the blood of the sacrifice, blows into a small hole dug in the ground; finally, in (l) the water which was used to wash the chief's whole body is poured in.

[826] In this way the chief's joints, which are the seat of his strength and his procreative seed, are purified and fortified.

II. Village Cults

794 The village, as a physical entity, and its inhabitants are placed under the protection of the supernatural powers and of the ancestors. Faro is directly invoked at all water spots.

If the village is situated at the river's edge, the rituals are addressed to the Faro *tyin*. If it is not too far from the bank, the inhabitants go out to make their offerings to the spirit. Frequently, the stream, pond, or natural well, which often determined the site chosen by the founders, is though to be inhabited by an incarnation of Faro whose name is revered and to whom all offer a cult.

On the other hand, each village is placed under the protection of the *dasiri*, a special spirit delegated by Faro.

794 The ancestors are worshipped in various places: at the doors and
thresholds of houses, at the cemetery, and at stone altars placed at
769 the intersections of lanes and in public squares. These positive cults,
778 which are aimed at the acquisition of beneficial forces, have as a
counterpart, cults in which the villagers rid themselves of all their
unlucky and infectious elements; these take place, in particular, at
the corssroads, dangu, which are placed under the guardianship of the
earth Soba spirits.

It would be impossible to treat all of the cults of the Bambara villages. Among these, three have caught our attention; they concern the dasiri, the dangu, and the ancestral altar stones.

A. The dasiri

794 The word dasiri (literally, which binds the mouth) designates the
776 invisible spirit, Faro's representative entrusted with watching over
778 /138/ the village, as well as the seat of this spirit and, sometimes
too, the animal which accompanies it or symbolizes it.

The spirit haunts a rock, a thicket, or a tree situated near the village; the approaches to this spot are reserved for the elder in charge of the ritual (1).

[824] 1. In Massala and Soroba it is a baobab tree; in Sama, a tamarind tree, etc. See the observations on the dasiri collected by Ch. Monteil, Monographie de Djenné /Monograph of Djenne/, pp. 137-138; L. Tauxier. La Religion Bambara, pp. 195-208.

[187
361] Generally the place is pointed out by the geomancer at the time the village is founded, or else determined by an event which occurred at that time. It is after this operation that the buildings are erected to the west of the chosen spot.

If the dasiri is a tree, no one may burn or cut its branches. In
[802] many cases it cannot be approached by anyone dressed in black or
indigo, colors which represent obscurity. No Peul may sit in its
[563] shade (2). Any infraction of these taboos brings about the death of

---

2. The reasons for the taboo concerning the Peul have not yet been ascertained.

794 In some villages, the sacrificer never
776 consumes butter or milk, foods which
778 the Peul furnish the Bambara.

[563] the culprit and deprives the villagers of their protector.

The spirit of the dasiri sometimes has as its compansion an animal
794 which seems to represent the group's ancestor. At Ségou, it is a
776 crocodile; at Ouélenguena, a she-ass; at Koulikoro, a monkey; in
825 other places it is a male goat which is replaced when it dies. At
Konodimini there are a series of deep intercommunicating wells
which would have served as homes for the ancestors. These holes are
at present occupied by hyenas which are considered to be incarnations
of the blacksmiths of former times and which are the dasiri of the
place.

The dasiri's animal is free to enter homes and to eat what it finds.
It is often fed by the inhabitants. No one may attack it and whoever
breaks this taboo, set on by a vengeful nyama of which he cannot
[582 rid himself, risks being forbidden to marry, even being no longer
626] tolerated in his native village (1).

1. This was, at Soroba, the case of Dji Diara, who, after killing a hyena, could not marry as no woman was willing to link her destiny to his.

As its name indicates, the function of the dasiri is to maintain
794 the stability and integrity of the village. It is the "support of the
776 inhabitants' lives"; the numerous rituals (individual or collective),
782 of which it is the object, reveal the importance of its role as well
as the diversity of the beings invoked. To Faro are addressed prayers
for rain; to the ancestors prayers for questions /139/ concerning the
family; and to the spirit of the tree when it is a matter of stopping an
epidemic. But directly or indirectly, any sacrifice offered to the
dasiri is offered to Faro. The victims (sheep or fowl) and the offerings
(cotton bands, kola nuts) are always white (see Pl. 3, b).

When children reach the age of six or seven, they are led to the
794 tree; they sit on its roots upon which kola nut juice is spat, and are,
778 by this fact, introduced into the village cult. They are then presented
852 to all the allies senãnku and especially to the blacksmiths with whom
they proceed to joke.

794 776 782 Each year a sacrifice bringing together all the inhabitants is offered to the dasiri and is terminated by communal eating of the sacrificial victim. The first fruits of the harvest are also brought to it by the sacrificer.

B. The dangu

776 778 823 783 The crossroads dangu or danku (literally, boundary of the head) are inhabited by the Soba spirits who, under Faro, constantly intervene in human affairs. Everything placed at this spot belongs to them, and no one passes by without leaving an offering or a token of his presence: a tool, raw cotton, seeds, cloth. A travelling stranger kneels and deposits a little ash or some cotton; if not, he cleans off a little space on which he spits before leaving. A child passing by will greet it with these words: "Crossroads, my soul is in your hands." On the occasion of any event concerning the individual, the family, or the community, red kola nuts are placed at the crossroads and the following words uttered: "You, crossroads, I entrust my head to you; you are my support; I say, you, crossroads" (1).

1. E dangu m be ni ku kalifa, do i la
ni jigi be fe, ngo e dangu.

The corsroad, as an ideal public thoroughfare, is the chosen spot where one easily rids oneself of the nyama which any individual keeps and carries about with him. All that is impure, unlucky, and undesirable for the individual or the community is left at the crossroads. Objects which have belonged to dead people are also left there. The forces which are thus gotten rid of are supposedly absorbed by the spirits for whom they constitute a kind of nourishment which will then be returned to men in the form of gifts free of any taint. (2)

2. See p, 258.

/140/ Several examples will illustrate the role played by the crossroads in the community:

Any man who has wounded an animal or squashed an insect is affected in his own tere by that of the victim. He goes to the crossroads, kneels, and prays, depositing at the same time a band of cotton, an egg, and ashes. The band of woven cotton, symbol of

776 the word, is offered as clothing, and the eggs are offered as purification.
778 As for the ashes, it is the ideal pure element since fire has "removed"
823 its tere from the wood; here it represents the man from whom "the bad
783 force acting on his tere has been removed" (1). Whoever murders an animal proceeds in the samw way with the animal's hide upon which he throws cowrie shells. In both cases, the spirits absorb the tere and nyama, which add to their own forces and free the culprit.

Collective purifications are carried out on the dangu when sexual taboos regarding cultivated fields and bush are broken. The impurity
[833] resulting from communication performed outdoors is communicated to all
the land belonging to the village; the trees in the bush will no longer bear fruit; the harvests will deteriorate. Formerly the two lovers
[684] taken by surprise were deprived of their clothing which was burned on
the dangu after they had circled the village three times starting at the left. The culprits were then banished. At present, if the plight of the fields suggests that such an act has been committed, all varieties of cultivated seeds are gathered in a basket which is placed at the crossroads. Then, all the villagers and their domestic animals circle the village three times while sham battles take place between men mounted on horseback. After a sacrifice offered at the dangu, the seeds, thus purified, are sown.

776 Offerings are made to the spirits of the crossroads at the time of
778 sowing to invoke their protection. This ritual is obligatory for whom-
ever sows cotton, since this seed was given to men by these spirits.
823 The farmer places the seeds, sits down facing west, and cries out three
241 times the name of the dangu above the seeds. He leaves three small piles in homage to the spirit along with fibers from the plant, and kills a victim before proceeding to sow his field. When the stalks are up, he cuts some boughs and returns to the place of sacrifice to sweep up the seeds, thus impregnating them with the nyama of the dangu. He then dries them, grinds, sifts, and mixes them with earth picked up on the same spot. In his field, he shouts /141/ the name of the dangu and throws the mixture with all his strength in the direction of the cardinal points, the zenith, and the ground. When the plants are mature he picks the first seven ripe seeds, brings them to the same place, and offers a sacrifice of thanksgiving.

---

1. See pp. 90 ff.

776 It is also at the crossroads that the elders place the child whose
778 legitimacy is in doubt. If the diviner who is then consulted declares
823 that the child is a bastard, he is deprived of the protection of the spirits
848 and is supposedly unable to survive the *nyama* which he has acquired
787 at the place. In this same spot are buried abnormal children, in par-
[766] ticular hydrocephalics who are considered undesirable. The spindle
of a dead woman is placed here along with the broom she habitually
used.

776 But the ritual most characteristic of the crossroads is the one re-
778 sorted to by the village when it is in trouble: the primitive wooden
823 mallet, *gosilande* is planted in the ground; it is then struck with a
183 stalk of millet to chase away evil and to induce new techniques of
reparation to come out of the instrument (1).

C. Stone Altars

778 In the villages, at the intersections of lanes, and in the squares,
211 the founding ancestors are represented by stones under which various
objects are buried (see Pl. V, b).

At Sama, four large stones, encased in a clay platform, symbolize both the cardinal points and the ancestors. They are in touch with the *dasiri* and receive the same offerings. At Banankoroni, the *fara ba* is partly buried. Under its point is an albino skull which represents those of the first ancestors and their bones. Two hoes, one placed near the right ear and the other near the left ear, convey the idea that "the man who cultivates the earth will never hear a humiliating word." Under the chin, another hoe recalls that the villagers who are faithful to agriculture will never know famine. Under the hoe, a *siriku* (2) protects them against those who try to harm them, and brings them "the hyena's luck"; it also means that some of their ancestors were transformed into hyenas in former times. A circumcision knife recalls that all males are circumcised, and all women excised (Fig. 15). Finally, three albino bones and a small pile of copper are a testimony to /142/ Faro's presence and power. Drawings are made on these

---

2. See p. 179, n. 1.

178
211 stones at the time of the collective ceremonies called the years "renewal" (1).

III. The Religious Societies

794 Members of groups formed by families in a broad sense, headed by patriarchs and owning lands which cannot be divided, also belong to other collective groups called *flâ*; these are formed by the age grade of circumcision, excision, or initiation, and grouped around altars which are their own and which possess their special rituals.

These societies are called by the general term *dyo* (2) meaning
794 "to build, "to edify" and also "secret." This term recalls that each individual constitutes an element of the whole group formed by the society.

---

1. See pp. ff.

476 2. It is appropriate to distinguish the religious societies, *dyo*, described in this work, from the mutual aid societies, *tõ*, of apparently secular character. The latter are also very numerous and exist in all the Bambara villages.

These organizations are strongly hierarchical and are placed under the direction of responsible chiefs. Their members perform communal work which concerns the life of the village: felling trees, clearing, cultivation of individual or communal fields, house construction, etc., and participation in marriage ceremonies. The detailed study of the *tõ* whose role is considerable would be indispensable to an understanding of the social and economic organization of this tribe.

The participation of the *tõ* in agricultural work will be described by Mme. de Ganay in *Techniques et rites de l'agriculture* (in press).

194 For male members, the large dyo, the principal aim of which is the preservation of spiritual forces and the maintenance of the person in daily life, are the Komo, the Kworè, the Nama, the Kono, the Nago, and the Nya. Women are grouped around muso dyo, about which little information has been obtained. The uncircumcised belong to the ndomo (or ceble). In addition, members of these societies are divided into groups which may be independent of age grades and which are designated by signs.

The Komo

The word Komo indicates the complex theoretically made up in each village of society members, living and dead, the sanctuary and its altars (boli), the responsible chief, and the mask. It is dominated [176] and protected by the invisible power of Faro and by the presence of a particular spirit to which it is consecrated. The latter haunts a tree located in the thicket where the ceremonies take place. He is /143/ respected for having taught in ancient times the origin and role of the boli and the variations of the cult; he comes to slake his thirst on the blood of victims.

The Komo is as powerful as it is old. The terms trodeni (ni, small) and tro ba (ba, big) are given to it, depending upon how ancient it is. Each Komo has, in addition, a particular name (1). The Komo

1. According to native etymology, komo means "taking (mo) of the pond (ko)." According to L. Tauxier, "Komo in Bambara means bad, mean, difficult" (see the Dictionnaire bambara-français of Mgr. Bazin, p. 308). On the root Ko or Kon see M. Delafosse, "Terminologie religieuse au Soudan /Religious Terminology in the Sudan/" l'Anthropologie, December, 1923, quoted by L. Tauxier. Some observations concerning the composition and functioning of the Komo society have been the object of a chapter of L. Tauxier in the Religion Bambara, pp. 272-310, which quotes works published by Ch. Monteil and the Abbe Henry. See also: Moussa Travélé, "Le Komo ou Koma /The Komo

794 or Koma/," *Outremer*, 1929; H. Labouret, *Les Manding et leur langue*.

794 The Komo society, *komo tyew* (literally, men, people of the Komo) is composed
561 of all circumcised men, with the exception of the *griot* who may under no condition become members, after an initiation performed according to the age grade, the members of which are called *tonyaw*. The hierarchy is rigorously respected: an earlier age grade will always be ahead of the one that follows it in all circumstances of secular or religious life. The Komo recognizes a chief, *komotigi* (literally, master or owner of the Komo) who preferably belongs to the caste of blacksmiths and whose function is hereditary. The son automatically assumes command of the age grade which follows that of his father. Upon the latter's death, he changes his age grade and becomes the head of his father's. In the case where the owner of the Komo dies
[304] young and his eldest son, who is to inherit the office, is not yet circumcised, he is made to undergo the operation in the night following the death, and on the following day is proclaimed chief (1).

1. In *La Religion Bambara*, L. Tauxier points out that in some villages the chief of the Komo exercises his power only during a seven-year term. At the end of seven years an election takes place and the function is not hereditary.

794 Because of the importance of his functions, the chief of the Komo
784 is made to respect a great number of taboos. In particular he may not penetrate into the sanctuary if he has not been chaste during the past twenty-four hours. If the taboo is broken, he must warn the men of his age grade and sacrifice two roosters upon the altars to purify himself. His wife is initiated (for she is apt to see certain ritual
[562] objects generally hidden from women because of her intimacy with the chief), but she is not present at any of the ceremonies to which only the members are /144/ admitted. If she commits adultery she
[837] brings about her husband's exclusion from the society, not only as chief but also as member.

794 The chief is often assisted by two elders belonging to his age grade, whose advice he seeks in all cases concerning the community. In
561 addition, he is always helped by young initiates. If one of these

794 561 distinguishes himself through diligence, obedience, and skill, he may occasionally, if the elders so decide, be promoted to a more advanced age grade than his own and thus find himself on an equal footing with his elders.

794 The responsibilities of the Komo chief are considerable. He is the guardian of the altars which, as we shall later see, contain all the spiritual forces of the society; he is the only one able to manipulate them and is in charge of all the rituals which depend upon them. He 426 manages the patrimony of the group (seeds and money) which is kept in the cowrie or millet granaries, and which he may tap, in case of necessity, in order to make interest loans to members of the society who request them. (1)

But this function, honorary and advantageous from many points of view, involves not only rights but, more important, duties from which the chief cannot be exemated. He must, under no circumstances, abuse his power; he can make no decision without the agreement of the members and may not act, even in the most insignificant case, without advising each and every one of them. Each person is kept up to date as regarding the smallest details concerning the general activity of the Komo and the entire age grade must be informed at the same moment. To break these rules would mean to become exposed to the greatest dangers. Just like the head of the total family whose power is far from being absolute (2), the responsible person

---

1. See S. de Ganay, "Un jardin d'essai et son autel chez les Bambara /A Sample Garden and Its Altar among the Bambara/," Journal de la Société des Africanistes, Vol. 17 (1947), pp. 57-63.

794 614 2. "The Mandingo fa," says Henri Labouret, in Les Manding et leur langue, "appears less free in his acts and decisions than the master of the ancient taisible fraternity. Far from being the tyrannical and strong willed autocrat whom people have frequently taken pleasure in describing, he seems to me, rather, to fulfill therole of a delegated administrator,

794
64

> an enforcement agent, expected to conform to the directives decided upon by the domestic council composed of elders and family heads (pp. 54 and 55). The aim pursued by the chief is to administer wisely a patrimony which will always remain undivided" (p. 57).

794 must exercise his office with strictness, honesty, and thoughtfulness.

A. Creation and Consecration of the Komo

The few villages not possessing a Komo are linked to the Komo in a neighboring village. If a village decides to create /145/ an independent society, it delegates its elders to an important Komo (*tro ba*) whose chief, after the performance of divinatory rites, makes them swear submission to the altars which he will entrust to them after consecrating them; they promise never to drop the cult, never to omit a sacrifice or offering. After the sacs brought by the petitioners have been filled with necessary products (honey, pepper, charcoal, gold, copper, etc.), they are overflowed with the blood of victims provided by those about to take office and then rubbed on the altars of the *tro*. The new Komo becomes the *trodeni* of the one from which it thus receives part of its power. In the course of the night following the consecration and the daytime transfer of the *boli* (1), a member of the society brings to his village a *pembele* similarly consecrated by the donors. This shift at night recalls the period of Pemba's reign preceding the apparition of light and the regular succession of days and nights.

Once back in the village, the society, gathered around the chief, organizes its ritual, chooses its officers, obtains the necessary masks, builds the sanctuary, and places on it the altars upon which blood sacrifices will be performed daily during this first period.

> 1. The *boli*, as indicated on p. 130, are linked to a category including day and sun.

794
778

B. Altars of the Komo

The boli altars occupy a distinguished place in the religious and mythological representations of the society organized around them. On the one hand they are a capsule of the universe because of their composition; on the other they are a capsule of the society as all its members are present in them. In fact, each member has provided a part of the composing elements after having impregnated them with his person by salivating over them while pronouncing his name.

794 778 346 The altars of the Komo are kept in a sanctuary, the komo so (literally, house of the Komo), a medium sized hut built either in the chief's dwelling place, or in the bush at some distance from the village. The approach to this structure which is under Faro's protection is forbidden to the ordinary person. The chief himself never enters alone. It is said that a snake, the soul and guardian of the sanctuary, is born and lives at the top of the hut in the branches which form the roof (Pl. VI, a).

The hut is divided into a number of floors on each of which is placed /146/ an altar. The highest one contains at its center the nimara boli (literally, altar of the souls) which, as its name indicates, is the container of the souls belonging to deceased members of the society and to sacrificed animals (1). It contains, from top to bottom, hair of the dead, copper for the souls of animals, gold for those of men. These various ingredients, placed in a double sac, receive the sacrificial blood which runs between the two layers and soaks them.

794 778 The nimara boli is surrounded by small individual altars which have served to channel the souls of the dying and lead them to the common receptacle (2). These small boli remain in the hut only

[774 782] 1. There is constant preoccupation with preserving all vital elements. The souls of sacrificed animals are the object of the same care as those of humans. Like them, they participate in the resurrection promised to everything which has lived.

2. See p. 175.

194 778 during the seven days following the death and are returned to the heir of the deceased (son or brother); they remain permanently in the sanctuary only if the dead man has no descendants. They are held up by two wooden stakes called *čin ta bere* (literally, sticks which collect inheritance) which keep the souls of the dead and which contain at the top wood dust from Makanta Djigui's canoe and gold at the bottom. These stakes feed the *boli* which they hold and the souls of the dead which they contain, thus demonstrating that the "Komo never abandons anyone and that men without descendants remain with it for ever."

[784] The taboos concerning the *nimara boli* are numerous and strict: it may not be removed from the sanctuary except for funerals (1). No woman must ever see it. No foreign cult could ever conceivably be celebrated in its presence.

On the second floor is located the *ñõ boli* (literally, altar of millet) which contains an invigorating power intended for the society's crops. It is composed of a sac divided into six pockets which contain (from top to bottom) at the left: small millet, fonio, and copper; at the right: large millet, rice and other cereals, and gold. The sac, which opens at the top, receives at the time of agricultural ceremonies (sowing and harvest) the blood of victims offered by members of the millet society, *ñõtõ*. It must always remain damp with sacrificial blood so that the seeds which it contains will always live.

The *ñõ boli* is also tied to two stakes called *ñõ boli kane* (literally, protection of the *ñõ boli*) which contain in a hollowed-out /147/ section some millet and gold; it is tied to the stakes by threads which bring it the forces they contain.

The *ñõ boli* watches over the growth of cereals: germination, formation of the ears, maturation. It is responsible for the "head of millet" (2).

---

1. See p. 247.

2. Each farmer is the owner of an individual *ñõ boli* which is placed in a subordinate position under that of the Komo. In addition, the Komo's *ñõ boli* is in close touch with the *ñõ boli* of the Kworè, a society whose purpose is to obtain

194 the rain necessary for cultivation (see p. 217).
118 The agricultural role of the Komo will be
described by S. de Ganay in Techniques et
rites de l'agriculture.

194 The main taboo of the nõ boli is the loss or waste of food. If even
118 a grain of cereal drops to the ground, or into the fire, the members of
784 the millet society are responsible for picking it up and eating it; otherwise the Komo will punish for the failure to do so and the harvest suffers.

The third floor contains the nyama boli, a repository of the forces
194 (nyama) of individuals who have died a violent death (murder, war,
118 execution). The nyama boli used to contain in former times a stone
726 called gõgoro kurube, considered to be the "mother" of the stones thrown by the warriors' sling. It was removed from the sac in case of war and carried to the battlefield by a twin walking at the head of the troops. On its surface were engraved a series of lines representing the king, the warriors, and their wives. It gathered all the souls of those dead in combat and received their blood as an offering.

194 The nyama boli is, moreover, responsible for the soul of the crops
118 and a repository for the souls of sacrificed animals; it also receives the "nyama of the words" of the members. It shares with the nõ boli the responsibility for the cultivations and confers in this way great power to the society.

The sac contains in its lower part a mixture of coagulated blood and gold, and in its upper part a mixture of charcoal powder, pepper, and honey, which gives power to the nyama with which the sac is loaded. The taboo of the nyama boli is the rapid death of victims
[782] which are sacrificed to it; only slow death confers effective nyama.

Upon the ground of the sanctuary, along with the dance costume of the mask, nya, are placed small altars intended either for sale, or for the creation of the new Komo, or for individual purposes. Animal horns, both byẽ ba (literally, big horn) and byẽ ni (literally, little horn), are also placed there; they contain powder for ritual usage, korti, whose dangerous action takes place during the times the mask is taken out (1).

1. The various mixtures used for the religious practices of the Bambara

794
778
often contain ingredients which have been pulverized: wood dust, charcoal powder, even powder of precious metals. Our investigation has not yet allowed us to clarify the role of this pulverization process. However, its mention by the Bambara and the frequent use of korti indicate the importance attached to this type of preparation.

/148/ Outside the hut, at the height of the nyama boli, a hook holds up the clothes of those who are killed by the Komo. The sanctuary, as well as the clothing of the mask, is daubed with black earth taken on the shore of the river representing Faro, and covered with feathers of the same color. Generally speaking, the metal [823] contained in the Komo altars gives it its strength and life. The most powerful of these is gold, silver comes next, then copper. Since each person gives an offering according to his means, the power of the altar thus depends in a certain measure on the wealth of the members of the society.

[782] Regular sacrifices upon the stakes, the bases of which sometimes contain a little wood from the historic canoe of Makanta Djigui, permit them to "maintain the pressure, the life" in the various altars.

These altars are removed from the sanctuary only upon the occasion of funerals or agricultural rites. When the mask is removed and when there are dances, replicas commonly found in the home of the chief are sometimes used instead.

The pembele is the protector of the society, the container of the forces (nyama) of the group. It is rarely placed in the sanctuary and usually kept by the chief who never exhibits it; occasionally it is watered with rain water symbolizing the work of creation.

796
778
Before the annual ceremony called "anniversary of the Komo," drawings are made on the sanctuary by the chief or an elder; they are a reminder that the sanctuary is the link between the invisible powers and the members of the society. Besides the image of creation as an issue of the initial vibration (see Fig. 2), the head of the ancestor Koumabana, figurations of the twins, and the twenty-two fundamental signs are sometimes drawn. Finally hoes emphasize the agricultural function of the Komo (1). Granaries intended for conserving grains

1. At the time when the attention of specialists is attracted by the division of

796
778

> religious and social powers in ancient societies, it is interesting to point out that the Komo altars represent a very definite three-way division: the first is used for the conservation of spiritual forces (souls) of the group; the second presides exclusively over agricultural rites; the third is concerned with keeping the spiritual principles of individuals who died violently and of crop seeds; it played an important role during the wars. This threefold division is comparable on many points to that observed by M. Dumezil in Indo-European societies.

from the first crops /149/ used as offerings, are placed next to the sanctuaries or in the home of the chief (1).

> 1. In the village of Soroba the sanctuary includes seven granaries: three for small millet, *sañõ*; four for large millet, *keninge*. Seven is the number symbolic of the person, three for masculinity (small millet is male) and four for femininity (large millet is female).

C. The Mask

794
532

The man who wears the mask during the ceremonies personifies the Komo. The head is sculptured in the shape of a human face or animal face. At Konodimini, it represents the panther; at Soungoba, a stork; at Banankoroni, an eagle; at Banoumbougoula, an elephant; at Ségoubougou, a vulture. The mask is usually decorated with elements borrowed from several animals. Thus, at Soroba, the skull and horns are those of a buffalo, but the jaw is that of a crocodile. It is, moreover, ornamented with the feathers of a wild duck (2).

> 2. An informant, who attended Komo ceremonies in a great number of villages, asserted he had never seen the same mask twice.

794 532 The head of the mask is usually made of bone (a human or hyena skull), or of wood painted white, black, and red. The mask, *per se*, is made in such a way as to frighten the future initiates. Just as the soul of a dead person, which requests offerings or threatens to drag his kin with it, is feared, so too is this fact which is in contact with the altar of souls (*nimara boli*) and which reflects the face of the ancestors. It also represents Faro: the mask is sometimes provided with a long beard symbolic of his hair, and lightly plastered with a layer of black earth taken from the river bank and impregnated with his power; it is sometimes smeared with the blood of a young girl who has died in the course of the ceremonies, in commemoration of the virgins annually offered to Faro in olden times.

Copper arrows (*kun bye*) are inserted into the skull and charms (*kun kanana*) are attached to them with the purpose of attacking the undesirables (noninitiates, women, or children) who approach the dance site.

"The eyes of the mask are large, so that the Komo may see and unveil everything; the nostrils are well opened for he must sniff everything, smell the good and bad of things. The mouth is twisted for the Komo does not talk; he only whistles and sings. The ears are vast so that he may hear everything, even that /150/ which each one says secretly in his heart. The chin of the mask is square, a sign of purity, decision, and clairvoyance." During the ceremonies, he silently opens his mouth. It is said that due to the presence of the altar of souls, *nimara boli*, "happiness penetrates him" (1). By singing, he redistributes this felicity to the audience and this is why he repeats the verses.

794 532 784 841 As a rule, women, *griot* and noninitiates are taboo to the mask. To each of the elements composing it also belongs a particular taboo. Thus, the head of the mask must never touch menstrual blood. Any infraction would bring about "a visible change to the face" and the altars contained in the sac carried by the dancer would be without strength. For this reason, no member must participate in the ceremonies if his wife is in a menstrual period.

1. *Here dun*, literally, penetration of happiness.

794 The costume worn by the dancer is held up by a sort of carcass
292 (bry) made of ngolobe (1) wood used because of its flexibility, and is enveloped with a light blanket for protection. Inside the bry are suspended various flutes (komo fle) which are blackened by the blood of sacrifices offered to "improve their sound" and which will be used in the course of the ceremonies. Along with these flutes is a little bag filled with spare spider webs. Any individual who goes under the
[834] bry to dance must abstain from sexual relations for a specified period of time prior to the ceremony.

The costume (nya) which covers the carcass is made with the clothing of individuals killed by the Komo (2). Contrary to the bry, which has no active role but serves only to isolate the dancer inside the mask,
/ the religious role of the costume is very important. It represents the "body and the valor of the ancestors." It is not the object of blood sacrifices, but is covered by a powder made of the bones of individuals killed by the Komo to which has been added kola nut juice. The
794 cloth is dyed with black earth taken from the river bank in exchange
292 for a small offering of copper, gold, or cereals. Drawings called
532 komo mani (literally, little people of the Komo) are made on the
cloth to represent Faro on the one hand, recognizable by his long black hair, and on the other the eight ancestors who received the word. All the first agricultural implements of the Bambara are drawn with red ochre. The feathers of black, white, and red egrets are then sewn on the nya to hide /151/ the black earth, which is the spirit's abode. Two days before everything is taken out, these feathers are the object of offerings of kola nut juice, millet mash, and the blood of fowls.

794 The costume, like the head of the mask, must be seen neither
292 by women nor by noninitiates. "Its color would change and it would
784 become dull, making a purification necessary."

794 The body of the mask has two arms into which the dancer intro-
532 duces his own. The arms terminate in a hook, koli (3), which is

1. Combretum micranthum.

2. When a guilty member or a non-initiate is "killed" by the Komo, his clothing is offered to it.

794 3. Koli means nail or spur in reference to
532 a rooster and, by extension, hook.

impregnated with black earth from the river and made of copper, Faro's metal, soaked in the venom of a viper before the hook was formed. These hooks are also annually soaked in red venom mixed with pepper. All these preparations make them dangerous weapons used for different purposes during the ceremonies.

The right hook (kinin koli) is used to kill the guilty ones or the undesirables. A slight would brings about death which is then attributed to Faro. The left hook defends members of the society against the dangers which are present, even for them, in the actions and emanations of the right hook. It contains two shards of black pottery, Faro's taboo, which keep away and thus diminish the latter's power. During the dance the Komo, wishing to protect one of the members under its jurisdiction, waves the left arm over him to attenuate the strength of the right. During funerals a gesture of the left hook will indicate the deceased's membership in the society and will assure him protection in the hereafter.

[784 823] The taboo of the copper hooks is the same as Faro's concerning this metal. Just as no one would cross the Niger wearing an object or an ornament of copper, similarly no one would wear copper in attending the Komo ceremonies.

The wearing of the mask, which is much sought after by several initiates at each ceremony, is assigned to one of them by the chief. This role involves risks which are diminished by certain precautions such as abstention from sexual relations before the ceremony. On the day of the ceremony, the elders make the wearer drink millet beer until he is completely inebriated; then for a moment they apply to his chin and abdomen the nyama boli which he will carry in a bag during the ceremony. He also puts on a ritual headdress which sometimes has incorporated in it a particle of the one belonging to the famous Soma Moriba Sidibé. The mask is then adjusted on his head, the flute slipped between his teeth, while the chief assures him of his good faith and proves to him that he runs no danger.

/152/ D. Musical Instruments

794 534 The emergence of the Komo is accompanied by rhythms played on drums, dyiri kolo (literally, bone, wood), made of hides stretched

194 534 on half-gourds, and accompanied by flutes and bells. The musicians, recruited from among the musical members of the society, are obliged to submit to certain precautions because of the proximity of the mask during the performance of the dances. In fact, if the mask casts a spell (korti), they may, unwittingly, breathe in the dangerous powder and it is wise to protect oneself by taking the antidote ahead of time.

194 534 The Komo's iron bell, kolõkolõ or grinda, is kept with certain altars in the chief's residence; it is rung by a special bearer, grindavo or nadara koloyo.

113 539 A myth recalls the origin of this bell. "A small child, who went to play at the crossroads situated at the approaches to the village, heard one day a bell ring and invisible beings speak. Seized with fear, he returned home. When he was questioned by his parents, he refused to answer but with his finger pointed out to them the road which he took every day. The parents followed it and arrived at the crossroads where they found a copper bell. The spirit of the place, Soba, announced to them that he was making a gift of it so that they might call the spirits by ringing it and that the spirits would answer them (1). But he asked the father to give him in exchange the child who habitually came to the crossroads so that the child could continue to play with the spirit's children. When the father, in despair, told him he had not the courage to part with his son, the spirit advised him to consult Faro.

The man gathered the young girls of the village together and asked them to intercede for him with the spirit. Dressed in their most beautiful clothes and wearing their ornaments, they went off singing and threw cakes and couscous into the river (2). The elders went down in turn and received Faro's consent. He demanded that

1. In olden times, "men spoke with their ancestors and with their gods."

[196] 2. Each year the offering and the race are repeated by the young girls of Ségou who go to the river singing the nyari nyari to.

794 they keep the instrument for religious ceremonies. After declaring
534 that they would obey, the elders returned to the crossroads where
773 the Soba spirit gave them the bell and left in exchange the child whom
the spirit had called to him in their absence.
539 The object was then taken to the blacksmith who made one in the
same shape, using wood or bone for the body, and stone for the
clapper. After the invention of iron, they were forged according to
the ancient model with the addition of small copper bells."

/153/ To ring the bell is "to make Faro hear the sound of copper,"
794 to call him, and flatter him at the same time. When the mask is
534 brought out, the sound warns the noninitiates to avoid the procession.
The flute or reed pipe of the Komo, wara da, "mouth of the one
armed with claws," is made of a bamboo stem pierced by three holes.
The middle one is open and the two others are obstructed by a cobweb. The instrument is held between the bearer's teeth and is tied
by a string to the back of his neck or to his ears.

794 A myth tells the origin of Faro's flute, made according to the
534 same principle, but of a different shape.
A woman, called Koussouba Koulibali, was bathing one morning
773 when she saw Faro and the dodo fish sitting at the river bank. The
539 fish was playing the flute and singing:

"I will whistle, I will whistle in my Faro's flute; he who will not hear me will die, he who will die will regret it" (1).

1. Na fye, na fye ne nka faro fle flye,
nyimi mame o na sa, nyimi sara o bone na.

The woman fled and told her husband, who was a diviner and chief of the Komo, about what had happened. The latter proceeded to the banks of the Niger and frightened away the fish who abandoned its instrument. The man seized it and went home, followed by the turbulent river water from which he managed to escape in his canoe. But his whole family perished in the flood.

In the morning, the man returned to the river bank and cried as he played the flute. He played for such a long time that Faro, taking pity on him, came out and said: "I have drowned the members of your family and flooded the village. I forgive you, however,

794 534 773 539 because of the offerings made by other men. Keep the flute and since you are Soma and chief of the Komo, let all the Komo flutes be blessed because of this one." By this he meant that the Komo flute, like the other ritual objects, would hereafter contain his strength, nyama. He added that, when men wished to call him or to talk to him, they would have to do it through the intermediary of this instrument.

794 534 Before each occasion when the mask is brought out, a sacrifice is performed upon the flutes "to improve their sound." Faro's flute is used in the rituals performed at the river bank, to pray to him or to thank him. To play the flute is equivalent to reciting his device; he is forced to hear. The Komo flute is used only during the masked ceremonies; it makes those who hear it say that the Komo is "a thing with a soft throat" (1).

1. Fẽ kã duma.

In former times the chief alone was allowed to play the flute, whatever its type; death was sanctioned for infraction of this rule. Ordinary flutes /154/ of a style different from those belonging to the cult are used by children.

E. Initiation to the Komo

794 852 Three days after the birth of a boy, his father presents him with the elements which he has contributed to the making of the Komo boli and recites the komo kumã: "You, Komo boli, these things are inside; society of the Komo, these things are inside; customs of the Komo, these things are inside; you are a child, you are going to approach the age of the elders; Komo boli, here is my child, watch over him" (2).

2. Komo boli la, nin waliw ba kono;
komo dyɛ̃ la, nin fɛ̃w ba la; komo sira
la, nin kunko ba kono; i ye demisɛ̃ ye
i bi ta makorobaya ye; komo boli nde fle,
tyɛ do, i dyã to a la.

He then returns the child to its mother with these words: "The son has been introduced to the secret of masculinity; he has received

794 852 the Komo's blessings, the Komo's blessing is with him; let him join the men, let his light be with us" (1). The child is then presented in the same way to its grandmother.

794 These acts anticipate the initiation which later will make the new-born an adolescent member of the Komo society.

794 561 [564] In each village this society is composed of all initiated men, divided into age grades, which are themselves composed, theoretically, of the men circumcised in the same year. Only the griot are not admitted. It is permissible for an individual who has not been initiated immediately after his circumcision to be admitted later if the society agrees. He will belong, regardless of his age, to the age grade with which he will have been initiated.

One age grade has precedence over the other which follows. This hierarchical order is followed strictly in daily life as well as during councils and ceremonies. To break these rules of seniority would mean to disturb the order even in the hereafter, since the Komo gathers together the sum total of both living and dead members.

794 [735] The recruitment of members varies from one region to another because of the expenses involved in the admission ceremony and in participation in the ritual. Some villagers refrain from joining because of poverty, and it also happens that some conversions to Islam are brought about by this fact.

/155/ The initiation is performed at night. The kotigi (2) presents to the future members, one by one, the ancestors' tools. He explains to them their origin, their history, their role, and their spiritual value. He teaches them the respect they owe the ancestors for their courage, their labors, and the technological inventions of which they were either initiators or guardians. The mask is removed from its shelter and dressed by a member; in front of the children the man who wears it unmasks himself and reveals to them the meaning of the different parts of the costume.

---

1. De dyira la tyę gundo la; ani komo ye dukaw mine nuofe, komo ka barka bi a fe; ka fara tyew ka, ka yele kę an ta ye.

2. See p. 156.

794 The candidates next swear an oath the text of which is recited by the chief:

"If I reveal (the secrets of) the boli, may it kill me; if I disclose the institutions, may they kill me; until my death, if I speak, may my father die, may my mother die, may the boli break my heart" (1).

1. Ni nye korobo, boli ka fa, ni nye korobo, dyow ka fa, fo kata n sa ni nya fo n fa ka sa m ba ka sa, boli dyugu ka sõ ta.

Each in his turn, the children next lick the head and the hooks of the mask three times, thus assuring it their allegiance: "Until my death, I shall not reveal the koli. Faro has not been revealed! Let the koli not be revealed!" (1)

1. Fo ka ta n sa nte korobo koli, faro ma korobo, koli kana korobo.

After the altars, including the pembele, have been presented to [782] them, the postulants drink the blood of a goat offered in sacrifice; thus they assimilate the forces of the Komo and by this communion consecrate their oath.

Finally, the mechanism of the society in all its details is explained to them: the necessity of hierarchy in age grades, of respect for taboos, and of the secrecy in which all that concerns the organization must be held. A moral lesson is also taught them; in particular they [867] are advised to set themselves a line of conduct in private life as well as in public life, to be righteous, to avoid duplicity and bad faith, flãvlãña (literally, double action), never to serve two masters, and not to entertain conflicting desires among themselves.

794 As an illustration, the adventures of the first members who broke these laws are told.

773

539 One of Makanta Djigui's companions, Garou Keita, was afflicted with this serious fault. He had become friendly with Moridje Sidibé, son of the famous Soma Moriba Sidibé, who had the same character. At this period three great Komo were already functioning in the region: that of Koulikouro called selo (literally, grave); that of Nyamina called dyibi (literally, dark); and that of Kankan.

Garou went to one of the ceremonies of the Komo of Kankan /156/ and by telling lies, incited the members to revolt against the local

794 773 539 chiefs, which they did. They interrupted the dances and refused to recognize the Komo which was dissolved, leaving the chief alone. But Garou, who had lied, died shortly after that.

The chief of Kankan carried away the altars and put them under the protection of the Komo chief of Koulikoro, and the members participated in the ceremonies of this locality. Moridje went to Nyamina and, in the same way as Garou, incited the members to engage in a kind of rivalry with the Komo of Koulikoro. In the course of a ceremony celebrated in this latter village, he called forth the Komo of Nyamina, using the authority attached to his father's name, and offered a male goat to both groups. The two chiefs refused, arguing with reason that one victim could not satisfy two Komo. Moridje paid no attention and brought the two maskers face to face with the goat between them. A fight took place with the animal as a pawn, each masker using his magical powers to win it, and the members gathered behind their respective masks shouting: "the goat is ours." Later, the mask wearer also died prematurely.

794 To avoid the possibility that members will give their allegiance to two Komo, they are made to lick the mask once again, while the following prayer is recited: "If you lick the mask, may you not make the *fĩvlãña*, may you not perpetrate a betrayal" (1). If, after swearing this oath, the party betrays it, he becomes "a rotten person" (*matolilo*) and loses the esteem and confidence of his companions.

794 869 532 As the young men grow with years and increase in knowledge, the instruction they are given is increasingly comprehensive. The head of the Komo, accompanied by men of his age grade, takes the postulant into the bush and questions him about his intentions and aims. Before indicating to him the group to which he is to be attached and introducing its members to him, he teaches him by drawing on the ground the combination of signs representing the arrangement in the universe of the Komo society, a combination which is usually reproduced before each ceremony and which permits the participants to recognize their place (see Fig. 12).

This drawing, called *wolo ti*, "sign of the generation," is composed of two long lines cutting each other at right angles and oriented

---

1. *Nye komo kun no, i kana seka fĩvlãña kę, nye komo kun no, i kana seka dyãfa kę.*

794 according to the cardinal points. The point of juncture is placed in the
869 center of a square called *bara kene*, "rhythm of space," the internal
angles of which are armed with hooks. The two crossed lines are /157/
532 the symbol of the multiplication and extension of beings and things
in the universe which is represented by the central square. The four
angle hooks express the creation rotating upon itself (1). It is therefore,

a schematic representation of the order and movement of the universe.

Along the extension of the diagonal lines outside the central square are drawn five signs which are each the symbol of a category of initiates or of a ritual object; these signs also indicate the place of the participants during the ceremonies.

On the eastern and western branches are placed the signs of the older initiates:

1. *dyɛ*, "union." Sign of the Komo Society in its entirety, the body of its members.
2. *doniya*, "knowledge." The point of the angle is "the point of knowledge" and its opening "the collective voice of the society." We are dealing here with the science which the initiates possess.
3. *bako*, "link." This closed sign expresses the ties which bind the initiates one to another and to the Komo, as well as the group spirit of which they must give proof.
4. *sɔni*, "good will, consent." The point of departure of the stroke from the line indicates that the initiate is free to enter the society, to climb the steps of the successive grades indicated by the broken line, but not to leave it, and that he must have the will to follow the rules of the organization.
5. *tyɛ*, "truth." The members must be sincere. The two symmetrical hooks indicate that one must begin with truth and end with it.
6. *tyɛ sere*, "evidence of truth." This drawing, testimony to the preceding, is sometimes attributed to strangers who come to attend the ceremony and recognize the conventional signs (2).

---

1. See p. 20. We have here a special representation of the swastika whose branches are turned toward the center.

2. See p. 211.

794
869
532 7. *bẽni so,* "house of agreement." Evidence of the sign 1, it represents a sickle, symbol of the house and of the union of the members. In serious cases, to stop a quarrel or to settle a difference, the Komo chief presents an ancient sickle and says: "It is the proof of the agreement, it is the evidence of the union" (1).

1. *Beni so yeta do, dye šere do.*

8. *ǰigi so,* "house of support." The dot symbolizes the *komo so* and the whole recalls the support which the chief offers the members. Orphans sit in the spot where this sign is drawn.

/158/ 9. *so ba,* "big house." The drawing represents "the egg of the world" and marks the spot where the oldest geomancer in the village stands alone.

10. *komba,* "big door." Sign and place of the person who performs the sacrifice, for the sacrifice "opens the doors" and puts man into contact with the invisible.

On the northern branch are placed the signs which concern the young initiates.

11. *timidẽ,* "circumcised." This refers to those circumcised in the next to the last age grade. The sign is that of the completed person (2).

2. See G. Dieterlen, "Les signes des Kéita du Mandé /Signs of the Kéita among the Mande/," *l'Homme. Cahiers d'ethnologie, de géographie, de linguistique* (in press).

12. *timidẽ kle,* "circumcised of the last age grade." The drawing shows the incomplete person.

13. *tyi dẽ,* "son of work." These are the sons of the *kworę duga* (3). The sign, drawn inverse to that of the person, expresses the /159/ necessary disturbances and the pleasantries brought by these dignitaries to the Kworè and Komo ceremonies.

3. See p. 220.

794
869
532

14. soni dɛ, "son of the sacrifice." Drawn on the place for the sacrificer's son, the sign includes a horizontal line representing the knife, for the son may be called upon to replace his father in performing his duty during the ceremonies.

15. yeleka tigela, "the laughing man who cuts." This is the individual in charge of proclaiming the good or bad position of the victims which have been sacrificed.

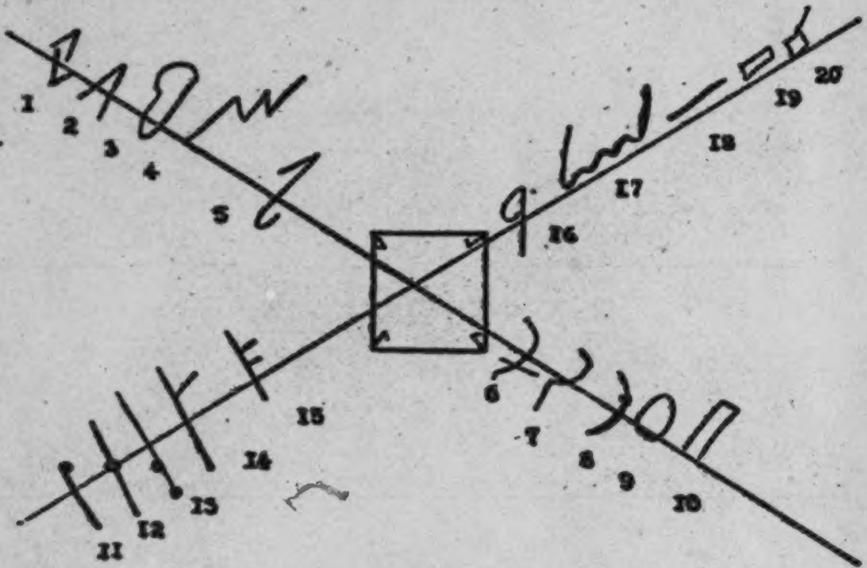

Fig. 12 — Drawing made on the ground by the chief of the Komo to mark, by their signs, the places of the participants during the ceremonies. This drawing, observed in the village of Dougoutiguibougou, is complete. When the branches forming an x are missing, the central square is always represented. (Drawing by an informant)

On the southern branch are placed the signs representing the blacksmiths; they relate to the institution of circumcision and to the functioning of the Komo of which these artisans are the dignitaries.

16. boffema, "honored person." Place of the aged blacksmiths.

17. wara da dyuru, "string from the mouth of the man armed with hooks." This is the small string of the flute, called "voice" of the Komo.

18. wara da, "mouth of the man armed with hooks." The flute of the Komo.

794 19. pembele. This sign represents both the society's pembele and
869 the board of the same name used for circumcision.

20. gosilãnde. The sign designates the primitive club and the small
532 mallet used in circumcising.

The ensemble of these figures, representing a summary of the universe in its arrangement and its movement, forms the scene upon which the actors in the ceremony take their places. The latter are in a way the living embodiment of these drawings as well as the movements which change the order of presentation and must be executed with special precautions. In effect, any change made in the arrangement of the actors in the scene is felt to have repercussions in the universal organization. This is why the movements of each one give rise to rituals of forgiveness and purification concerning the sign corresponding to him (1).

1. See below.

F. Ceremonies of the Komo

794
796 The ceremonies in which the mask participates take place several times a year according to the decision of the members. Their purpose is to discuss the interests of the society, to make joint decisions assuring the prosperity of its members, to promote harvesting, and to commemorate the organization of the Komo.

Three principal ceremonies are celebrated: the first, called /160/ "anniversary of the Komo" (komo sanyelema), at the end of the dry season; the second after the harvest, for offering of the first produce, as the mask is never taken into the fields at the time of cultivation; the third during the cold season at the time of circumcision. They involve sacrifices offered in the cemetery in honor of the dead as well as divining rites. Occasional ceremonies may also take place inbetween upon the membership's decision; the mask is taken out for purifications. The neighboring societies are generally invited to
[574] attend the reunions and the drinking which follow (2).

2. The important Komo chiefs are thus consulted by strangers in the village, who sometimes travel considerable distances.

194 196 The ceremony begins with a council meeting which is attended by all the members and which takes place in an enclosure, kara so. Early in the morning, the Komo chief, aided by two men of his age grade, draws upon the ground the figures which indicate the places of the participants and of the material objects (1).

> 1. See Fig. 12.

When the members arrive, they immediately place themselves, without risking disorder, near the sign proper to the group to which they belong. Each one, in passing, greets the person who will perform the sacrifice. The inhabitants of the neighboring villages are received by a member in a spot somewhat removed. They state the group to which they belong or draw their sign on the ground without saying a word. The chief acclaims their arrival with these words: "The strangers have come; the strangers, sons of the Komo have come; their place is in their hand; let tolerance be granted them" (2). The council meeting is then opened.

> 2. Dnow nana, komo dẽ dnow nana,
> u siki yoro be u bolo, yafa ka kę u ma.

The chief sits down in the central square, facing the west, places the boli to his right, listens to the propositions of the members, all of whom similarly face west. If he rises, all conversation ceases; it resumes only when he is again seated. If a member wishes to move during the meeting, he must ask the permission of the chief of the Komo. The latter goes to place his hand near the sign as an excuse for the man. When the member returns, the chief of his group takes a little water with which to pour over the drawing as a purification (3).

> 3. The temporary absence of a member is called: wuli ka bo komo ko la, "to rise and leave the affair of the Komo" and the return do dye ba la komo jine sabu la, "to enter into the great union of the spirit of the Komo."

When all questions concerning the society or the village have been examined and discussed, and when the decisions have been reached, everyone stands up; the drawings on the ground are erased with water.

778
515

794 The rituals in which the mask participates generally /161/ take
796 place the following night in a thicket called komo tu, "bushy one of
201 the Komo," situated in the bush near the village.

As soon as they hear the mask whistling, the members approach according to their age grades, the older ones first. In principle, only those under the jurisdiction of the functioning Komo and their guests are present. However, any initiated stranger who wishes to attend the dances makes his status known by means of the following signs:

1. Shouting "hế" or "ho," he presents his right hand to the mask with all the fingers folded except the index and the little finger which point towards it. The index, in this case, represents the circumcised man, member of the Komo society, in sum, the petitioner. The little finger, which is smaller, expresses this man's submission to the Komo and the fact that he is and will always remain its inferior.

2. He puts a twig of straw in his mouth; the light colored straw signifies that his heart is pure, that he has no evil intention. The mouth, closed over the straw, shows that the man, "understanding the word of the Komo," has no need to speak of it.

3. On his arrival, he says: ani bara (literally, I am with the bara). The masker, hearing these words, crouches and then straightens up suddenly before the newcomer as though to frighten him. The latter then says: "I am a new child of the society" (1). When he is accepted, the masker resumes the dance and the ceremony continues.

794 The rhythms of the Komo bear the general name of komo bara or
796 komo foli dunu (literally, rhythm of the Komo drums) (2). They are numerous, adapted to the rituals they accompany, each endowed with a separate name. The Bambara classify them into three categories: the rapid, violent, and difficult rhythms performed against the non-initiates; the soft rhythms for circumcision; the sad rhythms for funerals.

1. Ne ye timidẽ kura ye.

533 2. The word bara is reserved for the rhythms of the masked Komo dances. The rhythms of the profane dances of the elders are called mabere fo, those of the young men, bɔ̃dyala, those of the girls, kofili.

194 196 533 During the masked dances, once the drummers have begun the rhythm of the Komo, they must neither slow down nor cease their playing; otherwise the masker will rush at the player and threaten him with his left hook. In this case, the musician changes the rhythm in order to soothe the masker and sings: "You, old men, you are with the bara; listen, this bara is not empty." (1).

1. Aw ni bara makorabaw; klo madyo,
nin bara te bara lãkulo ye.

194 196 198 /162/ The masker participates in the ceremony not only by dancing and by uttering cries, whose pitch and intensity vary according to the action which he is preparing or performing.

A guttural and very muffled cry (buâ, buâ, buâ) called komo suruku (literally, hyena of the Komo) is used to frighten the participants.

A shrill and short cry (pyę, pyę, pyę) called kono fari kasi (literally, cry of the bad bird) is frequently used to animate the dance and amuse the spectators.

A long and softer cry (ô-ô, ô, 'ô, the last three ô's being very close together) called morokorobaw kasi (literally, cry of the ancestors) greets the chief and his age grade.

194 196 During the mask dance, the Komo's griot encourages it by reciting the devices which exalt its power, authority, and judicial powers:

"You, Komo, you griot of the Komo, you, ringer of the bell, from whom do you come? You come from Makanta Djigui. You, bad Komo, from whom do you come? You come from Soma Moriba. To whom did this one give it? He gave it to the sons of the blacksmiths. Who are the owners of the Komo? Makanta Djigui, Soma Moriba, the sons of the blacksmiths. These have not known shame; you must not be ashamed. These have not received humiliations; you must not be humiliated.

"You, little living Komo, enemy of non-members, friend of members, take your enemy's heart, take his liver. I follow behind you and not before you. Ah! Komo; you, killer of the fat dead ones, shroud of those living, act upon him who provokes you as you do upon him who does not provoke you" (2).

2. E komo, e dyeli, e ndara kolo fo,
e bwora dyeni ma, e bwora makanta

794 196 jigi la, e komo fare ma e bwora dyeni ma, e bwora soma moriba, o ya di dyeni ma, oy a di numu dew ma dyenuye komo tigiw ye, makanta jigi, soma moriba, numu dew; oluw ma malo, aw kana malo, oluw ma lebu, aw kana lebu.

E komo ni nyenama biribalyuw dyugu, birilew nyima i dyugu son ta i la ka bye ta mbi ko nti nye.

E komo, i šu klo la faba, nyenemaw kasange, minya kila a ko la, mi ma kila a ko la.

When the drums beat and the dances are animated, and when the masker cries, it is said that "the bara of the komo is hot" (komo bara wušule do). The ceremony is in full swing.

Diverse incidents may occur in the course of the masked dances which give rise to interpretations and interventions by the members.

794 196 187 When one of the arrows attached to the mask trembles, it indicates the presence of a sorcerer in the assembly. The elders remove the arrow and immediately order /163/ the ceremony to stop. After the drums have been silenced, they request the culprit to present himself, which he immediately does. These words are spoken to him: "Your arrow attacks you" (1). He then offers a ram and beer in sacrifice, while the arrow is replaced and the dances resume. If an arrow falls in the course of the dance it indicates the presence of a sorcerer in the village.

794 196 If a part of the costume falls off, it is picked up by three members and kept to be burned with the refuse that is later swept up (2).

794 196 688 If one of the participants has broken the taboo and revealed the secrets of the Komo during the past year, the masker whistles, asks the drummers to stop playing, and says: "Here is a grasshopper for me." These words express the contempt in which he holds the culprit. Next he adds: "There is the smell of a corpse here" (3).

---

1. Komo bye bila.

2. See p. 259.

794 3. Šu kasa be.

796

688 The man lowers his head and all move away from him. The masker wounds him with the right hook. He is banished from the circle of
766 dancers and probably will die several days later. His funeral rites are not solemnized. The corpse is tied by the feet and removed from his home through a hole made in the wall to prevent his evil nyama from returning to the family. The body is beaten with switches so that the soul may leave the village forever, and is thrown into the common grave or placed in the cleft of a tree, which is then closed up with thorny bushes. In this case it is often devoured by the hyenas. The clothing which belonged to him is hung on the hook placed on the outside wall of the sanctuary. No one has the right to weep for his death and no one ever mentions him again. To do so would be an offense to the Komo.

794 It may also happen that the emergence of the Komo occurs without the village being warned. In this case, if a young girl imprudently
796 approaches the place where the dance is being held, the masker may
688 kill her with one blow of its hook directly upon her head. A little
782 of her blood is then placed as an offering on the nya and her jewelry thrown into the river where her soul goes to replace the virgin who, in former times, was annually offered to Faro.

G: Effects of Broken Taboos

794 The breaking of the taboos attached to the altars or to the mask
783 reacts upon each of the parts affected as it does upon the whole and brings about a diminishing of the Komo's power, which is abandoned by Faro and the ancestors. A purification may be performed /164/ in certain cases. The error is then corrected and the spiritual forces reenter the altars.

If a woman or a noninitiate catches a glimpse of the nya, the komo tigi and his age grade go down to the river bank and, to the sound of drums, present the culprit's apologies to the spirit:

"I have not come for someone else, I have come for myself, I have come to reestablish the race of our fathers" (1).

1: Ne mana ma nyini; ne mana nyere nyini,
ne ma na m fa šia tuku ko la.

194 183 The victim offered by the responsible party then has its throat cut, its body is thrown into the water, and the members take some black earth to smear again on the regenerated nya.

If the chief does not observe the chastity imposed upon him before every sacrifice, he must advise the elders of his age grade and purify the altars by sacrificing two roosters or a goat.

It would seem that the taboo of the nimara boli may not be broken without danger, and that in this case the fault is almost irreparable. The Komo is affected not only in one of its parts, but in its entirety, and a general reordering becomes necessary for the society. The chief and the elders carry away the principal altars to their place of origin, that is to say to the village where they were consecrated through contact with those of the local Komo (1). The owner of this latter Komo keeps the tainted objects for seven days. After this delay, the petitioners return, bringing victims which are sacrificed upon the altars now placed in contact with those from which they originated (2). The meat is eaten by the chief who is being consulted, and by him alone. The petitioners must then return home with their sack without speaking a word to anyone during the trip.

This ceremony, which is a second consecration, may under no circumstances be repeated. If the taboo is broken once more after a first fault and a first reordering, the Komo is considered to be entirely destroyed and the village is sometimes abandoned by the inhabitants who have "lost their soul" and who fear the wrath of Faro; they disperse, unhappy and powerless. Some conversions to Islam or to Christianity may have had no other motivation.

H. Role of the Komo

194 182 "The Komo is a society which unites the highest divine power, men, animals, and plants until the /165/ end of the world. It is the

---

1. See p. 190.

2. The nimara boli is "rubbed" on the nimara boli of the tro ba, the nyɔ̃ boli on the nyɔ̃ boli of the same, etc.

keeper of souls. When there is no longer life on earth, when there are neither men, nor animals, nor plants, the Komo will awaken the souls of the dead which have been in its keeping for eternity."

As a repository of the spiritual forces of its members, the Komo is involved in most of their activities and participates in daily life. Birth, circumcision, marriage, burial, and the cult of the ancestors are all characterized by its direct or indirect intervention. It plays a remarkable role in agricultural life (rain, agrarian rites, household and communal excrement) as well as in the functioning of handicraft technologies. Collective issues (war, political conflict) and economic questions are submitted to its decision. In fact, the members' belongings (grain, cowries) are kept in granaries for which the chief is responsible and from which he agrees to make interest loans to needy members. The chief of the Komo, who is a diviner, is consulted directly by petitioners. Assisted by the elders of his age grade, he is also responsible for dispensing justice (1). Thus the name of an unworthy member is pronounced above the pembele which is immediately removed. This gesture deprives the culprit of the protection of Pemba and abandons him to misery and shame.

On the other hand, the actual functioning of the society develops social life. The initiates of neighboring villages are invited when the mask is brought out and a number of marriage negotiations are concluded during the drinking parties which follow the ceremonies. These also favor cultural exchanges. It is during publicly held conversations that teaching is furthered, for the rituals are commented upon and explained, and the myths and their metaphysical foundations are presented in detail. The most knowledgeable informants all speak of nights spent in listening to the competent elders around the jars of millet beer.

The Komo is the repository of traditional beliefs and rules of solidarity between members. It diffuses a thorough knowledge of civic and moral instructions, the rights and duties of the members, the taboos and sanctions which affect those who break taboos. Its juridical role makes it a disciplinary agent: it is a powerful support of the Bambara social organization.

---

1. The judicial role has been notably pointed out by L. Tauxier in La Religion bambara, p. 300.

/166/ The Kworę

794 821 The Kworè society, kworę dye (literally, reunion of the Kworè) consists of individuals around the altars (kworę boli) on which rites are performed concerning the skies, space, the cardinal points, the atmospheric manifestations of Faro, and particularly rain. Kworè literally means "dried up pond."

The rituals are intended for the Kworè spirits who depend upon Faro and who live in the kaba fǐn (third sky). They are in charge of watching over the rains sent from the woloflâ kaba (seventh sky), which cross the other skies and "the void" before reaching the earth. The spirits struggle in the skies and in space against the mahalakillen of the koblenkaba (fifth sky) who try to stop the water. Lightning, thunder, and thunderbolt are the effects of these struggles.

794 778 The principal ceremonies take place around a tree, called kworę ǰigi, which is situated to the east of the village and is the usual habitation of the spirits when they descend to receive men's offerings. The altars are placed in a hut built in the bush; other samples of these are kept in the chief's residence. A large stone, kworę fara, located near the village and placed in the ground above some symbolic objects, also receives offerings. The Kworè society is the owner of a communally cultivated field, in which small millet, sañõ, is exclusively sown and the harvest of which is kept for the needs of the cult.

A chief, the kworę tigi, is entrusted with the care of the altars and performance of the ritual.

A. The Altars

The altars of the kworę are placed in a sanctuary called buku sãmpere ni (literally, little hut of thunder) and situated at a certain distance from the village because of the dangers from lightning. The door is low and very narrow so that the forces held within may not escape.

The altars are composed of the following objects:

1. A large sac of the skin of a male goat, kworę boli sãmpere, open at its upper extremity and suspended by a boa skin (miñã) which symbolizes lightning. This sac, which has three compartments, contains copper, water from the Niger, rain water, and the "thunder stones" of the society. The "thunder stones," sãmpereni or sãmpere

194 118 *dyele*, play an essential role /167/ in the rain cult among the Bambara as among the other blacks of the Sudan. They supposedly fall from the sky with lightning bolts (1).

> 1. They are picked up at the spot where they fall and are the object of an important trade.
>
> At the time when a Kworè society is being founded, the chief, generally accompanied by the *komotigi*, visits villages where lightning has struck in order to buy stones and to choose them with a knowledge of the case. Each member contributes to the purchase of one stone.

2. Another sac also made of the skin of a male goat, called *ñõ boli* (*boli* of millet), is suspended from the roof by a serpent skin. This altar is dependent upon the *ñõ boli* of the Komo, which presides over germination. It contains small millet from the fields of the Kworè and some of the small millet from the *ñõ boli* of the Komo.
3. A sac containing water from the last rain, called *ngule sãndyi*.
4. A sac made of the bladder of an ox, *ǰettemine boli*, makes it possible to see the water level from the outside. After each rainfall the level is checked by the chief and the water is poured into the *ngule sãndyi* where it is kept throughout the year.
5. A sac containing thunder stones intended for sale:
   - (a) To be suspended from roof to counteract lightning.
   - (b) To attract lightning; in this case the stone is placed under a shelter in the bush.
   - (c) To make a new *kworę boli*.

This sac is the object of libations consisting of rain water drawn from the *ngule sãndyi*, to which has been added a pulverized thunder stone.

6. An axe called *sãmpere dyele koro* (literally, old thunder axe) of an ancient shape, made of a hewn stone set in a wooden handle. Considered as the "mother of the thunder stones," it is not removed from the altar until the very last when the rites for rain have failed.

Pieces of mirror brought by members of the society are set into the wall; the reflections from these mirrors also are supposed to affect rainfall.

794 778 B. In the chief's residence, there are replicas of the axe and the altars. According to the needs, they are transported to the shore of the Niger, into the fields, or to the public square during the ceremonies. The originals, on the other hand, remain sheltered from the looks of outsiders and risks of impurity. Moreover, the chief owns a special altar, the kworę ni, "soul of the kworę," /168/ which contains the spiritual principles of the members who do not belong to the Komo society. The kworę ni is placed upon the chest of a dying man and receives his soul at the moment of death as does the nimara boli of the Komo (1). It is regularly saturated with rainwater.

C. The stone of the kworę, of which the lower part is crudely carved into seven teeth called kworę fara ni, is stuck into the ground after the following objects have been buried in this site. (See Fig. 13)

1. Three thunder stones called: fara ba, "big stone"; /169/ fara bye, "stone point"; fara ǰoli, "blood of stone." These recall the presence of Faro's power, rain, under the altar. When placing them, the following words are repeated seven times: "Help us" (1)!

1. A ka demme.

2. Three whips, the male number, testimony to the course of men who withstand the pain of the strokes without complaining. When they are buried the following words are spoken: "Let us be courageous" (2).

2. A ka farina.

3. A kongobwona axe (see p. 160) which recalls the ancestors' victory over famine; it announçes harvests and future wealth.

Drawings are made on the stone during the annual ceremony. In the center, a black dot called faro dẽzo, "womb of Faro," represents the spirit. It is framed by two series of three whips, each "to defend him," as well as by the first three of the eight ancestors (one of which was Koumabana) and by seven figures representing the members.

[F184] Woman is the taboo of the Kworè. Only males may approach the sanctuary and the altars. Any circumcised male desiring to participate 794 785 in the ceremonies must be initiated. The postulants are brought together by the chief under the Kworè tree, at the foot of which a fire is lit; each carries a twig of ñuãna wood. They suffer

194 785 uncomplainingly the burns inflicted upon them with a torch and they whip themselves vigorously. The chief next teaches them the role of the Kworè spirits, the rituals celebrating them, and the symbolic value of the objects of the cult.

194 522 Some of the members are designated to take the role of kwore duga during the ceremonies. Masked and waving freshly cut branches in each hand, they mount a wooden horse, the kworeduga so (1). Thus

[532 778]

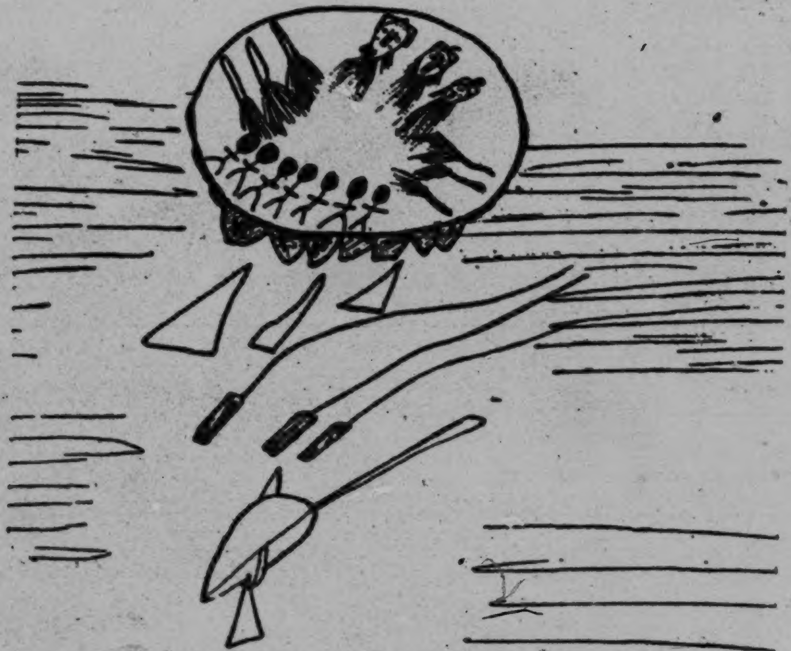

Fig. 13 —Stone altar of the Kworè of Banankoroni under which are buried three neolithic axes, three whips, the ritual iron axe, kongobwona. The drawing, made in the course of the annual ceremony, represents the first three of the eight ancestors who received the word, the members of the society, and the Kworè whips; the black spot is the "womb of Faro." (Drawing by an informant)

1. The kwore duga (literally, vulture of the Kworè), also called togoro koya, "jesters," are as their name indicates, jesters who have the right to joke about

equipped, they represent the spirits of the *kworę*, mounted on their winged horses to attack the sky. One of them wears a mask, the *kworę ku*, to represent the ancestor of the group (1).

794 Close bonds unite the Komo and the Kworè. Their cults complement each other and an individual wealthy enough to meet the necessary expenses may belong to the two societies. In fact, one of the Komo's roles is to watch /170/ over the progress of the cultivations: its altars watch over the soul and the vital force of the crop seeds. The harvest, however, depends on rain and thus comes under the jurisdiction of the altars of the Kworè. The complementary activity of the two societies is certainly felt by the users who declare that "the *ñõ boli* of the Komo and the Kworè are united in action."

Some authors have raised the question of the Kworè's greater antiquity, when compared to that of the Komo, on the basis of the "Priapic" aspect of the former's ceremonies (2). Since the real purposes of the institution have almost completely escaped these observers, it was not possible for them to penetrate the meaning of these rituals. It is at the foot of the tree of the Kworè that men call upon the skies where Faro reigns; they pray to the *koblenkaba* in case of war, the *sunãnkaba* in case of epidemics, etc. The annual ceremony is a representation of the action of the invisible powers to obtain the rain necessary to men. The burns and the blows which the members inflict upon themselves, as well as the galloping of the *kworęduga*, symbolize the celestial struggles of the spirits among the unleashed elements.

794
522
the most sacred things; their social position is comparable to that of the *griot*. In former times they were the first to sacrifice to the *boli*.

1. The materials, wooden horses, and masks are blackened by fire and saturated with karite oil.

2. See L. Tauxier. *La Religion bambara*, p. 311.

The *Ceble* or *Ndomo*

794 Like their circumcised and adult elders, all the uncircumcised and nonexcised members of a village form a society, called *čeble* (literally, red man) or *ndomo* (literally, gathering), whose members are called *ndomo dew*, sons of the *ndomo*, or also *ndomo ngow*. The society of the *ndomo* is older than that of the Komo (1). Formerly it brought together a great number of adolescents since circumcision was performed much later. Nowadays, since children are operated upon very young, its importance has diminished, but as it contains the power of the uncircumcised it still plays an important role which is expressed even in its name. Red is a symbol of power and energy; it is also the [822] sign of the sacrifice.

The *ndomo* is directed by a chief assisted by a person who performs the sacrifices, *murukalatigi* (literally, master of the knife handle) and by an organizer of ceremonies, the *dyolokotigi* (literally, master of the chain).

It is in the course of agricultural work communally performed that the /171/ most energetic member is name chief; he is the one who has best and most rapidly fulfilled his task and who has, in addition, caused the adversaries who have been presented to touch the ground three times. The chief, who is responsible for the altars of the *ndomo*, sees to the instruction of the initiates, regulates their competitions, nominates the bearer of the mask and the one who is charged with the maintenance of ritual objects. Finally, he officiates during the collective ceremonies. The *murukalatigi* cuts the throats of the victims; he cuts out and makes the masks and other ritual objects. The *dyolokotigi* directs the ceremonies and makes decisions about the members' advancement.

The hierarchy is composed of five grades corresponding to the five fundamental altars. Each grade is passed annually after special

---

1. It is said: *ndomo ka koro komo ye*, "the *ndomo* is older than the *komo*." Certain aspects of the *ndomo* have been described by Ch. Monteil, *Monographie de Djenné*, p. 15, and L. Tauxier, *La Religion bambara*, p. 380 ff.

794 instruction and initiation. Five years are thus necessary to reach the
highest rank. Each promotion is paid for by the individual providing
[782] two roosters whose throats are cut upon the altars at the end of the
annual ceremony which takes place in the bush under a tree called the
kalabana, following communally performed labor. After meal, a
[526] fight called bari, organized under the direction of the chiefs, puts the
young boys in opposite groups and gives them the opportunity to show
their courage and their initiative.

794 The members' activity consists of collective work at the time of
476 the cultivation. The millet and the gifts in kind received in payment
for the work are owned communally.

A. Material Objects of the Cult.

794 The society is the owner of ritual objects such as a mask and whips
778 which are usually placed in a hut, ndomo buku, at some distance
534 from the village.

The objects, numbering five, are rudimentary musical instruments. The wara, the clawed one, or diara, the lion, is a wooden bull-roarer approximately 35 centimeters in length, which is manipulated by means of a string a meter long. Sometimes the object is of iron and of smaller dimensions. The tori, toad, is a small box which gives off a nasal sound when it is scratched. The kono, bird, is made of two pieces of gourd bound together by spider webs. The wulu, dog, is a small calabash of about 10 centimeters in diameter, punctured by four holes. A string, threaded through its neck, allows it to be rotated like a rhombos. The ǰineble (literally, red spirit) is a buffalo horn pierced by three holes, /172/ obstructed by spider webs, into which one blows and which produce a loud, flute-like sound. One society usually owns several specimens of each of these instruments.

794 The mask, said to be the most ancient object, is of sculptured wood
778 representing a human face crowned by several vertical, rather long
532 horns (1). The whole is completely decorated with cowrie shells and
red kise (2), grains which represent the blood from the offerings. The

1. The masks most often carry eight horns, but this rule is not always respected.

2. Linociera sudarica.

794 high forehead, black and always smeared with karite butter, confers
778 upon the face a beneficial power. The whole mask is regularly rubbed
532 with ground charcoal powder and with the juice of the kola nut.

The whips of the mask (*ndomo busa*) are made of *ñuana* branches
794 famous for their suppleness. They are made at the time of the annual
778 ceremony and only renewed the following year. At the time of their manufacture, they are soaked in water, which the members of the society then drink "in order not to have to suffer from the blows which they will receive."

Each member also possesses a long whip made of the branches of
824 a bush, the *ngere ni*, (1) which is also called "tree of Faro" for it grows in water, and which contains part of the beneficial power of the spirit. The whip is used to try out the children's courage. The one who cries or complains will carry this handicap with him through life; even after his circumcision he will be referred to as a coward.

B. Initiation

794 Each new grade is acquired in the course of the annual ceremony
526 which takes place after the harvest. An elder entrusted with the sacrifices cuts the throats of the roosters offered by the postulants over the tree of the *ndomo* (Pl. V, a) and over the ritual objects placed at his feet, and then pours boiled millet as an offering. During this time the young people plow the ground where the contest, *bari* (2), is to take place; this fight will pit them against each other and give them the opportunity to show their courage and competitive spirit.

The chief designates the fighters two by two who are watched over /173/ by the *dyolokotigi*. In the contest, during which any use of legs or feet disqualifies the fighter, the one who makes his adversary fall three consecutive times is chosen to be initiated into a higher grade on the following night. After this contest, the losers must bring two additional roosters if they also wish to be initiated. Then a meal eaten in common brings together the members of the society and the postulants.

1. *Hibiscus pandoriformia*.

2. To make oneself fall, the joust.

794 On the following night, the future initiates are led into the bush to a place called biri yoro (literally, place of initiation), where they sit down upon the ground, their heads covered with a piece of cloth.

At a sign from the dyolokotigi, a member causes the ritual instruments to roar or sing in succession; then he hides them and the postulants must find them. As they are not able to do so, a series of hazings are inflicted upon them (1) after which they are shown the instruments and each in turn made to repeat the solemn oath:

"If you have heard the dyara of the uncircumcised, that is it. Chisel a piece of wood, make a hole, put a string through, turn it, it is that which is the word of the ndomo dyara. If you reveal it, may it take your heart, may it take your liver, may it kill you" (2).

Next, they are made to lick three times the object which is then entrusted to them so that they may learn to use it. The same ritual is performed for each instrument, and the prayer is repeated with only a change in the name.

The young men frequently sacrifice upon the altars of the ndomo.
794 The usual content of the sacrifice is the gray lizard /margouillat/,
782 busa, likened to an uncircumcised boy (its tail representing the
835 foreskin). The victim's wanzo, liberated by death, joins the wanzo
contained in the altars and, consequently, that of the members.
[262] The animal is then cooked and eaten.

C. Activity of the Society

794 At the time the fields are being cultivated, the members who are called upon to do work take their ritual objects along. The young

---

1. These hazings are often severe; fun is made of the ignorance and fears of the postulant.

2. Ni ye me bilakorow ka ndomo dyara, nin do ka djiri dese, ka wo bo o la, ka dyuru ndo o la, o bi fyeku, o de bi ndomo dyara ka fo, ni ya korobo, a ki sõ ta, a ki biñe ta, a ki fa.

194 girls who provide water and are present during the work sing to encourage the best workers or to insult the lazy ones.

Once their task is done, they partake on the spot of dishes /174/ especially prepared for them. As they leave they make their instruments roar and resound. By these means, the force (*wanzo*) which they have spent in working is "recaptured in the wind" by the twirling of the rhombos and returned to the *ndomo*, that is, recovered by themselves. For if their *wanzo* has permitted a useful effort, it has penetrated into the fields, thus diminishing by so much the store of the *ndomo*. On the other hand, this power, which is useful for cultivation, is harmful to germination. To leave it in the earth would injure the harvests. And this is why, as an extra precaution, the owner burns a gray lizard in his plot the following day in order to rid it completely of this evil accretion.

194
196 During the dry season, ceremonies to bring out the mask are performed for the purpose of soliciting gifts from the inhabitants of the village. The members stand in a circle before each door while the masker dances the *ndomo do*, the dance of the *ndomo*. The chief designates two young men who, placed in the center, each receive three whip lashings from their comrades. Then, the youngest strikes the masker who dances again, hitting in his turn with his long whip those who do not lower their heads correctly as a sign of respect.

If the owner who is being solicited turns a deaf ear, all sing to make fun of him and to force him to give:

"It is the custom, we are not hungry; it is the custom of the world, we are not hungry" (1).

1. *Lada do, kongo tawna, dyɛ̃ lada do kongo tawna.*

When all the houses have been visited, the children line up to return and, at the chief's order, walk towards a crossroad, which is the seat of the protecting spirits of the *ndomo*. There they leave the mask and break their whips saying: "Crossroads, I entrust myself to you."

The gifts representing food or cowrie shells are divided up among the maskers and the three chiefs. The millet is kept for the day of the annual ceremony.

On following night, the masker goes to the crossroads and brings back to the chief the ritual objects which were temporarily left there.

D. Role of the Institution

794
182
According to Bambara expression, the ndomo is "the mother of the wanzo of the uncircumcised (1)" for its power which resides in the ritual objects /175/ is composed of the wanzo of all adolescents.

1. Wanzo ba ye čeble

The mask and the altars at first keep a part of the wanzo of the members who wear them, manipulate them, or offer them sacrifices. On the other hand, after circumcision, at the moment of the final leap of the newly circumcised over the ritual fire, the wanzo ultimately leaves them to settle itself in the mask of the ndomo. Thus channeled and conserved, these forces add themselves to those of the uncircumcised in the masks which become the repositories of their life.

[775] Moreover, the soul of the uncircumcised and nonexcised who have died prematurely establishes itself in the altars during the funeral rites celebrated by the members.

The mask of the ndomo is thus the receptacle of the wanzo of the circumcised, living and dead; as for the altars, they contain all the souls of the uncircumcised dead. All of this confers upon the ndomo the responsibility for the life of the adolescents and gives it such power that to a certain extent, this society of young people is feared by the adults (2) who have left it.

794
833
782
2. When an adult, especially a member of the Komo society, has disturbed the peace of a member of the ndomo or has wronged the society, the wanzo may cause him to be impotent. In this case, in order to recover his virility, the man must obtain several tens of gray lizards which are sacrificed in his name on the mask and other altars. The animals are then cooked and the man is completely smeared over with the cooked substance which is then placed in the calabash and poured over the altars; the wanzo assigned to the man by the ndomo thus returns to the latter and the man is rid of its evil.

794 No one may remain a member of the ndomo after his circumcision. It is said that an individual who would continue his activity in the ndomo would acquire a double wanzo.

/176/ Chapter 7

RITES

771 The rites of the Bambara are very complex and often involve several institutions. The following descriptions are not of a general character as the rites admit perceptible variations from one village to the next, variations of which the individuals concerned are aware, for there is no absolute rule for any institution or ceremony.

Nevertheless, their various manifestations, which adhere to this flexibility of thought, testify to the unity of the cosmological and religious representations. When a Bambara is invited to be a spectator [574] to the ceremonies of neighboring villages, he is frequently informed about this or that aspect of the ritual which is unfamiliar to him during the drinking parties which follow. In fact, tradition demands that the preceding ceremony be commented upon and explained in front of the beer jars. But the unity of the representations is such that, according to the declaration of a qualified informant, "whoever knows the principles and mechanisms may deduce from them, without explanations, the meaning and symbolism of a ritual which has not been commented upon."

On the other hand, the rites are symbolic even in their most insignificant manifestations: time and place, form of the ritual objects, aspect of the victims, repetition of formulas or prayers, mimicry of the participants, the wearing of certain secular or priestly garments, etc. A very great subtlety presides over the choice of details. It is thus that, during the stages of creation, the supernatural powers have established, organized, and reorganized the universe (skies, spaces, lands) following the itineraries which include "the cardinal directions and angles." The rites in which the cardinal points occur include gesticulation which, depending upon the power

77/ considered, follows the chronological order used by this power in the beginning. Similarly, the various skies where Faro reigns are invoked according to their role and the aims of the petitioners /177/ who appeal to them in many cases with very long prayers.

In order not to overload this discussion, a very limited number of rites are described below. Among them, an important place is reserved for those concerning the person (see Ch. 3), which relate to birth, circumcision and excision, funeral rites, and the cult of ancestors. For each one of these the respective positions of the elements composing the individuality at different times have been pointed out.

The rites relating to the ordinary which come next, affect the collective life of the family and village. They concern the residences, the crossroads, and the public squares. They have a very definite character of a gathering together and redistribution of individual forces for the good of the community.

The rain rituals, also collective, which involve the Komo and the Kworè, present a typical example of Bambara symbolism.

Finally, the rituals for "the renewal of the year" have still a more general character: they show close ties uniting individual and community to the cosmos (1).

I. Rites Concerning the Person

Birth and Name-Giving

844
273
271
From the moment of his birth, a newborn is washed with millet beer mixed with water. The beer has a purifying quality and the

---

(1) The agricultural rites have not been touched upon in this work as they will be the object of a detailed description in: S. de Ganay, Techniques et rites de l'agriculture chez les Bambara (to be published).

In addition, most of the rituals are duplicated by a series of games of a cosmogonic character which relate to the stages of creation and to its past, present, or future states. See p. 54.

844 contact with water which symbolizes "the victory of Faro over Mousso
273 Koroni in the matter of family names" is a prefiguration of name-
271 giving.

851 As soon as the patriarch hears of the birth, he comes and shakes the family pembele over the child's head, three or four times according to the sex, in order to pass on to him the nyama and the qualities of the deceased person from whom he has inherited the ni and the dya. Then, he brings the family altar kere la boli ni into the house of the woman who has just given birth and places it before him. Crouching upon the ground, with fingers spread over the object, he pronounces the following prayer: "You, boli, make me a chief, so that my family prospers, a child is /178/ born, his soul is entrusted to you; I invoke you, boli, night and day" (1).

1. Boli tigi i ka masaya kanu ñe, de wolo la, a ni kalifa be i la, ngo boli ñu ani kle.

Holding the child on his knees, he places the object on its chest for three consecutive times. Repeating the prayer, he next cuts the throat of a red rooster over the open sac, dips the right index into the blood, and, depending upon whether it is a boy or a girl, makes three or four crosses on the forehead of the newborn who thus becomes the "son of the boli," boli dẽ.

A white sea shell, krokrodya (2), is placed before the newborn and gently moved about to "condense his dya within him." Then it is tied to the child's foot for three or four days according to its sex.
846 At the same time, the mother who is entrusted with the child's dya
until the name-giving ritual, adorns herself during the eight days
824 following the birth with a collar (madya, "dya of the person") made
751 from the odoriferous root of the tree bearing the same name. She will wear it until the child takes its first steps so as to protect it and to recall that she herself carried the soul of the newborn.

2. Cardita vingens.

553 The name is given on the eighth day by the chief of the Komo.
852 Under the dubale, a tree which shelters the village meetings, the elders assemble around the Komo altars which have been carried to the spot (3). If it is a first son, the father gives one hundred kola nuts,

two jars of millet beer, a ram which will be sacrificed, and money to the griot who will sing during the ceremony.

[789 A lock of the newborn's hair is shaved off and kept in a case (sebe) which, before being carried away, will be hidden in an oil container 826] for the following reasons: to protect the person from magical practices; to prevent a donkey from eating it, an occurrence which would cause the child's death; to permit him to seek for himself health and a long life in the image of his hair which will have remained in good condition.

The rest of the hair is carried by a female relative to the river, into which it is thrown in honor of Faro. Next a band of white cotton called faro fini (literally, Faro's clothing), on which someone has "spat" kola nut juice, is bound around the forehead of the newly baptized baby to indicate his subjugation to the spirit.

The senior elder then examines with attention the hairline and the meeting point of the eyebrows on the forehead before announcing in a loud voice the signs determining the child's character (tere). Then he grasps the child and swings it /179/ seven times from east to west, eight times from south to north above the altar while giving it the forename (toko) which he has inherited from a dead person along with the spiritual principles (1). The griot recite the father's genealogy (burudyu); the senanku comes to joke with the newborn and gently pulls his nose and ears.

852 304 On the same day the blacksmith draws on the child's face the wolo ti, consisting of seven vertical frontal scars and two horizontal scars under each eye. The first scars represent the complete man (ni and dya); the second, representing the number two, symbol of

553 852 3. If the village has no Komo, the name may be given above the paternal Ytuafebla.

1. According to another source of information, the eldest son receives the forename of his paternal grandfather, the second son that of his father, and the following sons those of the mother's fathers and grandfathers.

852 304 "the unknown in creation" (see pp 23 and 24), recall man's existence in this state. Consequently he is conscious of the unknown and has the possibility of apprehending it. These scars act upon the *tere* of the child and give him at the same time strength, courage, virtue, as well as the strength to penetrate the knowledge of the invisible (1).

[842] 1. They may be redrawn at the root of the nose of an adult who has despaired of having any children, or on the thigh of a woman who wishes to be fertile. These scars, drawn at birth, are not the only ones which the Bambara wear. See S. de Ganay, "On a Form of Cicatrization among the Bambara."

852 553 326 In a blacksmith's family, the name is given near the paternal forge. In the presence of all the village artisans, the *kotigi* shaves the head of the newborn while an elder prepares seven small sticks, over each one of which he pronounces the name of an ancestor. The *kotigi*, whose eyes are blindfolded, pulls out in succession three sticks from the group; the third determines the name which he immediately proclaims. While the women chant, the father removes from his altar the *kongobwona* axe as well as the other ritual objects. The throat of a sheep is cut over all these objects while a prayer is recited. The newborn's head is rubbed first with the axe, then with shaved off hair saturated with sacrificial blood. This gesture introduces the child into the family group. Next he receives the scars of the blacksmiths.

Circumcision

304 561 Whereas in former times circumcision was mandatory and performed upon young men (about twenty years), it is now practiced at an early age if the parents are wealthy enough to afford the expenses involved. /180/ Because of this fact, a child of eight years may be circumcised with an adolescent of sixteen to eighteen years, whose parents are poor and have only slowly accumulated the articles necessary for the ceremony. These two boys will belong to the same age grade (*flã*), and will be comrades (*flani*) all their lives, having the same rights and duties. Age thus has a restricted role in social relations.

304
561
The date of the circumcision alone makes a coherent whole of a heterogeneous group—an age grade within /181/ which all the members owe each other friendship, confidence, and help in all phases of social and private life.

304
292
Once the operation has been decided upon, the relatives proceed first to make the cap worn during the seclusion. The white cloth is presented to the Niger by a uterine brother who addresses a prayer to Faro requesting permission to draw with black earth the designs that will cover it. They will protect the child who is in a state of impurity

[531]

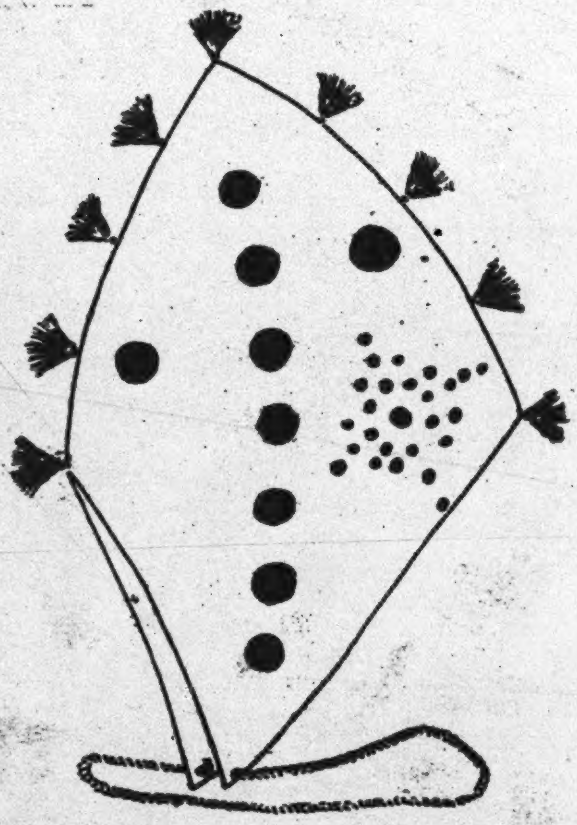

Fig. 14 — Cap of the circumcised Bambara. The nine black spots represent the child, his dya, and the cardinal points. The design at the right represents the sumangolo, or the coming of the twelve waters of the future. (See Fig. 3)

304 throughout the seclusion, the cap itself guaranteeing protection of his
292 head against the rays of fire from the fifth sky, koblẽnkaba (see Fig.
14).

Seven large black dots, vertically disposed, represent the child, 3,
304 and his dya, 4, as well as the man, 3, which he will later become, and
292 his future wife, 4. They also insure his protection from east to west.
531 The two other dots insure it from north to south. The cross of small
dots recalls the sumangolos, the "realization of the world" (1) and the purification obtained after the operation and the loss of the wanzo. Eight tassels (Faro's number) are placed on the cap, whose fringes were spun by a grandmother and are sewn on to "attract the forces of space." A ninth at the top is blackened with the spirit's earth. With his head thus covered, the circumcised boy is placed in the protective and purifying light of Faro. To operate upon a child without putting the cap on him would in fact amount to "bowing down before the acts of Mousso Koroni."

On his part, the blacksmith-circumciser makes preparations for the
304 operation, the essential instrument of which is a knife called boloko
326 kumba moru (literally, knife head, mother of the circumcision).
413 He himself has forged it and carries it in a small leather sheath hung
from his hip (see Fig. 15) (2).

The handle is slipped into a sort of iron sheath closed at one extremity called kurukun (literally, ball head) and open at the other called sukala (literally, sorcerer's handle). It is forged from one piece with the blade dyomuru fala (literally, orphan of the knife) and called "without pity" in archaic language.

The knife and its handle on the one hand, together with the metal sheath on the other, symbolize the person of the circumcised boy and the foreskin which is to be removed.

---

1. See p. 56, Fig. 4.

[582] 2. The endogamy among blacksmiths is attributed to their role in circumcision and to the fact that their tools, especially this knife, are impregnated with the wanzo of the adolescents.

304
326
532
413

Before the operation, the blacksmith washes the handle, an act which parallels /182/ the washing of the penis, and draws on the blade ritual designs either in charcoal or with boiled millet (1).

1. Some artisans have, once and for all, engraved the ritual designs on the blade.

The three figures če mani saba (literally, three little male persons) represent the first three circumcised men (Gwonna, Gwondo, and Gwonkè) who belonged to the blacksmiths' families at the village of Gwondougou. Every descendant of these ancestors must be circumcised like them. In making the drawing the operator says:

"Gwonna, Gwondo, Gwonkè, you have discovered iron and you withstood the pain (of the first circumcision), you feel shame neither by night nor by day; our feet are placed in your footsteps; the iron did not shame you, let it not shame us; it is the will of Faro... attack, attack, attack" (these last three words are addressed to the knife)(2).

2. Gwonna, gwondo, gwonkè, aw ye neke dañene,
ka neke gale munyu, aw ma malo šu ani kle,
an se daledo an se danola, neke maw malo a ka
na an malo, faro hakili do, šu šu šu.

The four figures, muso mani nani (literally, four little female persons), are the first four excised women, the inventors of pottery, who were the wives of these blacksmith.

The bird is the tatugu koroni, the incarnation of the eight ancestors of the blacksmiths. It recalls that circumcision is painful, hard, hot, comparable to the effects of fire, and that it is necessary to labor and suffer in order to withstand the cutting knife. This is also what the artisan recalls when, as he operates the children, he sings several times over:

"The knife is hot; the timorous man cannot stand it. It is a purification" (3).

3. A ka gwã, če ǰito tise ka muñu,
saniyali do.

304 532 413 The foreskin, which is tied by a string (drawn at the center of the blade) at the moment of the operation, is placed upon the pembele (black rectangle) and the cutting knife is tapped with a small wooden mallet, gossilã (drawn at the tip of the knife). These three figures receive during operation the offering of the first spurt of blood from the circumcised boy.

The line, which crosses the blade along the middle, separates the bird and the ancestors who gave proof of courage from the instruments used for the circumcision. As a division it symbolizes first of all that each grade of circumcised boys must be considered apart from the others. This is its social meaning. But the delicacy of the line itself has a meaning which applies to the individual: each one must, in his own image, be morally /183/ simple, just, and sensitive. By conforming to the rule symbolically indicated by the design, the individual will become a member of the elite.

304 187 821 The date of the operation is fixed when Mousso Koroni's star, sigi dolo (Sirius), rises in the evening at a certain point in the east (1).

After the boys to be operated have been counted, each gets ready, and on the appointed day the mother washes her son's penis with water in which an iron axe or hoe has been soaked. Then she prepares a dish [362] of rice, ye farina to "dish of man's bravery," which the child eats before he is led to the place of the operation, called yorola sakole "reserved place," located in the bush.

304 326 When all are gathered together the blacksmith-circumciser operates upon each one in turn after he has made them sit down in a circle on the ground. Pulling and twisting the foreskin, he ties it with the string which he keeps taut by securing its extremity between his toes. He next places the member upon the pembele, rests the knife /on the foreskin/ and taps /it/ with the wooden mallet. In this way he cuts off the foreskin while saying the following words:

"Circumcised one, your father, your grandfather, your great-grandfather, the father of that one too, the ear (the genitals) of the ancestors of the latter have withstood (the pain); you, yourself, withstand it as

---

1. See note 1 p. 47. To determine the date, however, the ndomo society may be consulted, which sometimes postpones it to keep its members longer.

304 326 /184/ they did. Faro, Teliko, Soba! You who are a man, your number is three; three of the penis, three of the twins, designs of the penis, it is the tradition, withstand it; Faro!" (ter) /repeat three times/(1).

1. Bolokode i fa, i moke, o ta fa,
o ta fa were, o ta fa klo masamaw ye
munyu, i yere ka munyu u cǒko la,
faro, teliko, soba, o ye če ta saba ye,
wulu wo, flani wo, kolo nyeke, lada
do, i ka munyu; faro (ter).

304
532
413

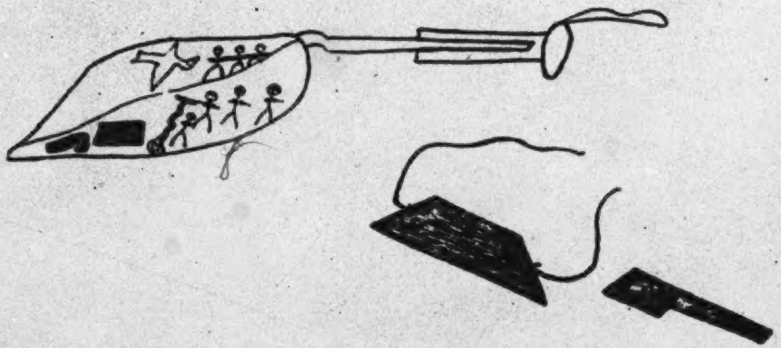

Fig. 15. — The circumcision knife decorated with ritual designs: three men and four women (representing the number seven); the bee eater symbolizing fire; the string; the small board; and the hammer used for the operation (these last two objects are reproduced on a larger scale to the right). (Drawing by an informant.)

304 326 831 After the removal, the operator makes scars upon the child's penis, called faro nyeke (literally, signs of Faro). Under the muscle wulu dyuru (literally, rope of the penis), a small hole is carefully made. Since the penis is considered a source of strength, the muscle which maintains it and erects it binds the circulation of the blood and helps man in all his acts. It is through this muscle that man transmits nerves to his children. A straight organ, firmly held in check, keeps the man and his descendants from numerous illnesses; the aim of this mutilation is to obtain complete and well formed foreskins and clitoris in the children of the party concerned. 304 326 843 After the perforation, the operator places in the orifice a little pepper and tomato juice while saying:

304 326 843 "Strong (when you form) the child, (you who form) the child (in the) womb, give it to Faro" (1).

1. Fariña dẽ, dẽzo dẽ, i ka di faro ma.

The embryo, placed in the feminine womb by Faro, receives force and virility from the pepper and is developed with the help of the tomato.

304 326 Two small holes are carefully made symbolizing man and his dya, while the following prayer is recited:

"Two holes of the penis; I draw the twins and I do it well, the skin of the person is captive, the skin of the person (gives) the twins; withstand them; Faro" (ter) (2).

2. Wulu wo fla, flani mba ti ka nẽ,
moko wolo ye dyo ye, moko wolo ye
flani nye, i ka munyu faro (ter).

"The skin of man, they say, and his entire body are miserable, captives. He is condemned to work, sweat, and suffer. But these two perforations indicate that man is always called upon to procreate twins, the visible images of Faro. Lacking them, he may have numerous children who will return to him, in sweat and work, the seed which he has placed in the maternal womb and which gives shape to the seeds given by Faro."

At the root of the penis, small lines, kolo nyeke, are made with the knife while the operator says:

"Mark of the penis, the genital organ receives this scarification because of the child (whom it will procreate); it is for this that man may be courageous; the one who has (this scar) is respected; great Faro, satiation of Faro" (3).

3. Kolo nyeke, wulu ti kũye dẽ koye,
a ye če fariña ko ye, min ya ke bonyedo,
faro ba, faro fa.

/185/ These recall the scars inflicted upon man's body and symbolize the desired multiplication of his offspring. Finally, they indicate the superiority of the one who has withstood and accepted pain.

304
326

If the patient has inherited the nĩ and the dya of a child who died just before his birth in the family (in the narrow sense), the penis is perforated while the following prayer is recited:

"You, so and so, the sons of your fathers are dead, may you replace them night and day, the hole in the penis has been made on you; "Faro" (ter) (1).

1. E kari macina, e fa dew bana, e ka o
lu soro šu ani kle la, wulu wo ke la e la;
faro (ter).

This perforation designates him to procreate the children his father has lost.

Seated in a circle, all the circumcised boys bleed upon the ground into individual holes, nyama bla dinge (literally, hole in which the nyama is left) (2), dug between their parted legs, thus passing on to the impure earth their wanzo and a part of their tere. Meanwhile, the circumciser recited the following prayer:

2. Dinge is a word in the ancient language.

"Blood of the penis, blood of the transfer of the wanzo, blood which chases the wanzo, enter the hole, may you pay (my debt), may you protect me (against the nyama of the foreskin), against bad fortune, against space; o mound" (ter) (3).

3. Wulu dyoli, wanzo fili dyoli,
wanzo gẽ dyoli, i bi dõ dinge kono,
i kã sara, i kã kisi a makunangoya, i ka
kisi kene ama; walawala (ter).

Then, he kneads a bit of blood-covered earth, the principle of which, bwa, is stronger than the wanzo (4) and makes from it a kind of dressing which he applies to the wounds. In this way the child also

4. The word bwa is provisionally translated by "essence, extract." One says dukukolo bwa or seke, "principle or extract of the earth."

304 recovers part of his tere. The organ is then held up by means of a
326 small apparatus, mine naw, made of a millet stem split in two in the shape of a fork.

"Circumcision is a sacrifice" (1). It is only valid if blood has run,

> 1. Bolokoli yè saraka ye.

and any patient who has not wet the ground with his blood is wounded on the thigh by the circumciser. The same is true for a child born
[732 without a foreskin. This detail must, moreover, be kept secret by
582] the members of his age grade, since the revelation of a malformation might prevent the individual concerned from contracting a marriage (2).

> 2. A woman might believe that these malformations are the sign that the man who was operated upon has not lost his wanzo, a fact which would be a definite obstacle to marriage.

/186/ When all is finished, the operator, holding the foreskins in his hand, says these words before burying them:

"We have transferred the wanzo of the circumcised child, may the tere be well" (3).

> 3. Ãn ye dẽ bolokole wanzo fili la,
> tere ka ñe.

304 After this, the circumcised boys have their caps put first on their
292 napes and foreheads representing the east-west direction, and then on
561 the sides of their heads representing the north-south direction. All their strength resides from then on in the headpiece which they will wear night and day, without removing it, during the entire period of seclusion.

304 The approach to the site of the operation is formally forbidden to
784 women and uncircumcised males. The one who might go there out of
561 curiosity "would contract the wanzo" (wanzo ba nofe, "the wanzo follows him"). Any uncircumcised boy who might break this law would have to take the consequences at the time of his own operation

304 784 561 which would be a dangerous one (1). The same rule applies to the enclosure, consisting of several huts, where the newly circumcised boys remain under the surveillance of the *sema*. The enclosure is situated at a distance of several tens of meters from the village in order to isolate the age grade. For all that touches them, such as clothing, sticks, sistrums, dishes, and refuse, with the exception of
561 the cap, is impregnated with their *wanzo*.

304 [431] The newly circumcised boys receive from their parents gifts of cowrie shells and food called *wanzo sababu yala*, "in honor of the *wanzo*," to speed their recovery.

[794] On the night which precedes the sixth day after the operation, a day called *daworo*, the children are initiated to the Komo (2).

The following day, the *sema* leads them to the edge of the river, where they wash their wounds for the first time. This act, which brings about direct intervention of the element in which Faro lives, has moreover a social meaning: it consecrates the age grade and from this moment on, the children belong for the rest of their lives to the same *flã*, exchanging jokes and insults which are suitable between *senãnku* (3). It must be noted that this very simple act of communal ablution constitutes the inauguration of an age grade of circumcised boys and sets off from that moment all the rights and obligations its members will have toward each other.

A meal, eaten in common and accompanied by songs and dances, ends the ceremonies of the *daworo*. Hereafter the ablutions are repeated daily until the wounds are healed.

304 561 881 /187/ On the last day, all that has been in contact with the newly circumcised boys is gathered together at a crossroad near the enclosure.

---

1. The approach of the virulent *wanzo* of the uncircumcised boy acts upon those of the boys undergoing the operations and afflicts them in the genital organs.

2. See p. 203.

3. See p. 119.

304
561
881
Sistrums, sticks, mats, as well as the wood from the huts and the refuse that has been carefully swept up, are put in a pile which is ignited. Each circumcised boy jumps over the fire three times and then runs to his home without looking back. In this way he finally loses the rest of the *wanzo* which he has kept after the operation. Only his cap is brought back and given his mother who keeps it until her death. On the next day, after putting on new clothes the boy is taught what he himself is in the following words: "the person is *yo* and *yo* is the person (1)" and in the circumstances of creation. He is then admitted completely into the society of the male adults of his village.

Circumcision has a profound effect upon the person. At this moment, the child loses the physical support of the female sex which is the foreskin; he becomes a man (*vir*) ready to fulfill his role of a male capable of reproducing. Moreover, he "throws off his *wanzo*" which escapes from the body at the moment of the operation (2). In his leap above the fire this force joins, in the altars and the mask of the *ndomo*, the forces of both the uncircumcised and the circumcised of the preceding years (3).

At the same time the circumcised boy improves his *tere*, for this latter force, diminished by the bloody operation, increases at the moment when the child dons his new clothing. Until his circumcision, the child only performed minor tasks; after circumcision he is considered a male adult and officially admitted to the rituals and labors of the community.

1. *Ma ye yo ye, yo ye ma ye.* On *yo* see pp. 18-26.

[171]

2. *Wanzo file la.* The wearing of clothing and ornaments assumes great importance in the loss of the *wanzo*. Among the Bozo, where the children are circumcised very young, they are not considered to have lost their *wanzo* until the moment these clothes are given to them.

3. See p. 227.

304 766 The importance of the wanzo and the necessity of its leaving the person are such that in the case where a child dies uncircumcised, the operation is performed on his corpse. If this is not possible, the circumciser cuts his left ear and says:

"I cut the ear instead of circumcision" (1).

1. Mba klo tike bolokoli nona bi la ye.

It is buried with the corpse or kept in the paternal home, but the wanzo leaves the child. If the operation was not performed, it would contribute to the formation of a very dangerous nyama, which would be more aggressive even than that of an old man and from which the society would have to suffer.

/188/

Excision

304 323 189 The operation is performed with a little iron knife by a potter, the wife of a blacksmith. The blade, which is male, represents the sun; the handle, which is female, represents both the clitoris and the moon. The woman protects herself from the wanzo of the newly excised girls by wearing bracelets and charms and by smearing a black salve on her eyes.

304 323 The operation is performed in full daylight at the edge of the village and in the presence of the assembled kinsmen. In certain localities it takes place near the potters' hearth. Each little girl is seated in turn on an inverted pot and is operated upon while prayers are recited. Just as the boy whose foreskin is badly formed is wounded on the thigh, so the girl in the same situation is considered excised if she submits to a test which replaces excision. In the latter case, the woman operator places a hedgehog skin between the girl's thighs and presses these together energetically so as to make the blood run (2).

2. In case the girl is the daughter of a blacksmith, the blood running over the pottery indicates her future role as potter (see p. 169.

The young girls must neither cry nor moan; on the contrary, they sing to exalt the departure of the wanzo.

304 During the seclusion, they wear about their head a piece of white
[592 cloth, Faro's color, which has the same function as the cap of the
534] circumcised boy. They shake a gourd bolokode barani, filled with eight
grains or small pebbles, whose sound keeps passers-by away. The
leaps, which they perform over the fire made of clothes, gourds, and
refuse that have been ignited, end the seclusion and rid them of their
wanzo, which goes to settle in the altars of the ndomo.

It is said of a young girl who was well excised that she is well behaved and carries herself with dignity. On the contrary, it is said of a girl of light morals "that her hands were not washed clean" (1).

1. A bolo ma ko ka dye ya.

which means that she was improperly excised.

Funerals

761 The effect of death is to dissociate the elements composing the
person. The body becomes a corpse (šu) from which the /189/ ni and
764 the dya escape to follow their particular destinies, while the tere is
115 transformed into nyama, an active and dangerous force which wanders
about the deceased. The funeral rites aim first to channel the deceased's spiritual elements which must be conserved in the interest of the deceased as well as that of the community. Moreover, through the care given to the body and to these elements, the memory of the dead person is piously kept up. The notion of a final resurrection, promised to all who have lived, inspires these preparations. The bones of the deceased, which are like the exuvia of his physical body, its solid and durable framework, join the exuvia of his soul which is kept in the altars of the Komo. Thus, at the end of time, the dead man "will rise and, to everyone's joy, join his family."

764 The funeral rites, which the Bambara have always celebrated, have
evolved along with their beliefs. At the time when the cult of the
balanza was flourishing, the dead bodies were hung from trees until
they rotted, their bones picked up and kept by their descendants.
[532] The ancestors of the Gwonna then carved pieces of sunzun wood
called mani (literally, little person) in the image of the dead. The
length of the wood was proportionate to the length of the body; the
head, arms, legs, and genitals were carefully reproduced. The mani

764 were kept by the village patriarch and the cult of the ancestors was
celebrated upon these altars.

At the present time, the body is buried during rites in which the
Komo plays an important role for the initiates. As soon as a member
763 is seriously ill, the family head places upon the dying man's chest
778 the portable altar, *kere la boli ni*, which belongs to the community.
He does not leave the bedside in order to catch the last breath. Immediately after death, without turning back or saying a word to anyone, he goes to the chief of the Komo who places the object in the
[775] sanctuary where the altars are kept. The soul is introduced into the
nimara boli (1).

---

[843] 1. See p. 192. In former times, the soul of the dead man was caught between two gourds which were then joined together and hung on the conjugal bed. When the woman became pregnant, the gourds were broken over her abdomen in order to make the soul penetrate the foetus. Later on this method of transmission of the soul was no longer possible because of the impurity brought about by "frivolous discussions regarding the arrangements and situations of creation."

764 Upon his return to the house of the deceased, the family head
brushes his hand over the dead man's face to gather his *nyama* which
he then entrusts to Pemba by rubbing the cavity in the family *pembele*
"so that the total of the work he has accomplished during his life will
not be dissolved by death, but will be like /190/ an accumulated
force serving the community, and so that his intelligence, his qualities,
and his skill in different kinds of work, especially in agriculture, will
not be lost but will be found in other members of the family. The
[778] block of wood, acting as an altar for storing the forces, preserves this
nyama until a new birth occurs in the family" (2).

---

2. S. De Ganay, "*Aspects de mythologie et de symbolique bambara*," p. 199.

764 The corpse is the object of particular care. In the case of a blacksmith or a Soma, two stalks of millet are placed for a few moments on either side "for the nostalgia of the body" (1). This custom indicates that the soul, temporarily in the Komo altar, and the exuvia which will later replace it, feel sad for the animate body that will become the prey of the termites. These stalks symbolize the two ancestors who accompanied Koumabana into the great beyond, the death in this case repeating in some way the story of the appearance of death on the world (2).

The combination of the body and the two symbols adds up to the number three, the male number, and recalls the three taps given to the newborn of male sex at his birth. A few moments later a kinsman places the stalks on each side of the door to the dead man's house. The mourners who come to convey their condolences crouch before [576] them, putting cowrie shells at their feet in the greatest silence, for "to talk and to cry increases the sins of the dead man, and tears increase his burden."

764 554 If the deceased is an important personage, especially if he is chief of the village or head of a family, the signs of the actual world and the future world (bolo ti doniya, Fig. 1) are sometimes drawn upon his index finger and thumb. The senanku, the blacksmiths, and the griot come to recite his device (barama) and receive in thanks the clothes which belonged to him.

764 The eldest son of the Komo chief, who is first advised of the death, brings the news to his father who asks him to announce it to the men of his age grade. Each of the subsequent age grade is notified by a delegate from the preceding one. Finally, the young circumcised men, recently admitted to the society, go to tell the women and the uncircumcised the hour when the mask is to come out. However, only the funeral of an elder, a village or district chief, obligates all the members to move about.

---

1. Fari nana fi, literally, "body of the black face."

2. See pp. 45, 46.

764 The members of the oldest age grade go to the home of the deceased. The eldest son of the Komo chief, holding /191/ the ritual whistle between his teeth, whistles alternatively in the right and left ears, then into the eyes of the dead man, which he closes while pulling his two toes. He then says: "So and so has not answered."

The chief of the Komo next comes to "touch the corpse while it is still warm in order to return to Faro that which belongs to him." He then draws a line upon the body (see Fig. 16) with his little finger dipped in boiled millet mash. In 1 and 2, the strength of the little finger acts by sending away the semen which is in the blood. In 4, it suppresses the voice (for the dead man will talk no more) as well as "the tastes, savors, and appetites of his tongue, the power of his jaws, and the air in his mouth." In 5 it returns all that was in his head, such as ideas, experiences, opinions, folly, and wisdom, through the left ear, removing all the sounds it has heard, the good as well as the bad. Next the ear is plugged. Whatever it has heard will return to the one who will inherit his soul and his double, as the dead man in the grave must hear only with his right ear the whistle of the Komo and all that will be communicated to him. In 6 it removes "the will power and stubbornness" so that the dead may submit to Faro even in the grave. It next touches the navel, 3, and all the joints to send back the semen which lies in man's marrow.

794
764 The corpse is then transported into a contiguous chamber for an ablution performed by a member of the society who wears over his shoulder the sack containing the Komo altars and who drones out a song celebrating the Soma Moriba Sidibé (1). The two millet stalks are placed upon the body during the ablutions "which purify and calm his soul."

764 Dressed in its finest clothes, the body is brought back to the main room where its hair is shaved. The deceased's own individual altar is given to the chief of the Komo who places it near the nimara boli. It is at this time that the bell bearer (grindavo) goes to the village

1. The ablution is performed with the contents of a large gourd (dyuru fle nyɛ́) to which are added the contents of a small gourd (dye fle nyɛ) which represents the "last water of the dead man."

764 and announces that the mask is about to be brought out so that people would go back to their home. At noon, a member of the society puts on the paraphernalia of the Komo society and walks forth, preceded by the son of the chief, who whistles a funeral tune. He wears on his shoulder the sack containing the altars and carries in his right hand the axe and the dagger. The two men are followed by the newly circumcised boys carrying the body and by the members who are present. At the burial ground (*šudoyoro*) the procession places the corpse on its back near the grave freshly dug by the young /192, Fig. 16 appears here in original text/ /193/ men of the most recent age grade (1). To the rhythm beaten out by three blacksmith drummers, [535]

the son of the deceased and later all the participants dance in turn, kicking up with their feet a little earth over the corpse at the end of each musical phrase.

A female goat (or a male one) brought by the family is sacrificed and the blood runs in part over the altars and in part into the grave, while the chief of the Komo recites the following prayer:

"Let (your family) rest in peace; let our harvests be blessed; let your happiness come to us later; your sacrifices are performed" (2).

The sacrifice performed over the altars is a repetition of that which has already been accomplished in the sanctuary at the time the deceased's soul is deposited. But, to the young initiates who do not know it, it is at this moment only that the transfer of the soul to the *nimara boli* is effected through the vehicle of the sacrificial blood.

The eldest man of the age grade sucks up with the whistle of the Komo a little blood from the slit throat of the animal and blows on the corpse; another elder sucks up some blood in turn and blows it into the grave. A third does the same and whistles into the right ear of the corpse "so that the deceased, having received a complete sacrifice, may not ask for anything else." A *griot* next takes the whistles and

---

1. In the vicinity of Ségou the dead are most frequently buried in the fields; a ronier is planted over the grave.

2. *I ka du to; ana senefɛ ka barka;*
i ka here ka na an ye; i ka saraka be bwora.

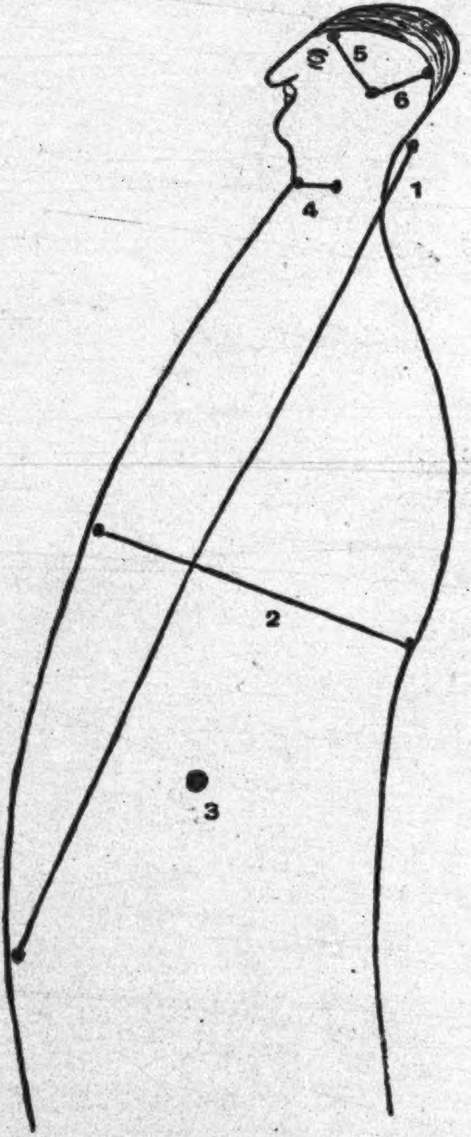

Fig. 16 — Drawing made with millet mash by the chief of the Komo on a cadaver. (Drawing by an informant.)

764 inserts them into the deceased's throat; he fills his own mouth with food previously brought forth by a woman and blows until the stomach of the deceased is filled. The rest of the food is placed near the dead man who is lowered into the grave by his sons and daughters. He is laid down on his right side, facing east, in the hole, sele dẽ, dug at the bottom of the grave. The two stalks of millet are placed next to him; they are more powerful than the forces of decay and destruction, and affirm the immortality of the ancestors. Together with the corpse, they are the image of the first three who died and the whole expresses the hope of resurrection promised to men.

While songs burst forth in honor of the deceased, the young men cover him with fresh branches before closing the grave; above the grave the masker whistles to proclaim that hereafter it is he who will settle the problems of the dead.

[768] The objects formerly belonging to the deceased, such as bed, mat, pipe, and razor, are then put into a pile with a little bag containing his hair. Fire is set to the pile while the chief of the Komo recites the following prayer: "Let your burned possessions leave to wait /194 before you, let them leave in smoke. We are behind, we are not in front of you; ask happiness for us. Let all the dyo with the pincers and the anvil come, let peace come" (1).

1. I ka fẽ maralew dyenina, n ka ta i kono i nye, m bita šiši fe, an bi ko an ti nye, i ka here nyini ã nye; ka dyow ani bala ani kula, dũ ka na.

The masker dances about the hearth, whistling and throwing up dust. The children of the deceased who are impregnated with his nyama leap three times over the flame; the force, absorbed by the smoke, is dissipated with it.

The meat of the sacrificed animal is cooked, eaten by the participants, and the containers are broken.

769 Three days after the death, the family goes down to the river bank and throws in the clothing of the deceased as well as a plate of food; both will serve to clothe and feed the double. They then recite the following prayer:

"My father Faro, a person of my family has died, here is his offering of the three days; make him return again in a woman's womb" (2).

769 2. *M fa faro n so ma bana a dyanza ye kle saba kono ye; ni ye se i ka seki, muso kono ma*.

The offering of food is then renewed every three days until a birth brings about the return of the double into the world of the living.

If the dead man has no descendants, his altar remains forever in the sanctuary of the Komo near the *nimara boli*. Otherwise, it is returned within seven days to the eldest son or to the brother who then becomes the head of the family.

During the night following the seventh day, the soul returns to eat
769 and drink in the hut of the widow who lives alone. All the dishes con-
775 taining water or food are therefore carefully emptied and cleaned. The same meal is offered to the deceased the night following the fortieth day after the death. The widow comes out of her house on the
[765] eighth day if she is poor and must work for a living; otherwise, on the forty-first day.

At the end of a variable period of time, the soul, the double, and the name of the deceased are received by a child who is born into the family. The exuvia, *mana* or *folo* of the soul, remains in the sanctuary of the Komo as a permanent testimony to his existence on earth. It is conserved by Faro who watches over it, and maintained by the offerings of the living who will in this way bring it to the final resurrection.

When the deceased does not belong to the Komo society, the rites are celebrated over the altars of the societies to which he belongs; his soul is likewise conserved by them. The spiritual principles /195/ of the women, grouped in institutions comparable to those of men, called *muso dye*, are the object of the same attentions in which is found the rhythm of four days, the female number.

766 If the deceased was too poor for all the rituals, which are always costly, to be observed, two gourds of water are prepared and placed one at the head, the other at the feet of the corpse; he is then lifted in such a way that his image is reflected in the water. This accomplished, eight cowrie shells are placed at his head and eight at his feet and the gourds are covered with a winnowing tray; the image thus conserved is supposedly reflected in the *kaba mana*, the fourth sky, where Faro,
776 symbolized by the cowrie shells, passes judgment on its state of purity.
787 A divining rite is then performed. If the man is pure, the villagers

776 787 attend his burial despite the fact that the rituals have not been performed. If not, he is abandoned to the care of his family.

764 775 To neglect the rituals assuring life in the beyond and the security of the living causes the shadow šu dya, or the ghost šu kere dye (literally, white side of the dead man), to arise and present itself under the same which the dead man had on earth, to claim his due from his descendants.

Ancestor Cult

769 778 In the entryway of some residences a supporting stake (čĕ dloma), sometimes marked by seven notches, represents the founding ancestor of the family. On the anniversary of his death the stake is oiled "to refresh his soul." In addition, each year the owner of the house sacrifices to all the ancestors on the family altar, on the stake, and on the threshold of the door. In some villages the ancestors are called upon by tapping the threshold with a little wooden hammer, dyele kala ni, which represents them.

In the courtyards, pieces of wood stuck in the ground (ǰigi semen dloma) represent the paternal uncle, the brother of the founder, and are used as seats for the heads of families who lean against them "in order to lean well upon the traditions." Farmers, before leaving for the fields, rub their hoes on them to show them to the ancestors.

769 241 Before planting the women give the head of the family a ball of raw millet, which he lines up to represent the dead according to age and rank. Then he gives them a pinch of the seed beginning with the one representing the most recent deceased and calling successively all the dead by name. The paste and the seeds are then put in water and the mash thus obtained is poured on the /196/ doorposts to the entryway of the family house upon which the blood of a sacrificial victim also is poured. When the planting time comes, the chief who has prepared the mash made with a few grains taken from the seeds distributes this to the women, beginning with the one who represents the oldest deceased. He asks the ancestors to watch over, during the germination period, the soul of the millet which will descend into the seed with the first rainfall. When the millet has reached maturity, the first seeds harvested are placed in a pot on the threshing floor where the grain will be threshed later, and are distributed to the women in the same manner as the time of planting, the oldest of the deceased having to receive the first of the seed.

769 At an annual ceremony presided over by the Komo, the members assemble in honor of thedead. It is called *šu* *sɔ* *sibiri*, "Saturday of the sacrifice to the dead" and is celebrated on a Saturday at the time when the ears are being formed in the millet fields.

The *kotigi* removes the ancestral tools from their shelter and carries them to the graves. Then the chief of the Komo and his assistants, accompanied by the maskers, carry the altars to the cemetery while singing. Each grave is put for a moment into contact with the *nimara* *boli* and the *nyama* *boli*; the exuviae of the souls of the dead each visit the bodies they once animated. To the rhythm *šu* *bara*, "rhythm of the dead, " played on the drums, the maskers dance and sing around the graves while mock labor is carried out with each of the ancestral tools. During the whole ceremony the kinsmen wail, the men near the graves and the women in the house. A victim is sacrificed, cut up, and cooked in new pots which are broken after they have been used in order to avoid the contagion of the *nyama* of the dead. The dances of the maskers are performed during the two days that follow. In some villages the ceremony is repeated after the harvest has been threshed.

Exceptional Cases

The Stillborn

845
783 It is said of a stillborn child that he has lost both his soul and his double, that is to say, his complete being. The parents who are responsible to Faro for this disaster are obliged to find and recapture the spiritual elements of their child, the woman the soul, and the man the double, in the course of long and sometimes painful rituals.

As soon as the woman is able to go out after the birth, both parents are led, shaved and naked, before the members of the family assembled in the courtyard. As testimony /197/ of the deceased to Faro, their hair, mixed with that of the child, is buried in the wall of their
[824] home. Then a tomato, representing the foetus, is introduced into a large incision made in the woman's thigh. The man crouches and drinks the juice which drips from the fruit and which symbolizes the double. Each one bows before the elders of the family, holding their hands behind their backs, to apologize for the fault committed, sayiing: "Here is my humiliated (sex) behind me" (1).

845
783
1. A ngari ko le ye ngo (ngari is a word of the archaic language which expresses submission.)

Each person responds by striking their genital organs with the little finger: "It is well humiliated" (2).

[826] 2. A ngari ko karu. The little finger is the symbol of the whole person; to strike with it is to acquiesce with all one's being.

They are led to the door of their home where the village elders of both sexes are gathered; they repeat their apologies to which the same response is given, accompanied by the same gesture of acquiescence.

The chief of the Komo and three elders of his age grade who have
[304] never broken any taboos led them to the river bank where they undergo
a new circumcision for the man and a new excision for the woman; the blood which is a gift to Faro must fall into the water. This operation is called "purification of the foreskin" (yiriyiri tige) and the pain suffered has an expiatory value.

The sixth day after the operation the members, gathered on the village square (3), dance and sing to the rhythm of the Komo, which

3. This ceremony, called daworo is comparable to that celebrated on the sixth day after circumcision.

is furiously beaten out, in the following words:

"Circumcised children, it is not good to break the taboo of the anus. I am telling you, Soma and members of the society, do not count their faults. Faro "(ter) (4).

4. (I ye ye) boloko dew tne tyẽ mañi boda la; nye fo aw ye somaw moko ka na jigi u la; faro (ter). That is to say, "forgive them." The word anus here
[195] replaces the word genitals which, according to propriety, is not spoken.

845
783

The parents are led to the square and turn, open-mouthed, around the circle of dancers, seeking to recapture the soul and the double of their child who is present during the ceremony, attracted by the rhythm and visible to them alone. They turn and dance until they fall into a sort of trance called "fainting of the Komo" during which the soul and the double enter them. If the entrance occurs through the mouth, they cease their cries; if it is through the nose, they appear to smother; if by the eyes, their tears run.

/198/ The rhythm then becomes progressively fainter. Soon it is only a murmur. In order not to interrupt the action, in order that the double and the soul may penetrate gently the stretched out bodies, the murmur decreases further to die out gradually. The drummers' sticks alone beat the air in silence, performing the rhythm called "the drum of the soul" (ni dunu foli). With mouths shut so as not to frighten the invisible, the participants softly drone out a song, ni bonye, which calms the soul and incites it to penetrate the two suffering parents. The latter, accompanied by the musicians, are led back home. They are beaten with sticks so that the spiritual principles may not leave them while that which has just been accomplished is proclaimed in a loud voice as well as the shame and suffering voluntarily submitted to. They are then fanned for the "repose of the child's soul."

The following day, the chief of the Komo and his age grade go to the cemetery to remove the bones of the stillborn child. They place them on the ground, examine them in the open, and dance around them to the rhythm of "the drum of the bones" (kolo dunu) while singing:

"White bones, you, dead ones! I have come to see you" (1). Then

1. Kolo dyew aw šu ne nǰa na bo ye.

the grave is once more closed over them.

The man and the woman are then called to the field of the dead (šu foro) to swear an oath. While their mouths are full of rain water or water from the Niger, a participant in the ceremony leans over and, "to heat the liquid with the strength of words," recites the following prayer under their chins:

"Kill me if I do it twice: good or bad, chance comes from several places. Faro" (ter) (2).

845
783 2. Ni nya ke šyẽ fla i ka n fa; ka kadi ka kago, gariseke bo fã ka čã; faro (ter).

The water swallowed after these words constitutes a solemn promise to Faro not to repeat the fault.

Next, they are carried home, the man by two members of the society and the woman by three of her companions, so that their toes, [824] the temporary lodging places of the spiritual principles which have returned to them, may not touch the impure earth. They remain three and four days, respectively, on their mats without making a movement. On the seventeenth day, with a thousand precautions, they may resume a more normal life, but they will be entirely free only when a birth occurring in the family will eliminate from their bodies the soul and the double of the dead child by transferring these to the newborn.

/199/ Death of an Uncircumcised Boy

763 When an uncircumcised boy is seriously ill the chief of the ndomo (1) has a rooster sacrificed in order to find out if recovery is possible.

1. See p. 222.

In the case of a negative response the children, taking turns night and day, go into the bush and sound off the ritual objects under the leadership of an initiate. In this way the soul of the dying boy is certain to be captured at the moment of death and channeled by the sound wave and led into the ritual objects themselves. Two initiates are posted near the home of the sick and, as soon as they learn of his death, they go to warn the children in the bush to make them stop playing. The chief sits down facing the west and recites a prayer; then he sacrifices the victims offered by the family.

766 Before the corpse is buried, it is circumcised, and the wanzo goes [304] to settle in the mask of the ndomo. During the night following the burial the members go to the fresh grave and sound the ritual instruments which contain the soul. Each year they repeat this action above the children's graves following the threshing of the harvest to "awaken the dead and to tell them that their souls are not lost."

Death at War

727 When a warrior returns home in good health after a battle, the sacrificer or the village chief orders the performance of the ni yere klo, "game of the vibration of the soul," to celebrate his return. Men and women gather in the village square to sing: "The soul is come, the light of the soul is come, the drum of the soul will be played for it" (1). Next they form a circle and turning first in one direction and then in the other, throw a little water on the head of the individual concerned, thus "refreshing his soul."

766 When a man dies at war, the rituals whose object he becomes bring into play the nyama boli of the Komo, the altar dedicated to the conservation of the souls of those who die a vilent death.

In former times the stone which had mortally hit a warrior was carefully kept. The corpse was washed /200/ on cowries and on stones used for slings because its nyama, which impregnated them, made them more efficient in killing. The body was also transported to the exit of the village where each villager offered cowrie shells while he pronounced the name of the victim. Then it was swung three times in the direction of the village, first feet forward and next head forward. After all the villagers had retired to their homes, the Komo was brought out. The stone that had killed the man was struck to call forth his soul; then it was rubbed on the nyama boli to make the soul penetrate the altar. A dance was held with the altar, and the body [824] was buried and covered with fresh branches of ngamyã (2). The grave was watered to "refresh the dead man" while the chief

was watered to "refresh the dead man" while the chief of the Komo made sacrifices over the nyama and the nimara boli.

Death Away from Home

766 167 The necessity of performing the rituals as well as their detailed quality are such that a Bambara is always advised against expatriation.

1. Ni nana, ni yelengu nana, ni dunu na fo o la.

2. Celtis integrifolia.

766 In fact, if he dies far away his breath cannot be captured nor can the
167 successive transfers be made. For this reason the family head disclaims all responsibility in such a case by warning those who are about to leave for along time of the impossibility of fulfilling his duties toward them.

Nevertheless, a ritual has been instituted for the young men obliged
766 to leave the family groups because of military service. The case is submitted to the chief of the Komo and the party concerned has two goats sacrificed over the altars. While the blood runs, the chief asks the Komo to watch over the soul and to be willing to reclaim it as it would if the person died among his family.

If the news of the death of an absent person spreads, the family
[187] questions the Komo through divining procedures to find out if the soul has returned and if, by this fact, order has been reestablished.

Death by Lightning and Drowning

761 Death which occurs in certain ways considered abnormal and a proof of Faro's wrath does not permit the reincarnation of the spiritual
766 principles. This is true of men killed by the Komo for sorcery, and of people struck by lightning for having broken a taboo of Faro's. Their /201/ soul and their double are lost forever to their descendants, and their bodies thrown into the common grave.

Drowning is either accidental or due to Faro's wrath, in which case the corpse is returned with the nose and navel cut. In both instances, the double preserved in the water is not lost, but sacrifices are necessary for the return of the soul and of the double to a child in the family.

If the body has not risen to the surface, the father of the drowned person has the right to mourn him only when all the rituals have been performed. He asks the chief of the Komo to intercede with Faro to obtain his permission to search for the body in the water. He offers seven tomatoes which the chief throws into the water in exchange for the corpse in the presence of seven elders of his age grade. Some Bozo mobilized for this purpose dive in to bring back the body. The chief cuts the nose and the navel which he throws into the water as an offering. Then the corpse is placed flat on its stomach and pressed
[821] vigorously to extract the water, for to bury it full of water is equivalent to "burying rain" and dooming the countryside to drought.

766 After the burial,[1] a drawing is made on the sanctuary with millet
mash made of grain from Faro's field; this drawing represents the
532 dead man and the mutilations inflicted upon him. The seven attending
elders close their eyes as a sign of respect in order not to "register a
drawing made for Faro." In fact, its aim is to obtain the spirit's pity
and to ask him to include the dead among the count he keeps of his
[769] subjects. It is also in front of this drawing that the family will come
to make an offering and mourn every week.

II. Rituals of the Refuse

364 The debris, sweepings, and refuse collected in the homes, court-
778 yards, public squares, and crossroads all contain forces which men
have communicated to them.

The rituals, of which these are the objects and which vary according to their origin, have as their aim the offering of these forces to Faro who returns them to men purified and regenerated in the form of rainwater with which he irrigates the fields and in the form of ponds and wells. They are thus redistributed and used again for the benefit of the community.

The refuse at the crossroads, called dangu kalaw, stalks or straw of the dangu, contains the force, nyama, of all the beings that have trampled it.

/202/ The refuse from the homes contains the wanzo of the uncircumcised, the nyama which the inhabitants have to bear for having killed animals or insects and for having received insults, and their good or bad tere. These forces, called wanzo dla (literally, to arrange the wanzo) (1) or nyama dla, constantly come to the aid of all the members of the family; they improve the wanzo of the uncircumcised, facilitate the women's childbirth, and renew the vigor of the old men. A small altar, konye, kept in the room reserved for the head of the family, is dedicated to them.

After the coming out of the Koma, the sweepings gathered on the spot where the dances take place contain the forces of the members.

1. This term is applied to them particularly
in houses where there are many children.

[1] [Of a drowned person — Analyst]

364 778 782 (a) Household refuse, collected individually, is placed in separate piles inside shallow circular excavations dug out at the approaches to the villages (see Pl. VI, b). Among wealthy people a goat is sacrificed each week by having its throat cut above the pile on which the altar is temporarily placed. The sacrifice effects a double exchange: the blood nourishes the altar while at the same time it brings about the transfer into the altar of the forces contained in the refuse.

364 778 776 Every two months and seven days, at the decision of the village chief, these individual rubbish piles are removed from the holes. Each person burns his own pile and inhales the smoke. The ashes are deposited on the river bank, dampened so that the wind does not blow them away, and abandoned during seven days, a period during which Faro "comes to visit them and to bless them."

On the eighth day, after a meeting at the chief's residence, the villagers gather at the crossroads to burn the collective refuse piles, to collect the ashes, and to transport them, accompanied by the rhythm wanzo foli beaten on the drums, to the river bank where they will join those of the individual heaps.

After a sacrifice offered upon the konye altars of the participants, the griot of the Komo is struck by the nyama boli until he goes into a trance and flings himself into the water without saying a word. All must throw their ashes in after him before he comes out again. At that moment the spittles of the man who flutters about in the water are collected as a gift from Faro in exchange for the refuse which has been thrown in. Each person rubs his hands and feet with the saliva and upon returning, which is done in silence, impregnates the threshold of his home with it as evidence of the sacrifice so that Faro "might recognize his own and protect their life."

/203/ The following Thursday the people gather to dance according to the rhythms appropriate to each sex and generation. In the evening, each person places his foot on the site of the refuse heap; then all gather at the crossroads to offer the Soba spirit some millet, cotton, and kola nuts. The ceremony ends with a meeting at the chief's residence where he gives advice and encourages each one to respect tradition and to honor the ancestors and the protecting spirits.

(b) After the comings out of the Komo, the refuse is swept up and deposited in front of the sanctuary. Each participant leaps over the pile three times to communicate his nyama to it. In the evening the masker circles and whistles around the heap on which fire is lit while

364 the chief throws dust three times to the four cardinal points. The
masker then stands in the wind in such a way as to receive the smoke;
778 the chief and the members crouch in line behind him with their mouths
796 open to inhale better. When the wind changes its direction they all
move to continue this fumigation, *wušuli*, which constitutes a purification as well as an increment of forces. At the moment the fire is almost out, the most courageous of the participants stamps on it in order to assimilate better the *nyama* which it exudes. The ashes,
[804] gathered by the chief, are distributed, the unit of measurement being
the gourd *mure*. An important share goes to the *nyama boli*, another is given as an offering to Faro, and a third is distributed among the members.

Several days later, the group goes to the river bank to the sound of drums beating out the *murumuruw foli* (literally, rhythm of the refuse); they throw the ashes reserved for Faro into the water and, continuing to dance, return to the village.

364 Those ashes given to the members are used to prepare the potass
which is mixed into the millet cake, the daily food of the Bambara,
778 and which will make the members of the family share in the powers
252 contained in the *nyamanto*.

The eating of this mixture closes the cycle of the transfer of forces,
364 which were temporarily communicated to the refuse by the individuals,
778 then recovered by Faro, and finally redistributed to the social body.

III. Rain Rites

789 At the time the first work is done in the fields, a drawing is made
241 with millet mash upon the tree of the Kworè in the shape of a lozenge
inscribed within a rectangle, which represents "the great fire which issued /204/ from the cardinal angles" at the time of their creation. While this is being done, the following words are spoken: "The four elbows (the lozenge) are the fire of the angles; here is the anniversary of the Kworè." The clearing of the field or the first plowing always symbolizes the very first clearing obtained through fire.

During the month of May, the members of the Kworè society make
789 sacrifices upon their altars before the first rumbling of thunder in
796 order to purify the first sky where clouds are formed from the impure
794 passage of Mousso Koroni. The chief gathers the members about the
tree and recites the following prayer:

789 796 794 "I have come to you, Kworè, if (the cloud) is black in the east, let it come; black in the west, let it come; black in the south, let it come; black in the north, let it come; black above, let it come, and then let it give a great water" (1). He next pours on the ground the millet mash and the blood of fowls brought by each member. The initiation of the new members takes place during this ceremony.

After the drinking of millet beer which follows the ceremonies, it is customary to tell the story of Mousso Koroni chased by Pemba and pursued by Faro.

If, in spite of this the rain does not come soon enough, the members gather at the foot of the tree and bring with them an iron axhead which is placed in fresh water. The water is next poured out at the foot of the tree; it symbolizes the cold which the spirits of the Kworè are subjected to in the second sky during their struggles to make the rain come through.

In certain villages the sacrifices to the Kworè and to Faro are offered at the same time. At Massala and Soroba, the members go to the shore of the Niger, carrying the kworę boli with them. The bit of water which it contains is poured into the river and replaced while a prayer is addressed to Faro. The throat of a victim is then cut and some copper is thrown into the river. The altar is shaken above the water to imitate the noise of thunder and rain. Upon their return to the village, the members light a fire at the foot of the Kworè tree and place thunder stones in its embers.

"Heating the stones shakes up their soul"; when they are hot, they are plunged into cold water "to warm and to agitate the soul of water." The smoke from the fire, as well as the heat absorbed by the stones and the water, force the rain to fall.

/205/ Victims are sacrificed and the members return to the village around which they circle six times, beginning at the west. Then they return the nimara boli to the sanctuary and the elders who represent the spirit dance about on one foot to the sound of drums

1. Ne nani na kwore nani na; a ma fi korona a ka na; a ma fi klebi a ka na; a ma fi woro dugu a ka na; a ma fi keñeka a ka na; a ma fi sãfe a ka na; otumana a ka ke dyi ba ye.

789 as an imitation of Faro who has only one lower limb. The altar, which
796 is placed in the sanctuary by the chief who enters it walking backwards,
794 receives as an offering a little water from the Niger in which thunder
stones have been soaking since the night before to be "refreshed." The same libation is made on the kwore boli. After returning to the home of the chief of the Komo, libations of millet mash are poured upon the walls of his house; then, in the name of Faro, the nimara boli, and the Kworè, the throat of a white ram is cut; the flesh of the animal will be thrown into the river, at the conclusion of the ceremonies.

794 (c) At the end of the winter season the "anniversary of the Kworè"
796 is celebrated; its purpose is to commemorate the action of the spirits
during the preceding season in order to obtain rain water.

On the fixed day, members of the society, wearing loincloth and carrying in their left hand a whip made of macerated and twisted grass, and in their other hand a torch of burning straw, gather near the tree around which they circle and sing to "gather up the Kworè."
[785] The cracking of whip lashes which they give each other represents thunder claps; the beating of the drum which accompanies their songs imitates its rumbling. The burns which they inflict upon themselves recall those which the spirits endure in the celestial combats. They next direct their steps toward the public square where the villagers have gathered and where the spirit they have supposedly invoked by their mimicry is leading them. When all have gathered, the kworeduga, who represent the spirits mounted on their winged horses ready to fly into combat, appear dressed in their traditional costumes and riding their wooden horses.

They advance while dancing and singing verses which are then taken up by a chorus of the members. The latter having formed a
[788] circle, the chief places himself in the center, whipping himself, burning himself, and pretending to swallow the fire of his torch. When he is weary he stops and the members take turns to imitate him. Powder made from ground pepper is blown into the dancers' eyes to recall the burning heat of the fiery heavens.

The kworeduga, who have by then put down their wooden horses, set their foot on the earth ready for the fight, after having seized some green tree branches. They put out the fire which has caught onto the clothing of the dancers and participants. This gesture recalls the action of the wind which, in space, put out the hot fire that

794 attacked /206/ the fighters. Between dances the participants drink beer
796 brought to the spot for the occasion in order to nourish the invisible beings which they represent.

[262] All the participants also eat a dish made up of peas, beans, groundnuts, rice, manioc, millet, fonio, cooked with baobab leaves and karite oil. This mixture is identified with the spirits' struggle with the clouds which they supposedly swallow at the height of the battle. When the ceremony draws to an end, the chief sends the women and children home and fetches the kwore boli which he swings eighteen times over the square.

In a file, the members of the society return to the tree to "bring back" the Kworè which, while invisible, has been present at all the ceremonies. They circle around the tree singing to the rhythm of the drums. Then they put out their torches and throw them at the foot of the tree along with the whips before returning to their homes.
[752] Their wounds and burns are cared for by their wives with water from the Kworè altar, this medication bearing the name of kworɛ kane (remedy of the Kworè).

The same dances and the comings out of the mask take place three days in succession. On the fourth day the chief and the elders, all undressed, crawl to the sanctuary for the annual sacrifice offered inside it. The chief gathers the thunder stones collected during the past year and places them in the sack containing the altars which are to be sold.

To "clarify" the mirrors, he pours millet mash over them; he cut the throat of fowls and places kola nut juice over the snake and the ñõ boli; he next fills the ñõ boli with millet previously taken from that of the Komo. With the remaining seeds he makes a mash with which to pour a libation over the sack. He next passes a burning twig of straw over the snake while saying:

"You, snake, you do not fear the fire; you must not fear fire and rain" (1).

1. E ngorongo e ma sira tasuma ne e kana sira sandyi tasuma ñe.

The effect of this action is to prepare the snake by means of these burns and to attract lightning whose effects it must not fear.

IV. Rites for the Renewal of the Year

796 783 These rites involve individual, familial, and collective actions; the latter bring into play most of the institutions (1). Everyone, from the newborn to the elder, must undergo a kind of purification which consists essentially of the /207/ rejection of the breath and forces of the past year and of the taking in of new breath and forces. It is, according to Bambara expression, " a refreshing of the body and soul." But the renewal is not limited to elements which make up the person; it extends to the cosmos and the cardinal points.

1. The individual rite of the family chief is performed with the instrument ngoni, which is used to make on the wall of his česo the drawings representing the universe. (2) He starts out with an offering of tomato juice to Faro who presides over the family use of the object and who is present thereafter. The fruits are squeezed; a hedgehog is sacrificed over the juice so that no other spirit may touch it. Next the man sacrifices a gray lizard as a reminder of his own condition before circumcision. This sacrifice represents a new circumcision offered to Faro and increases his strength. [825 782]

The man who is offering the sacrifice puts his tongue in the juice of the fruit without swallowing a drop in order to give Faro "a complete accounting of all his acts and thoughts during the past year (work, births, deaths, illnesses, quarrels, fortune, and misfortune) just as a subordinate gives an accounting to his superior." He puts his right little finger in the liquid and places it on the wall over the drawing representing Faro. Then he sucks in a little of the tomato juice through his nostrils and blows it over the ngoni, thus sweeping away the remaining life from the past year which he still had in his body. A new air which comes from Faro then circulates in his lungs. He next fills his mouth with the liquid contained in the male goatskin of the instrument and spits it out immediately to show the spirit that

---

1. As examples of collective rites we present those which are performed on the stone altars of the village (fara ba) (see p. 129).

2. See p. 172, Fig. 10.

796 all is returned to him. He then goes to the river or to the edge of
783 Faro's pond, where he drinks a little water as a purification for the year to come.

2. On the day chosen for the family ceremony, the *ngoni* is solemnly removed from the room where it is usually kept hidden from view, and is presented to the family assembled before the door.

The rhythm called *kalafoli* is beaten out on the frame; the effect of this is to return the soul (*ni*) of the participants to the river or well. Then another rhythm, representing Faro, is played on the net to call in the renewed soul which has been returned by the spirit. Everyone opens his mouth and inhales the new, beneficial emanations coming over the family. When the rhythm ceases they all shut their mouths and return home without speaking. At the entrance door the children are given little strokes on the back with a little rope, *sebe dyuru* /208/ "to receive and withstand all that the new year will bring."

The instrument is then replaced in the home while all the participants shut their eyes in order not to see it. The owner goes into a trance, a fact which shows that Faro himself carried the instrument to the place where it will remain during the year. The man walks out backwards from the room where he has placed it and is carried into his *česo*, where he receives special care intended to return him to his normal state, which includes a purification performed on his individual altar, *Čuafebyěni* (1).

---

1. See p. 175.

3. The collective ceremonies for the renewal of the person are first performed on the stone *fara ba* of the village.

The "signs of creation" (*bolo ti doniya*), engraved with a red-hot iron on a gourd as a request to the ancestors for their support, are presented to the participants. Next, the stone is removed and the objects covered by it are checked, the group thus assuring itself that none has been displaced during the year. Then they proceed to the
796 reconstruction of the ritual drawings. The operator first draws the
783 torches representing the fire used in olden times by the ancestors to
532 defend themselves against attacks and dangers from the outside while they were building the village. The following prayer is recited:

"You, torch of fire, I have prepared you in the mountain (from which our ancestors came), you who keep the souls of the village, protect us from those who wish us harm, fire" (*ter*) (2).

796
183
532

2. E mõ ñõ tasuma, ñe e ñu kulu la kę dla,
dugu nimara ba ke, i kã kla kelenyõ na,
tasuma (ter).

Then he draws, as on the ancestors' caps, a black dot which represents the womb of women as well as Faro. The latter will help men by giving them water, for without his help "none, not even the Kworè, have the rain necessary for agriculture.

Three small figures represent the three responsible chiefs of the Kworè who are subjected to the fire rites and who withstand with courage for the common welfare all the sufferings and burns. The other members are represented by four silhouettes to indicate their inferior position by a feminine number. The entire grouping of personages and torches converges on the black dot to show that "the men by their feet and the torches by their fire throw back their nyama toward him."

796 183 When the drawings are finished, all the participants in turn place their little finger and then their tongue on them to abandon the nyama of the year and to receive new forces. The women use the same gestures as the men but repeat them four times. Each person then [185] receives, respectively, three /209/ or four lashes of the whip on his back so as to integrate properly within him these new elements (3).

3. The little finger acts upon the nyama of the body, and the tongue upon the nyama of words.

The children, led by their mothers, are the objects of similar attentions. The boys press their toes upon the stone; the little girls present their genitals to it to prove their femininity. All are then seated in turn on the stone so that the old nyama leaves them through the anus. Then, they are lifted up above it by their parents and "are shaken in all directions to settle properly the newly received nyama in them." The mothers pass their hands over the fact of their children and then over their own, a gesture which binds them to their offspring for the year to come.

The assembly goes to the Kworè stone where the cardinal points are renewed by brandishing lighted torches to the west, north, south, and then east. Each person apologizes for the faults committed during

796 the year. The men in turn each place their right foot on the stone
783 and turn in succession toward the cardinal points, inhaling deeply with
open mouth and extended tongue as though "to breathe them in."

The women do the same, but place their middle finger on the stone;
[785] at the same time they receive four whip lashes on the back so as to
"sustain (1) the change of the cardinal points with pain."

With heads lowered and hands at their back, the sick persons would present to the stone those parts of their bodies which are the source of their sufferings, saying: "Here is the evil that is in my flesh" (2), for the stone is both responsible for and a depository of illness. The one-eyed and blind show their closed eyes. The cripples place their affected limb upon it. Then the initiated elders, completely naked, encircle the stone while recting a formula in the ancient language (3).

Next, the young men run around it rapidly rotating their right arms with closed fists. By this gesture, they are asking the stone to help them find a wife. The young girls follow them, walking in their footsteps, a gesture of docility which also expresses their desire to marry.

The ceremony ends with beer drinking which lasts three days. Each person is happy and gay at having "renewed" his soul; the young people will marry and children will be conceived.

1. The more familiar term, "to receive" would be a better translation.

2. Nka soko la ba na fle ninye.

3. Dede kumbeyde mala kay kapo kumbey de malado. This text would mean: "stone, mistress of all, fear nothing, your children are there."

/210/

Chapter 8

DIVINATION

781 If we still find it difficult to isolate the general principles of divination among the Bambara, it is possible nevertheless to perceive identical elements among its diversified aspects. As soon as we approach the mechanisms and the symbols employed by the diviners, it appears that the first and fundamental element of divination is the "word," the creator of life, the motivation of the cosmos, and the power of Faro.

To foresee the future is to reveal to the secular the "word" which is situated in space as well as in time, and which is the will and the material expression of that will. Destiny is understood as the realization of the designs of creation to which all must conform. To submit to this will is supreme wisdom. To inquire into the reason for a past state or event, or to determine the attitude to be taken in the face of future states or events, is what the wise man can and must do.

The supernatural powers, rightful masters of the word, alone have to power to reveal it. They have done this in mythical times for all men by teaching them technologies capable of reparing the repeated disorders brought about in the process of creation. They do this for each individual if he is in need of it and if he knows how to read through the various methods of gaining knowledge which they have put at his disposal. It is therefore to them that the diviner addresses himself in order that the word be communicated.

781 801 Which will be the privileged signs over which the diviners will bend their efforts? It appears that these are numbers, notably the first twenty-two. In fact, all aspects of physical and moral life are inscribed in them. Taken as a whole, they reflect the succession of events in space and in time. A complex symbolism, which is superimposed over the others, is assigned to each one separately.

Each number has one or several meanings appropriate to it. /211/ It is odd or even, a notion linked to that of duality which has been so frequently mentioned in the course of this work. The sum of several numbers also expresses a particular idea which is added to those recovered by each element. Finally, a value is attributed to the succession of numbers, which is the first expression of time (1).

781
801

The first 22 numbers, which represent the totality of "words" and which express the sum total of the Bambara's mystical knowledge, must be considered from different angles according to whether they are seen as the 22 fundamental elements of creation, the 22 elements of the domination of this creation by Pemba, or the 22 methods and periods of the reorganization of this creation by Faro. In this series appears clearly the classification of elements composing the human being, *ni*, *dya*, *tere*, according to dualism which is Faro's own character and principle of action.

Moreover the stages of time, which itself did not exist before his domination, are expressed by the succession of numbers, each of which is linked to a part of the myth.

Current divination utilizes the first 22 elements at the level where they express "the order and the word of Faro."

1. *kele*. Faro; the word. Number of the master of the word. District of the chief; the right of the eldest, the right of the first; the head. The conscience: psychical aspect, moral aspect.

2. *fla*. Original duality, twinness. Faro's two female twins, the two first human twins. Love and friendship; union of beings. Necessity for man, however, to be straightforward in his action, not to follow two tracks.

3. *saba*. Sexual symbol of man and his soul. Birth of mixed twins, sons of the sinful Bozo women.

4. *nani*. Sexual symbol of woman and man's double (*dya*). Birth of a Bozo girl.

5. *duru*. Unlucky number composed of 4 (woman) and 1 (incompleteness). Miscarriage, failure, death. A stillborn child is called *duru*. However, it has an auspicious aspect and so signifies the universe (2).

6. *woro*. Symbol of male twins (3 and 3). Lucky number (3).

---

1. This expression is symbolized by the progression of the first four numbers in the preliminaries of creation. See p. 23.

2. See p. 24.

3. *Dĕke ni fla ye gariseke ye*, "two little male twins, that is luck."

781
801

7. wolṍfla. Symbol of mixed twins (3 and 4). Complete man possessing the ni and dya of opposed sexes. Complete world; growth /212/ of nature. Ideal image of creation; perfect word.

8. sekin. Symbol of female twins (4 and 4), of the eight ancestors and their word. Excess of words; danger of this excess caused by women.

9. konoto. Symbol of character or tere. Incompleteness.

10. tã. Composed of 6 (male twins) and of 4 (female birth), it is a lucky number and expresses the fertility desired by Faro as well as Faro himself.

11. tã ani kele. Conflict and debate. During the eleventh period after Faro's domination, Téliko wanted to resist.

12. tã ani fla. Téliko's attempt to dominate the world and to connive with men.

13. tã ani saba. Composed of 3 (Téliko, male spirit) and 10 (Faro): expresses Faro's opposition to Téliko's domination.

14. tã ani nani. Téliko's voyage.

15. tã ani duru. Téliko's defeat.

16. tã ani woro.
17. tã ani wolṍfla.
18. tã ani sekin.
19. tã ani konoto.

Faro's work in organizing the universe.

20. muka. Meeting of Faro and Téliko to decide on the order and progress of the universe.

21. duka ani kele. Faro's complete domination over creation.

22. muka ani fla. Total of the periods elapsed between the creation and the organization of the world. Conclusion and "end of the words."

The symbolism of numbers in everyday life comes into play every time they occur. From the beginning they were used to qualify tools and utensils. According to whether these belonged to men or women, they were marked respectively with three or four easily recognizable signs, indicating their ownership. Thus, in weaving, the shuttle carried three bobins, the spindle four lines.

Each ritual is repeated three times in the case of a man, four times in the case of a woman. If it is performed several days running or at regular intervals, the same rhythm is observed. Thus the dya of a drowned man is fed every three days, or every four days in the case of a drowned woman. The organization of the chief's district

787 801 and the priesthood is founded on the same laws. A religious chief is generally accompanied by two aides or two elders belonging to his age grade. The group they compose is a duplication of the first three of the eight original ancestors.

Seven, the expression of perfect creation appears notably in the repetition of Faro's name when a request is addressed to him relating to fertility which may by symbolized /213/ by a male-female couple whose number is seven. To say Faro's name alerts him, but to repeat it seven times makes him hear that which may best satisfy him and presents him with what he desires.

Eight is the number of the ancestors who received the word and of the families that spread it. Six and eight, images of male and female twins, are at the basis of the Bambara system of numbers and calculations (1). Ten, which repeats unity, is composed of the sum of the first four numbers marking the stages of creation; it represents Faro (2). Twenty-two, which determines the categories of the creative

---

1. See p. 48, n. 1.

2. "The religious function of the decade plays an extremely important role among the Bambara because the symbolism of all numbers is included in it as it contains them all. Since it can be made up by the sum of the first four numbers which in themselves express the unity and duality of the being, masculinity and femininity, the fourfold nature of twins, the very essence of existence—in a word the decade—expresses all that which is achieved within oneself, all that which is complete, perfect, and just. The very name of ten, tã, indicates these notions; moreover, instead of tã, ten, the Bambara often say dafare, "it is complete." Consequently, ten is the essential symbol of divinity." S. de Ganay, "Notes sur la théodicée bambara," p. 198.

781 thought yo, represents the universe; it is found on all sanctuaries or
801 ritual objects.

Inversely, a number may be attached to an individual because of his behavior. It is said of a wicked man that he is an "eleven." The person who wishes to take power when he has no right to is "twelve." A man who is disgraced because he is denied that which he asks for is "thirteen."

781 Another fundamental element of the divining technique is derived from the state and qualities of the diviner. In order to question the supernatural, no special quality is ordinarily needed other than that normally required of a person making a sacrifice. Thus any Bambara, before making his offering, throws a kola nut on the ground to interpret its position. But the diviner is in a peculiar position. His spiritual elements, constantly in touch with the divinity, are the object of precautions which introduce him into the supernatural cycle and permit him to hear its message. They are, therefore, protected from the impurity which they might acquire in their contact with ordinary men. Because of this, the diviner is forced to respect a certain number of taboos. His double, guarantee for his state, is preserved by the spirits which protect it on the one hand and excercise control over its owner on the other. It is for them a means of action. "If the diviner has received the word and makes a mistake, the spirits may cause him to die." His mouth is filled up /214/ with a force which comes to him from these powers and which he must not misuse.

On the other hand, the trance is the state in which the spiritual is best expressed. In the excitement of the dance, at the frenetic rhythm of the drums, the Komo divines and predicts. At this moment he is entirely under the influence of the spiritual beings which express themselves through him.

Having presented these different points, is it possible in the present state of the inquiry to classify the methods of divination we have observed among the Bambara? This classification which we will attempt is tentative, and the observations will have to be taken up again more profoundly.

A brief description of several methods of divination currently in use is given below, and two of the techniques we have studied more carefully will be explained in detail: divination by guitar playing and divination by throwing cowrie shells (1).

787 1. In this chapter we purposely do not approach the study of geomancy, which is reserved for later treatment. This mode of divination has been the object of a detailed description in C. Monteil, La Divination chez les Noirs de l'Afrique occidentale française /Divination among the Blacks of French West Africa/. Geomancy is currently used by the Bambara, by all the chiefs of religious societies, and by all the hunters who are familiar with several types, particularly the nama ti "sign of the hyena," the timba ti "sign of the aardvark," and the tyẽ dyę "white truth" or trabu. The symbols connected with this type of divination are very complex among the Bambara who state that they possess an autochthonous method of geomancy distinct from the type called "Moslem," with which they are also familiar. This last point seems to be confirmed by the observations gathered by B. Maupoil in Dahomey and explained in his conclusions (see La Géomancie à l'ancienne côte des Esclaves /Geomancy on the Old Slave Coast/, p. 678). Geomancy is practiced in similiar ways on the whole African continent. More than any other activity, its study raises the problem of influences, notably that of Islam, with which we have dealt on page 7.

Methods of Divination Linked to the Idea of the Person

787
826
Knowledge of the person is a constant concern of the Bambara. The body, which supports the spiritual principles, is marked from birth by signs which any knowledgeable individual is capable of interpreting. They determine not only the character (tere) of a person but also, to a certain extent, the destiny that awaits him.

Thus by examining carefully the facial features of a newborn child, his hairline, the shape of his eyes, nose, and head, the lines on his

187 forehead, it is possible to predict to a great extent, what he will be
826 or do in life. Later on /215/ the gait, the swinging of the arms, the way of placing the feet, of holding the head or the breasts will complete, for the informed people, the portrait sketched at birth.

Measurement of the *dya*

804 Certain indications concerning the individual are also given by the double or twin (*dya*) (1) which materializes in the shadow of the body and is measured by using the little finger as a unit. Starting from the top of the head, this operation is undertaken at noon in the sun when the shadow is shortest. The measurements which are noted down are grouped alternatively by three, the male number, and by four, the female number, according to the following table:

1. The first three unit measures (little finger) represent the nerves, *pasa* (masc.).
2. From the fourth to the seventh, the soft parts, the flesh, *bu* (fem.).
3. From the eighth to the tenth, the bones, *kolo* (masc.).
4. From the eleventh to the fourteenth, the body liquids, *dyi* (fem.).
5. From the fifteenth to the seventeenth, the male genitals, *wulu* (masc.).
6. From the eighteenth to the twenty-first, the female genitals, *byę*, (fem.).
7. From the twenty-second to the twenty-fourth, the joints, *kolonye*, (masc.).
8. From the twenty-fifth to the twenty-eighth, the breasts, *ši* (fem.).
9. From the twenty-ninth to the thirty-first, the backbone, *koloko* (masc.).
10. From the thirty-second to the thirty-fifth, the womb, *dẽzo* (fem.).
11. From the thirty-sixth to the thirty-eighth, the intelligence, *hakili* (masc.).

---

1. See p. 86.

781 12. From the thirty-ninth to the forty-second, pettiness, stupidity, misenya, (fem.).

826 13. From the forty-third to the forty-fifth, judgment, calmness, basigi (masc.).

14. From the forty-fifth to the forty-ninth, incoherence, agitation, hakiliwuli (fem.).

[804] These groupings are symbolized by little sticks whose length increases for male measures and decreases for female measures.

Example: if the measure of the individual stops at group 7, he will be represented by four sticks (males) of increasing size and by three others (females) of decreasing size and different aspects.

/216/ Whatever their number, these sticks are then placed in the following manner: those of the nerves in a dry receptacle, those of the flesh in millet flour, those of the bones on a hard stone, those of the liquids in water, those of the male genitals on the testicles of a male goat, those of the female genitals on the vulva of a mare, those of the breasts in karite oil, those of the womb in water from the Niger or a well, those of the intelligence in fresh milk, those of calmness and judgment in water. On the stick representing the joints is shown the name for lion; on that representing the backbone, the word dyose, (literally, point of support); on that representing pettiness, the name for dung beetle; on that representing disorder and agitation, the words muso dãga (literally, accursed woman).

A prayer is recited over the sticks which are then grouped and counted with their numbered representation and their symbolism according to the complicated calculations whose details we will not enter upon here (1). This prayer and counting are called: faro kanubaya, "love of Faro." They indicate his solicitude for his subjects and were supposedly revealed to men by the swallow messenger at the time of the first girl twins' birth.

781 826 843 Each of these measurements corresponds to a certain moral and physical behavior of man, predetermined by Faro before one's birth. It is therefore possible, by measuring the dya of a pregnant woman,

1. It must, nevertheless, be noted that the total of the signs is (7 x 3) + (7 x 4) or 49.

787 to know the sex of the child a woman is carrying and the character
826 which will be attributed to him by the spirit.

[843] Without further elaboration on this method of divination which implies a series of interpretations, it suffices to note that it is integrated into the system of Bambara thought and inspired by the conception he has of man's place in the universe.

Divination by the Kola Nut

787 The kola nuts which the Bambara eat and use in their sacrificial or divinatory rituals are classified into seven categories according to their form and color.

1. *dangoro*, red nut.
2. *yeleworo*, white nut.
3. *sosokuworo* (literally, mosquito head), a red nut pointed at one of its extremities.

/217/ 4. *flaniworo* (literally, twin kola), a white nut with the same signs on both its halves.

5. *worodanda* (literally, kola without a mouth), a nut of two colors without an apparent crack permitting it to be divided.
6. *bassiworo*, a dark red and very bitter nut.
7. *nyeworo*, a nut of light and indeterminate color.

The kola nut, "created for Faro's twin girls," is itself a symbol of duality, for both its adhering halves are easily separated. In daily life, unless the diviner has ordered it as a purification, a kola nut is not eaten by one person alone; it is divided and one of the halves given to a third person. This gesture of politeness and friendship is also the expression of the duality of man, comparable to that of the fruit itself.

[576] To give kola nuts is always a sign of deference, respect, or affection. To eat a white nut "chases away sorrow and worry." The nut without a crack is rarely eaten. As it appears to be of one piece, it has an inauspicious character. In religious ceremonies the *bassiworo* nuts are preferred for the boli; the ordinary red nuts, *dangoro*, for the other altars. The pointed nut, *sosokuworo*, is offered by one who wants a child. The officiator chews half the nut and spits it onto the altar before eating the other half.

781 Divination by the kola nut is practiced in numerous cases concerning the individual and the community. Moreover, it precedes almost all the sacrifices performed on the different altars. Before the throat of a victim is cut, the question of the consent of the beneficial power is posed. This method is used for spirits who are invoked by means of a recited prayer at the time the nut is divided but before it is thrown. The color and shape of the nut are chosen according to the question formulated, as well as according to the quality of the being whose mediation is sought. If the plea is addressed to Faro, for a marriage for instance, the nut must be white; if the spirits of the earth or the skies are questioned, it must be red; for a birth or a death and for all requests to the spirits of the west, the beneficial nut, yeleworo, is used. On the contrary, as a protection against an enemy or to convey a curse, the spirits of the east are invoked with the mouthless nut, worodanda. A good divining nut must, in addition, show a kind of design, called yeleda (literally, mouth for laughing, at the intersection of the two pieces composing it. It is also fitting that it be /218/ pointed at one extremity to "prick the subject" benefiting from the ritual. The officiator, who has divided the nut lengthwise into two parts, following its natural dividing line, holds the two pieces in his hand and recites the following prayer:

"Faro, my mother, Faro, my father, spirits of the earth, spirits of the skies, spirits of the west, spirits of the east, you who are better than all of them, Faro, here are the kolas, let truth be unveiled, let the two (pieces) part at the top. I say, you, Faro" (ter) (1).

1. Ne ba faro ne fa faro du kuma ǰinew,
šãnfe ǰinew, [illegible]lebi ǰinew, korona ǰinew
dyenin kausa na be ye, e faro, woro fle
tye ka banke fla ka dya safe; ngo e faro (ter).

He may also say more simply:

"Here are two kola nuts, if you refuse, may one be shut and the other open; if you accept, may both be open or may both be shut"(2).

2. Woro fla, fle ninye, ni ma sǫ̃,
kele ka dyã, kele ka bri, ni sona a
fla ka dyã, fla ka bri.

787 This text determines the interpretation of the answer which will be given. The diviner next opens his hand, releases the pieces, and watches the way in which they fall on the ground: if they are arranged in the same way on the inner or outer sides, the answer is affirmative; it is negative.

Divination by Cowrie Shells

This practice is called: kolo nin fli, literally, "to throw the soul of the cowries." These shells are in no way different from those used for trade or ornamentation. Only one taboo is attached to the way in which they are acquired; they must not be bought or obtained without payment. To acquire them, the diviner must secure a loan called [426] kuma boli (literally, to come out of the word); he gives as surety a product or an object which will be reclaimed by him later when he returns the cowries.

The 22 cowries used summarize "that which is necessary to man" and are divided into three groups:

The first seven, teliko dɛ̃, sons of Téliko, represent the spirit of the air, Téliko and his children, as well as "the respiration" of men. In fact, it is said of them: "The Téliko spirits are the man's respiration" (1).

1. Teliko ye adamadɛ̃ ninakli kuma bo ye.

The next seven, faro dɛ̃, sons of Faro, symbolize human /219/ beings. One of them, chosen because it is easy to distinguish from the others, represents Faro; the diviner repeats the name of the spirit seven times over this shell before mixing it with the others, the effect being to give all of them the strength of the spirit.

The last eight, kumabana dɛ̃, sons of Koumabana, are the words of the eight great ancestors. One of them, different from the others, is called "mother of words." It is both Koumabana, first of the eight ancestors, and the unequaled word which he "spat" since Koumabana had known "all the words now existing on earth."

Thus 22, the expressions of the universe, summarize the human individual in the system of the 22 cowries: body and soul, Faro; breath and respiration, Téliko; revealed word, Koumabana. The division into three series, two of which are 7 and one 8, is also

significant; the number 7 is the sign of the complete man and it occurs twice to recall duality. Eight is the number of the word which animates him.

This type of divination is only performed during the day, for it is disrespectful to alert the spirits at nightfall. Moreover, the orientation of the shells on the ground is important and easier to observe by the light of the sun. The officiator takes the cowries in his hand, three or four times consecutively, according to the sex of the person consulting him, and lets them fall to the ground or onto a tray. He then studies them, following their orientation, and the place they occupy with relation to the mother or the "conclusion of words," according to their open or closed position. Very skilled diviners, who have to resolve complex problems, operate with 22 cowries. But sometimes the eight kumabana dẽ are sufficient.

In this case, before throwing them, the diviner pronounces the following prayer:

"You, eight old ancestors, none has surpassed you in words, your vision was so great that it surpassed the number (of the others); the cowries are thrown, you will show the truth; I say, you, the eight elders, I say, you, good spirits" (1).

1. Aw moko korobaw sekin, moko ma se teme aw ka kuma na, aw ka somaya bonya ma, fo ka dama teme koloniw fle la, aw ka ntiñe ǰira, ngo aw maw sekin, ngo jinew aw maw.

In the short space of time in which the cowries are thrown, destiny is written. The moment the diviner releases them, "the spirit of the air which controls them, having examined the case, adjudges and proposes. The moment they touch the ground, Faro, master of the last appeal, disposes" (2). The design of the cowries translates his word; they /220/ are the expression of his will visible to man through the word revealed by Koumabana. This whole delicate spiritual

2. It is said colloquially: "Téliko proposes and Faro disposes," teliko ba singa, faro ba sinze.

781 mechanism, invisible for the ordinary person, unknown to the noninitiate, can be perceived by the seer and the diviner who are conscious of the fact that they are manipulating the divine with the cowries. Because of this they bend over the constantly renewed shape given to the dispersed material with a powerful feeling of the presence of the forces to whom they are appealing.

The Somaya

791 According to tradition, the somaya or science of the soma was revealed in Mandé, that is to say, it was known to the Bambara before their arrival in the territory which they now occupy. It was restricted to a few privileged persons. The gifts of clairvoyance which it presupposes may be discovered in a newborn baby at the time when the signs determining his character (tere) are examined by the elders during the name-giving ceremony. In early childhood frequent manifestations of suffering are a sign of the spirits' presence and from the first steps, the way of walking itself confirms the child's vocation. About the age of ten, the young boy "guided by the Téliko spirits" is attracted by them into the bush near a pond where he lives in their invisible company for several days.

After this retreat the child returns to his village, provided with a little stone (ǰinaworo, literally, kola nut of the spirits), a sign of the alliance he has contracted with them.

However, he pretends not to know the place he came from. He also never makes any statements concerning the gift of double sight with which he has been endowed, but does manifest it by making some unsolicited revelations about their future to those he encounters. After a time, people recognize by these signs his quality as a Soma, which implies a change in his spiritual principles: the dya remains under the protection of the Téliko spirits who also control the diviner; they act directly on his person and hold his health and life in their power, punishing him in case of an infraction or in case of disorders which are harmful to the exercise of his art (1).

1. A Soma would become a mahalakillen or a harmful animal if his dya were altered through contact with the impure earth.

791 [589] The gifts he has received and the position of his dya compel /221/ the Soma to remain unmarried and to observe a certain chastity. "The wife of the Soma lives with the spirits," says the informant who adds that every forty-nine days (7 x 7) his dya is returned to him during the night for the purpose of a sexual union.

From the moment the Soma begins to exercise his art regularly, he visits the bush from time to time to consult the spirits and make offerings to them. Moreover, the latter visit him in his home where he attracts them by burning a powder that gives off a smell of which they are fond.

Like the griot, the Soma has a mouth full of nyama: his own to which is added that of the spirits who help him and control him. His word is so powerful that he rarely announces a death, for this would contribute to the propagation of death.

The Soma must be rigorously clean, wear simple clothes, and even dress as an indigent. During ceremonies he hangs the stone ǰineworo around his neck with a string and must always carry this stone in a pocket of his tunic. He generally belongs to the Komo society and may become its chief. In this case he is the recognized diviner of the village.

791 766 The Soma keeps in his home his stone of alliance and his harp with its accessories. When he dies, his body is left for some time alone in the house; the spirits are supposed to come and reclaim these objects which no one must touch and which no one will inherit. The burial of the body and the funeral ceremonies are performed only after this delay. His soul is never kept in the Komo altars and goes to join the dya in the domains of Tɛliko; the spiritual principles of the Soma are not reincarnated and the gift which he has received is not hereditary.

791 534 The Soma's harp (Fig. 17) (1) is made of a rectangular chest (bara) pierced through longitudinally by a long piece of wood (ngoni kala, literally, stalk of the ngoni) surrounded by little leather thongs in the shape of rings (ǰiri wolo, literally, skin of wood). These hold

---

1. See G. Dieterlen, Morphologie et symbolique de deux instruments de musique bambara /The Morphology and Symbolism of Two Instruments of Bambara Music/.

191
534

the goatskin thongs (ngoni dyuru, literally, ropes of the ngoni). At the end of the stalk, ngoni ku, is affixed an iron percussion plate (boso) decorated with rings of the same metal (nyege nyegele) which are the "earrings of the spirits." These rings are said to be "multicolored' for the sound they emit is blurred and confused.

[532]

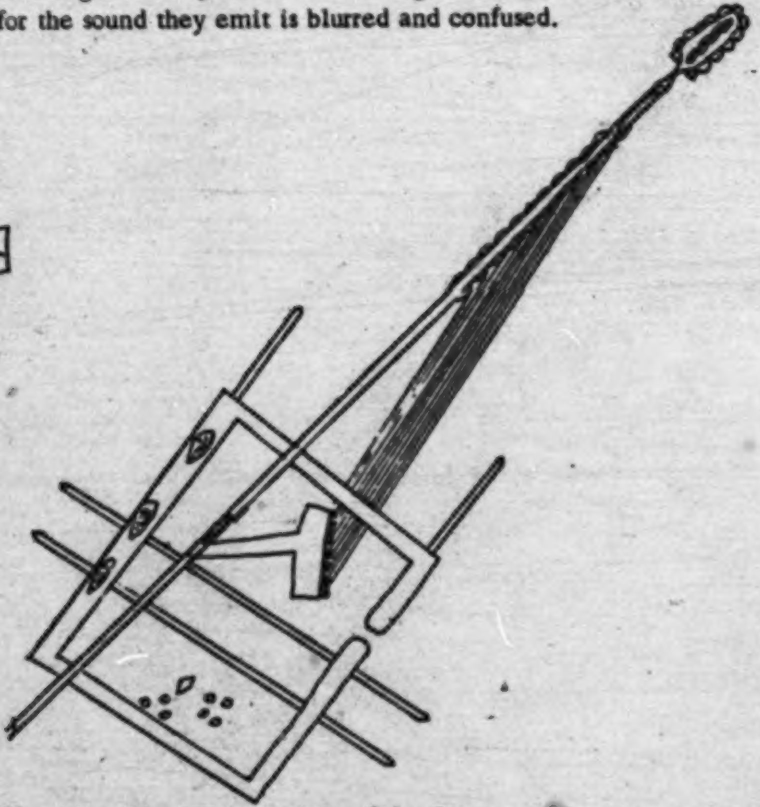

Fig. 17 —The Divining Harp of the Soma.

The instrument represents the face of the ancestor Koumabana who received "the word," and his tomb; on another level, it symbolizes also the face of the diviner and his tomb. (Drawing by an informant.)

When the percussion plate is placed on the handle, "it increases the sounds and filters them in the air, which pleases the spirits and calls them to the diviner whom they assist during his work." If the instrument /222/ is used without the percussion plate, that is to say, for a secular purpose, the spirits are not alerted by the playing of the music.

191/534 The skin, stretched on the box by means of goatskin thongs, is soaked in water over which the name of the spirit Téliko has been pronounced forty-nine times. The supporting strings are made of twisted shreds of shrouds picked up in a cemetery. The musical strings are made of goatskin, numbering eight, /223/ symbol of the word (1),

> 1. The harp of the Ṣoma differs from that of the *griot* which usually has even strings.

and are named as follows, beginning with the shortest: *kumabana*, *fa dẽ* (son of the father), *fa* (father), *fa koroke* (elder brother of the father), *fa dogone* (younger brother of the father), *ba* (mother), *modẽ* (grandson), *fa so* (house of the father).

Tied to a bridge, *Yiri ni* (literally, teeth of the *ngoni*), which represents the mouth and teeth of Koumabana, they are the ancestor's words. On another level, they are also the home and the family of the spirit Téliko.

Of a relatively equal length in different harps, they give eight different notes; the intervals are called *dyuru fara dye* (2).

> 2. On some instruments we have observed, the first and the eighth string gave the same note at an interval of an octave. It may be predicted that a thorough study of Bambara music would bring to light a system of correspondences between the disposition of musical sounds and that of the world. M. Griaule, in his research on the Dogon harp, has already discovered a relationship between the notes, the numbers, and the universe.

[532] On the right side of the box the three first ancestors of the Bambara are sometimes drawn; Koumabana and the two elders who died after him. They may be recognized by the hair with which their faces are covered, just as those of the ancestors to whom the razor was unknown (3).

> 3. This detail has been observed on ancient instruments in the region of Koutiala.

791 The box is transpierced by two wooden sticks, če kala (literally,
534 man-stalk), recalling the two millet stalks which accompany every dead man into his grave and which are in themselves symbols of the two elders.

791 When the Soma falls ill, he removes the two sticks from his instrument and places them beside him on his mat, anticipating the position
534 he will lie in the grave. Thus stretched out, "he is in the grave and
755 walks with the two ancestors"; if his condition improves the sticks have liberated him from his illness. He replaces them in the harp only after his recovery.

791 The box contains seven pebbles, the number of man (3 + 4) and a piece of copper in the shape of a star symbolizing the word. The
534 Soma may look into the harp through an opening on its side, called šu wo (sorcery hole) or bara dinge (hole of the box), which "permits him to breathe," to see "the ancestor Koumabana, master of the word, and to know the deepest secrets." At the bottom of the instrument another opening, considered the anus, permits the release of all that is harmful.

/224/ A red stain placed on one of the faces, sindera ble (literally, red belt), expresses the fact that the instrument is the object of blood sacrifices like the stone ǰineworo.

The case is the image, the mask of Koumabana; the two faces, called respectively kini nye, "right eye," and numa nye, "left eye," represent his eyes; the comb, his mouth; the opening, his nose and respiration; the strings, his words. It is also the replica of the tomb and of the first three of the eight ancestors who knew death. Finally, it is the face of the Soma and his tomb.

The instrument must never be touched by a woman; moreover, no one must play it if his intentions are not pure, "if his heart is not clean."

791 When the Soma plays in response to requests from those who consult him, each sound is a prayer. With his free hand he holds a twig with
533 which he strikes the base. Each stroke is a word. As he plays, images
781 form before his eyes and within him. He touches the cords separately according to their position and in relation to the importance of the question that is being asked. Thus, he pinches modẽ for subjects of little importance: hunt, journey, etc.; fadẽ for that which is concerned with health, procreation, the physical or moral life of the individual; fa for the future, destiny, the private and public life of a man, his

791 authority, his command; fa koroke for planting and cultivation, the
533 control of water, rains, and ponds, and for fortune and wealth; fa
787 dogone for the germination of grains, the formation of the ears and
the light rains; ba for all that concerns women; faso for all that concerns the family house and those who are absent.

But the Soma also plays airs with rhythms accompanied by words. He plays them one after the other during the sitting or choses them according to the character of the person consulting him and the questions raised.

The following seven songs were collected and interpreted by the Soma of Bandiagara:

"A good thing comes with a bad thing" (1). This song has the

1. Ko ñumã de bina ni ko dyugu ye.

effect of revealing to the Soma the thoughts of the consulter.

"Man knows little" (2). In spite of his learning a man knows few

2. Adama dɛ̃ te ko do.

things; a child often knows that which an adult ignores.

/225/ "Even when a man is satiated he may not go beyond the mother who has given him birth" (3). This rhythm is performed for

3. Mako fara čokočoko a tise ka temme
a wolo ba ka.

those who show arrogance or vanity, or for those whose wife has left the conjugal home and has taken refuge with her father.

"Even if he is handsome, a man must have eyes (that is, to be informed)" (4). The Soma plays this air whenever there is a marriage,

4. Moko če kani čokočoko fo nɛ̃ ka soro i ku.

a birth, or an initiation.

"The world is big" (5). When anguish overwhelms the consulter,

5. Diñẽ ka bõ.

791 533 187 this song calms his restlessness and gives him back peace and serenity. "Whatever man is, he may not go beyond God" (1). The Soma

1. Moko a kera čokočoko a te teme ngala ka.

plays this air if the consulter harbors bad intentions or if he is ignorant or stubborn. He does the same to discover the gifts of a child and to encourage the family to develop his learning.

"Joy embellishes the world" (2) is performed for futile and pleasant

things: feasts and dances, ornaments.

2. Klo ye dĩne dya.

things: feasts and dances, ornaments.

187 801 Divination, in a large measure, is the application of the static and dynamic quality of numbers. On the one hand these translate the relationships; on the other, they are symbols for phenomena, beings, behaviors, situations, and in general all the constituent parts of the universe. Though not endowed with power in themselves, they symbolize powerful and well regulated elements. It may also be said that the numbers are superior realities, the same as the primordial signs which preceded the perceptibility of all things and on account of which the things began to exist once man had taken them into his consciousness. (3)

3. See p. 17.

In the course of divination, they indicate to the individual or collective consulter his personal position with regard to the rest of the universe. In a way, they permit the formulation of a particular equation for each person at a given time.

CONCLUSION

121 /227/ It is only recently that the discipline of silence adhered to by the Blacks has been relaxed in certain circles of the initiates. Human behavior, backed up by a rigorous method, has allowed a group of researchers to establish a documentation which suffers less from the usual faults. It is no longer superficial or fragmentary; it is

|2| no longer encumbered with a systematic hostility, which by its consistency and generalized character misled us for many years.

Until the present, the facts gathered among the Bambara were chiefly concerned with appearances. The institutions which might be referred to as "mysteries" were only known through allusions made inadvertently by a mulish people. This was true to such an extent that, for example, in the functioning of the Komo the personality of the universal Monitor had never even figured.

But the study of these people suffered from a constraint more serious than esoterism or distrust: the skepticism and indifference of scholarship which systematically, so to speak, has failed to recognize or has denied the existence of a profound thought among the Blacks.

This contribution demonstrates that certain difficulties in approaching the work may be untangled on the one hand, and that on the other it is no longer appropriate to hold an image of the tropical African world as one in which nothing is harmonious, great, or even worthy of speculation.

This contribution also proves the complexity of the facts. A few only were selected from a vast documentation, the work of a team. And even this documentation appears infinitesimal compared to that which can be foreseen.

The fact is that the Bambara—and like him many other Blacks—makes of man a universe and of the universe a system where everything has a place and a role, from the heavenly bodies to objects of everyday usage, from the mind of man to his ordure.

Years of patient research will therefore be necessary to reveal the immense network of representations and rituals so as not to overlook any materials or gestures, however insignificant in appearance. /228/ We know, in fact, from experience that behind each utensil looms a facet of the organization of men, and that a few lines incised without artistry with a fingernail on a wall express the unfolding of creation.

The negligence of the lowliest of these details may shut off whole areas of knowledge. This entails extensive work covering all the activities of a people, not only that which is properly classified in our mind as religious.

Even if we assume a knowledge of an imposing body of facts concerning the Bambara, this would only lend itself to speculation of a specific nature. A description of the structure and function of the religion of these people would certainly constitute a valuable addition to human

121 knowledge. However, the same effort would have to be undertaken with regard to their neighbors so that gradually from one tribe to the next, it can be extended to the whole Black world.

For it is true that, however indispensable it is to order the facts concerning the Bambara themselves and to seek an internal explanation, the comparative method is necessary for the understanding of a religion. This method imposes itself with particular force in this context. The Bambara system does appear to be, on the one hand, the original synthesis of several other systems found by them on the spot at the time when they made their ultimate settlement, or brought along at the time of the great migratory movements. On the other hand this system is in a state of perpetual symbiosis with those of other Sudanese peoples, as is proved indubitably by recent observations.

121 At present we can already state that at least nine tribes of varying
171 importance (1) live on the same metaphysical, if not religious,
779

foundation. They have a common theme of the creation by means of a word, which is originally motionless and whose vibration determines little by little the essence and later the existence of all things. The same is true of the movement of the universe in a conical spiral which is constantly extending itself. They share the same conception of the person, as well as of the primordial duality, the expression of perfect unity. All these peoples admit the mediation by a hypostasis of the divinity which sometimes takes on the aspect of a redeemer, master of a world, whose appearance is everywhere identical. All believe in the necessity /229/ of universal harmony as well as that of the internal harmony of beings, both being related. One of the

---

1. In the order of increasing depth of studies, we cite the following groups: Dogon and Bambara, blacksmiths, Kouroumba (or Foulsé), Bozo, Manding, Samogo /Samoro/, Mossi, Koulé, altogether amounting to more than two million people. It is fitting to note likewise that several tens of peoples or tribes of the Sudan (in the wider meaning of the word) consider themselves of the same origin. Important rituals, materials, agents, and places reinforce this belief (see p. 2).

121 corollaries of this notion is the subtle mechanism of disorder which we
171 call impurity for lack of a better term, and which goes hand in hand
119 with that of highly developed cathartic practices.

Finally, all these offer an extraordinary efflorescence—not to be called abuse—of the spoken, written, drawn, or gesticulated symbols many of which are found everywhere, each one of them being the basis for several levels of images.

We may therefore speak from now on of a Sudanese civilization whose substratum may be discerned among many tribes as it has been among the Dogon and the Bambara in particular. Under the diversity of languages and institutions is hidden the same framework of representations. It is as though each tribe had arranged the designs characteristic of its own genius on an identical canvas.

For this reason, it is appropriate to consider the present essay as a
121 first step toward an understanding of this civilization. In the future,
this vast entity will have to take its place in relation to the
Mediterranean and Asiatic system. And there is no doubt that this
search for its position will bring up problems of borrowings, migrations,
and assimilation. And doubtless, too, an anatomy of the old civilizations which had taken refuge in the western impasse in Africa will throw a valuable light on the primitive organizations which were found in contact with each other during the high period in these regions, and which were able toeffect a union between indigenous ways of thinking and others with which we are more familiar.

It is tempting to reconstruct archaic states of humanity with the help of broken potsherds or literary shreds. In the more favorable cases, abundant texts and materials have permitted syntheses, whose vicissitudes are one of the reasons for the existence of erudition. On no occasion has anyone ever been discouraged by terrains without echoes, by the absence of the authors of texts and materials. Thus, a wealth of activity concerning the situations and thoughts of ancient times was instituted, a kind of science shrouded in silence where the spirit of research alone was alive.

Today it seems possible, in the light of new observations, to find among numerous and diverse living people, archaic forms and wellsprings common to men of another color living in another time. This does not imply that one should disregard the cautious advice given by the men of the old schools (1); but this advice rests /230/ on postulates

121 1. Among others J. Toutain, C. R. des Garnered Shelves de J. Frazer /Report on the Garnered Shelves by J. Frazer/.

concerning the absence of historical documents and the difference in periods. To admit these postulates, it is necessary to prove precisely this absence and also the incapability of oral tradition to keep alive the traditions and ways of viewing the world over long periods of time.

In any event, whatever the opinion adopted, it would be good methodology to admit as an immediate hypothesis the probable or possible role played by the Sudanese world as a preserver or transformer of attitudes, rites, and concepts which scholars find everywhere else but which remain unexplained. For in a few years nothing will remain to be either disclaimed or confirmed concerning these systems which are on their way to rapid disintegration. Because of mechanization and an unconscious wish for self destruction the Black civilizations will soon become only a shadow of their former selves and the instability of their material will not allow them to be reconstituted in their complexity and grandeur.

And whatever the fate of this hypothesis, we may find, as a result of such thinking that the religious thought of the Blacks, whether original or not, will take its place in the philosophy of history and in the history of humanity.

/231/ ADDENDA

000 The research conducted in the field during the publishing of the present work has brought to light the following facts which, we believe, it will be useful to present succinctly to the reader.

Chapter 1

776 825 Because of the loss of the seeds in their collarbones, Pemba and Mousso Koroni actually have an animal aspect which they owe to their impurity as well as to that of the uncultivated earth which they symbolize. Pemba is represented by the warableni (Vulpes pallida) and Mousso Koroni by the kongowuluni (unidentified fox). It is this

776 latter animal which is imitated by the *vukuri* during the children's
825 nocturnal ritual described on page 65.

This new information confirms the observations noted on page 47, footnote 1, concerning the identity of the Bambara and Dogon representations. Moreover, the *warableni*, like the *yurugu* (*Vulpes pallida*) of the Dogon, intervenes in divination, particularly in geomancy. The investigations permit the extension of these representations to Sudanese tribes coming from Mandé (see p. 2), particularly, to the Bozo and the Peul.

Chapter 3

826 All Sudanese peoples originating in Mandé are characterized by the
773 seeds (or fish) contained in their collarbone, these varying from one tribe to another. On the other hand, within a tribe, the theoretical
824 content of the eight seeds, though roughly similar in terminology, differs in arrangement from family to family. Also the positions of the first and last seeds are reversed for men and women. Example: the blacksmiths have as their first seed the *keninge* and as their last the *tikaninkuru*, whereas the potters have as their first seed the *tikaninkuru* which they cultivate in the sacred fields (see p. 170) and as their last the *keninge*.

Moreover, after Mousso Koroni had stolen from Pemba the seeds he was entrusted to give on earth, Faro, through the intermediary of the /232/ animals who ate them at his order, reclaimed them from her; thus purified, he distributed them to men. The animal, which brought back to Faro the essential seed of each family, becomes the taboo, *tne*, of the family concerned, and the breaking of this taboo has the basic effect of removing the content of the culprit's collarbone. Analogous representations are noted among the Dogon.

Totemism, the so called "joking relationship" (*senankuya* of the Bambara), the caste system, and the exogamous laws of the Sudanese are based on the elements and classification of the contents of the collarbone.

Chapter 6

194 All the great adult institutions (*dyo*) are in contact with the
851 children's society of the Ndomo which reflects the universal organization
772

794 851 772 (space, elements). Each of the six *dyo* to which men are initiated after their circumcision corresponds to a ritual object in the Ndomo: the Komo (west and air) is represented by the *dyara* (rhombus); the Kworè (east and water) by the *tori*; the Nama (south and fire) by the *wulu*; the Kono (north and earth) by the instrument of the same name. The *ǰineble* corresponds to the Nya (nadir) and Nago (zenith). These last two institutions are linked with the whirlwind movement of the creative seed, symbolized by the fonio seed. That is to say, membership in the children's Ndomo society constitutes a pre-initiation to the adult societies which are essentially cosmogonic. The sanctuaries and the sacred fields of the first four *dyo* are theoretically situated at the corresponding cardinal point. The operation of the societies according to a strict system confirms the observations and hypotheses presented on page 10.

Moreover, the mask of the Ndomo represents both Mousso Koroni and the eight seeds stolen from Pemba. All the ceremonies concerning the coming out of Bambara masks (those of the *dyo* as well as those of the *čiwara* and the *sogo*) recall the theft and cultivation of nourishing seeds by Mousso Koroni and their recapture by the animals on Faro's behalf. Similar representations are observed among the Dogon concerning the *yurugu*, *yasigi*, and Nommo.

PRÉFACE

L'ethnologie et, en conséquence, l'enquête ethnologique doivent être totales. Il convient d'entendre par là que rien de ce qui touche l'homme ne saurait être négligé : sa conception de telle étoile est aussi importante, à l'intérieur de son système, que sa coutume agricole; la nourriture spéciale qu'il assimile dans une occasion rituelle joue autant que les rapports établis entre son dieu et ses bêtes ou que la catégorie à laquelle appartient l'arbre dans le bois duquel il taille sa navette.

Et ce n'est pas seulement la prudence ou l'honnêteté scientifiques qui recommandent la constitution d'une documentation complète, mais la pensée elle-même des peuples de l'Afrique Noire. Par les jeux de l'assimilation appliquée à un nombre considérable de symboles, grâce à une puissance d'abstraction dont on ne fait qu'entrevoir la grandeur, ces hommes ont systématisé l'univers. Les récentes recherches de l'équipe dont fait partie l'auteur de ce livre ont abouti à la certitude qu'aucune image, aucune démarche spirituelle, aucune gesticulation technique ou religieuse ne sont absentes d'un ensemble

[p. vii]

de classifications qui tente même d'enrober un monde futur, donc non encore perçu. De plus, ces classifications ne font pas qu'établir des rangs dont chacun constituerait une suite autonome d'habitacles liée aux voisines par une charnière du raisonnement : chaque terme la composant est au contraire en rapport avec tel autre de la suite adjacente, ce qui le relie finalement à d'autres avenues de symboles.

Pour employer une image indigène, on peut considérer que les interstices d'une étoffe sont les lieux mythiques où s'insèrent les « paroles » ancestrales, c'est-à-dire les symboles de la classification; et ces paroles sont comptées sur une ligne de la chaîne comme sur une ligne de la trame.

Bien plus, des files de correspondances s'insinuent dans d'autres directions si bien que chaque symbole est le centre d'une étoile dont les rayons couvriraient l'ensemble du système. Il y a là plus qu'une juxtaposition des symboles, mais bien plutôt une continuité qui marque sans doute une étape de la connaissance scientifique.

Le travail de Mme Germaine Dieterlen, qui présente un tableau très résumé de la documentation recueillie, a été mené de telle sorte que ces correspondances se sont offertes d'elles-mêmes. Il démontre par exemple l'identité de la harpe utilisée par le devin, de l'homme et du monde. Il fait connaître le sens des bandes de coton diverses que tissent les Bambara; chacune d'elles connote une étape de la création, un geste de personnage mythique, un état physique ou psychique. La gamme des bandes étale l'histoire du monde comme la collection des situations possibles. De même, le bonnet du circoncis apparaît comme le raccourci d'un cosmos orienté et actif qui expose des données et produit des effets : la ligne verticale des sept points rappelle la dualité de l'homme qui est trois plus quatre, c'est-à-dire mâle et femelle; les points en étoile marquent l'orientation du monde actuel et préfigurent le monde futur; le pompon du vertex met le porteur en relation avec les ciels; la couleur blanche de l'étoffe opère une catharsis par remise continuelle du circoncis dans la lumière du Moniteur.

Et sans doute le port du bonnet est-il aussi, comme pour d'autres peuples, une manière d'exhiber le résultat de l'opération subie : la tête de l'enfant est enserrée dans son propre prépuce, ce qui revient à identifier cette partie du corps à toute la création. Ainsi coiffé d'univers, le circoncis chemine dans sa nouvelle personne.

L'auteur a su déceler ces innombrables correspondances et donner de la pensée mythique comme de la métaphysique bambara un tableau cohérent qui ne rappelle en rien les études antérieures sur cette population. Les matériaux amassés avec sagacité et rigueur sont d'une qualité exceptionnelle et, pour tout dire, renouvellent nos idées non seulement sur les Bambara mais encore sur les Noirs en général. Les pages sur le néant originel, sur la primauté du signe, sur le cycle allant du Moniteur à l'ordure, sur les techniques, sur le rite qui se termine par le silence des baguettes frappant le vide, sont autant de révélations. Avec elles, les Bambara entrent dans l'histoire. Les sociologues comme les psychologues, les philosophes comme les historiens des religions y trouveront ample matière à réflexion.

Marcel Griaule.

AVANT-PROPOS

Le présent ouvrage fait partie d'une série d'études entreprises au Soudan français depuis 1931 par les Missions Griaule.

Au cours des 6e, 7e et 8e expéditions (1946, 1948, 1949) les recherches ont porté sur les institutions religieuses des Bambara. Dans cet essai sont exposés, avec les commentaires nécessaires, les résultats des enquêtes menées par l'auteur, compte tenu des travaux de ses co-équipiers.

Les informations ont été recueillies dans la région de Bamako à Koulikoro, Kago, Kangaba; dans le cercle de Ségou à Konodimini, Banankoroni, Diammarabougou, Soroba, Massala, Toko, Shouola, Kokou, Banankoro, Pelengena, Sama, Kala, Kalabougou, Ségoubougou, Ségoukouru et dans les divers quartiers du chef-lieu.

Certains éléments des matériels décrits ont été collectés pour l'Institut français d'Afrique Noire de Dakar.

Les Bambara qui ont collaboré régulièrement au recueil de la documentation sont les suivants :

Dyodo Diallo, fils de Zangué Diallo, notable de Ségou.
Mamadou Diara, directeur de l'École rurale de Bamako.
Bala Diara, de Banankoroni, cultivateur, chasseur, devin, chef du Komo, chef du Kworé.
Dji Diara, de Soroba, cultivateur, chasseur, guérisseur, chef du Nama.
Bakonimba Koulibali, de Soroba, cultivateur, chef du Komo.
Boï Koulibali, instituteur à Konodimini.
Mousa Woulalé, de Pelengena, griot.
Mousa Diara, de Sama, cultivateur.
Nadyè Dambèlè, de Konodimini, potière.

De nombreux chefs, notables, prêtres et d'une manière générale tous ceux qui étaient détenteurs de renseignements intéressants ont été consultés. Nous les remercions de leur collaboration.

Nous remercions également M. le Gouverneur du Soudan et MM. les Administrateurs des Cercles de Bamako, Ségou et Mopti,

M. le Directeur de l'Institut Français d'Afrique Noire pour les facilités qu'ils nous ont accordées.

Cette étude a été exécutée sous la direction de M. Marcel Griaule que nous remercions de son aide sur le terrain d'enquête et de ses conseils concernant la présentation des documents. Nous remercions également Madame de Ganay qui a collecté un certain nombre de matériaux.

INTRODUCTION

Les populations bambara qui font partie du groupe Mandé s'étendent actuellement, au Soudan Français, du 11e au 14e degré de latitude nord, du 7e au 11e degré de longitude ouest. Trois groupes fixés respectivement dans le cercle de l'Issa Ber, au Kaarta et dans le cercle d'Odienné s'écartent sensiblement du groupe central qui occupe les rives du Niger autour de Bamako et Ségou.

Les Bambara vivent dans de petits villages de la savane; ils pratiquent surtout l'agriculture (mil, fonio, riz, maïs, etc.) mais aussi l'élevage et le jardinage. Les riverains du Niger sont pêcheurs et vivent en symbiose avec les Bozo qui leur ont enseigné les techniques de la pêche et qui sont généralement reconnus comme les premiers habitants de ces territoires.

Les Bambara déclarent être venus du Mandé. Cette région où siégèrent les capitales successives de l'ancien royaume du Mali a déjà depuis longtemps attiré l'attention des chercheurs (1). De plus elle « est le centre d'où ont rayonné quarante-quatre populations réparties actuellement dans l'espace compris entre la côte Atlantique, le Sénégal, le Niger, jusqu'au Dahomey (2) ».

La région désignée porte aussi le nom de Dyéliba et s'appelait autrefois Toubla. Le nom de Kaba (1) donné par tous les Soudanais à l'ancienne capitale du Mali désigne actuellement le village de Kangaba. Mais les plus anciennes agglomérations attestées, avant Dyéliba (Mali I d'après J. Vidal) sont situées dans les régions de Kri Koroni et Ouanda.

---

(1) Cf. J. Vidal. *Au sujet de l'emplacement du Mali (ou Melli)*, p. 251 à 268. *Le véritable emplacement du Mali*, p. 606-619. Cet auteur désigne par Mali I à IV, quatre villages qui auraient été successivement ville royale : Dyélibakoro, Niani, Maninkoura et Kangaba. Cf. également Ch. Monteil. *Les Empires du Mali*, p. 13.

(2) Cf. D. Zahan. *Aperçu sur la pensée théogonique des Dogon*, p. 113 à 133. Cet auteur donne la nomenclature des populations issues du Mandé. Cf. également S. de Ganay. *Notes sur la théodicée bambara*, p. 212-213. « Dans le village de Manin Kaba, il existe ce qu'ils appellent le *manii blo*, « le vestibule du Mandé », dans lequel sont disposés, autour de l'objet *pembele*, douze sièges *(sigi yoro)* représentant les quarante-quatre « races » issues de ce foyer commun. »

Cette origine est bien connue des Soudanais; cependant le nombre de populations varie. Au cours de la cérémonie septennale de Kangaba (cf. p. xiv, note 3) les griots disent : « Nous étions quarante-huit, par le mélange des vents, les races sont sorties aux quatre points cardinaux » *(an tumbi dabe ni saki la, siaw bwora fyè nyamile ericke nani)*.

Dans le village de Kangaba un sanctuaire, dit *mande blo* « vestibule du Mandé », ou *kaba blo* « vestibule de l'étonnement », est l'objet d'un rite septennal auquel assistent des représentants de toutes les races se disant issues de la même souche. La cérémonie consiste en la réfection du toit du sanctuaire qui abrite un objet dit *dolin*; mais ne sont accrédités à exécuter le rite que des personnalités de race pure appartenant à la famille Kéita (2) et les griots traditionnels des chefs du Mandé, les Dyabaté. Seuls ils peuvent pénétrer dans le sanctuaire et en fouler la terre dont on dit « qu'elle est plus lourde et plus puissante que toutes choses (3) ».

Dès le XIVe siècle de nombreux voyageurs décrivent les Bam-

---

(1) Le mot *kàba* tiendrait son origine de *ni ya ka ba ko ye* « ceci est étonnant », expression courante concernant le sanctuaire et les objets rituels qu'il contient. Les Dogon, qui se disent issus du Mandé et qui se sont dispersés dans les falaises de Bandiagara à partir d'agglomérations auxquelles ils avaient donné le nom de Kani, expliquent ce dernier terme en lui donnant le sens de « petit Ka ». Il s'agit, en quelque sorte, de relais entre leur habitat primitif et celui qu'ils occupent actuellement. Sur ces migrations, cf. G. DIETERLEN. *Les Ames des Dogon*, p. 9 et s.

(2) Le nom de Kéita, pour lequel diverses étymologies ont été relevées, est celui des fondateurs de l'empire mandingue. Cf. C. MONTEIL. *Les Empires du Mali*, p. 31 et L. TAUXIER. *Histoire des Bambara*, p. 40 : « Les premiers rois de Mali résidèrent à Kangaba et étaient en effet des Kéita. »

Par extension, le nom Kéita peut être adopté par des individus appartenant à l'une des populations originaires du Mandé. C'est ainsi qu'un Dogon prendra pour *dyamu* Kéita s'il vient vivre au Mandé. D'autre part, la devise des Kéita, qui relate les hauts faits des princes mandingues, comporte celles de presque toutes les populations qui se disent issues de cette même souche. Cette origine commune éclairera peut-être l'institution des changements réglés de noms observable en Afrique Noire, problème qui avait retenu l'attention de certains auteurs; cf. notamment P. HUMBLOT. *Du nom et des appellations chez les Malinké*.

(3) *Kangaba dugukolo kà gri fêw be*.

Le sanctuaire est une hutte ronde munie de deux portes orientées l'une à l'est, l'autre à l'ouest et couverte d'un toit de chaume dans lequel est caché l'objet dit *dolin*. Le village est entouré de plusieurs lieux sacrés : un arbre *sunzun* au nord; un puits à l'ouest; deux pierres situées l'une *(fara fi)* à proximité de l'agglomération, l'autre *(fara gwe)* au bord du fleuve.

La cérémonie septennale est exécutée de nuit. La veille, le doyen des Kéita va secrètement retirer l'objet *dolin* de l'ancien chaume pour le cacher. La nouvelle toiture est confectionnée avec des matériaux recueillis par les descendants de Farako Makan Kegni (paille, bambous et fibres) tandis que les femmes de même condition crépissent les murs. Les griots Dyabaté qui officieront se procurent un petit bâtonnet de bois de *sunzun* de la longueur de l'annulaire qui leur servira de frotte-dents : les rameaux sont coupés obligatoirement par la sœur aînée du chef des griots qui lui donne en échange bara organisés en petites chefferies plus ou moins soumises aux empires avoisinants. Cet état de choses dura jusqu'à l'époque de la poussée peule dans cette région (xviie siècle) qui fonda deux royaumes et créa une aristocratie locale métisse de Peul et de Bambara. Le premier de ces royaumes fut celui de Ségou, dont l'histoire est partiellement connue (1). C'est dans cette région surtout qu'ont porté les enquêtes; le chef-lieu, qui fut longtemps une capitale, garde les traces d'une juridiction et d'une religion bien organisées. C'est aussi là qu'est parlé, d'après les connaisseurs, le dialecte le plus pur (2).

Les dialectes bambara appartiennent au sous-groupe des langues mandingues, du groupe nigéro-sénégalais (3). Les Bambara connaissent des systèmes de signes et d'idéogrammes que l'on peut considérer comme une sorte d'écriture dont l'étude se poursuit actuellement. Le système d'où découleraient tous les autres, le *glā glā zo*, comporte deux cent vingt-six idéogrammes qui, d'après les informateurs, résument les connaissances des Bambara (4). Ceux-ci, d'autre part, utilisent un système de chiffraison vigésimal. De plus, l'analyse des textes recueillis et dont certains sont cités dans cet ouvrage, a fait apparaître un

---

un pagne de huit bandes de coton blanc et un nombre de cauris multiple de 8, soit 8.480.

Les orateurs qui officieront pendant la nuit sont coiffés d'un bonnet blanc surmonté d'une bande de coton de même couleur et d'une tunique jaune *(wolo)* (cf. p. 106). Assis à l'intérieur de la case dont l'ancien toit a été retiré, face à l'est, ils crachent dans un récipient pour ne pas souiller le sol. Les Kéita se tiennent à l'extérieur de la case sur un emplacement attenant délimité par des pierres et recouvert de graviers ramassés dans le lit du fleuve par des jeunes gens. Pendant toute la nuit, à tour de rôle et encouragés par un parent, les griots récitent les devises de toutes les populations issues du Mandé. Au petit jour ils font le tour de la construction en chantant, puis les Kéita hissent le nouveau toit. Le doyen va ensuite secrètement remettre l'objet dans le nouveau chaume. Un bœuf blanc est sacrifié au puits.

Les informations recueillies sur cette cérémonie sont encore fragmentaires, mais la couleur des vêtements portés par les officiants, celle de la victime, le nombre de bandes du pagne et de cauris donnés par le griot à sa sœur, l'origine des graviers utilisés comme siège par les Kéita, témoignent qu'il s'agit là d'un rituel exécuté sous la protection de Faro (cf. chap. II).

(1) Sur l'histoire des Bambara nous renvoyons le lecteur au volume très documenté de L. Tauxier. *Histoire des Bambara*.

(2) Les enfants des familles suffisamment fortunées pour en assumer la charge étaient autrefois envoyés à Ségou, chez des alliés, pour apprendre à bien parler une langue élégante et pure.

(3) Cf. A. Meillet et M. Cohen. *Les Langues du Monde*, p. 546.

(4) Cf. p. 2. Ce système et deux des idéogrammes, dont *to*, qui désigne la bouillie de céréales et par extension la nourriture en général, seront l'objet d'un commentaire dans M. Griaule et G. Dieterlen. Signes graphiques des Soudanais. L'*Homme*. Cahiers d'ethnologie, de géographie et de linguistique, Hermann (sous presse).

Sur certaines écritures relevées chez les Mandé et les Vai, cf. J. Février. *Histoire de l'écriture*, p. 528-529.

nombre important de mots qui, selon les informateurs, appartiennent à une langue ancienne d'origine mandingue, utilisée actuellement comme langue liturgique. Il n'entre pas dans le cadre de ce travail d'en faire l'exposé ni le commentaire, mais il convient de remarquer que l'étude de ce vocabulaire contribuerait à l'intelligence de la pensée religieuse des Bambara.

Les Bambara ont une notion assez claire de leur protohistoire et même de leur préhistoire. Ils décrivent avec précision leurs ancêtres, connaissent les phases du développement de leurs techniques. Ces données sont nécessaires à la compréhension de leur religion qui, comme les autres institutions, est en rapport notamment avec ce développement technique. De plus les seuls monuments observables sont constitués par le mobilier et les ustensiles, matériel éphémère mais continu, dont les formes et l'ornementation transmettent les principes métaphysiques sur lesquels repose leur pensée.

Il conviendrait de ne pas négliger les influences subies par les Bambara du fait de leurs contacts avec les autres populations soudanaises lesquelles sont, depuis une haute époque, en relations avec le bassin méditerranéen (1). Les empires du Mali, notamment, en favorisant l'expansion de l'Islam ont entretenu au cœur du Soudan un foyer qui a laissé des traces dans les institutions sociales et religieuses des Bambara.

Mais il est difficile actuellement, sinon impossible, de faire un historique de cette religion et même de poser le problème des influences. Nous avons devant nous le dernier état de cette religion et nous ne connaissons son développement que par les mythes qui, d'ailleurs, ne la font pas apparaître comme un ensemble fixe très tôt; il semble qu'elle se soit lentement formée avec des apports divers qui ont été sentis et exprimés dans des mythes. D'autre part les religions actuelles des Soudanais paraissent nationales; elles forment des ensembles distincts chez les Dogon (2), les Bozo, les Kouroumba, les Minianka, les Sonray, les

---

(1) Nous souhaitons que l'appel et l'allusion de M. P.-M. Schuhl retiennent l'attention : « Les données que nous devons à présent à des investigations comme celles de M. Griaule paraissent devoir appeler des synthèses nouvelles et fournissent de curieux termes de comparaison. Une influence indirecte des mythes grecs sur la mythologie soudanaise n'est d'ailleurs pas impossible. » *Essai sur la formation de la pensée grecque*, Presses Universitaires de France, 2e éd., 1949, p. XV.

M. Schuhl rappelle d'autre part les rapprochements proposés par M. H. Jeanmaire entre les faits grecs et certaines institutions africaines considérées comme des survivances d'une civilisation protoméditerranéenne (*Couroi et Courètes*, Lille, 1939).

(2) Cf. M. GRIAULE. *Dieu d'eau.*

Mossi. Cependant il convient de tenir compte du fait que leur observation systématique, entreprise depuis quelques années, fait apparaître un substrat commun sur lequel chaque population a greffé son système original. L'étude de ce substrat apportera des précisions au problème des origines et des influences.

Nous disposons dès maintenant de l'appui de la philologie et nous avons surtout l'avantage de voir les Bambara vivre leurs croyances et de découvrir leurs mythes dans un matériel très rudimentaire mais expressif, comme dans de très nombreux rites. Ce sont des observations effectuées sur un large champ d'enquête qui servent de base à l'exposé de ce système religieux.

Les Bambara ont fait depuis longtemps l'objet d'articles et d'ouvrages dont nous donnons ci-après une bibliographie sommaire. Le seul auteur qui, jusqu'ici, ait tenté de décrire l'ensemble de leurs croyances est L. Tauxier dont l'étude sur *La Religion bambara* tient largement compte des travaux de l'abbé Henry et de Ch. Monteil. Mais, à travers les descriptions, certes consciencieuses de ces différents observateurs, cette religion apparaît comme un composé d'éléments disparates, voire incohérents, sans aucun lien apparent entre eux. Malgré un plan d'ensemble et une absence louable d'idées préconçues, L. Tauxier n'a pu dégager les concepts fondamentaux des hommes qu'il a observés.

C'est que l'étude d'une religion noire actuelle se heurte à des difficultés d'ordre divers tenant d'une part à la nécessité de se rendre sur le terrain et d'autre part au caractère en grande partie ésotérique de la doctrine. Ces circonstances font de cette étude, au premier chef, une œuvre de découverte.

Certes, la religion bambara, comme toute religion soudanaise, comporte une partie exotérique, accessible assez facilement et qu'une observation conduite selon des méthodes scientifiques permet de déceler dans ses détails. Des règles de vie admises par tous, des croyances professées ouvertement, des pratiques privées ou publiques peuvent faire l'objet de travaux minutieux. Mais cette religion, comme celle des peuples avoisinants, repose sur une doctrine dont les principes fondamentaux sont connus des vieillards et des initiés, lesquels éprouvent une grande aversion pour les confidences aux étrangers, notamment aux Blancs. Une telle situation explique l'ignorance où l'érudition est restée pendant si longtemps de la pensée religieuse de cette population (1).

---

(1) Les Bambara font eux-mêmes une distinction entre deux sortes de connaissance. La première, dite *doni fyẽma* « connaissance (qui a) du vent »

Une méthode d'observation rigoureuse ne négligeant aucune donnée et comportant l'utilisation d'une collaboration indigène étroite a fait apparaître un système cohérent dans toutes ses parties dont on peut dire qu'il s'appuie sur une métaphysique restée jusqu'à présent inconnue. Les postulats des Bambara étant pris pour base, l'enchaînement des faits à travers les mythes, le développement des institutions et des techniques, leur fonctionnement, le destin actuel de l'homme dans le cosmos se déroulent dans un cadre logique.

D'autre part ce système se projette dans le concret sous forme de symboles qui empruntent les aspects les plus divers et jouent un rôle actif. Le symbolisme pénètre non seulement la vie religieuse proprement dite en se révélant dans les sanctuaires ou les matériels de culte (formes, graphies) ou au cours des cérémonies religieuses (temps et lieux, rituels, etc.), mais il imprègne toute la vie profane et le comportement quotidien.

La métaphysique et la religion de cette population offrent un ensemble construit qui englobe toutes les activités sociales, techniques et économiques. Ce sont ces principes et ce système que nous tenterons de dégager dans les chapitres qui suivent. Nous pensons pouvoir affirmer que certaines incohérences ou contradictions présentées par le système religieux tel qu'il est décrit ci-après ne sont pas dues à la pensée bambara — encore qu'elle soit subtile et s'appuie sur une dialectique — mais aux lacunes de l'enquête.

est superficielle et considérée comme « l'entrée en matière des croyances et des coutumes ». Elle appartient aux adultes peu versés dans la cosmologie. En revanche la seconde, dite « connaissance profonde » *(doniya duna* ou *kuru doniya)*, est réservée aux prêtres, aux chefs de famille, aux vieillards des deux sexes versés dans « la science des choses de la création ». Elle ne s'acquiert que lentement, au cours d'initiations successives et par un véritable enseignement qui se diffuse parfois au cours des rites.

PLAN DE L'OUVRAGE

Dans le premier chapitre de cet ouvrage est relaté le mythe qui forme l'armature des représentations religieuses. Une connaissance approfondie de la cosmogonie et des mythes est nécessaire à l'intelligence des institutions comme des rites les plus courants.

Le second chapitre analyse les représentations, notamment celle de Faro, maître du verbe et détenteur de la vie, dont le culte est général et qui préside à toutes les activités des hommes.

Le troisième chapitre aborde la notion de personne et décrit successivement les principes spirituels et le corps qui dépendent de Faro, puis le nom, la devise et les interdits qui intègrent l'individu dans la société. Il examine aussi la dissociation de ces divers éléments au moment de la mort.

Le quatrième chapitre résume le mécanisme du sacrifice sanglant, moment principal des rites, disposant des éléments composant la personne décrits au chapitre précédent. Il comprend aussi la description des lieux de culte et des autels originaux des Bambara.

Le cinquième chapitre concerne l'origine, le développement et l'organisation des techniques : pêche, chasse, agriculture, tissage, forge, poterie, dont le fonctionnement est en grande partie rituel et qui sont le support de représentations religieuses.

Le sixième chapitre décrit les cultes individuels, familiaux, comme ceux propres au village tout entier. Les grandes sociétés religieuses, qui groupent les individus autour d'autels préposés à des fins précises, sont également examinées. Ces cultes, si divers en apparence, font intervenir les mêmes représentations et les rites comportent des mécanismes comparables des forces mises en mouvement.

Dans le septième chapitre est donnée une description détaillée d'un certain nombre de rites choisis parmi les plus représentatifs. Une place prépondérante est réservée à ceux qui se rapportent plus directement à la « personne » : naissance, circoncision et excision, initiations, funérailles, cultes des ancêtres. Parmi les autres sont commentés ceux qui concernent les ordures, la pluie et les rites généraux dits « du renouvellement de l'année ».

Le huitième chapitre présente une analyse de quelques procédés de divination qui apparaissent comme une synthèse des concepts métaphysiques bambara et reflètent en un symbolisme très subtil l'ensemble de leurs connaissances.

SYSTÈME DE TRANSCRIPTION

ã, an de planche.
ẽ, in de dinde.
ẹ, ĕ de jet.
e, e de dé.
ọ, o de vol.
o, o de pol.
õ, o de balcon.
ŭ, ou du français.
ũ, un du français.
č, pour tch.
j, dj de djinn.
ñ, gn de hargne.

Les mots indigènes transcrits en caractères romains doivent être prononcés à la française.

Dans certains cas, seule la traduction des expressions bambara est placée entre guillemets afin de ne pas alourdir le texte. D'autre part cette traduction est littérale afin de serrer de plus près la pensée bambara et même s'il en résulte des inélégances ou des tours difficiles à saisir.

CHAPITRE PREMIER

LES MYTHES

Les mythes des Bambara doivent s'entendre comme une somme de connaissances, une sophie, et non comme une suite de récits étiologiques fixés. On peut dire qu'ils composent une métaphysique comprenant la connaissance des choses de la création en même temps que celle des principes de leur état et de leur action.

Dans cet ensemble, la connaissance des choses divines a sa place, mais non la primauté dans le temps. Le Bambara s'adresse à la création, au cosmos, conçu comme une entité contenant ses déités, cosmos dont il est lui-même l'expression éminente. Les textes qui suivent exposent en premier lieu l'origine de la création, puis l'ordonnance de l'univers sensible, issu de la vibration primordiale, et enfin, sur la terre modelée par Pemba, la création des êtres vivants alors immortels.

La domination du monde terrestre et particulièrement du genre humain est d'abord assumée par l'un des avatars de Pemba, l'arbre phallique *balanza*, qui vit du sang et s'assimile les forces des hommes. Son règne est troublé par de graves désordres cosmiques provoqués par la rébellion du premier être femelle créé, Mousso Koroni, désordres dont les hommes subissent encore aujourd'hui les effets. Mais l'abus que fait l'arbre de son pouvoir dresse contre lui Faro, qui le vainc et réorganise l'univers en le délimitant puis en nommant et classant les éléments qui le composent. Sur terre, où est apparue la mort due à la malédiction de l'arbre, cette réorganisation a pour fondements le principe de la gémelléité, la « parole » enseignée aux hommes par Faro désormais maître du verbe et les techniques réparatrices qui doivent, au fur et à mesure des besoins, assurer la subsistance. Fondé sur l'ordre et la mesure, le règne de Faro, auquel les hommes rendent désormais un culte, laisse prévoir les « paroles futures » qu'il leur révélera dans l'avenir.

La succession des thèmes mythiques présente une construction du cosmos, espace et temps, monde naturel et surnaturel, catégories, nombres, la notion de la cohérence spatiale et temporelle de ses éléments (interdépendance des phénomènes). Il situe la personne (corps et principes spirituels) et, dans le domaine psychologique, décrit la lente évolution de la conscience (notion de la douleur), du jugement (notion de la responsabilité, de la faute), de la volonté (notion de l'effort créateur, du travail) lesquels se développent chez l'homme avec l'apparition de la souffrance et de la mort. Cette dernière est sentie comme un accident survenu dans le déroulement de l'ordre universel, accident en partie compensé par la conservation des principes spirituels et leur réincarnation selon la croyance fondamentale en l'éternelle résurrection des choses. Le mythe décrit le premier rite, le rajeunissement, qui cesse dès l'apparition de la mort mais est remplacé par le sacrifice sanglant qui est encore aujourd'hui l'axe des rites (1).

Tels qu'ils sont exposés ci-après, ces mythes sont l'armature de la religion actuelle des Bambara, des cultes généraux rendus par la masse à Pemba et Faro.

PRÉLIMINAIRES DE LA CRÉATION.

A. — Le *glã glã zo* :

Les mythes de la création, chez les Bambara, impliquent une philosophie de l'être et de l'univers qui s'est développée à partir du vide, de rien, *fu* (2).

Cette connaissance, qu'ils tiennent des Kéita du Mandé, porte le nom de *glã glã zo* et décrit le stade intemporel et primordial qui a précédé les étapes de la création. Le mot *glã* qui désigne le vide originel, connote en même temps les idées de mouvement, d'éveil, de réveil, de résurrection : *glã* est le principe du mouvement universel interne du cosmos et de tout ce qui le compose. D'autre part, le terme implique l'idée que la création est continue dès le moment de son élaboration et perpétuellement entretenue dans toutes choses en même temps que dans l'univers considéré comme un tout (1).

---

(1) Chaque fois que cela a été possible la rédaction s'est dégagée des détails des mythes pour ne pas dérouter le lecteur et détourner l'attention de la ligne générale de la sophie bambara. Mais les connaissances populaires se dispersent dans de nombreux thèmes à variantes que l'érudition étudierait avec profit pour mieux connaître les démarches psychologiques collectives de cette population.

(2) Cette notion s'exprime par un signe de même nom qui peut se traduire aussi par « néant » ou « zéro » et fait partie du système de chiffraison bambara. Cf. fig. 1, n° 11. Pour un commentaire de ce signe, qui connote la continuité et la prolifération de la création, cf. p. 70.

glã « plein de son vide et son vide plein de lui-même » étendait partout sa puissance. Il émit une « voix de vide » qui créa d'abord son double, *dya; glã* fut deux, marquant ainsi le caractère primordial de la gémelléité, principe existentiel (2). Du couple émanait une substance humide, *zo sumale*, « rouille froide », qui sortait à l'état de buée liquide invisible et formait des corps durs et brillants (3).

Quand tout fut plein de ces corps glacés, *glã* émit une force, *zo ñami*, qui, montant et descendant en elle-même, produisit un souffle interne dit *fyẽ tasuma* « feu de vent ». Les deux *glã* traversèrent ce vaste contenu et ce feu fondit les substances (4). Lors de cette première fusion « le vaste *glã* a donné place à toutes choses dans le secret et l'invisibilité (5) ».

Les deux *glã* alors s'immobilisèrent, « reprenant en eux-mêmes leur énergie » et tout à nouveau se figea, se glaça. Puis une seconde fois ils fondirent les substances, comme pour défaire et refaire une ébauche. Ces mouvements, dits *glã glã*, témoignent de l'essence même du *glã* qui est éternelle résurrection des choses et la répétition du mot exprime la gémelléité, base de la création. Lors de ces deux fusions successives, les *glã* déterminèrent « quatre points », l'un au moment de la première fonte, les trois autres lors de la seconde, lesquels furent mis « en action immobile (6) ».

Puis *glã* déclencha en lui-même un va-et-vient qui, se répercutant sur les éléments de l'univers en puissance, leur donna une âme. Ce mouvement eut également pour effet de les situer et de les maintenir par l'attraction *(mana)* : « *glā* a remué les choses, elles ont pris leur place, la chaleur les a maintenues (1) ».

---

(1) Le mot *glã* appartient à la langue ancienne. Le terme bambara dont le sens est le plus voisin est *kununi* qui signifie « réveil, résurrection ». *glã* est le principe de l'éternelle résurrection des choses.

(2) On dit : *glã ye lankolo nye, lankolo nye glã ye, glã ye a yere ke lankolo fla ye, lankolo fla ye a yere ke glã ye* « *glã* est le vide, le vide est *glã*, *glã* s'est fait lui-même deux vides, deux vides se sont faits *glã* lui-même ».

(3) *glã ye kologa a la ka kę zo ye, boli tumbi kę šiši ye bali ye, ka kę dyi sumale ye, ka kę zo yele gele ye* « *glã* a fait sortir de lui-même une substance qui était rouille, cette émission était une fumée invisible qui devenait une eau froide, celle-ci une rouille brillante et dure ». L'informateur traduit le mot *zo* par rouille et, tout en comparant cette matière au produit de l'oxydation d'un métal l'assimile, une fois émise, au cristal.

(4) « Les deux *glã* se sont levés et ont fondu la voix du *glã*, la création a parlé la voix du *glã* » *(glã fla wululila kę, glã kã yeke, dali ye glã kã fo)*.

(5) *kono glã ye sikiyoro di few be ma, gundo ni blika la*. Le mot « chose », qui traduit littéralement *fẽ*, est pris ici, bien entendu, dans son sens le plus général.

(6) L'informateur compare cette étape de la création à une main tenant un crayon dont la pointe repose sur le papier, en position d'écrire, mais immobilisée. Les quatre points sont la prémonition des points cardinaux, en commençant par l'est (cf. p. 8).

Dans le même temps le contact établi entre les deux *glā* produisit une sorte d'explosion dont fut éjectée une « matière dure et puissante » qui descendit en vibrant. De cette vibration sortirent un à un des signes qui, attirés par les choses encore incréées, mais en instance, qu'ils désignaient, allèrent se placer sur elles. Chaque chose eut ainsi son signe et son mot; et « se conformant au mouvement du *glā* », chacune se mit à vibrer faiblement à l'intérieur d'elle-même et dans sa propre place.

Quand toutes les choses eurent été situées et désignées en puissance, un autre élément se détacha de *glā* et se posa sur elles pour les connaître : c'était le « pied de l'homme » (ou « grain du pied »), symbole de la conscience humaine. En même temps qu'il acquérait la connaissance, cet élément la communiquait aux choses qui prirent ainsi conscience d'elles-mêmes. C'est dire que les choses ont été désignées et nommées silencieusement avant d'avoir existé et qu'elles ont été appelées à être par leur nom et par leur signe. Mais elles ne se sont connues comme telles que dans la conscience de l'homme, « grain » ou principe de l'univers.

Tout alors se rassembla et se mit à bruire pour accomplir l'univers. Les *glā* se maintinrent à l'intérieur d'eux-mêmes et donnèrent à *zo* la responsabilité de la future libération des choses situées et animées qu'ils contenaient et dont ils avaient créé l'essence. *zo* en prit possession et attira leurs principes en une vaste boule, *kuru*, dite *yo yebali*, « *yo* invisible » : « *zo* a donné le principe du grain à *yo* et a mis en lui l'attraction et le pouvoir (2). »

yo était l'esprit, plus exactement « le penser et l'agir » qui, utilisant les « choses signées » déterminées par *glā*, allait élaborer la création.

---

(1) *glā ye fen yereyere, u nye, u sikiyoro mine, funteni yu mana.*
L'informateur compare ce mouvement horizontal à celui qui serait imprimé à une surface creusée de cupules : les choses, d'abord déposées en désordre, viendraient, sous l'effet de ce va-et-vient, s'insérer chacune dans un trou.
mana est traduit par attraction, agglutinement quand il est substantif. Il signifie également muer et peut désigner le produit de la mue, l'exuvie; il est alors synonyme de *folo.*

(2) *zo ye kise masa di yo ma, ka samani masa bla la, ka mineni masa bla a la.*

Le *glā glā zo* est figuré par trois gravures sur bois. La première, *glā kele*, représente le couple des *glā* sous la forme de deux spirales de sens inverse dont les points d'origine sont reliés; au-dessous est gravé « l'objet à quatre bras » d'où sont sortis les signes (1). Ceux-ci, au nombre de 226, sont à peine esquissés pour démontrer que « la création du *glā* est dans l'invisible, l'inconnu, le non réalisé ». La seconde, *glā dya*, est faite de 226 traits horizontaux ou verticaux, doubles ou « témoins » des mots. La troisième, *glā zo*, est un ovale divisé en sept cases (un carré au centre et deux fois trois secteurs latéraux) dans lesquelles sont gravés clairement les idéogrammes. Au milieu du carré central, un ovale contenant six signes représente à la fois « l'œuf du monde et *yo*, voix créatrice ».

B. — Le *yo* :

La création de l'univers sensible à partir de *yo* est conçue comme une progression du « penser », *tasi* (2). Cette progression qui porte le nom *d'oryo* ou *oyo* se décompose en trois étapes : *yo*, parole interne, esprit invisible et voix inaudible, contenant en puissance toute la création; *o* passage de l'inaudible au bruissant; *yereyereli*, vibration créatrice (3). Cette progression est représentée par sept signes, 7 étant le chiffre de l'homme *(homo)* « germe du monde ». Ce chiffre, en effet, additionne 3 (symbole mâle) et 4 (symbole femelle). Le couple qu'ils forment est lui-même la marque de la gémelléité, loi fondamentale de la création, chaque être humain étant à la fois mâle et femelle dans son corps et dans ses principes spirituels (4).

Il est dit de *yo*, voix intérieure et secrète, qu'il « vient de lui-même, est connu par lui-même, est sorti de lui-même, du rien qui est lui-même (1) ». Car de *yo* ne viendront des choses qui ne sont qu'elles-mêmes et qui ne seront rien d'autre que lui. Chaque chose, étant *yo*, ne vient, comme lui, que d'elle-même. De ce fait on n'est rien d'autre que soi, puisqu'on est une création de *yo* et que ses créations sont lui-même. Aussi n'y a-t-il rien d'autre au monde que soi-même, la personne étant *yo* qui est tout entier dans la personne. En conséquence, l'être descend sans intermédiaire de *yo;* il est *yo* et n'est dû qu'à son propre vouloir. C'est dire que l'homme, image de *yo*, est seul à se vouloir, seul à pouvoir, seul à faire surgir de lui l'acte ou la création, ceux-ci ne pouvant être que lui-même. « Qui donc, disent les initiés, peut se connaître, se faire connaître et se manifester autrement que par lui-même? Qui donc peut manifester autre chose que lui-même? »

---

(1) Cet objet est représenté actuellement par un bâtonnet d'*Acacia albida* dit « bois qui partage les signes » *ti kla dyiri*, dont l'écorce est enlevée de façon à dessiner un signe de multiplication enfermé dans un ovale représentant le monde.

(2) De *ta*, faire, en langue ancienne; *si*, agir. Les Bambara traduisent librement *tasi* par « esprit de rien » et donnent à cette précréation à partir du néant le nom de *tasi dyẽ* « monde de l'esprit de rien ».

(3) Le nom d'*oyo*, donné à ce système, se décompose en *o* et *yo* ce qui, dans l'énoncé, renverse l'ordre chronologique. Cette anomalie est sentie par les Bambara qui l'expliquent par le fait que *yo*, désignant une voix inaudible, ne peut être prononcé avant *o* qui désigne un bruissement perceptible. Ils expriment qu'en procédant ainsi *yo* « reste dans le secret de *o* », ce qui est conforme à sa nature.

(4) Le chiffre 3 représente, dans le corps de l'homme, la verge et les deux testicules, le chiffre 4 les quatre lèvres chez la femme. D'autre part l'homme et la femme sont pourvus de deux âmes jumelles et de sexe différent; l'une de ces âmes, celle de sexe opposé à celui du porteur, a pour siège le prépuce ou le clitoris, jusqu'à l'opération de la circoncision ou de l'excision. Sur la dualité de l'homme et sa personne, cf. G. DIETERLEN, *La Personne chez les Bambara* et, *infra*, ch. III, La personne.

Mais *yo* étant à l'origine des choses inaudibles et invisibles qui sont lui, est aussi dans l'inconnu, donc dans le néant. Et par conséquent il en va pareillement pour l'homme, qui est néant et ne peut agir que sur le néant de lui-même.

Or, *yo*, en tant qu'esprit, était libre dans sa décision et sa volonté créatrices. Son œuvre, dans le néant, consista à muer, « car il est la continuelle mue du monde ». Lorsqu'il se manifesta en tournoyant sur lui-même, il alla cinq fois aux quatre « angles de sa pensée », *seleke miri*, une fois au « ciel de sa pensée », *sā miri*, une fois à la « terre de sa pensée », *dugukolo miri*, leur communiquant ainsi sa puissance (2). La réalisation de cet univers qui détermina « l'espace de *yo* dans sa pensée » est exprimée par le chiffre 22 : « *yo*, obscurité de la création, au sein de l'espace secret de la nuit, maître de l'assise des 22 tournoiements, grand porteur de la vibration, grand constructeur de la moelle des os (3) ».

Ces 22 spires brassèrent ce que contenait *yo* en esprit : *nugu* « entrailles, intestin », qui portait en lui-même toutes choses et l'homme; *galā* « germe d'air » qui a « situé les vides dans toutes les parties de l'espace »; *fayā*, « germe de vent »; *sani*, « germe d'eau »; *yerē*, « germe de feu »; *yelēgu*, « germe de matière terrestre » (1). Les tournoiements de *yo* les ordonnèrent et les maintinrent dans l'attraction *(mana)*. C'est dire qu'entraînés par ce tourbillon attractif et créateur à la fois, ces éléments s'agencèrent les uns par rapport aux autres : ainsi furent déterminés les 22 termes de l'univers pensé par *yo*, qui sont également les 22 temps de cette pensée :

---

(1) *yo na na a yere la, bwora a yere la, dona a yere la, a be fu la min ya yere ye.*

(2) Sur la valeur du chiffre 5, cf. p. 9, *yo* a communiqué aux « angles » qui correspondront dans l'univers construit aux « angles cardinaux ») sa plus grande force car les Bambara situent là les pôles de l'attraction qui, dans l'univers, maintient tous les corps. On dit : « tous les corps acceptent la force de l'attraction des quatre angles », *fari be bi sō seleke nuni mana barika la.*

(3) *yo dali dyibi, šu kene gundo tyema, munumunu mu tani fla siki ba, yere doni ba, kolow nye kono dlaba. kono* serait le terme ancien pour moelle.

Cette prière est récitée en l'honneur de *yo*, quand on constate la grossesse d'une femme; on la récite aussi au moment des éclipses du soleil.

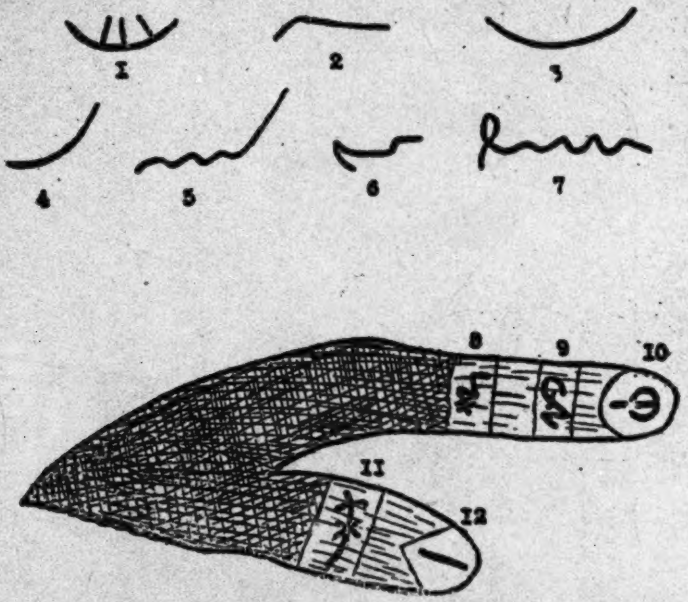

Fig. 1. — Signes bambara. De 1 à 7, signes de *yo*. De 8 à 12 signes de l'index et du pouce du roi représentant le monde actuel et le monde futur. (Dessins d'un informateur.)

1° origine de l'ouest, *klebi dyu;* 2° origine de l'est, *koro dyu;* 3° origine du nord, *baba dyu;* 4° origine du sud, *bani dyu;* 5° ciel d'en haut, *sā kaba;* 6° espace secret, *tyema gundo;* 7° terre, *dugu;* 8° centre de la terre, *kolye dugu;* 9° œil de la terre, *dugu nye;* 10° bouche de la terre, *dugu da* (2); 11° nord-ouest, *seleke se*

---

(1) *fayā, sani, yerē* (en langue ancienne) et *yelēgu* sont à l'origine des quatre éléments, air, eau, feu et terre qui n'existaient pas encore et devaient apparaître plus tard.

Les sept éléments constitutifs de *yo* sont représentés par des signes reproduits figure 1 (1 à 7).

(2) La terre respire par des orifices dits « bouches ».

(litt. : pied de l'angle); 12° sud-ouest, *seleke bolo* (litt. : main de l'angle); 13° nord-est, *seleke* (angle); 14° sud-est, *seleke* (angle) 15° soleil, *kle;* 16° lune, *kalo;* 17° étoile mâle, *dolo ke;* 18° étoile femelle, *dolo muso;* 19° bouche ou mère de l'étoile, *dolo da* ou *dolo ba;* 20° grain de pluie, *sã kise;* 21° pluie secrète, *sa gundo;* 22° pluie humide, *sã suma* (1).

En tournoyant des « angles » aux côtés cardinaux, *yo* a pensé quatre mondes (2) :

Le premier, *dyẽ mana*, « mue du monde », est celui du temps où *yo* « circulait en lui-même » dans le néant et dont on dit : « *yo* était la mue du monde, il se faisait muer lui-même (3). »

Le suivant, *dyẽ gale*, « premier monde », est l'univers qui allait être réalisé, l'actuel, dont on dit que le symbole est 3 : « L'assise du premier monde a été donnée aux choses par *yo*, ces choses furent construites à 3 (4). » Car *yo*, pour le réaliser, a dû passer par des intermédiaires qu'il a créés comme tels, mais qui ont été une cause d'imperfection, puisque l'harmonie des choses eût exigé que la création fût directement voulue et engendrée par lui. Le premier univers édifié est donc 3 : *yo* est 1, l'intermédiaire est 2, le monde est 3. Il en résulte que l'ensemble n'est pas adéquat à *yo*, car sa perfection s'exprimerait par 2, c'est-à-dire par *yo* et le monde sans intermédiaire (5).

D'autre part, il est dit de l'univers réalisé qu'il a été construit et perçu à 3, connu à 4. Car lorsque *yo* a décidé de créer, au temps 1, rien ne pouvait le connaître, puisque lui seul se mouvait dans le néant où il déposa ses forces. Lorsque celles-ci se réunirent, leur ensemble forma une nouvelle unité qui, ajoutée à *yo*, réalisa 2, c'est-à-dire le temps 2, lequel était encore dans l'inconnu. Lentement ces forces s'alourdirent tout en « résistant dans l'attraction », c'est-à-dire en s'agençant. Ce fut alors le temps 3 et les choses furent perceptibles. Mais c'est seulement au temps 4 qu'elles ont été clairement connues, c'est-à-dire que l'homme en a pris conscience. Il en résulte que la masculinité (symbole 3) est considérée dans la nature comme un stimulus de départ, en déterminant la fécondité, mais que l'épanouissement de cette dernière et de sa connaissance totale ne peut être accompli par elle que dans la féminité (symbole 4).

---

(1) On dit de ce temps : « *yo* ne dit que *yo* en haut, on doit imiter cela, la marche (du monde) a été faite à l'ouest, à l'est, au nord, au sud », *yo bi yo fo sana, ladeke ka kãka kę o la, giri kera wą la, ni flaye la, ni kaye la, ni noro la.* Les termes *giri, wa, flaye, kaye, noro* appartiennent à la langue ancienne.

(2) Ces quatre mondes sont représentés par un tracé fait de quatre quadrilatères concentriques, observé par l'informateur au village de Kéré, au Mandé. Les Bambara conçoivent l'espace comme un carré ayant des angles et côtés cardinaux (cf. p. 31, fig. 3).

(3) *yo tunye dyẽ mana ye, o tumbi mana a yerę la.*

(4) *dyẽ gale sikilyoko dira fama yo fę few ma, o few ye dlali kę saba la.*

(5) Cette idée semble être en contradiction avec le principe de l'identité de *yo* et de toute la création. Il faut entendre par là que l'œuvre totale comprend aussi l'imperfection dont la cause est précisément la présence des intermédiaires pour ainsi dire créés à cet effet.

Mais *yo* étant parfait a voulu la perfection et, tentant de la réaliser, voulut atteindre 5. Pour cela il est allé au-delà de l'univers 3, atteignant 4. Les nombres étant déjà le symbole des choses et, pour ainsi dire, les choses elles-mêmes, 4, représentant la féminité, ne pouvait créer seul, car 4 n'est pas dans 3 symbole de la masculinité. Or, dans l'univers pensé par *yo*, rien ne pouvait être engendré sans le concours de complémentaires ou jumeaux dont le type est le couple masculinité-féminité.

Ce monde 4 est dit *dyẽ bana* « monde refusé », car devant la difficulté, *yo* conserva cette création en lui; elle y reste en puissance et reviendra dans le monde qu'on dit *dyẽ nala*, « monde à venir », dans lequel, atteignant 5, *yo* réalisera un univers non en 3 comme l'actuel, mais en 2 (*yo* et le monde), sans intermédiaire. D'où sa perfection, car il sera adéquat au créateur. Cet univers sera créé en sens inverse du précédent, dans l'ordre sud, nord, est et ouest. Il sera établi sur « la grande voix d'une parole » et marqué par la transformation des êtres, par une répartition nouvelle, par l'absence de l'erreur, par un contact étroit avec l'essence des choses, par une connaissance parfaite. Car on dit : « Dans le monde à venir, toutes les paroles seront changées. La solidité n'a pas été réalisée dans cette création-ci, mais l'union se fera dans la solidité d'une parole. La course de *yo*, le travail de *yo*, le sommeil de *yo* pénétreront tous les êtres. Le deuxième monde est un monde neuf, le monde neuf est le monde d'une parole (1). »

Du fait que seul a été édifié le premier univers pensé par *yo*, les hommes ne connaissent que la moitié de sa pensée; l'autre moitié devant être réalisée dans « le deuxième monde ».

Ayant pensé l'univers et tournoyé sur lui-même pour le créer, *yo* « divisa et partagea son verbe ». Il déposa trois fois 22 voix dans *o*, lequel confia ensuite une fois 22 voix à *yereyereli*, d'où devait sortir l'univers enfin conçu. Ce dépôt dans *o* n'est autre que la mue de la voix inaudible *yo* en voix audible. Lorsque cette voix commença à retentir à l'extérieur de *yo*, toujours invisible et secret, ce dernier se fixa et demeura immobile en lui-même : *o*, dans son bruít, est l'envoyé de *yo*. Et dans cette voix toutes les choses nécessaires à la construction universelle furent proposées; elles aussi bruissaient en puissance à travers « les angles du monde ». Lorsque ce mouvement élémentaire atteignit sa plénitude, il en sortit le *yereyereli*, la vibration, et lorsque celle-ci fut et se mut, *o* cessa de bruire, mais il était lui-même l'esprit du mouvement; on dit : « *yere* est sorti de *o*, *o* a été son assise (1). »

---

(1) *Dyẽ nala la, kumaw be bi yelema; sikilyoko ma kle dali ko la fara ñugã na kę kuma dyolyoko kele nye; yo boli, yo bara, yo suna, bi dõ ma be la; dyẽ ña ye dyẽ kura ye, dyẽ kura ye kuma kele nye.*

Ce texte est parfois récité au cours des causeries qui suivent les cérémonies religieuses et lors des discussions sur les mouvements de la création. De très nombreux détails des rites et des jeux montrent cette préoccupation d'un deuxième univers. Cf. fig. 1, p. 7 et fig. 4, p. 32.

yo étant la voix immense et inaudible, *o* fut la voix bruissante; enfin *yereyereli*, vibration sonore, forma les rayons lumineux de l'espace. L'infini tout entier tremblait, brillait et résonnait. Lorsqu'il eut rempli l'espace de mouvement, de lumière et de sonorité, le *yereyereli* demanda à *o* sa puissance et fut « enceint », plein de tout ce qu'il voulait et devait créer : « La vibration était attractive, le créateur était en elle en secret (2). » L'univers actuel en sortit, provoquant « l'étonnement », *koni*, nom donné à la fois au *yereyereli* et au principe créateur qu'il contenait (3).

CRÉATION DE L'UNIVERS.

Au sein du *yereyereli* était l'esprit, *miri*, dans l'esprit le faire, *wali*, dans le faire la venue des choses, *nali*, dans cette dernière, le départ des choses, *tali*. Ces quatre termes définissaient également les quatre éléments fondamentaux de la création, respectivement air, terre, feu et eau, air et feu étant mâles, terre et eau femelles (4).

Le *miri* était aussi « l'œuf du monde dans lequel était enfermée la nature ». Il est représenté par trois ovales contenus les uns dans les autres; cette figure exprime aussi les trois tournoiements faits par *yereyereli* à chacun des points cardinaux (dans l'ordre nord, sud, est, ouest,) chacun d'eux brassant les quatre éléments (1). L'ovale du centre, dit *so dẽ*, « fils de la maison », est le grain primordial qui a disposé toutes les choses de la nature des quatre éléments. L'ovale intermédiaire, *dyẽ wali gale*, « première action du monde », représente la fécondité; il détermine l'homme, principe de l'univers, qui reçut également de lui la pensée et la connaissance. L'ovale externe, *dyẽ ko*, « porte du monde », est essentiellement mobile : tournant sur lui-même il se dilate ou se resserre suivant les naissances ou les morts de la matière aux multiples formes qu'il contient. C'est lui qui fait que toutes les choses, dans l'univers, « ne peuvent s'évader de la vision du créateur (2) ».

---

(1) *yere bwora o la, o kera siki kele nye a ko.*

(2) *yereyereli tunye mana ma ye, daliba tumbi a kono gundo la.*
Les Bambara conçoivent la luminosité et la sonorité de cette vibration comme telle qu'il serait impossible d'en supporter la vision et l'audition; mais si l'homme ne peut la percevoir elle n'en persiste pas moins : « l'œuf du monde continue sa vibration lumineuse et sonore ».

(3) Sur *koni*, cf. S. DE GANAY, *Notes sur la théodicée bambara*, p. 188 et s.

(4) « *yereyereli* a été fait en premier lieu de quatre éléments qui lui ont permis de vibrer secrètement » (*yereyereli gale gale kono kera ni wale nani ye, o ya to a sera ka yereyereli su a la*).

Or, l'essentiel de ce que brassait en tournoyant le *yereyereli* était l'esprit, qui, tout gonflé de ce qu'il était en puissance, finit par bruire. « L'esprit retentit au milieu des faits (3) », et comme il était le plus puissant il se maintint seul dans l'espace, et monta. Puis il éclata et de lui surgirent des éléments qui lentement se séparèrent, se dispersèrent et s'ordonnèrent. On dit de cet événement : « Autrefois les choses sortirent ensemble (4) ». Ces éléments fondamentaux, au nombre de vingt-deux, sont à l'origine de la création qui est classée en vingt-deux catégories.

Les Bambara ordonnent et nomment ces éléments selon plusieurs modes. Ils les partagent tout d'abord selon le système fondamental de la pensée créatrice *yo*, en trois groupes de sept, auxquels s'ajoute un vingt-deuxième.

Les sept premiers, *dyẽ dyo kã gale* « la première voix de la construction du monde », expriment *yereyereli* avant la connaissance mais contenant toutes choses et en premier lieu l'homme, « grain » de la nature. Les sept suivants, *dyẽ dyo kã saba* « la troisième voix de la construction du monde », connotent le début de la connaissance de *yereyereli* comme masculinité assurant toute la fécondité. C'est à ce moment qu'apparaît le terme *koni* attribué à *yereyereli*, exprimant l'étonnement devant la création. Les sept derniers, *dyẽ dyo kã nani* « la quatrième voix de la construction du monde », contiennent « la révélation complète des dispositions et situations de tout ce qui est créé » : *yereyereli* est connu alors dans sa féminité, et assure la suprématie de celle-ci sur la nature. Le vingt-deuxième résume ces trois groupes de sept et exprime la connaissance totale (1).

---

(1) Cf. fig. 2, p. 15. La création est ainsi exprimée par les nombres 7 et 12 qui sont obtenus par addition et multiplication de 3 (symbole du mâle et nombre des tournoiements) et 4 (symbole femelle et nombre des éléments). Sept est le symbole de l'homme *(homo)* et du principe de l'univers; 12 est celui de la multiplication des êtres et du développement perpétuel de cet univers.

(2) *fɛ̃w be dyele ngala ka yeli kono.*

(3) *miri ye manga li walew tyela.*

(4) *folo kow bõñuana.*

Une autre division des éléments détermine les catégories. Les sept premiers sont les *bonuana* dont on dit : « Les sept *bõnuana* sortirent d'abord (2) ». Puis viennent douze *bangini*, naissances ou *bayeremani* « découvertes », dont on dit : « Douze découvertes ont été laissées dans l'espace (3) ». Après elles apparaissent trois *figini* fondations ou *dyoli*, situations dont il est dit : « Trois fondations ont mangé le monde (4) ». Les sept premiers éléments sont « les états du monde », les douze suivants, « les assises du monde », les trois derniers « les paroles de la situation du monde (5) ».

Les sept *bõnuana* résument les caractères généraux des êtres et des choses :

1° *keleña*, unité;
2° *makari*, pitié, miséricorde;
3° *mako*, nécessité;
4° *sinaya*, agressivité, jalousie;
5° *fadena*, rivalité;
6° *maloya*, honte;
7° *sia*, race, espèce, souche.

Les douze *bangini* qui suivent déterminent les qualités et les destinées de la personne :

1° *ma ye ma ye*, litt. : une personne est une personne; dons, possibilités de chacun, propositions et dispositions.
2° *mako*, services réciproques, simplicité, dignité, politesse, sagesse.
3° *sebaya*, pouvoir, puissance, domination.
4° *dyuguya*, méchanceté, grossièreté, férocité, difficultés.
5° *kunanguya*, malchance, mauvaise destinée; mauvais cœur.
6° *sira*, chemin, guide, obéissance, discipline.
7° *nafolo*, richesse, santé, fécondité.
8° *adamadeña*, fraternité, humanité, liberté, bonté.
9° *dahirime*, nourritures, biens matériels.
10° *saya*, mort, maladies, infirmités, folie.

---

(1) La même progression des nombres que dans la pensée créatrice *yo* caractérise la création par la vibration. Étant 1, celle-ci est passée à 2. A 2, elle a conçu « l'air léger » invisible et les puissances qu'elle contenait se sont groupées pour former un ensemble. A 3 ces puissances sont devenues pesanteur et « l'air lourd », visible, apparut. A 4, et seulement à ce moment la création, entièrement visible, a été révélée à la conscience. Sur l'air lourd, cf. également S. de Ganay, *Notes sur la théodicée bambara*, p. 188.

(2) *bõnuana wolo fla bwora folo*. Le mot *bõnuana* signifie littéralement « sortir ensemble ».

(3) *bangini tani fla bla la kęnę da.*

(4) *figini saba ye dyẽ dũñ.*

(5) *dyẽ dyo tyoko; dyẽ sigi tyoko; dyẽ dyo ka.*

11° *lu*, nuit, obscurité et lumière, secret, sorcellerie.
12° *kle*, jour, soleil; tous les autels *boli* des Bambara.

Les trois *figini* sont respectivement :

1° *kun*, la tête qui a pensé le monde.
2° *ba*, la matrice qui l'a formé.
3° *fo*, la parole qui l'a créé.

De trois fondations détachées finalement de l'esprit naquit la connaissance, *fā* (1). Celle-ci s'entrouvrit, se partagea et contribua à édifier le monde sensible, engendrant notamment des particules, *moño moño*, qui entrèrent dans la composition de la terre et un rayonnement, *ngrọ*, utilisé pour la formation du ciel.

Dans le même temps, l'esprit laissa tomber sur terre en cours d'élaboration une chose lourde, en forme de globule, *kuru*, qui fut plus tard nommé *pemba* (2). Pemba, se déplaçant suivant un mouvement tourbillonnaire aux quatre points cardinaux (sud, ouest, est, nord), ayant reçu douze des éléments sortis de l'esprit modela, à l'aide des particules issues de *fā*, des mottes et des buttes qui donnèrent forme à la terre.

Mais en s'élevant l'esprit avait projeté vers le haut ce qui fut plus tard nommé *fāro* (3). Faro, qui n'était encore que vibration l'aida, avec dix de ses éléments et avec le rayonnement issu du *fā*, à construire le ciel suivant un trajet orienté. Faro se rendit d'abord à l'ouest, puis au sud, à l'est et au nord, déterminant ainsi les points cardinaux célestes.

---

(1) La prière suivante est parfois récitée qui est relative au *fā : fango, ma dua, ma be, fē mbina, fē nkumbe, fē ndaba, fē semba, wolo ligi ye nye, djiri ligi ye nye, panse bwora na. o bwora mi, o nya nyimi senge do. nligi ye yerewere ye, ka bo miri kono, miri dane sandyi.*

« Chemin du savoir, je ne suis pas petit, je ne suis pas grand. Une chose arrive, une chose à grande tête, à grande bouche, à grand pied. Je suis le maître de la fécondité; je suis le maître des arbres. Cela vient d'où? cela vient de la fatigue de mon grain. Mon maître est la vibration, de laquelle est sorti l'esprit dont la pluie ensemence. »

(2) De *fē*, chose et *ba*, grande.

(3) Les Bambara disent indifféremment *faro* ou *fāro*, de *fa*, création ou *fā*, connaissance, en langue ancienne. Ces étymologies témoignent des liens qui unissent, dans leur esprit, création et connaissance (cf. p. 4). Le suffixe *ro* exprimerait une idée d'ensemble, de totalité. Une autre étymologie a été relevée par S. de Ganay, dans *Notes sur la théodicée bambara*, p. 196. « ...les mots Fané (nom d'une famille de forgerons), Faro, *fan*, forge, *fara*, pierre, et *fari*, corps, ont la même origine. Faro est le nom secret de pierre. » Cette étymologie a l'intérêt d'accuser les rapports qui unissent, dans le Soudan, le Faro des Bambara et des Bozo, le Nommo des Dogon et les forgerons. Cf. M. Griaule. *Dieu d'eau (passim.).*

Le ciel est distinct de l'espace vide, *kęnę*, qui le sépare de la terre et qui est le produit de « la mue du *gereyereli* après qu'il ait accouché de l'esprit ». Composé de sept parties placées les unes au-dessus des autres, il fut terminé avant la terre qui, elle aussi, est constituée de sept parties correspondantes.

Bien qu'il eût reçu une plus grande part des éléments surgis de l'esprit, Pemba ne put venir seul à bout de son œuvre. Quand le ciel fut achevé, l'esprit bénit Faro et le lança sous forme d'eau qui, suivant le trajet emprunté par Pemba pendant sa descente, tomba goutte à goutte depuis la septième partie du ciel jusqu'à la septième partie de la terre où elle ruissela pour connaître des travaux de fondation terrestre. Dans sa descente verticale, Faro laissa dans l'espace un globule qui devint le génie de l'air, Téliko (1); sur terre il déposa une particule qui forma le génie Soba (2). Quand il s'écoula entre les mottes formant le sol, il vit que la terre n'était point achevée et il emplit d'eau les vides, ce qui forma les sources cachées d'aujourd'hui.

Alors la vie apparut sur la terre. Faro, fécondé par la vibration qui contenait en puissance masculinité et féminité, accoucha de deux jumelles sur un tertre désert (3). Dès leur apparition, autour d'elles poussa la première herbe, *yayalé* (4), et surgirent des scorpions chargés de les protéger (5). Au bout d'un certain temps la rosée, devenue abondante, s'épancha sur le tertre et forma une source d'où sortit un ruisseau. A sa tête apparut le poisson *kokoni* (6), dirigeant la marche du flot d'eau douce qui, pour la première fois, s'écoulait sur la terre. Il fut bientôt suivi d'un autre poisson de même espèce qui prit sur son dos Faro et ses enfants; le flot les entraîna dans leur demeure aquatique. La première d'entre elles accoucha de deux jumeaux, dont l'un était mâle. Faro envoya sa messagère l'hirondelle placer, dans les eaux de l'accouchement, l'âme ou force vitale des deux jumeaux. Comme témoin il garda dans l'eau leurs doubles, *dya*, afin qu'ils fussent protégés contre tout mal. De ces deux jumeaux naquirent les Bozo, qui, comme les jumelles de Faro, pouvaient vivre dans l'eau et converser avec lui (7). Faro créa alors les poissons, qui leur servirent de nourriture, les hydrosauriens et tous les animaux aquatiques qui peuplent la mer et les eaux courantes. Puis il remonta au ciel.

---

(1) De *teli*, aller vite.

(2) Litt. : *so*, maison, *ba*, grande.

(3) Les tertres nus, *walawala*, les clairières, sont le théâtre de rites concernant les jumeaux.

(4) *Andropogon (Hyparrhénia) hirtus.*

(5) Le scorpion, arme des jumeaux, pique celui qui leur fait du tort, car attaquer un jumeau c'est offenser Faro.

(6) *Clarias senegalensis.*

(7) Le mâle s'unit à sa sœur et donna naissance aux Bozo; la fille s'unit à un homme descendant de Mousso Koroni (cf. p. 39).

De cette première création de la terre et des eaux il est dit : « Pemba est descendu sur terre; Pemba a été le constructeur des choses. Le témoignage de Faro est sorti et s'est étendu dessus; la grande eau [de Faro] est descendue, est entrée dans les yeux de la terre; dans ces lieux Faro a fait connaître sa puissance (1). »

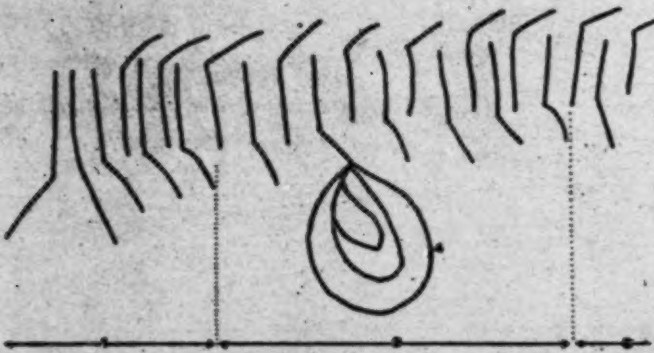

Fig. 2. — Les vingt-deux éléments issus de l'explosion de l'esprit (4). Ils se divisent en sept *bõñuana* (1), douze *bangini* (2) et trois *figini* (3). Ce dessin est exécuté sur les sanctuaires du Komo. (Dessin d'un informateur.)

Cette première phase de la formation du monde est rappelée chaque année par un dessin tracé sur le sanctuaire du Komo : il représente l'esprit, *miri*, et les vingt-deux éléments de la création (fig. 2). Les traits verticaux qui se lisent de gauche à droite sont coudés alternativement en haut et en bas pour montrer leur appartenance alternée à Pemba et Faro et signifier aussi que chacun des éléments est le premier d'une série d'autres issus de lui. Le *miri* est tracé au centre sous forme de poche oblique, image de « la grossesse du *yereyereli* ». En dessinant, le vieillard chargé de procéder au rite dit : « Pèmba et Faro ont fait la situation et l'organisation du monde, le ciel d'en haut a été fait en secret par Faro avec l'aide de l'esprit; Pèmba est descendu sur terre, il y fut connu très vite; les humains ont recours (à toi) *yereyereli*, mes deux mains sont derrière mon dos (2). »

---

(1) *pemba djigi na dugukolo ka, pemba dlala fẽwnye, faro ka šereya bwora o la, dyi ba djigini dema dugukolo nyena, yoro min faro ye a sebaya do o la.* Ce texte est récité au cours des cérémonies annuelles du Kworè (cf. p. 166).

(2) *pemba ni faro ye dyẽ dyokã ani dyẽ dyotyoko ka, sankaba dlala faro fe gundola miri dema ni ke la, pemba djigini dugukolo ka, a dõ teli yala, dyobe na warilika yereyereli, mbolo fla yenko.*

Règne de Pemba.

Pendant sept ans, Pemba fut tourbillon (1). Transformé en graine d'acacia, il se déplaçait dans l'espace porté par le vent et entraînant la pluie; enfin épuisé il se posa sur la terre qui, le cachant de quelques mottes, lui permit de germer : un arbre, le *balanza* (2), se développa, mais bientôt périt, desséché. Il ne resta qu'une sorte de madrier rectangulaire, *pembele*, nommé aussi *ko kun*, « tête des choses », gisant sur le sol nu.

Pemba, souche de bois contenant en puissance la création des animaux et végétaux, était seul sur la terre. Sous lui s'amassait sa propre décomposition. Comme il se déplaçait parfois en tourbillonnant, las de sa solitude, il dit un jour : « La poussière de mes traces dissipera ma nostalgie. » Ayant parlé, les traces se rassemblèrent et le vent les poussa près de l'amas de terre et de bois pourrissant. Il pétrit cet amas avec sa salive, y incorporant ainsi une âme-souffle, *ni;* il lui donna une forme et lui affecta un double immatériel, *dya*. Mais, comme il se défiait de lui, il confia ce double à Faro, maître du ciel et des eaux, gardien des *dya*. Puis il s'étendit sur cette forme pendant quatre jours. Au cinquième jour, il entendit sous lui un son aigu, de tonalité féminine, qui disait : « Lève-toi, je suis épuisée. — Non, répondit-il, je te donnerai d'abord un nom pour que tu sois ma femme. »

Cette créature avait une tête aux longues oreilles en pointe et une poitrine d'animal; le reste du corps était humain et comportait une queue. Jusqu'à sa perte, elle conserva cette forme.

Pour qu'elle pût devenir la matrice des êtres futurs, la dépositrice des connaissances et l'animatrice des pensées de Pemba, il fallait qu'elle l'assurât de son amour total. Elle le lui promit et reçut alors le nom de *Muso koroni kuṇ lye*, « petite vieille femme à tête blanche ». Petite, car elle était issue de lui; ancienne, car elle était son émanation, donc son égale dans le temps; blanche, car venant de lui, elle était pure comme lui. Étant nommée, elle se leva et devint sa femme. Bien qu'il ne la pénétrât pas, elle reçut de lui ses multiples semences, reprenant en échange sa propre sève. Elle donna naissance à des plantes et des animaux dont le premier fut la panthère. Tout ce qu'elle engendrait était pourvu d'une âme ou force vitale, *ni*, et d'un double, *dya* semblables à ceux que Pemba avait déposés en elle en la pétrissant de sa salive. A cette époque, aucun être n'était pourvu d'articulations (1).

---

(1) Cette partie du mythe concernant le *pembele* a été recueillie par S. de Ganay et publiée dans le *Journal de Psychologie normale et pathologique* sous le titre : « Aspects de mythologie et de symbolique bambara ». Nous avons apporté quelques modifications à ce texte.

(2) *Acacia albida.*

Les Dogon accordent la même importance à l'*acacia albida* dans le prélude de la création. C'est entre deux épines de l'arbre disposées symétriquement pointe contre pointe qu'a tourné une première matérialisation du monde sous la forme d'une masse tronconique aplatie en bois de ce même arbre.

La terre commença de fourmiller d'êtres apparaissant en désordre au hasard des naissances, et qui allaient révérer Pemba comme leur créateur, le nommant dieu, Ngala. De cette œuvre chaotique ce dernier voulut s'assurer la domination totale; il demanda alors à Mousso Koroni de le planter en terre; par sa propre puissance il prit aussitôt racine et devint le premier de tous les arbres, le *balanza*, vert en saison sèche, desséché en saison des pluies, qui étendit sa puissance (2).

Les êtres humains nés de Faro qui vivaient dans les rochers brûlants, allèrent se réfugier sous cet arbre dont la puissance éclatait à tous les yeux puisqu'il n'avait pas besoin d'eau pour verdoyer. Ils lui adressaient des prières et en reçurent des directives de vie. Comme ils étaient immortels, le temps n'existait pas. Ils comptaient pourtant leur âge d'après leur système pileux; à 12 ans se développaient les poils du pubis, à 22 ans, ceux des aisselles; la barbe était noire à 36 ans, à 52 ans les cheveux blanchissaient. Lorsqu'il comptait les quatre sortes de poils, l'être était complet; mais sept ans plus tard, il maigrissait brusquement, perdait sa vitalité et son âme s'affaiblissait; il devenait un vieillard.

Les hommes de cette époque ignoraient le langage et le vêtement. Ils vivaient nus et communiquaient entre eux par gestes et par grognements. Pour se reconnaître et sur l'instigation de Mousso Koroni, ils tracèrent sur leurs visages des scarifications de trois ou quatre traits, trois étant le symbole sexuel de l'homme (la verge et les deux testicules), quatre, celui de la femme (les quatre lèvres). En vertu de quoi chacun, selon son sexe, répétait trois ou quatre fois ses actes.

Les hommes, à cette époque, recevaient du ciel leur nourriture grâce au génie Téliko qui, dans l'espace, surveillait les eaux de Faro; il leur envoyait, en saison humide, des pierres issues du septième ciel et contenant des noix de karité, *ši kolo*. Les femmes en extrayaient de l'huile qu'elles consommaient avec les fruits. Or, un jour de la saison sèche, une femme ayant tiré de l'huile de quatre noix s'essuya les mains au *balanza* sous lequel elle était seule. « Cela, je le veux », dit l'arbre. Dès lors toutes les femmes lui offrirent de l'huile et furent imitées par les hommes qui s'imposèrent plus tard dans ce culte.

---

(1) Ces êtres aux membres souples et non articulés sont dit *mašibadè*.

(2) Le *balanza* n'est pas Pemba dans sa totalité, qui est esprit, force et matière. Il est l'avatar terrestre de Pemba et notamment l'image de sa masculinité fécondante. Pemba s'est matérialisé sous la forme du *balanza* pour continuer son œuvre de création et pour apporter la mort sur la terre.

Mais le *balanza* ne se contenta plus de Mousso Koroni. Il exigea que toutes les femmes lui donnassent leur amour. Elles durent alors s'unir à lui, augmentant sa vitalité et sa puissance car il se nourrissait de leur sève comme il avait fait de sa première femelle. Cette dernière, pénétrée de jalousie, introduisit la mauvaise volonté dans toutes choses; elle n'accepta pas le partage, elle ne l'approcha plus, lui refusant ainsi l'amour et la fidélité qu'elle avait promis. Elle le trahit, s'isola et, cessant de coopérer à l'œuvre de la création, elle commença de la troubler. Ce fut l'origine de sa chute, de sa pauvreté, comme de sa fatigue car le *balanza* la maudit pour sa trahison et la repoussa lorsqu'elle tenta de revenir à lui.

Elle connut alors une telle nostalgie, un tel désespoir, qu'une sorte de folie s'empara d'elle. Elle parcourut les cieux, l'espace la terre, d'ouest au nord, du sud à l'est, enfonçant dans le sol des morceaux de bois comme elle avait fait pour Pemba, en espérant qu'à leur tour ils deviendraient des *balanza*.

Pendant son périple, Mousso Koroni, qui s'était mutilée sur le *pembele* alors qu'elle entretenait avec lui des rapports sexuels, voulut infliger aux autres les mêmes blessures : sa fureur la poussa à circoncire et exciser avec ses ongles et ses dents tous les êtres humains qu'elle rencontra. La violence de ses actes détermina chez elle l'apparition des premières menstrues (1). Dans le même temps elle révéla aux hommes tout ce qu'elle avait appris par Pemba et devait rester secret; elle communiqua à tout ce qu'elle touchait l'impureté acquise par sa trahison. A son contact, la terre devint impure, qualité qu'elle a conservée jusqu'à maintenant (2).

Pemba poursuivit en vain, à travers l'univers, Mousso Koroni pour tenter de reprendre ce qu'il lui avait donné : pouvoir et

(1) *dyoli tumbi bo muso koroni, bolokoli gale ke to a fe na ñi ma sone ye.* « Le sang est sorti de Mousso Koroni au moment où elle a circoncis avec ses ongles et ses dents. »

(2) Cf. p. 53.

connaissance. Faro, sur sa demande, la pourchassa à son tour d'est au sud, du nord à l'ouest; il la rejoignit, la vainquit et tenta de la soumettre à son créateur. Mais elle refusa, se déclarant libre et mit ainsi le désordre dans la création : le mal, le malheur et la mort furent par elle introduits dans le monde.

Sans avoir vu la lumière, Mousso Koroni, au bout d'une longue vie de misère et de folie, mourut dans la détresse et l'abandon. Mais de cette misère devait naître un bien pour les hommes : les efforts qu'elle avait faits pour ne pas mourir de faim sont à l'origine des techniques agricoles qu'elle enseigna (1).

Pendant ce temps, la vie proliférait sur terre : l'arbre engendrait des êtres avec chacune des femmes auxquelles il s'unissait.

Entre temps, d'autres êtres apparaissaient sur terre, génies de l'air devenus visibles, ayant pris corps et transformés par le contact du sol impur en hommes dits *mahalakillen* (2) aux membres souples et sans articulations, semblables aux êtres qu'avait mis au monde Mousso Koroni Koundye. Mais la multiplication des vivants qu'il voulait dominer nécessitait de la part du *balansa* un accroissement de force qu'il puisait tout d'abord dans le liquide séminal des femmes. Cet apport devenant insuffisant une nourriture plus puissante lui fut révélée. Un vieillard qui devait épouser une vierge perdit un jour ses forces et ne put consommer l'acte sexuel. La jeune fille s'unit à l'arbre qui l'ayant déflorée fut couvert de sang et devint chaud. Cette chaleur, destinée à repousser celles qui se présentaient comme auparavant, signifiait qu'il désirait autre chose que leur semence. Prises de peur, les femmes pratiquèrent des rites divinatoires pour connaître sa volonté : la réponse fut qu'il voulait du sang.

Les hommes, ne sachant comment satisfaire ce désir, chargèrent le plus âgé d'entre eux, qui était devin, d'introduire dans le tronc le sang séché de la vierge. Il humecta l'endroit taché avec de l'eau et frotta l'arbre. Le troisième jour, au cours de ce travail, l'une de ses mains s'accrocha aux rugosités du tronc; une veine de son poignet s'ouvrit et le sang coula. C'est dès ce moment que deux fois l'an les hommes offrirent le sang de leurs veines, dont l'arbre absorbait la force pour se régénérer. En échange de ce don, l'arbre consentit à les rajeunir lorsqu'ils atteignaient l'âge critique de 59 ans. Mais en contrepartie, il exigea que toutes les épouses des hommes devinssent ses femmes.

---

(1) La partie du mythe qui traite de l'origine de l'agriculture sera relatée en détails par S. de Ganay, dans *Techniques et rites de l'agriculture chez les Bambara* (à paraître).

(2) Litt. : personne déchue.

De cet échange continu résultèrent la puissance de l'un et la jeunesse des autres, mais il n'était possible que par l'intermédiaire des femmes exigées en tribut.

La première offrande de sang des hommes avait lieu au début de la saison sèche. Réunis autour de l'arbre et au commandement du plus âgé, sans gémir ni se plaindre, au milieu des chants, ils aspergeaient le tronc en s'ouvrant les veines du poignet droit. Donner le sang de la main droite revenait à donner la moitié de son corps, à confier à l'arbre son travail et son double, *dya*. Dès que le sang cessait de gicler, c'est-à-dire dès qu'il paraissait avoir perdu sa force, les poignets étaient ligaturés avec des fibres de *da*, et les plaies guérissaient sans laisser de cicatrices.

La tache de chaque offrande était signalée au vieillard qui apprenait à distinguer les gens suivant la couleur de leur sang. Chacun ensuite léchait la place où il avait saigné, mains au dos, pour reprendre le sang vivifié par l'arbre, laissant dans le tronc l'élément fort et dangereux qu'il contenait auparavant.

Pendant cette cérémonie, les vieillards qui devaient rajeunir se réunissaient autour de l'arbre. Chacun d'eux montait à son tour au sommet et s'ouvrait les veines du poignet gauche, donnant ainsi ses dernières forces. Puis il redescendait et les jeunes gens présents lui arrachaient les poils un à un en commençant par ceux du pubis, et en continuant par ceux des aisselles, de la barbe et des cheveux. Ils terminaient en enlevant les poils du corps. L'homme ne devait ni gémir ni crier mais chanter pour se donner du courage, car la souffrance stoïquement supportée était nécessaire au rajeunissement. L'homme ensuite était frappé sur tout le corps par les jeunes gens, en commençant par la nuque; il s'évanouissait et redevenait un enfant de sept ans. Les adolescents soufflaient dans ses veines pour actionner ses poumons et lui insufflaient de l'eau pour remplacer le sang qu'il avait perdu.

Le fils aîné du vieillard rajeuni devenait chef de famille mais ne pouvait hériter des femmes, lesquelles selon le pacte appartenaient à l'arbre. Le *balanza* exigea en outre que la quatrième fille née dans chaque famille lui soit entièrement consacrée. Toute vierge devait être par lui déflorée la veille de son mariage et l'acte était exécuté rituellement par la main de l'une des femmes propres de l'arbre de façon que le sang coule sur le tronc.

Le cycle des naissances qui suivaient ces différents accouplements était ainsi réglé : quand le mari d'une femme atteignait cinquante-deux ans, celle-ci continuait d'avoir des rapports sexuels avec l'arbre. Elle mettait au monde toutes sortes d'animaux et plantes. Après son rajeunissement à elle qui se produisait sans rite ni souffrance lorsqu'elle atteignait cinquante-neuf ans elle redevenait vierge (1). Elle était déflorée par l'arbre et donnait naissance à un animal ou un végétal, après quoi, unie à son mari, elle engendrait des hommes. Lorsque son mari était vieux, elle retournait à l'arbre et le cycle reprenait.

L'arbre exigeait aussi des femmes le sang menstruel et tous les accouchements avaient lieu auprès de lui. Sur son injonction, les hommes, quand ils surent travailler la pierre et faire leurs premières haches, taillèrent des phallus en bois qu'ils insérèrent dans son tronc. La forme donnée à ces objets était appropriée aux matrices des femmes et à leur âge; elles redoutaient ces accouplements douloureux mais elles devaient les subir sans larmes car l'arbre y puisait non seulement des forces comme auparavant mais encore la jouissance qu'il ne connaissait pas jusqu'alors. Ces forces s'accrurent encore et cette jouissance atteignit son comble lorsque le *balanza* reçut le sang de la première vierge déflorée par l'un de ces phallus.

Lorsque les sacrifices sanglants furent organisés l'arbre donna d'autres enseignements aux hommes. Il leur apprit notamment à faire le feu en frottant deux pierres ; pour les remercier ils s'incisèrent les veines de la main droite et lui donnèrent leur sang.

Le pouvoir du *balanza* était alors à son apogée. Mais l'abus qu'il fit de ses créatures devait entraîner sa perte. En effet, en ce temps, les hommes comme les femmes étaient non seulement épuisés de donner leur sang, mais, devenant constamment plus nombreux, ils mouraient de faim. Une femme s'évanouit un soir qu'elle passait dans un champ de tomates sauvages. Lorsqu'elle revint à elle, Faro, qui siégeait dans les eaux terrestres, lui suggéra l'idée de manger des fruits. Ceux-ci se transformèrent en sang à l'intérieur de son corps et elle se releva ayant repris ses forces. Elle alla se baigner dans le Niger où régnait aussi la famine à tel point que le sable y était la seule nourriture, et fut prise par Faro qui lui trancha nez et nombril et lui ouvrit le ventre. Il mangea la pulpe rouge qui s'y trouvait. Il compta les graines des fruits et en trouva un multiple de sept. Chaque tomate portait en elle à la fois le sang et le principe de la gémelléité (3 + 4) soit les éléments fondamentaux qui composent l'être humain. Faro déposa dans ces fruits le principe de vie : les hommes et les femmes, instruits de cette transformation, en mangèrent pour se régénérer et continuer à alimenter le *balanza* qui, en échange, les rajeunissait.

---

(1) Il semble que le rajeunissement des femmes leur ait été octroyé en échange de la semence et du sang menstruel qu'elles donnaient sans cesse à l'arbre.

Mais Faro s'opposa à cet accroissement de puissance. Il trouva injuste et abusif que l'arbre ait à la fois la domination du monde et la jouissance. Il considéra aussi qu'il était en quelque mesure son tributaire puisque l'eau et la tomate, ses biens propres, étaient indispensables à la vie des hommes et à la régénération de leur sang. Il fit donc signifier à l'arbre les conditions qu'il entendait imposer pour continuer à dispenser l'eau. Il exigea que cesse la prolifération des êtres par les femmes unies au bois et se réserva pour lui-même la procréation par l'intermédiaire des tomates.

Le *balanza* savait qu'il allait être vaincu; il prévoyait que les hommes allaient le trahir, que le culte qu'ils lui rendaient serait adressé à Faro puisque l'eau permettait seule leur subsistance et la multiplication des plantes. Il savait aussi que cette trahison serait génératrice de mort, mais que Faro reprendrait à son actif la création.

Il se déracina néanmoins et se rendit à la rencontre de Faro. « La lutte fut âpre comme leurs paroles, dure comme leur haine », mais Faro eut la victoire.

LA MORT.

Les femmes du vaincu qui engendraient les animaux et les végétaux le quittèrent les premières au bout de sept jours et il les appela en vain. Elles allèrent vivre près du fleuve : sans intervention d'aucune sorte, elles enfantèrent en buvant de l'eau dans laquelle Faro avait secrètement mêlé du suc de tomate. Elles le remerciaient par une offrande de trois ou quatre fruits suivant le sexe de l'enfant.

Après les femmes, les hommes abandonnèrent le culte. Au lieu de prendre d'autres bois, comme ils avaient coutume de faire jusque-là, ils commencèrent à brûler les brindilles qui tombaient sous le *balanza*, pour entretenir leur feu, ce feu qu'ils tenaient de lui.

L'arbre les maudit. Ils connurent alors les maladies et les mauvais sentiments : rancune, haine, jalousie. Les plaies qu'ils se faisaient pour donner leur sang et se rajeunir ne se refermèrent plus et s'envenimèrent.

Certains d'entre eux tentèrent de remédier à ce nouvel état des choses. Les huit hommes les plus âgés se rendirent auprès du *balanza* et malgré la chaleur qu'il dégageait pour les repousser ils s'incisèrent la langue et lui offrirent leur sang. L'arbre, étonné, émit d'abord une sorte de souffle, car il appréciait le sacrifice. Enfin il parla et leur annonça la venue de la mort. Mais à cause de leur soumission, et du sacrifice qu'ils avaient consenti il les transforma en oiseaux *latugu kononi* (litt. : petits oiseaux de feu). Pour cela il exigea qu'ils se frottassent le dos contre le tronc de l'arbre jusqu'à ce qu'ils aient perdu tout leur sang. Les hommes crièrent de douleur pendant l'opération, mais au moment de leur agonie, leur âme se mua en oiseau. Leur chair et leur peau pénétrèrent l'arbre; leurs os se mêlèrent à l'écorce blanche et la moelle devint le fruit rouge qui, dès ce jour, mûrit. C'est depuis ce temps qu'on utilise rarement pour des usages profanes cette « chair humaine » qu'est le bois de *balanza*. Ces huit premiers ancêtres transformés en oiseaux furent, dans la suite, révérés par les hommes (1).

L'arbre ayant fleuri et donné des fruits, les sacrifices dont il était encore l'objet augmentaient sa floraison : feuilles et fruits contenaient le sang des hommes. Ceux-ci commencèrent à se nourrir de ces fruits car ils étaient appétissants et sucrés. Ils coupèrent aussi des branchages pour les donner à leurs animaux. L'arbre restait silencieux.

Mais bientôt les hommes abusèrent de lui. L'un d'eux monta sur son faîte et coupa tous ses bourgeons qu'il emporta. Ceux qui vinrent ensuite furent effrayés de trouver l'arbre mutilé. Épouvanté de son acte le fautif s'enfuit jusqu'an Mandé, mais là, terrassé par la force vengeresse *(nyama)* qui le poursuivait, il tomba mort.

Les gens du Mandé, ne sachant pas qu'il avait rompu un interdit et ignorant la mort, le mirent à l'abri, pensant qu'il dormait. Ils tentèrent de le nourrir et frottèrent le cadavre avec de l'oseille et de l'huile. Ces soins firent que le corps se maintint un certain temps, mais, au bout de dix jours, il se décomposa. La force *(nyama)* qu'il dégagea attaqua d'autres hommes qui moururent à leur tour.

---

(1) En particulier par tous les forgerons. Depuis leur transformation les oiseaux *latugu kononi* sont censés vivre près du *balanza* et respecter un certain nombre d'interdits : ils ne doivent pas se séparer mais vivre en communauté en dehors des villages. Ils sont responsables du feu : incapables de l'allumer, ils ont cependant le pouvoir, par leur présence, de l'entretenir ou de l'éteindre. Un brin de paille humide s'enflamme quand on l'allume en prononçant leur nom. Ils protègent aussi les potières contre les brûlures. Ils sont considérés comme impurs à cause de la terre dans laquelle ils se creusent des trous et du feu qui est lui-même impur.

Les parents du défunt vinrent chercher le corps. Ils mangèrent la chair, car depuis le décès, les pierres de tonnerre qui tombaient du ciel ne contenaient plus de noix de karité et ils commençaient à dépérir. Ils emportèrent les os du mort.

Lorsqu'ils furent de retour près de l'arbre, celui-ci leur ordonna de piler les ossements et d'en enduire ses branches mutilées. Il leur annonça qu'il serait désormais inutile de lui donner leur sang; ils ne rajeuniraient plus et connaîtraient tous la mort.

A l'audition de ces paroles, trois hommes tombèrent; quatre femmes qui survinrent subirent le même sort. Les sept cadavres se décomposèrent autour de l'arbre qui avait pris leur vie. Ce fut là le dernier sacrifice.

L'arbre annonça qu'il abandonnait les hommes mais qu'il donnerait toujours des fruits rouges représentant leur sang versé sur lui autrefois. Et depuis il suit un cycle annuel inverse de celui des autres végétaux : pendant l'hivernage il perd ses forces avec ses fruits et ses feuilles. Mais il fleurit en saison sèche, lorsque les grains sont rentrés, comme un être bien nourri et qui ne redoute rien, la récolte étant faite. Portant en lui ses propres sacrifices il n'exige rien des humains.

Après cet abandon, les hommes désespérés se rendirent près d'un torrent pour implorer l'invisible. Mais durant deux ans rien ne leur répondit. Ils commencèrent à dépérir et leur patriarche se rendit auprès de l'arbre pour obtenir son pardon. Il le pria vainement et dut revenir auprès de l'eau. Il entendit alors la voix de Faro et à cause de la force de cette première parole il s'évanouit. Un peu d'eau le ranima, mais il fut effrayé par une ombre noire. Tendant les bras, il pria en disant : « L'arbre a mis l'obscurité entre toi et nous. » Alors l'ombre devint blanche et la fraîcheur de Faro entra dans son corps. Il alla chercher les siens et Faro les instruisit, disant : « Je donnerai la pluie nécessaire aux cultures, les sources, les mares, les torrents, un grand fleuve, le Niger. Mais sachez que toute eau est sainte et doit être respectée. Je ne peux vous soustraire à la mort mais j'y remédierai. » Et il leur enseigna la parole et leur langue.

Au premier des huit vieillards des plus âgés, patriarche qui porta dès lors le nom de *kumabana* (1) il dit : « Tu vas mourir. » Huit jours après, ce dernier, sentant approcher sa fin, se rendit au bord des torrents et dit à ceux qui l'entouraient et qui l'écoutaient respectueusement :

---

(1) « Conclusion des paroles ». Ce mot signifie également « il n'y a plus de paroles » dans le sens de « en dehors de ces paroles, il n'y en a point d'autres ». Kumabana avait la connaissance complète.

« Nous n'avions pas la parole; par la puissance de Faro, nous l'avons reçue. Voilà que maintenant il nous faut mourir. Je ne m'attendais pas à cette souffrance, à cette tristesse : tous vous connaîtrez la même. »

Un vieillard le questionna, il ne répondit plus. Pensant le ranimer, les hommes allèrent jeter le corps au fleuve où il coula. Le deuxième vieillard voulant le retrouver, se jeta à sa suite. Mais son corps, nombril et nez sectionnés, remonta à la surface de l'eau qui se couvrit de sang. Le corps fut alors transporté et mis dans la fente du tronc d'un baobab. Huit jours après, le troisième vieillard se noya en allant se baigner : l'eau devint rouge à l'endroit de sa chute.

Le quatrième vieillard, voyant cela, en conclut que Faro exigeait des sacrifices. Il fut le premier prêtre du culte qu'il instaura, et que les hommes rendirent au génie depuis ce temps.

Dès cette époque, chacune des espèces animales et végétales se reproduisit elle-même, et les naissances désordonnées des premiers âges cessèrent.

Les femmes fécondées par Faro donnèrent naissance seulement à des êtres humains. De plus, elles mirent au monde non des êtres uniques comme au temps du *balanza* mais des jumeaux à l'image de ceux qu'avait engendrés le génie pour peupler les eaux de la terre.

Les naissances gémellaires furent la règle pendant une longue période jusqu'au jour où les hommes trahirent Faro. Le génie de l'air, Teliko, décida de dominer à son tour la création.

« Le souffle des êtres vivants est à moi, disait-il, tous les bonheurs des hommes viennent de moi à travers le vent. »

« Sans moi nul ne peut vivre, répondit Faro, car pour respirer il faut boire; l'eau est indispensable à la vie. »

Privés d'air et d'eau, les hommes dépérissaient. Ils tentèrent une médiation. Mais Faro la refusa, « car le corps de Téliko, touchant à la terre impure, est chaud et usé par le vent ». Téliko décida alors, dans son orgueil, de se rendre à son tour aux confins et les hommes, croyant qu'il allait être vainqueur, abandonnèrent le Faro pour le suivre. Celui-ci, sûr de sa puissance, attendit que son adversaire eût tenté la traversée des mers. A ce moment il le précipita sur un rocher, le privant de sa virilité et lui brisa le bras droit qu'il avait souple comme tous les êtres à cette époque.

Téliko ayant reconnu sa défaite, Faro jugea les hommes coupables. Il les punit de leur trahison, mais ne les abandonna pas comme avait fait le *balanza*. Il leur octroya tout d'abord les articulations propres au travail manuel auquel ils furent désormais contraints pour assurer leur subsistance. Il supprima la norme de la double naissance et les femmes enfantèrent des êtres uniques, les jumeaux n'étant réservés qu'à de rares privilégiés. Mais il les remplaça par le double *dya* qui, siégeant dans l'eau, fut chargé de veiller sur le vivant et en particulier de faciliter l'accouchement des femmes (1).

RÈGNE DE FARO.

Faro, ayant vaincu le *balanza* et soumis Téliko, reprit à son compte la création. Il réorganisa l'univers entier et établit l'ordre dans lequel, encore aujourd'hui, se déroule son fonctionnement. Répandant sa parole et sa lumière, il nomma et classa toutes choses : « Toutes les choses (de l'univers) sont sous la domination de Faro; huit cents transformations sont en son pouvoir (1). »

---

(1) Dans ses *Notes sur la théodicée Bambara*, Mme S. DE GANAY a donné une première version de la création dans laquelle Koni (alias Pemba), conçu comme créateur unique, aurait donné naissance à « deux jumelles dans la substance divine », respectivement Mousso Koroni et Faro, ce dernier envisagé sous son aspect femelle. Cette version est dans la ligne de la pensée bambara qui conçoit la création comme fondée sur la gémelléité.

La version donnée dans cet ouvrage présente l'intérêt d'être absolument comparable à celle qui a été recueillie chez les Dogon et compte tenu de l'identité des représentations dans ces deux populations. En effet, chez les Dogon, la pensée créatrice (dieu Amma) ayant formé l' « œuf du monde », le scinda en deux placenta *(me)*, contenant chacun deux jumeaux Nommo porteurs de sa parole et devant respectivement créer le ciel et la terre. Il en est de même pour Faro et Pemba (cf. p. 13). Mais le Nommo de la terre ayant perdu son double femelle fut transformé en animal cherchant désespérément ce double; il en résulta l'introduction du désordre que le Nommo du ciel fut chargé de réparer. A cet effet, il réorganisa l'univers en reprenant à l'autre les paroles qu'Amma lui avait confiées. Chez les Bambara on observe le même rôle de Pemba, Mousso Koroni et Faro.

Pour entrer dans les détails, Pemba et le *balanza* ont leur réplique dans le *yurugu* (Vulpes pallida) et le *senge* (Acacia albida). Mouso Koroni dans l'être femelle Yasigui, jumelle du *yurugu*, représentée actuellement par une dignitaire de la Société des Masques, la *yasigine*. Yasigui, comme Mousso Koroni, a révélé les paroles du créateur, c'est-à-dire la langue du Sigui; elle a circoncis et excisé les hommes et les femmes, enseigné certaines techniques agricoles. Dans les deux populations, la même étoile, Sirius (Dog. *sigi tolo;* Bam. *sigi dolo*), les représente. Faro, androgyne, est comparable en tous points au Nommo, moniteur universel, détenteur du verbe et de la vie. Le *yurugu* et le Nommo ont suivi des périples semblables à ceux de Pemba et Faro. Notamment lors de leur descente sur la terre, le *yurugu*, puis le Nommo ont utilisé une « arche », *koro*, dont les répliques sont le bois *pembele* de Pemba et l'arche *kuru* de Faro décrite par certains initiés (cf. M. GRIAULE. *L'Arche du monde chez les populations nigériennes*).

Dans les deux populations l'homme « grain du monde », est l'image du cosmos. Le rôle exact de la graine d'*Acacia albida* n'apparaît pas encore clairement dans les deux populations, mais, dans les deux cas, elle est considérée comme une première création avortée.

Pour mener à bien cette œuvre, il entreprit un voyage de reconnaissance aux confins du monde pour la nomination des points cardinaux.

Il se rendit d'abord à l'est; les êtres qui s'y trouvaient reconnurent sa puissance et sa sagesse. Comparant sa blancheur lumineuse à celle que confère aux cheveux l'âge, à cette région il donna le nom de *koro*, vieux, mot témoignant également de sa qualité d'étape initiale. Il fit de l'est le siège de la mort.

Il alla ensuite à l'ouest. Comme il y faisait sombre, il nomma ceux qui s'y trouvaient *klebi maw* « gens du soleil tombé »; il fit de l'ouest, *klebi*, le siège des coutumes, des belles et bonnes choses.

Il prit ensuite la direction du nord, mettant huit époques à franchir les espaces et les profondeurs. Il nomma le nord *baba* « grand fleuve », car la distance était grande, l'eau profonde et l'endroit difficile. C'est au nord, atteint à la neuvième époque, qu'il établit sa domination et celle de toute royauté.

Il se rendit ensuite au sud où des êtres néfastes qui avaient écouté et suivi les paroles de Mousso Koroni parlaient un langage qu'ils avaient dérobé (2). Ils tentèrent de lui résister, mais il les détruisit en grand nombre. Malgré la soumission des survivants il fit de leur domaine le siège de l'impureté et le nomma

---

(1) *fēw be bɛ faro ka se kono, yelemani ba kelɛ be a la a fɛ.*

Le nombre 800 qui est « le bout du compte » exprime ici l'infini. Les unités principales sont 1, 80, 800, etc. dans le compte dit « de l'est » actuellement utilisé par presque tous les Soudanais. 10 reste l'unité secondaire pour la numération de 1 à 79 et se combine avec 80 pour les unités des autres ordres.

Il existe également un compte dit « du Mandé » dont les unités principales sont 1, 60, 600, etc., où 10 reste unité secondaire pour la numération de 1 à 59 et se combine avec 60 pour les unités d'ordre supérieur.

D'autre part il convient de remarquer que le système de chiffraison bambara est vigésimal et qu'il reflète la notion de la personne confondue matériellement avec les 20 doigts de ses mains et de ses pieds, et nantie spirituellement de deux âmes de sexe opposé qui sont chacune de chiffre 10. Celui-ci représente, dans cette spéculation, l'unité par excellence (cf. p. 213, n. 2). Les deux comptes, 60 et 80, dans la métaphysique des Soudanais, sont complémentaires en ce sens qu'ils expriment que l'un, 60, c'est-à-dire trois fois la personne, est mâle, et que l'autre, 80, c'est-à-dire quatre fois la personne, est femelle (sur 3 et 4, cf. p. 5). Dans les populations où seul est couramment utilisé le compte de base 80, le compte de base 60 est encore actuellement employé dans certains rites (notamment chez les Dogon).

(2) Notion du vol du langage analogue chez les Dogon. Cf. p. 26, n. 1.

bani « petit fleuve » pour marquer leur faiblesse et leur échec honteux.

Le trajet parcouru fut mesuré en palmes, *sibiri*, l'unité itinéraire étant de vingt-deux palmes (1). Il en fut de même pour la distance séparant les points cardinaux, la hauteur du ciel, la profondeur de la terre.

Dans le même temps il détermina les saisons et fit à l'obscurité primitive succéder l'alternance régulière du jour et de la nuit. Ayant délimité l'espace il instaura le temps.

Ensuite Faro se plaça au centre de l'univers : toujours animé d'un mouvement vibratoire, il décrivit une spirale tournant de droite à gauche jusqu'aux confins, « là où n'y a plus qu'un tremblement de surface ». Puis il revint sur sa route de gauche à droite pour se « placer au point central (2) » d'où il fit le partage des êtres et des choses (3) ».

Le premier ciel, *kaba noro*, est un ciel moins pur que les autres : il y reste, sous forme de nuages, les traces impures du passage de Mousso Koroni. C'est de lui que sort le vent qu'y avait placé Pemba tandis qu'il la poursuivait.

Mais le deuxième ciel, *kaba dye* « ciel blanc » est frais et déjà dans la puissance du Faro. Il est le siège des âmes *(ni)* des hommes et des animaux. Les génies Kwore y séjournent et s'y battent pour permettre le passage de la pluie qui, du haut du septième ciel, descend sur la terre.

Le troisième, *kaba fi*, « ciel noir », est le lieu de repos de tous les génies et le quatrième, *kaba mana*, « mue du ciel», est le miroir des trois autres. Le Faro y tient sa « comptabilité » journalière du monde.

Dans le cinquième ciel, *koblekaba*, « ciel rouge », le Faro rend les sentences contre ceux qui rompent les interdits. Ciel des luttes, des combats, des victoires, auquel sacrifiait le roi avant de partir en guerre, il est aussi celui du sang, du feu, des vents chauds et nuisibles.

Dans le sixième ciel, *suna kaba*, sont conservés les secrets de la situation du monde (4); comme son nom l'indique, il est aussi le ciel du sommeil. Toutes les âmes des génies et des êtres vivants y dorment, chacun ayant une place déterminée. Le sommeil est une purification de l'âme et les rêves sont des directives qui lui sont données par Faro. Les évanouissements, les insomnies, les maladies sont le résultat de perturbations dans le déplacement des âmes pendant le sommeil.

---

(1) *sibiri nye*, litt. « œil de la palme ». La palme bambara est une longueur obtenue avec la main ouverte, de l'extrémité du pouce à l'extrémité du médius.

(2) On dit de cet acte, *faro tyema yerẽ ;* ou *faro sigi yoro seleke nani tyela*. « Faro s'est assis au milieu des points cardinaux. »

(3) *a ye klali ke.*

(4) *dyẽ dyoka gundo be sunakaba la.*

Le septième ciel, *wolo fla kaba*, est le lieu où règne Faro : il est le siège de la domination, notamment de toute royauté. Domaine de l'eau purificatrice, c'est de ce ciel que Faro envoie sur le monde la pluie bénéfique qui apporte aux céréales leur âme.

Le soleil, dont Faro « tient la corde », pénètre le matin dans le premier des cieux et les traverse tous successivement jusqu'au soir lorsqu'il s'abîme dans le septième. Il est le dieu Pemba qui rougit, fatigué de sa course derrière Mousso Koroni. Les étoiles sont ses pores dilatés par l'effort.

L'espace vide, dit *lyema*, qui sépare le ciel de la terre, reste sous la domination de Téliko. C'est le domaine de l'air, des vents, des insectes.

La terre est divisée en sept parties qui correspondent aux sept cieux et qui sont : 1° *dugukolo*, terre, 2° *dugukolo fi*, terre noire; 3° *dugukolo dye*, terre blanche; 4° *dugukolo mana*, mue de la terre; 5° *dugukolo bele*, « pierre de la terre »; 6° *dugukolo noro*, terre molle; 7° *dugukolo wolofla*, septième terre.

Sur terre le Faro créa d'abord les trous d'eau profonde, les gouffres de la mer et des fleuves qu'il hante. Il creusa lui-même le premier puits, les mares et les lits des torrents. Il établit le régime des pluies qui tombent de la septième partie du ciel jusqu'à la septième partie des terres et constituent la purification et la réparation des désordres cosmiques.

Il classa ensuite les êtres vivants. A l'est, les animaux sauvages et domestiques dont les têtes de listes furent respectivement le lion et le cheval; à l'ouest les oiseaux; au nord les poissons ayant à leur tête le *miri* (1), les sauriens et les batraciens; au sud tous les végétaux dont il indiqua le rôle médicinal et purificatoire et qui furent divisés en trois catégories (2).

Les hommes furent également nommés, classés, les races réparties suivant la qualité du sang dans lequel Faro inscrivit le destin. Il détermina les castes, en commençant par les esclaves.

Puis il décida des nourritures propres à chacun et, pour protéger les espèces des destructions, il indiqua les interdits alimentaires, animaux et végétaux que chaque catégorie d'êtres devait respecter.

---

(1) *Micralestes Acutidens.*

(2) Ce sont respectivement les herbes, *bin*, ayant à leur tête le *narakala (Digitaria digitata)*; les plantes, *fura*, dont la première est le *sindya (Cassia siberiana)* et les arbres, *dyiri*, divisés eux-mêmes en trois catégories ayant à leur tête respectivement le karité, le baobab et le *nere (Parkia biglobosa).*

Enfin il s'occupa des travaux agricoles. En particulier il donna aux hommes, par l'intermédiaire des forgerons, les huit graines de céréales, créées en même temps que l'homme, mais restées secrètement dans le ciel (1). Ces huit graines devinrent la base des subsistances, et sont le fondement de l'être humain qui porte leur symbole dans les clavicules (2).

Dans l'eau tout ce qui était sur terre fut représenté : les êtres animés par leur double, ou témoin, *dya*, les végétaux et les minéraux par une exacte réplique, qui permirent à Faro de contrôler constamment l'existence et les actes des êtres placés sous sa domination.

En tous lieux il plaça des génies, ses représentants, chargés de veiller à l'ordre universel.

LES EAUX FUTURES.

L'ordre de l'univers règne dans l'espace et dans le temps; l'ordre actuel n'en est qu'une phase. Lorsque le « premier ruissellement » recouvrit le sol, Faro ne permit qu'à l'eau primordiale de s'épandre; douze eaux restèrent cachées qui surgiront sur son ordre pour submerger la terre. Les paroles qu'elles contiennent seront révélées et le « monde à venir », pensé par *yo*, réalisé.

Dans l'attente de ces « eaux futures », les hommes doivent se munir d'objets capables de les sauver : les Bozo et certains Bambara ont une pirogue, les bergers leurs gourdes, les tisserands leurs navettes, les femmes leurs tabourets de bois (3). L'arrivée

(1) Un mythe parallèle à celui qui a été recueilli chez les Dogon (cf. M. GRIAULE. *Dieu d'eau*) fait du forgeron bambara un héros civilisateur, avatar de Faro, descendu du ciel sur une arche, *kuru*, et tenant en main une masse contenant les huit graines de céréales.

Cf. M. GRIAULE. *L'Arche du monde chez les populations nigériennes*. S. DE GANAY. *Notes sur la théodicée bambara*, p. 194 à 196.

(2) Ces huit graines sont les suivantes :

sañõ, petit mil *(Pennicillaria spicata)*, *keninge*, gros mil *(Sorghum gambicum)*; *kende*, mil rouge *(Sorghum magaritiferum)*, *fini*, fonio *(Digitaria exilis)*; *šyõ*, haricot *(Vigna maniculata)*; *tikaninkuru*, pois; *malo*, riz. La nomenclature des graines varie, mais les mêmes représentations ont cours chez les Dogon. Chez les Bozo, les clavicules sont le réceptacle de huit poissons, lesquels sont représentés par des signes sur l'avant des pirogues. Cf. G. DIETERLEN. *Les Correspondances cosmo-biologiques chez les Soudanais*.

(3) Il convient de remarquer que pirogue, *kuru*, navette, *kuruni*, tabouret, *kuruni*, sont de même racine. Le mot *kuru* désigne le globule initial dans lequel descendit Pemba qui devint par la suite le bois *pembele* en forme

des eaux est figurée par un dessin sur ces objets comme sur nombre d'ustensiles d'usage courant (fig. 3).

Ce dessin sert d'armature à un jeu, le *sumangolo*, auquel s'adonnent les Bambara de tous âges et des deux sexes pour « contribuer à la marche du monde ».

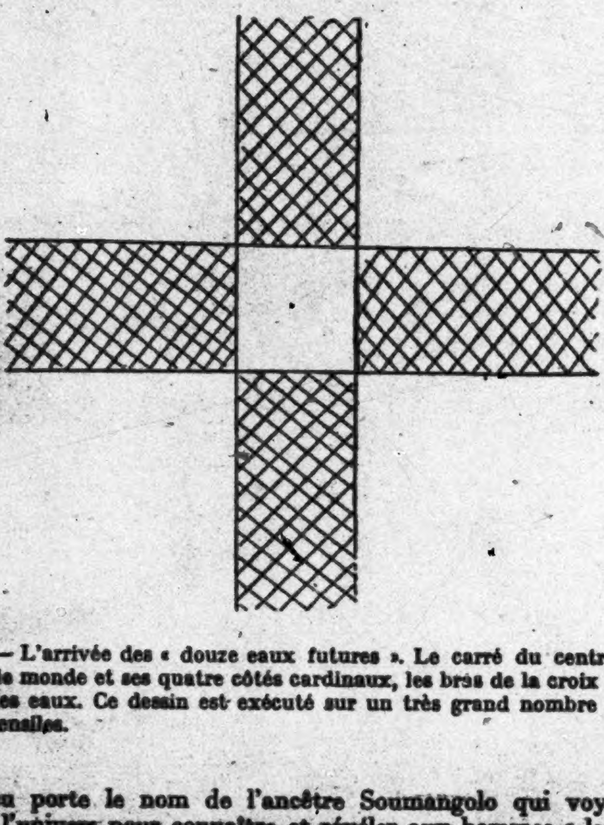

Fig. 3. — L'arrivée des « douze eaux futures ». Le carré du centre représente le monde et ses quatre côtés cardinaux, les bras de la croix l'expansion des eaux. Ce dessin est exécuté sur un très grand nombre d'objets et ustensiles.

Ce jeu porte le nom de l'ancêtre Soumangolo qui voyagea à travers l'univers pour connaître et révéler aux hommes « les situations et dispositions des eaux » *(dyi walew* et *dyi kono few)*. Pendant son périple, « il ne put atteindre aux sources centrales du ciel », c'est pourquoi celles-ci sont restées ignorées des hommes.

---

d'auge; il désigne également la caisse ou arche utilisée par le forgeron mythique porteur des graines nourricières. Cf. p. 30, n. 1. Le mot *kuru* doit être rapproché de *kore* qui, en langue dogon, a le sens général de caisse, boîte, récipient de bois, auge, pirogue et désigne également dans cette population l'appareil sur lequel descendit le forgeron. Cf. M. Griaule. *L'Arche du monde chez les populations nigériennes*, p. 117, n. 3.

Mais il visita « les eaux des angles cardinaux » desquelles émane une vapeur qui détermine les saisons et les températures. Puis il étudia « celles des côtés cardinaux » et demanda à Faro leur ruissellement sur la terre. Il les franchit pour les connaître et en instruire les hommes; on dit : « Soumangolo de la création a montré les mares, fleuves, vieilles mares aux gens et aux choses (1). »

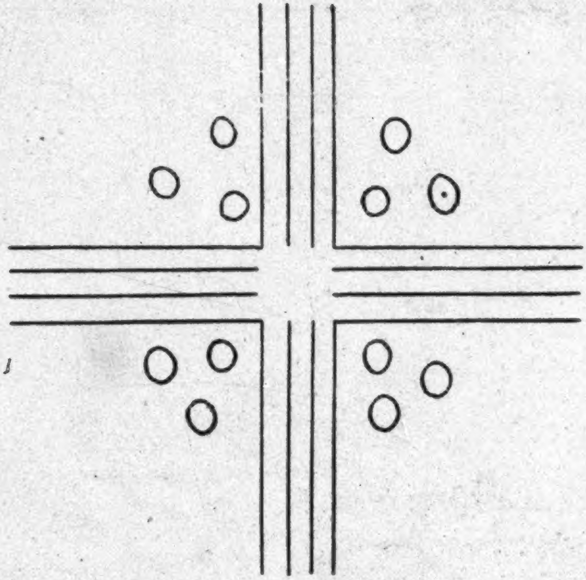

Fig. 4. — Jeu du *sumangolo* symbolisant « l'arrivée des douze eaux futures ».

Le jeu consiste pour le joueur à franchir les trois eaux issues de chacun des quatre côtés cardinaux (2). Le tracé représente à la fois des eaux qui ruisselèrent autrefois sur la terre comme celles qui s'épandront sur le monde quand Faro en donnera l'ordre (fig. 4).

---

(1) *dali sumangolo ye ko, ba, ko koro kono ko dyira ma ni fẽw la.*

(2) Cf. fig. 4. La figure est dessinée sur le sol : le carré central représente l'univers et les branches de la croix les eaux qui émanèrent des côtés cardinaux et qui sont divisées dans chaque branche en trois registres. Trois ou quatre cailloux, suivant le sexe du joueur, sont placés dans les angles. Le joueur tourne le dos à la figure et chante : « Le petit homme est sorti de la danse; le petit homme, le mauvais homme est sorti de la danse; un autre homme que celui-ci n'a point dansé; que la difficulté de l'eau cesse *(lyeni bwora do la; lyeni, lyendyugu bwora do la; lye were le do ke nin kelenko; dyi geleya ka ta)*. Puis il nomme les trois registres des eaux de la branche de la croix tandis qu'un partenaire les désigne successivement du doigt, en disant : « franchir la mare » *(ko like sumangolo)*, « franchir le fleuve » *(ba like sumangolo)*, « la descente de Soumangolo est finie » *(sumangolo jigi bana)*. Le partenaire retire le caillou immédiatement adjacent à la branche visée et demande : « Est-ce ceci? » *(nin wa?)*. Le joueur doit répondre : « Oui! Soumangolo. » Le jeu est repris de la même façon au

En attendant ce jour, Faro poursuit son œuvre. Selon la spirale empruntée lors de la réorganisation du monde, il se déplace tous les quatre siècles pour inspecter les confins, puis il revient au point central d'où il surveille et régit l'univers.

---

point de départ; lorsque l'assistant pose le doigt sur l'emplacement laissé vide, il demande : « Est-ce ceci? ». Le joueur doit répondre : « Non! Soumangolo. » Le second caillou est retiré et, à la même question, le joueur doit alors répondre : « Oui! Soumangolo. » Même chant, même mimique pour aboutir au troisième caillou, qui est enlevé à son tour. Le jeu reprend de la même façon, au même point de départ et on aborde la deuxième branche de la croix. Ceci jusqu'à épuisement des quatre groupes de cailloux placés dans les angles. Le joueur qui a répondu sans se tromper a gagné : il est censé franchir victorieusement « les douze eaux futures ».

Ce jeu a pour effet immédiat de mettre le gagnant dans une atmosphère bénéfique : il augmente ses gains, ses entreprises réussissent. Mais là ne se borne pas son action : il constitue une opération cosmogonique au premier chef. Autrefois on jouait au *sumangolo* pour faire venir la pluie en temps de sécheresse; tout joueur qui le pratique actuellement contribue au fonctionnement actuel de l'univers comme à la réalisation des temps futurs qu'attendent les hommes. Dans certains villages on fête chaque année l'ancêtre Soumangolo en prenant en commun un copieux repas arrosé de bière de mil et en jouant tout le jour au jeu qui porte son nom.

Le *sumangolo* fait partie d'une série de figures, parfois géométriques, qui servent de base à des jeux cosmogoniques de caractère semi-rituel comme celui qui vient d'être décrit ici.

CHAPITRE II

LES REPRÉSENTATIONS

La dualité de *glā*, réalisée dans le microcosme qu'est l'homme par ses deux âmes jumelles *(ni* et *dya)*, se projette dans l'univers sous la forme du couple ciel-terre constitué aux origines par le scindement de l'esprit en deux. Ce couple est représenté par deux puissances surnaturelles, Faro et Pemba, auxquelles s'adressent les principaux cultes des Bambara.

Pemba est à la fois esprit, force et matière. Il est actuellement matérialisé par un bois gravé, symbole du madrier d'où est né autrefois ce qui vit sur la terre, et dont théoriquement chaque famille possède un exemplaire.

Faro, maître du verbe, règne à la fois dans le ciel et dans les eaux qui en sont le reflet terrestre. Au titre de maître du verbe et de réorganisateur de l'univers, de détenteur actuel de la vie, de gardien des âmes, Faro, lumière et vibration, siège dans le septième ciel. Au titre de maître de l'eau, les Bambara le décrivent comme un être vivant, pourvu d'un corps et sujet à des métamorphoses. Il n'en reste pas moins d'ailleurs, pour les initiés, avant tout un esprit supérieur, dégagé des contingences et libre dans l'exercice du pouvoir souverain qui lui a été conféré.

Il est nécessaire, pour bien pénétrer l'esprit de la religion Bambara d'examiner toutes les représentations concernant ces puissances (1).

---

(1) Quelques auteurs ont sommairement décrit Faro, notamment L. TAUXIER dans la *Religion bambara* (p. 142 à 145) où il cite à ce sujet Mgr Bazin et l'abbé Henry. Ces auteurs n'ont pas décelé le rôle fondamental de cette puissance ni son aire d'extension.

Il convient de rapprocher de ces représentations celles qui ont été observées au Soudan par les missions Griaule; le Nommo des Dogon, le Domfé des Kouroumba, Faro ou Yégou des Boso et qui ont été publiées dans les ouvrages ou articles suivants :

M. GRIAULE. *Masques Dogon*, *Le Domfé des Kouroumba*, Journal de la

PEMBA.

Issu de la vibration primordiale, Pemba fut à l'origine un « globule », *kuru*, qui tourbillonna pour créer la terre. Alors qu'il était tourbillon, une molécule s'en détacha et devint une graine qui, sur terre, germa et donna l'*Acacia albida*. Celui-ci grandit, se dessécha, tomba et il ne resta bientôt plus de lui qu'un billot nommé *pembele*. Ayant créé de sa propre substance un être femelle, Mousso Koroni, il engendra avec elle tout ce qui vit sur terre, à l'exception des êtres humains nés de Faro. Mais à la suite des désordres créés par Mousso Koroni, Pemba dut abandonner le pouvoir et son verbe devint la propriété de Faro chargé de la réorganisation de l'univers.

Pemba fut connu des hommes qui se soumirent à lui sur terre avant de prendre conscience de Faro resté secrètement dans les cieux (1). Ils le révérèrent comme leur dieu et le nommèrent Ngala Pemba, dieu Pemba, ou Koni, pour rappeler son origine et la stupeur provoquée par la création (2).

Le pembele.

Actuellement, Pemba est représenté chez les chefs religieux et les chefs de famille par un billot nommé *pembele*, image du madrier initial (3).

Cet objet est creusé en son centre d'une cavité dite *sele dê* rappelant celle qui est ménagée au fond de la tombe et où est placé le cadavre (4). Sur cette cavité sont gravés trois fois 22 traits obliques; au-dessous d'elle, deux groupes de sept traits séparés en 3 et 4 dans la partie gauche, et 4 et 3 dans la partie

DIETERLEN. *Les Ames des Dogon ; Notes sur le Génie des Eaux chez les Boso*, Journal de la Société des Africanistes, t. XII, 1942, p. 149 à 155. G. DIETERLEN et S. DE GANAY. *Le Génie des Eaux chez les Dogon*. M. GRIAULE. *Dieu d'eau*. Mme B. APPIA a également publié des observations intéressantes dans *Note sur le Génie des Eaux en Guinée*, Journal de la Société des Africanistes, t. XIV, 1944, p. 33 à 42.

(1) On dit : « Faro est chose du ciel d'en haut; si l'on dit Pemba c'est parce qu'on l'a vu sur terre » *(faro ye sana fè ye; a fo pemba ye a ka yeli ye dugu la)*.

(2) Les noms secrets de Pemba sont innombrables.

(3) Le symbolisme du *pembele* résumé ci-après a été étudié par S. DE GANAY dans *Aspect de mythologie et de symbolique bambara*.

(4) Cf. p. 193.

droite. Les 22 stries de gauche représentent Pemba créateur, les 22 stries de droite, la transmission de son verbe et de ses pouvoirs au Faro, les 22 du centre « sont le témoignage de la prescience qu'il avait de toutes choses (1) » et l'image des grands travaux qu'il fit à l'aube de la création.

Les deux groupes de 7 stries représentent Pemba, 3 et Mousso Koroni, 4, pour rappeler que Pemba, à l'origine androgyne, « s'est distingué de sa partie féminine afin que ses deux principes puissent s'unir à nouveau comme mâle et femelle pour produire les choses vivantes (2) ».

Le madrier est, de plus, gravé à chaque extrémité de 22 encoches qui sont, à gauche, Pemba et ses paroles, à droite, toutes les paroles confiées aux génies et qui sont encore ignorées des humains.

L'objet dans son ensemble est l'image de l'univers : sa face supérieure, qui supporte les stries, est le ciel; sa face inférieure, la terre; les quatre côtés, les quatre directions de l'espace. Il est aussi la première tombe creusée pour les ancêtres; le *sele dè* concentre « les énergies latentes et agissantes ». C'est là que « le *pembele* se révèle comme pensée en déploiement constant qui, à partir de sa propre substance, s'étire dans le temps pour se confier finalement à Faro sous forme de parole, verbe (3). »

Enfin, le *pembele* résume le mythe de création et d'organisation du monde par les séries de 22 traits dont il est orné, par la dualité exprimée dans la double gravure de 7 stries, par sa forme, qui rappelle celle du madrier primordial, générateur de la vie sur la terre, par le bois dont il est fait qui est celui du *balanza*, autrefois maître de la création.

Tous ces caractères justifient le nom de Ngala, Dieu, qui est donné au *pembele* car il possède en outre toute la puissance et toute la force *(nyama)* de la divinité qu'il représente (4).

Le *pembele* est un autel, garant de la prospérité, de la vie, du patrimoine spirituel et matériel du groupe auquel il appartient. Il en existe différents exemplaires : ceux des familles *stricto sensu*, sur lesquels est découpée la viande consommée par la maisonnée; ceux des sanctuaires qui doivent être obligatoirement marqués des stries symboliques. La planchette utilisée pour l'opération de la circoncision porte le même nom; elle rappelle la mutilation de Mousso Koroni sur le *pembele* et l'origine de l'ablation du prépuce et du clitoris chez les humains (1).

---

(1) Cf. S. de Ganay. *Aspect de mythologie et de symbolique bambara*, p. 192.

(2) Cf. S. de Ganay, *loc. cit.*, p. 195.

(3) Cf. S. de Ganay, *loc. cit.*, p. 191.

(4) Cette force est particulièrement active aux angles du madrier et prend alors le nom de *boy nyama*, « *nyama* venimeux ».

Le rôle de Pemba, comme promoteur de la force, *nyama*, qui anime tous les êtres et comme hypostase de la terre est illustré par l'usage rituel que font les Bambara du *pembele* qui le représente.

Après chaque décès, le chef de famille recueille la force, *nyama* qui émane du cadavre et la confie au *pembele* « qui le conserve jusqu'à ce que, dans la parenté, survienne une naissance ». Un rite parallèle octroie au nouveau-né la force de l'ascendant défunt (2).

Au moment des cérémonies se rapportant au grand *pembele* « tous les assistants apportent un petit morceau de viande qui, après avoir été mis sur le madrier, est mangé cru afin que le feu ne détruise pas le *nyama* bienfaisant émané de la divinité elle-même (3) ».

Enfin « dans les cas où il est nécessaire d'obtenir un maximum de *nyama* d'infimes parcelles de bois sont prélevées sur les coins du madrier, là où il concentre sa force... Or, si l'on use de lui abusivement, on diminue d'autant le *nyama* de la terre. On comprend ainsi qu'il soit nécessaire que la force du grand *pembele* soit conservée intacte puisqu'il représente le monde. Aucun rite le concernant n'est célébré par l'homme qui en a la responsabilité hors de la présence du conseil des vieillards. Ses quatre coins ne peuvent être raclés que dans des circonstances qui en valent la peine car, dit l'informateur, le dieu *pembele* ne peut tolérer qu'on les use pour des futilités. Au fur et à mesure que diminuent les coins et par conséquent le *nyama* contenu dans ces coins, il use la terre. Et si la terre perdait son *nyama*, tout serait vidé de sa substance : le mil pousserait mais ses épis ne contiendraient plus de grains... les femmes n'auraient plus d'enfants, n'ayant plus de *nyama*. Les gens ne pourraient plus lutter, privés de forces... La terre subsisterait, mais stérile (4) ».

Le balanza.

L'arbre *balanza*, avatar végétal de Pemba, vaincu par Faro, n'est plus révéré par les hommes. Mais l'attitude des Bambara à son égard et certains gestes à caractères rituels, dont il est parfois l'objet, rappellent le temps où, après avoir étendu sa domination sur la création, il introduisit la mort dans le genre humain.

---

(1) Cf. p. 18.
(2) Cf. p. 177.
(3) S. de Ganay, *loc. cit.*, p. 199.
(4) S. de Ganay, *loc. cit.*, p. 200.

Dans certaines agglomérations la croyance veut que celui qui se repose à son ombre meure, l'arbre ayant pris son *dya*. Ailleurs, malgré l'avis des hommes qui leur en ont expliqué l'inutilité, les femmes lui font encore des offrandes d'huile de karité : elles se couchent à son pied, simulent la maladie, l'agonie, puis la mort, en souvenir des événements douloureux qui les apportèrent aux hommes; enfin, elles font toucher au sol successivement chacune de leur quatre articulations principales en signe de soumission, avant d'enduire le tronc de l'huile qu'elles ont apportée. Ailleurs encore, pour rappeler qu'autrefois les accouchements avaient lieu près de l'arbre, les femmes enceintes lui sont présentées par leurs maris pour faciliter la parturition.

Les champs qui entourent les agglomérations de la région de Ségou sont couverts d'une grande quantité de *balanza*. La devise de Ségou, relatant l'histoire de la ville, énumère les noms des arbres plantés lors de sa fondation. Cette devise mentionne également *kokuruni* (litt. : petit dos voûté), *balanza* de Banankoroni (pl. I, a) qui est considéré comme l'ancêtre fondateur transformé en arbre. Les vieillards du village viennent chaque année appuyer leur dos sur le tronc et les placenta des accouchées y sont suspendus (1).

---

(1) Les plantations de *balanza* autour des agglomérations bambara ont attiré l'attention des botanistes. M. G. ROBERTY, dans *Les Associations végétales de la vallée moyenne du Niger* a étudié leur rôle agricole : « Le Dumossaeptum arboreitoides, culture sous les *balanzas*. Paysage artificiel bien défini. Arbres perdant leurs feuilles à la saison des pluies, les reprenant en saison sèche, épineux, régulièrement espacés mais de plantation toujours très ancienne. L'*Acacia albida* perd ses feuilles en juin et les reprend en décembre; ainsi fournit-il de l'ombrage en saison sèche et de l'humus au début de la saison des pluies. Le Dumosaeptum lui doit ses villages permanents... La date de l'arrivée au Soudan occidental de cet arbre si utile reste entourée de mystère ainsi que le mode et la date de sa vulgarisation au-dessus des champs cultivés. Il est probable que l'*Acacia albida* ait son berceau en Afrique orientale, quelque part au sud de l'Équateur. Comment est-il venu jusqu'en pays bambara sans perdre le rythme austral de son cycle saisonnier? Quel sultan ou quel agronome de génie a imposé sa multiplication autour des villages bambara? Ces questions restent pour l'heure sans réponses. Il semble démontré par les récits des premiers conquérants européens que de nombreux « tatas », ces énormes citadelles de boue rougeâtre, étaient enclos dans des haies vives de *balanzas* aux troncs jointifs... Il est probable que l'utilisation militaire a partout précédé l'utilisation agricole... Sur celle-ci il ne nous a jamais été fourni le moindre éclaircissement... Nous connaissons assez bien les coutumes agricoles bambaras, aucune ne prévoit qu'il faille multiplier les balanza, les espacer régulièrement dans les cultures, les protéger des chèvres; or, les *balanzas* sont d'âge, de développement et de densité convenables dans la quasi-totalité des cas observés par nous. Il y a là pour un jeune ethnographe doublé d'un naturaliste un bien beau sujet de thèse » (p. 96 et 97).

Les mythes des Bambara répondent aux questions posées par M. Roberty

MOUSSO KORONI.

Mousso Koroni est la terre impure; elle symbolise tout ce qui s'oppose à la lumière : obscurité, nuit, sorcellerie. Elle est aussi l'image de la rébellion, du désordre, de l'impureté et Pemba la poursuivit vainement pour tenter de reprendre ce qu'il lui avait donné : les « paroles » qu'elle avait reçues furent divulguées aux hommes malgré lui.

Si aucun culte ne lui est rendu, aucun sacrifice offert, son nom est cité dans diverses cérémonies et mentionné dans des chants; ses actes sont rappelés par certains gestes des rites.

D'autre part elle est à l'origine de la séparation des sexes réalisée dans le corps humain par l'ablation du prépuce et du clitoris qu'elle pratiqua, après sa trahison sur ceux qu'elle rencontrait. Elle les mettait ainsi dans l'état de rupture où elle se trouvait elle-même, principe femelle, vis-à-vis de Pemba, principe mâle. De plus elle est présente en tout être humain sous la forme d'une force néfaste, le *wanzo*, qu'elle avait communiquée à tous ceux qu'elle approchait, et dont chacun doit être débarrassé par les moyens qu'elle a elle-même instaurés; la circoncision et l'excision (1).

Elle est aussi à l'origine de certaines techniques agricoles qu'elle enseigna aux hommes et chaque année, dans certains villages, elle est représentée poursuivant son périple nocturne, au moment où l'on rentre le grain battu. Une femme âgée, vêtue de haillons les pieds chaussés de sandales dépareillées et portant des calebasses cassées bat la campagne en simulant la folie : elle emprunte l'itinéraire mythique d'ouest au sud et d'est au nord, puis vient s'asseoir près des greniers (2).

Ce sont également ses travaux agricoles et ses allées et venues misérables qui sont reproduits dans un rite enfantin exécuté de nuit pendant les cultures. Un joueur, le *gukuri* ou *danloni* (litt. : petit bossu) portant sandales en guise d'oreilles, bosse au bas du dos, queue d'étoffe nouée aux reins, va quêter de porte en porte, suivi de tous les incirconcis de son quartier. Il fait mine de cultiver et de piler le grain tandis que ses compagnons psalmodient des chants rappelant les actes mythiques de Mousso Koroni. La tournée accomplie et les cadeaux de mil réunis, le figurant, poursuivi par tous les autres, s'enfuit et disparaît sous les huées.

---

(1) Cf. p. 64.

(2) Cependant les toutes premières techniques agricoles dites *fyɛ ti* (litt. : culture du vent) sont rappelées, notamment chez les Bozo, par les semailles à la volée d'un certain nombre de graminées sauvages, puis de céréales, dans des champs dont la récolte est offerte à Faro. Des rites analogues sont célébrés dans certains villages bambara. Les techniques enseignées par Mousso Koroni ont suivi celles « du vent » et précédé celle de la culture du mil.

Sur quelques rites agraires des Bozo, cf. G. DIETERLEN. *L'Agriculture rituelle des Bozo*, Journal de la Société des Africanistes. t. XX, 1950.

Mais si cette parodie de culture, avec ses rites et ses chants rappelle les phases de la vie désordonnée de Mousso Koroni, les travaux agricoles dont elle fut l'instigatrice avant le temps sont eux, l'expression éminente de la réparation des désordres dont elle fut la cause. Chaque coup de houe donné par un cultivateur est une plaie infligée à la terre impure, donc à Mousso Koroni; la culture rituelle du mil, noble activité à laquelle doit s'adonner tout Bambara de race, institution que Faro enseigna en son temps, constitue une purification et une remise en ordre du sol (1).

FARO.

Formes de Faro.

Faro fut une « voix » avant d'être réalisé dans un corps. Au titre de maître du verbe réorganisateur de l'univers, il est figuré par une spirale, *munu*, dont il occupe constamment le point d'origine et qui est située au centre des points cardinaux (2). Le déroulement vibratoire de la spirale représente « le déplacement du Faro pour la réalisation de toutes choses dans l'univers ».

Cette image est matérialisée par un couvre-chef de vannerie, *gugu*, à huit spires. Les brins de paille formant les rayons qui maintiennent la spirale symbolisent la vibration; les intervalles, *yugunye*, œil du *yugu*, qui les séparent sont les rayons lumineux, la spirale étant celle du mouvement diurne du soleil « qui se déroule jusqu'au soir ». La régularité des rayons symbolise l'ordre et le classement des êtres et des choses par Faro. L'extrémité des brins de paille formant les spires doit rester libre : elle exprime l'extension infinie du domaine et du pouvoir de Faro. Le chapeau est également un masque « qui dissimule le visage invisible de Faro et au travers duquel il surveille le monde (1) ».

---

(1) *dugukolo be be dyuruma*, « toute la terre est impure ». Mais cette impureté ne s'étend qu'à la terre vierge et l'on dit également; *dyurumu be be dugukolo ka forow sani nyala do*, « toute la terre est impure sauf les champs cultivés ». Le mot *dugukolo* (litt. : os de la terre) désigne aussi bien la terre dans son ensemble que la terre en temps que matière. Les mêmes notions sur l'impureté de la terre ont cours chez les Dogon; cf. M. GRIAULE. *Dieu d'eau*, p. 94.

(2) Ce « point central » qui est également le firmament est dit par les Bambara *sa tyema kolo*, litt. : os du milieu du ciel.

La coiffure *yugu* était autrefois réservée au roi qui la portait dissimulée sous un turban. Certains vieillards méritants pouvaient aussi la détenir. Les rites de fabrication, du port de ce couvre-chef, témoignaient de l'importance qui lui était attribuée. En particulier, lorsqu'un vieillard était soupçonné d'une grave faute on perçait son chapeau de quatre trous représentant les points cardinaux puis on l'en coiffait, le soumettant ainsi au jugement de Faro : s'il était coupable, il mourait.

Sous sa forme de génie aquatique, Faro est considéré comme appartenant à la race blanche et son corps est composé mi-partie, de chair d'albinos et mi-partie de cuivre (pl. I, c).

Un mythe relate la formation de son être physique.

Lorsqu'il fit descendre sur terre les eaux ruisselantes, il se manifesta longtemps seulement par sa voix. Il n'avait point de corps et comme il lui fallait une matière propice à son achèvement, il attendait son heure, dans les eaux de la mer.

Le génie ailé Téliko au corps d'albinos, voulut un jour, dans son orgueil et sa jalousie, franchir le monde pour le connaître et le dominer. Faro, averti par le poisson-chien, décida de s'emparer du corps de son ennemi pour compléter le sien. L'albinos, qui volait toujours, se nourrissait de sa propre substance. Il rongea sa chair et ses os furent bientôt mis à nu; la moelle sortit. Elle se transformait en cuivre rouge qui tombait dans la mer et alimentait Faro.

Alors qu'il descendait au ras de l'eau le poisson-chien qui le guettait chanta pour l'attirer. L'albinos, comprenant le danger, remonta au plus haut des cieux pour tenter de poursuivre son vol et d'arriver aux confins. Mais il perdit rapidement ses forces et son *dya* étant tombé dans les eaux, son corps fut saisi par Faro qui, abandonnant le sexe au poisson-chien, compléta son être physique : Sa tête et son tronc furent faits de chair d'albinos; sa queue fut de cuivre ainsi que ses seins « organes essentiels, alimentant et vivifiant le monde ».

La tête de Faro est comparable à celle d'une femme blanche : ses yeux sont noirs et perçants, ses cheveux sont noirs, lisses et longs comme les crins d'une queue de cheval.

---

(1) On confectionne actuellement un panier de dimensions sensiblement supérieures qui est utilisé par les femmes (cf. pl. I, b).

Ses oreilles forment deux trous sans pavillon mais abrités par deux nageoires. Deux colliers de cuivre et d'or, suspendus à son cou constituent des résonateurs qui lui permettent d'entendre tous les sons et toutes les paroles : celui de cuivre rapporte les propos de peu d'importance; celui d'or, les conversations secrètes et les paroles puissantes. Tout ce que recueillent les résonateurs est déposé par Faro dans ses nageoires, qui sont aussi le miroir où se reflète ce qu'ont vu ses yeux, le bon comme le mauvais. Il regarde, ferme les yeux, tire la langue : les images pénètrent dans ses nageoires et s'ordonnent sous l'effet des mouvements réguliers de sa queue. Ainsi, images et sons s'inscrivent chronologiquement et peuvent à chaque moment être remis devant lui « comme une fiche sortie d'un fichier ». Il sait donc quel profit il pourra tirer des choses et des événements.

Comme ses mains, dont la droite est mâle et l'autre femelle, l'extrémité de sa queue est palmée. Sans sexe apparent, la prééminence de la forme féminine qui lui est communément reconnue rappelle qu'il se féconda lui-même pour donner naissance à deux jumelles lors du premier ruissellement de l'eau sur la terre.

Cet aspect qui est lié au problème de l'origine de Faro a fait dans toutes les populations l'objet de légendes et de contes qui, s'ils ont attiré l'attention de l'érudition, présentent un grave inconvénient. Ils sont des versions tronquées, anecdotiques et souvent enfantines de mythes considérables, parfaitement construits et qui sont l'expression d'un dogme.

Deux exemples, l'un peul, l'autre touareg sont donnés ici de ces légendes dont l'intérêt à nos yeux n'est que d'apporter des indications pour la recherche des mythes formant l'armature des représentations.

1° Alors que le Niger n'était encore qu'une rivière étroite et profonde une femme peule enceinte demanda le passage à des pêcheurs bozo qui faisaient traverser ceux qui les en priaient. Ils commencèrent par refuser, prétextant sa grossesse. Comme elle insistait, ils la prirent dans leur pirogue, la déposèrent sur l'autre rive et s'éloignèrent.

Aussitôt qu'elle fut à terre, elle fut prise des douleurs de l'accouchement. L'eau du fleuve tarit à l'endroit où elle était profonde. Une voix en sortit conseillant à la femme de venir enfanter là. Elle descendit dans l'excavation après avoir laissé ses vêtements sur le bord.

De son sexe sortirent d'abord du lait, du miel, des pierres précieuses *(lulu)* qui se déposèrent sur le lait et le miel comme sur une natte. La femme se tordait de douleur : l'enfant vint enfin, les pieds devant et tomba sur les pierres. Ses mains et ses pieds étaient palmés.

L'eau réapparaissant, elle tenta, mais en vain de s'enfuir. Son mari, accouru au bord du fleuve et qui avait trouvé ses vêtements, la vit trois fois apparaître tenant l'enfant au-dessus des eaux; puis elle disparut entraînée par le flot. Tous deux devinrent des génies Faro.

2° Le village de Siyango, situé à une quinzaine de kilomètres de Nyono, possède un puits naturel très profond et intarissable, dit *ala kolo faro*, Faro du puits de Dieu « ou *Mbata dyi* » « eau de *Mbata* » dont nul ne boit l'eau. Au début de la création une femme nommée *Mbata* vivait seule et sans eau. Elle accoucha de deux jumeaux. Epuisée et mourant de soif, elle sortit de la caverne et s'étant rendue au bord du sable elle pria, demandant à Dieu de mourir, si l'eau lui était refusée. Un génie lui apparut et lui dit : « Dieu te confiera toutes les eaux; mais il va d'abord préparer ta demeure. » Une excavation s'étant produite et s'étant remplie d'eau, la femme y pénétra et fut transformée en Faro. Elle fit alors entrer ses deux enfants dont l'un devint un génie femelle et l'autre un génie mâle.

L'excavation se prolongeait sous terre par une sorte de tunnel et Mbata l'ayant suivi ressortit avec les eaux en un point qui donna naissance au Niger.

L'eau du puits fut bientôt interdite aux êtres humains car si quelqu'un s'y mirait, Mbata prenait son ombre et le faisait tomber. Le cadavre, empruntant le chemin souterrain, sortait dans le fleuve. Ceux qui se jetaient dans l'eau devenaient parfois eux aussi des Faro.

Or Mbata reprit un jour forme humaine et se rendit au marché où elle acheta des tomates. Elle demanda à ceux qu'elle rencontrait ce qu'ils faisaient pour le génie propriétaire de l'eau dont ils avaient tant besoin; elle leur conseilla de lui offrir du cuivre et de l'or et d'égorger au puits des béliers blancs.

Le lendemain, les villageois, pour témoigner de leur reconnaissance envers Faro se rendirent au bord au son des tambours et sacrifièrent l'animal. L'eau enfla, bouillonna et forma un ruisseau qui coule actuellement encore jusqu'au Niger.

La constitution du corps de Faro détermine le comportement des hommes dans les rites célébrés à son bénéfice. Alors que le sang, les ~~tomates~~, la bouillie crue de céréales, les gâteaux cuits, sont consommés par lui et rendus aux donateurs sous forme de bienfaits matériels (enfants, mil, pluie) ou spirituels (conservation des âmes des vivants et des morts) le contenu de choix des sacrifices ou offrandes, l'albinos et le cuivre sont réservés au génie, contribuent à augmenter ses forces, à stimuler son action.

Il les absorbe pour lui-même; aussi dit-on que « le cuivre et l'albinos sont les privilèges sacrificiels de Faro ».

Manifestations de Faro.

Dans le ciel, toutes les manifestations atmosphériques sont la démonstration de la présence et du pouvoir de Faro. La pluie, le tonnerre, le grain, la grêle, l'arc-en-ciel témoignent de son action. La foudre qui éclate dans le *koble kaba* est une arme, une petite hache *(sempere ni* ou *dyele dĕ čini)* qu'il lance du haut du ciel. Le foudroiement est la preuve de son action vengeresse : dans l'arbre, elle atteint le *gecko (ala jugu)* animal néfaste qui, lorsqu'il vit dans les maisons près du foyer, est censé attiser le feu des incendies; dans l'homme elle punit la rupture d'interdit. Les haches de pierre que l'on trouve au point de chute sont recueillies et conservées dans les sanctuaires des autels de pluie pour être utilisées en cas de sécheresse ou au cours des rites saisonniers. On les dépose aussi dans les semences pour que leurs forces, se communiquant aux graines, favorisent la germination.

Sur terre, conçu comme un être unique dont le siège principal est le Niger, Faro a le don d'ubiquité. Pratiquement, les Bambara pensent qu'un génie hante chaque torrent, mare ou puits, chaque calebasse d'eau, chaque goutte de rosée : ils le nomment *dyi ligi*, « maître de l'eau ».

Il prend des formes multiples. Gazelle, on le voit en brousse se nourrir de tomates et d'oignons sauvages. Bélier à toison d'or et porteur d'ornements d'oreilles il circule souterrainement le long des filons aurifères. Femme jeune et séduisante il se rend dans les villages pour séduire les garçons et les entraîner avec lui. Il est la tête du torrent temporaire qui dévale après la pluie; il est le bouillonnement et l'enflement des courants. On le reconnaît dans la vapeur bleutée qui monte au-dessus des mares. Un ruisseau qui s'assèche est signe de sa colère.

Lieux de Faro.

Aux origines, les eaux qui, venues des « sources centrales du ciel », ruisselèrent sur la terre, étaient pures, claires, bénéfiques et « aisées ». Mais à la suite de la trahison de Mousso Koroni et des êtres qui l'écoutèrent, l'impureté se communiqua à la terre :

l'eau qui la recouvrait se troubla, changea de couleur, et devint « difficile ». Elle tarit ou, au contraire, inonda les pays, noyant les êtres vivants.

Actuellement seule l'eau de pluie ruisselante a conservé son caractère, notamment celle de la première pluie qui tombe au début de l'hivernage. Considérée comme purificatrice par excellence, elle est dite *dane sandyi* « eau qui ensemence », car elle apporte leur âme, *ni*, aux céréales; la terre, stérile et « vide », devient pleine et féconde, les plantes renaissent, les animaux et les insectes se reproduisent (1).

Les eaux terrestres, fief de Faro, sont classées en sept domaines distincts, étagés, qui correspondent aux sept parties du ciel et de la terre.

La première, *dyi woyo* « eau bouillonnante » est celle de la surface : elle bouillonne quand le Faro se manifeste et déborde dans les inondations, tête des torrents grossissants sous l'orage. C'est aussi l'eau lustrale pour celui qui vient s'y laver dans un but de purification; c'est elle que l'on puise pour boire.

La seconde, *dyi ble*, « eau rouge », est le cuivre de Faro. Reflet du *koblenkaba* « ciel rouge », elle est comme lui le siège des activités guerrières ou punitives du génie. Eau de colère et d'action vengeresse, il y noie les coupables; par elle il atteint dans leur corps et leur santé ceux qui ne reconnaissent pas son règne.

Dans le *dyi fi* « eau noire », Faro séjourne de préférence : il y conserve ses secrets. C'est à elle que l'on s'adresse pour obtenir une grâce. C'est du *dyi fi* que sortiront les douze eaux futures.

Dans le *dyi sumane* « eau froide », où vivent les poissons, règnent le calme et la félicité. Les *dya* des êtres terrestres y sont conservés.

Si c'est dans le *dyi ble* que Faro noie ceux qu'ils châtient, c'est dans le *madũ* (litt. : personne, manger) que pourrissent leurs corps, ou qu'ils sont la proie des poissons.

La sixième catégorie d'eau, *kosira* (litt. : chose de peur) est une geôle : il y place momentanément tout ce qu'il tient sous sa domination.

La septième eau, *dyi wolõfla*, correspond au septième ciel.

Dans le Niger, les lieux habités par Faro portent le nom général de *faro tyin*. Ce sont le plus souvent des dépressions profondes bien connues des riverains, notamment des Bozo;

---

(1) D'un être généreux et bon, on dit qu'il est comme cette première pluie. On le dit aussi de l'esprit : « l'esprit [est bon comme] la première pluie » (*miri dane sandyi*).

parfois une pierre consacrée, placée sur la rive, reçoit les sacrifices offerts au génie.

Le plus célèbre est le lieu dit Souko situé en amont de Koulikoro près du village de Kayo. Le génie du lieu a engendré tous ceux qui vivent actuellement dans le fleuve. Il est révéré à ce titre par tous les pêcheurs Bozo et Somono qui envoyaient autrefois des délégations au sacrifice annuel exécuté à la saison sèche.

Le Faro de Ségou habite le Faka, trou profond situé non loin de la rive droite, face à la ville. La légende veut que le Faka se prolonge de tunnels dont l'un fait communiquer le fleuve avec le Bani, dont l'autre débouche à Dya, et qui furent empruntés par les fondateurs de l'agglomération aux temps mythiques. Le Faka est placé sous la protection d'un crocodile auquel les habitants offraient chaque année des victimes; au fond du trou se tient un gros *polyo* aveugle et sans écailles que les pêcheurs s'ils le prennent dans leurs filets remettent toujours à l'eau « car il est le portier de Faro ». Autrefois des points noirs en nombre égal à ceux des habitants de Ségou, ainsi qu'une représentation de Faro étaient tracés sur une dalle visible aux plus basses eaux. A cette occasion un albinos était égorgé et les prémices de la récolte offerts au génie.

Le jour du marché de la ville une calebasse pleine d'eau puisée au fleuve, dite *fle ndinye faro*, est placée non loin de la rive où viennent aborder les pirogues. Boire une gorgée de cette eau équivaut à sacrifier au génie. Le buveur donne une aumône de cauris au mendiant qui a puisé, car « jamais l'eau [de Faro] ne se vend ni ne s'achète (1) ».

A Sama le *faro tyin* est une sorte de couloir naturel situé dans des rochers qui bordent et surplombent la rive gauche du fleuve. Les mange-mil qui y nichent, en s'envolant, préviennent de la sainteté du lieu les piroguiers qui s'arrêtent alors pour prier. Ils jettent en passant une offrande et ceux qui ont rompu un interdit se purifient en se lavant. Chacun montre au génie ce qu'il transporte avec lui. Deux arbres voisins du lieu, dits *faro sõndyiri* « arbres du sacrifice de Faro » servent à attacher au crépuscule les bœufs blancs qui seront jetés vivants le lendemain au fleuve, avec de la bouillie de mil et des noix de cola. Au fond du passage, sur une paroi assez lisse, la représentation de Faro décrite plus haut était exécutée chaque année au cours de la cérémonie célébrée par la société du Komo.

(1) *ma ti dyi fere ma ti dyi sã*. Cf. pl. II, b.

Faro hante également les mares et les puits. Au village de Nango un puits naturel fut révélé à un chasseur par un bélier blanc sortant d'un épais fourré. L'agglomération fut construite après la découverte du trou d'eau où les habitants rendent un culte au génie.

Au village de Siyango l'eau du puits, où réside Faro, est interdite mais le lieu est le siège de toutes les cérémonies religieuses qui intéressent les habitants du village. Les nouveau-nés y sont présentés, les décès et les mariages annoncés. Les malades sont traités par l'eau du puits qu'on leur fait boire et avec laquelle ils procèdent à des ablutions. Chacun offre annuellement un animal de son troupeau qui est jeté vivant dans l'excavation. Enfin les condamnés à mort étaient exécutés par noyade au même endroit.

Auxiliaires de Faro.

Dans les ciels, l'espace, la terre, sur les arbres et dans les rochers des montagnes, Faro a placé des génies, ses représentants qui veillent à la bonne marche des choses. De plus, il est accompagné d'auxiliaires qui participent à ses travaux.

Le plus important est son « secrétaire », le *bolokuruni*, forgeron manchot de race noire, qui vint vivre auprès de lui après avoir perdu l'usage de ses mains.

Ce forgeron vivait sur la terre dans un temps où les artisans, ignorant l'usage des tenailles, saisissaient le fer rouge à pleine main pour le présenter sur l'enclume. Parvenu à un âge avancé, celui qui devait devenir le compagnon de Faro et qui pratiquait encore son art, eut un jour les deux poignets brisés par le marteau d'un apprenti maladroit. Fou de douleur, il courut au fleuve et s'y jeta pour calmer sa souffrance. Faro, voyant que, dans son malheur, il avait eu recours à lui, en eut pitié et le garda près de lui. Son corps ne fut jamais retrouvé et un devin apprit à ses proches le sort heureux du disparu.

Le *bolokuruni* accompagne Faro et le seconde dans son incessant travail : c'est lui qui consulte le registre des nageoires sur lesquelles tout s'inscrit. « L'image demandée est renvoyée des nageoires dans la pupille du génie que le forgeron regarde. » Reflétée dans l'œil du serviteur, l'image est utilisée par lui selon les ordres qu'il reçoit. C'est ainsi qu'il vérifie chaque jour le compte des créatures vivantes et mortes.

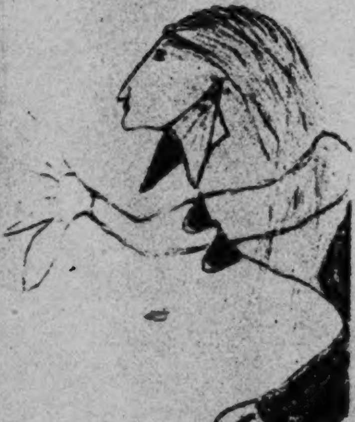
c) Dessin représentant Faro (Sama).



[Facing p. 48]

Parmi les animaux, nombreux sont les auxiliaires du génie. Sa messagère aérienne est l'hirondelle qui ne se pose jamais sur la terre impure et dont les ailes, représentées sur le bonnet des anciens, symbolisent les paroles qu'elle transporte. Le dard du scorpion est l'arme donnée par le Faro aux jumelles primitives : quiconque attaque ou blesse un jumeau est piqué par cet insecte. Le crocodile est l'exécuteur de ses hautes œuvres; il tue les coupables en rupture d'interdit ou chasse des bords du fleuve les indésirables. Le poisson sans écailles dit *kokoni* dirigea le premier ruissellement sur la terre (1). Le *ineni* (2) constitue « l'ordure » de Faro que certains sont chargés de balayer (3). Le minuscule *miri* (4), « mère des poissons », est considéré comme le formateur et le surveillant de tous les poissons. On associe son nom à toutes les prières qui sont récitées sur les eaux. Le *dodo* (5) est le messager de Faro dans les eaux et transmet ses ordres et ses directives; le *polyo* (6) enfin sert de portier et contrôle ceux qui veulent pénétrer dans le domaine du génie.

Certaines plantes sont en rapports permanents avec lui. Le *yayale* (7) « l'herbe de Faro », poussa sur le tertre où naquirent les jumelles mythiques. La tomate, *ngoyo* (8), est assimilée au sang : elle porte en germe l'embryon car ses grains sont multiples de sept, chiffre de la gémelléité. C'est par elle que le Faro féconde les femmes car elle possède comme les humains et les animaux un *ni* et un *dya*. Quand elle fleurit double, les deux tomates jumelles sont données aux femmes afin qu'elles accouchent de jumeaux. Si le fruit est unique sur sa tige, on le fend en deux pour le cuire et le manger, ce geste ayant pour but de le séparer symboliquement de son *dya* qu'on renvoie ainsi à Faro (9).

Dans chaque village on cultive un ou plusieurs petits champs de tomates, dits « champs de Faro » ou « champs des jumeaux » : les fruits sont réservés au culte du génie (10).

b) La calebasse d'eau de Faro (Marché de Ségou).

[Facing p. 49]

Tous les métaux appartiennent à Faro. Les sept principaux sont les suivants : le cuivre rouge (mâle), le cuivre jaune (femelle) l'or, l'argent, le fer-blanc, le fer noir. Le cuivre vient du cinquième ciel *(koblenkaba) :* il descend à chaque coup de foudre et, avec les « pierres de tonnerre », pénètre dans le sol. Il fut découvert par un devin au fond d'une mare tarie par rupture d'interdit. Du fait de son origine céleste le cuivre représente « les sons du Faro » : ceux-ci s'enroulent autour des boucles spiralées de ce métal que chacun porte aux oreilles et pénètrent dans les tympans, permettant ainsi d'entendre les paroles. L'or joue un rôle dans la confection de certains autels *(boli)* auxquels il confère force et stabilité.

Les sacrifices exécutés avec ou sur le cuivre ou l'or ont un effet contraignant sur le génie car ils sont de même essence que lui.

Nulle femme ne traverse le Niger, portant des bijoux de cuivre ou d'or sans ouvrir ses bagages par déférence, car « toutes les parures sont celles du génie » et doivent souvent, après la mort, lui revenir.

Tous les métaux ont pour interdit le beurre de vache, matière huileuse qui ne laisse pas pénétrer l'eau.

Les cauris, coquillages répandus dans toute l'Afrique Noire et servant de monnaie, seraient venus de l'eau profonde où il conserve sa fortune : Faro « dort sur un lit de cauris ». C'est leur origine qui explique leur rôle et la valeur à la fois économique et religieuse qui leur est attribuée.

La terre noire des rives du fleuve, *bogo fi*, comme celle que l'on trouve au bord de la mer aux endroits sablonneux, contient la force du génie et est utilisée dans de nombreux rites. Comme enduit au bas des murs intérieurs des habitations elle symbolise sa présence au sein de la famille. Elle sert à décorer les bonnets des circoncis (1). Si l'on est loin du Niger ou de tout point d'eau, c'est s'adresser à Faro que la prier.

Parmi les hommes, certains occupent vis-à-vis du génie une place privilégiée. Les premiers sont les huit ancêtres mythiques dont l'aîné est Koumabana. Ils reçurent la parole du génie, la transmirent à leurs descendants, expliquèrent, avant de mourir, le nouvel ordre des choses et instituèrent le culte.

Ils sont actuellement encore révérés comme les prototypes de

lageois au bord de la mare : les devises des jumeaux sont récitées, ainsi qu'une prière, suivie d'ablutions.

Les fruits récoltés sont écrasés en offrande au génie sur le tronc d'un arbre voisin.

(1) Cf. p. 180, fig. 14.

l'être humain dans sa nouvelle condition. Avec l'immortalité l'homme a perdu la nourriture céleste qui suffisait jusqu'alors à son existence. Les articulations qui lui ont été octroyées le consacrent au travail manuel dont les techniques lui ont été enseignées progressivement. D'autre part, dans le domaine spirituel apparaît aussi un profond changement. Dans les temps primitifs, l'homme vivait d'une existence quasi animale et dépourvue de responsabilité. L'abandon par le *balanza* lui apporta la souffrance et la mort mais avec elles se développe sa conscience, symbolisée par la « parole » de Faro. A côté de la mort, de la maladie, des chagrins, des mauvais instincts, du dur labeur des jours, apparaît aussi le sentiment que l'homme a de sa personne, de sa place dans un univers ordonné, régi par Faro, s'opposant au chaos primitif.

Les huit ancêtres enseignèrent aux hommes à révérer Faro, à lui demander tout ce dont ils avaient besoin, à le remercier de tout ce qu'ils recevaient. Aussi leur nom est-il invoqué dans la plupart des prières et les épisodes de leur vie relatés aux jeunes auxquels on donne en exemple leurs travaux.

Il convient aussi de mentionner la situation particulière des Bozo issus des jumelles mythiques, filles du génie (1). Cette origine les habilite dans de nombreux cas à intervenir auprès du génie, là où d'autres sont impuissants. Nés jumeaux du maître de l'eau, les Bozo n'ont point subi la souillure due à Mousso Koroni dont sont affectés tous les autres hommes. De ce fait ils ont la possibilité d'entrer en communication avec le génie au fond des mares ou dans le fleuve, d'aller rechercher les corps des noyés. Le droit de pêche qu'ils tiennent de lui né fut jamais discuté par les conquérants qui s'installèrent au bord du Niger à la période historique.

De nombreux articles ou essais ont déjà été publiés sur les Bozo. Leur langue et les techniques de la pêche qui leur sont propres ont été étudiées. Mais les enquêtes sur leur religion, sur la notion qu'ils ont de leur personne, s'avèrent très difficiles, en raison d'une part de leur apparente conversion à l'Islam, et d'autre part de leurs réticences dès que l'on tente d'aborder leur système traditionnel. Cet apport serait cependant indispensable à l'érudition pour aborder l'étude de certains aspects des métaphysiques soudanaises notamment celles des Bambara et des Dogon. Dans ces deux populations les mythes mentionnent l'apparition des Bozo sur terre en même temps que commence à s'exercer l'action de Faro, le tout coïncidant avec le développement des techniques chez les Bambara et de la « troisième parole » des Dogon (1). De plus, les rapports dits de parenté à plaisanterie qu'ils entretiennent avec les Dogon et qui se placent à l'origine de tout un système d'alliances tribales et intertribales illustrent bien l'importance des représentations qui leur sont conférées (2).

---

(1) Cf. p. 14, note 7.

Faro, s'il en a besoin, entraîne dans sa demeure aquatique les femmes ou les jeunes filles : nombre de disparitions au cours de traversées en pirogues lui sont attribuées.

Autrefois, chaque année, une jeune fille vierge, désignée pour sa beauté par les griots de son village, devenait l'épouse et la servante de Faro. Elle était le plus souvent consentante, et fière de devenir son éternelle compagne. Au jour dit, parée de ses plus beaux bijoux, on l'amenait au milieu du fleuve et on l'y jetait en priant le génie d'accorder sa protection au village et de donner la pluie pour les récoltes futures.

Interdits de Faro.

Tous les ressortissants de Faro, en pratique les Bambara des deux sexes, et à tous les âges, sont tenus de respecter un certain nombre d'interdits.

La terre noire *bogo fi* des bords du fleuve qui est utilisée rituellement dans de nombreux cas, serait excellente pour la fabrication de la poterie : les potières ne peuvent cependant l'utiliser à cause du noircissement acquis pendant la cuisson. Aucune poterie ayant été au feu ne doit être lavée dans les lieux hantés par le génie (3).

Le beurre est en beaucoup d'endroits l'interdit de Faro et ne saurait être conservé dans l'eau (4).

Nul ne traverse le fleuve sans ouvrir son bagage et présenter à Faro l'or, le cuivre ou les aliments qu'il possède. D'une façon générale d'ailleurs, le port des métaux est illicite aux endroits hantés par le génie.

L'interdit principal est le sang menstruel dont le flux fut originellement provoqué par les fautes et l'impureté de Mousso

(1) Cf. M. Griaule. *Dieu d'eau.*

(2) Cf. p. 83, note 1.

(3) A Ségou, de nombreuses noyades sont attribuées à la rupture de plus en plus fréquente de cet interdit.

(4) Cet interdit est lié aux rapports de Faro et des Peuls, qui n'ont pas encore été éclaircis par l'enquête.

Koroni. Aucune femme en état de menstruation ne doit se rendre aux lieux qu'habite Faro; aucune ne doit y puiser de l'eau, y laver le linge ou du matériel culinaire, y procéder à des ablutions. De plus, tout homme dont la femme est dans cet état doit s'abstenir de paraître aux cérémonies religieuses, ou, s'il est prêtre, d'exécuter les rites.

Dans cette région de l'Afrique comme dans bien d'autres les menstrues sont conçues comme l'écoulement nécessaire d'un sang vide, devenu impur pour n'avoir point contribué à la formation du fœtus dont toute femme porte l'embryon dans son sein (1). Privé de la force essentiellement fécondante de Faro, contraire à son action génératrice, ce sang est néfaste et tout ce qui l'approche ou le rappelle exclu des rites.

Caractère, rôle et action de Faro.

La toute-puissance, l'omniprésence, la bienveillance de Faro sont les caractères principaux de son action dans la création. Tout dépend de lui chez les êtres animés, inanimés, dans le temps et l'espace.

Cette domination de l'univers est vivement sentie par les Bambara qui disent que « Faro ne s'arrête ni jour ni nuit dans son incessant travail ». Il veille à la bonne marche de l'ordre qu'il a instauré et qui demande une attention constante. Son temps est partagé : de l'aube au soir, il s'occupe de la terre et de ses habitants; le travail des douze heures qui suivent est consacré aux animaux aquatiques et aux membres de sa propre famille. La procréation dépend de sa volonté; c'est lui qui, dans le ciel et dans l'eau, détient la vie physique et les principes spirituels des êtres : âme et force vitale. Dans un ordre voulu, que les humains d'ailleurs favorisent par l'observation des lois édictées, il entretient cette vie et fait selon un rythme régulier participer des corps neufs au fonctionnement de l'univers. Les âmes se réincarnent, assurant la continuité des forces spirituelles dans le monde. La même puissance préside à tous les actes de la vie individuelle et sociale : naissance, circoncision, excision, initiation, mariage, travaux agraires, voyages, guerre ou paix.

A travers tous les développements de la vie individuelle, c'est Faro qui maintient l'intégrité physique de l'homme; il lui donne la santé, nécessaire à son action. La maladie est toujours considérée comme une déperdition de forces qu'il convient de redemander à Faro. Maître souverain de la vie des hommes il peut la leur retirer.

---

(1) Cf. G. Dieterlen. *Mécanisme de l'impureté chez les Dogon*, Journal de la Société des Africanistes, t. XVII, 1947, p. 82 et ss.

A la mort, il reprend les principes spirituels du défunt et les conserve dans l'eau pour les réintégrer dans un autre corps, utilisant ainsi des forces éternellement réemployables. Le produit de la « mue », *mana* ou *folo*, des âmes qui restent dans les autels sont des témoins pour lui qui vérifie constamment le compte des vivants et des morts dont il est le gardien.

Sur terre, les hommes lui sont redevables de tout ce qu'ils possèdent. Il leur a donné le langage, expression de la pensée et leur en a enseigné l'usage les mettant en garde contre l'abus et le mauvais emploi des mots.

Les techniques, autre expression des « paroles de Faro » si nécessaires à leur vie depuis qu'ils sont obligés de subvenir à leur existence leur ont été révélées par le génie. Il les a aidés de son pouvoir souverain, soit en leur donnant directement l'outillage nouveau, soit en inspirant à certains d'entre eux l'observation des faits les mettant à même de développer une technique nouvelle. Ainsi, il remit directement aux Bozo les filets de pêche qui permirent la prise de la première nourriture animale attestée, le poisson, alors qu'il favorisa chez les Bambara la découverte du tissage par l'observation d'une toile d'araignée.

Il donna aussi aux hommes certains grains qui furent à l'origine de la culture. Ainsi le coton et le fonio, connus tous deux avant le mil et les autres céréales.

Propriétaire des cauris et des métaux, il est le maître des richesses et il les distribue selon son bon plaisir. Mais celui qui possède du métal précieux en est redevable à Faro et lui doit une part de ses gains : c'est pourquoi nombre d'offrandes lui sont faites en jetant au fleuve de l'or ou du cuivre.

Son action est fondamentale en ce qui concerne la principale activité des Bambara, le travail agraire. Tout homme digne et noble doit cultiver pour l'honorer. Chaque coup de houe est une plaie, une blessure faite à la terre et un châtiment de son impureté. Chaque coup de houe, qui humilie Mousso Koroni, est une purification de la terre. Faro veille sur l'âme et la force vitale des graines; lui seul peut donner la pluie nécessaire aux germinations, car elle contient l'âme, *ni*, des céréales, comme l'eau des mares et des ruisseaux que l'on recueille en cas de sécheresse.

Le mil prend son âme dès qu'il reçoit l'humidité de la terre, et, dès lors, il accompagne les étapes de sa germination de paroles qui, à l'origine du monde, pouvaient être entendues. Dès réception de l'eau de pluie, le grain se fend et dit : « Je suis situé. » Puis le germe sort de terre avec la parole : « Que je sois protégé. » Enfin la croissance de la tige est accompagnée de la troisième parole : « Que je sois obéi (1). » Il conserve son âme jusqu'à pleine maturité, moment où il est récolté. Quand le fer du moissonneur coupe l'épi ou la grappe, la plante envoie son âme dans le domaine de Faro en disant : « Le fer est l'interdit de mon grain, âme! pars dans la maison d'eau (2). » Ainsi privé de son âme, le mil est propre à la consommation et il dit : « Si je n'étais mort on ne pourrait me manger; ma race ne peut se perdre; que je sois ou non mangé, rien ne peut me diminuer car mon âme est dans l'eau (3). »

De nombreux rites agraires ont pour objet de s'assurer la protection de Faro. Les prémices qui lui sont offertes sont d'une qualité qui témoigne de l'importance de son action. C'est en somme une remise qui lui est faite en remerciement de la récolte passée et en prévision de celle à venir.

Il est aussi pour les artisans le gardien de leurs techniques. Le premier ouvrage d'un jeune apprenti forgeron, le premier fuseau d'une fileuse lui sont apportés : l'individu, par ce geste, lui confie à la fois son travail et son habileté manuelle. Faro, ayant vu son œuvre, ne permettra pas qu'il oublie ce qu'il a appris, et l'aidera à parfaire son tour de main.

Faro est un juge. Celui qui enfreint les règles qu'il a fixées tombe sous le coup de son juste courroux : les noyés ou les foudroyés sont toujours des individus en rupture d'interdit. La plupart des cas difficiles lui sont soumis par les hommes en dernier ressort. Par l'intermédiaire des agents des différents rites, comme par ceux des devins, il répond aux demandes, il « résout les paroles ». La plupart des prières lui sont adressées et dans bien des cas son nom termine les invocations. Il est partout présent, partout invoqué et le siège de sa domination, comme de toute autre, est le septième ciel auquel les Bambara s'adressent en disant : « Septième ciel, tu es grand, tu es long; ton ouest est rouge; ton est est blanc; ton nord est grand; ton sud est noir; septième ciel, tu es le roi des sièges parmi les sièges, tu es le grand générateur de la domination des dominations, tu es le grand découvreur de tous les secrets, tu es la source de toutes les fortunes, tu es le lieu où l'on ne peut tarir le bien commun; source de toutes les choses, délivre-moi du péché (1). »

---

(1) Ces trois formules se notent : *ndyora, nga kolosi, nga bunye.*

(2) *n[illegible]ke ye nkise lne ye, ni, ta dyi so la.*

(3) *ni ña [illegible]ale te nil dã, n šia tise ka tunu, ndunaw ma dũn wo, fẽ le bwona, ni b[illegible]dyi la.*

Pemba et Faro, principes complémentaires, sont issus tous deux de l'esprit, *miri*, aux origines de l'univers. Si l'on envisage l'aspect psychologique de leurs représentations, on conçoit que, malgré l'antériorité du rôle de Pemba, les Bambara puissent dire parfois « Faro est l'aîné ». Car il représente dans le microcosme humain, la volonté et la sagesse venant contrôler les pulsions de l'instinct sexuel symbolisées par la prolificité du *balanza* les violences et les désordres de l'affectivité exprimés par le vertigineux voyage chtonien et la folie de Mousso Koroni. L'opposition des sexes, réalisée dans le mythe par la séparation corporelle de Pemba et Mousso Koroni, leurs désaccords et leurs querelles, source de tous les désordres cosmiques, sont compensés par l'accord harmonieux et l'union, établis par Faro dans son androgynéité. Faro est la vibration gémellaire qui, désormais, ordonne l'univers; il est la raison et la mesure opposée à la force trop écrasante du *balanza :* il est la lumière de l'esprit qui triomphe de l'obscurité et des tâtonnements primordiaux.

---

(1) *wolo fiã kaba, i ka bo, i ka dyõ, i kle bi ka ble, i koro ka dye, i baba ka bo, i bani ka fi; wolo fiã kaba, siki yoro u la sikiyoro masa, fanga u la fanga ba sindi, gundow be ladyele fara be, nafolo be ladyele boyoro, dyẽ wari dũ bali yoro; ko be boyoro, hake tonye.*

Cette prière est récitée par le chef de famille pendant un accouchement, lors d'une grave maladie ou d'un décès. Elle intervenait également lors des rites d'intronisation des rois et des chefs.

CHAPITRE III

LA PERSONNE

Les Bambara conçoivent l'homme *(homo)* comme le principe de la nature. Il est « le grain du monde » et, à ce titre, le reflet de la totalité des êtres et des choses, dans leur essence et leur situation. Comme l'univers, l'homme est vie, et comme lui « il est maintenu par l'attraction des angles cardinaux ». Univers et homme sont la condition l'un de l'autre : l'ensemble des choses soutient l'être humain en ses lieux et places et le fait persévérer en lui-même. L'homme, à son tour, est base, raison d'être, cause de l'univers, par la conscience et la connaissance qu'il a de lui-même.

C'est ainsi que le principe de dualité, contenu dans la pensée créatrice aux origines et réalisé dans l'univers par le ciel et la terre, se reflète dans la personne. L'être humain témoigne dans son corps de la séparation des sexes nécessaires à la multiplication de l'espèce, séparation exprimée dans le mythe de Pemba et Mousso Koroni et qui comporte les désordres, les difficultés, les conflits qu'implique une telle situation. Mais il réalise par ses âmes jumelles leur union idéale, exprimée dans le mythe de l'androgynéité de Faro.

En outre ces personnalités mythiques sont présentes en l'homme : Faro par le *ni* et le *dya*, Pemba par le *tere* et le *nyama*, Mousso Koroni par le *wanzo*. On peut dire également que les périples de ces êtres et leurs poursuites dans le temps et les régions mythiques sont l'expression des états psychologiques de l'homme comme des recherches et des combats intérieurs qu'il mène pour se situer en lui-même et par rapport à la création. C'est dire qu'ils sont l'expression de la prise de conscience de soi. Toute l'attitude religieuse et sociale de l'individu témoigne de ce jeu de forces diverses, entre lesquelles il doit maintenir l'équilibre et l'harmonie.

Dans ce chapitre sont examinés successivement les éléments composant ou déterminant la personne : les principes spirituels *(ni, dya, tere, nyama, wanzo);* les parties du corps humain qui sont en rapport avec eux; certains attributs sociaux de l'individu (prénom, nom, devise, interdit). Enfin est considéré le rôle cathartique de l'institution de la parenté à plaisanteries fondée sur la notion de gémelléité.

I. — Les principes spirituels (1).

A. — L'âme, *ni*, et le double, *dya :*

Faro détient le principe de vie dans l'eau, son domaine, élément fécondant par excellence. Dans les corps des êtres, ce principe siège dans le sang. Le sang des sacrifices offerts au génie, ou à leur défaut le suc de la tomate, avatar du sang, constituent un apport au réservoir de vie que contrôle Faro, vie qu'il redistribue sous toutes ses formes dans l'univers. L'eau est l'élément privilégié dans lequel peut indéfiniment persévérer la vie. Ailleurs, elle ne se maintient que si l'eau vient l'alimenter.

La fonction créatrice de Faro est matérialisée par l'absorption d'une tomate par chacun des époux avant les rapports sexuels, acte qui s'accompagne de la récitation d'une prière. Le suc des fruits, qui contient le corps du futur enfant, transmet la vie selon le mécanisme suivant :

Faro reçoit des offrandes de tomates cultivées rituellement dans des champs consacrés, comme le sang des victimes égorgées en son nom au-dessus des eaux. Sang et suc, répandus dans l'eau, agent de la fertilité, sont recueillis par l'hirondelle, messagère aérienne; libérés dans l'espace, ils reviennent au sol avec la pluie fécondante et pénètrent les graines des tomates qui contiennent ainsi une parcelle génératrice.

Après l'absorption des fruits par les conjoints, un embryon au corps lisse, aux membres souples, est formé dans le sein maternel. C'est à ce moment que les époux consomment l'acte sexuel au cours duquel la femme « prend en elle le corps entier de son mari » : le haut par les yeux, le bas par le sexe. La semence masculine, qui siège dans les sept articulations principales (genoux, coudes, chevilles et colonne vertébrale), les transmet à l'embryon. Le corps, originairement semblable à celui du génie, devient alors celui d'un être humain.

---

(1) Quelques remarques sur les principes spirituels des Bambara (en particulier sur le *dya* et le *nyama*) ont été réunies dans le chapitre intitulé : Théorie des âmes, par TAUXIER. *La Religion Bambara* (p. 14 à 25) où il fait état des travaux de l'abbé Henry et de Ch. Monteil. Une partie des observations consignées dans le chapitre qui suit ont été résumées par l'auteur dans la *Personne chez les Bambara* et dans *Note sur le* tere *chez les Bambara.*

Il convient de rapprocher ces études sur les principes spirituels de celles qui ont été faites chez les Dogon et exposées par M. GRIAULE, S. de GANAY et l'auteur dans *Masques Dogon, les Devises des Dogon, les Ames des Dogon.*

L'octroi par le génie des forces spirituelles s'accomplit lorsque l'homme s'est uni deux fois à son épouse. Si la femme n'accouche que d'un seul enfant, c'est que, lors de la seconde union, l'homme a façonné le double du premier germe et qu'il ne lui a pas été permis de procréer des jumeaux.

Faro dispose de la vie et de la nature de l'enfant. Il décide de tout ce qu'il sera et fera et détermine son destin dès le moment où le germe est mis par lui dans la matrice. Le fœtus se développe ensuite sans modification jusqu'à la parturition, époque à laquelle il recevra les principes spirituels, âme, *ni*, double, *dya* qui seront siens sa vie durant. C'est alors qu'interviennent les rapports internes que chaque individu entretient avec le groupe social auquel il appartient. Si Faro donne à chaque enfant un corps neuf, en revanche il anime ce corps de forces spirituelles puisées au réservoir familial. Le nouveau-né est l'héritier direct du *ni* et du *dya* d'un défunt, précisément de celui qui est mort immédiatement avant sa naissance et quel que soit son sexe (1).

Le décès avait, en effet, pour conséquence de séparer du cadavre les forces qui l'animaient : le *ni* avait été, par des rites appropriés, conservé dans l'autel des ancêtres (2), le *dya* avait quitté le mourant pour se rendre dans l'eau et se mettre sous la garde du Faro. Au moment de l'accouchement tous deux reviennent dans le nouveau-né qui succède au défunt, mais inversés : le *dya* est renvoyé dans le corps de l'enfant et formera son *ni*; le *ni* du défunt vient se mêler aux eaux de l'accouchement répandues sur le sol qui forment l'ombre *(suma)*, qui sera le double, le jumeau (3). S'il s'agit d'un garçon, le *dya* sera femelle; s'il s'agit d'une fille, il sera mâle. Ces mouvements sont indépendants du sexe du défunt, le génie inversant les sexes le cas échéant. Chaque être humain est ainsi à la fois mâle et femelle par son âme et par son double. Cette conception de la nature humaine, fondamentale chez les Bambara, s'exprime dans la symbolique des chiffres; le chiffre sept formé de trois (symbole sexuel mâle) et de quatre (symbole sexuel femelle) représente l'homme complet. De plus et sur un autre plan, le chiffre six est celui des jumeaux mâles, sept celui des jumeaux mixtes (et de l'hermaphrodite), huit celui des jumelles. Un nombre de coups correspondant aux chiffres précités est frappé doucement sur le corps d'un nouveau-né pour appeler son *ni* suivant son sexe.

---

(1) Cependant la réincarnation des principes des défunts n'est pas une règle absolue. Faro est maître d'une infinie réserve d'âmes. Les jumeaux, les albinos et certains enfants naissent pourvus de *ni* et de *dya* non affectés jusque-là et venus respectivement du deuxième ciel *(kaba dye)* et de l'eau *(dyi sumale)*. L'enquête reste à compléter sur ce point particulier.

(2) Groupés par promotions les enfants, les adultes mâles, les femmes forment des sociétés ou institutions religieuses, *dyo*. Chaque *dyo* est dépositaire d'autels qui servent à la conservation des forces spirituelles du groupe (cf. p. 142).

(3) Le sang de l'accouchement représente l'excès du suc de tomate absorbé par la femme, c'est ce qui reste dans la matrice après la formation de l'embryon. Le huitième jour après l'accouchement la mère de la partu-

Le *ni* qui anime le corps est visible, pendant les semaines qui suivent l'accouchement, dans les mouvements de la fontanelle. Il est aussi le souffle, la respiration, le battement des artères. De même que le *dya*, il n'est pas indissolublement lié au corps car il le quitte pendant le sommeil pour se rendre dans le sixième ciel, *sunankaba*. Au réveil il réintègre le corps et le rêve est considéré comme un souvenir de ce qu'il a vu, comme une prémonition d'un événement intéressant l'individu, la famille, le village (1).

Le *dya*, double ou jumeau de l'être humain et de sexe opposé, a un corps, l'ombre sur le sol ou l'image dans l'eau. Il peut se déplacer seul ou peut être contraint de quitter l'être qu'il accompagne sous l'action de Faro : quand un crocodile entraîne ou blesse un homme, par ordre du génie, c'est qu'il a tout d'abord saisi son ombre visible à la surface de l'eau, et son *dya* dans l'eau. Le même effet peut être tenté par un être malfaisant; dans ce dernier cas le contact étroit que maintient le *dya*, en tant qu'ombre avec la terre impure, le rend particulièrement vulnérable. Pour y remédier, l'intéressé se mire dans l'eau d'une calebasse, puis, quand l'image est nette, il la brouille en balançant le récipient, ce qui renvoie le *dya* sous la protection de Faro.

---

riente presse trois ou quatre tomates, suivant le sexe du nouveau-né, dans une calebasse qu'elle remet au père; ce dernier fait consommer à sa femme le suc pour remplacer le sang qu'elle a perdu, considéré comme impur.

(1) Voir des poissons en grand nombre fait présager une pêche fructueuse; dispute signifie guerre; nager en rêve invite à se purifier d'une faute. Le passage de sauterelles d'ouest en est est signe de grande bataille ou de famine. Dans ce dernier cas la chose est si grave que le village est prévenu et que chacun doit faire une offrande à un pauvre en disant : « je fais ce sacrifice d'âme à Dieu pour qu'il me sauve » *(nye nin ye ni sakaka ye ka ngala ma a la ka mbo)*. Le chef du village offre également un sacrifice collectif.

Cette indépendance et cette vulnérabilité du *dya* nécessitent, pour l'exercice de certaines fonctions religieuses, sa prise en charge par Faro pendant la durée du ministère.

Les animaux sauvages ou domestiques sont également animés d'un *ni* et d'un *dya*. Les végétaux ont un *ni*; celui de l'arbre est situé dans les bourgeons et assure sa croissance et sa vie. Celui des céréales nécessaires à la vie des humains fait l'objet de soins constants au cours des rites agraires. Le rôle de l'âme des plantes apparaît notamment dans leur utilisation médicale. Le prélèvement d'un remède sur un végétal peut déterminer sa mort, c'est-à-dire la libération de ses principes spirituels, au profit du malade. De ce fait, un tel acte est assimilé à un sacrifice sanglant.

A l'exception de la tomate *ngoyo*, les végétaux n'ont point de *dya*. L'ombre d'un végétal *suma* n'est pas indépendante comme celle d'un homme ou d'un animal. Elle n'existe que par l'effet de la lumière et ses mouvements lui sont imprimés par l'air et le vent agitant les feuilles et les branches. C'est ce qu'expriment les Bambara en disant que le *dya* a une vie propre qui l'anime et qu'il dépend du Faro, tandis que le *suma* du végétal dépend du génie Téliko, maître de l'air.

On connaît le *dya* d'un individu, on détermine son tempérament et ses possibilités dans la vie, en mesurant son ombre au sol à midi. L'unité employée est l'auriculaire, symbole corporel de la personne. Cette mesure appliquée à une femme enceinte permet de prévoir le sexe de l'enfant.

Lorsqu'un garçon ou une fille se marient, on dit d'eux : *a ye a dya furu* : « il (ou elle) a épousé son *dya* ». Car il est impoli de dire qu'on épouse un autre être que son double spirituel. D'ailleurs l'union des époux est répétée par l'union de leurs *dya* qui sont, comme eux, de sexe opposé. Autrefois deux jumeaux mâles épousaient la même femme : le *dya* de cette dernière était pris en charge par Faro dans le Niger. L'enfant qu'elle concevait était le fils de ses deux maris.

Certains hommes ne se marient pas : ainsi le Soma, devin religieux attaché aux grandes institutions bambara. Initié au cours d'un séjour solitaire en brousse il a laissé son *dya* auprès des génies invisibles. C'est à la fois la condition des dons de double vue octroyés par ceux-ci et une protection contre les dangers que court le *dya* en restant en contact avec la terre, ou en s'approchant des autres humains. Le véritable conjoint du Soma est son *dya* : il ne s'unit qu'avec lui, à date fixe, lorsqu'il lui est renvoyé à cette fin par les génies.

B. — Le *tere* :

Le *tere* fut infligé par Pemba à Mousso Koroni, tandis qu'il la poursuivait, pour diminuer son pouvoir. De ce fait son aspect est complexe : il est à la fois le caractère de l'homme, sa force, sa conscience et la partie de son être, qui, à travers le corps, le rend sensible aux contingences. Si l'homme est vulnérable par son double, c'est son *tere* qu'affecte toute rupture d'interdit, qui reçoit et subit l'impureté.

Siégant dans le sang et dans la tête *(kun tere)*, il se développe dans le fœtus au cours de la gestation; il est composé d'une part de celui des parents, à laquelle vient s'ajouter celui du défunt dont l'enfant a hérité âme et double.

L'aspect du *tere* d'un enfant est déterminé par les vieillards de la famille au cours de la cérémonie de la dation du nom, exécutée publiquement le huitième jour suivant la naissance. Ayant examiné soigneusement la façon dont ses cheveux sont plantés sur le front, dont les sourcils se rejoignent, la forme des yeux où siège l'intelligence, de la bouche, des pieds et des mains, l'un des vieillards présents annonce d'une voix forte les signes révélateurs de son caractère. Leur position permet de dire si l'enfant a un bon ou un mauvais *tere* et de faire des prévisions sur sa vie : une légère calvitie au milieu de la tête en fera un homme riche; un crâne ample et profond un chef. Le vieillard balance ensuite l'enfant en direction des quatre points cardinaux au-dessus des autels de famille et lui donne le prénom *(loko)* du défunt dont il a hérité le *ni* et le *dya*. Une partie des cheveux, rasés peu avant, est ensuite jetée au Niger par le père qui prononce le prénom face au fleuve : ce geste et cette parole ont pour but de confier au génie de l'eau le *tere* et de lui demander sa protection. Le même jour le forgeron trace sur le visage les scarifications qui agissent sur son *tere*, lui donnent force, courage, vertu.

Au fur et à mesure qu'il grandit, certaines particularités physiques de l'enfant sont interprétées comme caractérisant son *tere*. S'il grince des dents en dormant, il attaquera ses parents; s'il saisit souvent son poignet gauche dans sa main droite il ~~sera~~ toujours vainqueur. Une fille qui marche en balançant les mains et les rejetant en arrière, qui soulève de la poussière avec ses pieds en marchant, détruira la fortune de son mari. Certains informateurs déclarent que l'homme a plusieurs *tere* :

celui de sa démarche, de son port de tête, de la forme de ses membres, de ses seins pour une femme (1).

L'homme est considéré comme porteur d'un fort *lere* : du fait qu'il parle, qu'il est instruit, qu'il connaît le bien et le mal, il est responsable de sa vie propre et de celle des siens. Le *lere* est prise de conscience.

Cet aspect fait que seuls les animaux domestiques, dont la vie dépend de l'homme qui assure leur subsistance, sont porteurs de ce principe. Les animaux sauvages « ont une vie dure, aride, il leur faut beaucoup peiner pour se nourrir. Ils n'ont pas à soutenir la charge du *lere* ». Tout ce qui vit indépendamment de l'homme en est dépourvu (2).

Celui des animaux domestiques est moins puissant que celui de l'homme; il est également décelable à des signes extérieurs. Il est par exemple très mauvais chez un cheval qui balance la tête de droite à gauche pendant qu'il est à l'attache : on dit qu'il est *duga fufa* (3). Une telle bête est indésirable dans une demeure dont « il chasse le bonheur et la réussite ». Un animal domestique blessé attaque le responsable avec son *lere*.

Le fait que le *lere* est l'élément de la personne qui subit les conséquences de l'impureté témoigne des liens unissant l'homme au monde extérieur. Le *lere* est perturbé en cas de rupture d'interdit, *tne*. S'il est bon, il quitte l'homme; s'il est mauvais il devient pire. D'autre part la rupture provoque une modification physiologique du sang qui perd sa couleur rouge, devient clair. Elle se traduit par une déperdition de forces, par des maladies affectant les ouvertures du corps : l'homme devient aveugle, sourd-muet. Il peut aussi être paralysé. Généralement il ne meurt pas, mais le mal le poursuit jusqu'à ce qu'il se purifie.

Le *lere*, de plus, se modifie lorsqu'il est détaché de son support normal; il devient alors *nyama*, force qui agit à l'extérieur du corps. Manifeste dans l'acte, le fait est déjà sensible dans l'émission de la parole, porteuse de *nyama* affectant immédiatement celui auquel elle s'adresse. Les conséquences de cette action du verbe sont multiples.

---

(1) Les aspects physiques déterminant le *lere* sont très nombreux. *Cf.* à ce sujet D. Traore. *Le* Tere *chez les Bambara du Ségou*; Notes africaines, janvier 1947, p. 29-31.

(2) Cependant d'après certains informateurs les animaux sauvages seraient également pourvus de plusieurs *lere* des différentes parties du corps. Il semble, que, dans ce cas, le terme désigne surtout des particularités physiques de l'animal et non sa conscience, comme c'est le cas pour l'homme et l'animal domestique.

(3) Littéralement : « balancement du vautour ». Se dit d'un vautour qui descend sur sa proie en balançant sa tête à droite et à gauche pour l'apercevoir.

C'est au moment de la mort que le *lere* est complètement libéré. Transformé en *nyama* qui se dégage du corps, il devient alors une forme très active qui peut, dans certains cas, s'attaquer à celui qu'elle considère comme responsable du décès (1).

Seuls les êtres sacrifiés, hommes ou animaux, les plantes utilisées rituellement ne délèguent jamais de *nyama* dangereux. Leurs principes spirituels et leurs forces sont captés au cours des rites et dirigés sur un support, l'autel, au profit d'une puissance surnaturelle. Il en est de même des animaux domestiques immolés pour la consommation : dans ce cas leurs forces sont réemployées et leur mort, prévue par la règle instaurée par Faro concernant les nourritures, ne cause aucun désordre.

En revanche, le *nyama* des animaux de brousse *(nyama bakâ)* se dégage de leurs cadavres et poursuit le chasseur (2); pour se protéger, il porte un autel, *dõzoboli*, suspendu à l'épaule et dans lequel la force de l'animal est captée au moment de la mort.

Tout individu se trouve donc constamment, au cours de sa vie, en présence de cette force agissante et que libèrent la parole, certains actes et la mort. Il lui faut être à même de parer au danger, entretenir son propre *lere* qui l'aidera s'il est bon, et qui peut au contraire se joindre aux forces adverses et les aider à nuire s'il est néfaste. Aussi un individu essaye-t-il dans ce dernier cas de le modifier en demandant assistance et conseil au devin du Komo. Mais quoi qu'il en soit, chaque individu, qu'il le veuille ou non, supporte les atteintes et la présence de *nyama* nombreux et variés du fait qu'il a détruit des plantes, écrasé des insectes, blessé d'autres êtres vivants. Il est donc à tout moment porteur de forces de vie déplacées induement et qui lui sont étrangères. Bien plus, ces forces se déposent à travers lui, sur ce qu'il touche. Il devient comme le centre d'influences qui exercent en premier lieu leur action sur sa personne et dont il doit tenir compte pour maintenir son intégrité (1).

---

(1) Cet aspect, très visible, mais incomplet du *nyama* est celui sous lequel il a été le plus étudié jusqu'ici. Cf. à ce sujet les ouvrages de l'abbé Henry, Ch. Monteil, H. Labouret, L. Tauxier. Il convient d'ajouter qu'il y a dans le ciel, l'espace, la terre un *nyama* indépendant du *lere;* le caractère de cet élément vital général n'a point encore été complètement dégagé par l'enquête.

(2) Le malade peut être traité de la façon suivante : on jette sur la peau de l'animal sept cauris (ou un multiple de sept) en offrande à titre d'excuse en même temps qu'on donne au coupable autant de coups que de cauris offerts. Puis on fait tremper la peau dans de l'eau avec laquelle on le lave. On l'attache ensuite afin qu'il ne puisse à nouveau se sauver en brousse. Ces diverses opérations sont effectuées autant de fois qu'il est nécessaire et jusqu'à cessation des crises. D'autre part cette purification est exécutée chaque fois que cela est nécessaire, alors qu'elle ne peut être renouvelée en cas de rupture d'interdit.

C. — Le *wanzo* :

Le *wanzo*, force néfaste constituée à l'origine par l'impureté de Mousso Koroni, est dû à la malédiction dont elle fut l'objet après sa trahison et qu'elle communiqua au sol lors de son parcours souterrain. S'étant elle-même mutilée sur Pemba alors qu'elle entretenait avec lui des rapports sexuels, sa jalousie la poussa à se venger sur les femmes qui s'unissaient au *balanza*. Sa folie et son désespoir l'incitèrent à aller jusqu'au bout de sa trahison : elle excisa et circoncit avec ses ongles et ses dents les hommes et les femmes qu'elle rencontra pendant son périple. Le *wanzo* qu'elle transportait avec elle pénétra ainsi le genre humain, rendant l'opération nécessaire pour ceux qui suivraient. Faro n'y peut remédier, mais sa protection est appelée sur chaque enfant pendant l'opération : le bonnet du circoncis représente le ciel et la lumière purificatrice.

Tout enfant, à sa naissance, reçoit le *wanzo* « parole de Mousso Koroni » dans son sang et sur sa peau, au moment du contact avec la terre sur laquelle il naît. Cette force, dite également *kono nyama* « *nyama* de l'intérieur », ne se confond pas avec le *lere*, mais elle est de même nature et se transmet à tout ce que touche le porteur. Elle siège plus particulièrement dans le prépuce chez l'homme, le clitoris chez la femme, et représente dans l'individu le désordre : « elle fait que l'homme ne peut vivre avec personne, ne peut supporter personne et ne peut se supporter lui-même ». De plus elle s'oppose à la fécondité.

Pour devenir un être stable, pour se marier, procréer, sacrifier, l'enfant doit être débarrassé de son *wanzo*. Cet effet est obtenu au cours de la circoncision ou de l'excision et des rites qui terminent la retraite des opérés. La plus grande part de forces s'écoule dans la terre avec le sang de l'organe mutilé. Le reste de la force s'échappe avec la fumée du feu par-dessus lequel les enfants sautent (trois ou quatre fois suivant leur sexe) avant de rentrer dans leur demeure. L'abandon qu'ils font de leurs vêtements à ce moment pour en revêtir de neufs confirme leur nouvel état. Mais le *wanzo* ne disparaît pas : il est capté dans les masques de la société du *ndomo* à laquelle appartiennent les incirconcis (1). De même, lorsqu'un enfant meurt avant d'avoir été circoncis, des rites appropriés ont pour effet de capter le *wanzo* et de le diriger dans le masque pour l'empêcher de nuire (2). Ainsi rien n'est perdu des forces individuelles : le *wanzo* lui-même, néfaste à l'origine, dûment capté et dirigé, sert à consolider les énergies collectives des sociétés enfantines dont il est le fondement.

---

(1) Ce sentiment, très net dans la pensée des Bambara, ne les paralyse cependant pas : la responsabilité n'est grave que dans l'action volontaire de destruction inutile. Dans tous les autres cas, les rites pallient ces inconvénients. Les Bambara sont responsables, mais libres.

C'est seulement lorsqu'un adolescent a perdu son *wanzo* qu'il est admis à se marier : tout individu refuserait d'épouser un partenaire qui n'en aurait pas été complètement débarrassé.

II. — Le corps.

Les Bambara ont de leur corps, du rôle des différentes parties et organes qui le composent, une notion d'autant plus profonde qu'elle est liée à celle des principes spirituels qui l'animent.

En effet, le *lere* est déterminé par certains aspects visibles du corps; le *ni* et le *dya* sont sexués comme lui. C'est dire qu'il convient d'englober dans son étude les liens unissant les éléments spirituels au corps physique pour bien comprendre son état et sa fonction.

Le sang, siège de la vie avec le souffle, est le véhicule des forces physiques et spirituelles qui circulent avec lui dans les veines et les artères. Le sacrifice sanglant les libère et elles alimentent les autels, le sol, les êtres qui les reçoivent. Certaines alliances sont consacrées par échange de sang. La couleur franche du sang est la preuve de sa pureté : toute infraction entraîne sa modification, le fait pâlir. Le sang menstruel, témoignage de l'impureté de Mousso Koroni et de l'infécondité momentanée des femmes, est l'interdit principal des puissances surnaturelles créatrices et protectrices de la vie.

La tête, qui contient la pensée est la partie essentielle et le symbole de l'individu : « la tête des sociétaires » est représentée par un trait au cours des rites exécutés par les membres du Komo ou du Kworé. C'est par elle que l'homme croît comme une plante « pousse par son bourgeon de tête (3) ». On préserve, on purifie la tête de l'homme pour entretenir sa santé et sa prospérité. Siège de la conscience et de la volonté, elle reçoit une partie des scarifications faites à la naissance et qui exercent une action sur la personne.

---

(1) Cf. p. 170.
(2) Cf. p. 199.
(3) Le mythe fait mention de « la tête du *balanza* » au moment de la rup-

Les cheveux contiennent une part importante du *ni* de l'individu. Il est donc dangereux de les mélanger avec ceux d'autrui : c'est créer un lien vital indissoluble entre les deux parties. Les brûler serait attenter à sa propre vie; on les enterre ou on les introduit dans un trou profond du mur de sa maison, à titre de protection (1).

Les cheveux et le système pileux, dont le rôle apparaît dans le mythe, servaient à compter l'âge des hommes primitifs jusqu'à l'apparition de la mort sur la terre. Tous les ancêtres représentés sur les sanctuaires sont barbus et poilus : cet aspect exprime que, devenus mortels, ils vécurent au temps où le rajeunissement n'existait plus.

La pupille est la partie essentielle de l'œil. Son nom, *nyemani*, « petite personne de l'œil (2) », exprime sa fonction. La pupille reflète et absorbe la personne qu'elle voit : l'image est une sorte de double, de réplique de l'être vu, que celui qui regarde reçoit et conserve à l'aide de l'appareil enregistreur qu'est son œil. C'est avec les yeux que Faro inscrit, dans sa mémoire, le compte des êtres qui sont sous sa domination. C'est par les yeux, comme par le sexe, que la femme s'unit à son mari pendant l'acte sexuel. C'est tout d'abord l'œil qui est atteint dans l'individu en rupture d'interdit : ce dernier en souffre ou devient aveugle suivant le degré de la faute.

Le nez est le canal du souffle de l'homme, de sa respiration *ni na kle* (litt. : âme (qui) monte et descend), terme décrivant le mouvement même de la vie. Ce souffle a pour siège le plexus solaire, *kwa nye*, « œil de la poitrine », dit également *ni dyuru ba* « grande corde de l'âme ». Faro, lorsqu'il est décidé à reprendre la vie d'un homme, l'entraîne dans l'eau et renvoie son cadavre, nez et nombril coupés; la mutilation du nez rappelle que, maître

---

ture d'interdit par les hommes qui coupèrent ses bourgeons (cf. p. 23). Les autels des champs et des sociétés de culture, *lŏ*, veillent sur « la tête du mil ».

(1) Nombre de charmes et sortilèges sont à base de cheveux. Pour être aimé d'une femme, on mélange ses cheveux avec les siens et on les place sous sa tête la nuit avec une prière. Pour garder sa situation un employé fait de même avec ses cheveux et ceux de son chef; il sacrifie sur l'ensemble une victime; le chef ne pourra le licencier sans risque grave pour sa vie.

(2) La pupille de l'homme, d'après une information encore obscure, aurait été faite avec celle du serpent et serait appelée aussi *nye mani sa*, « serpent de la petite personne de l'œil ».

de la vie du coupable, il la lui enlève en lui retirant le souffle.

La bouche et la langue interviennent dans tous les rites et symboles concernant la personne. La voix est « dans la gorge » mais c'est avec la bouche que l'homme parle. La parole est créatrice, elle est acte, elle transporte une force, *nyama*, qui siège dans la bouche, imprègne la langue et la salive, et se transmet à tout ce qu'elle atteint. Elle est le verbe de Faro passant par la bouche, verbe reçu dans la souffrance, aux temps mythiques, et qui intègre le genre humain à l'ordre nouveau établi dans la création.

Son organe est la langue qui, représentée sur les objets rituels, la symbolise (1). Le véhicule est la salive : cracher, c'est donner sa parole, c'est déférer un serment. Les vieillards crachent sur les graines, après avoir promis une offrande au Komo; le sacrificateur avant la libation crache sur l'autel des noix de kola qu'il a préalablement mâchées. Les conjoints crachent leur serment de mariage. La force de la bouche trouve son maximum d'expression dans la récitation de la devise par le griot (2).

A l'importance de la bouche et de la langue émettrices du verbe correspond celle de l'oreille réceptive. C'est par elle que l'homme reçoit et retient la parole. Son rôle est assimilé à celui des sexes émetteurs et récepteurs de vie; elle est elle-même un sexe double : mâle par le pavillon, femelle par l'orifice, cette dualité exprimant la gemelléité fondamentale de l'homme. C'est pourquoi le cadavre d'un incirconcis est parfois amputé de l'oreille à défaut du prépuce.

C'est à cause du symbolisme de sa forme et à cause de sa fonction que l'oreille est parée. Les hommes portaient autrefois trois anneaux de cuivre à l'oreille droite et quatre à l'oreille gauche, le chiffre sept représentant l'être complet, mâle et femelle, *ni* et *dya*. Les femmes portent quatre boucles à chaque pavillon, ou, si elles le peuvent, vingt-deux, qui représentent les vingt-deux étapes de la création, les vingt-deux catégories génératrices. Parfois, pour tous deux, un seul anneau fixé au lobe représente la mère des autres boucles (3).

Mais le rôle de cette parure se prolonge : symbole de la parole, c'est par elle que le génie Téliko, maître du son, entend ce qui

(1) Les prières récitées au cours des rites d'initiation font allusion au *nyama* redoutable de la langue des initiés.

(2) Cf. p. 78.

(3) Autrefois, hommes et femmes portaient aux oreilles des cauris à la place d'anneaux de cuivre, coutume qui est encore, paraît-il respectée dans certains villages; ces cauris jouaient le même rôle que le cuivre.

est dit à l'homme. Elle attire le son, le renvoie à Téliko et Faro qui jugent ainsi des paroles et des actes des hommes. Mettre des anneaux d'oreille n'est point, à l'origine, se parer, mais à la fois ouïr et contraindre les génies à entendre ce qui est dit (1). C'est aussi, par effet second, gêner le menteur, le porteur de fausses nouvelles ou de mauvaises paroles en le mettant dans l'obligation d'être compris des invisibles, donc d'être jugé par eux. Une parole aimable ou bienveillante profite à celui auquel elle s'adresse et ce bien est senti comme un apport de *nyama* bénéfique. « Le génie Téliko change l'air émis par le parleur en *nyama* favorable; à l'ouïe d'une bonne parole, il faudrait se boucher les oreilles pour que ce *nyama* ne puisse quitter celui qui l'a reçu. » De plus, ouvrir grand les yeux en regardant celui qui parle « permet à son *nyama* de pénétrer le corps de l'entendeur » et de s'y répandre en flux vivifiant. Dans le même temps, le bon verbe imprègne l'air, favorisant le mouvement de la respiration, donc la vie de celui qui écoute. « On respire, dit l'informateur, avec le *nyama* des paroles entrées par les yeux et par les oreilles. » Mais cet effet n'est pas unilatéral; le bon *nyama* revient au parleur par ses propres yeux tandis qu'il regarde l'autre. Il se reflète dans l'interlocuteur et tout se passe comme s'il s'adressait à lui-même. Il y a là échange bénéfique même lorsqu'un seul des deux acteurs parle.

Inversement, une mauvaise parole ou une injure bouleverse l'entendeur et par contrecoup agit sur l'insulteur. Cette économie résume précisément et puissamment le mouvement universel, principe de vie et de force pour tous les êtres, mouvement individuel provoqué par le verbe qui agit sur le corps en développant et régularisant le rythme de la respiration, mouvement collectif déclenché par retour de ce verbe au parleur. Par l'effet de la parole émise s'instituèrent des échanges favorables au jeu des souffles individuels comme à l'équilibre de la vie universelle. Cet effet n'est pas limité aux paroles *stricto sensu* : la vue jouit des mêmes prérogatives que l'audition et la diction. Si un objet appartenant à un homme est vu et désiré par un autre, le propriétaire ne peut le lui refuser : la vue seule a établi entre l'étranger et l'objet un lien qui est affectivement senti comme plus fort que le droit de propriété.

Les parties articulées du corps humain ne sont pas moins chargées de sens que la tête. Les os, plus durables que les parties molles, témoins dans la tombe de la vie passée, en sont le fondement et l'armature.

---

(1) Les anneaux placés sur les instruments de musique ont le même but et représentent aussi ceux qui sont portés par les hommes. Cf. p. 221.

Le nombril est le nœud des articulations : c'est pourquoi Faro lorsqu'il noie un individu, renvoie le corps après en avoir tranché le nez et le nombril; ces deux mutilations démontrent qu'il a repris la tête et le corps du coupable. Les articulations sont le signe de la condition de l'homme dans l'ordre nouveau : autrefois immortel aux membres lisses, il est devenu mortel et travailleur. Sièges de la semence masculine, elles transmettent cette condition à l'embryon formé dans le sein maternel par Faro. La fatigue ressentie dans les membres après l'acte sexuel est la preuve de cette transmission. Lieu de la semence virile, charpente de l'homme, mécanisme propre au travail physique, les articulations sont aussi le symbole de la société : le siège du chef, à forme géniculée, est l'image du corps articulé de son propriétaire, comme de l'armature du corps social et du jointement des individus qu'il tient sous sa juridiction (1).

Les membres matérialisent la droite et la gauche. Sont « droites » la rectitude, la fermeté, l'action dirigée. Sont « gauches » l'incertitude, l'esprit d'indécision, la variation dans la conduite. La droite est mâle; elle symbolise le travail de l'homme; l'autre est femelle. Tous les gestes, profanes et religieux, les représentations de toutes sortes sur les objets en témoignent. Aux premières façons données aux champs, avant les pluies, le cultivateur donne trois coups de houe avec la main gauche, pour absorber l'impureté de la terre. Il travaille ensuite jusqu'aux récoltes de sa main droite. Croiser les mains a sens de supplication, les mettre au dos a sens d'humiliation.

Les doigts ont chacun une valeur. L'auriculaire, *bolokoni lakare* est « le fils des autres doigts » et recèle la force entière de la main; il « porte le *nyama* des doigts ». De là son emploi comme mesure divinatoire. Désigner quelqu'un avec l'auriculaire, le plus petit des doigts, revient à l'abaisser par rapport aux assistants. Pour la même raison c'est avec l'auriculaire qu'est jeté le sort *(korli)* contre un ennemi ou un indésirable.

L'index et le pouce d'un chef, comme autrefois ceux d'un roi, reçoivent dans certaines occasions des signes dits *bolo ti doniya* « connaissance des signes de la main ». Sur l'index sont dessinés trois « actes du monde d'aujourd'hui » *(bi dyè walew)* et sur le pouce deux « choses de l'intérieur du monde secret » *(dyè gundo kono fẽw)*. Car on dit que « la connaissance des signes de la main est le chemin de la création 5, l'index est le monde en 3, le pouce est le monde nouveau (1) ». L'ensemble représente les mondes pensés par *yo* et dont le premier, seul, est réalisé (2).

---

(1) Cf. p. 134.

Sur un autre plan les signes du pouce se rapportent aux pouvoirs, ceux de l'index aux domaines royaux (fig. 1, n° 8 à 12) :

1° Signe zéro *(fu)* représentant le début de la création, l'origine de toutes choses. Un segment courbe étendu de gauche à droite connote la dynamique de l'univers. Il est coupé par un signe de multiplication exprimant le développement infini des êtres et des choses. Mais le trait vertical qui le barre sur la gauche marque à la fois l'arrêt et la suppression de l'ensemble (n° 11).

2° Signe de la foudre. Il exprime la puissance et la justice royales et se trace sous la bague de pouce du roi. Celui-ci, quand il donnait un ordre, balançait sa main, ce qui revenait à balancer la foudre devant les interlocuteurs (n° 12).

3° Signe du domaine royal. Son ouverture affirme l'extension possible du royaume; la barre transversale est une protection de ce royaume contre toute destruction (n° 8).

4° Signe de l'extension de ce domaine aux trois côtés cardinaux : est, ouest et sud (n° 9).

5° Signe de l'union. L'ovale représente l'ensemble des fonctionnaires dits *tõdyõ* et *barodẽ*, officiers et conseillers qui, sous l'autorité du roi, administraient le royaume (n° 10).

Les pieds étant constamment en contact avec le sol, se chargent de son impureté. Un individu ayant procédé à des purifications sévères devra éviter, pendant un laps de temps parfois très long de mettre les pieds à terre, car « poser au sol les orteils c'est mettre l'âme en contact avec le sol impur (3) ». C'est aussi par les pieds qu'une part de la force de l'homme se dépose dans les balayures et détritus qu'il foule, réceptacles dont le rôle apparaît dans les rites relatifs aux ordures ménagères et à celles des voies de communication.

Comme l'auriculaire, le petit orteil symbolise la personne entière : il est parfois orné d'un anneau d'argent, symbole du verbe, qui rappelle que le corps de l'homme est le siège de la parole, répandue en lui de la tête aux pieds (4).

La notion de la bisexualité de l'être est fondamentale : les principes spirituels sont sexués comme le corps, dont l'ambivalence est flagrante pendant l'enfance : le garçon est féminin dans son prépuce, la fille est mâle dans son clitoris. L'un des buts de la circoncision et de l'excision est de promouvoir l'enfant dans le sexe auquel il est apparemment destiné en supprimant l'organe du sexe opposé (1). Mais la dualité initiale de l'âme et du corps est le fondement même de l'être : il n'est complet que s'il l'a originairement reçue et il la conserve même après l'opération imposée par la vie physique et sociale, car l'âme de sexe opposé, diminuée dans le corps, reste présente dans l'ombre, le *dya*. Il retrouve aussi son unité gémellaire lorsqu'il se marie : les époux ne font qu'un, leur *dya* se joignant comme leurs corps dans un acte qui n'est pas seulement physique et qui réalise l'union idéale des jumeaux.

---

(1) *bolo li doniya ye dali duru sira ye, bolokoni kumba dãɔɔ ye dyẽ saba gundo ye, tyemasa bolokoni ye dyẽ kura ye.*

(2) Sur les mondes pensés par *yo*, cf. p. 8 à 10.

(3) L'invention de la chaussure est liée mythiquement à la notion de l'impureté du sol : il s'agit pour le porteur d'éviter ce contact.

(4) Autrefois l'anneau du petit orteil était fait de fibre rouge de *nyama (nyama fu)*, qui jouait le même rôle que le métal.

L'appartenance sexuelle domine toute l'existence terrestre de l'être humain : les objets, les outils portent les marques féminines ou masculines, selon les règles de la division du travail; les chiffres trois (l'homme) et quatre (la femme) sont des raccourcis du sexe. Les « hommes primitifs », qui, dans l'idée des Bambara, s'exprimaient surtout par gestes et par signes gravèrent leurs rares objets du nombre de traits ou de points se rapportant au sexe des usagers. Ainsi les femmes marquèrent de quatre traits leurs fuseaux tandis que les hommes bobinaient trois fils sur leurs navettes.

Sur le plan métaphysique, il y a identité du corps de l'homme « grain du monde » et de la graine de céréale. Les Bambara distinguent dans celle-ci sept parties qui correspondent à une division en sept groupes des organes humains (2). Homme et grain sont consubstanciels. D'autre part les nourritures de base c'est-à-dire les huit céréales principales sont symboliquement présentes dans les clavicules *(kolõ kalanfiri,* ou *kã kolo) :* l'homme porte en lui ses subsistances dont la situation reflète la situation générale de la personne (3). Témoins de l'intégrité spirituelle de l'homme, ces grains le quittent lorsqu'il est en état d'impureté. Il est alors vidé de sa substance et de sa subsistance. La purification a pour but le rétablissement de cette intégrité.

---

(1) Même conception chez les Dogon; cf. M. Griaule, *Dieu d'eau*, p. 185.

(2) Les divisions de la graine sont les suivantes : *kungu* « petite barbe du mil », involucre; *fara dye,* « écorce blanche », glumes et glumelles; *fara fi*, « écorce noire », son et écorce protéique; *fara mugu*, « écorce farineuse » (qui correspond à une zone laiteuse diastasique); *mugu dunla*, « farine à manger », amidon; *kolo dye*, « os blanc », embryon; *kise dẽ*, « fils du grain », microhyle par où sort la radicule au moment de la germination. La classification des organes par rapport à ces divisions est à l'étude. Nous remercions M. Pitot, de l'Institut Français d'Afrique Noire pour l'identification des parties du grain correspondant aux divisions indigènes. Dans certains villages, les grains sont soumis à cette décortication et seuls des éléments déterminés sont utilisés dans la composition de la bouillie de mil offerte rituellement.

(3) Cf. p. 30, n. 2.

De plus, les liens qui unissent au cosmos la personne entière, corps et principes spirituels, sont mis en lumière par le fait que la vie de l'homme passe par sept âges successifs correspondant aux sept cieux, aux sept terres, aux sept eaux, aux sept stades de la croissance du mil, et qui sont : *bilakoro* « incirconcis »; *kemĕkoro* « circoncis de la dernière promotion »; *tyebalĕ*, litt. : homme grand; *maselĕ*, litt. : personne arrivée; *makoroba*, litt. : personne âgée; *maderelĕ*, litt. : personne qui ne peut arriver, vieillard; *mabalĕ*, vieillard impotent.

De plus, ces liens sont confirmés annuellement pour tous au cours de rites dits « de renouvellement de l'année ». En renouvelant les points cardinaux les Bambara revigorent la force de ces pôles d'attraction grâce à laquelle se maintiennent les choses en elles-mêmes et les unes par rapport aux autres. Dans le même temps, ils procèdent, du dernier au plus ancien, à un « rafraîchissement du corps et de l'âme ». Ils prennent, pour l'année à venir, un souffle frais, une vie neuve dont le support corporel est lui-même soumis à des purifications externes et internes qui le rendent aptes à remplir son rôle.

III. — EFFETS DE LA MORT SUR LA PERSONNE.

La mort a pour premier effet de dissocier les éléments composant la personne. Les pratiques religieuses, tout imprégnées du respect qu'ils inspirent, ont pour but de régler leur conservation de sorte qu'ils ne soient point perdus pour le défunt, pour la société, pour Faro enfin qui détient la vie et assure la pérennité des âmes.

Le *dya* reste dans l'eau où il sera gardé jusqu'à la naissance d'un enfant. Mais le *ni*, qui s'échappe du corps avec le dernier souffle, est guetté par le chef de famille qui le capte et le transporte dans un autel. Il viendra, nous l'avons vu plus haut, animer le *dya* de l'enfant qui héritera des principes du mort, laissant derrière lui, dans l'autel, une sorte d'exuvie, *mana* ou *folo*, témoignage du passage du disparu.

Le *tere* se transforme à la mort : libéré de son support, il devient *nyama* qui s'échappe et peut parfois s'attaquer aux vivants. La peur provoquée par la vue d'un cadavre est la preuve de son action. Il semble que le complexe force-caractère du *lere* se trouve exprimé par l'activité du *nyama;* mais il n'est réellement dangereux que lors d'une mort violente (meurtre d'un homme ou d'un animal). Dans ce cas, le *nyama* s'attaque au responsable. La mort est-elle naturelle, le *nyama*, comme le *ni*, est dirigé par la parenté et déposé au cours des rites funéraires dans l'autel de famille *(pembele)* où il rejoint les forces ancestrales; leur amalgame forme un tout dont la puissance est utilisée à des fins bénéfiques par le groupe détenteur au cours des rites saisonniers.

Le corps est enterré; il « appartient aux termites » et il n'en restera finalement que les os, témoins de la vie physique auxquels on rend hommage à ce titre; ils sont parfois extraits de la tombe, examinés, priés, avant la remise en place.

Lorsqu'une naissance a lieu dans la famille, le nouveau-né ayant hérité le *ni* et le *dya* du défunt reçoit son *nyama* conservé dans le *pembele* et son prénom, *loko*. Car un être en remplace un autre, utilisant les mêmes forces indéfiniment réemployables. La vie se transmet, intacte; non seulement elle n'est pas diminuée par la mort, mais le séjour du *dya* dans la demeure de Faro est conçu comme un « rafraîchissement », une purification désirable et bienfaisante; de même le passage du *ni* dans les autels familiaux provoque un rajeunissement.

Dans les autels et dans les tombes, « exuvies et ossements comptés et classés par Faro », témoins valables pour l'éternité, serviront à maintenir jusqu'à la résurrection finale l'intégrité de l'ensemble des vivants et des morts.

IV. — ATTRIBUTS DE LA PERSONNE

Le nom :

L'organisation de la famille indivise bambara a déjà fait l'objet de travaux descriptifs (1). Il n'entre pas dans le cadre de cette étude de l'exposer à nouveau. Il convient cependant d'y faire allusion, certains éléments comme le nom de famille, les devises, l'interdit et les relations de parenté dites « à plaisanteries » se rapportant aux composantes de la personne.

Socialement, la personne est située tout d'abord par le prénom *loko*, que portait l'ascendant donateur du *ni* et du *dya*, ou tout autre de la ligne paternelle ou maternelle. Le prénom marque l'appartenance à un groupe familial en même temps que l'individualité. Il est accompagné du nom de famille *(dyamu)* du père, dont l'origine et l'étymologie sont souvent associées à un fait historique (1). Les plus connus des noms découleraient de ceux que portaient les familles mythiques (2). D'autre part, il convient de remarquer qu'un *dyamu*, qui s'applique à un grand nombre de familles indivises vivant sur des territoires divers, n'est pas toujours réservé à ces seuls groupes bambara. Le *dyama* Kouloubali, par exemple, appartient aussi à des Somono et à des Forgerons. C'est dire qu'un *dyamu* est attribué non seulement à une famille *lato sensu* mais à des gens n'entretenant apparemment avec elle aucun rapport de parenté. Un autre fait typique ne nous permet pas de donner au nom de famille le sens qu'il a dans nos sociétés : un individu change de nom lorsqu'il s'expatrie. Un Dogon devient Keyta lorsqu'il va vivre au Mandé. Un Traoré bambara, s'il se rend au pays des Wolof, devient un Diop (3). Enfin, il arrive qu'une famille importante ait plusieurs noms et devises.

---

(1) Notamment Ch. MONTEIL. *Les Empires du Mali;* H. LABOURET. *Les Manding et leur langue.*

L'attribution du nom confère à celui qui le porte l'obligation de respecter un interdit *(tne* ou *tana)*. Il ne doit ni tuer, ni surtout manger l'animal ou le végétal qui en fait l'objet, toute infraction à cette règle porte atteinte à son intégrité physique et spirituelle.

D'autre part, des relations nommées communément « parentés à plaisanteries » sont établies entre des familles respectant des interdictions et portant des noms différents; l'un des aspects caractéristiques de cette sorte d'alliance est le fait que les membres de l'une des familles, sont habilités à exécuter pour les membres de l'autre les rites de purification en cas de rupture d'interdit.

Les contes relatant l'origine des noms de famille sont bien connus et il en existe toujours plusieurs versions qui ont été publiées pour les principales familles (4). Certains d'entre eux font apparaître non seulement l'histoire du chef de famille, premier nommé, mais en même temps l'origine de l'interdit attaché au nom ou celle des relations de parenté observées par les porteurs avec les membres d'une autre famille.

---

(1) Sur l'aspect historique du *dyamu*, cf. P. Humblot. *Du nom propre et des appellations chez les Malinké*. M. Delafosse. *Des soi-disant clans totémiques de l'Afrique occidentale*. Ch. Monteil. *Les Empires du Mali*.

(2) Le mythe bambara fait allusion aux noms de famille qui furent déterminés par Faro lorsqu'il classa les êtres et les choses. On dit couramment de cet événement: « Quand le Faro a voyagé, il a brisé l'appui de Mousso Koroni et l'accord au sujet des noms a été fait par lui » *(faro tama na muso koroni figi kari la, dyama dyamy ko la dili kera faro fę)*.

(3) L'enquête reste à faire sur ce point très important de l'organisation sociale des Soudanais.

(4) Cf. entre autres L. Tauxier. *La Religion bambara*, p. 119 et ss.

A cet égard, l'une des versions concernant les Kouloubali est des plus suggestives :

« Les Kouloubali descendent d'une famille dite *kuludyu* qui vivait dans un village souterrain au lieu dit *kuluba* (litt. : grande montagne) au Mandé. Une famine qui durait depuis cinquante-deux ans, s'était abattue sur la région; les gens ne savaient que faire et mangeaient les feuilles des arbres pour ne point mourir.

Deux amis, nommés *Konyo* (litt. : mariage) et *Mbaduṅ* (litt. : je mange) étant sortis de leurs habitations, tentèrent un voyage pour trouver de la nourriture. Ils rencontrèrent trois hommes et décidèrent d'agir en commun pour sortir de cette pénible situation. Revenant au village, les nouveaux venus, voyant des excréments d'hyène, plaisantèrent leur couleur blanche : « Vous ne mangiez, dirent-ils, que des os. » « Mais non, répondirent en riant les deux autres, ce sont les excréments de l'hyène. » Et ils demandèrent à leurs nouveaux amis leur nom, ajoutant qu'eux-mêmes n'en avaient pas.

Tous ensemble cherchèrent alors à faire du feu. Une nuit, ils remarquèrent une flamme sortant apparemment des branches d'un kapokier. L'arbre était placé près d'un rocher et le vent, faisant frotter vivement la branche contre la pierre, déterminait des étincelles qui enflammaient le kapok. Ils frottèrent alors deux morceaux de bois l'un contre l'autre et obtinrent du feu qu'ils entretinrent ensuite pendant six mois. Ils conservèrent jalousement leur secret et les hommes dont certains ignoraient le feu et faisaient encore sécher leur viande au soleil vinrent leur demander des braises, leur donnant en échange du mil, du sel et des animaux domestiques. Ils leur donnèrent aussi leurs filles en mariage. L'un d'eux, appartenant à la famille Diara, leur demanda leur nom de famille. Et comme ils répondaient qu'ils n'en avaient pas. « Qu'à cela ne tienne, répliqua-t-il, vous habiterez une grande montagne, prenez le nom de Kouloubali. » Ils leur demandèrent ensuite le nom de leur allié *senānku*. « Nous n'en avons pas, dirent les nouveaux hommes, mais nous vivons depuis cette famine avec des amis. »

Ils décidèrent alors de fêter le mariage de Konyo avec la fille de Diara et la nouvelle alliance *(seninkuya)* conclue entre les deux familles. Plus tard, d'autres membres de la famille Diara vinrent habiter avec eux; un village prospère se créa là où vivaient les Kouloubali.

Leur nombre s'étant accru, les hommes résolurent de partir en guerre pour gagner d'autres terres cultivables. Ils vainquirent les Toucouleurs de la région de Ségou et finirent par prendre la ville où ils entrèrent en triomphateurs.

L'une des phrases de leur devise : *kulubali kulu dyā tasuma*

« Kouloubali du feu de la grande montagne » rappelle à la fois leur origine territoriale et celle de leur fortune.

La devise :

Au nom est généralement attachée une devise, *barama*, dont l'énoncé est le type même de l'émission efficace (1). Le trajet effectué à l'intérieur de l'individu qui l'entend, son effet sur lui et l'effet de retour sur le récitant, se développent selon un mécanisme connu.

Le *barama*, mot que l'on peut traduire par encouragement, éloge, flatterie, est un récit généralement poétique, relatant l'origine du nom, et les hauts faits des ancêtres (2).

Ainsi l'un des éléments de la devise des Diara témoigne du rôle de leurs aïeux :

« Diara, Zan de Nyaola, Yayiri de Nyaola, ton grand-père, a courbé le monde comme une faucille, l'a redressé comme un chemin net; petit-fils de Dieu sur terre, Diara (3)! »

Un autre élément exalte leur courage au combat :

« Diara, Koné; s'il n'y a pas un Koné parmi les guerriers, qui vont se battre, la troupe est battue (d'avance). Le lion a brisé un grand os (4). »

La devise des Tangara rappelle aussi leur histoire et leurs victoires :

« Descendants de Falé, Kwonda, Méné; d'autres braves ont acheté le droit de s'asseoir au village; nous, braves, nous l'avons gagné avec le carquois et les flèches (5). »

De plus la devise comporte également l'énoncé de la généalogie du porteur, *burudyu* (6). Dire cette généalogie « attaque les ancêtres ». Parler d'eux, les citer, raconter leurs hauts faits, les honore et les rend propices. Au cours de la récitation « l'air émis par le parleur » se transforme par le pouvoir du génie Téliko, en fraîcheur qui pénètre les ancêtres (1). Il en est de même pour les puissances surnaturelles. Dès que le chef du Komo récite le *burudyu* de Faro, « l'air sortant de la bouche du chef, se transforme en bon *nyama* qui pénètre le corps de Faro par les pupilles et les oreilles ».

---

(1) Nous renvoyons le lecteur à l'ouvrage de Mme Solange de GANAY, *Les Devises des Dogon*, dans lequel cette importante institution a été longuement étudiée et commentée. Les caractères des devises bambara sont très comparables. Sans aborder le problème dans son ensemble, il convenait de préciser l'effet de ces dernières sur la personne, dans l'idée du Bambara.

(2) La devise n'est généralement connue dans son ensemble que par les griots mais certaines parties, certaines phrases traditionnelles connues de tous, servent à saluer son propriétaire.

(3) *dyara, nyaola zã, nyaola yayiri, i moke ye ka dyẽ kuru i ko woloso ka forti i ko sira tike nindye; duguma ngala modẽ, dyara. Nyaola* est un village. Le nom de Zan est toujours donné au fils aîné d'une famille. Le mot *dyara* signifie aussi lion.

(4) *dyara, kone, kone če kele te kele min oye fele ye; dyara ye kolo ba kari.* Koné est un autre *dyamu* des Diara. *fele* se dit d'un groupe d'hommes réunis pour la chasse et la guerre.

(5) *fale kwonda mene šiw, tow bomaw ye dugu sã ka sigi, aw bemaw ya soro ni to ani kala.* Falé, Kwohda et Méné sont des noms d'ancêtres. La devise est celle des Tangara du village de Barbé.

(6) On emploie le mot *ši* qui signifie race, pour désigner le *burudyu*, lequel est assimilable au *dambe* des Peuls de Mopti.

Dire à un homme son *burudyu* c'est l'honorer grandement. Il pense à ses aïeux, à leur fortune et à leur gloire, il est fier de descendre d'eux et il est incité à faire autant et mieux qu'eux. L'effet de la « bonne parole » décrit plus haut est dû à l'action indirecte mais puissante des ancêtres (2). La récitation par un tiers a pour effet d'entretenir l'individu dans son être, de l'y faire persévérer en l'affirmant (3) car la devise s'adresse à l'âme, *ni*, de son possesseur. Si à ce moment le flatté est dans un état normal, sa devise lui fait « gonfler l'âme et durcir le corps, l'incite à l'action courageuse, à la joie ». Dans le cas contraire, la colère ou l'émotion font place au contentement et au calme.

Le récitant reçoit en retour la force de cette parole bénéfique qui, ayant contenté le destinataire, le contente aussi. Il y a échange de *nyama* : celui que le récitant envoie et celui qu'il reçoit en retour et dont il profite.

C'est pourquoi la récitation de la devise n'est pas toujours laissée au gré de chacun. Elle est devenue, du fait de son importance, une fonction publique réservée généralement aux griots, *dyeliw*, qui forment une caste pratiquant l'endogamie et dont le gagne-pain consiste à réciter contre paiement les devises et les flatteries dans la vie courante comme au cours des cérémonies religieuses ou publiques (4). Mais le fait de recevoir un salaire pour ce service porte atteinte à leur dignité : nul autre ne les déclame pour ne point être pris pour un griot, nul ne se marie avec lui. Le griot est à la fois nécessaire, craint et méprisé; le mécanisme des forces mises en mouvement par son action permet de comprendre l'ambivalence des sentiments dont il est l'objet.

---

(1) *teliko ba sumaya se u ma* « Teliko fait arriver à eux la fraîcheur ».

(2) L'âme *(ni)* des ancêtres cités n'est cependant pas appelée ni déplacée par la récitation. C'est la force vitale *nyama*, qui est ici mise en mouvement.

(3) Cet effet est déjà obtenu par la simple répétition du nom de famille dont on salue un homme en le rencontrant; on entend couramment les Noirs se saluer en se répétant plusieurs fois leur *dyamu*.

(4) Cette récitation effectuée par un autre homme que le griot serait loin de produire le même effet.

Quand les paroles sortent de la bouche, le *tere* du griot se transforme en *nyama*, qui se remplit d'une force dite *kuma nyamu*, « *nyama* des paroles ». Celui-ci passe de la tête dans la bouche du parleur et atteint l'interpelé. Si un homme est riche et puissant, on dit qu'il a le « *nyama* de la bouche des griots qui le flattent ». Il est alors contraint de leur payer leurs encouragements. Sinon, lorsque ces derniers passent devant sa porte, ils ne disent plus rien et le vident ainsi de son *nyama* : l'homme maigrit et s'appauvrit. Avec de mauvaises paroles, les griots peuvent provoquer sa mort, leur *nyama* attaquant le cœur, la poitrine, puis le corps tout entier de la victime.

Ce pouvoir du griot sur celui qu'il flatte se complique et varie suivant ce qu'il récite. S'il déclame plusieurs fois le *burudyu*, s'il parle longtemps des ancêtres, leur *nyama* vient dans sa bouche et s'ajoute au sien propre, renforçant ainsi la puissance de la parole. Ainsi lorsque le griot récite un *barama* sans recevoir de paiement, son *nyama* attaque l'interpelé. En cas de récidive et si le *burudyu* est déclamé, l'homme est contraint de payer s'il ne veut pas être attaqué par le *nyama*, beaucoup plus redoutable encore, des ancêtres.

Dans ces divers cas, le *tere* du flatté intervient : s'il est bon il lutte pour défendre l'homme, mais s'il est faible ou mauvais, il se joint aux forces ancestrales et l'homme est doublement atteint.

La récitation est toujours faite par le griot devant témoin pour que son action soit plus contraignante et fasse perdre la face à l'avare. En contrepartie, un homme qui paie largement le griot est servi par ce dernier qui chante en tous lieux sa générosité et proclame la somme reçue, dont il ne craint pas d'ailleurs d'exagérer le montant s'il espère en tirer profit (1).

La devise est récitée dans de nombreuses circonstances. Après la naissance, les griots la proclament au cours de la cérémonie de la dation du nom, en s'adressant au père puis au nouveau-né qui la reçoit ainsi pour la première fois. Au mariage on déclame alternativement les *barama* des deux conjoints. Dans la vie courante, la récitation est effectuée le plus souvent pendant les cérémonies religieuses ou les fêtes. A la chasse ou à la guerre, elle a pour effet d'aider les acteurs et d'augmenter leur courage (1). Dans une assemblée, pour saluer les gens d'un même nom, on le leur répète et, si l'on veut particulièrement flatter l'un des assistants, on récite les premiers mots de sa devise.

---

(1) Si le griot sait que l'homme riche auquel il s'adresse est avare il se frotte les dents avec des racines dont il connaît le pouvoir pour rendre sa parole plus efficace encore.

Il arrive qu'un homme s'accorde en secret avec le griot pour se faire valoir. Il lui remet publiquement une somme considérable dont le griot lui rend le lendemain une part convenue. Le don est si généreux qu'il ne peut être dépassé.

Cette pratique s'observe notamment au moment du mariage : les hommes de la promotion du conjoint cherchant à se surpasser l'un l'autre par leurs dons au griot. Celui qui a le plus donné passe pour le plus généreux. Il arrive que le griot, même s'il ne connaît pas la devise, invente sur l'heure un nouveau *barama*.

A un malade, l'allié *(senãnku)* (2) vient dire son *barama* pour l'encourager et l'aider à guérir. S'il est mourant, cette récitation, qui est alors l'équivalent d'une prière, peut faire revenir son âme. Après le décès, l'allié, les griots, les forgerons viennent près du cadavre réciter son *barama* pour l'honorer.

Les devises de métiers se donnent à l'artisan que l'on vient voir; ainsi le forgeron à qui on apporte du travail est salué d'abord par son nom auquel on ajoute :

ini fara ani goni : « tu es avec la pierre et le feu ».

En traversant un champ on dit au cultivateur penché sur la terre : *i ni tye i ba ka kusebe daba*, « salut à qui manie bien la houe » ou simplement : *i ni tye daba la*, « salut à celui qui est avec la houe »; on dit au cordonnier : *bana ani ba golo* « (tu es) avec l'acacia (3) et le cuir de chèvre ».

L'institution de la devise, avec tous les développements qu'elle comporte a pour effet de confirmer les êtres dans leurs corps, leurs principes spirituels et leurs appartenances sociales. A l'exception des cas d'émigration cités plus haut, rares sont ceux qui obligent un individu à changer de nom ou de devise au cours de la vie : même mariée, une femme conserve le *barama* de son père.

Un bâtard ne reçoit ni le nom ni les devises de sa famille : on peut plus tard les lui donner si son père se fait connaître. Un Bambara qui se mésallie, par exemple, en épousant une fille de forgeron ou de griot, met au monde des enfants impurs qui n'auront jamais droit au *barama* de leur père (4).

Il faut ajouter que l'attribution des devises n'est pas limitée à la personne humaine : tous les êtres animés, beaucoup d'êtres inanimés, les éléments de la nature, les lieux et les agglomérations, les plantes, les animaux, toutes les puissances surnaturelles ont les leurs que leur donnent les hommes au cours des prières.

---

(1) Si le griot le récite à un chef de guerre et que la ville attaquée soit prise, il reçoit une part de butin.

(2) Cf. p. 83.

(3) Il s'agit du *bana* ou *boina (Acacia arabica)* qui est utilisé par le cordonnier pour la fabrication d'une teinture noire.

(4) On dit d'un tel enfant qu'il est un *sofali* (litt. cheval âne), c'est-à-dire un bâtard.

L'interdit :

Au nom de famille est attaché un ou plusieurs interdits alimentaires, *tne* ou *tana*, qu'observent tous les porteurs. Pour certains initiés, les interdits ont été édictés par Faro lorsque ayant classé les êtres de la création il a déterminé la nourriture propre à chaque espèce (1). Pour l'homme du commun, l'origine de la prohibition fait toujours l'objet d'un conte ou d'une légende, justifiant les liens unissant un ancêtre de la famille et l'animal ou le végétal désigné. Le plus souvent, l'animal a rendu service à l'homme, lui a sauvé la vie, ou inversement; ou bien à la suite d'événements graves, l'ancêtre s'est transformé en animal ou en végétal. Des versions nombreuses sont données de l'origine de ces liens.

Il n'a pas été possible jusqu'ici d'envisager tous les aspects des divers interdits. D'autre part la multiplicité des versions qui sont données de leur origine montrent que l'histoire courante, racontée à tout venant, recouvre des notions beaucoup plus profondes, celles des catégories qui témoignent des liens unissant les hommes aux animaux et aux végétaux (2). Il conviendrait aussi d'étudier les rapports des espèces entre elles, des animaux avec les végétaux et les minéraux en fonction des forces spirituelles qui les animent.

Quoi qu'il en soit, l'interdit confère à l'homme son titre de noblesse et c'est être déchu que de n'en pas posséder. Il assure la protection du groupe qui l'observe. Ainsi les hyènes de Konodimini protègent les habitants du village qui les nourrissent.

Exemples d'interdits :

La famille Traoré a pour interdit la chair du crocodile. Un ancêtre nommé Makyon s'étant transformé en crocodile, nourrit sa famille pendant une famine qui durait depuis six ans; il pêchait pour elle du poisson qu'il lui apportait.

La septième année, la famine sévissant toujours, les Traoré décidèrent de le tuer pour le manger. Au matin, lorsqu'il parut avec le fruit de sa pêche, un vieillard s'avança pour l'attaquer, l'animal l'arrêta et lui prédit sa mort s'il poursuivait son dessein. L'homme n'en tint aucun compte et blessa la bête qui eut cependant encore la force de retoûrner au fleuve. Le vieillard regretta son acte et les autres tentèrent de dégager leur responsabilité. Le lendemain matin le crocodile sortit du fleuve et vint mourir à leurs pieds afin qu'ils vissent ce qu'ils avaient fait. Le coupable fut à son tour tué par les siens et les deux cadavres enterrés ensemble dans le même suaire. Quand tout fut fini, le chef révéla que Maydon était un membre de la famille, qu'il avait nourri les siens, étant de même race, pendant la famine et que dorénavant le crocodile serait l'interdit des Traoré, en reconnaissance de ce don et comme excuse du meurtre commis.

---

(1) Cf. page 29.

(2) Cf. également L. Tauxier. *La Religion bambara* (Théorie des Ntana et des tabous) p. 114 à 138.

L'interdit de la famille Diara est le lion, animal dont elle porte le nom. Deux vieux amis, aux temps anciens, chassaient toujours ensemble avec flèches et harpons. Au cours d'une longue famine, leurs armes s'étant brisées, ils ne purent s'en procurer d'autres. Pour nourrir leurs familles, ils attaquèrent les animaux sauvages avec leurs mains nues : l'un assommait ses proies avec ses poings, l'autre les dépouillait.

Peu à peu l'existence qu'ils menaient transforma leur comportement. Ils cessèrent de se laver, leurs cheveux et leurs barbes poussèrent, des poils épais couvrirent leur corps. Leurs ongles devinrent si longs et si durs qu'ils s'en servaient pour trancher la viande et creuser le sol. Ils oublièrent jusqu'au langage qu'ils parlaient et ne communiquèrent plus que par grognements.

Ils luttaient avec les génies pour s'établir sur les lieux qui leur étaient ordinairement réservés. Ils cessèrent de retourner dans leur village et leurs parents les cherchaient, mais dès qu'ils voyaient des hommes, ils s'enfuyaient. Ils finirent par marcher à quatre pattes, et devinrent semblables aux animaux qu'ils pourchassaient.

Un jour qu'ils dormaient l'un près de l'autre, ils s'unirent sexuellement, et le plus fort engrossa le plus faible, qui mit au monde, un peu plus tard, deux lionceaux. Les hommes qui les virent dans la brousse avec leur progéniture décidèrent qu'ils ne pourraient désormais tuer un lion car il avait de leur sang dans les veines. Encore aujourd'hui, si un Diara rencontre un lion, l'animal se couche au sol « tant il a honte de descendre de l'accouplement de deux hommes devenus comme des bêtes ».

Ces deux exemples, choisis entre bien d'autres, illustrent les rapports de l'homme et de l'animal, lesquels apparaissent mieux encore dans le mécanisme déclenché par la rupture de l'interdit adopté.

En effet, toute infraction a d'abord pour conséquence de retirer au fautif les graines de ses clavicules, symbole de ses nourritures essentielles; il devient « un grenier vide » et, privé de ses forces, est inapte à lutter contre celles de l'animal lésé qui l'attaque. Le mal qui l'atteint à ce moment démontre cet état d'infériorité physique et psychique à la fois : toute rupture d'interdit affecte d'abord les yeux, puis les autres ouvertures du corps.

Si l'animal est blessé, il délègue son *lere* au coupable pour l'avertir de la faute commise, mais n'attente pas à sa vie puisqu'il est son allié. En revanche, sa mort libère son *nyama* qui agit d'une façon plus énergique. Mais il est plus grave encore de manger son interdit que de le tuer, car l'intéressé ne peut se débarrasser du *nyama* de sa victime et doit en subir tous les effets.

Le coupable se rend au bord du Niger et, à haute voix, expose le fait à Faro en lui apportant une offrande (bouillie de mil, cuivre, etc.) puis il boit un peu d'eau et s'en retourne. S'il est trop loin du fleuve, il se rend en un lieu écarté et agit de même en versant un peu de son sang en guise d'expiation. Ces actes ont pour effet de le mettre en règle vis-à-vis de Faro qu'il a offensé en rompant l'ordre établi. Puis il procède à des rites de purification, lesquels ont pour agent son allié *senãnku* et sont exécutés sur un carrefour, *dangu* (1). Ceux-ci ont pour effet de le débarrasser du *nyama* de sa victime, puis de faire réintégrer dans ses clavicules le symbole des huit céréales nourricières : il récupère ainsi ses forces perdues. Après sa guérison, les vieillards de sa famille le convoquent et lui font de sévères recommandations car une nouvelle rupture n'est réparable par aucune purification : le *nyama* de l'animal ne quitte plus le récidiviste qui peut en mourir.

Les infractions volontaires, très rares, entraînent bien entendu pour l'intéressé les conséquences les plus graves puisque sa responsabilité est engagée. Il n'en est pas de même dans le cas contraire. Si un homme a consommé sans le savoir son interdit au cours d'un repas pris chez un autre, le *nyama* de l'animal peut attaquer les responsables : l'hôte, ou sa femme, tombe malade. Il faut alors que la femme coupable aille demander son pardon : mains au dos et à genoux, elle expose le fait à l'intéressé qui peut, pour la punir, demander à réfléchir et la faire attendre. Sinon il exige trois noix de cola avec lesquelles il exécute le *dyanzani*, « remplacement » : il les jette dans la brousse ou les donne au premier pauvre qu'il rencontre. Quelques jours après, le responsable est libéré.

(1) Cf. p. 139. La purification peut, dans certains cas, être effectuée par un ascendant et comporter des ablutions avec de l'eau consacrée par une prière adressée à Faro.

V. — La parenté a plaisanteries.

Une institution considérable est également liée au nom de famille : il s'agit de la relation nommée « parenté à plaisanteries » *dyo benalye* (litt. : accord entre nous) qui s'intègre dans les rapports généraux de parenté désignés en pays mandingue sous le nom de *senãnkuya*. Mais on distingue les rapports de famille *stricto sensu*, dits *sindyi benalye* (litt. : lait du sein entre nous) du *dyo benalye* qui intéresse au contraire les membres de deux familles, ou même de deux peuples différents.

C'est ainsi qu'un Koulibali est *senãnku* d'un Keita chez les Bambara : Bozo et Dogon, Bozo et Somono sont également *senãnku* (1). Au Mandé, un Koulibali et un Tangara s'étant liés d'une longue et durable amitié, décidèrent de la sceller de façon définitive. Ils s'ouvrirent les veines et mirent un peu de sang de l'une des plaies sur l'autre, réalisant l'alliance par cet échange. Puis ils préparèrent un repas qu'ils consommèrent ensemble en proférant le serment de ne jamais faire couler réciproquement leur sang.

---

(1) La parenté à plaisanteries nommée *senãnkuya* chez les Bambara est dite *mãgu* chez les *Dogon*, *dagana* chez les Bozo, etc... Cette importante institution, qui embrasse l'ensemble des populations du Soudan Français, a déjà fait l'objet d'un certain nombre d'études. Cf. en particulier M. Delafosse. *Haut-Sénégal Niger*, t. III, p. 206. H. Labouret. *La Parenté à plaisanteries en Afrique occidentale*, D. Paulme. *Parenté à plaisanteries et alliance par le sang en Afrique occidentale*, R. Radcliffe Brown. *On jocking Relationships*.

Dans l'*Alliance cathartique*, M. Griaule éclaire les rapports Dogon-Bozo qui sont à l'origine de l'institution dans le Soudan. Celle-ci fait apparaître la notion fondamentale de gemelléité des êtres et des principes qui les animent. Un Dogon et un Bozo sont des jumeaux, chacun d'eux portant une parcelle de l'autre dans son corps et son âme : quand il injurie ou purifie, c'est à cette part de lui-même dans l'autre qu'il s'adresse et les forces qu'il communique ainsi viennent en aide à son partenaire.

Les dernières enquêtes poursuivies sur ce sujet ont apporté les faits suivants : Dogon et Bozo ont respectivement huit graines et huit poissons dans les clavicules et réalisent ainsi le partage des nourritures célestes (cf. p. 30). Celles-ci sont les témoins de leur intégrité spirituelle et toute rupture d'interdit a pour effet premier de priver l'intéressé de ses graines ou de ses poissons. L'institution a pour but de permettre à l'allié d'intervenir pour faire réintégrer les nourritures dans le corps du coupable.

Il convient de remarquer que dans les cas où elles sont désignées par le même terme (*senãnkuya*) l'on ne saurait confondre les relations interfamiliales, qui d'ailleurs comportent également des échanges de plaisanteries, avec les relations de famille à famille (plus exactement de nom à nom), de population à population.

De plus, à l'intérieur de ce dernier groupe, on observe plusieurs sortes d'alliances : certaines comportent l'exogamie (Dogon et Bozo; Bozo et Peul, etc...) d'autres excluent la possibilité de procéder aux rites de purification. Il y a aura donc lieu d'examiner le plus grand nombre de cas possibles avant d'établir les règles de cette sorte d'alliance.

Ainsi fut consacré entre eux et leurs descendants le *dyo benalye* (1). Une telle alliance a la valeur d'une parenté; elle comporte l'obligation absolue de ne jamais attenter à la vie, aux biens du *senānku*. Les parties se doivent assistance dans de nombreux cas : services de nourriture, de logement, aide matérielle; secours en cas de guerre, de poursuites judiciaires; présence obligatoire au cours de cérémonies religieuses, purifications en cas de rupture d'interdit.

Ces règles impliquent que l'alliance affecte non seulement l'individu dans son aspect social, mais aussi dans ses principes spirituels. Le *senānku* est une sorte de jumeau de tout individu appartenant à l'autre famille; il a en lui une parcelle de son partenaire, et réciproquement.

De ce fait, les réactions déclenchées par l'insulte ou la plaisanterie sont particulières : le *senānku* entendra de la bouche de l'autre, sans se fâcher, des moqueries qu'il ne tolérerait pas habituellement. Il ne saurait en être affecté puisque les paroles s'adressent à la parcelle de son être qui lui vient de son insulteur. Mieux, la plaisanterie ou l'injure, sans l'atteindre dans ses principes, a pour effet de le confirmer dans sa situation vis-à-vis de celui qui lui parle, d'affirmer l'état des deux parties, donc d'augmenter leur vitalité. Elle détermine des mouvements de forces dont les deux interlocuteurs reçoivent, comme d'une parole bénéfique, un bienfait réciproque.

Cet effet est utilisé dans de nombreuses occasions, notamment lors de l'accession à un nouvel état social ou à un nouveau grade. Le *senānku* plaisante un nouveau-né dès l'imposition du nom et, plus tard, le jour où il porte son premier vêtement. Les circoncis deviennent alliés et plaisantent entre eux le jour du *daworo* qui consacre la promotion (2). Au soir du mariage, la jeune femme est l'objet de sarcasmes rituels qui marquent son introduction définitive dans le groupe familial du mari.

Le *senānku* est seul habilité, dans certains cas, à procéder à des rites de purification rendus nécessaires par une rupture d'interdit *(tne)*. Il a en effet, dans les clavicules, et seulement

(1) C'est à cause de cette alliance que les membres de la famille Kouloubali se sont vus autorisés par les Tangara du village de Barbé (région de Mopti) à venir s'installer dans l'agglomération. Le chef Tangara leur a concédé du terrain pour édifier leurs maisons et établir leurs champs. Les deux groupes vivent là en parfaite intelligence.

(2) Cf. p. 186.

vis-à-vis de son partenaire, le double des graines symboliques, soit seize. Il est de ce fait qualifié, par son geste purificateur et par son rôle essentiel de pourvoyeur nourricier, à faire réintégrer dans les clavicules du coupable les graines qui l'avaient quitté. Si la faute est légère, le contrevenant lui donne du mil, de l'argent ou un objet. Le *nyama* de l'animal lésé se dépose sur l'objet et le *senānku* qui le reçoit en débarrasse l'intéressé sans que lui-même en soit affecté. Si la faute est plus grave, les deux alliés se rendent à une croisée de chemin, *dangu :* le *senānku* fait tourner de gauche à droite une torche de paille en forme de croix autour de la tête du coupable. L'être offensé par la faute ne peut rien refuser devant cette procédure. Il retire le *nyama* qu'il avait infligé, et l'homme, puissamment secouru par les forces du purificateur, récupère celles qu'il avait perdues, symbolisées par les graines de ses clavicules.

Ce rôle cathartique par réintégration des subsistances dans leur siège humain est illustré dans la vie courante par les prestations alimentaires auxquelles sont tenus les alliés. Il y a là comme une représentation laïque et matérielle d'une opération invisible de purification.

VI. — LA PERSONNE : CAS EXCEPTIONNELS.

Certaines particularités physiques sont le témoignage visible d'une modification des éléments composant la personne. Il convient donc d'envisager le cas des individus qui en sont affectés.

A. — *Jumeaux :*

Les jumeaux, *flani* (litt. : deux petits), sont deux êtres neufs donnés aux hommes par Faro et considérés comme issus de lui seul. De ce fait, les jumeaux n'héritent ni du *dya* ni du *ni* d'un défunt, mais de principes nouveaux qui leur viennent du génie. De plus, leur *dya* ne quitte jamais l'eau pour l'ombre et séjournent pendant toute leur vie entre ses mains : de ce fait ils restent à l'abri de tout danger comme de toute impureté.

Une telle naissance, considérée comme bénéfique, n'est accordée qu'à certains êtres privilégiés dits *kunandi*. Elle est annoncée en montrant l'index droit et l'index gauche dressés sans mot dire, car sa proclamation serait si puissante qu'elle nuirait aux nouveau-nés. Leur mère met autour de son front une bande de coton blanc, dite *dyala*, qui témoigne de la présence des *dya* des enfants entre les mains de Faro. Chacun se rend dans la demeure des parents et leur apporte ce qu'il peut donner : car donner aux jumeaux revient à donner à Faro.

Le rite de dation des noms est exécuté au bord du fleuve si le village est situé à proximité du Niger, au bord d'une mare à son défaut. Les enfants sont portés par leurs parents qui, à eux deux, représentent le chiffre sept. Ils sont baignés, leurs cheveux rasés et jetés au fleuve, tandis que le père dit : « Mère Faro, tes fils sont nés, voici leurs cheveux (1) ». Puis il présente la bande *dyala* portée par la mère à l'officiant qui la fait tourner autour du front de l'enfant en disant : « Ces deux personnes sont plus âgées que moi; que le *nyama* du nom qui va leur être donné parte avec le *dyala* (2) ». Puis, il leur donne un nom spécial (3).

Le lendemain, la mère portant l'un des enfants et accompagnée d'une femme chargée de l'autre, va quêter du mil ou du coton dans le village. Elle tient dans ses mains deux cuillers-calebasses identiques. Les dons, égaux en poids et qualité, symbolisent les jumeaux; ils sont placés dans les cuillers et la femme, croisant les deux mains, les verse dans le panier où elle transporte les offrandes (4).

Trois ou quatre jours après le rite de dation des noms, suivant le sexe des intéressés, on leur met des bracelets de métal blanc qui représentent leur *dya* : sur chacun d'eux sont gravés des symboles géométriques de l'univers, ciel et terre (5). L'ouverture du bracelet représente celle du monde terrestre incomplet : quand les jumeaux mourront, ils seront enterrés avec leurs bracelets refermés sur leurs bras ou leurs chevilles pour exprimer qu'ils ont pénétré dans un monde clos et complet. Autrefois les sacrifices offerts à Faro étaient exécutés avec de telles parures, empruntées à un jumeau et que le sacrificateur présentait au

(1) *ba faro i wolo dew kunsi ye nin ye.*

(2) *nin ma fla ka koro u ma, u čua dali nyama ka ta fini disa fêw dyɔla fę.*

(3) Séni et Sinè pour des garçons; Bintou et Wasa pour des filles. Chez les Bambara islamisés cette coutume est également respectée, les noms donnés étant toujours Alassan et Fouséni. Il s'agit vraisemblablement d'une déformation des noms arabes donnés aux jumeaux au Maroc.

(4) Tout le symbolisme des dons faits aux jumeaux comme celui de la double poterie (cf. plus bas) confirme les observations effectuées au Soudan sur les rapports entre eux et le commerce. Cf. à ce sujet M. GRIAULE. *Dieu d'eau*, p. 234 et ss. Il est intéressant de remarquer que chaque jumeau est le *dya* de l'autre et que ce terme signifie à la fois « ombre du corps » « double spirituel » et « balance ». Commercer se dit *dyago*.

(5) La figure est faite d'un rectangle divisé en deux carrés égaux superposés, comprenant un signe de multiplication dans le carré inférieur, la terre, un v ouvert dans le carré supérieur, le ciel.

fleuve en disant : « Le fer des jumeaux est le témoin du sacrifice offert à Faro (1) ». Après la cérémonie, chacun remettait au jumeau des noix de kola blanches : l'intéressé se rendait sur la grand-place et secouait en l'air ses bras ornés de leur parure pour disperser aux quatre points cardinaux le *nyama* bénéfique de Faro acquis au cours du sacrifice. Dans certaines régions les jumeaux portent un pendentif en forme de fers d'esclaves doubles, dit *dyõ neke* « fer du captif », ou une amulette nommée *sinzin* « appui », composée d'un petit morceau de bois taillé en forme de double cupule et qui est de préférence confectionnée par un Bozo. Un homme ayant eu trois fois des jumeaux doit se procurer une poterie double qui sera toujours maintenue pleine d'eau et sera l'objet d'un sacrifice annuel (2).

Jusqu'à douze ans les ablutions des enfants sont exécutées de préférence au Niger; ceux-ci sont censés pouvoir marcher sur les eaux, et ne jamais courir aucun risque de noyade.

Les jumeaux ne se quittent pas plus que ne se séparent le *dya* et le vivant auquel il est attaché. Ils se vêtent des mêmes habits, mangent simultanément la même nourriture; autrefois deux jumeaux mâles épousaient la même femme. Si l'un d'eux meurt en bas âge, le forgeron confectionne une petite poupée de bois dite *flanilokele*, qui reçoit le nom du défunt et que la mère place sur la natte à côté de l'enfant vivant. Ce dernier emporte avec lui cette poupée au moment de sa circoncision et la conserve pendant toute sa retraite pour la rapporter dans la demeure paternelle qu'elle ne doit plus quitter. Quand il se marie, il plante en terre la poupée avec un autre bois qui symbolise la femme du défunt. Les jumeaux étant en quelque sorte une vivante réplique de Faro, nul ne saurait les importuner sans lui manquer de respect. Ils sont au contraire l'objet de prévenances et de précautions de la part de leur famille comme de leurs voisins. Leur présence est toujours bénéfique. Considérés comme invulnérables, les jumeaux marchaient autrefois sur le front des troupes en temps de guerre, et, pendant les trêves, servaient de parlementaires inviolables entre les partis engagés.

B. — *Hermaphrodite :*

L'hermaphrodite, étant à la fois mâle et femelle, est lui-même, matériellement, son propre jumeau. En conséquence, il n'a pas de *dya* (3).

(1) *flani neke ye ma sere ye faro sõni la.*
(2) Cf. p. 86, n. 4.
(3) La hyène est regardée comme hermaphrodite; elle peut engendrer ou

C. — *Albinos :*

Les albinos de peau claire ou rougeâtre et aux cheveux roux sont dits *gombele* ou *yepege*, ce dernier terme étant réservé à ceux qui présentent les caractères les plus accentués.

L'albinos est censé naître de rapports sexuels ayant lieu au milieu du jour, lorsque le soleil est au *koblenkaba*, ciel de la colère de Faro, fait qui constitue une grave rupture d'interdit. Celle-ci a pour conséquence d'unir dans le sein maternel les jumeaux primitivement octroyés à la femme par Faro et de décolorer la peau de l'être ainsi formé. De ce fait l'albinos, avatar de jumeaux, n'hérite point de principes spirituels d'un défunt : il est également un être nouveau donné par Faro aux hommes. Mais l'impureté acquise décuple son *tere* et son *wanzo* qui sont si actifs que le circonciseur doit sacrifier sur ses autels personnels avant de l'opérer. De l'ambivalence de l'albinos, de même essence que Faro à l'origine, mais déchu à cause de l'impureté transmise par ses parents, découlent divers usages et représentations (1).

Son corps est considéré comme doué de pouvoirs spéciaux. A qui possède son crâne, échoit une nombreuse famille et la prospérité; les cheveux apportent la richesse; la moelle des os octroie or et cuivre. Si l'on s'assied à l'emplacement où sont enterrés les os, tout ce que l'on demande est accordé. Ses excréments, mêlés aux semences, ont pour effet d'augmenter la récolte de l'année.

Cette valeur attribuée à l'albinos en fait une victime de choix pour les sacrifices offerts à Faro. Son *nyama* est tel qu'il peut être sacrifié sans prière, l'acte même constituant une invocation efficace. A défaut d'albinos vivant les hommes tentaient souvent de s'approprier les restes d'un corps enterré.

---

concevoir, suivant sa force et sa taille, « la plus forte engrossant la plus faible ». Un système de tatouage repose sur cette croyance.

(1) Cette ambivalence est également à l'origine de la croyance qui fait de l'albinos un être autrefois pourvu d'ailes et capable de voler (cf. p. 41), qualité qu'il aurait perdue au contact du sol impur.

CHAPITRE IV

LE SACRIFICE ET L'AUTEL

Pour faire appel aux forces spirituelles et les promouvoir, les Bambara utilisent la prière, l'offrande, le sacrifice. Des rites oraux et manuels sont exécutés en tous lieux, en tous temps. Ils prient le ciel, les points cardinaux, les génies; ils sacrifient sur les pierres, la terre, les arbres, les points d'eau, comme sur les autels abrités dans les sanctuaires ou situés en des lieux publics ou privés. Tout adulte circoncis, père de famille, propriétaire d'une demeure et d'une terre cultivable est sacrificateur, qualité soulignée par la tache rouge qui orne parfois les murs de la pièce principale de sa résidence (1).

Pour un observateur non informé, ces rites recouvrent un immense réseau de croyances apparemment disparates. Mais la réalité est tout autre. Les rites provoquent des mouvements de forces définis qui s'intègrent dans ceux du monde.

Sans donner un tableau général des modes, des temps, des lieux propres aux rites des Bambara, il est cependant important de démonter les rouages du plus important, le sacrifice sanglant. Il forme leur armature et il met en jeu les principes et éléments composant l'être vivant (cf. chapitre précédent), car il convient de remarquer que les premiers sacrifices attestés par le mythe sont les sacrifices humains.

Il y a sacrifice quand le sang de la victime coule sur une matière ou un objet contenant la force d'une puissance surnaturelle ou d'un ancêtre. Les paroles de la prière prononcée pendant la mise à mort consacrent la victime à la puissance qui vient, selon la croyance populaire, se nourrir du sang. Dans le même temps, elles dirigent les forces de vie qui s'échappent du corps. L'âme, *ni*, est captée par l'autel et y sera conservée jusqu'à la résurrection. Son *nyama*, d'autant plus puissant que l'agonie est plus longue, est également retenu par l'autel dont il augmente les forces. La victime est ainsi entièrement vidée de ses principes spirituels car « tous les *nyama* sont dans le sang (1) » qu'elle abandonne.

---

(1) Cf. p. 128 et ss.

Dans tous les cas, le sacrifice constitue un échange : celui que sacrifie reçoit en retour une part des forces de celui qu'il prie (2). Le sang est porteur d'un élément actif, dangereux, qui est laissé sur l'autel. Au temps où les hommes donnaient au *balanza* leur sang, ils le laissaient sécher puis, passant leur langue sur le tronc, ils le reprenaient débarrassé de cet élément qui constituait l'offrande. Toutes leurs forces actives passaient à l'arbre et il ne leur revenait qu'une matière presque vidée de vitalité.

Les sacrifices sanglants qui, aux origines, furent instaurés sur le tronc du *balanza* sont actuellement exécutés dans les lieux les plus divers : terre, arbres, mares, puits, etc. De plus, au fur et à mesure que leurs techniques se développaient, les Bambara sacrifièrent sur les objets, ustensiles ou machines qu'ils découvraient ou inventaient : la forge et ses outils, le métier à tisser, les instruments agricoles.

Les Bambara possèdent également des autels que l'on peut classer en trois catégories :

1° Les souches de bois dites *pembele*, qui représentent Pemba. De nombreux chefs de famille ou de sociétés religieuses en conservent un exemplaire (3).

Un sanctuaire unique, à Massala, est un centre de pèlerinage pour les Bambara de toutes régions qui viennent nombreux pour assister au sacrifice annuel. Il recèle, outre un *pembele*, deux grandes poteries, *da*, qui lui ont donné son nom, couvertes de sang sacrificiel : les ordalies y sont exécutées, les questions juridiques, les graves maladies sont traitées en ce lieu.

2° Les autels faits de pierres grossièrement taillées et parfois gravées ont pour origine une pierre mythique, issue de la septième partie de la terre, placée sous le tertre où naquirent les deux jumelles de Faro. De couleur rouge, elle était elle-même le symbole du sacrifice. Elle se divisa et donna naissance à toutes les pierres sacrificielles (fig. 5 et pl. V, b).

---

(1) *nyama be bi dyoli la.*

(2) Le mécanisme du sacrifice sanglant chez les Bambara est comparable à celui qui a été observé chez les Dogon et décrit par M. GRIAULE, *Remarques sur le mécanisme du sacrifice dogon* (Soudan Français), Journal de la Société des Africanistes. Tome X, 1940, p. 127 et ss.

(3) Cf. page 49 pour la description des autels *pembele*.

Actuellement, les autels de la région de Ségou viennent pour la plupart de Toko, agglomération située au sud de la ville et où vivaient les forgerons du roi. L'ancêtre de ces derniers est

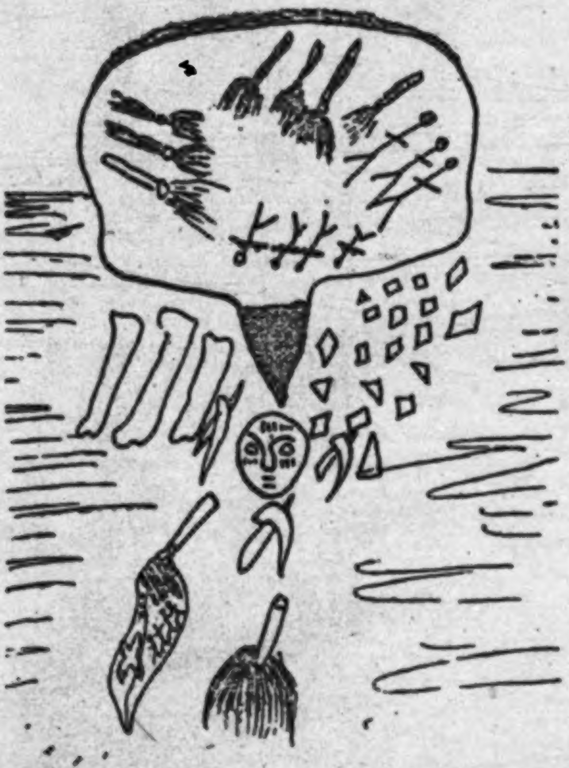

Fig. 5. — Autel de pierre, *fara ba*, de Banankoroni, consacré aux ancêtres. Il est fiché en terre au-dessus du crâne et des ossements d'un albinos, de houes et d'un couteau de circoncision.

Le dessin rituel exécuté lors des cérémonies de renouvellement de l'année représente les torches et les fouets du Kworè, 3 hommes et 4 femmes, qui rappellent le chiffre 7, image de la création. (Dessin d'un informateur.)

enterré dans les rochers qui avoisinent Toko et d'où sont extraites les pierres servant d'autel. Le chef d'un village qui désire s'en procurer, une envoie à Toko un délégué qui reçoit du forgeron la pierre convenant au rôle de l'autel et à la qualité du demandeur. Ainsi on donne une pierre noire à ceux qui ont rompu un interdit, une pierre de deux couleurs à un étranger et la pierre rouge « arrondie et polie par les ancêtres » à ceux que l'on veut honorer.

Les autels de pierre, innombrables (il en est de privés et de publics) représentent généralement les ancêtres. Placés dans les champs, ils reçoivent les sacrifices offerts en leur nom pour favoriser les récoltes. Au carrefour des ruelles et sur la place publique, ils assurent la stabilité des coutumes ancestrales.

3° Les Bambara sacrifient également sur ces objets fabriqués qui portent le nom général de *boli* (litt. : courir) et qui sont assimilables à des autels bien qu'ils soient d'un tout autre caractère que les précédents. Leur origine est différente. Pour les initiés ils proviennent du douzième *bangiñi* qui donna naissance au jour (cf. p. 13). Sous forme de « globules » ils furent lâchés dans l'espace par Faro lors de sa descente sur terre, recueillis par les génies de l'air et du sol dans lesquels certains pénétrèrent et furent par la suite remis aux hommes (1).

Les *boli*, dits également *nyana*, sont confectionnés avec les matières les plus diverses : queues d'hyène, piment, miel, charbon, métaux précieux, parties du corps. Chaque élément a sa valeur et son emploi est déterminé par sa situation dans les catégories; les temps de fabrication interviennent également. Mais quelle que soit sa composition, tout *boli*, dont le nom même exprime le mouvement universel des choses, est un amalgame d'éléments représentant les parties de l'univers (2).

(1) La croyance populaire veut que les huit *boli* principaux des Bambara aient été rapportés de la Mecque par le célèbre Makanta Djigui, personnage dont le nom est cité dans nombre de prières (notamment au cours des cérémonies du Komo). L. Tauxier attribue cette tradition à l'influence de l'Islam sous le règne du successeur de Soundiata, le roi Malinké Kankan Moussa, qui fit le pèlerinage de la Mecque en 1324 (*La Religion bambara*, p. 287, note 3).

Le nom de Makanta Djigui est cité dans la devise *(burudyu)* du Komo : les chefs de cette importante institution transportent chaque année leurs autels au bord du Niger, près du village de Tikko au lieu où est censée avoir coulé la pirogue historique qui le transporta. Il est possible que ce personnage ait joué le rôle d'un législateur religieux en codifiant certaines croyances et en fondant des associations autour des *boli* qui, d'après les dires d'informateurs qualifiés, existaient avant son intervention. Cf. également sur ce point L. Tauxier, *La Religion bambara*, p. 287 n. 3.

Les versions du voyage de Makanta Djigui, que les indigènes racontent volontiers, sont innombrables. Cf. l'abbé Henry. *L'Ame d'un peuple africain : les Bambara*, p. 131 à 133; C. Monteil. *Les Bambara Ségou et du Kaarta*, p. 170; D. Traore. *Makañta Djigui, fondateur de la magie soudanaise*, p. 23 à 25.

Nous avons recueilli deux versions de cet épisode, que nous ne croyons pas utile de présenter dans cet exposé.

(2) Dans l'état actuel de l'enquête, le classement par catégories des maté-

Il est donc le symbole de ce dernier et le réceptacle des forces qui l'animent. Celles-ci, déjà très puissantes dès sa confection, sont constamment entretenues, augmentées, par les apports reçus au cours des sacrifices sanglants dont le *boli* est l'objet. Ils font de lui un concentré de forces qui rend en proportion de ce qu'il reçoit et dont le propriétaire est le premier bénéficiaire.

Un *boli* est également un relai permettant d'atteindre une puissance surnaturelle, un ancêtre ou un être vivant qui l'imprègne de sa force en venant consommer sur lui l'offrande. Par le canal du sang répandu, cette force remonte dans la victime et, s'il y a consommation, dans le sacrifiant lui-même.

Un *boli* contient donc :

Une part de l'âme, *ni*, et de la force, *nyama*, de l'être auquel il est consacré.

Le *ni* et le *nyama* des victimes qui lui sont offertes.

Le *nyama* des individus qui, ayant rompu les interdits édictés par la puissance, ont été tués par elle.

Les Bambara distinguent deux sortes de *boli :* les plus nombreux, dont l'action est relativement bénigne, dits *soni* (litt. : donner petit) ceux au contraire qui sont chargés de forces puissantes, voire dangereuses, dits *saraka* (1). Les seconds sont censés, par leur seul pouvoir, tuer les victimes qui leur sont offertes sans que celles-ci soient égorgées; il suffit de les leur présenter en récitant une prière appropriée pour qu'elles meurent. On dit alors que le « *boli* a fait sortir le sang » et cette mort équivaut à un sacrifice sanglant (2). Ils s'attaquent aussi à ceux que l'on voue à leur vindicte.

On dit d'un *boli* « qu'il est chaud et qu'il a la gorge sèche », et c'est pourquoi le rituel comporte parfois le recueil dans une calebasse du sang dans lequel on le fait ensuite tremper.

Certains *boli* sont individuels, parfois hérités d'un ancêtre et consacrés à leur propriétaire dont ils entretiennent les forces. D'autres, collectifs, sont consacrés aux puissances surnaturelles qui protègent la vie de la communauté.

Des interdits relatifs aux êtres dont l'âme « imprègne » les *boli* et aux éléments qui les composent sont édictés au moment

---

rieux ou éléments composant l'univers chez les Bambara n'est qu'ébauché Ce n'est qu'après cette étude qu'apparaîtra le rôle exact dévolu aux éléments composant les *boli* et que pourra être envisagé le problème de l'origine de ces autels.

(1) Le *ćuafebla* est un *soni;* le *mbe ndyugu kă* un *saraka* (cf. p. 132 et p. 133).

(2) Si la victime ne meurt pas assez vite, le sacrifiant peut « insulter » l'autel pour le contraindre d'agir.

de leur confection. Ils doivent être scrupuleusement respectés par les responsables et les officiants. C'est pour éviter les dangers résultant de leur violation et qui porteraient atteinte à leur intégrité comme à celle de leurs propriétaires, que les *boli* sont généralement mis à l'abri soit dans des sanctuaires, soit dans une pièce isolée de la demeure où nul ne pénètre sans l'autorisation des responsables. Leur manipulation, dangereuse, est réservée aux prêtres, au chef de famille, au propriétaire.

La victime la plus communément offerte sur tous les autels est l'animal domestique : volaille, bovin, bovidé. Toutefois, sur les autels de chasseurs et des sociétés d'incirconcis, on immole des animaux sauvages.

La couleur de la victime est déterminée par la qualité de l'être auquel elle est consacrée, comme par celle de l'autel lui-même. Sur les *boli* des sociétés religieuses on égorge généralement des animaux de couleur rouge qui accroît le *nyama* qu'ils contiennent. Le blanc, signe de luminosité et de pureté, est réservé à Faro.

La mort de la victime a un caractère divinatoire. L'égorgement est pratiqué de telle sorte que l'agonie soit longue et que l'officaint puisse interpréter la position du corps. Le dépeçage est suivi d'une consommation qui a une valeur communielle; de plus, certaines parties du corps sont laissées sur l'autel (foie); d'autres sont conservées par le sacrifiant comme témoins (mâchoires, plumes et poils).

Le rite s'accompagne le plus souvent d'offrandes de bouillie de mil, à titre de « rafraîchissement », le sang étant donné à l'autel comme une nourriture. Les noix de kola, que l'on choisit pour leur forme et pour leur couleur, sont partagées en deux : l'officiant mâche l'une des moitiés et la crache sur l'autel avant de consommer l'autre.

Autrefois, les sacrifices humains étaient également pratiqués. Ils avaient lieu dans les cas graves intéressant le royaume, le roi ou les chefs. Le contenu ordinaire en était l'albinos.

A titre d'exemple, nous donnons ci-après un aperçu des rites de mise à mort d'albinos tels qu'ils se pratiquaient sous la royauté. Ils soulignent la valeur mystique de la victime et sont un excellent exemple de mécanisme propre au sacrifice; ils font apparaître la valeur rituelle des détails sur chacun desquels les Bambara mettent un accent particulier. Enfin, ils confirment la valeur et le symbolisme des différentes parties du corps, tels qu'ils ont été décrits dans le chapitre précédent.

Les rois de Ségou étaient autrefois fournis en albinos par un homme du village de Pelengena qui les tenait emprisonnés et qui les leur réservait. Mais cet homme les exploitait en leur rasant les cheveux qu'il vendait aux chefs des villages avoisinants comme symboles des hommes qu'ils pourraient compter, tôt ou tard, sous leur domination. Le chef ayant dénombré ses sujets, les prisonniers faits à la guerre et tenus en esclavage et les captifs reçus en tribut, préparait autant de bâtonnets que d'hommes; puis il mélangeait ceux-ci aux cheveux et enfouissait le tout dans le mur, au seuil de la porte d'entrée de sa demeure. Les cheveux étaient censés représenter à l'avance la multiplication des hommes du fief et favoriser la rentrée de l'impôt.

Mais les albinos eux-mêmes étaient réservés au roi qui les sacrifiait à Faro dans les cas intéressant la conduite du royaume :

1° Lorsque le roi se trouvait devant des difficultés d'ordre gouvernemental, la victime était coupée en deux au milieu du corps, à hauteur du ventre, au moyen d'une corde en fibre de *da* (1) : ses cris, ses gestes et ses excréments étaient considérés comme véhiculant un *nyama* qui « supprimait la difficulté rencontrée par le roi ». Nul ne devait entendre ses plaintes qui n'étaient point faites pour les oreilles humaines mais pour Faro à qui revenait aussi la souffrance. Le roi, surtout, ne devait pas entendre les cris sous peine d'échouer dans son entreprise et pourtant il lui fallait assister au supplice et le contempler dans une complète impassibilité.

La moitié inférieure du corps de la victime revenait à Faro. Elle était portée au Niger par trois hommes si cette dernière était de sexe masculin, par quatre s'il s'agissait d'une femme. L'un d'eux prenait le corps sur sa tête; les yeux et la main gauche fermés, il marchait en évitant de poser ses orteils sur le sol, afin de respecter « l'âme de ce qu'il portait (2) ». Au bord du fleuve, les articulations étaient brisées, la moelle extraite et versée dans l'eau. Après avoir posé leurs orteils sur le corps, pour « donner une part de leur âme à Faro », les hommes le déposaient délicatement dans le fleuve où il s'engloutissait tandis qu'ils exposaient à haute voix la raison de leur acte. De retour auprès de leur maître, ils lui apportaient les remerciements du génie et un peu d'eau du fleuve que l'on versait sur le siège royal (3).

(1) *Hibiscus*. On ne pouvait, pour l'albinos, utiliser la fibre de *nyama*, considérée comme impure.

(2) Poser les orteils au sol revient à mettre l'âme de ce qu'on porte en contact avec l'impureté de la terre (cf. p. 70).

(3) Cette offrande portait le nom de *nasi*, « bien-être ».

Le haut du corps de la victime revenait au roi et était utilisé pour les besoins de l'État. Les *lõdyõ* soufflaient tout d'abord dans la bouche du supplicié pour que « l'air en sortant apporte à Faro toutes ses paroles ». Puis ils enfouissaient la tête sous le trône du roi et dansaient au rythme des tambours.

En cas de guerre, le sang qui avait coulé lors du sacrifice était recueilli par les *lõdyõ*, séché au soleil, le résidu emporté et jeté avant l'assaut dans la direction de la ville à prendre. Le roi qui s'avançait avec son armée, trouvait, selon la formule, « son sacrifice devant lui » *(saraka bla ñe)*.

2° Dans le cas où le roi avait besoin de fonds, la mise à mort était opérée à l'ouest et en enfonçant dans la gorge une tige de bambou pour faire couler le sang sur les cauris que le roi avait gagnés lui-même « avec sa propre sueur ». Ainsi consacrés, les cauris « attiraient l'or, l'argent et le cuivre dans le trésor royal ».

La tête était placée sous le trône. La poitrine et les poumons, après séchage, étaient réduits en poudre et conservés dans un sac dont le roi avait la disposition. Lorsqu'il recevait les contribuables, il mettait cette poudre sur son visage et dans sa bouche, contraignant ainsi le visiteur à donner. Il en frottait son corps avant de partir en guerre, ce qui faisait dire aux combattants : « Voir le roi, c'est voir l'or (1) ».

Il en donnait à ses femmes et à ses enfants qui le mettaient dans leur boisson, afin « d'hériter de sa place et de ses biens ». Cette poudre était offerte lors de chaque sacrifice offert à Faro pour fertiliser le royaume.

3° Lorsqu'une famille était accablée par de nombreux décès, elle demandait au roi l'autorisation de sacrifier un albinos qu'il fournissait lui-même. La langue de la victime était séchée, pilée, additionnée de piment et consommée par le père de famille afin de lui permettre de « reprendre les paroles et le *nyama* des défunts ». Le nez était avalé par la mère pour qu'elle puisse « reprendre la respiration des enfants morts ». Le père mangeait ensuite les yeux grillés pour « conserver les vues perdues ». Les oreilles séchées étaient suspendues au-dessus du seuil de la porte d'entrée « pour que la mort, entendant les pleurs des funérailles, ne revienne plus ». Le crâne était conservé comme témoin et enterré dans la cour; un bois fiché en marquait l'emplacement. Le reste du corps était jeté au Niger, « car un homme ordinaire n'a pas le droit de garder ce qui est réservé au roi ».

Si le roi les y autorisait, les chefs des villages importants plaçaient aussi un corps d'albinos sous leur siège « afin que leur commandement soit solide et dure longtemps (1) ».

---

(1) *fama yele ye sanu yele ye.*

Dans certains cas graves, l'albinos était immolé sur l'autel du Komo. Ce sacrifice était accompli en silence car « une prière ignorée du sacrificateur est dans le sang de l'albinos » lequel est suffisamment puissant pour agir sans paroles.

---

(1) On donnait parfois le montant de l'impôt prélevé dans un village aux parents d'un albinos en échange de l'enfant. Ceux qui ne pouvaient se procurer de victime prenaient à titre de remplacement un os d'animal et exécutaient les rites comme s'il s'agissait d'un albinos. Sur le siège du chef, cf. p. 134.

CHAPITRE V

LES TECHNIQUES

Les Bambara, qui ont conscience de l'évolution de leur civilisation, la font remonter très haut dans le temps. L'histoire des origines, les faits et gestes de leurs plus lointains ancêtres sont inscrits non seulement dans leur mémoire mais dans les rites courants et souvent dans le matériel usuel tant profane que religieux.

L'invention et l'évolution des techniques, où s'allient spirituel et matériel, révélation et effort humain, donnent lieu à des récits et à des représentations qui sont caractéristiques de leur psychologie (1).

Dans la pensée bambara, toute technique est une réparation enseignée à l'homme par Faro, un palliatif du désordre cosmique, dû généralement à une rupture d'interdit. La famine, la guerre, l'épidémie, la misère, la mort qu'entraînent de tels désordres sont compensés — dans la mesure du possible — par de nouvelles techniques révélées au fur et à mesure des besoins. Toutes se trouvent en puissance dans la massue de bois utilisée pour écraser et battre les fibres, premier matériau employé (2).

Les premiers travaux sont l'œuvre des « hommes primitifs », ancêtres des Bambara, dont ils donnent la description suivante : « Ils étaient couverts de poils, cheveux et barbe hirsutes, leurs ongles longs semblables à des griffes, leurs dents semblables à des crocs. Ils ignoraient le langage et le vêtement, vivaient pour s'abriter des intempéries dans des trous creusés dans le sol ou dans des cavernes naturelles aménagées, au fond desquelles ils couchaient et déposaient leurs proies. Pour se défendre contre les bêtes sauvages, ils garnissaient l'entrée de ces demeures d'épieux et de roches pointues. Ces trous profonds communiquaient entre eux et formaient de véritables villages souterrains » (fig. 6) (1).

---

(1) Ce que nous relatons ici sur l'origine des techniques résume exclusivement ce qu'en disent les indigènes. Le contexte, sous forme des rites pratiqués quotidiennement, le meilleur exemple étant la forge, se suffit à lui-même et ne demande aucun commentaire.

(2) La massue de bois est un doublet de la masse du forgeron mythique qui contenait les techniques et les grains cultivables (cf. p. 30, note 1). La même origine des techniques est donnée chez les Dogon, cf. *Dieu d'eau*, p. 84.

Ignorant le langage, ces hommes conversaient au moyen de gestes de la tête, de mouvements des pieds et des mains, de grognements. Quand un différend les séparait, avant d'en venir aux mains, ils retroussaient leurs lèvres et mesuraient leurs longues canines, pour déterminer quel serait le vainqueur. « Plus tard, quand la parole leur fut donnée, les hommes, connaissant son pouvoir, en usèrent tout d'abord avec réserve. On ne discutait jamais deux fois une question : si, après une objection, une demande était réitérée, on s'inclinait et on acquiesçait, aux risques et périls du demandeur ».

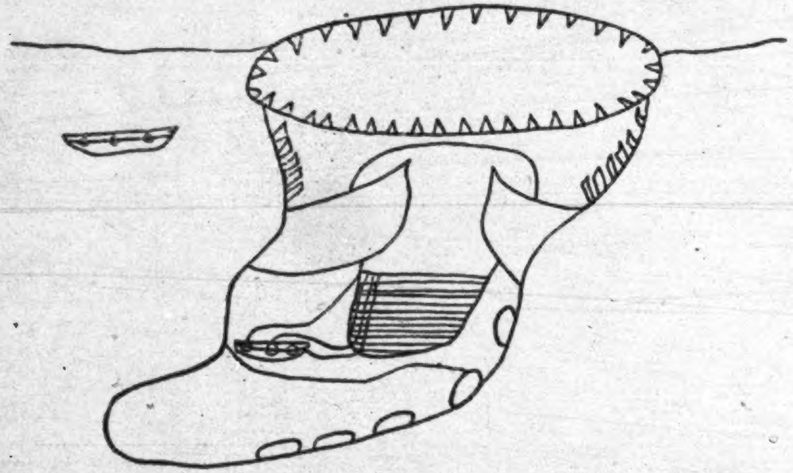

Fig. 6. — Demeure souterraine des hommes primitifs. L'entrée est défendue par des pierres pointues. Au centre, image du premier métier à tisser, inventé par les hommes. A gauche, la navette (cf. p. 137). (Dessin d'un informateur.)

Les hommes vécurent d'abord de cueillette, puis, plus tard, de pêche et de chasse, sans outillage, et se servant uniquement de leurs mains pour saisir leurs proies, de leurs ongles et de leurs dents pour les déchirer et les dépecer. Peu à peu, cette vie élémentaire se modifia; les techniques apparurent une à une, selon une chronologie dont les Bambara actuels ont gardé la mémoire.

---

(1) On peut encore visiter, aux environs de Ségou, certaines de ces excavations révérées par les Bambara comme d'anciennes demeures.

La première matière utilisée fut, selon une tradition qui n'est d'ailleurs pas limitée aux seuls Bambara, la fibre de l'arbre *nyama* (1) *(nyama fu)* dont furent tressés les premiers filets de pêche, la première fronde, le premier cache-sexe (2).

Lorsqu'ils commencèrent à cultiver la terre, ils développèrent un rudimentaire outillage de bois. En même temps, ils inventèrent une arme de jet faite de la même matière. Le bois fut très longtemps en usage; l'invention du tissage et de la poterie crue date de cette époque. Plus tard, ils connurent l'outillage de pierre, le fer et la forge. La technique de l'habitation, sur laquelle aucun mythe n'a été jusqu'ici recueilli, semble s'être développée plus tardivement, après la découverte du fer (3).

L'étude de cet outillage et de son usage rituel est des plus suggestives, car il est un premier témoignage de l'évolution des techniques. Il marque également des étapes du développement des formes, lesquelles sont observables dans ces sortes de conservatoires des arts et métiers que sont, dans certains villages, les sanctuaires où est gardé le matériel ancestral. Enfin, dans de nombreux rites et dans l'éducation des jeunes gens, il constitue de précieux jalons de l'histoire du peuple bambara.

PÊCHE ET CHASSE.

Selon la tradition, le filet de pêche fut le premier engin de la première technique enseignée aux hommes et le poisson constitua la nourriture primordiale.

« Un jour, quatre femmes se rendirent au bord du Niger pour ramasser le sable dont elles faisaient leur couche et qui leur servait de nourriture depuis qu'elles n'en recevaient plus du ciel. A mesure qu'elles avançaient le sable reculait, si bien qu'elles se trouvèrent très loin de leur séjour habituel. Elles voulurent alors s'en retourner, mais Faro les en empêcha et leur demanda de travailler pour lui, en leur faisant la promesse d'un don précieux. Elles « balayèrent les ordures du génie » pendant sept jours; le huitième jour, « les paroles commencèrent avec Faro ». Il leur montra deux filets de pêche, *dyo* dont il leur expliqua l'usage et la confection. L'un, à mailles très fines, *dyongemise* (litt. : filet aux yeux minces), l'autre à mailles plus larges, *dyonyekumba* (litt. : filet aux yeux gros) étaient faits de fibres de l'arbre *nyama*. Le premier était réservé à la pêche des *tneni* (1), dits « ordures de Faro », le second à la capture de poissons de plus grande taille : silures, capitaines, poissons-chats.

---

(1) *Bauhinia reticulata* (au nord), *Bauhinia Thonningii* (au sud).

(2) Les Dogon mentionnent également la fibre comme la première matière utilisée par les hommes. Chez eux, comme chez les Bambara, elle joue un rôle rituel. Cf. M. GRIAULE. *Dieu d'eau*, p. 26.

(3) Certains éléments de l'enquête concernant les techniques ont été résumés par l'auteur dans l'*Arme et l'outil chez les anciens Bambara*, Africa, vol. XVIII, n° 2, p. 105 à 111.

Pendant sept jours les femmes furent enseignées par le génie et son captif, le huitième elles furent libérées. Sept jours après ces événements, elles commencèrent à pêcher et à se nourrir de poissons.

Mais elles abusèrent aussitôt du don qu'elles avaient reçu. Se relayant jour et nuit et pêchant sans discontinuer au lieu même de la révélation, elles lassèrent la patience du génie. Celui-ci leur apparut au-dessus des eaux, tenant ses deux jumelles entre ses bras et se plaignit de leur âpreté, de leur sottise, de la fatigue qu'elles lui imposaient. Leur retirant le secret qu'il leur avait donné, il leur signifia que la pêche serait désormais chose d'homme et qu'elles auraient seulement le droit de vendre le poisson.

Malgré leurs larmes, le génie donna les filets à trois hommes qui étaient présents et répéta son enseignement. Les femmes quittèrent le bord du fleuve pendant que les autres mettaient à profit leur nouveau savoir. Mais au bout de quelques jours elles eurent faim; elles allèrent demander du poisson qui leur fut refusé pendant sept jours. Alors elles s'unirent aux pêcheurs et le peuple Bozo sortit de ces premiers mariages. »

La pêche fut à l'origine réservée aux seuls Bozo et c'est plus tard que les Bambara reçurent d'eux l'enseignement de la fabrication et de la manœuvre des filets comme des rites nombreux dont ils sont l'objet.

Les Bambara pratiquèrent la chasse et la cueillette avant de devenir cultivateurs. Il est suggestif de rapprocher le filet de pêche de la fronde *(ndōfere)* actuellement utilisée surtout par les enfants, mais dont ils décrivent un exemplaire (fig. 7) comme ayant été la plus ancienne de leurs armes de chasse et de guerre. La partie centrale de cette fronde qui formait en effet un filet,

---

(1) *Alestes nigrinilcatus.*

(*dyoba*, litt. : grand filet) tressé en fibres de *nyama* et comparable à celui qu'utilisaient les pêcheurs, était prolongé de deux) lanières. Celle de droite (*kininlegere*, litt. : *legere* de droite), était terminée par une sorte de bouquet de lamelles de bois *(legere)* favorisant le maintien. Celle de gauche (*missema*, litt. : petite chose) ou *ñuman* (litt. : gauche) était libre. L'homme saisissait l'arme aux deux extrémités, mettait des pierres dans le filet et « soufflait sur la lanière de droite pour donner de la respiration » à la fronde. Plaçant le pied gauche en avant, il la faisait tournoyer rapidement et lâchait le cordon gauche, libérant ainsi les projectiles.

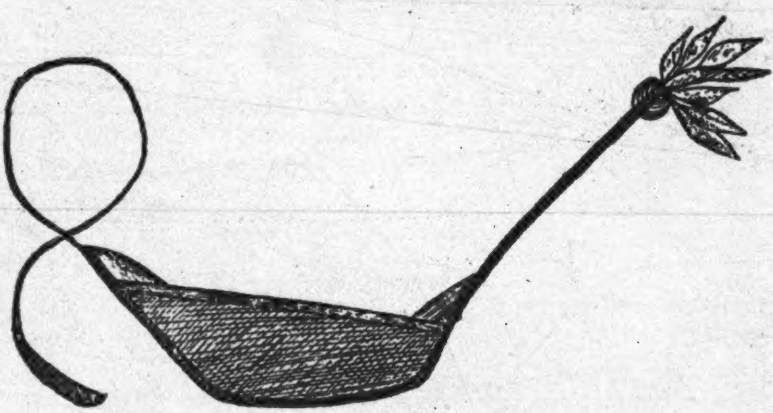

Fig. 7. — Fronde *(ndõfere)* des anciens Bambara. (Dessin d'un informateur.)

Les sacrifices propitiatoires étaient offerts sur les lamelles de bois et le sang coulait jusqu'au filet, le long du cordon. De plus, le chasseur imbibait son arme du sang des animaux blessés ou tués, pour donner à son engin la force des victimes et augmenter sa propre adresse.

Le *ndõfere* fut très longtemps en usage comme arme de guerre.

Le Tissage.

L'invention du tissage est liée à la découverte de la culture du coton; celle-ci apparut bien avant celle du mil, à l'époque où n'étaient connus que les outils de bois qui servaient à gratter la terre au pied des graminées sauvages dont les hommes se nourrissaient (1).

Le mythe mentionne à la fois l'apparition du coton, l'invention des fuseaux et de la navette; il ne fait pas allusion au métier à tisser qui est postérieur. Le récit de la fabrication des premiers vêtements apporte aussi des précisions sur la teinture qui semble avoir été connue très tôt.

Lorsque les hommes revenaient de la brousse où ils avaient cultivé le *norolã sise* (appelé vulgairement cram-cram) et le *narakata*, sorte de chiendent qui leur fournissaient des graines dont ils se nourrissaient, ils abandonnaient au carrefour, en hommage au génie Soba, leurs houes de bois.

Un vieillard qui passait près de là, fut un jour interpellé par le génie : « A vous tous qui passez ici, qui laissez vos houes, je désire donner une chose qui cache votre nudité; mais je le ferai si vous m'offrez un sacrifice. »

Le vieillard ayant rapporté le fait aux hommes de sa génération, ils décidèrent de sacrifier un albinos au carrefour. Le génie leur dit alors de prendre la graine qu'ils trouveraient à la croisée des chemins et leur enseigna la manière de la semer et de la récolter. « Cela, dit-il, vous servira plus tard de vêtements. » Les hommes confectionnèrent d'abord des jupes de feuilles et de fibres qui leur tinrent lieu de cache-sexe. Puis ils envoyèrent leurs femmes chanter des remerciements au génie. Quand ils eurent semé et récolté, ils déposèrent le coton au carrefour, en hommage (2). Le génie enseigna ensuite la femme d'un cultivateur qui venait quotidiennement le saluer à midi. Un jour, elle vit au carrefour un oiseau dont le nom signifie « petit oiseau qui file le coton de Dieu » *(ala ka kwori parata kono ni)*. Il tenait des fibres blanches dans son bec, les étirait avec ses pattes et enroulait le fil ainsi obtenu autour de son corps avec ses ailes. « Regarde l'oiseau, dit le génie. C'est ainsi qu'au ciel il file et tisse pour abriter ses œufs. Le coton doit être ainsi traité. Ta mort est proche. Commence le travail dès demain sur ce petit bâton, ajouta-t-il en désignant un fuseau, et instruis ensuite les femmes de ta famille et les enfants ».

La femme fila tout d'abord avec maladresse et se rendit au fleuve pour montrer son travail à Faro et lui demander son aide. Un poisson sortit de l'eau et lui remit une fusaïole en forme de boule, lui montra comment l'adapter au fuseau, lui en expliqua l'usage et l'origine céleste. Il lui annonça que dorénavant des fusaïoles analogues tomberaient du ciel avec la pluie pour les fileuses de coton.

---

(1) Cf. p. 113. Les Dogon admettent la même antériorité du tissage par rapport à la culture des céréales. Cf. M. GRIAULE. *Dieu d'eau*, p. 31 et s.

(2) Cette coutume est observée encore aujourd'hui.

Ayant repris son ouvrage avec ce nouvel instrument, la femme le mena à bien et instruisit ses compagnes. Elles allèrent ensuite jeter leurs premiers fils au Niger, en offrande au génie pour que le secret ne soit pas perdu. Et ainsi firent tous les artisans pour leur premier travail (1).

Dix-sept jours après l'apprentissage, la vieille femme mourut. Ses compagnes continuèrent à filer mais comme elles ne travaillaient pas le bois (2) elles durent demander aux hommes de tailler des fuseaux révélant ainsi leur secret.

A quelque temps de là, le génie envoya une araignée tisser sa toile à l'orifice d'un des trous servant d'habitation (Cf. Fig. 6) et dans lequel vivait le nommé Bambou Diara. Ce dernier observa l'insecte et appela son ami Kari Mariko. Ils voulurent imiter la toile en utilisant le fil de l'araignée qui, à l'usage, s'avéra trop fragile. Ils demandèrent alors aux femmes leurs fils de coton. Armé d'un fétu de paille sur lequel il avait enroulé le fil et ayant accroché, comme l'avait fait l'insecte, sa chaîne aux deux crocs de pierre protégeant l'entrée, Bambou imita l'araignée et fit une sorte d'éventail arrondi ayant la forme de la toile, en mailles très grossières. Quand il en eut tissé deux, il les joignit par une corde d'écorce de *nyama*, obtenant ainsi le premier cache-sexe *(mbogo nimba)*.

Kari Mariko avait observé le travail et remarqué la difficulté éprouvée par son ami à passer la trame dans la chaîne. Il eut l'idée d'enrouler le fil sur une mince baguette plus résistante que la paille et de placer celle-ci dans une augette en pierre qui glisserait facilement entre les éléments de la chaîne. Ce fut la première navette *(kuruni)*. Il enroula dessus le fil en trois pelotes, symbole masculin, ce qui consacra le tissage comme travail d'homme. Les fils furent alors tendus transversalement et la navette utilisée verticalement, la trame étant coupée à chaque passage en haut et en bas (fig. 6).

Tous vinrent voir le travail des deux artisans et nommèrent l'agglomération où ils habitaient « village de l'intelligence, *hakilidugu*. Ils apprirent d'eux la technique du tissage, et le nom des deux amis est invoqué encore actuellement sur le plat de nourriture qu'absorbe chaque apprenti avant de commencer son instruction.

A la suite d'une rupture d'interdit au cours d'une pêche sur le fleuve, les fusaïoles cessèrent de tomber du ciel. Les pêcheurs depuis ce moment les confectionnèrent en mêlant l'argile à l'huile de karité et en les faisant sécher au soleil.

---

(1) Tout premier travail est jeté au fleuve en offrande à Faro. C'est une garantie pour l'artisan que son adresse lui sera conservée et que la technique s'améliorera. Actuellement, les jeunes fileuses de Ségou vont jeter leur premier fuseau au fleuve. De plus, l'oiseau *parala* qui a enseigné le filage est capturé, ses ailes et ses pattes sont grillées et la poudre est donnée à qui commence l'apprentissage pour que celui-ci soit rapide.

(2) Sauf pour faire la cuisine, une femme ne se sert jamais d'un couteau, objet réservé à l'homme.

Le métier fut inventé plus tard; les positions de la chaîne et de la trame, la pratique des coupures et des nœuds furent modifiées. Il était autrefois l'objet de sacrifices humains nocturnes tandis que la navette recevait des sacrifices de moindre importance, mais diurnes (1).

La pierre sur laquelle les femmes égrènent le coton, *kaba*, représente le ciel et rappelle l'origine céleste du coton et des techniques dont il est l'objet.

Le vêtement :

Le vêtement, en contact intime avec le corps de l'homme participe de la personne qui le porte. D'autre part la matière dont il est fait, les divers éléments dont il se compose et qui sont associés à tel ou tel aspect de la métaphysique bambara, exercent une action sur le porteur. Le choix du vêtement est rarement le fait du hasard ou d'un goût particulier et les diverses manifestations de la vie sociale ou religieuse obligent généralement au port d'une tenue appropriée dont le symbolisme est lié à l'acte ou à l'état envisagé. Le rôle de l'habit apparaît dès l'enfance : un nouveau-né porte autour des reins un fil de coton, *dyura dyuru* qui est à la fois une protection (car « il solidifie sa colonne vertébrale ») et une préfiguration de ce qu'il portera plus tard. Quand il atteint l'âge voulu, une réunion de famille a lieu le jour où on le vêt pour la première fois. Il a fallu, auparavant, qu'il ait rêvé de son premier vêtement et parlé de son rêve à sa mère qui file alors le coton nécessaire. Avant de s'habiller, le postulant procède à une ablution dite *mayadyi* (litt. : eau de l'action de la personne) d'eau prise au Niger ou dans une mare de Faro. On dit à l'enfant vêtu « qu'il est maintenant un homme et peut faire partie du *ndomo* (2) » puis ses proches le plaisantent, le taquinent, marquant par des moqueries semi-rituelles son accession à un nouveau grade.

Le premier vêtement des hommes fut la jupe de fibres de *nyama* (fig. 8, A). L'écorce fut battue et préparée au moyen d'une massue, massue de bois, *gosilande* ou *kuruninde*, qui est censée « renfermer en puissance toutes les techniques humaines inventées au fur et à mesure des besoins. » On dit de cette massue qu'elle est « le moule de la perfection et le lieu d'où sortent toutes choses utiles ». La massue était aussi primitivement un rudimentaire instrument de rythme (1) : le martèlement des coups « chassait les sons néfastes émis par Téliko lors de sa révolte ». Encore actuellement, on assied un sourd-muet près du *gosilande* qu'on prie pour qu'il le débarrasse de son infirmité. On frappe avec lui les vêtements d'une accouchée en même temps que l'enfant pousse son premier cri, pour le purifier. Les vêtements teints sont battus, non seulement pour faire pénétrer la couleur, mais aussi pour en chasser toute impureté.

---

(1) Actuellement, les métiers sont fixés dans le sol au-dessus d'une poterie dont on a percé le fond avant de l'enterrer.

(2) Société des incirconcis (cf. p. 170).

Lorsqu'ils connurent le coton, et après l'invention du tissage, les Bambara montèrent des vêtements aujourd'hui abandonnés mais dont ils confectionnent encore des exemplaires à des fins rituelles. En effet, à l'exception du cache-sexe, ces anciens vêtements ne sont plus portés qu'au cours de cérémonies religieuses et ont pour fonction essentielle de représenter les ancêtres qui en étaient les auteurs.

Le premier vêtement tissé fut fait à l'imitation de la jupe de fibres. Les hommes fabriquèrent le cache-sexe *(mboko nimba)* actuellement encore porté par les incirconcis, et le teignirent en jaune, *wolo* (2) (fig. 8, B) couleur qui représente celle que donne à la peau des noirs une maladie dont ils se seraient débarrassés au moyen de cette teinture. Dans le liquide obtenu par décoction des feuilles et auquel était mélangé du charbon pilé, une hirondelle vivante était plongée puis relâchée, consacrant la teinture dans laquelle on trempait ensuite le cache-sexe.

Le vêtement suivant fut fait de deux bandes, *dyo kama* (litt. : filets d'épaule) qui s'accrochaient à chaque bras. Celle du bras droit, mâle, était attachée par trois cordelettes (chiffre mâle). L'autre était fixée par quatre cordes, quatre et gauche étant féminins. Le porteur se couchait sur la bande du côté droit et se couvrait de celle de gauche (fig. 8, C).

Les hommes confectionnèrent ensuite une sorte de tunique courte, *wọlọ kama* (litt. : ailes de perdrix) teinte en rouge (fig. 8, D). Au sommet des ouvertures où passaient les bras étaient suspendus deux petits personnages en bois sculptés *(mani)* qui représentaient les âmes du porteur, « prenaient leur vie dans les veines et donnaient leur force aux bras sur lesquels ils reposaient ». Le milieu du vêtement représentait la poitrine, le foie et le cœur du porteur; les fils transversaux, les veines et les artères. Le collier de soutien, fait de trois fibres d'écorce et de l'arbre *da*, était « le double de l'individu pendant son sommeil ». La sueur était l'offrande faite à ce vêtement; elle était remplacée par du sel en saison froide. La première fois qu'il le mettait, l'homme le priait : « Vêtement, nous te portons au nom de nos vieux ancêtres, en hommage à ceux qui t'ont confectionné. »

---

(1) *kow dyele bwo yoro*. Lors de certaines sorties de masques du Komo, le chef porte sur la tête le *gosilande* qui représente alors l'univers. Certaines purifications collectives sont aussi exécutées sur les carrefours avec cet instrument (cf. p. 141).

(2) Cette teinture est confectionnée avec les feuilles du *ngalama (Angeissus leiocarpus)* bouillies, séchées et réduites en poudre colorante que l'on met dans l'eau.

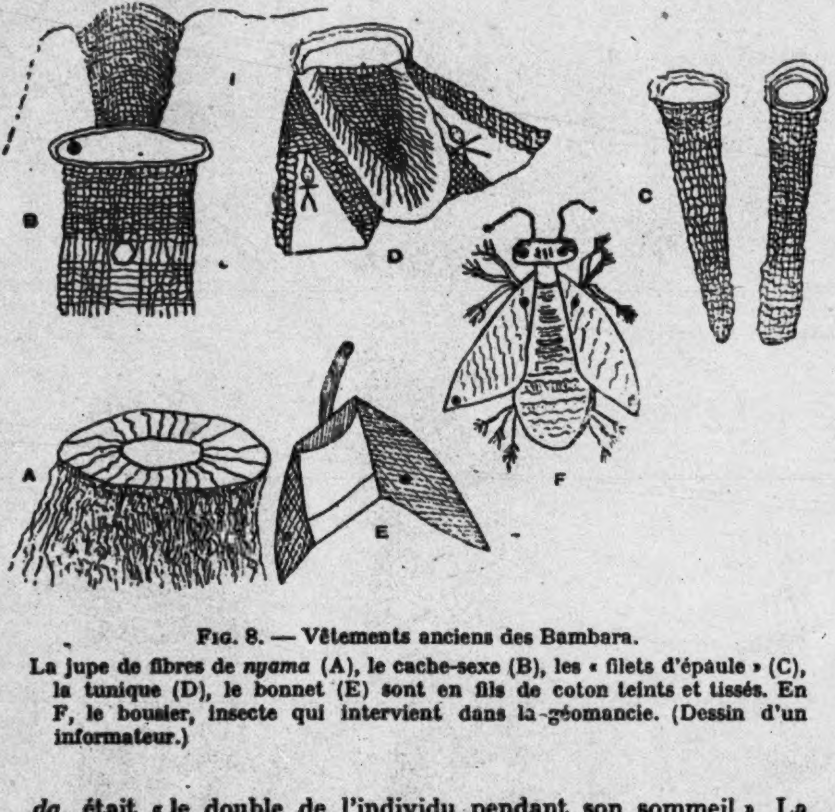

Fig. 8. — Vêtements anciens des Bambara.

La jupe de fibres de *nyama* (A), le cache-sexe (B), les « filets d'épaule » (C), la tunique (D), le bonnet (E) sont en fils de coton teints et tissés. En F, le bousier, insecte qui intervient dans la géomancie. (Dessin d'un informateur.)

Les ancêtres dessinés sur les sanctuaires et greniers sont tous munis du bonnet, *banfla*, qu'ils portaient autrefois (fig. 8, E). Au sommet était fiché un piquet de bois ou une queue d'hyène; par eux le ciel donnait sa force à l'homme qui envoyait en retour la sienne « à travers le vent ». La calotte (*čema*) faite de bandes de coton teintes en jaune, comportait des ailes *(bamade)*, symbole des oreilles : les raies de l'aile droite assuraient une nombreuse descendance, celles de gauche, une vie sûre et droite. Les ailes rappelaient aussi celles de l'hirondelle, déléguée du génie de l'eau et chargée de porter dans la matrice, au moment de l'union, la goutte de sang contenant la vie et l'âme de l'enfant. Les deux points teints à l'indigo sur chaque aile étaient le signe de cette matrice.

L'ensemble du bonnet *(farofla)* était « le lien maintenant la vie de l'homme », représenté lui-même par la raie faisant le tour de la calotte. Il le protégeait contre le froid, le malheur, la mort. Il était aussi le symbole de la demeure et du pouvoir de Faro. Et le porteur, quand il le recevait, disait : « Aile du bonnet, bonnet, fils de Faro, je vous ai dessinés avec force, ô hirondelle (1). »

Après l'invention du métier à tisser, les vêtements ne furent plus confectionnés pièce par pièce, mais on utilisa les bandes de coton fabriquées par les tisserands, coupées, ajustées et cousues, technique observable encore aujourd'hui dans tout le Soudan.

Il existe une « science des bandes » *finew lno* ou *finew dongo*, familière à tous ceux qui portent les vêtements traditionnels et qui repose sur la connaissance du symbolisme des couleurs, des dessins, des nombres. Les bandes sont nombreuses et chacune d'elles expose un aspect de la métaphysique, un fragment du mythe. Ainsi l'histoire de Mousso Koroni est relatée dans la succession de quatre bandes (pl. III, de 5 à 8,). Le port des bandes est subordonné à l'état physique ou moral de l'intéressé, à ses fonctions, à ses activités (2).

La bande blanche, *finin muku dye*, représente Faro, blanc et lumineux ainsi que le ciel et les rayons du soleil. Le blanc exprime la sagesse et la pureté du génie, la pureté du sang. On respecte celui qui paraît ainsi vêtu en public, car il affirme par là même sa volonté de suivre les règles religieuses. C'est aussi la couleur des offrandes faites au génie : un morceau de tissu blanc est parfois accroché à la porte d'une demeure où l'on vient de sacrifier. Un malade jette trois bandes blanches au fleuve, ou les donne à plus pauvre que lui. Une étoffe blanche, sur l'épaule d'un homme « fortifie ses nerfs et ses articulations ». Chaque soir, à la tombée de la nuit, tous les enfants revêtent une tunique de cette couleur; malgré l'obscurité, ils sont ainsi « dans la lumière de Faro » et se reconnaîtront plus tard comme enfants d'un même père, d'une même famille, d'un même sang. Le voile de mariage est fait de onze bandes blanches de onze coudées chacune qui ne sont point cousues mais faufilées en spirales; ainsi couverte, la femme se rend de nuit au village de son futur mari, dans la parole lumineuse de Faro et entourée des vingt-deux éléments de la création, les onze spires se coupant sur la droite et sur la gauche. Le mort est vêtu lui aussi de blanc : culottes de six bandes représentant l'homme et son *dya*, bonnet à trois bandes. Il est enroulé dans une couverture de même couleur et les visiteurs déposent sur le cadavre des morceaux de tissu blanc ou des cauris. L'ensemble exprime vis-à-vis de Faro la bonne volonté, la sincérité, le dévouement du disparu qui doit être « blanc sous la terre » s'il n'a pas rompu les interdits.

---

(1) *bamadę, bonza, farodẽ, ni be ke ola ni barikaye, nanale*. Les vêtements primitifs décrits ci-dessus ont été observés par un informateur à Bougoula et sont présentés aux postulants au moment de l'initiation.

(2) Nous donnons ci-après la description d'un certain nombre de ces bandes, choisies parmi les plus représentatives, nous réservant de publier une étude complète de cet aspect d'une technique très révélatrice de la psychologie des Soudanais.

A l'opposé du blanc est l'indigo, *konofi*, qui symbolise l'obscurité et l'impureté et qu'on porte dans la plupart des cas où n'intervient pas l'action du génie. Cependant une femme revêt un pagne indigo le jour où, ses menstrues étant terminées, elle reprend les rapports sexuels avec son mari : elle le conserve jusqu'à la grossesse. Lorsqu'elle est sûre de sa situation, elle le met au soleil pour le purifier et elle y placera le nouveau-né pour lui rappeler plus tard qu'il doit la vie à ses parents. Tout mort qui a rompu un interdit est enterré dans un linceul indigo, le seul rappel de lumière étant fait d'un fil de coton blanc posé sur le cadavre, à titre d'excuse et de pardon. L'indigo étant l'interdit de la plupart des lieux sacrés de Faro, nul ne le porte jamais aux cours des sacrifices et des cérémonies religieuses.

Le blanc et l'indigo ont une valeur complémentaire : rouler ensemble un fil blanc et un fil indigo, pour faire un cordon qui sert d'attache à une amulette, c'est « rouler ensemble bonheur et malheur, comme dans la vie ».

La teinture *wolo* est la couleur du cuivre jaune : c'est elle dont sont revêtus les circoncis après l'opération et jusqu'à la guérison, le rouge, *mbegu*, est la couleur du cuivre rouge et du sang : les chasseurs vêtus d'une tunique de *mbegu* sont « couverts d'un vêtement de sang ». La bande *kayo* (pl. III, *a*, 1) où interviennent ces deux couleurs, de l'indigo et du blanc, reproduit l'arc-en-ciel : les intervalles blancs sont l'expression de la parole et de la pureté.

Un sacrificateur en coud un morceau sur son vêtement pour signifier qu'il est circoncis, chasseur et véridique dans ses gestes et dans ses propos. On en suspend une bande à la porte du vestibule nord du village pour préserver les habitants des dangers venus de l'extérieur. Un homme s'en revêt quand il a été malade, ou a subi de graves préjudices familiaux ou financiers. Sur les autels, sur les portes, les couleurs sont représentées par de la bouillie de mil, du sang, du suc de noix de kola. L'arc-en-ciel barrant la pluie et tarissant l'eau, la bande *kayo* ne peut être portée près du fleuve ni pendant les rapports sexuels, car elle est l'interdit de Faro.

La bande *sirakele* (litt. : un chemin) (pl. III, *a*, 2), représente la descente de Faro depuis la septième partie du ciel jusqu'à la septième partie de la terre, la raie indigo étant le *dyi fi*, « eau noire », siège terrestre du génie. Placée dans le pagne d'une femme mariée, elle exprime sa droiture et la bonne conduite qu'elle entend observer vis-à-vis de son mari. Portée par un voyageur, elle l'empêche de s'égarer en chemin.

Le *buguni* (1) (pl. III, *a*, 3) est « le rayon solaire donné par Faro à Pemba pour ses grands travaux terrestres ». Quand se forment les nuages, on dit que Faro « représente au ciel le *buguni* » et les devins conseillent à chacun d'en porter une bande par déférence pour le génie et pour faciliter la venue de la pluie. Le géomancien frotte doucement le sol où il va tracer ses signes avec une étoffe de ce dessin : c'est comme s'il mettait dans son travail exécuté sur la terre impure, le soleil, la lumière, la vérité.

Cette bande s'appelle aussi *kolōso mako* « nécessité du mélange » ou *kami*, pintade, dont elle rappelle à la fois la fragilité et le plumage. Sous cet aspect, le *buguni* symbolise la faiblesse, l'incomplétude de l'homme. Placée dans le vêtement d'un convalescent, elle exprime que ce dernier a perdu pendant sa maladie une part de sa vitalité. Ainsi vêtu, il se baigne au Niger pour que Faro le guérisse. Un homme qui a subi de graves pertes d'argent porte aussi le *buguni* : au marché, dans les réunions publiques, on ne lui fera pas payer sa part de bière devant le silencieux langage de la bande, plus clair que des paroles. Si un veuf se remarie, il en coud un petit morceau à son bonnet en souvenir de sa première femme. On enveloppe le couteau du sacrificateur dans le *buguni*, car il « manque toujours de sang », ainsi que certains *boli* qui en réclament constamment.

---

(1) Le mot désigne la région d'origine de la bande, Bougouni.

En conclusion, les carreaux indigo du tissu représentent le vide et l'obscurité, les blancs la plénitude et la lumière. Le port du *buguni* exprime l'espoir; l'homme impur ou faible espère devenir pur, fort, plein.

Au *bugunimba* (litt. : grand *buguni*) ou *nyedē* (litt. : fils de l'œil) sont attachées les mêmes représentations. On en bande une plaie; un homme ayant rompu un interdit porte un bonnet de cette étoffe; on en vêt aussi un bâtard. Le *buguni tyekorole* qui symbolise l'impureté de Mousso Koroni est utilisé pour implorer le secours de Faro dans des grandes calamités, pour des malheurs sans remède. Ainsi, on en recouvre le cadavre d'un mort-né.

Le *buguni nyama* (pl. III, *a*, 4), fait de vingt-deux carreaux alternés indigo et blancs, symbolise la création dans son ensemble harmonieux et ordonné. Sa séparation en deux registres rappelle la dualité : elle est matérialisée par une petite raie médiane. Un homme heureux en coud une bande entière dans sa tunique; celui qui a des difficultés de quelque ordre que ce soit la partage dans le sens de la longueur et en fixe un petit morceau au bas de son vêtement.

Le *nyeba* « grand œil », ou *koloso tyema* « masculinité mélangée » (à la féminité) (pl. III, *a*, 11) représente également la création, symbolisée ici par le double registre de cinq bandes indigo et blanches (1). En même temps le tissus représente l'homme complet supposant à la fois masculinité et féminité. On en vêt un nouveau-né, mais un bâtard ne le porte jamais.

La bande *soli* (pl. III, *a*, 5) représente à la fois la bonne conduite de Mousso Koroni au début de sa vie, puis sa trahison qui amena le désordre sur la terre.

Aux temps anciens, les gens ayant commis de mauvaises actions en étaient obligatoirement vêtus. Actuellement, on en fait le suaire d'un enfant mort aussitôt après sa naissance; on en coud une bande au vêtement d'une excisée ou sur le pagne d'une femme blessée lors de son accouchement. Si des discussions ou des conflits apparaissent au sein d'une famille, on en place un fragment dans des amulettes que l'on fait porter aux femmes.

Le *wulu nyekorolike* (pl. III, *a*, 6) figure le voyage désordonné de Mousso Koroni, son désespoir et sa folie. Ce dessin est réservé aux fous de façon à prévenir les gens de leur état.

La bande *gombo* (pl. III, *a*, 7) rappelle la poursuite de Mousso Ko-

---

a) **Bandes de coton (la ligne de chaine est présentée verticalement).**

PLANCHE III

b) **Offrande d'une bande de coton à l'arbre *dasiri* (Soroba).**

[facing p.112]

roni par le dieu Pemba, dans les profondeurs du ciel et de la terre.

La bande *ṭyalyeli* (pl. III, *a*, 8) image de la défaite de Mousso Koroni, symbolise le travail humain. On la donne à une femme courageuse et énergique. Dans les cérémonies religieuses, on la fait circuler entre les assistants et sa seule présence exprime que rien ici bas ne s'obtient sans travail, que tout est venu de lui. Porter cette bande fortifie celui qui entreprend un ouvrage dans un autre village que le sien.

La bande *saki* est le *koblènkaba* « ciel rouge ». Elle symbolise la chaleur, la colère, les difficultés, les chagrins. On la tisse au moment des négociations du mariage, pour apaiser les différends; on en trempe dans le sang de l'accouchée un morceau que l'on jette ensuite pour tout purifier.

Les raies bleues du *dyilala* représentent l'impureté, les raies rouges la purification par le sacrifice. Quiconque a rompu un interdit porte le bleu, le rouge quand il est purifié. On peut introduire un morceau de tissu rouge dans le sexe d'une jeune femme, après la défloration ou pour remplacer le sang versé après l'accouchement, morceau que l'on brûle ensuite pour faciliter la cicatrisation des plaies.

Avec la bande *sukaba* aux grands carreaux réguliers et alternés, jaunes et indigo est confectionné le pagne d'une femme ayant accouché de jumeaux. La mère met sur le vêtement en offrande un peu de la bouillie de mil qu'elle donne à ses enfants pour la première fois.

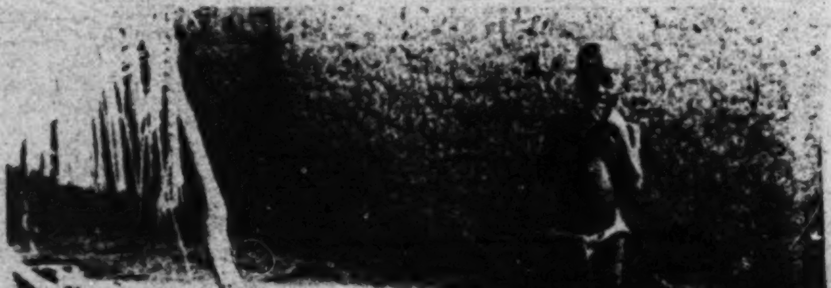
La bande *nyoronga* était autrefois utilisée pour les linceuls. Le roi en portait un vêtement entier où en faisait coudre trois bandes sur sa tunique quand il partait en guerre : il portait ainsi son propre suaire. Un homme courageux attachait un morceau de bande à la crosse de son fusil pour montrer son indifférence devant la mort. On en nouait un morceau à la main droite de ceux qui étaient tués sur le champ de bataille, à titre de récompense pour le devoir accompli. Actuellement, on en suspend un lambeau à la porte d'une demeure où vient de se produire un décès; on en bande un membre blessé avant d'aller chez le guérisseur.

Le *wulu lyerokole* à trois raies est porté par un enfant né après le décès en bas âge de nombreux frères et sœurs. Il représente le départ de ces éléments de la famille et leur retour dans le nouveau-né. Secouer une telle bande dans l'air honore le septième ciel et la septième terre et leur demande leur protection pour l'enfant. Jamais ce tissu n'est porté aux cérémonies des funérailles.

a) Trempe des pois après cuisson (Konodimini).

PLANCHE IV

b) Enclume commune, *kula*, des forgerons (Konodimini).



[facing p.113]

Le *kemba* (litt. : mère des scarifications) (pl. III, *a*, 10), remplace les scarifications quand elles n'ont pu être exécutées; en contre-partie cette bande est l'interdit de tous ceux qui sont scarifiés.

Le *warabawolo* (pl. III, *a*, 12) représente le lion des Diara : le premier fils de cette famille est né sur cette étoffe. Un garçon venant au monde avec un épi de cheveux sur le front est assis sur la bande de coton pour qu'il soit fort et riche. Autrefois le roi s'en faisait un tapis de selle; aujourd'hui un chasseur courageux en confectionne parfois son vêtement. Les Diara n'ont pas le droit de la porter, ni même de la voir, le lion étant leur interdit.

ARMES ET OUTILS.

A l'origine, les hommes vivaient de chasse et de pêche. Mais la faim les poussa aussi à se nourrir de végétaux dont les trois premiers sont le *yayalé*, plante aquatique très commune des bords du Niger, le *narakala*, chiendent et le *norolā size* appelé vulgairement cramcram (1). Bien avant que ne leur soit apportée la culture du coton et des céréales, les Bambara travaillèrent le sol avec des morceaux de bois, autour des pieds de ces graminées dont ils semèrent ensuite les graines. Leur outillage se développant, ils commencèrent à fabriquer les premières houes et les premières haches dont l'origine, en ce qui concerne les Bambara du Mandé (2), est liée à l'histoire des forgerons, *numu*, qui forment dans cette partie de l'Afrique comme dans bien d'autres une sorte de caste : ils pratiquent l'endogamie, entretiennent avec les autres Noirs des relations de parenté dite « à-plaisanteries », *senankuya*, et sont chargés de certains cultes aux ancêtres et à Faro (3).

Avant la découverte du métal, les ancêtres des forgerons actuels travaillèrent le bois, puis la pierre. Ils portaient dès ce moment le nom de *numu*, terme qui, actuellement, est réservé aux seuls artisans du fer, soit *jirifa numu* ou *farafa numu*, selon qu'ils taillaient le bois ou la pierre (4).

---

(1) Ces trois plantes sont respectivement : *Andropogon (Hyparrhenia) hirtus. Digitaria debilis, Cenchrus catharticus.*

(2) Les noms et l'origine des outils des Bambara de la région de Ségou sont différents.

(3) Sur le mythe de l'origine céleste des forgerons cf. S. DE GANAY. *Notes sur la théodicée bambara.* Cf. également *infra*, p. 30, n. 1.

(4) L. DESPLAGNES fait allusion à cet aspect historique des origines et du rôle des forgerons soudanais (*Le Plateau central nigérien*, p. 110).

Déjà les peuplades issues de ce mélange des *ou*, pasteurs *(Getules)* avec

Tous les forgerons dits « de race », c'est-à-dire ceux qui appartiennent aux trois familles Fané, Koumaré et Balo sont issus des Gwonna, originaires du village souterrain de Gwondougou, auquel revient la gloire d'avoir découvert le fer.

Selon les informateurs, le mot Gwonna vient de *gwã*, donné communément au foyer de la forge et qui désigne précisément le lieu d'où est extrait et où est traité le minerai. Le haut fourneau est dit *gwã so*. Le *gwã tukũ munu*, forgeron extracteur, est seul habilité à exécuter les rites importants. Le mot Fané dérive de *fã* qui désigne la forge dans son ensemble. Koumaré vient de *kuma*, parole. Ce sont les Koumaré qui, par fonction, sont chargés de discuter dans les conseils et dans les réunions publiques. Le mot Balo rappellerait que les porteurs sont venus s'installer autrefois sur les bords du Niger, *ba*.

Les Gwonna sont *senãnku* des autres forgerons. De plus, dans les villages où ils cohabitent avec d'autres artisans, ils sont de droit propriétaires du Komo et gardiens des sanctuaires où sont conservés les outils ancestraux. A leur défaut seulement, les forgerons appartenant aux autres familles assument ces charges.

Les titres des Gwonna sont liés à l'origine mythique de la forge qui est sous la dépendance des génies Téliko, maîtres de l'air et du vent, donc du soufflet de forge et du feu.

Ils en héritèrent des huit ancêtres qui, avant l'apparition de la mort, furent métamorphosés par le *balanza* en guêpiers *(tatugu kononi)* et reçurent le pouvoir d'activer ou d'éteindre le feu (1).

Les génies Téliko, jaloux de l'indépendance de ces nouveaux êtres, résolurent de les réduire et leur firent la guerre. Les oiseaux, qui n'avaient point d'armes, se lamentèrent et un forgeron Gwonna eut pitié d'eux; ayant demandé aux hommes de sa famille des haches, des houes, des flèches, il les leur donna, recevant en retour la promesse de révélations qui lui seraient utiles. Ainsi fut fait et les oiseaux partirent armés au-devant de Téliko, au lieu-dit *gonya*. Dans une lutte gigantesque, ils usèrent leurs armes, mais aucun des adversaires ne put vaincre l'autre.

---

des *ar*, sédentaires *(Fari)* nous avaient été signalées dans la plus haute antiquité par les écrivains,historiens et géographes qui les nommaient Noumides; Salluste nous dit que « les Faronsû, en se mêlant aux gétules *(gne-Toules)* ont formé la nation des Noumides.

Or, ces métis Noumides, nommés actuellement, Noumous, ont été, d'après la tradition, les premiers initiateurs des peuples primitifs, aux arts industriels, par suite ce titre de Noumous a été conservé et appliqué à tous les forgerons. »

Et en note, même page : « Mais ce terme de forgeron, Noumou, n'a pas *(sic)* forcément dans les pays nigériens l'idée d'un métallurgiste. »

(1) Cf. p. 23.

Les oiseaux redescendirent alors sur terre et remercièrent les forgerons en leur enseignant trois secrets nécessaires à la bonne marche de leur travail :

« 1° Comment fonder leurs autels en unissant dans une peau de panthère, de l'eau froide, du fer et une pierre, âme de la forge.

2° Comment protéger du feu les mains des potières.

3° Comment forger et consacrer le couteau de circoncision. »

Depuis ces révélations, les Gwonna révérèrent ces moniteurs, ce qui porta à seize le nombre de leurs ancêtres : les huit premiers transformés en oiseaux et qui n'avaient pas la parole, les huit autres qui reçurent celle de Faro.

Dans chaque village le patriarche des Gwonna porte le titre de *koligi* (litt. : propriétaire des choses). Il assure la garde de l'outillage ancestral déposé dans un sanctuaire et celle d'objets rituels, conservés dans sa demeure, appartenant aux forgerons de l'agglomération : de plus, il est seul habilité à exécuter les rites concernant cet outillage et les purifications.

La position prépondérante de la famille Gwonna se traduit dans les rites. Alors qu'un forgeron ordinaire, en rupture d'interdit, doit faire intervenir le *koligi* pour se purifier, un Gwonna s'adresse simplement à des membres de sa famille.

Tout forgeron est considéré comme porteur d'un *tere* excellent. Il est bienveillant, affable et ne fait jamais de tort à personne. On se lie facilement d'amitié, on plaisante avec lui, même si on le connaît depuis peu. Les rapports de *senankuya* qu'il assume avec les autres Noirs contribuent d'ailleurs à la cordialité de ces relations.

Le bon *tere* du forgeron agit notamment lors de la circoncision qui est confiée de préférence à un Gwonna. Le fait d'être circoncis par un forgeron fait diminuer rapidement le *wanzo*, hâte la cicatrisation de la plaie et améliore le *tere*. On attribue au forgeron le pouvoir de se transformer à volonté en animal ou en végétal. Là où les hyènes sont révérées à titre d'animaux protecteurs d'un village *(dasiri)*, elles sont toujours considérées comme des ancêtres forgerons métamorphosés (1).

Le matériel rituel actuellement conservé dans chaque village se compose d'un exemplaire de chacun des outils fabriqués par les forgerons depuis leur apparition.

a) Outils de bois. — Les artisans utilisèrent d'abord le bois, modifiant lentement la forme des objets. D'un simple bâton

---

(1) Notamment au village de Konodimi, situé à 21 km. au sud-ouest de Ségou.

(généralement en *sunzun* (1)) ou d'un billot mal dégrossi, ils ont fait peu à peu des outils plus perfectionnés, la forme souhaitée étant obtenue par usure et polissage sur les roches.

La première arme utilisée à la chasse fut un engin de jet formant épieu, le *semenkala* (de *kala*, manche, fig. 9, A). Taillé d'une seule pièce, il comprenait trois parties distinctes : le *bulonda* (a), le *semenu* (b) et le *koli* (c) (litt. : crochet). Les hommes lançaient l'objet de toutes leurs forces sur l'animal visé ou bien ils fouillaient la terre où se terrait leur proie avec l'extrémité pointue *(semena)* souvent empoisonnée avec du venin de vipère. L'arme était l'objet de sacrifices sanglants exécutés sur le *koli* et destinés à accroître sa force.

Le premier outil agricole fut le *yirewolo* (litt. : noble, fig. 9, B) nommé aussi, à cause de son ancienneté, *mogokoroba* (litt. : personne ancienne, ancêtre).

b) Outils de pierre. — Plus tard, les artisans apprirent l'usage de la pierre. Ils utilisèrent les haches néolithiques dites « pierres de tonnerre (2) » qui leur servaient de ciseaux. Celles de Gwondougou furent de tout temps réputées pour leur solidité. Les artisans travaillaient en commun et quand ils avaient dégrossi les ébauches, certains d'entre eux étaient chargés de les user sur une roche pour les rendre tranchantes.

Le *farakun* (litt. : tête de pierre) (fig. 9, D) fut la première hache dont l'emmanchement fut inventé par un artisan qui, ayant garni de poison la partie tranchante de son engin, désirait en essayer l'effet sur un arbre. Il enfonça la pierre dans un jeune tronc avec l'idée que les feuilles allaient sécher d'elles-mêmes. Mais il mourut sans constater aucun résultat. Plus tard, un passant ayant tenté en vain de retirer la pierre, coupa le bois au-dessus et au-dessous d'elle et maniant ce nouvel outil fut surpris de son efficacité. L'usage de la hache emmanchée se répandit parmi les hommes qui utilisèrent, pour lier la pierre au bois, la fibre du *nyama*. La pierre pouvait d'ailleurs être rapidement libérée et servir de couteau pour trancher la viande ou les os. Le manche servait d'épieu pour fouiller la terre et attaquer les animaux.

Il est probable que l'emmanchement fut également pratiqué pour les houes de bois confectionnées en deux parties et utilisées longtemps dans les régions où la pierre dure faisait défaut. En effet, un mythe concernant la découverte de la culture du coton, qui précéda celle des céréales, mentionne le fait que les hommes rapportaient chez eux leurs manches, mais laissaient chaque jour l'extrémité de la houe au carrefour, en hommage au génie du lieu.

---

(1) *Diospyros mespiliformis.* Le bois de cet arbre est très dur.

(2) Les Bambara, comme les autres Noirs du Soudan, attribuent à certaines haches néolithiques une origine céleste (cf. p. 44). Il semble qu'une grande quantité d'un outillage ancien ait été trouvée par eux sur les lieux lors de leur arrivée.

c) Outils de fer. — Enfin, les Gwonna découvrirent le fer et développèrent la métallurgie (1).

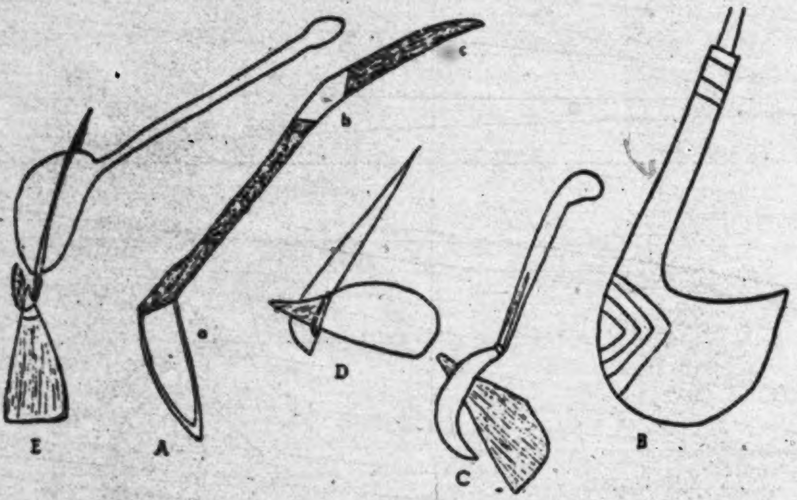


Fig. 9. — Armes et outils de bois (A et B), de pierre (C et D), de fer (E) des anciens Bambara. (Dessin d'un informateur.)

Alors que les hommes s'étaient absentés du village du Gwondougou, emportant avec eux leurs autels, deux filles quittèrent leur demeure pour aller vivre avec deux artisans des familles Fané et Koumaré.

Lorsque les hommes revinrent au village pour y prendre la pierre dure qu'ils utilisaient de préférence, ils furent très inquiets de ne point trouver leurs filles. Pour les chercher, ils creusèrent le sol, pensant qu'elles y étaient enfouies, les hommes de ce temps vivant dans des trous aménagés. Au cours de ce travail, ils découvrirent des roches qui leur étaient jusqu'alors inconnues et qui portent le nom de *farabele.* Elles leur parurent belles et ils voulurent les utiliser. Mises au feu, elles se modifièrent et devinrent si dures que les marteaux de pierre avec lesquels on tentait de les façonner, se brisèrent net. Les morceaux de fer servirent alors de projectiles, pour remplacer les cailloux des frondes. Mais les forgerons qui avaient enlevé les jeunes filles et qui étaient revenus au village avec leurs femmes virent le nouveau matériau et suggérèrent l'idée d'en fabriquer des haches.

---

(1) Les Noirs considèrent que la découverte du fer et la métallurgie leur sont dues. Il n'est cependant pas impossible que cette technique ait été importée par des artisans venus de la Méditerranée.

Le premier outil forgé, le *kongobwona* (litt. : laisser la faim), est encore aujourd'hui utilisé comme hache rituelle par les forgerons (fig. 9, E).

Il se compose d'un manche de bois terminé par un renflement formant masse et traversé par une tige de fer recourbée qui maintient la lame tranchante (*farabye*) de la hache proprement dite. Le manche très long, permettait à un homme de travailler sans se courber.

L'outil justifie son nom, car c'est lui qui apporta la prospérité aux artisans. Le symbolisme des différentes parties en témoigne : la masse de l'exemplaire consacré, que chaque forgeron conserve dans son autel et qui est l'objet de rites réguliers, est évidée et contient de l'argent, du mil et du cuivre. Le morceau de fer qui la traverse représente, en bas, la langue du plus âgé des Gwonna, en haut celle du plus jeune, rappelant ainsi les actes et les paroles de ceux qui, pour le bien de tous, découvrirent le métal.

Par la suite, les forgerons fabriquèrent d'autres modèles de haches et de houes de fer en imitant celles qu'ils utilisaient auparavant, mais en réduisant leurs dimensions.

L'extrémité des houes de bois était chaque jour abandonnée après usage au carrefour, en hommage au génie du lieu. Le travailleur ne conservait que le manche et taillait pour le lendemain un nouvel instrument. Les manches des houes et des haches étaient considérés comme des personnes parce qu'imprégnés de la force vitale de celui qui les tenait en main. Le cultivateur laissait dans son champ l'extrémité tranchante (de pierre ou de fer) et rapportait le manche qu'il déposait sur sa natte pendant la nuit.

Armes et outils étaient l'objet de sacrifices réguliers. On retirait le manche et le sang des victimes coulait d'abord dans l'orifice servant à le maintenir, puis sur la partie tranchante, tandis que l'officiant récitait une prière.

Actuellement, l'ensemble de l'outillage ancien est dit *makorobaw ka miňew* (litt. : outils des grands ancêtres). Considérés comme les témoins les plus respectables et les plus précieux de leur civilisation, des exemplaires de chaque objet sont conservés dans des sanctuaires dits *makoroba so* (litt. : maison des ancêtres) qui sont généralement des excavations naturelles ou des trous creusés dans le sol, rappel des anciennes habitations. Ces outils sont assimilés aux ancêtres qui les utilisaient et qui étaient, bien avant l'organisation des sociétés religieuses, l'objet d'un culte régulier. C'est pourquoi, respectant cette hiérarchie fondamentale, lors de l'initiation au Komo, on les présente au circoncis, avant les autels familiaux (1). De même au cours des rites agraires et funéraires, ils sont extraits des sanctuaires, honorés et remis en place avant les autels du Komo; l'inobservation de cette règle constituerait une rupture d'interdit entraînant les plus graves désordres.

Transportés au cimetière, au cours de la cérémonie annuelle de consécration des morts, ils reçoivent autant de victimes que ces derniers car ils représentent les ancêtres.

Le *koligi* les apporte au même lieu en deux autres occasions; lors des cérémonies agraires exécutées après la pousse des épis et après le battage de la récolte. Haches et houes sont présentées une à une aux tombes des défunts, puis, réunies au centre du cimetière, elles sont utilisées une fois chacune pour couper une branche ou creuser le sol; ce geste rituel rappelle l'usage qu'en faisaient les ancêtres.

La forge.

Sous un auvent situé généralement sur l'une des places ou aux abords du village, le forgeron établit son atelier qui est des plus simples et comporte un minimum de matériel. La forge représente l'artisan : le four est son corps, le soufflet ses testicules, la tuyère son sexe, le feu sa tête. Quand le fer rouge est battu par la masse, réplique du *gosilãnde,* qui symbolise l'univers, les étincelles sont l'éclair et la foudre.

L'autel de la forge, situé parfois à l'ouest du foyer, contient des manches noircis de houes, de pioches et de haches, du charbon (*fininkoro*, litt. : vieux charbon), de la cendre pétrie avec de l'argile (*buguri*, litt. : cendre du foyer), le tout ayant appartenu aux anciens propriétaires; enfin, une hache *kongobwona* dite « mère de l'autel », réplique réduite des haches ancestrales.

La masse de bois qui maintient les crochets de fer et la lame est évidée et forme une sorte de réserve divisée en trois compartiments.

---

(1) Notamment au village de Konodimini, dans la région de Ségou.

Celui du haut contient de l'argent; quoi qu'il arrive, le forgeron aura les moyens de vivre.

Dans le compartiment central sont déposés du cuivre et du fer, métaux que travaille l'artisan et de l'eau, élément de base et lieu d'élection de Faro, maître de la parole.

Le compartiment du bas contient du mil provenant d'un champ dit *kongobwona foro*, réservé aux besoins du culte de la forge. Ce terrain est placé sous la garde du patriarche appartenant à la famille Gwonna et l'entretien est assuré par la communauté. Les semences sont données par chaque forgeron au vieillard qui procède lui-même aux semailles. Les travaux de culture et le battage sont exécutés en commun. Le mil est engrangé dans le grenier du vieillard et chaque forgeron en reçoit une part. Celle-ci n'est pas consommée, mais mise en réserve; de temps en temps, l'artisan en prélève des graines qu'il place dans son autel, à titre d'offrande et qui restent un certain temps dans la poche qui leur est réservée; puis elles sont considérées comme consommées par la hache, retirées et remplacées par d'autres. Une partie du mil est conservée comme semence pour l'année suivante.

Chaque compartiment est ouvert et le forgeron peut y introduire les doigts ; si ses gains sont insuffisants, il se frotte le corps et la langue avec la main qu'il a préalablement plongée dans la poche contenant de l'argent; le prix, fixé par la parole, ne sera pas discuté par le client. S'il va cultiver son champ, il met chaque matin ses doigts dans le mil pour y puiser la force qu'il détient et améliorer le rendement de son travail agricole. S'il se brûle en forgeant, il plonge les doigts dans le troisième compartiment et se rafraîchit avec l'eau de Faro. Cette même eau est donnée à boire à un jeune artisan au début de son apprentissage.

Le fer triangulaire, *farabye*, qui forme la hache proprement dite, est placé sous la domination de trois génies appartenant au groupe de l'air : Agayru, qui a révélé le fer aux hommes, Tengu qui leur a enseigné la suprématie du Faro, et Gullé. Les deux premiers sont les maîtres des soufflets et dirigent l'ensemble du travail, le troisième est leur exécutant et enseigne aux hommes la technique du fer (1). Au décès du propriétaire de l'autel, la hache est extraite et déposée dans le sanctuaire du village où sont conservés les outils ancestraux. Mais tout le reste des objets est hérité par le fils.

---

(1) Le génie aurait refusé aux forgerons de leur enseigner le travail du cuivre et de l'or, ces deux métaux appartenant à Faro, qui s'en réserve l'usage. Le fer étant noir, il en a abandonné l'usage aux génies de l'air.

De plus, dans la demeure de chaque forgeron, une réplique de la hache *kongobwona* conservée dans le sanctuaire commun constitue l'autel de famille, hérité de père en fils, sur lequel l'intéressé offre à ses ancêtres des sacrifices réguliers ou occasionnels. Il possède aussi parfois une plaquette de fer sur laquelle est gravé un dessin représentant la création et notamment les « spirales de l'esprit créateur aux angles cardinaux », le signe de la multiplication, etc. Les angles de l'objet sont redressés pour marquer que le monde se relève, se réveille, ressuscite constamment.

Les forges des artisans d'un village sont généralement groupées sur une place publique, autour d'une grosse enclume, *kula*, prise dans une masse de bois formant socle et profondément enfoncée dans le sol (pl. IV, *b*). Devant cette enclume commune sont réglés les affaires judiciaires, les mariages ou les ruptures d'engagements; devant elle, on prononce des vœux, des serments solennels aux *boli*, et l'on procède à des purifications pour violation d'interdit.

Les forgerons sont également propriétaires en commun d'un certain nombre d'objets rituels habituellement déposés chez les *kotigi* et que l'on sort pour les cérémonies religieuses. Parmi ceux-ci, le *nege dyun* (litt. : mère du fer) (1) est une sorte de masse de fer fabriquée à l'image du *semèkala* (cf. fig. 9, B) et sur laquelle le *kotigi* trace de petites rayures; les unes représentent la tête de chacun des forgerons Gwonna, les autres, bien séparées des premières, rappellent la tête des artisans appartenant aux autres familles. L'ensemble symbolise la totalité des forgerons du village. Le *nege dè* (litt. : fils du fer) est une cloche rituelle ornée elle aussi de traits représentant les membres des familles de forgerons.

Après fabrication le *nege dyun* est déposé dans le sanctuaire des outils ancestraux. Il y séjourne deux ou trois mois afin de s'imprégner de la force des ancêtres et reçoit de temps à autre le sang des sacrifices exécutés nuitamment. C'est après ce séjour qu'il est placé avec le *nege dè* dans la demeure du kotigi.

Chaque artisan sacrifie individuellement sur la hache *kongobwona* conservée dans sa demeure ainsi que sur les objets contenus dans l'autel de sa forge : dans le même temps ses outils reçoivent des libations de bouillie de mil.

---

(1) *dyun* signifie « mère » en langue archaïque.

De plus, chaque année, les forgerons réunis offrent un sacrifice sur l'enclume commune : tous les outils sont déposés autour d'elle et inondés du sang des victimes.

Une cérémonie annuelle rassemble également les artisans pour demander à Faro de favoriser le refroidissement du fer travaillé et de donner à l'eau de la trempe la force de remplir son office. Réunis devant la forge du *koligi*, ils apportent un certain nombre de tomates qui sont tout d'abord présentées à l'autel puis à la hache ancestrale *farakun* sur laquelle chacun passe à tour de rôle sa langue.

Bouches closes pour ne pas laisser s'échapper la force ainsi recueillie, tous se dirigent vers le fleuve, tandis que l'un des assistants frappe sur la cloche rituelle *(nege dẽ)* avec la masse *(nege dyun)* le rythme dit *klidẽ fo* (litt. : rythme des fils des testicules) (1) qui s'adresse au forgeron manchot, le *bolokuruni*, compagnon de Faro. Arrivé sur la berge, le *koligi* se dévêt et se jette à l'eau. Quand il reparaît à la surface, tous les assistants ouvrent leurs mains pour mieux saisir la force de Faro et de son compagnon qu'il est censé apporter. Ils se précipitent pour l'aider à se vêtir et celui qui réussit à le toucher pense recevoir des faveurs spéciales de Faro.

Les tomates sont alors écrasées dans une calebasse et la pulpe jetée au fleuve dans un endroit profond où chaque assistant puise et boit pour communier avec Faro. Le groupe s'en retourne ensuite, emportant dans la calebasse un peu d'eau dans laquelle chacun trempe sa hache personnelle en commençant par celle du patriarche qui, à la fin de l'opération, boit le reste.

En cas de stérilité, la femme demande aide aux trois génies protecteurs de la forge qui passent pour très prolifiques. En dehors de sa présence, le forgeron s'accroupit devant l'autel, les deux mains tendues, tête basse et prie. La femme doit ensuite jurer de respecter scrupuleusement l'interdit des génies invoqués et qui est de prononcer leur nom. Elle peut aussi demander au forgeron d'implorer l'aide des cendres rituelles de l'autel.

Interdits. — Pourvue de force vitale et d'une âme, *ni*, la forge, être vivant, est entourée d'interdits destinés à protéger son intégrité matérielle et spirituelle.

Ces interdits, au nombre de sept, sont propres à la forge et aux autels qu'elle contient; ils concernent non seulement le forgeron, mais aussi ses clients, les passants, à quelque sexe qu'ils appartiennent.

---

(1) *kli dẽ* « fils de testicule » est l'un des quolibets rituels lancés aux forgerons par leurs *senãnku*.

1° Nul ne doit griller de viande sur le feu de forge; ce serait « manger la viande des génies Soba ». L'inobservation de cette règle prive le feu de sa force et provoque l'enflure du ventre du contrevenant (1).

2° Aucune injure ne doit être proférée près de la forge, notamment si elle concerne les sexes (2). Ce serait insulter le feu, la flamme vacillerait et, malgré la soufflerie, aucune chaleur ne sortirait du foyer.

3° La plante du pied ni la paume de la main ne sont jamais présentées au feu, car la forge est vivante et de même que ces gestes exécutés vis-à-vis d'un être humain détermineraient des troubles physiques, de même les parties de la forge sont atteintes et peuvent se briser (marteau ou enclume) ou se déchirer (peau des soufflets) (3).

4° Toute discussion ou mésentente trouble la forge, l'émeut, nuit au travail (4).

5° L'envie, la jalousie, les mauvais sentiments en général, sont néfastes pour le forgeron qui perd son « tour de main ». Il lui faut « avoir le cœur pur (5) ».

6° On ne doit jamais approcher un miroir de la forge; il en prendrait l'âme qui réside dans la hache de l'autel (6).

7° Des rapports sexuels près de la forge l'empêchent de fonctionner (7).

Rompre les interdits du feu de forge revient à attenter à la virilité du forgeron, car les soufflets sont ses testicules. Aussi les artisans se présentent-ils nus devant le fautif pour lui faire honte; on l'assied sur l'enclume commune et on verse sur sa tête de l'eau dans laquelle on a fait tremper du gros mil *(keninge)* qui doit purifier l'engin (8).

---

(1) On dit du coupable : *soko dyeni bala, fa la sababu yalla :* « Il est plein de viande grillée au feu de forge ».

(2) *neni leke fã nda la :* « On ne dit pas d'injures à la porte de la forge. »

(3) *se ndege tere le jira fã na :* « Le *tere* de la plante du pied ne doit pas être présenté à la forge. »

(4) *dadyuguya, filibaiya, kunasirinkunya, konodyuguya le kę fã nda la :* « La méchanceté, la fourberie, l'humiliation, la tromperie ne se font pas à la porte de la forge. »

(5) *numu le keleya nole i bolo na tyε :* « Le forgeron ne doit pas être jaloux, sinon sa main se gâte. »

(6) *dugalle le gere fã na a kunana; ka fã ni la :* « Le miroir ne doit pas approcher la forge, il prend l'âme de la forge. »

(7) *nea le gere fã nda la :* « Aucune saleté ne doit être faite près de la porte de la forge. »

(8) Si la faute est irréparable, le chef agenouillé écrase sur l'enclume

Le propriétaire lésé procède ensuite à la réfection de sa forge. Ayant pris du charbon de bois, un morceau de fer, un morceau de cuir et ses outils, il se rend chez le *koligi* pour lui demander d'exécuter les purifications nécessaires. En présence des parents réunis devant la forge et du coupable, le *koligi*, seul officiant, écrase fer, cuir et charbon, puis va chercher la hache *kongobwona* conservée dans le sanctuaire des outils ancestraux. Il dépose le tout devant l'autel face à l'est et au-dessus d'une calebasse pleine d'eau qu'il tient entre ses mains il récite la prière suivante :

« Toi forge, chose ancienne, tu nous appartiens, à nous Gwonna; un tel a rompu son interdit, je suis son *senãnku* et te fais des excuses à ce sujet. J'ai dit : forge; j'ai dit : forgeron de Gwondougou (1). »

La hache est ensuite baignée dans l'eau à laquelle est ajoutée de la terre extraite de la hutte. Puis l'officiant démolit complètement la forge souillée et la reconstruit avec la boue ainsi obtenue tandis que l'un des témoins Gwonna conserve un peu de cette terre dans une pièce d'étoffe, en guise de témoignage de la reconstruction.

Le forgeron égorge deux coqs sur la nouvelle forge tandis que les ingrédients pilés par le *koligi* sont déposés sur l'autel. Le lendemain, accompagné de ses parents, il va demander au chef du Komo de procéder à une purification. Les sociétaires se rendent chez lui et le masque siffle dans la forge pour chasser définitivement les miasmes provoqués par la rupture d'interdit. Les volailles apportées par les assistants y sont sacrifiées et tous participent à une beuverie de bière offerte par l'intéressé. Le lendemain, le chef du Komo convoque les femmes de ce dernier. Elles posent chacune une fois la tête sur l'enclume, acte qui chasse le *nyama* qu'elles recèlent depuis la faute, puis laissent auprès, en offrande, des cauris et des noix de cola.

LA POTERIE.

Les anciens Bambara ignoraient la poterie. A l'époque où ils vivaient dans des cavernes, ils faisaient sécher leur viande au soleil sur des rochers. Puis ils fabriquèrent des récipients en creusant des pierres dont certaines meules dormantes actuelles

---

trois grains de gros mil, *keninge*, geste qui symbolise la mort du coupable dont il prononce en même temps le nom.

(1) *ε fã, fẽ koro, e ye an gwonna la ye; kari macina ye tnę tyẽ, ne ye senãnku ye, nye delili kę a ko la; ngo fã; ngo gwondugu numu.*

sont une réplique. Quand ils inventèrent le feu, ils firent griller la viande en l'embrochant avec un morceau de bois vert de *sunzun* et en l'exposant à la flamme et aux braises.

Plus tard, ils modelèrent et firent sécher des récipients en argile crue à l'imitation des pierres creuses. L'un de ces récipients ayant été exposé au feu pour y faire cuire les aliments qu'il contenait, les hommes observèrent qu'il changeait de couleur, durcissait et devenait plus résistant. C'est ainsi qu'ils développèrent la technique de la poterie cuite, à l'époque où ils n'avaient encore que des outils de bois.

Cette technique étant liée à l'invention du feu, ce sont les femmes des forgerons qui les premières la pratiquèrent (1). Elles forment aujourd'hui dans chaque village, une société *(lɔ̄)* et possèdent de nombreux autels dont la charge revient à la doyenne.

Le principal d'entre eux, le *dyo kala*, qui représente le pouce des potières, est fait d'un bois taillé en forme de pouce et gravé de traits symboliques. On en frappe légèrement la tête d'une postulante pour lui enseigner son ouvrage; la doyenne verse sur lui son sang en cas de rupture d'interdit intéressant la société. Mais sa principale fonction est d'être le réceptacle des forces spirituelles du groupe intéressé : à la mort d'une sociétaire, l'objet, posé sur le cadavre, recueille l'âme qui s'échappe du corps.

Dans certains villages, les poteries à trous, *ñinlin*, utilisées pour la cuisson du couscous, déposées, à proximité du village, sur le tas de cendres du vaste foyer où sont cuits les ustensiles (cf. pl. IV, *a*) servent également d'autels au moment de la consécration des potières.

Dès son enfance, la potière, à l'exemple de ses aînées, s'exerce à pétrir et à modeler de petits pots, *bokofani* (litt. : petits pots d'argile). Après l'excision, à l'âge requis, elle entre dans la société au cours d'une consécration publique qu'elle reçoit avec d'autres, l'ensemble formant une promotion.

Après un apprentissage de sept jours, les potières décident du jour de la cérémonie qui est célébrée sur le lieu de cuisson près des autels. Chaque sociétaire fournit une épingle à cheveux *(bandigi)* qui en cette occasion la représente, et une peau de hérisson. Dévêtue devant les villageois assemblés, chaque jeune fille s'assied à tour de rôle sur l'autel et une femme âgée examine son sexe pour vérifier la virginité et la bonne exécution de l'excision.

---

(1) Les techniques diverses de la poterie auraient été révélées au village de Gwondougou (cf. p. 114) par les génies Soba du carrefour.

Si la jeune fille n'est plus vierge, elle est publiquement déclarée *dangadẹ̀* (litt. : bâtarde) et se trouve d'office exclue de la société; elle ne pourra jamais recevoir le titre de potière. Dans le cas contraire, la proclamation a lieu aussitôt pour la plus grande joie de l'assistance. Si l'excision n'est pas jugée suffisante, la patiente est nommée potière après avoir subi une nouvelle opération de telle sorte que son sang coule sur la poterie (1).

Une vieille femme vient ensuite s'asseoir devant la promotion et l'instruit : elle raconte l'origine et l'histoire de la poterie, prévient des difficultés du métier (fatigue, brûlures). Elle enseigne la patience envers la clientèle et énumère les règles qui devront être observées toute la vie : avoir le cœur pur, ne point haïr autrui; ne pas entreprendre son travail après avoir eu des rapports sexuels récents; œuvrer en silence; respecter les interdits en général.

Puis elle fait une libation d'huile de karité sur l'autel, en frotte le corps des postulantes qui doivent passer leur langue sur la poterie, ce qui constitue un serment. Des moutons, apportés par les parents, sont ensuite égorgés sur le foyer au nom des potières tandis que les anciennes de la société font cadeau aux nouvelles de plusieurs poteries qu'elles vendront à leur profit en attendant leur premier travail. Ce don est de plus signe d'adoption.

Les ustensiles sont confectionnés avec de l'argile, *mbogo pasa*, prise au fond des lits de marigots ou au bord du fleuve et qui appartient à Faro. Ces lieux ont pour interdits le port de l'indigo et la grossesse : aucune femme enceinte ne peut s'en approcher sans provoquer la mort de l'enfant qu'elle porte, compromettre définitivement la solidité de la poterie, et nuire gravement à la société dont elle est membre.

Un sacrifice annuel est offert par les potières à la fin de l'hivernage quand, le niveau du fleuve ayant baissé et libéré les berges, elles retournent pour la première fois prendre l'argile qui leur est nécessaire. Vêtues de blanc, elles emportent leurs houes et la faucille avec laquelle elles fauchent l'herbe humide utilisée pour couvrir les poteries sur le foyer pendant la cuisson, tandis que la doyenne transporte les autels. Les objets sont mis en tas sur un lit de fibres de *nyama* destiné à les isoler du sol. Deux coqs rouges sont égorgés sur l'ensemble tandis qu'une prière est adressée à Faro pour demander l'autorisation de prendre le

---

(1) Si l'excision n'est pas possible, on remplace l'opération par une blessure obtenue avec la peau de hérisson (cf. p. 188).

mbogo pasa pendant l'année, solliciter sa protection et son aide pour le travail des sociétaires.

Les potières font une offrande annuelle à leurs autels le jour où leur mari sacrifie sur sa forge. Immédiatement après les libations, elles viennent s'accroupir devant l'autel de la forge sur lequel elles jettent une dizaine de cauris. Puis elles se rendent près du *ñintin*, se dévêtent et lui présentent le sexe par devant et par derrière ce geste marquant leur soumission aux génies de la poterie qui sont les mêmes que ceux de la forge. Toujours nues, elles font le tour du tas de cendres laissé par la dernière cuisson et allument un grand feu; celui-ci attire des guêpiers *talugu kononi* qui tournoient au-dessus des flammes. Elles en abattent avec une fronde, les font griller et les réduisent en cendres qu'elles mélangent à de l'huile de karité dont elles s'enduisent le corps avant de se purifier en traversant les flammes. Elles jettent ensuite, en offrande aux génies, des poteries sur le foyer qu'elles éteignent avant de retourner chez elles.

Les potières cultivent en commun un petit champ rituel dans lequel une jumelle sème des pois blancs, *likaninkuru*, symboles de leur main droite. Le produit de la récolte est consommé en commun sur un tertre, *walawala*, après offrande de quelques graines sur les autels et les outils. Une potière dont les ustensiles se brisent au feu de cuisson exécute une purification avec les produits de ce champ.

Les femmes de forgeron, qu'elles soient ou non potières, sont habilitées à pratiquer l'excision des jeunes filles.

CHAPITRE VI

LES CULTES

Les cultes des Bambara, qu'ils soient individuels, familiaux, villageois, ont pour but principal de promoûvoir dans l'ordre le fonctionnement de l'univers qui comporte la préservation et la conservation des individus et de la collectivité dans leurs biens spirituels ou matériels.

Le chapitre suivant n'est pas exhaustif. Un certain nombre de cultes choisis parmi les plus représentatifs ont été décrits. Sous leurs aspects apparemment divers aussi bien dans leurs buts que dans leurs modalités, tous s'intègrent dans le système de pensée bambara.

I. — LES CULTES INDIVIDUELS ET FAMILIAUX.

Sur les autels individuels abrités dans l'enceinte familiale ou conservés dans la pièce privée *(česo)* de leur propriétaire, sont pratiqués les rites « d'entretien de soi ». Ils assurent la stabilité des forces physiques *(čuafebla, čuafebyeni)* et sociales *(dyamana tigi jigi);* ils protègent contre les dangers extérieurs *(mbe ndyugu kā);* ils servent de réceptacles provisoires des âmes au moment de la mort *(kere la boli ni).*

L'homme devant, dans de nombreuses circonstances de sa vie, remédier à toutes déperditions de ses forces, dispose de ces autels qui constituent des dépôts, des relais, dans lesquels se trouvent intégrés, pour une part, certains éléments de sa personne. Ils lui permettent de regrouper ou de revigorer ses forces physiques ou psychiques, pour son bien comme pour celui de la communauté.

A. — *Le česo :*

Dans les demeures, les autels non fixes sont conservés dans une pièce dite *česo* (litt. : maison de l'homme) réservée au propriétaire et qui contient, outre ses armes et instruments agricoles, des autels familiaux, collectifs ou individuels (1) selon qu'il est chef de famille, chef de société religieuse ou célibataire.

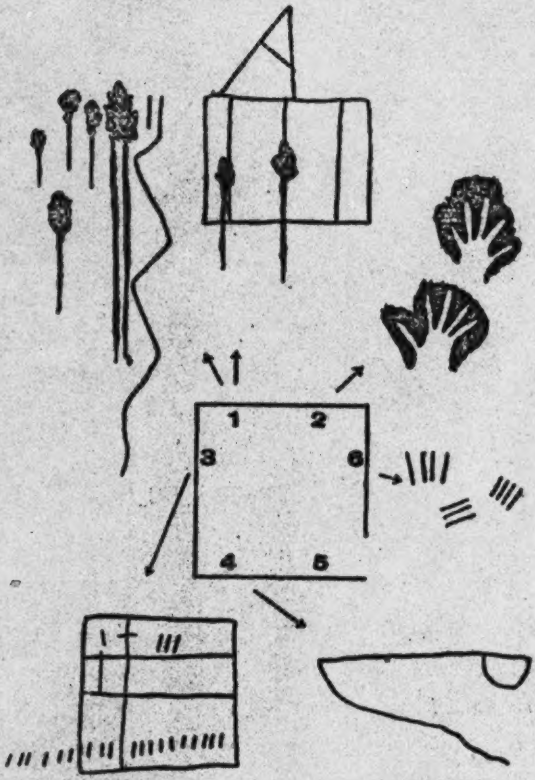

Fig. 10. — Plan du *česo* de Tètè, notable de Banankoroni et reproduction des dessins exécutés sur les murs :

1. Les ancêtres et leur demeure — 2. Les mains des vivants — 3. Le ciel, l'espace, la terre et les 22 catégories — 4. Le fouet du Komo — 5. Tache rouge — 6. Le propriétaire (trois) et ses deux femmes (quatre et quatre).

Ces objets sont pendus au plafond ou dissimulés dans les encoignures à l'abri des regards et des risques d'impureté. Les murs de la pièce, qui sont enduits jusqu'au tiers de leur hauteur de terre noire, symbolisant la présence et la protection de Faro, supportent des peintures et des dessins.

---

(1) La description qui suit est valable pour la maison de Tètè, notable de Banankoroni.

Sur l'un d'eux sont tracés à la bouillie de mil des bâtonnets, les ancêtres, et une ligne brisée, la personne humaine; sur un autre, gravée à la pointe sèche une figure géométrique schématise la demeure ancestrale; elle est accompagnée de deux mains silhouettées (cf. fig. 10, 1 et 2), mains des vivants « croisées et tendues vers le monde des morts ». La main gauche, symbole du désordre, de l'incertitude, des variations de la conscience humaine, est placée en dessous et à droite de l'autre pour rappeler l'engagement de l'homme vis-à-vis de sa dextre, symbole d'ordre, de droiture, de fidélité, de travail (1). Ainsi disposées, les mains expriment la soumission complète des vivants aux ancêtres.

Plus loin sont figurées les divisions de l'univers (fig. 10, 3) à l'aide d'un carré divisé en trois registres symbolisant, de haut en bas : le ciel et l'eau, l'air, la terre.

Dans le carré supérieur à gauche, un trait connote Faro dans sa toute-puissance, seul maître du ciel, de l'eau, de la vie. Un trait horizontal rappelle la domination qu'il exerce sur le monde. Ceux qui suivent sont ses enfants. Le total évoque la forme féminine du génie.

Tous les sacrifices individuels ou familiaux offerts à Faro sont accomplis sur son signe que l'officiant frotte avec du cuivre et des tomates écrasées afin de « remercier le génie qui protège son *dya*, et le prier de donner à ses femmes des enfants ».

Le rectangle central est le domaine de Teliko : air et vent. Le petit trait qui traverse verticalement le carré de gauche représente le génie tentant de pénétrer dans le plan de Faro pour le vaincre. L'échec subi est traduit par le fait que la majeure partie du trait est située dans le domaine de Téliko, lequel n'a pu violer que momentanément la limite de son adversaire.

Le rectangle inférieur délimite la terre, siège des génies Soba. La ligne de 22 bâtonnets qui le recouvre rappelle les 22 éléments de la création « les 22 choses indispensables à l'homme de ce monde ».

Sur un autre mur, le feu est signalé par deux fouets : celui de Faro, la foudre, celui de Komo, la loi. Ils rappellent également « la force de la parole des initiés » et sont exposés à la flamme pour augmenter cette force (fig. 10, 4). A côté d'eux, une grande tache rouge, *dyoli jikin*, peinte à l'ocre, avertit que l'homme est sacrificateur, que le culte a pour base l'immolation. On dit d'un tel homme qu'il « tient compte de la preuve du sang (1) » (fig. 10, 5).

---

(1) En traçant le dessin, on dit : « Je pose ma main droite sur le mur nuit et jour », *neben kinin bolo da koko la šu ni kle.*

Au-dessus du lit, formé d'une simple natte posée au sol, trois traits gravés symbolisent l'homme et deux fois quatre traits les deux femmes qui partagent successivement sa couche (fig. 10, 6).

Dans certains villages, on trace les dessins avec un instrument dit *ngwoni*, utilisé dans les rites « de renouvellement de l'année (2) ».

La pointe, en bois de baobab, avec laquelle on grave est mince comme une planchette et s'adapte à une sorte de raquette en bois de *sunsun* qui soutient un filet de fibres de *da*. Une peau de bouc, dite *soni wolo ni* (litt. : âme de la peau du sacrifice) et deux poignées en bois de *ngolobe* (3) complètent l'ensemble. Le réseau, fait de seize fils de coton teints à l'ocre rouge, *kolo*, est dit *ngwoni kene ba* (litt. : grand espace du *ngwoni*) et représente Faro.

Avant l'usage, l'instrument est lavé avec de l'eau qui servira à la cuisson des aliments de la famille. Puis on presse sur le filet des tomates dont le jus coule dans la peau qui forme poche; tenant la pointe de la main droite, et la poignée de la main gauche, on trace alors les dessins sur le mur du *česo*. Les graines des fruits resteront dans la peau jusqu'à l'année suivante, comme témoins de l'offrande. Puis avec un couteau rougi au feu on grave sur l'objet quatre traits, c'est-à-dire Faro, et deux fois 16 traits, multiples de quatre, symbole féminin. Après chaque entaille, on « pose sur elle un chiffon imbibé d'eau fraîche pour apaiser la douleur ». Le cadre est imprégné de suc de noix de kola et quatre points, matrice des femmes, sont également marqués avec une pierre noire, *kolofin*. Un œuf est ensuite écrasé sur l'objet pour « rafraîchir l'âme de l'ensemble ».

B. — *Les autels :*

Tout chef de famille porte sur lui un petit autel dit *kere la boli ni* (litt. : petit autel du côté), en rapport avec les âmes des membres de la famille dont il a, pour une part, la responsabilité.

---

(1) *dyoli tamaše mine ba.*
(2) Notamment à Banankoroni.
(3) *Combretum micranthum.*

En cas de maladie, il offre sur ce *boli* des sacrifices pour la guérison du patient. En cas de mort, il y maintient provisoirement l'âme pour la porter à l'autel collectif du Komo (1). Il sacrifie également sur cet autel au moment des semailles.

Si le chef est lui-même très souffrant, on pose l'autel sur sa tête pour tenter de remplacer l'âme qui fuit par celle qu'il contient. S'il meurt, on le pose sur sa poitrine pour recueillir son âme qui est ensuite transportée dans le sanctuaire du Komo. Au bout de sept jours, l'objet est remis au fils aîné du défunt qui, devenant à son tour chef de famille, sacrifie à cette occasion deux chèvres au Komo.

Le čuafebla (litt. : placé à la hanche) est confectionné par un père pour son fils lorsqu'il atteint sa maturité et qu'il est à même de mener une vie d'homme, de cultiver pour son compte, de fonder une famille.

S'il n'y a point de Komo dans le village, le père peut le confectionner plus tôt après la cérémonie de la dation du nom.

L'autel est fait de queues d'hyène, de queues de scorpions, de gousses de piment liées avec un petit bâtonnet; il représente la chair et le sang du propriétaire.

Il reçoit un sacrifice annuel au moment des semailles, après l'offrande collective au Komo, dans la cour de la maison, en présence de tous les membres de la famille (2). Il est de plus l'objet de sacrifices lorsqu'une affaire importante est en cours : mariage, démarche privée ou administrative, lutte contre une grave épidémie.

Un fils peut hériter de l'autel de son père et le conserver avec le sien qu'il porte accroché à sa hanche.

Le *čuafebyēni* (litt. : petite corne à la hanche) est composé d'un cauri, pris au grenier de Faro, de cuivre qui sert d'âme

---

(1) La société, les autels, le rôle du Komo sont décrits page 142 et ss.

(2) Le culte rendu sur cet autel fait intervenir le génie Sago dont le rôle agraire, dans l'état actuel de l'enquête, est encore obscur. Il enseigna aux hommes à arroser leurs champs.

« Deux oiseaux *konodyanfi* s'étant mis à tourner en chantant au-dessus de travailleurs des champs, ceux-ci abandonnèrent leurs houes pour les observer. Les oiseaux allaient prendre de l'eau dans leur bec au bord d'une mare voisine et revenaient la verser au pied d'une tige de mil dont l'épi n'était pas encore formé. Les hommes marquèrent la tige pour la reconnaître et observèrent par la suite qu'elle donnait un épi plus beau que les autres. Imitant l'oiseau, ils humectèrent leurs semences, arrosèrent leurs champs, et leur récolte s'en trouva considérablement améliorée. Ils en conservèrent l'habitude et, en remerciement, rendirent un culte au génie Sago dont les oiseaux sont les mandataires et qui vient s'abreuver au *čuafebla*. »

(ni) à l'autel, de piment, de charbon et de miel. Ce mélange est introduit dans une corne de bélier ornée de cauris à son ouverture et souvent enveloppée d'une étoffe rouge portant le même ornement.

L'autel est consacré sur ceux du Komo, au-dessus desquels on le fait passer sept fois. Des victimes sont ensuite égorgées, leur sang recueilli dans une calebasse et le *boli* trempé trois fois dedans avant d'être mis à sécher au soleil.

Son rôle est de protection. Son propriétaire le porte pendant les cérémonies du Komo pour se préserver des sorts, *korli*, lancés dans l'assistance.

Il maintient également l'intégrité des forces de son propriétaire. Si ce dernier s'évanouit ou entre en transes, on le rétablit dans son état normal en renouvelant complètement les ingrédients qui le composent. Lorsqu'on sort de la corne ce qu'elle contient, on retire « à la fois l'âme de l'autel et celle de l'homme ». On rince le récipient avec de l'eau du Niger, puis on procède à la reconstitution qui est assimilée à « une nouvelle prise d'âme ». Chaque membre de la famille vient en aide à l'intéressé : le père donne le cuivre, les femmes, le piment; les enfants le charbon; un cauri neuf est prélevé au grenier de Faro.

Le *mbendyugukã* (litt. : je suis sur l'ennemi) est un autel individuel qui permet à son propriétaire de dominer ses adversaires et même d'attenter à leur vie.

Celui qui désire en posséder un le confectionne après la mort d'un ennemi. Il va secrètement déterrer le cadavre, lui rase les cheveux, lui coupe la langue, et les ongles et prélève les yeux.

Un vieillard possesseur du même autel se rend avec cet objet chez l'intéressé qui prépare et mélange les matières suivant un rituel spécial et les lie à une queue d'hyène. Devant un témoin faisant partie de sa promotion, le vieillard frotte sept fois le nouvel autel sur l'ancien en récitant une prière pour le consacrer, puis le remet à son propriétaire (1).

Le symbolisme des différentes parties qui le composent explique l'usage qui en sera fait par la suite. La langue du mort contient sa voix et donne à celle du propriétaire la force de convaincre ses contradicteurs dans les discussions comme dans les conseils. Les yeux du mort lui permettent de discerner ce que d'autres ne voient pas, ou même d'aveugler ses adversaires qu'on empoisonne avec les ongles. Les cheveux, témoins des autres parties du cadavre, contiennent le *nyama* du défunt et sont donc la partie essentielle du *mbendyugukã*.

---

(1) A cause de sa maléficience, l'autel ne peut être confectionné et remis à son propriétaire que devant un témoin connu.

Le propriétaire de cet autel, qui exclut le chiffre quatre, n'épouse que trois femmes. D'autre part, il ne peut, sans risque de mourir, mélanger ses propres cheveux avec ceux d'autrui.

Du fait de son caractère agressif, le *mbendyugukã* exige des victimes, chiens ou coqs, de couleur rouge. Il donne à son détenteur une force dépassant toujours celle de ses concurrents dans tout ce qu'il entreprend.

Aussi reçoit-il des sacrifices au moment du travail des champs, pour le commerce, le mariage, la guerre et la chasse où l'intéressé risque sa vie; il aide à lutter contre la maladie et la mort. Dès le premier sacrifice, il capte la personnalité et l'agressivité du mort et il la fait endosser au propriétaire, le rendant doublement dangereux pour ceux avec lesquels il est en conflit. Mais en revanche le danger peut se retourner contre lui et, beaucoup plus qu'un autre, il risque sa vie à la moindre rupture d'interdit.

En outre, le Komo qui réprouve de telles manœuvres peut, s'il le juge utile, déléguer le *nyama* du défunt sur celui qui utilise ainsi ses forces spirituelles et le mettre en danger de mort. C'est dire qu'un Bambara hésitera longtemps avant de posséder pareil autel et qu'en fait peu d'individus assument cette lourde responsabilité.

C. — Le siège du chef :

Dans la cour de l'habitation d'un chef de famille ou chef de village est établi un assemblage de bois fiché dans le sol et dit *dyamana tigi jigi* (litt. : appui du propriétaire du monde) (fig. 11). Ce siège symbolise à la fois le chef, son pouvoir, son rôle social et religieux de soutien du groupe (1).

Les morceaux de bois coudés qui le composent sont plantés dans la terre, assez profondément, au-dessus d'une série d'objets. L'un, simplement coudé (en *a*) est dit *sinzin*, soutien; les deux autres, en forme de *t*, sont dits *jigi ba jigi* (en *b*) (litt. : appui du grand appui).

L'ensemble repose sur le corps d'un albinos *(c)* enterré dans une tombe de forme rituelle, couvert de vêtements anciens teints en *wolo* et tachetés de petits points noirs exécutés avec

(1) Le siège décrit ci-dessous a été observé à Banankoroni dans la cour du chef du village. Un siège analogue se trouve à Soroba.

de la cendre d'os *(kolofin)* qui représentent à la fois l'embryon dans la matrice des femmes et Faro. Il est coiffé du bonnet des hommes primitifs *(e)*.

En *(d)* trois piquets, symboles de l'homme, sont plantés au travers de la peau du front de l'albinos qu'on a prélevée et sur laquelle sont exécutées sept scarifications symbolisant la personne (3 et 4). Au moment où la peau est enterrée sous le siège, la prière suivante est récitée :

« J'ai juré en vos noms en frappant sur le *siriku* de Yamba en (enterrant) la peau du front droit et gauche; peau du front (sept fois (1). »

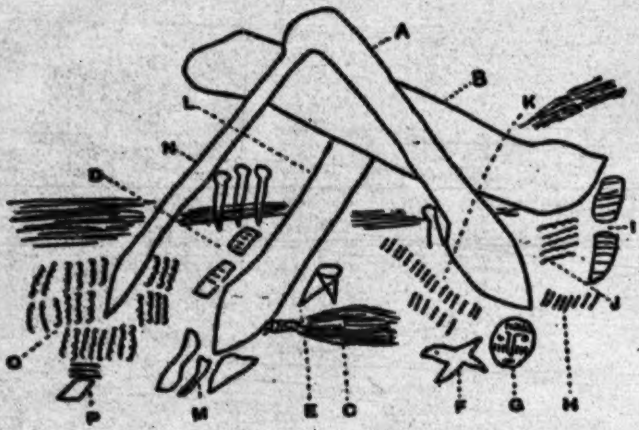

FIG. 11. — Le siège de bois d'un chef de famille de Banankoroni, représentant ses articulations. Il est planté dans la cour au-dessus d'ossements d'un albinos, d'un enfant et de divers objets symboliques. (Dessin d'un informateur.)

En *(m)* sont placés les trois os principaux de l'albinos; les deux fémurs et l'humérus droit, « pour que le chef ait les os blancs » c'est-à-dire qu'il vive si vieux que ses os soient visibles, par transparence sous la peau.

En *(n)* la partie coudée du bois, dite *kuntigi tigiya figi* (litt. :

---

(1) *tena wolo fla kini ani numa yamba ka siriku nye di ka fo ani aw čua ye kena, tena wolo.*

La prière rappelle ici l'action du quatrième ancêtre Yamba qui instaura les sacrifices d'albinos à Faro, et son rôle de chef à partir de cette époque mythique (cf. p. 25), rôle que doit remplir avec la même droiture le chef actuel. Le *siriku* est un petit autel protecteur généralement fait d'une queue d'hyène.

soutien de l'action du chef), est plantée sur les cheveux de l'albinos préalablement rasé (en *o*) dont elle prend la force.

En *(k)* vingt-deux bâtonnets sont le symbole des vingt-deux représentant « l'ensemble des paroles reçues par l'ancêtre Koumabana qui n'a jamais été pris de court par personne ». En les déposant, l'officiant forme le souhait que le chef soit, comme lui, imbattable.

En *(h)* huit bâtonnets de bois de *zekene* (1) figurent les huit ancêtres; ils expriment que l'homme doit être, comme Koumabana, maître des paroles et qu'il doit être « de parole ».

En *(f)* est enterré l'oiseau *talugu kononi*, maître du feu. La prière récitée précise qu'il doit pouvoir pénétrer dans le sol et en sortir librement car, depuis les temps mythiques, il joue un rôle décisif dans les combats (2).

En *(g)* est enterrée la tête du premier enfant décédé dans la famille du chef, pour rappeler la perte subie et éviter qu'elle ne se renouvelle. Sur le crâne sont marqués les signes de la personne, deux fois trois et sept ou deux fois quatre et sept suivant le sexe du disparu. En *(j)* sont enfouis les cheveux, témoins du malheur et de la perte à compenser. En *(e)* est placée la peau du front, partagée en deux; le morceau de droite exprime que Faro est libre de donner l'enfant pour le temps qu'il veut; sur le morceau de gauche sont gravés les huit signes de la parole rappelant que Faro, maître du verbe, est aussi celui du destin du défunt, dont il tient le compte parmi les morts. En *(p)* un petit miroir de pierre polie dite *fara yele*, « pierre qui réjouit », exprime le vœu que le règne soit prospère.

L'ensemble du siège représente le squelette du chef et ses articulations; il est dressé sur divers éléments qui résument ses liens avec les ancêtres et les puissances surnaturelles, marquant sa responsabilité et contribuent à entretenir ses forces. Il est placé de telle sorte que tout ce qui passe dans la cour déambule autour de lui et que rien de ce qui est dit ne soit hors de son atteinte. Centre de l'habitation familiale, symbole de l'homme travailleur et responsable, il est l'armature de la communauté qu'il soutient comme fait le chef par sa résistance physique, sa solidité morale. Le village tout entier « s'appuie sur l'articulation du chef ».

Chaque matin et chaque soir on salue le *figi ba figi* et le *ba figi* afin que le chef résiste, qu'il accroisse sa famille, qu'il fasse respecter les croyances ancestrales. Des offrandes et libations sont faites sur le siège et sur le corps du chef lorsque son autorité est mise en cause. En *(b)* on verse du suc de tomate; en *(a)*, qui représente le coude ou le genou, l'eau qui a servi aux ablutions rituelles de ces mêmes articulations; au pied, en *(n)* sont égorgées des volailles : un petit trou, creusé dans le sol, reçoit, avant le sang, le souffle du sacrifiant; enfin, en *(l)* on verse l'eau qui a servi à laver tout son corps.

---

(1) *Balanites aegyptica.* Cet arbuste pousse, selon une croyance commune, sur la tombe d'un homme mort « avec rancune et tristesse, comme mourut Koumabana ».

(2) Cf. p. 114. Le chef qui est parfois obligé à déclarer la guerre doit pouvoir la gagner.

Ainsi sont purifiées et fortifiées les articulations du chef, sièges de sa force et de sa semence procréatrice.

II. — CULTES DU VILLAGE.

Le village, en tant qu'agglomération physique, et ses habitants sont placés sous la protection des puissances surnaturelles et des ancêtres. Faro est invoqué directement aux points d'eau.

Si le village est situé au bord du fleuve, les rites sont exécutés au Faro *tyin*. S'il n'est pas trop éloigné, les habitants se déplacent pour aller faire leurs offrandes au génie. Il est fréquent que le torrent, la mare ou le puits naturel qui a bien souvent déterminé l'emplacement choisi par les fondateurs, soit considéré comme habité par un avatar de Faro dont le nom est révéré et auquel tous rendent un culte.

D'autre part, chaque village est placé sous la protection du *dasiri*, génie particulier délégué par Faro.

Les ancêtres sont honorés en des lieux divers : aux portes et seuils des maisons, au cimetière et sur les autels de pierre placés aux croisées des ruelles et sur les places publiques. Ces cultes positifs, qui ont pour but l'acquisition de forces bénéfiques, ont pour contrepartie des cultes où les villageois se débarrassent de toutes leurs forces néfastes et contagieuses, notamment aux carrefours, *dangu*, placés sous la garde des génies de la terre, Soba.

Il ne saurait être question de traiter de l'ensemble des cultes des villages Bambara. Parmi ceux-ci trois ont retenu notre attention; ils concernent le *dasiri*, le *dangu*, les pierres d'autels ancestrales.

A. — *Le dasiri :*

Le mot *dasiri* (litt. : qui attache la bouche), désigne aussi bien le génie invisible, représentant de Faro et chargé de veiller sur l'agglomération, que le siège de ce génie, et parfois aussi l'animal qui l'accompagne ou le symbolise.

Le génie hante un rocher, un bosquet ou un arbre situé à proximité du village et dont l'approche est réservée au vieillard chargé de l'exécution des rites (1). Ce siège est généralement désigné par le géomancien lors de la fondation du village, ou déterminé par un événement survenu à ce moment. C'est après cette opération que les constructions sont édifiées, à l'ouest du lieu choisi.

Si le *dasiri* est un arbre, nul ne doit ni brûler ni couper ses branches. Dans de nombreux cas on ne peut l'approcher vêtu de noir ou d'indigo, couleurs représentant l'obscurité. Aucun Peul ne saurait s'asseoir à son ombre (2). Toute infraction à ces interdits entraîne la mort du coupable et prive les villageois de leur protecteur.

Le génie du *dasiri* a parfois pour compagnon un animal qui semble représenter l'ancêtre du groupe. A Ségou, c'est un crocodile; une ânesse à Ouélenguena; à Koulikoro un singe; ailleurs c'est un bouc que l'on remplace quand il meurt. A Konodimini se trouve une série de puits profonds communiquant les uns avec les autres et qui auraient servi d'habitations aux ancêtres. Ces trous sont actuellement occupés par des hyènes considérées comme les avatars des forgerons d'autrefois et qui sont les *dasiri* du lieu.

L'animal du *dasiri* est libre de pénétrer dans les demeures et de manger ce qu'il y trouve. Il est souvent nourri par les habitants. Nul ne doit attenter à sa vie et le contrevenant, affecté d'un *nyama* vengeur dont il ne peut se débarrasser, s'expose à ne pouvoir se marier, même à ne plus être toléré dans son village natal (3).

Comme l'indique son nom, le *dasiri* a pour fonction de maintenir la stabilité et l'intégrité du village. Il est le « soutien de la vie des habitants » et les rites nombreux (individuels ou collectifs) dont il est l'objet témoignent de l'importance de son rôle, comme de la diversité des êtres qui sont invoqués. Les prières s'adressent à Faro pour la pluie, aux ancêtres pour les questions intéressant la famille, au génie de l'arbre s'il s'agit d'arrêter une épidémie. Mais directement ou indirectement tout sacrifice offert au *dasiri* est offert à Faro. Les victimes (ovin ou volaille), les offrandes (bandes de coton, noix de kola) sont toujours de couleur blanche (Cf. pl. 3, *b*).

---

(1) C'est un baobab à Massala et à Soroba, un tamarinier à Sama, etc. Cf. les observations sur le *dasiri* recueillies par Ch. Monteil. *Monographie de Djenné*, p. 137 à 138; L. Tauxier. *La Religion Bambara*, p. 195 à 208.

(2) Les raisons de l'interdit concernant le Peul n'ont pu encore être déterminées. Dans certains villages, le sacrificateur ne consomme jamais ni lait ni beurre, aliments fournis par les Peul aux Bambara.

(3) C'est, à Soroba, le cas du nommé Dji Diara qui, après avoir tué une hyène, n'a pu se marier, aucune femme n'acceptant de lier son sort au sien.

Lorsqu'ils ont atteint six ou sept ans, les enfants lui sont amenés : ils s'assoient sur les racines de l'arbre, sur lequel on crache du suc de noix de kola et sont, de ce fait, introduits dans le culte du village. Ils sont ensuite présentés à tous les alliés *senãnku* et principalement aux forgerons, avec lesquels ils sont tenus de plaisanter.

Chaque année un sacrifice réunissant tous les habitants lui est offert, qui se termine par une consommation en commun de la victime. Les prémices de la récolte lui sont également apportées par le sacrificateur.

B. — *Le dangu :*

Le carrefour *dangu* ou *danku* (litt. : limite de la tête) est habité par des génies Soba qui, sous l'obédience de Faro, interviennent constamment dans la vie des hommes. Tout ce qui est déposé en ce lieu leur revient et nul ne passe sans laisser une offrande ou un témoignage de sa présence : outil, coton brut, graines, tissus. Un voyageur étranger s'agenouille et dépose un peu de cendre ou de coton; sinon il nettoie un petit espace sur lequel il crache avant de partir. Un enfant le salue au passage en disant : « Carrefour, mon âme est entre tes mains ». Lors de tout événement intéressant l'individu, la famille ou la communauté, on y dépose des noix de kola rouges en disant : « Toi, carrefour, je te confie ma tête; tu es mon appui; je dis, toi, carrefour (1) ».

Passage public par excellence, le croisement est le lieu d'élection où il convient de se débarrasser des *nyama* que tout individu détient et transporte avec lui. Tout ce qui est impur, néfaste, indésirable pour l'individu ou la communauté est laissé au carrefour. On y dépose aussi les objets ayant appartenu aux morts. Les forces dont on s'est ainsi défait sont censées être absorbées par les génies pour lesquels elles constituent une sorte de nourriture qui sera rendue aux hommes sous forme de dons débarrassés de toute souillure (2).

---

(1) *e dangu m be ni ku kalifa, do i la ni jigi be fɛ, ngo e dangu.*
(2) Cf. p. 201.

Plusieurs exemples illustrent le rôle joué par le carrefour dans la communauté :

Tout homme qui a blessé un animal, écrasé un insecte, est atteint dans son propre *lere* par celui de la victime. Il se rend au carrefour, s'agenouille et prie en déposant une bande de coton, un œuf et des cendres. La bande de coton tissé, symbole de la parole, est offerte comme vêtement, les œufs comme purification. Quant à la cendre, élément pur par excellence car le feu « a retiré » du bois son *lere*, elle représente ici l'homme dont « on a retiré la force mauvaise agissant sur son *lere* (1) ». Quiconque commet un meurtre d'animal procède de même avec la peau sur laquelle il jette des cauris. Dans les deux cas, les génies absorbent *lere* et *nyama* qui viennent s'ajouter à leurs propres forces et libèrent le coupable.

Des purifications collectives sont effectuées sur le *dangu* pour la rupture d'interdits sexuels concernant les champs cultivés et la brousse. L'impureté résultant d'une copulation commise en plein air se transmet à toute la terre qui appartient au village : les arbres de la brousse ne donnent plus de fruits, les récoltes périclitent. Autrefois les deux amants surpris étaient dépouillés de leurs vêtements qui étaient brûlés sur le *dangu* après qu'ils aient fait trois fois le tour du village en partant sur la gauche. Les coupables étaient ensuite bannis. Actuellement, si l'état des cultures fait supposer qu'un tel acte a été commis, on réunit toutes les sortes de graines cultivables dans un panier que l'on place au carrefour. Puis tous les habitants et leurs animaux domestiques font trois fois le tour du village tandis que des simulacres de combats ont lieu entre les hommes montés sur leurs chevaux. Après un sacrifice offert sur le *dangu*, on va semer partout les graines ainsi purifiées.

Des offrandes sont faites aux génies du carrefour au moment des semailles pour leur demander protection. Ce rite est obligatoire pour qui sème du coton, cette graine ayant été remise aux hommes par ces génies; le cultivateur pose les semences, s'assoit face à l'ouest et crie trois fois le nom du *dangu* au-dessus des graines. Il en laisse trois petits tas en hommage avec des fibres de la plante et égorge une victime avant d'aller ensemencer sa terre. Quand les pieds ont levé il cueille des branchages et revient au lieu du sacrifice pour les balayer et les imprégner ainsi du *nyama* du *dangu*. Il les fait ensuite sécher, les pile, les tamise, les mélange avec la terre relevée sur place. Dans son champ, il crie le nom du *dangu*, et jette le mélange à toute volée en direction des points cardinaux, au zénith et au sol. Quand les plantes sont arrivées à maturité, il cueille les sept premières graines écloses, les apporte au même lieu et offre un sacrifice d'action de grâce.

---

(1) Cf. p. 61 et ss.

C'est aussi au carrefour qu'est déposé par les vieillards l'enfant dont la légitimité est douteuse. Si le devin consulté alors déclare qu'il s'agit d'un bâtard, il est privé de la protection des génies et censé ne pouvoir survivre au *nyama* qu'il a pris sur la place. En ce même lieu sont enterrés les enfants anormaux, notamment les hydrocéphales considérés comme indésirables. Le fuseau d'une morte y est déposé avec le balai qu'elle utilisait habituellement.

Mais le rite qui caractérise le mieux le carrefour est celui auquel procède le village en difficulté : on y plante la masse de bois primitive, *gosilande*, et on la frappe d'une tige de mil, à la fois pour chasser le mal et pour faire sortir de l'instrument de nouvelles techniques propres aux réparations (1).

C. — *Autels de pierre :*

Dans les villages, les ancêtres fondateurs sont représentés aux croisées des ruelles et sur les places par des pierres sous lesquelles sont enterrés divers objets (cf. pl. V, *b*).

A Sama, quatre grosses pierres, enchâssées dans un terre-plein d'argile, symbolisent à la fois les points cardinaux et les ancêtres. Elles sont en rapport avec le *dasiri* et reçoivent les mêmes offrandes. A Banankoroni, le *fara ba* est partiellement enterré. Sous la pointe se trouve un crâne d'albinos qui représente celui des premiers ancêtres et leurs ossements. Deux houes placées l'une près de l'oreille droite, l'autre près de l'oreille gauche, expriment que « l'homme qui cultive la terre n'entendra jamais une parole humiliante ». Sous le menton, une autre houe rappelle que les villageois fidèles à la culture ne connaîtront pas la famine. Au-dessous de la houe, un *siriku* (2) les protège contre ceux qui cherchent à leur nuire et leur apporte « la chance de l'hyène »; il signifie également que certains de leurs ancêtres se sont autrefois changés en hyène. Un couteau de circoncision rappelle que tout mâle est circoncis, toute femme excisée (fig. 15). Enfin, trois os d'albinos et un petit tas de cuivre témoignent de la présence et du pouvoir de Faro. Des dessins sont tracés sur ces pierres au moment des cérémonies collectives dites « de renouvellement de l'année (1) ».

---

(1) Cf. p. 105.
(2) Cf. p. 135, n. 1.

III. — LES SOCIÉTÉS RELIGIEUSES.

Les membres des groupes formés par les familles *lato sensu*, ayant à leur tête le patriarche et possédant des terres indivises, appartiennent à d'autres ensembles, dits *flá*, formés par les promotions de circoncision, d'excision ou d'initiation, groupées autour d'autels qui leur sont propres et qui possèdent leurs rituels particuliers.

Ces institutions portent le nom général de *dyo* (2) signifiant « construire, édifier » et aussi « secret ». Ce terme rappelle que chaque individu constitue un élément de l'ensemble formé par la société.

Les grands *dyo*, dont le but principal est d'assurer la conservation des forces spirituelles de leurs membres et l'entretien de leur personne dans la vie courante sont, pour les hommes, le Komo, le Kworè, le Nama, le Kono, le Nago, le Nya. Les femmes sont groupées autour de *muso dyo* sur lesquels peu de renseignements ont pu être recueillis. Les incirconcis font partie du *ndomo* (ou *čeble*). De plus, les sociétaires sont répartis en groupes qui peuvent être indépendants des promotions et qui sont désignés par des signes.

Le Komo.

Le mot Komo désigne le complexe formé en principe dans chaque village par les sociétaires vivants et morts, le sanctuaire et ses autels *(boli)*, leur chef responsable, le masque. Il est dominé et protégé par la puissance invisible de Faro et par la présence d'un génie particulier auquel il est consacré. Ce dernier hante un arbre situé dans le bosquet où ont lieu les cérémonies; il est respecté pour avoir enseigné, aux temps mythiques, l'origine et le rôle des *boli*, les modalités du culte; il vient s'abreuver du sang des victimes.

---

(1) Cf. p. 206 et *ss*.

(2) Il convient de distinguer les sociétés religieuses, *dyo*, décrites dans cet ouvrage, des sociétés d'entraide, *tõ*, à caractère apparemment laïques qui sont également très nombreuses et existent dans tous les villages bambara.

Ces organismes sont fortement hiérarchisés et placés sous la direction de chefs responsables. Leurs membres exécutent en commun les travaux qui intéressent la vie du village : abattage des arbres, défrichage, culture des champs individuels ou collectifs, construction des maisons, etc., et participent aux cérémonies du mariage. L'étude détaillée des *tõ* dont le rôle est considérable serait indispensable pour la compréhension de l'organisation sociale et de l'économie de cette population.

La participation du *tõ* aux travaux agraires sera décrite par Mme de Gana dans *Techniques et rites de l'agriculture* (à paraître).

Le Komo est d'autant plus puissant qu'il est plus ancien : les termes *trodeni* (*ni*, petit) et *tro ba* (*ba*, grand) lui sont donnés suivant qu'il est plus ou moins récent.

Chaque Komo a, de plus, un nom particulier (1). La société du Komo, *komo tyew* (litt. : hommes, gens du Komo) est composée de l'ensemble des circoncis, à l'exception des griots qui ne peuvent en aucun cas y pénétrer, après une initiation qui se fait par promotion dont les membres sont dits *tonyaw*. La hiérarchie est rigoureusement respectée : une promotion antérieure aura toujours le pas sur celle qui la suit dans toutes les circonstances de la vie profane ou religieuse. Le Komo reconnaît un chef, *komotigi* (litt. : maître ou propriétaire du Komo) qui appartient de préférence à la caste des forgerons et dont la fonction est héréditaire. Le fils prend automatiquement le commandement de la promotion qui suit celle de son père. Au décès de ce dernier, il change de promotion et devient chef de celle du défunt. Au cas où le propriétaire du Komo meurt jeune et que son fils aîné, héritier de la charge, ne soit pas encore circoncis, on lui fait subir l'opération dans la nuit même qui suit le décès et dès le lendemain il est proclamé chef (2).

Le chef du Komo est, de par l'importance de ses fonctions, tenu de respecter un grand nombre d'interdits : il ne peut notamment pénétrer dans le sanctuaire s'il n'est pas chaste depuis vingt-quatre heures. Si l'interdit est rompu, il lui faut prévenir les hommes de sa promotion et égorger deux coqs sur les autels pour se purifier. Sa femme est initiée (car vivant dans l'intimité du chef elle est susceptible d'apercevoir certains objets rituels généralement cachés aux femmes), mais elle n'assiste à aucune des cérémonies où seuls les sociétaires sont admis. Elle ne peut commettre d'adultère sans provoquer l'exclusion de son mari non seulement comme chef mais comme membre de la société.

---

(1) Selon l'étymologie indigène, *komo* signifie « prise *(mo)* de la mare *(ko)* ». D'après L. Tauxier « Komo en Bambara veut dire mauvais, méchant, difficile » (voir *Dictionnaire bambara-français* de Mgr Bazin, p. 308).

Sur le radical Ko ou Kon cf. M. Delafosse. *Terminologie religieuse au Soudan*. l'Anthropologie, décembre 1923, cité par L. Tauxier. Un certain nombre d'observations concernant la composition et le fonctionnement de la société du Komo ont fait l'objet d'un chapitre de L. Tauxier dans la *Religion Bambara*, p. 272 à 310, qui cite les ouvrages publiés par Ch. Monteil et l'abbé Henry. Cf. également : Moussa Travélé. *Le Komo ou Koma*, Outremer 1929; H. Labouret. *Les Manding et leur langue*.

(2) L. Tauxier dans *La Religion Bambara*, signale que dans certains villages, le chef du Komo n'exerce son pouvoir que pendant un septennat. Il serait procédé à une élection au bout de sept ans et la fonction ne serait pas héréditaire.

Le chef est souvent assisté de deux vieillards appartenant à sa promotion et dont il prend conseil dans tous les cas qui intéressent la communauté. De plus, il est toujours secondé par de jeunes initiés. Si l'un d'eux se fait remarquer par sa diligence, son obéissance, son habileté, il peut parfois, sur décision des vieillards, accéder à une promotion supérieure à la sienne et, de ce fait, se trouver sur un pied d'égalité avec ses aînés.

Les responsabilités du chef de Komo sont considérables. Il est le gardien d'autels qui, comme nous le verrons plus loin, contiennent toutes les forces spirituelles de la société; il est seul habilité à leur manipulation et procède à tous les rites qui en dépendent. Il gère le patrimoine du groupe (grains et espèces) qui est placé dans des greniers à mil ou à cauris et sur lequel il peut prélever, en cas de nécessité, de quoi consentir des prêts à intérêts aux sociétaires qui en font la demande (1).

Mais la fonction, honorifique et avantageuse à bien des points de vue, comporte, plus encore que des droits, des devoirs auxquels le chef ne peut se soustraire : il ne doit en aucun cas abuser de son pouvoir; il ne peut prendre aucune décision sans l'accord des sociétaires et ni même agir, dans les affaires les plus minimes, à l'insu d'un seul d'entre eux. Chacun est tenu au courant des moindres détails concernant l'activité générale du Komo et chaque promotion doit, dans son entier, être prévenue au même moment. Contrevenir à ces règles serait s'exposer aux plus grands dangers. Tout comme un chef de famille indivise dont le pouvoir est loin d'être absolu (2), le responsable doit exercer son office avec rigueur, honnêteté et pondération.

A. — *Création et consécration du Komo :*

Les rares villages ne possédant pas de Komo sont rattachés à celui d'un village voisin. Si une agglomération décide de créer une société indépendante, elle délègue ses vieillards auprès d'un Komo important *(tro ba)* dont le responsable, après l'exécution de rites divinatoires, leur fait jurer soumission aux autels qu'il va leur confier après les avoir consacrés; ils s'engagent à ne jamais cesser le culte, à ne jamais omettre aucun sacrifice ou offrande. Les sacs apportés par les demandeurs ayant été remplis de produits nécessaires (miel, piment, charbon, or, cuivre, etc.), sont inondés du sang des victimes fournis par les impétrants et frottés sur les autels du *tro*. Le nouveau Komo devient le *trodeni* de celui dont il reçoit ainsi une part de force. Au cours de la nuit qui suit la consécration et le transfert diurne des *boli* (1) un sociétaire emporte dans son village un *pembele* également consacré par les donateurs. Ce déplacement nocturne rappelle l'époque du règne de Pemba antérieur à l'apparition de la lumière et à l'alternance régulière des jours et des nuits.

---

(1) Cf. S. de Ganay, *Un jardin d'essai et son autel chez les Bambara*. Journal de la Société des Africanistes, t. XVII, 1947, p. 57 à 63.

(2) « Le *fa* mandingue, dit Henri Labouret, dans *Les Manding et leur langue* paraît moins libre dans ses actes et décisions que le maître de l'ancienne fraternité taisible. Loin d'être l'autocrate impérieux et volontaire que l'on se plaît à décrire parfois, il me semble plutôt remplir le rôle d'un administrateur délégué, d'un agent d'exécution, tenu de se conformer aux directives arrêtées par le conseil domestique formé des vieillards et des chefs de ménage (p. 54 et 55). Le but poursuivi par le chef est d'administrer sagement un patrimoine qui restera toujours indivis » (p. 57).

De retour au village, la société, réunie autour du responsable, organise son rituel, choisit des officiants, se procure les masques nécessaires, construit le sanctuaire et y dépose les autels sur lesquels des sacrifices sanglants seront effectués quotidiennement durant les premiers temps.

B. — *Autels du Komo :*

Les autels *boli* occupent une place insigne dans les représentations religieuses et cosmogoniques de la société groupée autour d'eux. D'une part ils sont un résumé de l'univers du fait de leur composition. D'autre part ils sont un résumé de la société car tous ses membres s'y trouvent présents; en effet, chacun d'eux a fourni une part des éléments qui les composent après l'avoir imprégnée de sa personne en salivant dessus dans le même temps qu'il prononce son nom.

Les autels du Komo sont conservés dans un sanctuaire, le *komo so* (litt. : maison du Komo), hutte de taille moyenne, construite soit dans la demeure du chef, soit en brousse à quelque distance du village. L'approche de cet édifice qui est placé sous la protection de Faro est interdite à quiconque. Le chef lui-même n'y pénètre jamais seul. Au sommet de la hutte, dans les branchages qui forment le toit, est censé naître et vivre un serpent qui est l'âme et le gardien du sanctuaire (pl. VI, *a*).

La hutte est divisée en étages dans chacun desquels est déposé un autel. Le plus élevé contient en son centre le *nimara boli* (litt. : autel des âmes) qui, comme l'indique son nom, est le réceptacle des âmes des défunts ayant appartenu à la société et de celles des animaux sacrifiés (1). Il contient, de haut en bas, les cheveux des morts, du cuivre pour les âmes des animaux, de l'or pour celles des hommes. Ces divers ingrédients, placés dans un double sac, reçoivent le sang sacrificiel qui coule entre les deux enveloppes et les imbibe.

---

(1) Les *boli* sont rattachés, comme il est dit p. 92, à une catégorie comprenant le jour et le soleil.

Le *nimara boli* est entouré de petits autels individuels ayant servi à capter les âmes des agonisants pour les amener au réceptacle commun (2). Ces petits *boli* ne séjournent dans la hutte que durant les sept jours suivant le décès et sont rendus au successeur du défunt (fils ou frère); ils ne restent suspendus définitivement dans le sanctuaire que si le mort n'a pas de descendance. Ils sont soutenus par deux poteaux de bois dits *čin la bere* (litt. : bâtons qui prennent l'héritage) qui conservent les âmes de ces morts et qui contiennent en haut la poudre de bois de la pirogue de Makanta Djigui et en bas de l'or. Ces poteaux alimentent les *boli* qu'ils supportent et les âmes des défunts qu'ils contiennent, montrant ainsi que le « Komo n'abandonne jamais personne et que les hommes sans descendance sont avec lui pour l'éternité ».

Les interdits concernant le *nimara boli* sont nombreux et sévères : il ne peut être extrait du sanctuaire que pour des funérailles (3). Aucune femme ne doit jamais l'apercevoir. Aucun culte étranger ne saurait être célébré en sa présence.

Au second étage est placé le *ñõ boli* (litt. : autel du mil) qui détient une force vivifiante destinée aux semences du groupe. Il se compose d'un sac divisé en six poches qui contiennent (de haut en bas) à gauche : petit mil, fonio et cuivre; à droite : gros mil, riz et autres céréales, or. Le sac, ouvert à son sommet, reçoit le sang des victimes offertes, au moment des cérémonies agraires (semailles et récoltes), par les membres de la société du mil, *ñõlõ*. Il doit toujours être humide de sang sacrificiel, afin que les semences qu'il contient soient toujours vivantes.

Le *ñõ boli* est également relié à deux poteaux dits *ñõ boli kane* (litt. : protection du *ñõ boli*) contenant dans un évidement du mil et de l'or, par des fils qui lui apportent les forces dont ils sont dépositaires.

---

(1) La préoccupation de la conservation de tous les éléments vitaux est constante. Les âmes des animaux sacrifiés sont l'objet des mêmes soins que celles des humains. Ils participent comme eux à la résurrection promise à tout ce qui a vécu.

(2) Cf. p. 132.

(3) Cf. p. 191.

Le *ñō boli* est chargé de la surveillance de la croissance des céréales : germination, formation des épis, mûrissement. Il est responsable de la « tête du mil (1) ».

L'interdit principal du *ñō boli* est la perte ou le gaspillage de nourriture. Même si un grain de céréale tombe sur le sol, ou dans le feu, les membres de la société du mil sont tenus de le recueillir et de le consommer, sinon le Komo punit la faute et la récolte en pâtit.

Le troisième étage contient le *nyama boli*, dépositaire des forces, *nyama*, des individus morts de mort violente (meurtre, guerre, justice). Le *nyama boli* recélait autrefois une pierre dite *gōgoro kurube*, considérée comme la « mère » des pierres lancées par les frondes des guerriers. Elle était extraite du sac en cas de guerre et portée sur le champ de bataille par un jumeau marchant en tête des troupes. Sur sa surface était gravée une série de traits représentant le roi, les combattants et leurs femmes. Elle recueillait toutes les âmes des morts au combat et recevait en offrande leur sang.

Le *nyama boli* est, de plus, responsable de l'âme des semences et dépositaire de celles des animaux sacrifiés; il reçoit aussi le « *nyama* des paroles » des sociétaires. Il partage avec le *ñō boli* la responsabilité des cultures et confère de ce fait à la société une grande puissance.

Le sac contient dans sa partie inférieure un mélange de sang coagulé et d'or et dans sa partie supérieure un mélange de poudre de charbon, de piment et de miel ayant pour effet de rendre puissant le *nyama* dont il est chargé. L'interdit du *nyama boli* est la mort rapide des victimes qui lui sont sacrifiées; les lentes agonies seules lui confèrent des *nyama* efficaces.

Sur le sol du sanctuaire sont déposés, outre le costume de danse du masque, *nya*, de petits autels destinés à la vente, soit pour la création de nouveaux Komo, soit pour des fins individuelles. Des cornes d'animaux, *byé ba* (litt. : grande corne) et *byé ni* (litt. : petite corne) y sont également placées; elles contiennent de la poudre à usage rituel, *korli*, dont l'action dangereuse s'exerce pendant les sorties du masque (2).

---

(1) Chaque cultivateur est propriétaire d'un *ñō boli* individuel qui est placé sous la dépendance de celui du Komo. De plus, le *ñō boli* du Komo est en rapports étroits avec le *ñō boli* du Kworè, société qui a pour but principal l'obtention des pluies nécessaires aux cultures (cf. p. 166). Le rôle agraire du Komo sera décrit par S. de Ganay dans *Techniques et rites de l'agriculture*.

(2) Les différents mélanges à usages religieux des Bambara contiennent

A l'extérieur de la hutte, à hauteur du *nyama boli*, un crochet retient les vêtements de ceux qui sont tués par le Komo. Le sanctuaire, comme le vêtement du masque, est enduit de terre noire prise au bord du fleuve qui représente Faro, et recouvert de plumes de même couleur. D'une façon générale, le métal contenu dans les autels du Komo lui donne force et vie. Le plus puissant est l'or, ensuite viennent l'argent, puis le cuivre. Chacun déposant une offrande selon ses moyens, la puissance de l'autel dépend donc, dans une certaine mesure, de la richesse des sociétaires.

Les sacrifices réguliers sur les poteaux dont les montants contiennent parfois un peu de bois de la pirogue historique de Makanta Djigui leur permettent de « maintenir la pression, la vie » dans les différents autels.

Ceux-ci ne sont extraits du sanctuaire qu'à l'occasion des funérailles et pour les rites agraires. Pour les sorties de masques et les danses, on utilise parfois des répliques habituellement déposées dans la demeure du chef.

Le *pembele* est le protecteur de la société, le réceptacle des forces *(nyama)* du groupe. Il est rarement déposé dans le sanctuaire et le plus souvent conservé par le chef qui ne l'exhibe jamais; il l'arrose parfois d'eau de pluie symbolisant l'œuvre de création.

Des dessins tracés sur le sanctuaire par le chef ou un vieillard avant la cérémonie annuelle dite « anniversaire du Komo » rappellent qu'il est le lien entre les invisibles et les sociétaires. Outre l'image de la création issue de la vibration initiale (cf. fig. 2), on dessine parfois la tête de l'ancêtre Koumabana, des figurations de jumeaux et les vingt-deux signes fondamentaux Enfin des houes soulignent le rôle agraire du Komo (1). Des greniers destinés à la conservation des graines des prémices

---

souvent des ingrédients réduits en poudre : poudre de bois, de charbon, même de métaux précieux. L'enquête n'a pas permis de dégager encore le rôle de cette pulvérisation. Mais la mention qu'en font les Bambara et l'usage fréquent des *korti* montrent l'importance attachée à ce mode de préparation.

(1) Au moment où l'attention des spécialistes est attirée vers la répartition des pouvoirs religieux et sociaux dans les sociétés antiques, il est intéressant de souligner que les autels de Komo présentent une très nette tripartition : le premier est utilisé pour la conservation des forces spirituelles (âmes) du groupe; le second préside uniquement aux rites agraires; le troisième est attaché à la conservation des principes spirituels des individus morts de mort violente et des grains cultivables; il jouait un rôle important au cours des guerres. Cette tripartition fonctionnelle s'apparente en bien des points à celle qui a été relevée par M. DUMÉZIL dans les sociétés indo-européennes.

utilisées pour les offrandes sont placés à côté des sanctuaires ou dans la demeure du chef (1).

C. — *Le masque :*

L'homme qui porte le masque pendant les cérémonies incarne le Komo. La tête est sculptée en forme de visage humain ou animal. A Konodimini, elle représente la panthère; à Soungoba, une cigogne; un aigle à Banankoroni, un éléphant à Banoumbougoula, un vautour à Ségoubougou. Le masque est le plus souvent agrémenté d'éléments empruntés à plusieurs animaux. C'est ainsi qu'à Soroba, le crâne et les cornes sont ceux d'un buffle, mais la mâchoire est celle d'un crocodile. Il est de plus orné de plumes de canard sauvage (2).

La tête du masque est le plus souvent confectionnée en os (crâne humain ou crâne d'hyène), ou en bois et peinte de couleur blanche, noire et rouge. Le masque proprement dit est exécuté de façon à effrayer les futurs initiés, car, de même qu'on redoute l'âme d'un défunt qui réclame des offrandes ou se manifeste pour entraîner avec lui sa parenté, de même on redoute cette face qui, en contact avec l'autel des âmes *(nimara boli)* reflète le visage des ancêtres. Elle représente aussi Faro : le masque est parfois pourvu d'une longue barbe, symbole de ses cheveux, et légèrement crépi de terre noire prélevée au bord du fleuve et imprégnée de sa puissance; il est parfois enduit du sang d'une jeune fille morte au cours des cérémonies, en souvenir des vierges autrefois offertes annuellement à Faro.

Sur le crâne, sont fichées des flèches de cuivre *(kun bye)* et attachées des amulettes *(kun kanana)* destinées à attaquer les indésirables (non initiés, femmes ou enfants) qui s'approcheraient du lieu de danse.

« Les yeux du masque sont grands, afin que le Komo voie et dévoile tout; les narines sont bien ouvertes car il doit tout flairer, sentir le bon et le mauvais des choses. La bouche est tordue, car le Komo ne parle pas, il siffle et chante seulement. Les oreilles sont vastes pour qu'il entende tout, même ce que chacun dit secrètement dans son cœur. Le menton du masque est carré, signe de pureté, de décision et de clairvoyance. » Pendant les cérémonies, il ouvre silencieusement la bouche. On dit que grâce à la présence de l'autel des âmes, *nimara boli*, le « bonheur le pénètre (1) ». En chantant, il redistribue cette félicité aux assistants et c'est pourquoi il répète les couplets.

---

(1) Dans le village de Soroba le sanctuaire comprend sept greniers : trois pour le petit mil, *sanõ*, quatre pour le gros mil, *keninge*. Sept est le chiffre de la personne, trois celui de la masculinité (le petit mil est mâle), quatre celui de la féminité (le gros mil est femelle).

(2) Un informateur, qui a assisté à des cérémonies du Komo dans de très nombreux villages, affirme n'avoir jamais vu deux fois le même masque.

D'une façon générale, le masque a pour interdit les femmes, les griots et les non-initiés. Mais à chacun des éléments qui le composent est affecté un interdit particulier. Ainsi la tête du masque ne doit jamais toucher le sang menstruel. Toute infraction entraînerait « un changement à vue de la face » et les autels contenus dans le sac porté par le danseur resteraient sans force. Pour cette raison, aucun sociétaire ne doit assister aux cérémonies si sa femme est dans sa période menstruelle.

Le vêtement porté par le danseur est maintenu par une sorte de carcasse *(bry)* faite de bois *ngolobe* (2) utilisé pour sa souplesse et entouré d'une légère couverture de protection. A l'intérieur du *bry*, sont suspendues diverses flûtes *(komo fle)* noircies du sang des sacrifices offerts pour « améliorer le son » et qui seront utilisées au cours des cérémonies. Elles sont accompagnées d'un petit sac rempli de toiles d'araignées de rechange. Tout individu qui pénètre sous le *bry* pour danser doit auparavant s'abstenir de rapports sexuels pendant un certain laps de temps.

Le vêtement *(nya)*, qui recouvre la carcasse, est confectionné avec ceux des individus tués par le Komo (3). A l'inverse du *bry*, qui n'a aucun rôle actif mais sert uniquement à isoler le danseur à l'intérieur du masque, son rôle religieux est très important. Il représente le « corps et la valeur des ancêtres ». Il n'est pas l'objet de sacrifices sanglants mais recouvert d'une poudre faite avec les os des individus tués par le Komo et à laquelle est ajouté du suc de noix de cola. Le tissu est teint avec de la terre noire prélevée au bord du fleuve en échange d'une petite offrande de cuivre, d'or ou de céréales. Sur l'étoffe sont exécutés des dessins dits *komo mani* (litt. : petites personnes du Komo) représentant d'une part Faro, reconnaissable à ses longs cheveux noirs et d'autre part les huit ancêtres qui ont reçu la parole; à l'ocre rouge sont figurés tous les premiers instruments de culture des Bambara. Sur le *nya* sont ensuite cousues des plumes d'aigrettes noires, blanches et rouges qui dissimulent aux regards la terre noire, séjour du génie. Ces plumes sont l'objet, deux jours avant toute sortie, d'offrandes de suc de noix de kola, de bouillie de mil, de sang de volaille.

---

(1) *here dun*, litt. : pénétration du bonheur.

(2) *Combretum micranthum*.

(3) Quand un sociétaire fautif ou un non-initié sont « tués » par le Komo, leurs vêtements lui sont offerts.

Comme la tête du masque, le vêtement ne doit être vu ni des femmes ni des non-initiés. « Il changerait de couleur, se ternirait, rendant une purification nécessaire. »

Le corps du masque est muni de deux bras dans lesquels s'introduisent ceux du danseur et qui se terminent par un crochet, *koli* (1), imprégné de terre noire du fleuve et dont le cuivre, métal de Faro, a macéré dans le venin de vipère avant la confection. Ces crochets sont aussi annuellement imprégnés de venin rouge mêlé de piment. Toutes ces préparations en font des armes dangereuses employées à des fins diverses au cours des cérémonies.

Le crochet droit (*kinin koli*) est utilisé pour tuer les coupables ou les indésirables : une légère blessure entraîne la mort qui est attribuée à Faro. Le crochet gauche défend les sociétaires contre les dangers que présentent, même pour eux, l'action et les émanations du crochet droit; il contient deux parcelles de poterie noire, interdit de Faro, qui écartent, donc diminuent, la puissance de ce dernier. Au cours des danses, le Komo désirant protéger un de ses ressortissants l'évente de son bras gauche pour atténuer la force du droit. Au cours des funérailles, un geste du crochet gauche marquera l'appartenance du défunt à la société et lui assurera protection dans l'au-delà.

L'interdit des crochets de cuivre est le même que celui de Faro concernant ce métal. De même qu'on ne traverse pas le Niger en portant un objet, un bijou de cuivre, de même nul ne saurait porter du cuivre pour assister aux cérémonies du Komo.

Le port du masque, brigué par plusieurs initiés à chaque cérémonie, est attribué à l'un d'eux par le chef. Ce rôle comporte des risques qui sont atténués par certaines précautions, comme de s'abstenir de tous rapports sexuels avant la cérémonie. Le jour venu, les vieillards font boire de la bière de mil au porteur jusqu'à complète ivresse; puis ils appliquent un moment sur son menton et son abdomen le *nyama boli* qu'il portera dans un sac au cours de la cérémonie. Il revêt aussi un bonnet rituel qui recèle parfois une parcelle de celui du célèbre Soma Moriba Sidibé. Le masque est ensuite ajusté sur sa tête, la flûte glissée entre ses dents, tandis que le chef l'assure de son accord et lui confirme qu'il ne court aucun danger.

---

(1) *koli* signifie ongle, ergot en parlant d'un coq et par extension crochet.

D. — *Les instruments de musique :*

Les sorties du Komo sont accompagnées de rythmes joués sur des tambours, *dyiri kolo* (litt. : os, bois) faits de peaux tendues sur des demi-calebasses, accompagnés de flûtes et de cloches. Les joueurs, recrutés parmi les membres musiciens de la société, sont astreints à certaines précautions à cause de la proximité du masque pendant l'exécution des danses. En effet, si ce dernier lance un maléfice *(korti)*, ils peuvent sans le vouloir respirer la poudre dangereuse et il est prudent de se protéger en prenant à l'avance le contrepoison.

La cloche de fer du Komo, *kolōkolō* ou *grinda*, est conservée avec certains autels dans la demeure du chef; elle est jouée par un porteur spécial, *grindavo* ou *nadara koloyo*.

Un mythe rappelle l'origine de cette cloche. « Un petit enfant qui allait jouer au carrefour situé aux abords du village, entendit un jour sonner une cloche et parler des êtres invisibles. Pris de peur, il rentra chez lui. Questionné par ses parents, il refusa de leur répondre mais leur désigna du doigt le chemin qu'il prenait chaque jour. Les parents s'y engagèrent et aboutirent au carrefour où ils trouvèrent une cloche de cuivre. Le génie Soba du lieu leur annonça qu'il la leur donnait afin qu'ils puissent, en la jouant, appeler les génies qui leur répondraient (1). Mais il demanda au père de lui donner en échange l'enfant qui venait au carrefour pour qu'il continue à jouer avec les siens. Le père, désespéré, lui ayant dit qu'il n'avait pas le courage de se séparer de son fils, le génie lui conseilla de s'adresser à Faro.

L'homme réunit les jeunes filles du village et leur demanda d'intercéder pour lui auprès du génie. Vêtues de leurs plus beaux habits et parées de leurs bijoux, elles partirent en chantant et jetèrent au fleuve gâteaux et couscous (2). Les vieillards se rendirent à leur tour au bord de l'eau et requrent l'accord de Faro : il exigea qu'ils réservassent l'usage de l'instrument aux cérémonies religieuses. Les vieillards, ayant déclaré qu'ils obéiraient, se rendirent au carrefour où le génie Soba leur remit la cloche laissant en échange l'enfant que le génie avait appelé en leur absence.

L'objet fut alors porté au forgeron qui en fabriqua de même forme, utilisant le bois ou l'os pour le corps, la pierre pour le battant. Après l'invention du fer, on en forgea sur le modèle ancien en ajoutant de petites sonnailles de cuivre. »

---

(1) Dans les temps anciens, « les hommes parlaient avec leurs ancêtres et leurs dieux ».

(2) Cette offrande et cette course sont chaque année renouvelées par les jeunes filles de Ségou qui vont au fleuve en chantant le *nyari nyari le*.

Sonner la cloche, c'est « faire entendre à Faro le son du cuivre », c'est l'appeler et le flatter à la fois. Dans les sorties masquées, le son qu'elle émet prévient les non-initiés qui s'écartent du cortège. La flûte ou mirliton du Komo, *wara da*, « bouche du griffu », est faite d'une tige de bambou percée de trois trous. Celui du milieu est ouvert, les deux autres obstrués avec une toile d'araignée. L'instrument est tenu par le porteur entre les dents et attaché à la nuque ou aux oreilles par une cordelette.

Un mythe relate l'origine de la flûte de Faro, confectionnée selon le même principe, mais de forme différente.

« Une femme, nommée Koussouba Koulibali aperçut un matin, alors qu'elle se baignait, Faro et le poisson *dodo* assis au bord du fleuve. Le poisson jouait de la flûte et chantait :

« Je sifflerai, je sifflerai dans ma flûte de Faro; celui qui n'entendra pas mourra, celui qui mourra le regrettera (1). »

La femme s'enfuit et raconta la chose à son mari qui était devin et propriétaire du Komo. Celui-ci se rendit au bord du Niger et fit fuir le poisson qui abandonna son instrument. L'homme s'en empara et s'en retourna, poursuivi par l'eau bouillonnante du fleuve dont il put s'échapper en pirogue. Mais toute sa famille périt dans les flots.

Au matin, l'homme se rendit au bord du fleuve et joua de la flûte en pleurant. Il joua si longtemps que Faro apitoyé sortit et lui dit : « J'ai noyé les membres de ta famille, inondé le village. Je te pardonne cependant à cause des offrandes faites par les autres hommes. Garde la flûte et puisque tu es Soma et chef de Komo, que toutes les flûtes du Komo soient bénies à cause de celle-ci. » Il entendait par là que la flûte du Komo, comme les autres objets rituels, contiendrait dorénavant sa force, *nyama*. Il ajouta que, lorsque les hommes voudraient l'appeler ou lui parler, ils seraient tenus de le faire par le truchement de cet objet. »

Avant chaque sortie de masque, on exécute un sacrifice sur les flûtes pour « améliorer le son ». Celle de Faro est utilisée dans les rites exécutés au bord du fleuve, pour le prier ou le remercier; jouer de la flûte revient à réciter sa devise, il est contraint d'entendre. Celle du Kōmo ne sert qu'au cours des cérémonies masquées; elle fait dire à ceux qui l'entendent que le Komo est « une chose à la gorge douce (2). »

Autrefois nul autre que le chef n'était autorisé à jouer d'aucune sorte de flûte; la mort sanctionnait l'infraction. Des flûtes ordinaires, d'un modèle différent de celles du culte, sont utilisées par les enfants.

---

(1) *na fye, na fye na nka faro fle fye, ngimi mana o na sa, ngimi sara o bana na.*

(2) *fè kã duma.*

E. — *Initiation au Komo :*

Trois jours après la naissance d'un garçon, son père lui présente les éléments qu'il a fournis pour la confection des *boli* du Komo et récite le *komo kumã :* « Toi, Komo *boli*, ces choses sont dedans; société du Komo, ces choses sont dedans; coutume du Komo, ces choses sont dedans; tu es un enfant, tu vas vers l'âge des vieillards; Komo *boli*, voici mon enfant, veille sur lui (1). »

Puis il ramène l'enfant à sa mère en disant : « Le fils a été présenté au secret de la masculinité; il a reçu les bénédictions du Komo, la bénédiction du Komo est avec lui; qu'il soit ajouté aux hommes, que sa lumière soit avec nous (2). » L'enfant est ensuite présenté de la même façon à sa grand-mère.

Ces actes sont une préfiguration de l'initiation qui fera plus tard du nouveau-né un adolescent membre de la société du Komo.

Celle-ci, dans chaque village, est composée de tous les hommes initiés, groupés par promotions, elles-mêmes formées, en principe, de circoncis de la même année. Seuls les griots ne sont pas admis. Il est loisible à tout individu qui n'a pas été initié immédiatement après sa circoncision d'entrer plus tard dans la société si celle-ci l'agrée. Il appartiendra, quel que soit son âge, à la promotion avec laquelle il aura été initié.

Une promotion a le pas sur celle qui la suit. Cet ordre hiérarchique est scrupuleusement respecté dans la vie quotidienne comme au cours des conseils et cérémonies. Contrevenir aux règles de préséance serait rompre l'ordre jusque dans l'au-delà, le Komo groupant l'ensemble des sociétaires vivants et morts.

Le recrutement des membres est variable d'une région à l'autre à cause des dépenses qu'entraînent la cérémonie d'entrée et la participation aux rites. Certains villageois s'abstiennent par pauvreté et il arrive même que des conversions à l'Islam soient provoquées de ce fait.

---

(1) *komo boli la, nin waliw ba kono; komo dyẽ la, nin fẽw ba la; komo sira la, nin kunko ba kono; i ye demisẽ ye i bi la makorobaya ye; komo boli nde ñe, tyę do, i dyã lo a la.*

(2) *de dyira la tye gundo la; ani komo ye dukaw mine ñuõfe, komo ka barka bi a fe; ka fara tyew ka, ka yele kę an la ye.*

L'initiation est effectuée de nuit. Le *koligi* (1) présente aux futurs sociétaires, un à un, les outils des ancêtres. Il leur en explique l'origine, l'histoire, le rôle et la valeur spirituelle, leur enseigne le respect qu'ils doivent aux ancêtres pour leur courage, leurs travaux et les inventions techniques dont ils furent les auteurs ou les dépositaires. Le masque est extrait de son abri et revêtu par un sociétaire : devant les enfants l'homme qui le porte se démasque et leur révèle le sens des différentes parties du costume.

Les impétrants prêtent ensuite le serment dont le chef récite le texte :

« Si je révèle [les secrets] dû *boli* qu'il me tue; si je dévoile les institutions, qu'elles me tuent; jusqu'à ma mort, si je parle, que mon père meure, que ma mère meure, que le *boli* brise mon cœur (2). »

A tour de rôle les enfants passent ensuite trois fois la langue sur la tête du masque et sur les crochets, l'assurant ainsi de leur fidélité : « Jusqu'à ma mort, je ne dévoilerai pas le *koli*. Faro n'a pas été dévoilé! Que le *koli* ne soit pas dévoilé (3)! »

Après que les autels, y compris le *pembele*, leur aient été présentés, les postulants boivent le sang d'une chèvre offerte en sacrifice; ils s'assimilent ainsi les forces du Komo et consacrent leur serment par cette communion.

Enfin on leur explique le mécanisme de la société dans ses détails, la nécessité de la hiérarchie des promotions, du respect des interdits, du secret dans lequel doit être tenu tout ce qui concerne l'organisation. On leur donne aussi un enseignement moral; il leur est recommandé notamment de se fixer une ligne de conduite dans la vie privée comme dans la vie publique, d'être droit, d'éviter la duplicité et la mauvaise foi, *flāvlāña* (litt. : action double), de ne jamais servir deux maîtres et de ne point entretenir en eux deux volontés opposées.

En guise d'illustration, on conte les aventures des premiers sociétaires qui enfreignirent ces lois.

L'un des compagnons de Makanta Djigui, Garou Keita, était affligé de ce grave défaut. Il s'était lié d'amitié avec Moridje Sidibé, fils du célèbre Soma Moriba Sidibé, qui avait le même caractère. A cette époque trois grands Komo étaient déjà en fonction dans la région. Celui de Koulikouro, nommé *selo* (litt. : tombe), celui de Nyamina nommé *dyibi* (litt. : obscur) et celui de Kankan.

Garou se rendit à l'une des cérémonies du Komo de Kankan et par des paroles mensongères incita les sociétaires à se révolter contre les chefs de l'endroit, ce qu'ils firent : ils interrompirent les danses et refusèrent de reconnaître le Komo qui fut dissous, le chef restant seul. Mais Garou, qui avait menti, mourut à quelque temps de là.

---

(1) Cf. p. 115.

(2) *ni nye korobo, boli ka fa, ni nye korobo, dyow ka fa, fo kala n sa ni nya fo n fa ka sa m ba ka sa, boli dyugu ka sõ la.*

(3) *fo ka ta n sa nie korobo koli, faro ma korobo, koli kana korobo.*

Le chef de Kankan transporta ses autels, les mit sous la protection du chef du Komo de Koulikoro et les sociétaires participèrent aux cérémonies de cette localité. Moridje se rendit à Nyamina et, dans le même esprit que Garou, il incita les sociétaires à engager une sorte de rivalité avec le Komo de Koulikoro. Au cours d'une cérémonie célébrée dans ce dernier village, usant de l'autorité attachée au nom de son père, il convoqua le Komo de Nyamina et offrit un bouc aux deux groupes. Les deux chefs refusèrent, arguant avec raison qu'une seule victime ne pouvait satisfaire deux Komo. Moridje n'en tint aucun compte et mit face à face les deux masques, le bouc entre les deux. Une lutte s'engagea dont l'animal devint l'enjeu, chaque masque usant de son pouvoir magique pour le gagner, les sociétaires, groupés derrière leurs masques respectifs criant : « Le bouc est à nous. » Plus tard, le porteur du masque mourut aussi prématurément.

Afin d'éviter que les sociétaires ne lient leur sort à deux Komo, on leur fait lécher à nouveau le masque, tandis que la prière suivante est récitée : « Si tu lèches le masque, que tu ne puisses faire la *flãvlãña*, que tu ne puisses perpétrer une trahison (1). » Si, ayant prêté ce serment, l'intéressé le trahit il devient « une personne pourrie » *(malolilo)* et perd l'estime et la confiance de ses compagnons.

Les jeunes gens reçoivent une instruction d'autant plus complète qu'ils avancent en âge et en connaissance. Le chef du Komo, accompagné d'hommes de sa promotion, emmène le postulant en brousse et l'interroge sur ses intentions et ses buts. Avant de lui désigner le groupe auquel il est rattaché et de lui en présenter les membres, il l'enseigne en traçant sur le sol l'ensemble des signes représentant l'agencement dans l'univers de la société du Komo, ensemble qui est reproduit habituellement avant chaque cérémonie et qui permet aux assistants de reconnaître leur place (cf. fig. 12).

Cette figure, dite *wolo ti*, « signe de la génération », est composée de deux longs traits coupés à angle droit et orientés selon les points cardinaux. Le point de jonction est placé au centre d'un carré dit *bara kęnę*, « rythme de l'espace », dont les angles internes sont munis de crochets. Les deux lignes croisées sont

(1) *nye komo kun nǫ, i kana seka flãvlãña kę, nye komo kun no, i kana seka dyãfa kę.*

le symbole de la multiplication et de l'extension des êtres et des choses de l'univers, lequel est figuré par le carré central. Les quatre crochets des angles expriment le tournoiement de la création sur elle-même (1). Il y a donc là représentation schématique de la disposition et du mouvement de l'univers.

Sur le prolongement des diagonales hors du carré central sont tracés cinq signes qui sont chacun le symbole d'une catégorie d'initiés ou d'un objet rituel, ces signes marquant également la place des assistants lors des cérémonies.

Sur les branches orientale et occidentale sont placés les signes des initiés majeurs :

1° *dyẹ*, « union ». Signe de la société du Komo dans son ensemble, du corps des sociétaires.

2° *doniya*, « connaissance ». Le sommet de l'angle est « la pointe de la connaissance » et l'ouverture « la voix constitutive de la société ». Il s'agit de la science que possèdent les initiés.

3° *bako*, « lien ». Ce signe fermé exprime les liens qui unissent les initiés entre eux comme avec le Komo, ainsi que l'esprit de corps dont ils doivent faire preuve.

4° *sõni*, « bonne volonté, consentement ». Le départ du trait sur la ligne indique que l'initié est libre d'entrer dans la société, de gravir les échelons des grades successifs, marqués par les brisures du dessin, mais non d'en sortir et qu'il lui faut avoir la volonté de suivre les règles de l'organisation.

5° *iyẽ*, « vérité ». Les sociétaires doivent être sincères. Les deux crochets symétriques indiquent qu'il faut commencer par la vérité et finir par elle.

6° *iyẽ šere*, « témoin de la vérité ». Ce tracé, témoin du précédent est parfois attribué aux étrangers qui viennent assister à la cérémonie et en connaissent les signes conventionnels (2).

7° *bẽni so*, « maison de l'accord ». Témoin du signe 1, il représente une faucille, signe de la maison et symbole de l'union des sociétaires. Dans les cas graves, pour arrêter une querelle ou régler un différend, le chef du Komo présente une ancienne faucille et dit : « C'est la preuve de l'accord, c'est le témoin de l'union (3). »

8° *jigi so*, « maison du soutien ». Le point symbolise le *komo so* et l'ensemble rappelle l'appui qu'est le chef pour les sociétaires. Les orphelins s'asseyent à l'endroit où il est tracé.

---

(1) Cf. p. 6. Il s'agit d'une figuration particulière du svastika dont les branches sont tournées vers l'intérieur.

(2) Cf. p. 161.

(3) *bẽni so yeta do, dye šere do.*

9° *so ba*, « grande maison ». Le dessin représente « l'œuf du monde » et marque l'endroit où se tient, seul, le plus âgé des géomanciens du village.

10° *komba*, « grande porte ». Signe et place du sacrificateur, car le sacrifice « ouvre les portes » et met en rapport l'homme et l'invisible.

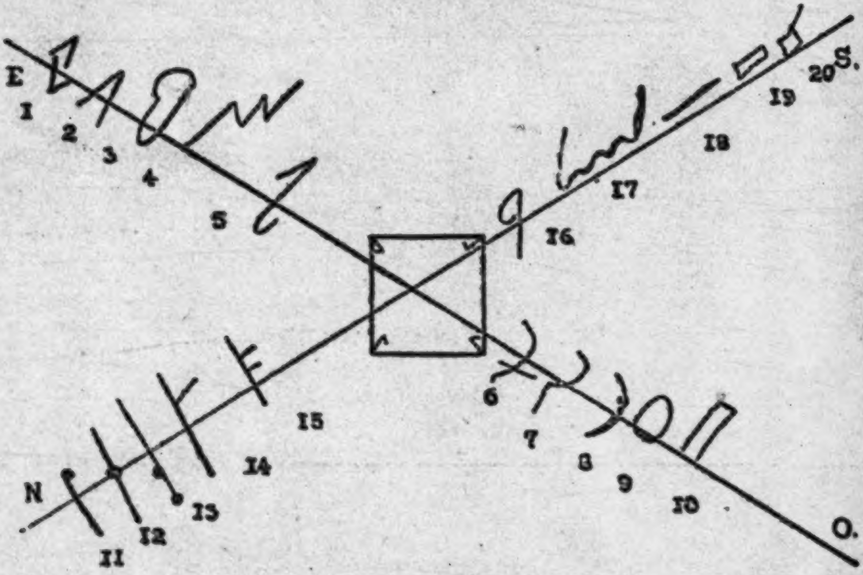

Fig. 12. — Dessin exécuté au sol par le chef du Komo pour marquer par leurs signes la place des assistants pendant les cérémonies. Ce tracé, observé au village de Dougoutiguibougou, est complet. Quand les branches en *x* manquent, le carré central est toujours représenté. (Dessin d'un informateur.)

Sur la branche septentrionale sont placés les signes qui concernent les jeunes initiés :

11° *limidē*, « circoncis ». Il s'agit des circoncis de l'avant-dernière promotion. Le signe est celui de la personne achevée (1).

12° *limidē kle*, « circoncis de la dernière promotion ». Le dessin montre la personne incomplète.

13° *lyi dē*, « fils du travail ». Il s'agit des fils des *kworę duga* (2). Le signe, tracé à l'inverse de celui de la personne, exprime les désordres nécessaires et les plaisanteries apportés dans les cérémonies du Kworè et du Komo par ces dignitaires.

---

(1) Cf. G. Dieterlen. *Les signes des Kēila du Mandé*, l'Homme. Cahiers d'ethnologie, de géographie, de linguistique (sous presse).

(2) Cf. p. 169.

14° ***soni dè***, « fils du sacrifice ». Tracé sur l'emplacement du fils du sacrificateur, le signe comporte un trait latéral représentant le couteau, car le fils peut être appelé à remplacer son père dans son office au cours des cérémonies.

15° ***yeleka tigela***, « rieur qui coupe ». Il s'agit de l'individu chargé de proclamer la position bonne ou mauvaise des victimes sacrifiées.

Sur la branche méridionale sont placés les signes désignant les forgerons; ils se rapportent à l'institution de la circoncision et au fonctionnement du Komo dont ces artisans sont les dignitaires.

16° ***boñema***, « personne honorée ». Place des forgerons âgés.

17° ***wara da dyuru***, « corde de la bouche du griffu ». Il s'agit de la cordelette de la flûte, dite « voix » du Komo.

18° ***wara da***, « bouche du griffu ». Flûte du Komo.

19° ***pembele***. Le signe désigne à la fois le *pembele* de la société et la planchette de même nom utilisée pour la circoncision.

20° ***gossilande***. Le signe désigne la massue primitive et la petite masse utilisée pour la circoncision.

L'ensemble de ces figures, résumé de l'univers dans son agencement et son mouvement, forme la scène sur laquelle prennent place les acteurs de la cérémonie. Ceux-ci sont en quelque sorte la représentation vivante de ces figures et les mouvements qui modifient l'ordre de présentation demandent d'être exécutés avec des précautions particulières. En effet, tout changement apporté à la disposition des acteurs de la scène est senti comme se répercutant dans l'organisation universelle. C'est pourquoi les déplacements de chacun d'eux donnent lieu à des rites d'excuse et de purification concernant le signe qui lui correspond (1).

F. — *Cérémonies du Komo :*

Les cérémonies auxquelles participe le masque ont lieu plusieurs fois par an, après décision des sociétaires. Elles ont pour but de discuter des intérêts de la société et de prendre en commun des décisions pour assurer la prospérité de ses membres, de favoriser les récoltes, de commémorer l'organisation du Komo.

Trois cérémonies principales sont célébrées, l'une dite « anni-

[Facing p. 160]

versaire du Komo » *(komo sanyelema)*, à la fin de la saison sèche; la seconde après la récolte, pour l'offrande des prémices, le masque ne sortant jamais dans les champs au moment des cultures; la troisième en saison froide au moment de la circoncision. Elles comportent des sacrifices offerts au cimetière en l'honneur des défunts et des rites divinatoires. Des cérémonies occasionnelles peuvent également avoir lieu entre temps, sur décision des sociétaires; le masque sort pour des purifications. Les sociétés voisines sont généralement conviées à assister aux réunions et aux beuveries qui suivent (1).

La cérémonie débute par un conseil auquel assistent tous les sociétaires, et qui se tient dans un enclos, *kara so*. Le matin de bonne heure, le chef du Komo, assisté de deux hommes de sa promotion, trace au sol les figures qui marquent l'emplacement des assistants et du matériel (2).

Quand les sociétaires arrivent ils se placent immédiatement, sans risque de désordre, près du signe affecté au groupe auquel ils appartiennent. Chacun, en passant, salue le sacrificateur. Les habitants des villages voisins sont accueillis un peu à l'écart par un sociétaire : ils déclarent leur appartenance à tel groupe ou dessinent à terre leur signe sans mot dire. Le chef acclame leur arrivée en disant : « Les étrangers sont venus, les étrangers fils du Komo sont venus, leur place est dans leur main, tolérance leur soit accordée (3). » Le conseil est alors ouvert.

Le chef s'assied dans le carré central, face à l'ouest, pose à sa droite les *boli*, écoute les propositions des sociétaires qui tous également font face à ce point cardinal. S'il se lève, toute conversation cesse; elle ne reprend que lorsqu'il s'est assis. Si un sociétaire veut se déplacer pendant le conseil, il doit en demander l'autorisation au chef du Komo qui vient poser sa main près du signe, à titre d'excuse. Quand le sociétaire revient, le chef de son groupe prend un peu d'eau qu'il verse sur le tracé en guise de purification (4).

Quand toutes les questions intéressant la société ou le village ont été examinées, discutées et que les décisions sont prises, tous se lèvent; le tracé au sol est effacé avec de l'eau.

Les rites auxquels participe le masque se poursuivent géné-

---

(1) Les chefs de Komo importants sont ainsi consultés par des étrangers au village, qui font parfois des déplacements considérables.

(2) Cf. fig. 12.

(3) *dnow nana, komo dê dnow nanu, u siki yoro be u bolo, yafa ka kę u ma.*

(4) L'absence momentanée d'un sociétaire est dite : *wuli ka bo komo ko la* « se lever et sortir de l'affaire du Komo » et le retour *do dye ba la komo jine saba la* « entrer dans la grande union du génie du Komo ».

a) Hutte du Komo (Konodimini).

b) Trous aux ordures (Banankoroni).

[facing p. 161]

ralement durant la nuit qui suit dans un bosquet dit *komo lu*, « touffu du Komo », situé en brousse aux alentours du village.

Dès qu'ils entendent siffler le masque, les sociétaires s'approchent par promotions, les plus anciennes d'abord. En principe ne se présentent que les ressortissants du Komo en fonction et leurs invités. Cependant tout étranger initié désireux d'assister aux danses fait connaître sa qualité au moyen des signes suivants :

1° En criant hé ou ho, il présente au masque sa main droite dont les doigts sont repliés, sauf l'index et l'auriculaire qui pointent tous deux dans sa direction. L'index, dans ce cas, figure l'homme circoncis, membre d'une société du Komo, en somme le demandeur. L'auriculaire, plus petit, exprime que cet homme est soumis au Komo, qu'il est et restera toujours son inférieur.

2° Il met dans sa bouche un brin de paille; la paille de couleur claire signifie que son cœur est pur, qu'il n'a aucune intention mauvaise. La bouche, fermée sur la paille, manifeste que l'homme « connaissant la parole du Komo » n'a nul besoin d'en parler.

3° Il dit, en arrivant : *ani bara* (litt. : je suis avec le *bara*). Le masque, en entendant ces mots, s'accroupit puis se redresse brusquement devant le nouveau venu pour l'effrayer. Ce dernier dit alors : « Je suis un nouvel enfant de la société (1). » Lorsqu'il est agréé, le masque retourne danser et la cérémonie continue.

Les rythmes du Komo portent le nom général de *komo bara* ou *komo foli dunu* (litt. : rythme des tambours du Komo) (2). Ils sont nombreux, adaptés aux rites qu'ils accompagnent et dotés chacun d'un nom particulier. Les Bambara les classent en trois catégories : les rythmes rapides, violents, durs, exécutés contre les non-initiés; les rythmes doux pour la circoncision; mélancoliques pour les funérailles.

Lors des danses de masque, lorsque les tambourinaires ont attaqué le rythme du Komo, ils ne doivent ni ralentir, ni cesser de jouer, sans quoi le masque se précipite et menace l'exécutant de son crochet gauche. Le musicien, dans ce cas, change de rythme, aux fins de le calmer, et chante :

« Vous, vieillards, vous êtes avec le *bara;* écoutez, ce *bara* n'est pas vide (3). »

---

(1) *ne ye timidẽ kura ye.*

(2) Le mot *bara* est réservé aux rythmes des danses masquées du Komo. Les rythmes des danses profanes des vieillards sont dits *mabere fo*, ceux des jeunes gens, *bõdyala*, ceux des jeunes filles, *kofili*.

(3) *aw ni bara makorabaw; klo madyo, nin bara le bara lãkulo ye.*

Le masque participe à la cérémonie non seulement en dansant mais en poussant des cris dont la hauteur et l'intensité varient selon l'action qu'il prépare ou exécute.

Un cri guttural très sourd *(buã, buâ, buâ)* appelé *komo suruku* (litt. : hyène du Komo) est poussé pour effrayer les assistants.

Un cri aigu et court *(pyɛ, pyɛ, pyɛ)* appelé *kono fari kasi* (litt. : cri d'oiseau méchant) est poussé fréquemment pour animer la danse, amuser les spectateurs.

Un cri long et plus doux (ô-ô, ô, ô, les trois derniers ô étant très rapprochés) dit *morokorobaw kasi* (litt. : cri des ancêtres) salue le chef et sa promotion.

Pendant que le masque danse, le griot du Komo l'encourage en récitant ses devises qui exaltent sa puissance, son autorité, son pouvoir justicier :

« Toi, Komo, toi griot du Komo, toi sonneur de cloche, vous venez de qui? vous venez de Makanta Djigui. Toi, Komo méchant, tu viens de qui? Tu viens de Soma Moriba. Celui-ci l'a donné à qui? Il l'a donné aux fils des forgerons. Qui sont les propriétaires du Komo? Makanta Djigui, Soma Moriba, les fils des forgerons. Ceux-ci n'ont pas connu la honte, vous ne devez pas avoir honte. Ceux-ci n'ont pas reçu d'outrages, vous ne devez pas être humiliés.

Toi, petit Komo vivant, ennemi des non-sociétaires, ami des sociétaires, prends le cœur de ton ennemi, prends son foie. Je suis derrière toi et non devant toi. Eh! Komo; toi, tueur de morts gras, suaire des vivants, agis sur celui qui te provoque comme sur celui qui ne te provoque pas (1). »

Lorsque les tambours battent et que les danses sont animées, lorsque le masque crie, on dit que « le *bara* du *komo* est chaud » *(komo bara wušule do)*. La cérémonie bat son plein.

Divers incidents peuvent se produire au cours des danses masquées qui donnent lieu à des interprétations et à des interventions des sociétaires.

Lorsqu'une des flèches fichées sur le masque tremble, elle indique la présence d'un sorcier dans l'assemblée. Les vieillards retirent la flèche et ordonnent immédiatement l'arrêt de la cérémonie. Les tambours s'étant tus, ils demandent au coupable de se présenter, ce qu'il fait immédiatement. On lui dit : « La flèche t'attaque (1). » Il offre alors en sacrifice un bélier et de la bière, tandis que le fer est remis en place et que les danses reprennent. Une flèche qui tombe au cours de la danse est le signe de la présence d'un sorcier dans le village.

---

(1) *e komo, e dyeli, e ndara kolo fo, e bwora dyeni ma, e bwora makanta jigi la, e komo fare ma e bwora dyeni ma, e bwora soma moriba, o ya di dyeni ma, oy a di numu dew ma dyenuye komo ligiw ye, makanta jigi, soma moriba, numu dew; oluw ma malo, aw kana malo, oluw ma lebu, aw kana lebu.*

e komo ni nyenama biribalyuw dyugu, birilew nyima, i dyugu son la i la ka bye la mbi ko nli nye.

e komo, i šu klo la faba, nyenemaw kasange, minya kilá a ko la, mi ma kila a ko la.

Si une partie du costume se détache, elle est ramassée par trois sociétaires et conservée pour être brûlée avec les balayures (2).

Si l'un des assistants, au cours de l'année écoulée, a enfreint l'interdit et dévoilé les secrets du Komo, le masque siffle, demande aux tambours de cesser leur jeu, et dit : « Voici une sauterelle pour moi. » Ces termes expriment le mépris dans lequel il tient le coupable. Puis il ajoute : « Il y a ici une odeur de cadavre (3). »

L'homme baisse la tête, tous s'écartent de lui. Le masque le blesse de son crochet droit. Il est banni du cercle des danseurs et il arrive qu'il meure quelques jours après. Ses funérailles ne sont point célébrées. Le cadavre est attaché par les pieds et sorti de sa demeure par une ouverture pratiquée dans le mur afin d'éviter que son *nyama* néfaste ne revienne dans la famille. Le corps, battu de verges pour que l'âme quitte à jamais le village, est jeté à la fosse commune ou placé dans la fente d'un arbre obstruée ensuite par des buissons d'épines. Dans ce cas il est souvent dévoré par les hyènes. Les vêtements qui lui ont appartenu sont suspendus au crochet placé sur le mur extérieur du sanctuaire. Nul n'a le droit de pleurer sa mort, nul ne parle plus jamais de lui : ce serait offenser le Komo.

Il arrive aussi qu'une sortie du Komo ait lieu sans qu'on ait prévenu le village. Dans ce cas, si une jeune fille s'approche imprudemment du lieu de la danse, le masque peut la tuer d'un coup de son crochet droit sur la tête. Un peu de son sang est mis alors en offrande sur le *ny*[illegible] ses bijoux jetés au fleuve où son âme se rend pour remplacer la vierge qui, autrefois, était offerte annuellement à Faro.

G. — *Effets des ruptures d'interdit :*

La rupture des interdits attachés aux autels ou au masque réagit sur chacune des parties affectées comme sur l'ensemble et entraîne une diminution de la force du Komo qui est abandonné par Faro et les ancêtres. Une purification peut être pratiquée dans certains cas; la faute est alors réparée et les forces spirituelles réintègrent les autels.

---

(1) *komo bye bila.*
(2) Cf. p. 201.
(3) *šu kasa be.*

Si une femme ou un non-initié aperçoit le *nya*, le *komo tigi* et sa promotion descendent au bord du fleuve et, au son des tambours présentent au génie les excuses du coupable :

« Je ne suis pas venu pour quelqu'un d'autre, je suis venu pour moi-même, je suis venu pour rétablir la race de nos pères (1). »

La victime offerte par le responsable est ensuite égorgée, son corps jeté à l'eau et les sociétaires prennent de la terre noire pour en enduire à nouveau le *nya* régénéré.

Si le chef n'observe pas la chasteté qui lui est imposée avant tout sacrifice, il doit prévenir les vieillards de sa promotion et purifier les autels en immolant deux coqs ou une chèvre.

Il semble qu'on ne puisse sans danger rompre l'interdit du *nimara boli* et que dans ce cas la faute soit presque irréparable. Le Komo est atteint, non pas seulement dans une de ses parties, mais dans son ensemble, et une remise en ordre générale s'impose pour la société. Le chef et les vieillards emportent les autels principaux dans leur lieu d'origine, c'est-à-dire dans le village où ils ont été consacrés par contact avec ceux du Komo local (2). Le propriétaire de ce dernier garde les objets souillés pendant sept jours. Ce délai écoulé, les demandeurs reviennent, apportant des victimes qui sont égorgées sur les autels mis en contact avec ceux d'où ils émanaient (3). La viande est consommée par le chef consulté, et par lui seul. Les demandeurs doivent ensuite s'en retourner chez eux avec leur sac et sans mot dire à quiconque durant le trajet.

Cette cérémonie, qui est une seconde consécration, ne peut, en aucun cas, être renouvelée. Si après une première faute et une première remise en ordre, l'interdit est à nouveau rompu, le Komo est considéré comme entièrement détruit, le village est parfois abandonné par les habitants qui ont « perdu leur âme » et craignent le courroux de Faro; ils se dispersent, malheureux et impuissants. Certaines conversions à l'Islam ou au christianisme n'auraient pas eu d'autre cause.

H. — *Rôle du Komo :*

« Le Komo est une société qui englobe la plus haute puissance divine, les hommes, les animaux, les plantes, jusqu'à la fin du monde; il est le gardien des âmes. Quand il n'y aura plus de vie sur la terre, ni hommes, ni animaux, ni plantes, le Komo réveillera les âmes des êtres morts dont il a la charge pour l'éternité ».

---

(1) *ne mana ma nyini; ne mana nyere nyini, ne ma na m fa šia tuku ko la.*

(2) Cf. p. 144.

(3) Le *nimara boli est* « frotté » sur le *nimara boli* du *tro ba*, le *nyõ boli* sur le *nyõ boli* du même, etc.

Dépositaire des forces spirituelles de ses membres, le Komo intervient dans la plupart de leurs activités et participe à la vie. La naissance, la circoncision, le mariage, les funérailles, le culte des ancêtres sont marqués par son intervention directe ou indirecte. Il joue un rôle remarquable dans la vie agricole (pluie, rites agraires, ordures ménagères et communes), comme dans le fonctionnement des techniques artisanales. Les décisions collectives (guerre, conflit politique), les questions économiques sont soumises à sa décision. En effet, les biens des sociétaires (semences, cauris) sont conservés dans des greniers dont le chef est responsable et sur lesquels il consent des prêts à intérêts aux membres nécessiteux. Le chef du Komo, qui est devin, est consulté directement par les demandeurs. Assisté des vieillards de sa promotion, il est également chargé de rendre la justice (1). C'est ainsi que le nom d'un sociétaire indigne est prononcé au-dessus du *pembele* que l'on retire aussitôt : cet acte prive le coupable de la protection de Pemba et le voue à la misère et à la honte.

D'autre part, le fonctionnement même de la société développe la vie sociale. Les initiés des villages voisins sont conviés aux sorties de masques et nombre de mariages sont décidés pendant les beuveries qui suivent les cérémonies. Celles-ci favorisent aussi les échanges culturels. C'est au cours des conversations tenues publiquement que progresse l'enseignement car les rites sont commentés, expliqués, les mythes et leur fondement métaphysique exposés en détails. Les informateurs les mieux renseignés parlent tous des nuits passées à écouter les vieillards compétents autour des jarres de bière de mil.

Le Komo est le dépositaire des croyances traditionnelles, des règles de solidarité entre les sociétaires. Il diffuse un véritable enseignement civique et moral, droits et devoirs des membres, interdits et sanctions qui frappent les contrevenants. Son rôle juridique en fait un facteur de discipline : il est un soutien puissant de l'organisation sociale des Bambara.

---

(1) Le rôle juridique a été notamment relevé par L. Tauxier dans *La Religion bambara*, p. 300.

Le Kworę.

La société du Kworè, *kworę dye* (litt. : réunion du Kworè), groupe des individus autour d'autels *(kworę boli)* sur lesquels elle exécute des rites concernant les ciels, l'espace, les points cardinaux, les manifestations atmosphériques de Faro, notamment la pluie. Kworè signifie littéralement « mare tarie ».

Les rites s'adressent aux génies du Kworè qui dépendent de Faro, et vivent dans le *kaba fin* (3e ciel). Ils sont chargés de veiller sur les pluies envoyées du *woloflâ kaba* (7e ciel) qui traversent les autres cieux et « l'espace vide » avant d'atteindre la terre. Les génies luttent dans les cieux et l'espace contre les *mahalakillen* du *koblenkaba* (5e ciel) qui tentent d'arrêter l'eau. Les éclairs, le tonnerre, la foudre sont les effets de ces combats.

Les cérémonies principales ont lieu autour d'un arbre, dit *kworę figi*, situé à l'est du village, siège habituel des génies lorsqu'ils descendent pour recevoir les offrandes des hommes. Les autels sont placés dans une hutte élevée en brousse; d'autres exemplaires sont conservés dans la demeure du chef. Une grosse pierre, *kworę fara*, située à proximité du village et fixée en terre au-dessus d'objets symboliques, reçoit également des offrandes. La société du Kworè est propriétaire d'un champ, cultivé en commun, dans lequel on sème exclusivement du petit mil, *sañõ* et dont la récolte est réservée aux besoins du culte.

Un chef, le *kworę tigi* est chargé de la garde des autels et de l'exécution des rites.

A. — *Les autels :*

Les autels du *kworę* sont déposés dans un sanctuaire dit *buku sãmpere ni* (litt. : petite hutte du tonnerre) situé à une certaine distance du village à cause des dangers de la foudre. La porte est basse et très étroite pour que les forces qu'il détient ne s'échappent point.

Ils se composent des objets suivants :

1° Un grand sac de peau de bouc, *kworę boli sãmpere*, ouvert à son extrémité supérieure et suspendu par une peau de boa *(miñã)* qui symbolise la foudre. Ce sac, qui compte trois compartiments, contient du cuivre, de l'eau du Niger, de l'eau de pluie et les « pierres de tonnerre » de la société. Les « pierres de tonnerre », *sãmpereni* ou *sãmpere dyele*, jouent un rôle essentiel dans le culte de la pluie chez les Bambara comme chez les autres noirs du Soudan. Elles sont censées tomber du ciel avec la foudre (1).

2° Un autre sac en peau de bouc, *ñõ boli (boli* du mil), suspendu au toit par une peau de serpent. Cet autel dépend du *ñõ boli* du Komo, qui préside à la germination. Il contient du petit mil provenant de champs du Kworè et une partie de celui du *ño boli* du Komo.

3° Un sac contenant l'eau des dernières pluies, dit *ngule sãndyi*.

4° Un sac en vessie de bœuf, *jellemine boli*, permettant de voir de l'extérieur le niveau de l'eau. Après chaque pluie le niveau est vérifié par le chef et l'eau versée dans le *ngule sãndyi* où elle est conservée l'année durant.

5° Un sac contient les pierres de tonnerre destinées à être vendues :

a) Pour être suspendues aux toits contre la foudre.

b) Pour attirer la foudre; dans ce cas, la pierre est déposée en brousse dans un abri.

c) Pour confectionner un nouveau *kworę boli*.

Ce sac est l'objet de libations d'eau de pluie puisée au *ngule sãndyi* et dans laquelle on a mis une pierre de tonnerre réduite en poudre.

6° Une hache dite *sãmpere dyele koro* (litt. : vieille hache du tonnerre) de forme ancienne, qui est faite d'une pierre taillée fichée dans un manche de bois. Considérée comme la « mère des pierres de tonnerre », elle n'est extraite de l'autel qu'en dernier lieu, lorsque les rites exécutés pour la pluie ont échoué.

Dans le mur sont encastrés des morceaux de miroir apportés par les membres de la société et dont les reflets sont censés avoir également une action sur la pluie.

B. — Dans la demeure du chef sont déposées des répliques de la hache et des autels. Elles sont transportées selon les besoins au bord du Niger, dans les champs ou sur la place publique au cours des cérémonies. Les originaux restent au contraire à l'abri des regards et des risques d'impureté. De plus, le chef possède un autel spécial, le *kworę ni*, « âme du *kworę* », réceptacle des principes spirituels des sociétaires n'appartenant pas à la société du Komo. Le *kworę ni* est placé sur la poitrine de l'agonisant et recueille son âme au moment de la mort comme le fait le *nimara boli* du Komo (1). On l'imbibe régulièrement d'eau de pluie.

---

(1) On les ramasse au point de chute et elles font l'objet d'un commerce important.

Au moment de la fondation d'une société du Kworè, le chef, accompagné le plus souvent du *komotigi*, se rend dans les agglomérations où est tombée la foudre pour acheter des pierres et les choisir en connaissance de cause; chaque sociétaire contribue à l'achat d'une pierre.

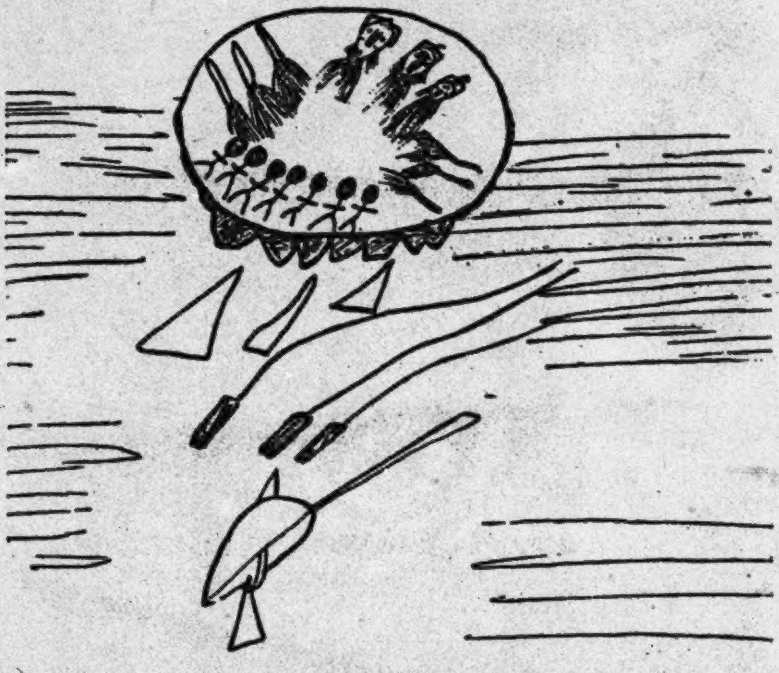

Fig. 13. — Pierre d'autel du Kworè de Banankoroni sous laquelle sont enterrés trois haches néolithiques, trois fouets, la hache de fer rituelle, *kongobwona*. Le dessin exécuté au cours de la cérémonie annuelle représente les trois premiers des huit ancêtres ayant reçu la parole, les sociétaires et les fouets du Kworè; le point noir est « la matrice de Faro ». (Dessin d'un informateur.)

C. — La pierre du *kworę*, dont la partie inférieure est grossièrement taillée en sept dents dites *kworę fara ni*, est plantée en terre après qu'aient été enterrés dans l'emplacement les objets suivants (cf. fig. 13).

1° Trois pierres de tonnerre dites : *fara ba*, « grande pierre »

---

(1) Cf. p. 146.

fara bye, « pointe de pierre »; *fara joli*, « sang de pierre »; elles rappellent que la force de Faro, la pluie, est présente sous l'autel. En les plaçant on dit sept fois de suite : « Aidez-nous (1)! »

2° Trois fouets, nombre mâle, témoins du courage des hommes qui supportent la douleur des coups sans se plaindre. En les enterrant on dit : « Que nous soyons courageux (2). »

3° Une hache *kongobwona* (cf. p. 118) qui rappelle la victoire des ancêtres sur la famine; elle annonce les récoltes et les richesses futures.

Sur la pierre, des dessins sont exécutés au cours de la cérémonie annuelle : au centre, un point noir dit *faro dẽzo*, « matrice de Faro », représente le génie. Il est encadré de deux séries de trois fouets « pour le défendre », ainsi que des trois premiers des huit ancêtres (dont Koumabana) et de sept personnages représentant les sociétaires.

L'interdit du Kworè est la femme. Seuls les mâles peuvent approcher le sanctuaire et les autels. Tout circoncis désireux de participer aux cérémonies doit se faire initier. Les postulants, réunis par le chef autour de l'arbre du Kworè, au pied duquel est allumé un feu, sont armés d'une baguette en bois de *ñuãna*. Ils supportent sans se plaindre les brûlures qui leur sont infligées avec une torche et se fouettent eux-mêmes vigoureusement. Le chef leur apprend ensuite le rôle des génies du Kworè, les rites dont ils sont l'objet et la valeur symbolique des objets du culte.

Parmi les sociétaires, certains sont désignés pour remplir, au cours des cérémonies, le rôle de *kworẹ duga :* masqués et brandissant des branchages frais dans chaque main, ils enfourchent un cheval de bois, le *kworẹduga sọ* (3). Ainsi équipés, ils représentent les génies du *kwore* montés sur leurs chevaux ailés pour l'assaut du ciel. L'un d'eux revêt un masque, le *kworẹ ku* pour figurer l'ancêtre du groupe (4).

Des liens étroits unissent le Komo et le Kworè. Leurs cultes se complètent et il est possible à un individu suffisamment fortuné pour faire face aux dépenses nécessaires d'appartenir aux deux sociétés. En effet, l'un des rôles du Komo est de veiller à la bonne marche des cultures : ses autels veillent sur l'âme et la force vitale des graines cultivables. Mais la récolte dépend de la pluie et relève donc des autels du Kworè. L'action complémentaire des deux institutions est bien sentie par les usagers qui déclarent « unis dans l'action les *ño boli* du Komo et du Kworè ».

---

(1) *a ka demme.*

(2) *a ka farina.*

(3) Les *kworẹ duga* (litté. : vautour du Kworè) dits aussi *logoro koya*, « bouffons » sont, comme l'indique leur nom, des bouffons qui ont le droit de plaisanter les choses les plus sacrées : leur situation sociale est comparable à celle des griots. Autrefois ils furent les premiers sacrificateurs des *boli*.

(4) Les matériaux, chevaux de bois et masques, sont noircis au feu et imbibés d'huile de karité.

Certains auteurs ont posé la question de l'antériorité du Kworè par rapport au Komo en se fondant sur l'aspect « priapique » des cérémonies exécutées par les premiers (1). Les buts véritables de l'institution ayant échappé presque complètement à ces observateurs, il ne leur a pas été possible de pénétrer le sens des rites. C'est au pied de l'arbre du Kworè que les hommes invoquent les ciels où règne Faro : ils prient le *koblenkaba* en cas de guerre, le *sunãnkaba* pour les épidémies, etc. La cérémonie annuelle est une représentation de l'action des invisibles pour obtenir les pluies nécessaires aux hommes : les brûlures, les coups que s'infligent les sociétaires ainsi que les chevauchées des *kworeduga* symbolisent les combats célestes des génies dans les éléments déchaînés.

Le Ceble ou Ndomo.

Comme leurs aînés circoncis et adultes, tous les non-circoncis et les non-excisées d'une agglomération forment une société, *čeble* (litt. : homme rouge) ou *ndomo* (litt. : rassemblement) dont les membres sont dits *ndomo dew*, fils du *ndomo* ou encore *ndomo ngow*. La société du *ndomo* est plus ancienne que celle du Komo (2). Elle réunissait autrefois un très grand nombre d'adolescents, car la circoncision était effectuée beaucoup plus tard. Actuellement les enfants étant opérés très jeunes, son importance a diminué, mais comme elle détient la force des incirconcis elle joue encore un grand rôle qui s'exprime par son nom même : le rouge est un symbole de puissance et d'énergie; il est aussi le signe du sacrifice.

Le *ndomo* est dirigé par un chef assisté d'un sacrificateur, *murukalatigi* (litt. : maître du manche du couteau) et d'un ordonnateur des cérémonies le *dyolokotigi* (litt. : maître de la chaîne).

C'est au cours d'un travail agricole exécuté en commun qu'est nommé chef le sociétaire le plus énergique, qui a le mieux et le plus vite rempli sa tâche et qui a de plus, fait toucher terre trois fois de suite aux adversaires qui se sont présentés. Le chef, responsable des autels du *ndomo*, assure l'instruction des initiés, règle leurs compétitions, désigne le porteur du masque et celui qui est chargé de l'entretien des objets rituels. Enfin, il officie pendant les cérémonies collectives. Le *murukalatigi* égorge les victimes; il taille et confectionne les masques et les objets rituels. Le *dyolokoligi* dirige les cérémonies et décide de l'avancement des membres.

---

(1) Cf. L. Tauxier. *La Religion bambara*, p. 311.

(2) On dit : *ndomo ka kore komo ye* : le *ndomo* est plus vieux que le *komo*. Certains aspects du *ndomo* ont été décrits par Ch. Monteil, *Monographie de Djenné*, p. 15 et L. Tauxier, *La Religion bambara*, p. 380 et ss.

La hiérarchie comporte cinq grades correspondant aux cinq autels fondamentaux. Chacun d'eux est franchi annuellement, après instruction et initiation particulières. Cinq années sont donc nécessaires pour accéder à l'échelon le plus élevé. Chaque promotion se paie par la fourniture individuelle de deux coqs qui sont égorgés sur les autels, à la fin de la cérémonie annuelle qui a lieu en brousse, sous un arbre dit *kalabana* et à la suite d'un travail exécuté en commun. Après un repas, une lutte, dite *bari*, organisée sous la direction des chefs, oppose les jeunes garçons et leur donne l'occasion de montrer leur courage et leur esprit d'initiative.

L'activité des sociétaires consiste en travaux collectifs au moment des cultures. Le mil et les dons en nature recueillis en paiement pour la louée constituent les biens communs.

A. — *Le matériel :*

La société est propriétaire d'objets rituels, d'un masque et de fouets qui sont habituellement déposés dans une hutte, *ndomo buku* à quelque distance du village.

Les objets, au nombre de cinq, sont des instruments de musique rudimentaires. Le *wara*, griffu ou *diara*, lion, est un bull-roarer de bois d'une longueur d'environ trente-cinq centimètres, qui est manipulé au moyen d'une cordelette d'un mètre de long. L'objet est parfois en fer et de moindres dimensions. Le *tori*, crapaud, est une petite boîte dont on tire, en la grattant, un son nasillard. Le *kono*, oiseau, se compose de deux morceaux de calebasse qu'enserrent des toiles d'araignées. Le *wulu*, chien, est une petite gourde-calebasse d'environ dix centimètres de diamètre, percée de quatre trous. Une ficelle passée à son col permet de la faire tourner comme un rhombe. Le *fineble* (litt. : génie rouge) est une corne de buffle percée de trois trous obstrués par des toiles d'araignée, dans lesquels on souffle et qui produit un fort bruit de mirliton. Une société possède en général plusieurs exemplaires de chacun de ces instruments.

Le masque, qui est l'objet le plus anciennement attesté, est fait d'un bois sculpté représentant une face humaine surmontée de plusieurs cornes verticales assez longues (1). L'ensemble est entièrement décoré de cauris et de grains rouges de *kise* (2) lesquels représentent le sang des offrandes. Le front noir et toujours enduit de beurre de karité est haut, ce qui confère à la face un pouvoir bénéfique. L'ensemble est régulièrement frotté de poudre de charbon de bois pilé et de suc de noix de kola.

Les fouets du masque *(ndomo busa)* sont faits de branches de *ñuana* réputées pour leur souplesse. Ils sont confectionnés lors de la cérémonie annuelle et renouvelés seulement l'année suivante. Au moment de leur fabrication, ils sont mis à rouir dans l'eau que les sociétaires boivent « pour ne pas avoir à souffrir des coups qu'ils recevront ».

Chaque membre possède également un fouet long fait des branches d'un arbuste, le *ngere ni* (3) surnommé « arbre de Faro » car il pousse dans l'eau, et qui contient une part de la force bénéfique du génie. Il est fait usage du fouet pour éprouver le courage des enfants. Celui qui pleure ou se plaint subira toute sa vie le préjudice de cette attitude : même après sa circoncision, on parlera de lui comme d'un lâche.

B. — *Initiation :*

Chaque grade est acquis au cours de la cérémonie annuelle qui a lieu après la récolte. Un vieillard préposé à ces sacrifices égorge, sur l'arbre du *ndomo* (pl. V. *a*) et les objets rituels déposés à ses pieds, les coqs des postulants, puis verse de la bouillie de mil en offrande. Pendant ce temps, les jeunes gens labourent le terrain sur lequel se passera la lutte, *bari* (4), qui va les opposer et leur donner l'occasion de montrer leur courage et leur esprit d'émulation.

Le chef désigne deux par deux les lutteurs qui sont surveillés par le *dyolokoligi*. Dans le combat, où toute utilisation des jambes et des pieds disqualifie le combattant, celui qui fait trois fois de suite tomber son adversaire est désigné pour être, la nuit qui suivra, initié à un grade supérieur. Après ce concours, ceux qui ont été vaincus doivent apporter deux coqs supplémentaires s'ils veulent aussi être initiés. Puis un repas en commun réunit les sociétaires et les postulants.

---

(1) Les masques ont le plus souvent huit cornes, mais cette règle n'est pas toujours respectée.
(2) *Linociera sudarica.*
(3) *Hibiscus pandoriformis.*
(4) Se faire tomber, joute.

La nuit qui suit, on conduit les futurs initiés dans la brousse en un lieu dit *biri yoro* (litt. : endroit de l'initiation) où ils s'assoient au sol, la tête couverte d'une pièce d'étoffe.

Sur indication du *dyolokoligi*, un sociétaire fait vrombir ou chanter successivement les instruments rituels, puis les cache et les impétrants doivent les trouver. Comme ils n'y parviennent pas, une série de brimades leur sont infligées (1) avant de les leur montrer et de leur faire répéter à tour de rôle le serment solennel :

« Si tu as entendu le *dyara* des incirconcis, c'est cela. Tailler un bois, faire un trou, mettre un cordon dedans, le tourner, c'est cela (qui est) la parole du *ndomo dyara*. Si tu le dévoiles, qu'il te prenne le cœur, qu'il te prenne le foie, qu'il te tue (2). »

On leur fait passer la langue trois fois sur l'objet qu'on leur confie ensuite pour qu'ils en apprennent l'usage. Le même rite est exécuté pour chaque instrument, la prière étant répétée en modifiant seulement le nom.

Les jeunes gens sacrifient fréquemment sur les autels du *ndomo*. Le contenu habituel des sacrifices est le margouillat, *busa*, assimilé à un incirconcis (sa queue préfigurant le prépuce). Le *wanzo* de la victime, libéré par la mort, vient se joindre à celui que contiennent les autels et par conséquent à celui des sociétaires. L'animal est ensuite grillé et consommé.

C. — *Activité de la société :*

Au moment de la culture des champs, les sociétaires conviés à exécuter un travail emportent leurs objets rituels. Les jeunes filles qui fournissent l'eau et assistent à leurs travaux chantent pour encourager les meilleurs ou insulter les paresseux.

Leur tâche terminée, ils consomment sur place les mets préparés à leur intention. Quand ils s'en retournent ils font vrombir et résonner leurs instruments. Par ce moyen, la force *(wanzo)* qu'ils ont dépensée en cultivant est « reprise dans le vent » par le tournoiement du rhombe et rapportée au *ndomo*, c'est-à-dire récupérée par eux-mêmes. Car si leur *wanzo* a permis un effort efficace, il a pénétré dans le champ, diminuant d'autant la réserve du *ndomo*. D'autre part, cette force utile pour la culture est nuisible à la germination. La laisser dans la terre porterait préjudice aux récoltes. Et c'est pourquoi, par surcroît de précautions, la propriétaire brûle le lendemain dans sa parcelle un margouillat destiné à la débarrasser complètement de cet apport néfaste.

---

(1) Ces brimades sont parfois sévères; on se moque de l'ignorance et des craintes du postulant.

(2) *ni ye me bilakorow ka ndomo dyara, nin do. ka djiri dese, ka wo bo o la, ka dyuru ndo o la, o bi fyeku, o de bi ndomo dyara ka fo, ni ya korobo, a ki sõ ta, a ki biñe ta, a ki fa.*

En saison sèche, les sorties de masque sont exécutées aux fins de solliciter des dons des habitants du village. Les sociétaires se rangent en cercle devant chaque porte tandis que le masque danse le *ndomo do*, danse du *ndomo*. Le chef désigne deux jeunes gens qui, placés au centre, reçoivent chacun trois coups de fouets de leurs camarades. Puis le plus jeune frappe ensuite le masque qui danse à nouveau, frappant à son tour, de son long fouet, ceux qui ne baissent pas correctement la tête en signe de respect.

Si le propriétaire sollicité fait la sourde oreille, tous chantent pour se moquer de lui et pour le contraindre à donner :

« C'est la coutume, nous n'avons pas faim; c'est la coutume du monde, nous n'avons pas faim (1). »

Lorsque toutes les maisons ont été visitées, les enfants s'alignent pour le retour et, sur l'ordre du chef, se dirigent vers un carrefour, siège des génies protecteurs du *ndomo*. Ils y abandonnent le masque et y brisent leurs fouets en disant : « Carrefour, je me confie à toi. »

Les dons reçus en nourriture ou en cauris sont partagés entre les porteurs du masque et les trois chefs. Le mil est conservé pour le jour de la cérémonie annuelle.

La nuit qui suit, le porteur du masque se rend au carrefour, et rapporte chez le chef les objets rituels qui y avaient été momentanément déposés.

D. — *Rôle de l'institution :*

Le *ndomo* est, selon l'expression bambara « la mère du *wanzo* des incirconcis (2) » car sa puissance, qui réside dans les objets rituels, est constituée par le *wanzo* de tous les adolescents.

---

(1) *lada do, kongo tawna, dyẽ lada do kongo tawna.*
(2) *wanzo ba ye čeble.*

Le masque et les autels recèlent d'abord une part des *wanzo* des sociétaires qui les portent, les manipulent ou leur offrent des sacrifices. D'autre part, après la circoncision, lors du saut final des opérés au-dessus du feu rituel, le *wanzo* les quitte définitivement et vient se fixer dans le masque du *ndomo*. Ainsi captées et conservées, ces forces s'ajoutent à celles des incirconcis dans les masques qui deviennent les dépositaires de leur vie.

De plus, l'âme des incirconcis et des non-excisés décédés prématurément est fixée dans les autels au cours des rites funéraires célébrés par les sociétaires.

Le masque du *ndomo* est donc le réceptacle du *wanzo* des circoncis vivants et morts; quant aux autels, ils contiennent toutes les âmes des incirconcis décédés. Cet ensemble confère au *ndomo* la responsabilité de la vie des adolescents et lui donne une force telle que cette sotiété de jeunes est, dans une certaine mesure, redoutée des adultes (1) qui l'ont quittée.

---

(1) Lorsqu'un adulte, et spécialement un sociétaire du Komo a troublé la tranquillité d'un membre du *ndomo* ou fait tort à la société, le *wanzo* peut le rendre impuissant. Dans ce cas, pour retrouver sa virilité, l'homme doit se procurer plusieurs dizaines de margouillats qu'on égorge en son nom sur le masque et les autres autels. Les animaux sont ensuite cuits, l'homme entièrement enduit du produit de la cuisson que l'on remet dans la calebasse et que l'on verse ensuite sur les autels; le *wanzo* délégué à l'homme par le *ndomo* retourne ainsi à ce dernier et l'homme est débarrassé de son mal.

Nul ne peut conserver sa qualité de membre du *ndomo* après sa circoncision. On dit d'un individu qui continuerait là son activité qu'il acquerrait un double *wanzo*.

CHAPITRE VII

LES RITES

Les rites des Bambara sont très complexes et font souvent intervenir plusieurs institutions. Les descriptions qui suivent n'ont pas un caractère général : les rites comportent des variantes très sensibles d'un village à l'autre, variantes dont les intéressés sont conscients, car il n'y a de règle absolue pour aucune institution ni aucune cérémonie.

Mais leurs diverses manifestations, qui épousent cette souplesse de pensée, témoignent cependant de l'unité des représentations cosmologiques et religieuses. Conviés à assister en spectateurs aux cérémonies des agglomérations voisines, un Bambara est le plus souvent renseigné sur tel ou tel aspect du rite qui ne lui est pas familier au cours des beuveries qui suivent. L'usage veut, en effet, que devant les jarres de bière soit commentée et expliquée la cérémonie qui a précédé. Mais l'unité des représentations est telle que, suivant la déclaration d'un informateur qualifié « quiconque connaît les principes et les mécanismes peut en déduire, sans explications, le sens et le symbole d'un rite non commenté ».

D'autre part, les rites sont symboliques jusque dans leurs moindres manifestations : temps et lieux, forme des objets rituels, aspect des victimes, répétition des formules ou prières, mimique des participants, port de certains vêtements laïques ou sacerdotaux, etc. Une tèrs grande subtilité préside au choix des détails. C'est ainsi que durant les étapes de la création, les puissances surnaturelles ont établi, organisé, réorganisé l'univers (cieux, espaces, terres) suivant des itinéraires comprenant « les angles et côtés cardinaux ». Les rites dans lesquels interviennent les points cardinaux comportent une gesticulation qui, selon la puissance visée, suit l'ordre chronologique utilisé aux origines par elle. De même les divers cieux où règne Faro sont invoqués selon leur rôle et les buts poursuivis par les intéressés qui leur adressent, en maintes circonstances de très longues prières.

Pour ne point alourdir l'exposé, un nombre très restreint de rites sont décrits ci-après. Parmi eux une place importante est réservée à ceux qui intéressent la personne (cf. ch. III) et qui se rapportent à la naissance, la circoncision et l'excision, les funérailles, le culte des ancêtres. Pour chacun d'eux les positions respectives des éléments composant l'individualité aux divers moments ont été signalées.

Les rites des ordures qui suivent intéressent la vie collective de la famille et du village : ils concernent les demeures, les carrefours, les places publiques. Ils ont un caractère très net de recueil et de redistribution des forces individuelles pour le bien de la communauté.

Les rites de pluie, également collectifs, et qui font intervenir le Komo et le Kworè présentent un typique exemple du symbolisme des Bambara.

Enfin les rites « de renouvellement de l'année » ont un caractère plus général encore : ils démontrent les liens étroits unissant au cosmos l'individu et la collectivité (1).

I. — RITES CONCERNANT LA PERSONNE.

Naissance et imposition du nom.

Dès sa naissance, un nouveau-né est lavé avec de la bière de mil mêlée d'eau. La bière a une vertu purificatrice et le contact de l'eau qui symbolise « la victoire de Faro sur Mousso Koroni au sujet des noms de famille » est une préfiguration de l'imposition du nom.

Dès qu'il apprend la nouvelle, le patriarche vient secouer au-dessus de la tête de l'enfant, trois ou quatre fois suivant son sexe, le *pembele* familial pour lui transmettre le *nyama* et les qualités du mort dont il a hérité le *ni* et le *dya*. Puis il apporte l'autel *kere la boli ni* de la famille dans la demeure de l'accouchée et le place devant lui. Accroupi au sol, les doigts écartés au-dessus de l'objet, il prononce la prière suivante : « Toi, *boli*, fais de moi un chef, que ma famille soit prospère, un enfant est né, son âme t'est confiée, je t'invoque, *boli*, nuit et jour (1). »

---

(1) Les rites agraires ne sont pas abordés dans cet ouvrage car ils feront l'objet d'une description détaillée dans : S. DE GANAY, *Techniques et rites de l'agriculture chez les Bambara* (à paraître).

La plupart des rites sont, par surcroît, doublés d'une série de jeux à caractère cosmogonique qui se rapportent à des étapes, à des états passés, présents ou futurs de la création. Cf. p. 31.

Prenant l'enfant sur ses genoux, il lui pose l'objet trois fois de suite sur la poitrine. Répétant la prière, il égorge ensuite un coq rouge sur le sac ouvert, trempe l'index droit dans le sang et selon qu'il s'agit d'un garçon ou d'une fille, fait trois ou quatre croix sur le front du nouveau-né qui devient ainsi le « fils du *boli* », *boli dè*.

Un coquillage marin blanc, *krokrodya* (2) est placé devant le nouveau-né et doucement remué pour « condenser son *dya* à l'intérieur ». Puis on l'accroche au pied de l'enfant pendant trois ou quatre jours selon son sexe. Dans le même temps, la mère qui est chargée du *dya* de son enfant jusqu'au rite de l'imposition du nom, s'orne, pendant les huit jours qui suivent la naissance, d'un collier, *madya*, « *dya* de la personne », fait avec la racine odorante de l'arbre de même nom. Elle le portera jusqu'à ce que l'enfant fasse ses premiers pas, pour le protéger comme pour rappeler qu'elle a elle-même porté l'âme du nouveau-né.

Le nom est donné le huitième jour par le chef du Komo. Sous le *dubale*, arbre abritant les réunions du village, les vieillards s'assemblent autour des autels du Komo qu'on y a transportés (3); le père, s'il s'agit d'un premier fils, donne cent noix de kola, deux jarres de bière de mil, un bélier qui sera égorgé et de l'argent aux griots qui chanteront au cours de la cérémonie.

Une partie des cheveux du nouveau-né sont rasés et conservés dans un étui *(sebe)* qui, avant d'être porté, sera caché dans un récipient à huile pour les raisons suivantes : protéger l'intéressé contre les pratiques magiques; empêcher qu'un âne ne les mange ce qui le ferait mourir; lui permettre de demander pour lui-même santé et longue vie, à l'image de ses cheveux restés en bon état.

Ce qui reste des cheveux est porté au fleuve par une parente, où ils sont jetés en témoignage pour le Faro. Puis on attache autour du front du baptisé une bande de coton blanc dite *faro fini* (litt. : vêtement du Faro) sur laquelle on a « craché » du suc de noix de kola et qui marque sa soumission au génie.

L'aîné des vieillards examine alors avec attention le point de départ de la chevelure et le point de jonction des sourcils sur le front avant d'annoncer d'une voix forte les signes déterminants du caractère *(lere)*. Puis il saisit l'enfant et le balance sept fois d'est en ouest, huit fois du sud au nord au-dessus de l'autel en lui donnant le prénom *(loko)* qu'il a hérité en même temps que les principes spirituels d'un mort (1). Les griots récitent la généalogie *(burudyu)* du père; le *senanku* vient plaisanter le nouveau-né et lui tirer doucement le nez et les oreilles.

---

(1) *boli tigi i ka masaya kanu ñe, de wolo la, a ni kalifa be i la, ngo boli ku ani kle.*

(2) *Cardila vingens.*

(3) Si le village ne comporte pas de Komo, le nom peut être donné au-dessus du *cuafebla* paternel.

Le même jour le forgeron trace sur le visage de l'enfant les *wolo ti*, sept scarifications frontales verticales et deux scarifications horizontales sous chaque œil. Les premières représentent l'homme complet (*ni* et *dya*). Les secondes, de chiffre deux, symbole de « l'inconnu dans la création » (cf. p. 8), rappellent que l'être humain a existé dans cet état; en conséquence il a conscience de cet inconnu et possibilité de l'appréhender. Ces scarifications agissent sur le *lere* de l'enfant et lui donnent à la fois force, courage, vertu, comme la force de pénétrer dans la connaissance de l'invisible (2).

Dans une famille de forgeron, le nom est donné près de la forge paternelle. En présence de tous les artisans du village, le *kotigi* rase la tête du nouveau-né tandis qu'un vieillard prépare sept bâtonnets sur chacun desquels il prononce un nom d'ancêtre. Le *kotigi*, dont les yeux sont bandés, tire de l'ensemble et successivement trois bâtonnets : le troisième détermine le nom qu'il proclame aussitôt. Aux chants des femmes, le père extrait de son autel la hache *kongobwona* ainsi que les autres objets rituels sur lesquels un mouton est égorgé tandis qu'une prière est récitée. La tête du nouveau-né est frottée d'abord avec la hache, puis avec les cheveux rasés imbibés du sang sacrificiel ; ce geste introduit l'enfant dans le groupe familial. Il reçoit ensuite les scarifications des forgerons.

Circoncision.

Alors qu'autrefois elle était obligatoirement opérée sur les jeunes gens (20 ans environ), la circoncision est pratiquée de bonne heure si les parents sont assez riches pour subvenir aux dépenses qu'elle entraine.

---

(1) D'après une autre information le fils ainé reçoit le prénom de son aieul paternel, le second fils, celui de son père, les fils suivant ceux des pères et aieuls de la mère.

(2) Elles peuvent être refaites à la racine du nez d'un adulte désespéré de n'avoir pas d'enfant, ou sur la cuisse d'une femme qui désire être féconde. Ces scarifications, exécutées à la naissance, ne sont pas les seules que supportent les Bambara. Cf. S. de Ganay. *On a form of cicatrization among the Bambara.*

De ce fait, un enfant de 8 ans peut être circoncis avec un adolescent de 16 à 18 ans dont les parents sont pauvres et ont réuni lentement les denrées nécessaires à la cérémonie. Ces deux garçons appartiendront pourtant à la même promotion, *flã*, et seront camarades, *flani*, toute leur vie, ayant mêmes droits et devoirs. L'âge a donc un rôle restreint dans les rapports sociaux; seule l'époque de la circoncision fait, d'un groupe disparate, un ensemble cohérent, une promotion à l'intérieur

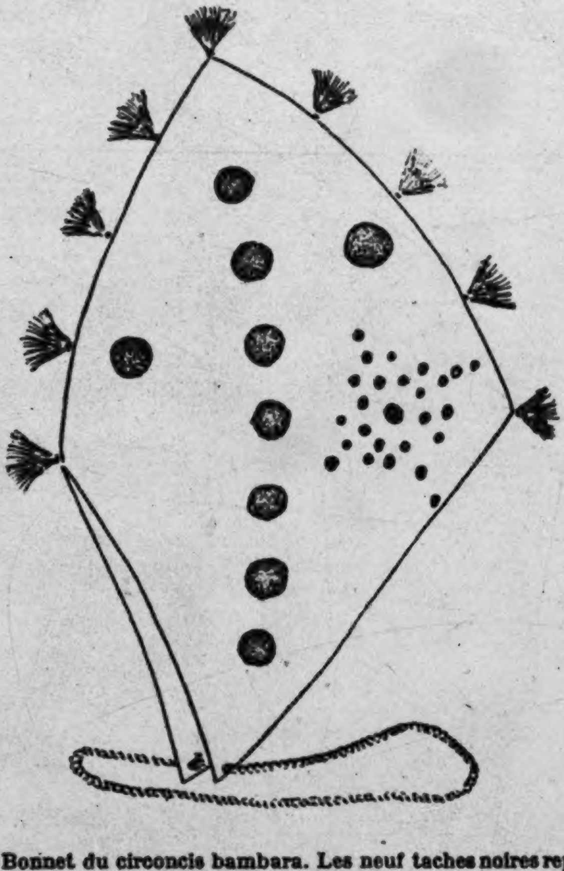

Fig. 14.—Bonnet du circoncis bambara. Les neuf taches noires représentent l'enfant, son *dya* et les points cardinaux.

Le dessin de droite représente le *sumangolo*, soit l'arrivée des douze eaux futures (cf. fig. 3).

de laquelle tous se doivent amitié, confiance et assistance dans tous les actes de la vie sociale et privée.

L'opération ayant été décidée, la parenté procède d'abord à la confection du bonnet porté pendant la retraite. Le tissu blanc est présenté au Niger par un utérin qui adresse à Faro une prière demandant licence d'exécuter avec la terre noire, les dessins qui le couvriront. Ils protégeront l'enfant qui se trouve en état d'impureté pendant toute la retraite, le bonnet lui-même garantissant sa tête contre les rayons de feu venus du 5e ciel, *koblĕnkaba* (cf. fig. 14).

Sept gros points noirs, disposés verticalement, représentent d'une part l'enfant, 3, et son *dya*, 4, ainsi que l'homme, 3, qu'il sera plus tard et sa future femme, 4. Ils assurent aussi sa protection d'est en ouest. Les deux autres points l'assurent du nord au sud. La croix de petits points rappelle le *sumangolos* la « réalisation du monde » et la purification obtenue après l'opération et la perte du *wanzo*. Au nombre de huit, chiffre de Faro, les pompons surmontant le bonnet et dont les franges ont été filées par une aïeule, sont cousus pour « attirer les forces de l'espace ». Un neuvième, au sommet, est noirci avec la terre du génie. Ainsi coiffé, le circoncis est placé dans la lumière protectrice et purificatrice de Faro. Opérer un enfant sans lui mettre ce bonnet reviendrait en effet « à s'incliner devant les actes de Mousso Koroni ».

De son côté, le forgeron-circonciseur prépare l'opération dont l'outil essentiel est un couteau dit *boloko kumba moru* (litt. : couteau tête mère de la circoncision) qu'il a forgé lui-même et qu'il porte dans une petite gaine de cuir suspendue à la hanche (cf. fig. 15) (2).

Le manche est enfilé dans une sorte d'étui de fer fermé à l'une de ses extrémités dite *kurukun* (litt. : tête boule) et ouvert à l'autre dite *šukala* (litt. : manche sorcier). Il est forgé d'une seule pièce avec la lame *dyomuru fala* (litt. : orphelin du couteau) et surnommée « sans pitié » en langue archaïque.

Le couteau et son manche d'une part, l'étui de métal d'autre part, symbolisent la personne du circoncis et le prépuce qu'on lui retire.

Avant l'opération, le forgeron lave le manche, acte parallèle

---

(1) Cf. p. 32, fig. 4.

(2) L'endogamie des forgerons est attribuée à leur rôle dans la circoncision et au fait que leurs outils, et particulièrement ce couteau, sont imprégnés du *wanzo* des adolescents.

au lavage du pénis, et trace sur la lame des dessins rituels, soit au charbon, soit à la bouillie de mil (1).

Les trois personnages *če mani saba* (litt. : trois petites personnes mâles) représentent les trois premiers circoncis (Gwonna, Gwondo et Gwonkè) qui appartenaient aux familles des forgerons du village de Gwondougou. Tout descendant de ces ancêtres doit être circoncis comme eux. En le dessinant, l'opérateur dit :

« Gwonna, Gwondo, Gwonkè, vous avez découvert le fer et vous avez supporté la douleur (de la première circoncision), vous n'avez honte ni nuit, ni jour; nos pieds sont posés sur la trace de vos pieds; le fer ne vous a pas fait honte, qu'il ne nous fasse pas honte; c'est la volonté de Faro... attaque, attaque, attaque » (ces trois derniers mots s'adressent au couteau) (2).

Les quatre personnages, *muso mani nani* (litt. : quatre petites personnes femelles) sont les quatre premières femmes excisées, inventrices de la poterie, qui étaient les femmes de ces forgerons.

L'oiseau est le *tatugu koroni*, avatar des huit ancêtres des forgerons. Il rappelle que la circoncision est pénible, dure, chaude, comparable aux effets du feu et qu'il faut peiner et souffrir pour supporter le couteau tranchant. C'est ce que rappelle l'artisan qui, en opérant les enfants, chante à plusieurs reprises :

« Le couteau est chaud, l'homme peureux ne peut le supporter, c'est une purification » (3).

Le prépuce lié au moment de l'opération par une cordelette (dessinée au centre de la lame) est placé sur le *pembele* (rectangle noir) et le couteau tranchant est frappé avec une petite masse de bois, *gossilā* (dessinée à l'extrémité du couteau). Ces trois figures reçoivent, au moment de l'opération, l'offrande du premier jet de sang des circoncis.

La ligne qui traverse la lame en son milieu sépare des instruments utilisés pour la circoncision, l'oiseau et les ancêtres qui ont fait preuve de courage. Elle exprime tout d'abord, en tant que séparation, que chaque promotion de circoncis doit être considérée comme un groupe distinct des autres. C'est là son sens social. Mais la finesse du trait elle-même a un sens qui s'applique à l'individu : chacun doit, à son image, être moralement simple, droit et fin. En se conformant à la règle symboliquement indiquée par le dessin, l'individu deviendra un être d'élite.

---

(1) Certains artisans ont, une fois pour toutes, gravé les dessins rituels sur la lame.

(2) *gwonna, gwondo, gwonkè, aw ye neke damene, ka neke gale munyu, aw ma malo šu ani kle, an se daledo an se danola, neke maw malo a ka nu an malo, faro hakili do, šu šu šu.*

(3) *a ką gwā, če filo tise ka muñu, saniyali do.*

La date de l'opération est fixée lorsque l'étoile de Mousso Koroni, *sigi dolo* (Sirius), se lève le soir en un certain point de l'est (1). Les futurs opérés étant recensés, chacun se prépare et au jour dit, la mère lave la verge de son fils avec de l'eau dans laquelle a trempé une hache ou une houe de fer. Puis elle apprête un plat de riz, *ye farina lo*, « plat de la bravoure de l'homme », que l'enfant consomme avant d'être conduit au lieu de l'opération dit *yorola sakole* « lieu réservé » situé en brousse.

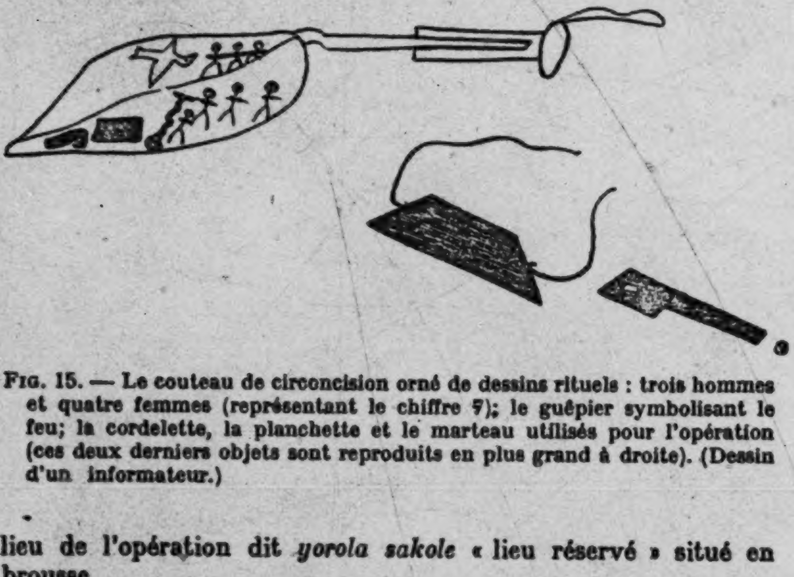

Fig. 15. — Le couteau de circoncision orné de dessins rituels : trois hommes et quatre femmes (représentant le chiffre 7); le guêpier symbolisant le feu; la cordelette, la planchette et le marteau utilisés pour l'opération (ces deux derniers objets sont reproduits en plus grand à droite). (Dessin d'un informateur.)

Lorsque tous sont réunis le forgeron-circonciseur les ayant fait asseoir en cercle au sol, les opère à tour de rôle. Tirant et tordant le prépuce, il l'attache avec la cordelette qu'il maintient tendue en fixant son extrémité entre ses orteils. Il pose ensuite le membre sur le *pembele*, appuie le couteau et frappe de la masse de bois. Il sectionne ainsi le prépuce en disant :

« Circoncis, ton père, ton grand-père, ton arrière-grand-père, le père de ce dernier aussi, l'oreille (le sexe) des ancêtres de ce dernier ont supporté [la douleur]; toi-même supporte-la comme eux. Faro, Teliko, Soba! toi qui es homme, ton chiffre est trois; trois de la verge, trois des jumeaux, dessins du pénis, c'est la coutume, supporte-la; Faro! *(ter)* (1). »

---

(1) Cf. note (1) p. 26. On peut cependant, pour déterminer la date, consulter la société du *ndomo* qui la retarde parfois pour conserver plus longtemps ses sociétaires.

Après l'ablation, l'opérateur fait sur la verge de l'enfant des scarifications dites *faro nyeke* (litt. : signes de Faro). Sous le muscle *wulu dyuru* (litt. : corde de la verge) est ménagé un petit trou. Le pénis étant considéré comme source de force, le muscle qui le maintient et le redresse lie la circulation du sang et aide l'homme dans tous ses actes. C'est par ce muscle que l'homme transmet des nerfs à ses enfants. Un sexe droit, fermement maintenu par le frein évite à l'homme et à sa descendance de nombreuses maladies : la mutilation a pour but d'obtenir prépuces et clitoris complets et bien formés chez les enfants de l'intéressé. Après la perforation, l'opérateur met dans l'orifice un peu de suc de piment et de tomate en disant :

« Fort (quand tu formes) l'enfant, (toi qui formes) l'enfant (dans la) matrice, donne-le à Faro (2). »

Car l'embryon, déposé dans la matrice féminine par Faro, reçoit du piment force et virilité et se développe grâce à la tomate.

Deux petits trous sont ménagés symbolisant l'homme et son *dya*, tandis que la prière suivante est récitée :

« Deux trous de la verge; je trace les jumeaux et je le fais bien, la peau de la personne est captive, la peau de la personne (donne) les jumeaux; supporte-les; Faro *(ter)* (3). »

« La peau de l'homme, dit-on, son corps entier sont misérables, captifs. Il est condamné à œuvrer, à suer, à souffrir. Mais ces deux perforations expriment que l'homme est toujours appelé à procréer des jumeaux, images visibles de Faro. A leur défaut, il peut avoir de nombreux enfants qui lui rendront, en sueur et en travail, la semence qu'il a mise dans la matrice maternelle et qui donne une forme aux germes donnés par Faro. »

A la racine du pénis, de petits traits, *kolo nyeke*, sont faits au couteau, tandis que l'opérateur dit :

« Marque du pénis; le sexe reçoit cette scarification à cause de l'enfant [qu'il procréera]; c'est pour que l'homme soit courageux; celui qui a [cette scarification] est respecté; grand Faro, rassasiement de Faro (4). »

(1) *bolokodẽ i fa, i moke, o ta fa, o ta fa were, o ta fa klo masamaw ye munyu, i yere ka munyu u čoko la, faro, teliko, soba, o ye če ta saba ye, wulu wo, flani wo, kolo nyeke, lada do, i ka munyu; faro* (ter).

(2) *fariña dẽ, dẽzo dẽ, i ka di faro ma.*

(3) *wulu wo fla, flani mba ti ka ñe, moko wolo ye dyɔ ye, moko wolo ye flani nye, i ka munyu faro* (ter).

(4) *kolo nyeke, wulu ti kũye dẽ koye, a ye če fariña ko ye, min ya ke bonyedo, faro ba, faro fa.*

Ils rappellent les scarifications exécutées sur le corps de l'homme et signifient la multiplication désirée de la descendance. Enfin, ils marquent la supériorité de celui qui a supporté et accepté la douleur.

Si le patient a hérité du *ni* et du *dya* d'un enfant décédé immédiatement avant sa naissance dans sa famille *stricto sensu*, la verge est perforée, tandis que la prière suivante est récitée :

« Toi un tel, les fils de ton pères sont morts, que tu les remplaces nuit et jour, le trou de la verge a été fait sur toi; Faro *(ter)* (1). »

Cette perforation le désigne pour procréer les enfants que son père a perdus.

Assis en rond, tous les circoncis saignent à même le sol, dans un trou individuel, *nyama bla dinge* (litt. : trou où est laissé le *nyama*) (2) ménagé entre leurs jambes ouvertes, faisant ainsi passer à la terre impure leur *wanzo* et une part de leur *tere*. Le circonciseur récite pendant ce temps, la prière suivante :

« Sang de la verge, sang du rejet du *wanzo*, sang qui chasse le *wanzo*, entre dans le trou, que tu payes (ma dette), que tu me protèges (contre le *nyama* du prépuce), contre la malchance, contre l'espace; ô tertre *(ter)* (3). »

Puis il pétrit un peu de terre sanglante, dont le principe, *bwa*, est plus fort que le *wanzo* (4) et en fait une sorte de pansement qu'il applique sur les plaies. L'enfant récupère aussi par ce moyen une part de son *tere*. Le sexe est ensuite maintenu au moyen d'un petit appareil, *mine naw*, fait d'une tige de mil fendue en deux en forme de fourche.

« La circoncision est un sacrifice » (5). Elle n'est valable que si le sang a coulé et tout patient qui n'a pas humecté le sol de son sang est blessé à la cuisse par le circonciseur. Il en est de même pour un enfant né sans prépuce. Ce détail doit d'ailleurs être tenu secret par les membres de la promotion, la révélation d'une malformation risquant d'empêcher le mariage de l'intéressé (6).

(1) *e kari macina, e fa dew bana, e ka o lu soro šu ani kle la, wulu wo ke la e la; faro* (ter).

(2) *dinge* est un mot en langue ancienne.

(3) *wulu dyoli, wanzo fili dyoli, wanzo gẽ dyoli, i bi dõ dinge kono, i kã sara, i kã kisi a makunangoya, i ka kisi kene ama; walawala* (ter).

(4) Le mot *bwa* est traduit provisoirement par « essence, extrait ». On dit *dukukolo bwa* ou *seke* « principe ou extrait de la terre ».

(5) *bolokoli ye saraka ye.*

(6) Une femme pourrait croire que ces malformations sont le signe que l'opéré n'a pas perdu son *wanzo*, fait qui serait un obstacle définitif au mariage.

Lorsque tout est terminé, l'opérateur, tenant en main les prépuces, dit, avant de les enterrer :

« Nous avons rejeté le *wanzo* de l'enfant circoncis, que le *tere* soit bien (1). »

Les opérés sont alors coiffés de leur bonnet posé d'abord sur la nuque et le front représentant l'est et l'ouest, puis sur les côtés représentant le nord et le sud. Toutes leurs forces résident dès lors dans la coiffure qu'ils porteront nuit et jour, sans la quitter, pendant toute la retraite.

L'approche du lieu de l'opération est formellement interdite aux femmes et aux incirconcis. Celui qui s'y rendrait par curiosité « contracterait le *wanzo* » (*wanzo ba nofe*, « le *wanzo* le suit »). Et tout incirconcis qui enfreindrait cette consigne en supporterait les conséquences au moment de sa propre opération qui serait dangereuse (2). La même règle s'applique à l'enclos de quelques huttes où séjournent les opérés sous la surveillance du *sema* et qui est situé à quelques dizaines de mètres du village, pour isoler la promotion. Car tout ce qui les touche, vêtements, bâtons, sistres, vaisselle et détritus, est imprégné de leur *wanzo*, à l'exception du bonnet.

Les nouveaux circoncis reçoivent de leurs parents des cadeaux en cauris et nourriture dits : *wanzo sababu yala*, « en l'honneur du *wanzo* » pour favoriser leur guérison.

La nuit qui précède le sixième jour après l'opération, jour dit *daworo*, les enfants sont initiés au Komo (3).

Le lendemain, le *sema* les conduit au bord du fleuve où ils lavent pour la première fois leur plaie. Cet acte, qui fait intervenir directement l'élément dans lequel vit Faro, a de plus une portée sociale : il consacre la promotion et, dès cet instant, les enfants faisant partie pour le reste de leur vie du même *flã*, échangent les quolibets et les insultes qui sont de mise entre *senɔnku* (4). Il est à remarquer que cet acte très simple d'une ablution commune constitue l'inauguration de la promotion de circoncis et déclenche dès ce moment tous les droits et obligations de ses membres les uns envers les autres.

Un repas pris en commun, accompagné de chants et de danses, termine les cérémonies du *daworo*. Dès ce moment les ablutions sont répétées chaque jour jusqu'à guérison des plaies.

---

(1) *ãn ye dẽ bolokole wanzo fili la, tere ka ñe.*

(2) L'approche du *wanzo* virulent des incirconcis agit sur celui des opérés et les atteint dans les organes génitaux.

(3) Cf. p. 155.

(4) Cf. p. 83.

Le dernier jour, tout ce qui a été en contact avec les opérés est réuni près de l'enclos, sur un carrefour : sistres, bâtons, nattes ainsi que les bois des huttes et les ordures soigneusement balayées sont mis en un tas auquel on met le feu. Chaque circoncis saute alors trois fois au-dessus du feu puis court jusqu'à sa demeure sans se retourner. Il perd ainsi définitivement le reste de *wanzo* qu'il avait gardé après l'opération. Son bonnet seul est rapporté et remis à sa mère qui le conserve jusqu'à sa mort. C'est le lendemain qu'ayant revêtu des vêtements neufs on lui apprend ce qu'il est lui-même en lui disant : « la personne est *yo* et *yo* est la personne (1) » et en lui enseignant les modalités de la création. Il est alors admis définitivement dans la société des mâles adultes de son village.

La circoncision a un effet profond sur la personne. L'enfant perd à ce moment le support physique de sexe féminin qu'est son prépuce : il devient un homme *(vir)* prêt à remplir son office de mâle reproducteur. De plus il « rejette son *wanzo* » qui s'échappe du corps au moment de l'opération (2). Dans le saut au-dessus du feu cette force rejoint, dans les autels et le masque du *ndomo*, celles des incirconcis et des circoncis des années précédentes (3).

En même temps l'opéré améliore son *tere*, car ce dernier, diminué par l'opération sanglante, augmente au moment où l'enfant revêt ses habits neufs. Jusqu'à la circoncision, l'enfant ne faisait que de petits ouvrages; après la circoncision il est considéré comme un adulte mâle admis d'office aux rites et travaux de la communauté.

L'importance du *wanzo*, la nécessité de son départ sont telles qu'au cas où un enfant meurt incirconcis, on pratique l'opération sur son cadavre. Si elle n'est pas possible, le circonciseur lui coupe l'oreille gauche en disant :

« Je coupe l'oreille en guise de circoncision (4). »

Elle est enterrée avec le cadavre ou conservée dans la demeure paternelle, mais le *wanzo* quitte l'enfant. Si l'opération n'était pas effectuée, il contribuerait à la formation d'un *nyama* très dangereux, plus agressif encore que celui d'un vieillard et dont la société aurait à souffrir.

---

(1) *ma ye yo ye, yo ye ma ye*. Sur *yo* cf. p.

(2) *wanzo file la*. Le port des vêtements et des parures revêt une importance capitale dans la perte du *wanzo*. Chez les Bozo où les enfants sont circoncis très jeunes, ils ne sont considérés comme ayant perdu leur *wanzo* qu'au moment où on leur donne ces vêtements.

(3) Cf. p. 175.

(4) *mba klo tikę bolokoli nona bi la ye.*

Excision.

L'opération est exécutée par une potière, femme de forgeron, avec un petit couteau de fer. La lame, qui est mâle, représente le soleil; le manche, femelle, est à la fois clitoris et lune. La femme se protège du *wanzo* des opérées en portant des bracelets et des amulettes et en s'enduisant les yeux d'une pommade noire.

L'opération est effectuée en plein jour, aux abords du village, devant la parenté réunie. Dans certaines localités, elle a lieu près du foyer des potières. Chaque fillette est assise à son tour sur une poterie retournée et opérée tandis que des prières sont récitées. De même qu'on blesse la cuisse d'un garçon dont le prépuce est mal conformé, de même une fille est considérée comme excisée si, dans le même cas, on lui fait subir une épreuve qui remplace l'excision : l'opératrice place une peau de hérisson entre ses cuisses qu'elle serre fortement pour faire jaillir le sang (1).

Les jeunes filles ne doivent ni pleurer ni gémir; au contraire, elles chantent pour exalter le départ du *wanzo*.

Pendant la retraite, elles portent autour de la tête un morceau de tissu blanc, couleur de Faro, qui joue le même rôle que le bonnet des circoncis. Elles agitent une gourde de calebasse, *bolokǫde barani*, remplie de huit grains ou petits cailloux dont la sonorité écarte de leur route les passants. Les sauts qu'elles exécutent au-dessus du foyer constitué par les vêtements, les gourdes et les détritus auxquels on a mis le feu, terminent la retraite et les débarrassent de leur *wanzo* qui va se fixer dans les autels du *ndomo*.

On dit d'une jeune fille bien excisée qu'elle est sage et se tient dignement. Au contraire d'une fille de mœurs légères on dit que « ses mains n'ont pas été lavées proprement (2) » ce qui signifie qu'elle a été excisée d'une manière défectueuse.

Funérailles.

La mort a pour effet de dissocier les éléments composant la personne; le corps vivant devient cadavre *(šu)* d'où s'échappent le *ni* et le *dya* qui suivent leurs destinées particulières, tandis que le *lere* se transforme en *nyama*, force active et dangereuse errant autour du défunt. Les rites funéraires ont pour premier but de capter les éléments spirituels du mort qu'il s'agit de conserver, dans son intérêt comme dans celui de la communauté; de plus, par les soins donnés à la dépouille et à ces éléments, la mémoire du disparu est pieusement entretenue. L'idée de la résurrection finale, promise à tout ce qui a vécu inspire ces dispositions; les os du mort, qui sont comme l'exuvie de son corps physique, son armature solide et durable, retrouvent l'exuvie de son âme, conservée dans les autels du Komo. Ainsi, à la fin des temps, le mort « se lèvera et, pour la joie de tous, retrouvera les siens ».

---

(1) Dans les cas où l'opérée est fille de forgeron, le sang qui coule sur la poterie témoigne de son rôle futur de potière (cf. p. 126).

(2) *a bolo ma ko ka dye ya.*

Les rites funéraires célébrés de tout temps chez les Bambara ont évolué avec leurs croyances. Quand fleurissait le culte du *balansa*, les défunts étaient suspendus dans les arbres jusqu'à pourriture, leurs os prélevés et conservés par leurs descendants. Les ancêtres des Gwonna taillaient alors à l'image des disparus des bois de *sunzun* dits *mani* (litt. : petite personne). La longueur du bois était proportionnée à la longueur du corps; la tête, les bras, les jambes et le sexe étaient soigneusement figurés. Les *mani* étaient gardés par le patriarche du village et le culte était rendu aux ancêtres sur ces autels.

Actuellement le corps est enterré au cours de rites dans lesquels le Komo joue, pour les initiés, un rôle important. Dès qu'un sociétaire est gravement malade, le chef de famille pose sur la poitrine du moribond l'autel portatif, *kere la boli ni*, appartenant à la communauté. Il ne quitte plus le chevet afin de saisir le dernier souffle. Aussitôt après le décès, sans se retourner, sans adresser la parole à quiconque, il se rend chez le chef du Komo qui place l'objet dans le sanctuaire où sont conservés les autels. L'âme est introduite dans le *nimara boli* (1).

De retour à la maison mortuaire, le chef de famille passe la main sur le visage du mort pour recueillir son *nyama* qu'il confie ensuite à Pemba en frottant la cavité du *pembele* familial « afin que la somme de travail qu'il a accompli pendant sa vie ne se trouve pas dissoute par la mort, qu'elle soit comme une force accumulée servant à la communauté, afin que son intelligence, ses qualités, son habileté dans les travaux divers et surtout dans la culture ne se perdent pas, mais se retrouvent dans d'autres membres de la famille. Le madrier, à l'instar d'un autel détenteur de forces, conserve ce *nyama* jusqu'à ce que, dans la parenté, survienne une naissance (1) ».

---

(1) Cf. p. 146. Autrefois on recueillait l'âme d'un mort entre deux calebasses que l'on refermait l'une sur l'autre et que l'on accrochait au lit conjugal. Quand la femme était enceinte on les brisait sur son ventre afin de faire pénétrer l'âme dans le fœtus. Dans la suite ce mode de transmission de l'âme n'a plus été possible à cause de l'impureté provoquée par « les discussions oiseuses sur les dispositions et situations de la création ».

Le cadavre est l'objet de soins particuliers. S'il s'agit d'un forgeron ou d'un Soma, deux tiges de mil sont placées pendant quelques instants de chaque côté « pour la nostalgie du corps (2) ». Cette pratique exprime que l'âme, momentanément dans l'autel du Komo et l'exuvie qui la remplacera plus tard, regrettent le corps animé qui sera la proie des termites. Ces tiges symbolisent les deux ancêtres qui accompagnèrent Koumabana dans l'au-delà, le décès répétant, en quelque sorte, l'histoire de l'apparition de la mort dans le monde (3).

L'ensemble du corps et des deux symboles totalise le chiffre trois, chiffre mâle, et rappelle les trois coups frappés sur le nouveau-né de sexe masculin à sa naissance. Quelques instants plus tard, un parent dépose les tiges de chaque côté de la porte de la demeure mortuaire. Les deuilleurs qui viennent exprimer leurs condoléances s'accroupissent devant elles, déposant à leurs pieds des cauris, dans le plus grand silence, car « parler et pleurer augmente les péchés du mort, les larmes alourdissant son fardeau ».

Si le mort est un personnage d'importance et surtout s'il est chef de village ou de famille on trace parfois sur son index et son pouce les signes du monde actuel et du monde futur (*bolo ti doniya*, fig. 1). Le *senanku*, les forgerons et les griots viennent réciter sa devise *(barama)*. Ils reçoivent en remerciements les vêtements qui lui appartenaient.

Le fils aîné du chef du Komo, prévenu le premier, apporte la nouvelle à son père qui le charge de l'annoncer aux hommes de sa promotion. Chacune des promotions suivantes est alertée par un délégué du groupe précédent. Enfin, les jeunes circoncis nouvellement promus dans la société vont annoncer aux femmes et aux incirconcis l'heure de la sortie du masque. Mais seules les funérailles d'un vieillard, d'un chef de village ou de canton obligent l'ensemble des sociétaires à se déplacer.

Les membres de la promotion la plus ancienne se rendent dans la demeure du défunt. Le fils aîné du chef du Komo, tenant

(1) S. de Ganay. *Aspect de mythologie et de symbolique bambara*, p. 199.
(2) *fari nana fi*, litt.: « corps au visage noir ».
(3) Cf. p. 25.

le sifflet rituel entre ses dents, siffle alternativement dans l'oreille droite, dans l'oreille gauche, puis dans les yeux du mort qu'il ferme ensuite en tirant sur ses deux orteils. Il dit alors : « Un tel n'a pas répondu. »

Le chef du Komo vient ensuite « toucher le cadavre encore chaud pour renvoyer à Faro ce qui lui appartient ». De son auriculaire trempé dans la bouillie de mil, il trace une ligne sur le corps (cf. fig. 16). En *1* et en *2* la force de l'auriculaire agit en renvoyant la semence qui est dans le sang. En *4* il supprime sa voix (car le mort ne parlera plus) ainsi que « les goûts, saveurs et appétits de sa langue, la puissance de ses mâchoires, l'air de sa bouche ». En *5* il renvoie tout ce qu'il avait dans sa tête, idées, expériences, opinions, folie, sagesse, en passant par l'oreille gauche pour enlever tous les sons qu'elle a entendus, les bons comme les mauvais. Puis l'oreille est bouchée : ce qu'elle entendrait reviendra à celui qui héritera son âme et son double, le mort devant, dans la tombe, entendre seulement avec l'oreille droite le sifflet du Komo et tout ce qui lui sera communiqué. En *6* il enlève « volonté et entêtement » pour que le mort soit soumis à Faro jusque dans la tombe. Il touche ensuite le nombril *3* et toutes les articulations pour renvoyer la semence qui gît dans la moelle de l'homme.

Le cadavre est alors transporté dans une chambre contiguë pour un lavage auquel procède un sociétaire qui porte sur son épaule le sac contenant les autels du Komo et qui psalmodie un chant célébrant le Soma Moriba Sidibé (1). Les deux tiges de mil sont placées sur le corps pendant les ablutions qui « purifient et calment son âme ».

Vêtu de ses plus beaux vêtements, le cadavre est rapporté dans la pièce principale, où ses cheveux sont rasés. Son autel individuel est remis au chef du Komo qui le dépose près du *nimara boli*. C'est alors que le porteur de cloches *(grindavo)* se rend au village et annonce la sortie du masque afin que chacun rentre chez soi. A midi, un sociétaire revêt l'appareil du Komo et s'avance, précédé du fils du chef; celui-ci siffle un air funèbre; il porte sur l'épaule le sac contenant les autels et, à la main droite, la hache et le poignard. Les deux hommes sont suivis par les jeunes circoncis portant le cadavre et par les sociétaires présents. Au cimetière *(šudoyoro)* le cortège dépose le cadavre sur le dos, près de la tombe fraîchement creusée par les jeunes

---

(1) L'ablution a lieu avec le contenu d'une grande calebasse *(dyuru fle nyẽ)* auquel on ajoute celui d'une petite calebasse *(dye fle nyẽ)* qui représente « la dernière eau du mort ».

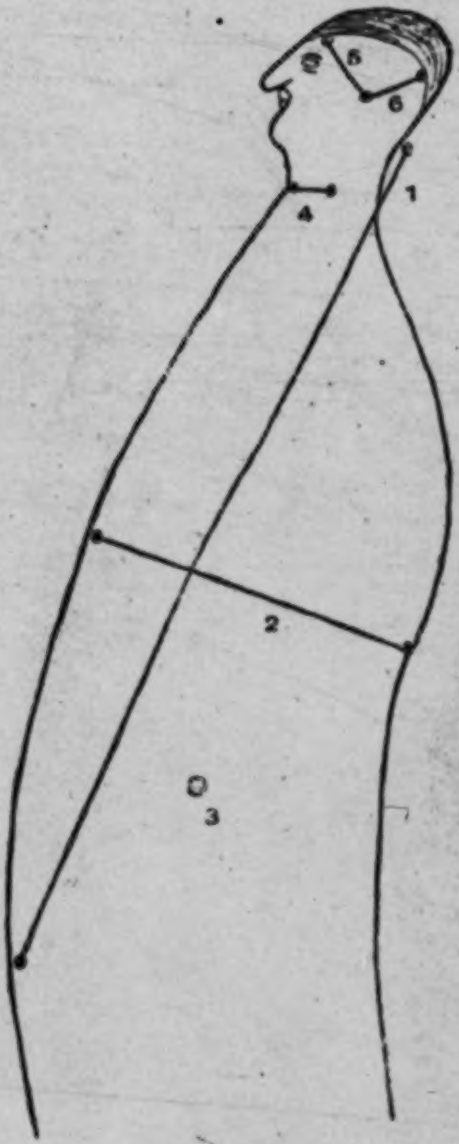

FIG. 16. — Tracé exécuté à la bouillie de mil sur le cadavre par le chef du Komo. (Dessin d'un informateur.)

gens de la dernière promotion (1). Au rythme joué par trois forgerons tambourinaires, le fils du défunt, puis tous les assistants dansent à tour de rôle, lançant avec leurs pieds un peu de terre sur le cadavre à la fin de chaque phrase musicale.

Une chèvre (ou un bouc) apportée par la parenté est sacrifiée et le sang coule à la fois sur les autels et en partie dans la tombe, tandis que le chef du Komo récite la prière suivante :

« Que tu laisses en paix [ta famille]; que nos récoltes soient bénies; que ton bonheur nous vienne ensuite; tes sacrifices sont exécutés (2). »

Le sacrifice effectué sur les autels répète ce qui a été déjà accompli dans le sanctuaire lors du dépôt de l'âme du défunt. Mais, aux yeux des jeunes initiés qui l'ignorent, c'est à ce moment seulement que s'opère, par le canal du sang sacrificiel, le transfert de l'âme dans le *nimara boli.*

Le plus âgé des hommes de la promotion aspire avec le sifflet du Komo un peu de sang pris à la gorge ouverte de l'animal et souffle sur le cadavre; un autre vieillard aspire à son tour et souffle dans la tombe. Un troisième fait de même et siffle dans l'oreille droite du cadavre « afin que le mort, ayant reçu un sacrifice complet, ne demande plus rien ». Un griot prend ensuite les sifflets et les enfonce dans le gosier du défunt; il s'emplit la bouche de nourritures apportées auparavant par une femme et souffle jusqu'à ce que l'estomac soit plein. Le reste des plats est disposé à côté du mort qui est descendu dans la tombe par ses fils et filles. Il est couché dans la cavité *sele dẽ*, ménagée au fond, sur le côté droit et face à l'est. Les deux tiges de mil sont posées auprès de lui; plus puissantes que les forces de pourriture et de destruction, elles affirment la pérennité des ancêtres; avec le cadavre, elles sont l'image des trois premiers morts et l'ensemble exprime l'espoir de la résurrection promise aux hommes.

Tandis que des chants s'élèvent en l'honneur du défunt, les jeunes gens le recouvrent de branchages frais avant de refermer la tombe, au-dessus de laquelle le masque siffle pour proclamer que, dorénavant, c'est lui qui réglera les problèmes du mort.

Les objets ayant appartenu au défunt, son lit, sa natte, sa pipe, son rasoir, sont alors entassés avec un petit sac contenant ses cheveux. On leur met le feu tandis que le chef du Komo récite la prière suivante : « Que tes biens brûlés partent attendre devant toi, qu'ils partent dans la fumée. Nous sommes derrière, nous ne sommes pas devant toi; demande pour nous le bonheur. Que tous les *dyo* avec la pince et l'enclume, la paix, viennent (1). »

---

(1) Les morts sont, aux environs de Ségou, enterrés le plus souvent dans les champs; un rônier est planté sur la tombe.

(2) *i ka du to; ana senefẽ ka barka; i ka hɛrɛ ka na an yé; i ka saraka be buora.*

Le masque danse autour du foyer en sifflant et en jetant de la poussière. Les enfants du défunt qui sont imprégnés de son *nyama* sautent trois fois par-dessus la flamme; la force absorbée par la fumée, se dissipe avec elle.

La viande de l'animal sacrifié est cuite, consommée par les assistants et les récipients sont brisés.

Trois jours après le décès, la parenté se rend au bord du fleuve; jette les vêtements du mort et un plat d'aliments qui serviront à vêtir et à nourrir le double; elle récite la prière suivante :

« Mon père Faro, une personne de ma famille est morte, voici son offrande des trois jours; fais qu'elle revienne à nouveau dans le ventre d'une femme (2). »

L'offrande de nourriture est ensuite renouvelée tous les trois jours jusqu'à ce qu'une naissance provoque le retour du double dans le monde des vivants.

Si le défunt n'a pas de descendance, son autel reste à jamais dans le sanctuaire du Komo, près du *nimara boli*. Sinon il est remis dans les sept jours au fils aîné ou au frère qui devient le chef de famille.

Dans la nuit qui suit le septième jour, l'âme vient manger et boire dans la case de la veuve qui vit solitaire. Aussi tous les récipients contenant de l'eau ou de la nourriture sont-ils soigneusement vidés et nettoyés. Le même repas est offert au défunt la nuit qui suit le quarantième jour après le décès. La veuve sort de sa demeure le huitième jour si elle est pauvre et doit travailler pour vivre, le quarante et unième jour dans le cas contraire.

Au bout d'un temps variable, l'âme, le double et le nom du défunt sont reçus par un enfant qui naît dans la famille. Dans le sanctuaire du Komo reste l'exuvie, *mana* ou *folo* de l'âme, témoin permanent de son existence terrestre. Elle est conservée par Faro qui veille sur elle et entretenue par les offrandes des vivants qui l'amèneront ainsi jusqu'à la résurrection finale.

Lorsque le défunt n'appartient pas à la société du Komo, les rites sont célébrés sur les autels des sociétés dont il fait partie; son âme est également conservée par eux. Les principes spirituels des femmes, groupées dans les institutions comparables à celles des hommes, dites *muso dye*, sont l'objet des mêmes soins où se retrouve le rythme de quatre jours, chiffre féminin.

---

(1) *i ka fê maralow dyenina, n ka la i kono i nye, m bila šiši fe, an bi ko an ti nye, i ka here nyini ã nye; ka dyow ani bala ani kula, dũ ka na.*

(2) *m fa faro n so ma bana a dyanza ye kle saba kono ye; ni ye se i ka seki, muso kono ma.*

Si le défunt est trop pauvre pour que tous les rites, toujours coûteux, soient exécutés, on prépare deux calebasses d'eau que l'on place l'une à la tête et l'autre aux pieds du cadavre; on le soulève ensuite de telle sorte que son image puisse se refléter dans l'eau. Ceci fait, huit cauris sont placés à la tête et huit aux pieds et les calebasses sont couvertes d'un van : l'image conservée est censée se refléter dans le *kaba mana*, 4ᵉ ciel, où Faro, symbolisé par les cauris, juge de son état de pureté. Un rite divinatoire est alors exécuté : si l'homme est pur, les habitants du village assistent à son enterrement malgré la non-exécution des rites. Sinon on l'abandonne à la charge des siens.

La négligence des rites assurant la vie dans l'au-delà et la sécurité des vivants fait surgir l'ombre, *šu dya* ou le fantôme *šu kere dye* (litt. : flanc blanc du mort) qui se présente pour réclamer son dû à ses descendants, sous l'aspect qu'avait le mort sur terre.

Culte des ancêtres.

Dans les vestibules de certaines demeures, un poteau de soutien *(čě dloma)* marqué parfois de sept encoches, représente l'ancêtre fondateur de la famille. Au jour anniversaire de sa mort on huile le poteau « pour rafraichir son âme ». De plus, chaque année, le propriétaire sacrifie à tous les ancêtres sur l'autel familial, le poteau et le seuil de la porte. Dans certains villages, ils sont appelés en frappant le seuil avec un petit marteau de bois, *dyele kala ni*, qui les représente.

Dans les cours, des pièces de bois fichées en terre *(jigi semen dloma)* représentent l'oncle paternel frère du fondateur et servent de siège aux chefs de famille qui s'y adossent « pour bien s'appuyer sur les coutumes ». Les cultivateurs, avant d'aller aux champs, viennent y frotter leurs houes pour les exhiber aux ancêtres.

Avant les semailles les femmes remettent une boule de mil cru au chef de famille qui les aligne pour qu'elles représentent les disparus par rang d'âge et dans l'ordre. Puis il leur donne une pincée de semences en commençant par celle qui représente le mort le plus récent et en appelant successivement les noms de tous les défunts. La pâte et les grains sont ensuite mis dans l'eau et la bouillie ainsi obtenue versée sur les montants de la porte d'entrée du vestibule de la maison de famille qui reçoivent également le sang d'une victime. L'époque des semailles venues, le chef qui a préparé de la bouillie faite avec quelques grains prélevés sur les semences la distribue aux femmes en commençant par celle qui représente le plus ancien mort; il demande aux ancêtres de veiller, pendant la germination, sur l'âme du mil qui viendra dans les grains avec la première pluie. Lorsque le mil est à maturité, les premiers grains récoltés sont placés dans une poterie sur l'aire où aura lieu le battage et distribués aux femmes de la même façon qu'aux semailles, le plus âgé des défunts devant recevoir le premier les prémices.

Une cérémonie annuelle présidée par le Komo réunit les sociétaires en l'honneur des défunts. Elle est dite *šu sõ sibiri* « samedi du sacrifice des morts » et célébrée un samedi au moment de la formation des épis dans les champs de mil.

Le *koligi* extrait de leur abri les outils ancestraux et les transporte auprès des tombes. Puis le chef du Komo et ses aides, accompagnés des masques, apportent les autels au cimetière en chantant. Chaque tombe est un instant mise en contact avec le *nimara boli* et le *nyama boli :* les exuvies des âmes des défunts visitent chacune les corps qu'elles animaient. Au rythme *šu bara* « rythme des morts » joué par les tambours, les masques dansent en chantant autour des tombes tandis qu'un simulacre de travail est exécuté avec chacun des outils des ancêtres. Pendant toute la cérémonie, la parenté se lamente, les hommes auprès des tombes, les femmes dans les demeures. Une victime sacrifiée est dépecée et cuite dans des poteries neuves brisées après usage pour éviter la contagion du *nyama* des défunts. Les danses de masques sont exécutées pendant les deux jours qui suivent. Dans certains villages la cérémonie est renouvelée après le battage de la récolte.

Cas exceptionnels.

Mort-né :

D'un enfant mort-né, on dit qu'il a perdu à la fois son âme et son double, c'est-à-dire son être complet. Les parents, responsables devant Faro de ce désastre, sont tenus de retrouver et de reprendre les éléments spirituels de leur enfant, la femme l'âme, l'homme le double, au cours de rites longs et parfois douloureux.

Dès les relevailles, ils sont conduits tous deux, rasés et nus, devant les membres de la famille assemblés dans la cour. Témoins du décès pour Faro, leurs cheveux, mêlés à ceux de l'enfant, sont enfoncés dans le mur de leur maison. Puis une tomate qui représente le fœtus est introduite dans la cuisse largement incisée de la femme; l'homme s'accroupit et boit le jus qui coule du fruit et qui symbolise le double. Chacun d'eux, mains derrière le dos, s'incline devant les anciens de la famille pour s'excuser de la faute commise en disant : « Voici [mon sexe] humilié derrière moi (1). »

Chacun répond en frappant leur sexe d'un coup d'auriculaire : « Il est bien humilié (2). »

On les conduit devant leur porte où sont réunis les vieillards des deux sexes du village; ils répètent leurs excuses auxquelles il est donné la même réponse, accompagnée du même geste d'acquiescement.

Le chef du Komo et trois vieillards de sa promotion n'ayant jamais rompu d'interdit les conduisent au bord du fleuve où ils procèdent à une nouvelle circoncision de l'homme et à une nouvelle excision de la femme, le sang donné à Faro devant tomber dans l'eau. Cette opération est dite « purification du prépuce » *(yiriyıri ligę)* et la souffrance éprouvée a une valeur expiatoire.

Le sixième jour après l'opération, les sociétaires, réunis sur la place du village (3), dansent au rythme du Komo, férocement frappé, et chantent :

« Enfants circoncis, il n'est pas bon de rompre l'interdit de l'anus. Je vous le dis, Soma et sociétaires, ne comptez pas leurs fautes. Faro *(ter)* (4). »

Les parents sont conduits sur la place et tournent bouche ouverte autour du cercle des danseurs, cherchant à reprendre l'âme et le double de leur enfant qui, attiré par le rythme et visible pour eux seuls, est présent pendant la cérémonie. Ils tournent et dansent jusqu'à tomber en une sorte de transe dite « évanouissement du Komo » au cours de laquelle âme et double s'introduisent en eux; si l'entrée a lieu par la bouche, ils cessent de crier; si c'est par le nez, on les voit étouffer; par les yeux, leurs larmes coulent.

---

(1) *a ngari ko le ye ngo* (*ngari* est un mot de la langue archaïque qui exprime la soumission).

(2) *a ngari ko kãru*. L'auriculaire est le symbole de la personne entière; donner avec lui un coup c'est acquiescer de tout son être.

(3) Cette cérémonie, dite *daworo*, est comparable à celle qu'on célèbre le sixième jour après la circoncision.

(4) *(i ye ye) boloko dew tne tyẽ mañi boda la; nye fo aw ye somaw moko ka na jigi u la; faro* (ter). C'est-à-dire, « pardonnez-leur ». Le mot anus remplace ici par convenance le mot sexe qu'on ne prononce pas.

Le rythme alors s'affaiblit progressivement. Il n'est bientôt plus qu'un murmure. Pour ne pas interrompre l'action, pour que double et âme pénètrent doucement dans les corps étendus, le murmure décroît encore pour s'éteindre peu à peu. Seules les baguettes des tambourinaires, battant l'air en silence, exécutent le rythme dit « tambour de l'âme » *(ni dunu foli)*. Bouche fermée pour ne pas effrayer l'invisible, les assistants psalmodient doucement un chant, *ni bonye*, qui calme l'âme et l'incite à pénétrer dans les deux patients. Ceux-ci, accompagnés des musiciens, sont reconduits chez eux. Pour que les principes spirituels ne les quittent plus, on les bat de verges tandis qu'on proclame à haute voix ce qui vient d'être accompli, ainsi que la honte et les souffrances volontairement subies. Ils sont ensuite éventés pour le « repos de l'âme de l'enfant ».

Le lendemain, le chef du Komo et sa promotion se rendent au cimetière pour extraire les ossements du mort-né. Ils les placent sur le sol, les examinent au grand air et dansent autour d'eux au rythme du « tambour des os » *(kolo dunu)* en chantant :

« Os blancs, vous, morts! je suis venu vous voir (1). » Puis la tombe est refermée sur eux.

L'homme et la femme sont alors convoqués au champ des morts *(šu foro)* pour prêter serment. Leurs bouches étant pleines d'eau de pluie ou d'eau du Niger, un assistant se penche et, pour « chauffer le liquide avec la force des paroles » récite, sous leur menton, la prière suivante :

« Tue-moi si je le fais deux fois; bonne ou mauvaise, la chance vient de plusieurs endroits. Faro *(ter)* (2). »

L'eau avalée après ces paroles constitue une promesse solennelle à Faro de ne plus renouveler la faute.

Portés ensuite, l'homme par deux sociétaires, la femme par trois compagnes jusqu'à leur demeure afin que leurs orteils, sièges provisoires des principes spirituels revenus en eux, ne touchent pas le sol impur, ils restent respectivement trois et quatre jours sur leur natte sans faire un mouvement. Au dix-septième jour, avec mille précautions, ils pourront reprendre une vie plus normale, mais ils ne seront entièrement libérés que lorsqu'une naissance, survenue dans la famille, éliminera de leur corps l'âme et le double de leur enfant mort, en les transmettant dans le nouveau-né.

---

(1) *kolo dyew aw šu ne nyɛ na bo ye.*

(2) *ni nya ke šyẽ fla i ka n fa; ka kadi ka kago, gariseke bo fã ka čã; faro* (ter).

Mort d'un incirconcis :

Lorsqu'un incirconcis est gravement malade, le chef du *ndomo* (1) fait sacrifier un coq pour savoir si la guérison est possible. Dans le cas d'une réponse négative, sous la conduite d'un initié, les enfants, qui se relaient nuit et jour, font résonner en brousse les objets rituels. Ainsi est-on sûr de saisir au moment du décès, l'âme de l'agonisant qui est captée par l'onde sonore et conduite dans les objets eux-mêmes. Deux initiés sont postés près de la demeure du malade, et, dès qu'ils apprennent sa mort, vont prévenir en brousse les enfants pour qu'ils cessent leur office. Le chef s'assied face à l'ouest et récite une prière puis il sacrifie des victimes offertes par la parenté.

Avant d'enterrer le cadavre, on le circoncis et le *wanzo* se rend dans le masque du *ndomo*. Dans la nuit qui suit l'enterrement les sociétaires se rendent sur la tombe fraîche et font vrombir les objets rituels contenant l'âme. Ils renouvellent cet acte chaque année au-dessus des tombes enfantines après le battage de la récolte pour « éveiller les morts et leur dire que leurs âmes ne sont point perdues ».

Mort à la guerre :

Quand un combattant revient en bonne santé d'une bataille le sacrificateur ou le chef du village ordonne l'exécution du *ni yere klo* « jeu de la vibration de l'âme », pour fêter son retour. Hommes et femmes se réunissent sur la place du village pour chanter : « L'âme est venue, la lumière de l'âme est venue, le tambour de l'âme sera joué pour elle (2). » Puis ils forment un cercle et tournant alternativement dans un sens puis dans l'autre, jettent sur la tête de l'intéressé un peu d'eau qui « rafraîchit son âme ».

Quand un homme est mort à la guerre, les rites dont il est l'objet font intervenir le *nyama boli* du Komo, autel destiné à la conservation de l'âme de ceux qui meurent de mort violente.

Autrefois la pierre qui avait frappé mortellement un combattant était soigneusement conservée. Le cadavre était lavé sur des cauris et sur les pierres utilisées dans les frondes car son *nyama* en les imprégnant les rendaient plus aptes à tuer. On transportait aussi le cadavre à la sortie du village où chacun lui offrait des cauris en énonçant son nom. Puis on le balançait trois fois en direction de l'agglomération, d'abord pieds en avant, ensuite tête en avant. Tous les habitants étant rentrés dans leur demeure, on faisait sortir le Komo : on frappait sur la pierre qui l'avait tué pour appeler son âme, puis on la frottait sur le *nyama boli* pour l'y faire pénétrer. On dansait avec l'autel et le cadavre était enterré et recouvert de branches fraîches de *ngamyā* (1). On arrosait la tombe pour « rafraîchir le défunt » tandis que le chef du Komo sacrifiait sur le *nyama* et le *nimara boli*.

---

(1) Cf. p. 170.
(2) *ni nana, ni yelengu nana, ni dunu na fo o la.*

Mort au loin :

La nécessité d'exécuter les rites, comme leur minutie, sont telles qu'il est toujours déconseillé à un Bambara de s'expatrier. En effet, s'il meurt au loin, son souffle ne peut être recueilli ni les transferts successifs opérés. Aussi le chef de famille dégage-t-il dans ce cas sa responsabilité en prévenant ceux qui partent pour de longues années de l'impossibilité où il sera de remplir son office auprès d'eux.

Cependant un rituel a été institué pour les jeunes gens obligés de s'éloigner du groupe familial du fait du service militaire. Le cas est soumis au chef du Komo et l'intéressé fait égorger deux chèvres sur les autels. Pendant que le sang coule, le chef demande au Komo de veiller sur l'âme et de bien vouloir la reprendre comme il le ferait s'il décédait auprès des siens.

Si la nouvelle se répand du décès d'un absent, la famille interroge le Komo par des procédés divinatoires pour savoir si l'âme est revenue et si, de ce fait, tout est rentré dans l'ordre.

Foudroyés et noyés :

Certains décès, considérés comme anormaux, preuve du courroux de Faro, ne permettent pas la réincarnation des principes spirituels. Il en est ainsi des hommes tués par le Komo pour sorcellerie, des foudroyés pour rupture d'interdit de Faro. Leur âme et leur double sont à jamais perdus pour leurs descendants, leurs corps jetés à la fosse commune.

---

(1) *Celtis integrifolia.*

S'il s'agit d'un noyé, ou la noyade est accidentelle, ou elle est due au courroux de Faro qui rejette le cadavre, nez et nombril coupés. Dans les deux cas, le double conservé dans l'eau n'est pas perdu, mais des sacrifices sont nécessaires pour le retour de l'âme et du double dans un enfant de la famille.

Si le corps n'est pas remonté à la surface, le père du noyé, n'a le droit de le pleurer que lorsque tous les rites ont été célébrés. Il demande au chef du Komo d'intervenir auprès de Faro pour obtenir de lui l'autorisation de chercher le cadavre dans l'eau. Il offre sept tomates que le chef, devant sept vieillards de sa promotion, lance à l'eau en échange du cadavre. Des Bozo alertés plongent pour rapporter le corps auquel le chef coupe nez et nombril qu'il jette à l'eau en offrande. Puis on place le cadavre à plat ventre et on appuie vigoureusement sur son corps pour en extraire l'eau, car l'enterrer plein d'eau reviendrait à « enterrer la pluie » et à vouer le pays à la sécheresse.

Après l'enterrement, on exécute sur le sanctuaire. à la bouillie de mil faite avec les graines du champ de Faro, un dessin qui représente le mort et ses mutilations. Les sept vieillards assistants ferment les yeux en signe de respect, afin de ne pas « enregistrer un dessin fait pour Faro ». En effet, le but cherché est d'obtenir la pitié du génie et de lui demander d'englober le défunt dans le compte qu'il tient de ses ressortissants. C'est aussi devant ce dessin que chaque semaine la parenté viendra déposer une offrande et pleurer.

II. — Rites des ordures.

Les débris, les détritus, les ordures que l'on recueille dans les maisons, les cours, les places publiques, les carrefours, contiennent des forces que leur ont communiquées les hommes.

Les rites dont ils sont l'objet et qui varient selon leur provenance, ont pour but d'offrir ces forces à Faro qui les rend aux hommes purifiées et régénérées dans l'eau de pluie dont il abreuve les champs, dans celle des mares et des puits. Elles sont donc redistribuées et utilisées à nouveau pour le bien de la communauté.

Les ordures des carrefours, dites *dangu kalaw*, tiges ou pailles du *dangu*, contiennent la force, *nyama*, de tous les êtres qui les ont foulées.

Les ordures des demeures contiennent le *wanzo* des incirconcis, le *nyama* que les habitants supportent pour avoir tué animaux ou insectes et pour avoir reçu des injures, et leur *tere* bon ou mauvais. Ces forces, dites *wanzo dla* (litt. : « arranger le *wanzo*) (1), ou *nyama dla*, viennent constamment en aide à tous les membres de la famille, elles améliorent le *wanzo* des incirconcis, facilitent l'accouchement des femmes, redonnent de la vigueur aux vieillards. Un petit autel, *konye*, conservé dans la pièce réservée au chef de famille, leur est consacré.

Les balayures ramassées après les sorties du Komo, sur la place où ont lieu les danses, contiennent la force des sociétaires.

a) Les ordures familiales, recueillies individuellement, sont mises en tas séparés, dans des excavations circulaires peu profondes aménagées aux abords de l'agglomération (cf. pl. VI, *b*). Chaque semaine, chez les gens fortunés, une chèvre est égorgée au-dessus du tas sur lequel on a placé momentanément l'autel. Le sacrifice établit un double échange : le sang alimente l'autel en même temps qu'il provoque dans ce dernier le transfert des forces contenues dans les ordures.

Tous les deux mois et sept jours, sur décision du chef de village, ces ordures individuelles sont extraites des trous et chacun brûle son propre tas dont il aspire la fumée. Les cendres sont déposées au bord du fleuve, mouillées pour que le vent ne les emporte pas, et abandonnées pendant sept jours, période pendant laquelle Faro « vient les visiter et les bénir ».

Le huitième jour, après réunion chez le chef, les villageois se rendent au carrefour pour y brûler les tas d'ordures collectifs, recueillir les cendres et les transporter au rythme *wanzo foli*, joué sur les tambours, au bord du fleuve où se trouvent celles des tas individuels.

Après un sacrifice offert sur les autels *konye* des assistants, le griot du Komo est frappé par le *nyama boli* jusqu'à ce qu'il entre en transes et se précipite à l'eau sans mot dire. Tous doivent jeter leurs cendres à sa suite avant qu'il ne soit ressorti. A ce moment les crachats de l'homme qui s'ébroue sont recueillis comme un don de Faro en échange des ordures jetées. Chacun s'en enduit les mains et les pieds et, après le retour qui s'opère en silence, en imprègne le seuil de sa demeure en témoignage du sacrifice, afin que Faro « reconnaisse les siens et protège leur vie ».

---

(1) Ce nom leur est donné surtout dans les maisons où vivent beaucoup d'enfants.

Le jeudi qui suit, les gens se réunissent pour danser sur les rythmes propres à chaque sexe et à chaque génération. Au soir, chacun va mettre le pied sur l'emplacement du tas d'ordures puis tous se rendent au carrefour pour offrir au génie Soba du mil, du coton, des noix de kola. La cérémonie se termine par une réunion chez le chef qui donne des conseils, encourage chacun à respecter les coutumes, à honorer les ancêtres et les génies protecteurs.

b) Après les sorties du Komo, les détritus sont balayés et rassemblés devant le sanctuaire. Chacun des participants saute trois fois par-dessus, pour leur communiquer son *nyama*. Le soir, le masque tourne en sifflant autour du tas, auquel on met le feu, tandis que le chef jette trois fois de la poussière aux quatre points cardinaux. Le masque se tient alors dans le vent de façon à recevoir la fumée; derrière lui se placent d'abord le chef puis les sociétaires, en file, accroupis, et bouche ouverte pour mieux aspirer. Lorsque le vent change de direction tous se déplacent pour continuer cette fumigation, *wušuli*, qui constitue une purification en même temps qu'un apport de forces. Au moment où le feu est presque éteint, les plus courageux le piétinent pour mieux assimiler le *nyama* qu'il dégage. La cendre, recueillie par le chef, est partagée, l'unité de mesure étant la calebasse *mure* : une part importante est mise dans le *nyama boli*, une autre est donnée en offrande à Faro, une troisième est distribuée aux sociétaires.

A quelques jours de là, le groupe se rend au bord du fleuve au son des tambours, rythmant le *murumuruw foli* (litt. :rythme des débris), jette à l'eau les cendres réservées à Faro et, toujours dansant, s'en retourne au village.

La part remise aux sociétaires sert à préparer de la potasse qui, mélangée au gâteau de mil, nourriture quotidienne des Bambara, fera participer les membres de la famille aux pouvoirs retenus dans le *nyamanlo*.

Cette consommation clôt le cycle du transfert des forces, lesquelles avaient été temporairement communiquées par les individus aux ordures, puis récupérées par Faro et redistribuées finalement au corps social.

III. — Rites de pluie.

Au moment de la première façon donnée aux champs, on dessine sur l'arbre du Kworɛ à la bouillie de mil, un losange inscrit dans un rectangle qui représente « le grand feu sorti des angles cardinaux » au moment de leur constitution en disant : « Les quatre coudes (le losange) sont le feu des angles, voici l'anniversaire du Kworè ». Car le défrichage ou le premier labourage symbolisent toujours le premier débroussaillement obtenu par le feu.

Dans le courant du mois de mai, les sociétaires du Kworè sacrifient sur leurs autels, avant le premier grondement de tonnerre, pour purifier le premier ciel où se forment les nuages du passage impur de Mousso Koroni. Le chef réunit autour de l'arbre les sociétaires et récite la prière suivante :

« Je suis venu à toi, Kworè, si [le nuage] est noir à l'est, qu'il vienne; noir à l'ouest, qu'il vienne; noir au sud, qu'il vienne; noir au nord, qu'il vienne; noir au firmament, qu'il vienne, et qu'alors il donne une grande eau » (1). Il verse ensuite sur la terre de la bouillie de mil et le sang des volailles apportées par chaque sociétaire. L'initiation de nouveaux membres a lieu au cours de cette cérémonie.

Après la beuverie de bière de mil qui suit les cérémonies, il est d'usage de raconter l'histoire de Mousso Koroni chassée par Pemba et poursuivie par Faro.

Si, malgré cela, la pluie ne tombe pas assez vite, les sociétaires se réunissent au pied de l'arbre en apportant un fer de hache que l'on place dans une eau fraîche. L'eau est ensuite versée au pied de l'arbre : elle symbolise le froid que subissent, dans le deuxième ciel, les génies du Kworè pendant leurs luttes pour obtenir le passage de la pluie.

Dans certains villages, les sacrifices au Kworè et au Faro sont offerts en même temps. A Massala et Soroba, les sociétaires se rendent au bord du Niger, emportant avec eux le *kworẹ boli*. Un peu de l'eau qu'il contient est versée au fleuve et remplacée tandis qu'une prière est adressée à Faro. Une victime est ensuite égorgée, du cuivre jeté au fleuve. On secoue l'autel au-dessus de l'eau pour imiter le bruit du tonnerre et de la pluie; de retour au village, les sociétaires allument au pied de l'arbre du Kworè un feu dans les braises duquel ils placent des pierres de tonnerre.

« Chauffer les pierres agite leur âme »; quand elles sont chaudes, on les plonge dans l'eau froide pour « chauffer et tourmenter l'âme de l'eau ». La fumée dégagée par le feu, la chaleur contractée par les pierres et l'eau contraignent la pluie à tomber.

---

(1) *ne nani na kwore nani na; a ma fi korona a ka na; a ma fi klebi a ka na; a ma fi woro dugu a ka ma; a ma fi keñeka a ka na; a ma fi sãfe a ka na; otumana a ka ke dyi ba ye.*

Des victimes sont sacrifiées puis les sociétaires retournent au village autour duquel ils tournent six fois en partant de l'ouest. Puis ils vont reporter au sanctuaire le *nimara boli* et les vieillards qui représentent le génie dansent sur un seul pied au son des tambours en imitant Faro qui n'a qu'un membre inférieur. L'autel, introduit dans le sanctuaire par le chef qui y pénètre à reculons, reçoit en offrande un peu d'eau du Niger dans laquelle on a fait tremper depuis la veille, pour les « rafraîchir », des pierres de tonnerre. La même libation est faite sur le *kwore boli.* De retour chez le chef du Komo, on fait sur les murs de sa demeure des libations de bouillie de mil, puis on égorge au nom de Faro, du *nimara boli* et du Kworè, un bélier blanc dont la chair sera jetée au fleuve, acte qui termine les cérémonies.

c) A la fin de l'hivernage est célébré l' « anniversaire du Kworè » qui a pour but premier de commémorer l'action des génies pendant la période précédente pour l'obtention de la pluie.

Au jour dit, les sociétaires vêtus d'un cache-sexe, tenant dans la main gauche un fouet d'herbe rouie et tordue, de l'autre une torche de paille enflammée, se rendent auprès de l'arbre autour duquel ils tournent en chantant pour « recueillir le Kworè ». Le claquement des coups de fouet qu'ils se donnent mutuellement représente les coups de tonnerre, la batterie de tambour qui accompagne leurs chants imite son grondement. Les brûlures qu'ils s'infligent rappellent celles que supportent les génies dans les combats célestes. Ils se dirigent ensuite vers la place publique où sont massés les villageois et où sont censés conduire le génie qu'ils ont appelé en mimant son action. Quand ils sont réunis, apparaissent les *kworeduga* vêtus de leur costume traditionnel, à califourchon sur leur cheval de bois, qui représentent les génies montés sur leurs chevaux ailés pour voler au combat.

Ils s'avancent en dansant et chantent des strophes reprises en chœur par les sociétaires. Ceux-ci ayant formé un cercle, le chef se place au centre, se fouettant, se brûlant, et faisant mine d'avaler le feu de sa torche. Quand il est las, il s'arrête et, tour à tour, les sociétaires l'imitent. De la poudre de piment écrasé est soufflée dans les yeux des danseurs pour rappeler la chaleur brûlante des cieux embrasés.

Les *kworeduga*, qui ont alors déposé leurs chevaux de bois, mettent pied à terre pour se battre, saisissent des branchages verts; ils éteignent, en les fouettant, le feu qui prend aux vêtements des danseurs et des assistants. Ce geste rappelle l'action du vent qui, dans l'espace, éteignait le feu ardent s'attaquant aux combattants. Les participants, entre les danses, boivent la bière apportée sur place pour la circonstance afin de nourrir les invisibles qu'ils représentent.

Tous les assistants consomment également un plat composé de pois, haricots, arachides, riz, manioc, mil, fonio, cuits avec des feuilles de baobab et d'huile de karité. Ce mélange est assimilé au brassage des nuages par les génies qui, au plus fort de la lutte, sont censés les avaler. Quand la cérémonie tire à sa fin, le chef ayant renvoyé les femmes et les enfants va quérir le *kwore boli* qu'il balance dix-huit fois sur la place.

Les sociétaires en rang, retournent auprès de l'arbre pour y « ramener » le Kworé qui a assisté, invisible, à toutes les cérémonies. Ils tournent autour de l'arbre en chantant au rythme des tambours. Puis ils éteignent leurs torches et les jettent à son pied avec les fouets avant de s'en retourner chez eux. Leurs plaies et leurs brûlures sont soignées par leurs femmes avec l'eau de l'autel du Kworè, cette médication portant le nom de *kwore kane* (remède du Kworè).

Les mêmes danses et sorties masquées ont lieu trois jours de suite. Au quatrième jour le chef et les vieillards, dévêtus, se rendent au sanctuaire en rampant pour le sacrifice annuel offert à l'intérieur. Le chef ramasse les pierres de tonnerre recueillies pendant l'année écoulée et les place dans le sac des autels destinés à la vente.

Pour « éclaircir » les miroirs, il verse sur eux de la bouillie de mil; sur le serpent et sur le *ñõ boli*, il égorge des volailles et dépose du suc de noix de kola; il remplit ensuite le *ñõ boli* avec du mil prélevé dans celui du Komo. Avec les grains restants, il confectionne une bouillie dont il fait une libation sur le sac. Il passe ensuite sur le serpent un brin de paille enflammé en disant : « Toi, serpent, tu n'as pas peur du feu; tu ne dois pas avoir peur du feu de la pluie » (1).

Cet acte a pour effet de préparer par ces brûlures le serpent à attirer la foudre dont il ne doit pas redouter les effets.

IV. — RITES DE RENOUVELLEMENT DE L'ANNÉE.

Ces rites comportent des actions individuelles, familiales et collectives, ces dernières faisant intervenir la plupart des institutions (2). Tous, du nouveau-né au vieillard, doivent procéder à une sorte de purification qui consiste essentiellement dans le rejet des souffles et forces de l'année écoulée et dans la prise de forces et de souffles neufs : c'est, selon l'expression bambara, « un rafraîchissement du corps et de l'âme ». Mais le renouvellement n'est pas limité aux éléments qui composent la personne, il s'étend au cosmos et aux points cardinaux.

---

(1) *e ngorongo e ma sira lasuma ñe e kana sira sandyi lasuma ñe.*

(2) Nous donnons à titre d'exemple des rites collectifs ceux qui sont exécutés sur les autels de pierre du village *(fara ba)* (cf. p. 91).

1° Le rite individuel du chef de famille est exécuté avec l'instrument *ngoni* qui est utilisé pour tracer sur le mur de son *česo* les dessins représentant l'univers (1). Il débute par une offrande de suc de tomate réservée à Faro, qui préside à l'usage familial de l'objet et qui se trouve dès lors présent. Les fruits sont pressés; sur le suc, un hérisson est égorgé pour qu'aucun autre génie ne le touche. Ensuite l'homme sacrifie un margouillat qui rappelle sa condition avant sa circoncision : ce sacrifice figure une nouvelle circoncision, offerte à Faro, et qui augmente ses forces.

Le sacrifiant met sa langue sur le suc des fruits sans en avaler une goutte, pour donner à Faro « un compte rendu complet de tous ses actes, de toutes ses pensées de l'année écoulée (travail, naissances, décès, maladies, disputes, bonheur et malheur) comme un subordonné faisant un rapport à son supérieur ». Il met l'auriculaire droit dans le liquide et le pose au mur sur le dessin représentant Faro. Puis il aspire par les narines un peu de suc de tomates et le souffle sur le *ngoni*, balayant ainsi le reste de vie de l'année écoulée qu'il tenait encore dans son corps : un air nouveau, venu de Faro, circule alors dans ses poumons. Il remplit sa bouche ensuite de liquide retenu par la peau de bouc de l'instrument et le recrache aussitôt pour montrer au génie que tout lui est remis. Puis il se rend au fleuve ou au bord de la mare de Faro, où il boit un peu d'eau à titre de purification pour l'année à venir.

2° Au jour choisi pour la cérémonie familiale, le *ngoni* est solennellement extrait de la pièce où il est habituellement mis à l'abri des regards et présenté à la famille assemblée devant la porte.

Sur le cadre on exécute un rythme dit *kalafoli* qui a pour effet de renvoyer au fleuve ou au puits l'âme *(ni)* des assistants. Puis on joue sur le filet, qui représente Faro, un autre rythme qui appelle l'âme renouvelée rendue par le génie. Tous ouvrent la bouche et aspirent la nouvelle effluve bénéfique venant sur la famille. Quand le rythme cesse, chacun ferme la bouche et rentre sans parler chez soi. A la porte d'entrée, avec une cordelette, *sebe dyuru*, les enfants sont frappés de petits coups sur le dos

---

(1) Cf. p. 129, fig. 10.

« pour recevoir et supporter tout ce qu'apportera l'année nouvelle ».

L'instrument est alors remis en place dans la demeure tandis que les assistants ferment les yeux pour ne point l'apercevoir. Le possesseur entre en transes, fait qui exprime que Faro lui-même a porté l'instrument au lieu où il séjournera pendant l'année. L'homme qui sort à reculons de la pièce où il l'a déposé est transporté dans son *česo*; il y reçoit des soins destinés à lui rendre son état normal et qui comportent une purification effectuée sur son autel individuel, *čuafebyěni* (1).

3° Les cérémonies collectives de renouvellement de la personne sont exécutées en premier lieu sur la pierre *fara ba* du village.

Les « signes de la création » *(bolo li doniya)*, gravés au fer rougi sur une calebasse dans le but de demander aux ancêtres leur appui sont présentés aux assistants. Puis la pierre est enlevée et les objets qu'elle recouvre vérifiés, l'assemblée s'assurant qu'aucun n'a été déplacé en cours d'année. Puis on procède à la réfection des dessins rituels : l'opérateur dessine d'abord des torches qui représentent le feu utilisé autrefois par les ancêtres pour se défendre des attaques et des dangers venus de l'extérieur, tandis qu'ils édifiaient le village. La prière suivante est récitée : « Toi, torche de feu, je t'ai préparée dans la montagne (d'où sont sortis nos ancêtres), toi qui gardes les âmes du villages, protège nous de ceux qui veulent nous nuire, feu *(ter)* (2). »

Puis il dessine, comme sur le bonnet des ancêtres, un point noir qui figure et la matrice des femmes et Faro; celui-ci aidera les hommes en leur donnant de l'eau car « nul ne peut sans son appui, même le Kworè, avoir la pluie nécessaire aux cultures ».

Trois petits personnages représentent les trois chefs responsables du Kworè soumis aux rites du feu et qui supportent avec courage et pour le bien commun les souffrances et les brûlures. Les autres sociétaires sont figurés par quatre silhouettes, pour marquer leur situation inférieure par un chiffre féminin. L'ensemble des personnages et des torches converge sur le point noir pour montrer que, « les hommes par les pieds, les torches par le feu, rejettent leur *nyama* vers lui ».

Lorsque les dessins sont terminés, tous les assistants à tour de rôle posent sur lui leur auriculaire puis leur langue pour abandonner le *nyama* de l'année et recevoir des forces nouvelles. Les femmes procèdent aux mêmes gestes que les hommes en les répétant quatre fois. Chacun reçoit ensuite respectivement trois ou quatre coups de fouet sur le dos pour bien intégrer en lui ces éléments nouveaux (1).

---

(1) Cf. p. 132.

(2) *e mõ ñõ tasuma, ñe e šu kulu la kę dla, dugu nimara ba ke, i kã kla kelenyõ na, tasuma* (ter).

Les enfants, conduits par leur mère, sont l'objet de soins analogues. Les garçons appuient leurs orteils sur la pierre; les fillettes lui présentent leur sexe, pour témoigner de leur féminité. Tous sont ensuite assis à tour de rôle sur la pierre pour que le *nyama* ancien les quitte par l'anus. Puis, soulevés par leurs parents au-dessus d'elle, « on les secoue en tous sens pour bien tasser en eux le nouveau *nyama* reçu ». Les mères passent alors leurs mains sur le visage des enfants, puis sur le leur, geste qui les lie pour l'année qui vient à leur progéniture.

L'assemblée se rend auprès de la pierre du Kworè où elle renouvelle les points cardinaux en brandissant des torches allumées à l'ouest, au nord, au sud puis à l'est. Chacun s'excuse des fautes commises en cours d'année. Les hommes à tour de rôle posent le pied droit sur la pierre et se tournent successivement vers les points cardinaux en prenant une forte bouffée d'air, bouche ouverte et langue tirée, comme pour « les aspirer ». Les femmes font de même en posant le majeur sur la pierre; elles reçoivent en même temps quatre coups de fouet sur le dos pour « supporter (2) le changement des points cardinaux avec la douleur ».

Tête baissée et mains au dos les malades présentent à la pierre les parties du corps, sièges de leur souffrance, en disant : « Voici le mal qui est dans ma chair (3) », car la pierre est à la fois responsable et dépositrice de la maladie. Les borgnes et les aveugles montrent leurs yeux fermés. Les infirmes posent sur elle leurs membres atteints. Puis les vieillards initiés, entièrement dévêtus, font le tour de la pierre en récitant une formule en langue ancienne (4). Ensuite, les jeunes gens courent tout autour d'elle en faisant tourner vivement le bras droit, poing fermé; par ce geste ils demandent à la pierre de les aider à trouver femme. Les jeunes filles les suivent en marchant sur leurs traces, geste de docilité qui exprime aussi leur désir de se marier.

La cérémonie se termine par une beuverie de bière qui dure trois jours. Chacun est heureux et gai d'avoir « renouvelé » son âme; les jeunes gens se marieront, des enfants seront conçus.

---

(1) Avec l'auriculaire on agit sur le *nyama* du corps, avec la langue sur celui des paroles.

(2) Le terme familier « encaisser » serait une meilleure traduction.

(3) *nka soko la ba na fle ninye.*

(4) *dede kumbeyde mala kay kapo kumbey de malado.* Ce texte signifierait : « pierre, maîtresse de tous, ne crains rien, tes enfants sont là ».

CHAPITRE VIII

LA DIVINATION

S'il est encore difficile de dégager les principes généraux de la divination chez les Bambara, il est possible cependant d'apercevoir à travers ses aspects divers des éléments identiques. Dès qu'on aborde les mécanismes et les symboles employés par les devins, il apparaît que le premier et fondamental élément de la divination est la « parole », créatrice de vie, moteur du cosmos et pouvoir de Faro.

Prévoir l'avenir, c'est dévoiler au profane la « parole » qui se situe à la fois dans l'espace et dans le temps, qui est volonté et expression matérielle de cette volonté. Le destin est compris comme la réalisation des desseins de la création, auxquels tout doit se conformer. Etre soumis à cette volonté est la sagesse suprême. S'enquérir de la raison d'un état ou d'un événement passé, ou déterminer l'attitude à prendre devant des états ou des événements futurs, c'est là ce que peut et doit faire le sage.

Les puissances surnaturelles, détentrices de la parole, ont seules le pouvoir de la révéler. Elles l'ont fait, dans les temps mythiques, pour tous les hommes, en leur enseignant des techniques propres à réparer les désordres successifs causés dans la création. Elles le font pour chacun, s'il en a besoin et s'il sait lire au travers des procédés divers de connaissance qu'elles ont mis à sa portée. C'est donc à elles que s'adresse le devin pour que la parole soit communiquée.

Quels vont être les signes privilégiés sur lesquels se penchent les devins? Il apparaît que ce soient les nombres, et notamment sur les vingt-deux premiers. En effet, tous les aspects de la vie physique et morale sont inscrits en eux. Leur ensemble reflète la suite des événements dans l'espace et dans le temps. A chacun d'eux est assigné un symbolisme complexe qui se superpose aux autres.

Car chaque nombre a un ou plusieurs sens qui lui sont propres.

Il est pair ou impair, notion liée à celle de la gémelléité à laquelle il est fait si souvent allusion au cours de cet ouvrage. La somme de plusieurs nombres exprime aussi une idée particulière qui s'ajoute à celles que recouvre chaque élément; une valeur est attribuée enfin à la succession des nombres, qui est la première expression du temps (1).

Les 22 premiers chiffres, qui représentent l'ensemble des « paroles » et expriment la totalité de la connaissance mystique des Bambara, doivent être envisagés sous des angles différents selon qu'on les considère comme les 22 éléments fondamentaux de la création, les 22 éléments de la domination de cette création par Pemba, la série des 22 modes et temps de la réorganisation de cette création par Faro. Dans cette série apparaît nettement le classement des éléments composant l'être humain, *ni*, *dya*, *tere*, selon le caractère même et le principe d'action de Faro : la gémelléité.

De plus, les étapes du temps, lequel n'existait pas avant sa domination, sont exprimés par la succession des chiffres, dont chacun est lié à une partie du mythe.

La divination courante utilise les 22 premiers éléments sur le plan où ils expriment « l'ordre et la parole de Faro ».

1. *kele*. Faro; la parole. Chiffre du maître de la parole. La chefferie; le droit d'aînesse, le droit du premier; la tête. La conscience : aspect psychique, aspect moral.
2. *fla*. Dualité initiale, gémelléité. Les deux jumelles de Faro; les deux premiers jumeaux humains. Amour et amitié; union des êtres.
   Nécessité pour l'homme cependant de ne pas suivre deux voies, mais d'être droit dans son action.
3. *saba*. Symbole sexuel de l'homme, de son âme. Naissance de jumeaux mixtes, fils des pêcheuses Bozo.
4. *nani*. Symbole sexuel de la femme, du double *(dya)* de l'homme. Naissance d'une fille Bozo.
5. *duru*. Nombre néfaste composé de 4 (femme) et 1 (incomplétude). Fausse couche, échec, mort. *duru* se dit d'un mort-né. Cependant il a un aspect faste et connote alors l'univers (2).
6. *woro*. Symbole des jumeaux mâles (3 et 3). Nombre faste (3).
7. *wolõfla*. Symbole des jumeaux mixtes (3 et 4). Homme complet possédant *ni* et *dya* de sexes opposés. Monde complet; crois-

---

(1) Cette expression est symbolisée par la progression des quatre premiers chiffres dans les préliminaires de la création. Cf. p. 8.

(2) Cf. p. 9.

(3) *dẽlẽ ni fla ye gariseke ye*, « deux petits jumeaux mâles, c'est de la chance ».

sance de la nature. Image idéale de la création; parole parfaite.

8. *sekin*. Symbole des jumelles (4 et 4), des huit ancêtres et de leur parole. Excès de paroles; danger de cet excès dû aux femmes.
9. *konoto*. Symbole du caractère ou *tere*. Incomplétude.
10. *tã*. Composé de 6 (jumeaux mâles) et de 4 (naissance féminine), il est faste et exprime la fécondité souhaitée par Faro ainsi que Faro lui-même.
11. *tã ani kele*. Conflit et discussion. A la onzième époque après la domination de Faro, Téliko a voulu résister.
12. *tã ani fla*. Tentative de Téliko pour dominer le monde, de connivence avec les hommes.
13. *tã ani saba*. Composé de 3 (Téliko, génie mâle) et de 10 (Faro) exprime le refus opposé par Faro à la domination de Téliko.
14. *tã ani nani*. Voyage de Téliko.
15. *tã ani duru*. Défaite de Téliko.
16. *tã ani woro*.
17. *tã ani wolõfla*.
18. *tã ani sekin*.
19. *tã ani konoto*.

} Travaux d'organisation de l'univers par Faro.

20. *muka*. Réunion de Téliko et de Faro pour décider de l'ordre et de la marche de l'univers.
21. *duka ani kele*. Domination complète de Faro sur la création.
22. *muka ani fla*. Total des temps écoulés depuis la création jusqu'à l'organisation du monde. Conclusion et « terme des paroles ».

Le symbolisme des nombres, dans la vie courante, joue chaque fois qu'ils interviennent. Dès l'origine ils servirent à qualifier les outils et les ustensiles. Suivant que ceux-ci appartiennent aux hommes ou aux femmes, ils sont respectivement marqués de trois ou quatre signes facilement reconnaissables, qui indiquent leur appartenance. Ainsi dans le tissage la navette comportait trois bobines, le fuseau quatre traits.

Chaque rite est répété trois fois s'il s'agit d'un homme, quatre s'il s'agit d'une femme. S'il est exécuté plusieurs jours de suite ou à des intervalles réguliers, le même rythme est observé : ainsi on nourrit tous les trois jours le *dya* d'un mort dans l'eau, tous les quatre jours celui d'une morte. L'organisation de la chefferie, de la prêtrise est fondée sur les mêmes lois. Un chef religieux est généralement accompagné de deux aides ou de deux vieillards appartenant à sa promotion : leur ensemble est une réplique des trois premiers des huit ancêtres primordiaux.

Sept, expression de la création parfaite apparaît notamment dans la répétition du nom de Faro lorsque lui est adressée une demande ayant trait à la fécondité qui peut être formulée par un couple mâle-femelle dont le chiffre est sept. Dire le nom de Faro l'alerte, mais le répéter sept fois lui fait entendre ce qui peut le mieux le satisfaire et lui présente ce qu'il désire.

Huit est le nombre des ancêtres qui reçurent la parole et des familles qui la diffusèrent. Six et huit, images de la gémellétié mâle et femelle sont à la base du système de chiffraison et des calculs bambara (1). Dix, qui répète l'unité, est fait de la somme des quatre premiers nombres marquant les étapes de la création : il représente Faro (2). Vingt-deux, qui détermine les catégories de la pensée créatrice *go*, représente l'univers; on le retrouve sur tous les sanctuaires ou les objets rituels.

Inversement un nombre peut être attribué à un individu à propos de son comportement : on dit d'un méchant homme qu'il est un « onze »; qui veut prendre le pouvoir alors qu'il n'en a pas le droit est « douze »; on dit « treize » à un homme à qui l'on refuse ce qu'il demande, pour lui faire honte.

Un autre élément fondamental de la technique divinatoire est constitué par l'état ou les qualités du devin. Il n'est besoin, pour le commun, d'aucune qualité spéciale — autre que celle exigée normalement d'un sacrifiant — pour interroger les puissances surnaturelles. Ainsi tout Bambara, avant de faire son offrande, jette au sol une noix de kola pour interpréter sa position. Mais le devin est dans un état particulier : ses éléments spirituels, constamment en rapports avec la divinité, sont l'objet de précautions qui l'introduisent dans le cycle du surnaturel et lui permettent d'entendre son message. Ils sont donc mis à l'abri de l'impureté qu'ils pourraient acquérir au contact des hommes ordinaires. De ce fait, le devin est astreint à respecter un certain nombre d'interdits. Son double, garant de son état, est conservé par les génies qui le protègent d'une part et qui d'autre part exercent un contrôle sur son possesseur. Il est pour eux un moyen d'action. « Si le devin ayant reçu la parole se trompe, les génies peuvent le faire mourir. » Sa bouche est toute chargée d'une force qui lui vient de ces puissances et dont il ne doit pas mésuser.

---

(1) Cf. p. 27 n. 1.

(2) « La fonction religieuse de la décade joue chez les Bambara un rôle extrêmement important, car le symbolisme de tous les nombres y est compris, puisqu'elle les contient tous. Pouvant être constituée par la somme des quatre premiers nombres qui, par eux-mêmes, expriment l'unité et la dualité de l'être, la masculinité et la féminité, la quadrinité gémellaire, l'essence même de ce qui est, en un mot la décade exprime tout ce qui est achevé en soi-même, tout ce qui est complet, parfait et juste. Le nom lui-même de la décade, *tã*, indique ces notions; d'ailleurs les Bambara disent souvent, à la place de *tã*, dix, *dafara*, « c'est complet ». Aussi la décade est-elle le symbole essentiel de la divinité. » S. de Ganay, *Notes sur la théodicée bambara*, p. 198.

D'autre part, l'état dans lequel peut le mieux s'exprimer le spirituel est la transe. Dans l'excitation de la danse, au son du rythme effréné des tambours, le Komo devine et prédit. Il est à ce moment tout entier sous l'emprise des êtres spirituels qui s'expriment à travers lui.

Ces différents points exposés, est-il possible dans l'état actuel de l'enquête de classer les modes divinatoires que nous avons observés chez les Bambara? Ce classement, que nous tenterons, est provisoire et les observations devront être reprises et approfondies.

Une description sommaire de quelques modes de divination courants est donnée ci-après et deux des techniques les plus étudiées, la divination par le jeu de guitare et celle du jet des cauris, seront exposées en détail. (1).

MODES DE DIVINATION LIÉS A LA NOTION DE PERSONNE.

La connaissance de l'être est un souci constant des Bambara. Le corps, support des principes spirituels, est marqué dès la naissance par des signes que tout individu renseigné est capable d'interpréter. Ils déterminent non seulement le caractère *(lere)* d'un être mais aussi, dans une certaine mesure, le destin qui l'attend.

C'est ainsi que l'on examine soigneusement les traits du visage, l'implantation des cheveux, la forme des yeux, du nez, de la tête, les lignes du front d'un nouveau-né, et qu'on prétend dire dans une large mesure ce qu'il sera ou fera dans la vie. Plus tard, la démarche, le balancement des bras, la façon de poser le pied, de porter la tête ou les seins, compléteront, pour les gens avertis, le portrait esquissé à la naissance.

---

(1) C'est à dessein que nous n'abordons pas, dans ce chapitre, l'étude de la géomancie, nous réservant de la traiter ultérieurement. Ce mode de divination a fait l'objet d'une description détaillée dans C. MONTEIL. *La Divination chez les Noirs de l'Afrique occidentale française.*

La géomancie est très couramment employée par les Bambara et pratiquée par tous les chefs de sociétés religieuses et par tous les chasseurs qui en connaissent plusieurs sortes, notamment le *nama li* « signe de l'hyène », le *timba li* « signe de l'oryctérope, le *lyẽ dyɛ* « vérité blanche » ou *trabu*. Les représentations attachées à ce mode de divination sont très complexes chez les Bambara qui déclarent posséder une géomancie autochtone distincte de la géomancie dite « musulmane » qu'ils connaissent également Ce dernier point semble confirmé par les observations recueillies par B. MAUPOIL au Dahomey et exposées dans ses conclusions (cf. *La Géomancie à l'ancienne côte des Esclaves*, p. 678). La géomancie se pratique sous des formes comparables dans tout le continent africain; plus que toute autre activité son étude pose le problème des influences dont il a été question page XVI et notamment celle de l'Islam.

Mesure du *dya* :

Des indications sur l'individu sont données aussi par le double ou jumeau *(dya)* (1) qui se matérialise dans l'ombre du corps, laquelle est mesurée en utilisant comme unité l'auriculaire. On procède à cette opération au soleil, à midi, quand l'ombre est la plus courte, en partant du vertex. Les mesures relevées sont groupées alternativement par trois, nombre mâle, et par quatre, nombre femelle, selon le tableau suivant :

1. Les trois premiers auriculaires représentent les nerfs, *pasa* (masc.).
2. Du quatrième au septième, les parties molles, la chair, *bu* (fém.).
3. Du huitième au dixième, les os, *kolo* (masc.).
4. Du onzième au quatorzième, les liquides du corps, *dyi* (fém.).
5. Du quinzième au dix-septième, le sexe mâle, *wulu* (masc.).
6. Du dix-huitième au vingt-et-unième, le sexe femelle, *byę* (fém.).
7. Du vingt-deuxième au vingt-quatrième, les articulations, *kolonye* (masc.).
8. Du vingt-cinquième au vingt-huitième, les seins, *ši* (fém.).
9. Du vingt-neuvième au trente-et-unième, la colonne vertébrale, *koloko* (masc.).
10. Du trente-deuxième au trente-cinquième, la matrice *dēzo* (fém.).
11. Du trente-sixième au trente-huitième, l'intelligence, *hakili* (masc.).
12. Du trente-neuvième au quarante-deuxième, la mesquinerie, la bêtise, *misenya* (fém.).
13. Du quarante-troisième au quarante-cinquième, le jugement, le calme, *basigi* (masc.).
14. Du quarante-sixième au quarante-neuvième, l'incohérence, l'agitation, *hakiliwuli* (fém.).

Les groupes sont matérialisés par des bâtonnets dont la taille va croissant pour les mesures mâles, décroissant pour les mesures femelles.

Exemple : si la mesure de l'individu s'arrête au groupe 7, il sera représenté par quatre bâtonnets (mâles) de taille croissante et par trois autres (femelles) de taille décroissante et d'aspects différents.

---

(1) Cf. p. 57.

Quel que soit leur nombre, ces bâtonnets sont ensuite placés de la façon suivante : ceux des nerfs dans un récipient sec, ceux de la chair dans de la farine de mil, ceux des os sur une pierre dure, ceux des liquides dans l'eau, ceux du sexe mâle sur des testicules de bouc, ceux du sexe femelle sur la vulve d'une jument, ceux des seins dans de l'huile de karité, ceux de la matrice dans de l'eau du Niger ou dans celle d'un puits, ceux de l'intelligence dans du lait frais, ceux du calme et du jugement dans de l'eau. Sur le bâtonnet des articulations, on dit le nom du lion; sur celui de la colonne vertébrale, on dit *dyose*, (litt. : point d'appui); sur celui de la mesquinerie, le nom du bousier; sur celui du désordre et de l'agitation, *muso dãga* (litt. : femme maudite).

Une prière est dite sur les bâtonnets qui sont ensuite groupés et comptés avec leur représentation chiffrée et leur symbolise suivant des calculs compliqués dans le détail desquels nous n'entrerons pas (1). Cette prière et ce compte sont dits : *faro kanubaya*, « amour de Faro ». Ils témoignent de sa sollicitude pour ses ressortissants et auraient été révélés aux hommes par l'hirondelle messagère, dès la naissance des premières jumelles.

Chacune des mesures correspond à un comportement physique ou moral de l'homme déterminé par Faro, avant la naissance. Il est donc possible, en mesurant le *dya* d'une femme enceinte, de connaître le sexe de l'enfant qu'elle porte et le caractère qui lui sera attribué par le génie.

Sans nous étendre davantage sur ce mode de divination qui implique une série d'interprétations, il convient de remarquer qu'il s'inscrit dans le système de pensée du Bambara et s'inspire de la conception qu'il se fait de l'homme dans l'univers.

DIVINATION PAR LA NOIX DE KOLA.

Les noix de kola que les Bambara consomment et utilisent dans leurs rites sacrificiels ou divinatoires sont classées en sept catégories d'après leur forme et leur couleur.

1° *dangoro*, noix rouge.
2° *yeleworo*, noix blanche.
3° *sosokuworo* (litt. : tête de moustique), noix rouge et pointue à l'une de ses extrémités.

---

(1) Il faut cependant remarquer que le total des signes est (7 × 3) + (7 × 4) soit 49.

4° *flaniworo* (litt. : kola jumeau), noix blanche avec les mêmes signes sur ces deux éléments.
5° *worodanda* (litt. : kola sans bouche), noix bicolore sans fente apparente permettant le partage.
6° *bassiworo*, noix rouge foncé et très amère.
7° *nyeworo*, noix claire et de couleur indéterminée.

La noix de kola, « créée pour les jumelles de Faro », est elle-même symbole de la gémelléité car les deux parties accolées se séparent facilement. Dans la vie quotidienne, sauf si le devin l'a ordonné à titre de purification, on ne mange pas seul une noix de kola; elle est partagée et l'une des moitiés donnée à un tiers. Ce geste de politesse et d'amitié est aussi l'expression de la gémelléité de l'homme, comparable à celle du fruit lui-même.

Donner des noix de kola est toujours un signe de déférence, de respect ou d'affection. Manger une noix blanche « chasse les chagrins et les soucis ». La noix qui n'a point de fente est rarement consommée : semblant être faite d'une seule pièce, elle a un caractère néfaste. Dans les cérémonies religieuses, on utilise de préférence les noix *bassiworo* pour les *boli*, les noix rouges ordinaires, *dangoro*, pour les autres autels. La noix peintue *sosokuworo*, est offerte par celui qui désire un enfant : l'officiant mâche la moitié de la noix et la crache sur l'autel avant de consommer l'autre moitié.

La divination par la noix de kola est pratiquée dans des cas nombreux intéressant l'individu et la communauté. De plus, elle précède la presque totalité des sacrifices exécutés sur les divers autels. Avant l'égorgement d'une victime, la question est posée de l'agrément de la puissance bénéficiaire. Ce mode s'adresse aux génies que l'on invoque dans la prière récitée en même temps que l'on partage la noix et avant de la jeter. La couleur et la forme de la noix sont choisies d'après la question formulée et d'après la qualité de l'être dont on demande l'intervention. Si l'on s'adresse à Faro, pour un mariage par exemple, la noix doit être blanche; si l'on interroge les génies de la terre ou du firmament, elle doit être rouge; pour une naissance ou un décès et pour toute demande aux génies de l'ouest, on se sert de la noix bénéfique *yeleworo*; au contraire, pour se défendre d'un ennemi ou exprimer une malédiction, on s'adresse aux génies de l'est avec la noix sans bouche, *worodanda*. Une bonne noix de divination doit, de plus, présenter à l'intersection des deux morceaux qui la composent, une sorte de dessin, nommé *yeleda* (litt. : bouche pour rire). Il convient également qu'elle soit pointue à l'une de ses extrémités pour « piquer le sujet » bénéficiant du rite. L'officiant qui a partagé la noix en deux dans le sens de la longueur et suivant sa ligne médiane naturelle, tient les deux morceaux dans la main et récite la prière suivante :

« Ma mère Faro, mon père Faro, génies de la terre, génies du firmament, génies de l'ouest, génies de l'est, toi qui est meilleur qu'eux tous, Faro, voici les kola, que la vérité soit dévoilée, que les deux (morceaux) s'ouvrent en haut. Je dis toi, Faro *(ter)* (1). »

Il peut aussi dire plus simplement :

« Voici deux noix de kola, si tu refuses que l'une soit fermée, l'autre ouverte; si tu acceptes, que les deux soient ouvertes ou qu'elles soient fermées (2). »

Ce texte détermine l'interprétation de la réponse qui sera donnée. Le devin ouvre ensuite la main, lâche les morceaux et regarde la façon dont ils se présentent au sol : s'ils sont disposés de la même façon sur la partie interne ou externe, la réponse est affirmative, dans le cas contraire, elle est négative.

Divination par les cauris.

Cette pratique est dite : *kolo nin fli*, litt. : « Jeter l'âme des cauris ». Ces coquillages ne se distinguent en rien de ceux du commerce ou de la parure. Un seul interdit concerne leur mode d'acquisition : ils ne doivent être ni achetés, ni obtenus gratuitement. Pour se les procurer, le devin doit procéder à un prêt sur gage dit *kuma boli* (litt. : sortir de la parole) : il donne à leur place un produit ou un objet qui sera repris ultérieurement quand il rendra les cauris.

Les 22 cauris utilisés résument « ce qui est nécessaire à l'homme,» et sont divisés en trois groupes :

Les 7 premiers, *teliko dẽ*, fils de Téliko, représentent le génie de l'air, Téliko et ses enfants ainsi que « la respiration » des hommes. On dit d'eux en effet : « Les génies Téliko sont la respiration des humains (3). »

Les 7 suivants, *faro dẽ*, fils de Faro, symbolisent les êtres

(1) *ne ba faro ne fa faro du kuma jinew, sãnfe jinew, klebi jinew, korona jinew dyenin kausa na be ye, e faro, woro fle tye ka banke fla ka dyã sãfe; ngo e faro* (ter).

(2) *woro fla, fle ninye, ni ma sõ, kele ka dyã, kele ka bri, ni sona a fla ka dyã, fla ka bri.*

(3) *teliko ye adamadẽ ninakli kuma bo ye.*

humains. L'un d'eux, choisi parce qu'il est facile à distinguer, représente Faro : le devin dit 7 fois le nom du génie sur celui-ci avant de le mêler aux autres, ce qui aura pour effet de donner à l'ensemble la force du génie.

Les 8 derniers, *kumabana dɛ*, fils de Koumabana, sont les paroles des huit grands ancêtres. L'un d'eux, différent des autres, est dit « mère des paroles ». Il est à la fois Koumabana, premier des 8 ancêtres et le verbe inégalable qu'il a « craché », car Koumabana a connu « toutes les paroles existant actuellement sur terre. »

Ainsi 22, expressions de l'univers, résument, dans le système des 22 cauris, la personne humaine : corps et âme Faro, souffle et respiration, Téliko, parole révélée, Koumabana. Le partage en trois séries, dont deux de 7 et une de 8, est lui aussi significatif; le chiffre 7 est la marque de l'homme complet et il revient deux fois pour rappeler la gémelléité. 8 est le nombre du verbe qui l'anime.

Cette divination ne s'effectue que de jour, car il est irrespectueux d'alerter les génies dans la nuit tombante. De plus, l'orientation des coquillages sur le sol est importante et plus facile à observer à la lumière du soleil. L'officiant prend les cauris dans sa main, 3 ou 4 fois de suite suivant le sexe du consultant et les laisse tomber au sol ou sur un plateau. Il les lit ensuite, suivant leur orientation, la place qu'ils occupent par rapport à la mère ou « conclusion des paroles » et selon leur position ouverte ou fermée. Les devins très habiles, qui ont à résoudre des problèmes complexes, opèrent avec 22 cauris. Mais les huit *kumabana dɛ* suffisent parfois.

Dans ce cas, avant de les jeter, le devin prononce la prière suivante :

« Vous, huit vieux ancêtres, nul n'a pu vous dépasser en paroles, votre vision a été si grande qu'elle a dépassé le nombre [des autres]; les cauris sont jetés, vous montrerez la vérité; je dis vous, les huit vieillards, je dis vous, bons génies (1). »

Dans le court espace de temps où se place le jet des cauris, est inscrit le destin. A l'instant où le devin les lâche, « le génie de l'air qui les détient ayant examiné le cas, juge et propose. A l'instant où ils touchent le sol, Faro, maître en dernier ressort, dispose (2) ». Le dessin des cauris traduit sa parole; ils

(1) *aw moko korobaw sekin, moko ma se teme aw ka kuma na, aw ka somaya bonya ma, fo ka dama teme koloniw fle la, aw ka nliñe jira, ngo aw maw sekin, ngo jinew aw maw.*

(2) On dit couramment : « Teliko propose et Faro dispose », *teliko ba singa, faro ba sinze.*

sont l'expression de sa volonté visible pour l'homme, à travers la parole révélée par Koumabana. Tout ce délicat mécanisme spirituel, invisible pour le commun, inconnu du non initié, est sensible pour le voyant et le devin qui ont conscience de manipuler, avec les cauris, le divin. C'est pourquoi ils se penchent sur la forme chaque fois renouvelée donnée au matériel épars avec un sentiment puissant de la présence des forces auxquelles ils font appel.

LA SOMAYA.

D'après la tradition, la *somaya* ou science du *soma* aurait été révélée au Mandé, c'est-à-dire qu'elle était connue des Bambara avant leur arrivée sur le territoire qu'ils occupent actuellement. Elle est réservée à quelques privilégiés. Les dons de clairvoyance qu'elle suppose peuvent être décelés chez un nouveau-né au moment de l'examen des signes déterminant son caractère *(lere)* par les vieillards au cours de la cérémonie de l'imposition du nom. Dans la petite enfance des manifestations fréquentes de souffrance sont l'indice de la présence des génies et, dès les premiers pas, la démarche elle-même confirme sa vocation. Vers dix ans le jeune garçon « guidé par les génies Téliko » est attiré par eux en brousse près d'une mare où il vit en leur compagnie invisible durant quelques jours.

Après cette retraite, l'enfant revient dans son village, muni d'une petite pierre (*jinaworo*, litt. : noix de kola des génies) signe de l'alliance qu'il a contractée avec eux.

Mais il feint d'ignorer l'endroit d'où il vient. Il ne fait non plus jamais de déclarations au sujet du don de double vue qui lui a été octroyé mais le manifeste en faisant, sans être sollicité, à ceux qu'il rencontre, quelques révélations sur leur avenir. Au bout d'un certain temps, les gens reconnaissent à ces signes sa qualité de Soma, qui implique une modification des principes spirituels : le *dya* reste sous la protection des génies Téliko qui contrôlent ainsi le devin; ils agissent directement sur sa personne et tiennent en main sa santé et sa vie, pour le punir en cas d'infraction ou de désordres nuisibles à l'exercice de son art (1).

Les dons qu'il a reçus et la situation de son *dya* contraignent le Soma à ne point se marier et à observer une certaine chasteté. « La femme du Soma vit chez les génies », dit l'informateur qui ajoute que tous les quarante-neuf jours (7 × 7) son *dya* lui est renvoyé pendant la nuit en vue d'une union sexuelle.

---

(1) Un Soma deviendrait un *mahalakillen* ou un animal malfaisant si son *dya* était altéré du fait d'un contact avec la terre impure.

A partir du moment où le Soma exerce régulièrement son art, il se rend en brousse de temps à autre pour consulter les génies et leur faire des offrandes. De plus, ceux-ci le visitent dans sa demeure où il les attire en brûlant une poudre qui dégage une odeur dont ils sont friands.

Le Soma a, comme le griot, une bouche pleine de *nyama* : le sien propre auquel s'ajoute celui des génies qui l'aident et le contrôlent. Sa parole est si efficace qu'il annonce rarement un décès, car il contribuerait à propager la mort.

Le Soma doit être d'une rigoureuse propreté, porter des vêtements simples et même se vêtir en indigent. Dans les cérémonies, il suspend à son cou, par une cordelette, la pierre *fineworo* qu'il doit toujours porter dans une poche de sa tunique. Il fait généralement partie de la société du Komo et peut devenir chef. Dans ce cas, il est le devin attitré du village.

Le Soma conserve chez lui sa pierre d'alliance et sa harpe avec ses accessoires. Lorsqu'il meurt, on laisse quelque temps son corps seul dans sa demeure : les génies sont censés venir reprendre ces objets que nul ne doit toucher et dont nul n'hérite. L'enterrement du corps et les cérémonies des funérailles ne sont exécutées qu'après ce délai. Son âme n'est jamais conservée dans les autels du Komo et va rejoindre le *dya* dans le domaine de Téliko; les principes spirituels du Soma ne se réincarnent pas et le don qu'il a reçu n'est pas héréditaire.

La harpe du Soma (fig. 17) (1) est faite d'un coffret rectangulaire *(bara)* traversé dans le sens de la longueur par un long morceau de bois (*ngoni kala*, litt. : tige du *ngoni)* entouré de petites lanières de cuir formant bagues (*jiri wolo*, litt. : peau de bois). Elles supportent les cordes en peau de chèvre (*ngoni dyuru* litt. : cordes du *ngoni*). A l'extrémité de la tige, *ngoni ku* est fixé un résonateur de fer *(boso)* orné d'anneaux de même métal *(nyege nyegele)* qui sont « les boucles d'oreilles des génies ». Ces anneaux sont dits « multicolores » car le son qu'ils émettent est brouillé et confus.

Lorsque le résonateur est placé sur la hampe, « il augmente les sons et les filtre dans l'air, ce qui plaît aux génies et les appelle auprès du devin qu'ils assistent pendant son travail ». Si l'instru-

---

(1) Cf. G. Dieterlen. *Morphologie et symbolique de deux instruments de musique bambara.*

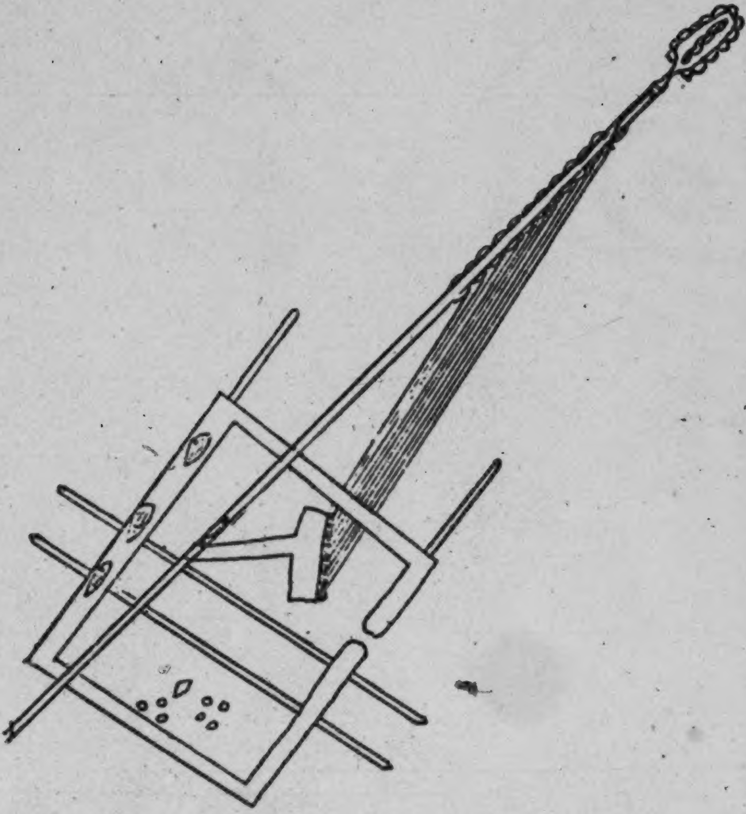

FIG. 17. — La harpe divinatoire du Soma.

L'instrument représente la face de l'ancêtre Koumabana, qui a reçu « la parole », et sa tombe; sur un autre plan, il symbolise aussi la face du devin et sa tombe. (Dessin d'un informateur).

ment est utilisé sans le résonateur, c'est-à-dire dans des buts profanes, les génies ne sont pas alertés par le jeu musical.

La peau, tendue sur le coffre au moyen de lanières en cuir de chèvre, est trempée dans de l'eau sur laquelle on a dit quarante-neuf fois le nom du génie Téliko. Les cordes de support sont faites de lambeaux tordus de suaires recueillis dans un cimetière. Les cordes musicales en peau de chèvre, au nombre de huit

symbole de la parole (1), portent les noms suivants en commençant par la plus courte : *kumabana*, *fa dẽ* (fils du père), *fa* (père), *fa koroke* (frère aîné du père), *fa dogone* (frère cadet du père), *ba* (mère), *modẽ* (petit fils), *fa so* (maison du père).

Accrochées sur un chevalet *jiri ni* (litt. : dents du *ngoni*) qui figure la bouche et les dents de Koumabana, elles sont les paroles de l'ancêtre. Sur un autre plan, elles sont aussi la demeure et la famille du génie Téliko.

De longueur sensiblement égale dans les différentes harpes, elles donnent huit notes différentes; les intervalles sont dits, *dyuru fara dye* (2).

Sur la face droite du coffre sont parfois dessinés les trois premiers ancêtres des Bambara : Koumabana et les deux vieillards qui moururent après lui. Ils sont reconnaissables aux poils dont leurs visages sont couverts, comme l'étaient ceux des ancêtres qui ignoraient le rasoir (3).

Le coffre est traversé par deux baguettes de bois, *če kala* (litt. : tige homme), rappelant les deux tiges de mil accompagnant chaque mort dans sa tombe, symboles elles-mêmes des deux vieillards.

Quand le Soma tombe malade, il retire les deux baguettes de son instrument et les place près de lui sur sa natte, préfigurant la position qu'il aura dans la tombe. Ainsi couché « il est dans la tombe et marche avec les deux ancêtres »; si son état s'améliore c'est que les baguettes l'ont dégagé de son mal. Il ne les remet dans la harpe qu'après guérison.

Le coffre contient sept cailloux, nombre de l'homme (3 + 4) et un morceau de cuivre en forme d'étoile représentant la parole. Le Soma peut regarder à l'intérieur de la harpe par une ouverture placée sur le côté, dit *šu wo* (trou de sorcellerie) ou *bara dinge* (trou de la boîte) qui lui « permet de respirer », pour voir « l'ancêtre Koumabana, maître de la parole et connaître les plus profonds secrets ». Au bas de l'instrument, une autre ouverture, considérée comme l'anus, permet l'évacuation de tout ce qui est néfaste.

---

(1) La harpe du Soma se distingue de celle du griot qui a le plus souvent sept cordes.

(2) Sur certains instruments observés, la première et la huitième corde donnaient la même note à un octave d'intervalle. Il est à prévoir qu'une étude approfondie de la musique bambara fera apparaître un système de correspondances entre l'ordonnance musicale et celle du monde. Déjà M. Griaule, dans ses recherches sur la harpe dogon, a découvert une relation entre les notes, les nombres et l'univers.

(3) Ce détail a été observé sur d'anciens instruments de la région de Koutiala.

Une tache rouge placée sur l'une des faces, *sindera ble* (litt. : ceinture rouge) exprime que l'instrument est l'objet de sacrifices sanglants comme la pierre *fineworo*.

La caisse est l'image, le masque de Koumabana; les deux faces, dites respectivement *kini nye* « œil droit » et *numa nye* « œil gauche » représentent ses yeux, le peigne sa bouche, le trou son nez et sa respiration, les cordes ses paroles. Elle est aussi la reproduction de la tombe et des trois premiers des huit ancêtres qui connurent la mort. Enfin elle est la face du Soma et sa tombe.

L'instrument ne doit jamais être touché par une femme; de plus, nul ne doit en jouer si ses intentions ne sont pas pures, « s'il n'a pas le cœur net ».

Quand le Soma joue pour répondre aux demandes de ceux qui le consultent, chaque son est une prière. De sa main libre il tient une baguette dont il frappe la caisse : chaque coup est une parole. Au fur et à mesure qu'il joue, des images se forment devant ses yeux et en lui-même. Il touche séparément les cordes suivant leur rang et en fonction de l'importance de la question posée. C'est ainsi qu'il pince *modè* pour les sujets de peu d'importance : chasse, voyage, etc.; *fadè* pour ce qui a trait à la santé, la procréation, la vie individuelle physique et morale; *fa* pour l'avenir, le destin, la vie privée et publique d'un homme, son autorité, son commandement; *fa koroke* pour les semailles et les cultures, le régime des eaux, des pluies et des mares, pour la fortune et la richesse; *fa dogone* pour la germination des céréales, la formation des épis, les petites pluies; *ba* pour tout ce qui concerne les femmes; *faso* pour tout ce qui concerne la maison familiale et pour les absents.

Mais le Soma exécute aussi des airs dont les rythmes s'accompagnent de paroles. Il les joue successivement pendant la séance ou les choisit selon le caractère de celui qui le consulte et les questions posées.

Les sept chants suivants ont été recueillis et interprétés par le Soma de Bandiagara :

« Une chose bonne vient avec une chose mauvaise (1). » Ce chant a pour effet de révéler au Soma la pensée du consultant.

« L'homme connaît peu de choses (2). » Malgré son instruction, un homme sait peu de choses; un enfant sait parfois ce qu'un adulte ignore.

(1) *ko ñumã de bina ni ko dyugu ye.*
(2) *adama dẽ le ko do.*

« Même repu l'homme ne peut dépasser la mère qui l'a mis au monde (1). » Ce rythme est exécuté pour ceux qui montrent orgueil ou vanité, ou pour ceux dont la femme a quitté le domicile conjugal et s'est réfugiée chez son père.

« Même s'il est beau, un homme doit avoir des yeux (sous-entendu être renseigné) (2). » Le Soma joue cet air pour tout ce qui concerne un mariage, une naissance, une initiation.

« Le monde est grand (3). » Quand l'angoisse domine le consultant, ce chant calme son inquiétude, lui rend la paix et la sérénité.

« Quel que soit l'homme, il ne peut dépasser Dieu (4). » Le Soma joue cet air si le consultant est animé de mauvaises intentions ou s'il est ignorant et têtu. Il fait de même pour déceler les dons d'un enfant et encourager la parenté à développer son instruction.

« La joie embellit le monde (5) » est exécuté pour les choses futiles et agréables : fêtes et danses, parures.

⁂

La divination, dans une large mesure, est l'application de la statique et de la dynamique des nombres. Ceux-ci traduisent des relations, d'une part; d'autre part ils sont des symboles connotant des phénomènes, êtres, manières d'être, situations et généralement toutes les parties constitutives de l'univers. Sans être doués de pouvoirs en eux-mêmes, ils symbolisent des éléments puissants et ordonnés. On pourrait dire aussi que les nombres sont des réalités supérieures, au même titre que les signes primordiaux qui ont précédé la perceptibilité des choses et grâce auxquels les choses, prises en conscience par l'homme, ont existé (6).

Dans l'activité divinatoire ils indiquent à l'individu ou au consultant collectif sa propre position par rapport au reste de l'univers. En quelque sorte, ils permettent de dégager l'équation particulière de chacun à un moment déterminé.

(1) *mako fara čokočoko a lise ka lemme a wolo ba ka.*
(2) *moko če kani čokočoko fo ñe ka soro i ku.*
(3) *diñe ka bŏ.*
(4) *moko a kera čokočoko a le leme ngala ka.*
(5) *klo ye diñe dya.*
(6) Cf. p. 4.

CONCLUSION

C'est depuis peu de temps que la discipline du silence observée par les Noirs s'est relâchée dans quelques milieux d'initiés. Un comportement humain, appuyé sur une méthode rigoureuse, a permis à un groupe de chercheurs d'établir une documentation qui souffre moins des tares habituelles : elle n'est plus superficielle, ni fragmentaire, elle n'est plus grevée d'une hostilité systématique qui, par sa constance et sa généralité a donné durant longtemps le change.

Jusqu'ici, les éléments recueillis chez les Bambaras concernaient surtout les aspects; les institutions qui pourraient se nommer « mystères » n'étaient connues que par des allusions échappées à des hommes rétifs. A telle enseigne que, dans le fonctionnement du Komo, par exemple, la personnalité du Moniteur universel n'était même pas apparue.

Mais une servitude plus grave que l'ésotérisme ou la méfiance pesait sur l'étude de ces populations : le scepticisme et l'indifférence de l'érudition qui, pour ainsi dire systématiquement, a méconnu ou nié l'existence d'une pensée profonde chez les Noirs.

La contribution apportée ici démontre que certaines difficultés d'approche peuvent être dénouées d'une part et que d'autre part il n'est plus convenable de se faire du monde tropical africain une image où rien ne serait harmonieux, ni grand, ni même digne de spéculation.

Cette contribution donne aussi la preuve de la complexité des faits. Quelques-uns seulement ont été retenus d'une documentation considérable, œuvre d'une équipe. Et cette documentation même paraît infime comparée à celle qu'on entrevoit.

C'est qu'en effet le Bambara — et comme lui bien d'autres Noirs — fait de l'homme un univers et de l'univers un système où tout a place et rôle, depuis les astres jusqu'aux objets d'usage, depuis l'esprit jusqu'au détritus.

Il faudra donc des années de recherches patientes pour déceler l'immense réseau des représentations et des rites, pour ne rien négliger des matériels et des gestes en apparence les plus indif-

[p.227]

férents. Nous savons en effet d'expérience que derrière chaque ustensile surgit un pan de l'organisation des hommes, que quelques traits sans art, gravés à l'ongle sur une paroi, expriment le déroulement de la création.

Et la négligence du plus infime de ces détails peut fermer des régions entières de la connaissance. Ceci oblige donc à des travaux étendus à toutes les activités d'un peuple et non pas seulement à ce qui, dans notre esprit, est proprement religieux.

Mais à supposer connu un ensemble imposant de faits bambara, il n'y aurait là matière qu'à spéculation particulière. Et ce serait certes déjà un précieux apport aux sciences de l'homme que de décrire l'édifice et les services de la religion de ce peuple. Il resterait cependant à entreprendre le même effort chez ses voisins, et, de proche en proche, à l'étendre à tout le monde noir.

Car bien qu'il soit indispensable d'agencer les faits bambara par rapport à eux-mêmes et d'en chercher l'explication interne, il n'en reste pas moins que la méthode comparative est nécessaire pour la compréhension d'une religion. Elle s'impose ici avec une force particulière. Le système des Bambara, en effet, apparaît, d'une part, comme étant la synthèse originale de plusieurs autres trouvés sur place lors de leur fixation définitive sur le sol ou transportés lors des grands mouvements migratoires. D'autre part, il est en perpétuelle symbiose avec ceux des autres peuples soudanais, comme le prouvent indubitablement des observations récentes.

D'ores et déjà on peut admettre qu'au moins neuf populations d'inégale importance (1) vivent sur le même substrat métaphysique, sinon religieux. Le thème est commun de la création par un verbe d'abord immobile dont la vibration détermine peu à peu l'essence puis l'existence des choses; il en est de même du mouvement en spirale conique de l'univers, lequel est en extension constante. Même conception de la personne, ainsi que de la gémelléité primordiale, expression de l'unité parfaite. Les uns et les autres admettent l'intervention d'une hypostase de la divinité qui, parfois, prend l'aspect d'un rédempteur maître d'un monde dont la forme est partout identique. Tous croient à la nécessité de l'harmonie universelle comme à celle de l'harmonie interne des êtres, les deux étant liées. L'un des corollaires de cette notion est le subtil mécanisme du désordre que nous nommons impureté, faute d'un meilleur terme, et qu'accompagne celui de pratiques cathartiques très développées.

---

(1) Dans l'ordre d'approfondissement des recherches, citons : Dogon et Bambara, Forgerons, Kouroumba (ou Foulsé), Bozo, Manding, Samogo, Mossi, Koulé, soit plus de deux millions d'hommes. Il convient de noter également que plusieurs dizaines de peuples ou peuplades du Soudan (au sens large du mot) se considèrent comme issus de la même souche. Des rites importants, des matériels, des agents et des lieux appuient cette croyance (cf. p. XIII).

Enfin tous offrent cette extraordinaire floraison — pour ne pas dire abus — des symboles parlés, écrits, figurés ou gesticulés dont beaucoup se retrouvent partout, chacun étant le support de diverses couches d'images.

On peut donc parler dès maintenant d'une civilisation soudanaise dont le substrat serait décelable chez de nombreux peuples comme il l'a été notamment chez les Dogon et les Bambara. Sous la diversité des langues et des institutions, se cache la même ossature de représentations. Tout se passe comme si, sur un canevas identique, chaque peuple avait agencé des figures propres à son génie.

Il convient, de ce fait, de considérer le présent essai comme un premier pas vers la connaissance de cette civilisation. Dans la suite, ce vaste ensemble devra être situé par rapport au système méditerranéen et asiatique. Et sans doute cette recherche de position fera-t-elle surgir des problèmes d'emprunts, de migrations, d'assimilation. Sans doute aussi l'anatomie des vieilles civilisations qui se sont réfugiées dans l'impasse occidentale de l'Afrique révélera-t-elle un reflet précieux des organisations primitives qui se sont trouvées en contact à haute époque en ces régions et qui ont pu opérer une conjonction entre des manières de penser autochtones et d'autres que nous connaissons mieux.

On a tenté de reconstituer des états archaïques de l'humanité à l'aide de tessons ou de lambeaux littéraires. Dans des cas plus favorables, des textes et des matériels abondants ont permis des synthèses dont les vicissitudes sont une des raisons d'être de l'érudition. En aucune occasion on n'a été rebuté par les terrains sans échos, par l'absence des auteurs de ces textes et de ces matériels. Il s'est institué ainsi une riche activité sur les situations et pensées anciennes, une sorte de science dans le silence où seul vivait l'esprit de recherche.

Aujourd'hui, il semble possible, à la lueur d'observations nouvelles, de retrouver chez des peuples vivants, nombreux et divers, des formes et des fonds archaïques communs à des hommes d'autre couleur vivant en d'autres temps. Non pas certes qu'il faille tenir pour nuls les conseils de prudence donnés par les hommes des anciennes écoles (1); mais ces conseils reposent sur des postulats concernant l'absence de relation historique et les différences d'époque. Il faudrait prouver, pour les admettre, précisément cette absence et aussi l'incapacité de la tradition orale à maintenir vivants durant de longues périodes, des usages et des manières de voir.

---

(1) Entre autres J. Toutain. C. R. des *Garnered Shelves* de J. Frazer.

En tout cas, et quelle que soit l'opinion adoptée, il serait de bonne méthode d'admettre comme hypothèse immédiate le rôle probable ou possible joué par le monde soudanais en tant que conservateur ou transformateur d'attitudes, de rites et de concepts que l'érudition retrouve partout ailleurs et dont l'explication reste à formuler. Car dans peu d'années rien ne pourra plus être infirmé ou confirmé concernant ces systèmes en voie de désagrégation rapide; du fait du machinisme et d'un inconscient désir de destruction de soi, les civilisations noires ne seront bientôt plus que l'ombre d'elles-mêmes et la précarité de leur matériel ne permettra jamais de les reconstituer dans leur complexité ni dans leur grandeur.

Et quel que soit le sort de cette hypothèse, il n'en resterait pas moins, qu'originale ou non, la pensée religieuse des Noirs prendrait sa place dans la philosophie de l'histoire et dans l'histoire de l'humanité.

ADDENDA

Les enquêtes menées sur le terrain pendant l'impression du présent ouvrage ont fait apparaître les faits suivants que nous croyons utile de présenter succinctement au lecteur :

Chapitre Premier

Du fait de la perte de leurs graines claviculaires, Pemba et Mousso Koroni ont un aspect actuel animal, qu'ils doivent à leur impureté comme à celle de la terre inculte qu'ils symbolisent. Pemba est représenté par le *warableni (Vulpes pallida)* et Mousso Koroni par le *kongowuluni* (renard indéterminé) : c'est ce dernier animal qu'imite le *vukuri* durant le rite enfantin nocturne décrit page 39.

Ces nouvelles informations confirment les observations consignées page 26, note 1, concernant l'identité des représentations des Bambara et des Dogon. De plus, le *warableni*, comme le *yurugu (Vulpes pallida)* des Dogon, intervient dans la divination, en particulier dans la géomancie. Les enquêtes permettent d'étendre ces représentations aux populations soudanaises issues du Mandé (cf. p. XIII), en particulier aux Bozo et aux Peul.

Chapitre III

Tous les peuples soudanais issus du Mandé sont caractérisés par un contenu claviculaire de graines (ou de poissons) variant de l'un à l'autre. D'autre part, à l'intérieur d'une population, le contenu théorique de huit graines, pour être sensiblement comparable quant à la nomenclature, diffère par son agencement selon les familles. De plus, les places de la première et de la dernière graines sont interverties pour les hommes et les femmes. Exemple : les forgerons ont pour première graine le *keninge* et pour dernière le *tikaninkuru*, tandis que les potières ont pour première graine le *tikaninkuru* dont elles cultivent des champs rituels (cf. p. 127) et pour dernière le *keninge*.

D'autre part, Mousso Koroni ayant dérobé à Pemba les graines qu'il était chargé de donner sur terre, Faro, par l'intermédiaire des animaux, qui les consommèrent sur son ordre, les lui reprit; ainsi purifiées, il les distribua aux hommes. L'animal qui a rapporté à Faro la graine essentielle de chaque famille, devient l'interdit, *tne*, de la famille intéressée et la rupture de cet interdit a pour effet fondamental de vider le contenu claviculaire du coupable. On observe des représentations analogues chez les Dogon.

Le totémisme, l'alliance dite « parenté à plaisanterie » (*senankuya* des Bambara), le système des castes et les règles exogamiques des Soudanais sont fondés sur les éléments et le classement du contenu claviculaire.

CHAPITRE VI

Toutes les grandes institutions *(dyo)* des adultes sont en rapport avec la société enfantine du Ndomo qui reflète l'organisation universelle (espace, éléments). Chacun des six *dyo* auxquels sont initiés les hommes après leur circoncision correspond à un objet rituel du Ndomo : le Komo (ouest et air) est représenté par le *dyara* (rhombe); le Kworè (est et eau) par le *tori;* le Nama (sud et feu), par le *wulu;* le Kono (nord et terre) par l'instrument de même nom. Au Nya (nadir) et au Nago (zénith) correspond le *fineble;* ces deux dernières institutions sont liées au mouvement tourbillonnaire du grain créateur, figuré par la graine de fonio. C'est dire que l'appartenance à la société enfantine du Ndomo constitue une pré-initiation aux sociétés d'adultes, cosmogoniques au premier chef. Les sanctuaires et les champs rituels des quatre premiers *dyo* sont théoriquement situés au point cardinal correspondant. Le fonctionnement des sociétés selon un système rigoureux confirme les observations et hypothèses émises page XVIII.

D'autre part, le masque du Ndomo représente à la fois Mousso Koroni et les huit graines dérobées à Pemba. Toutes les sorties de masques des Bambara (celles des *dyo*, comme celles du *čiwara* et des *sogo*) rappellent le vol, la culture des graines nourricières par Mousso Koroni et leur reprise par les animaux au profit de Faro. On observe des représentations analogues chez les Dogon concernant le *yurugu*, *yasigi* et Nommo.

[1] Introduction

161 According to the census referred to hereafter, the Bambara number more than 500,000, thus forming one of the largest population groups in West Africa.

184 This group is not homogeneous; however, in addition to its
language, which is in fact its characteristic element, it does have
certain basic customs common - at least in a general way - to all
its members. It is possible to observe this common heritage by
[121] studying one section of the group, and such is the purpose of this
work.

121 The Bambara of Ségou and Kaarta, who concern us here,
have the distinction over their congeners of having evolved well-
127 known empires. To the history of these empires, already known
through the research of my predecessors, I shall add new documentation, based primarily on an unpublished chronicle of the empire of Ségou. This chronicle is interesting, among other reasons, because it is entirely the work of one of the traditionists whose erudition, as reliable and exact as possible within the limitations of native competence, merits our serious attention. Indeed, my book is simply a detailed commentary on this chronicle, buttressed by knowledge acquired on the spot during the course of my administrative duties and by information obtained from the works listed in the bibliography.

121 It should be noted that, though these documents and this store of knowledge make it easy enough to describe the customs if one limits oneself to generalities, it is on the other hand a difficult and delicate task to define the customs as they are applied to given social manifestations and to try to deduce the principles underlying these manifestations.

This is all the more true in that experience acquired elsewhere [2] is often, instead of a help, a reef which is as perilous as it is appealing. So it is that one is naturally tempted to apply to native institutions the nomenclature and the fundamental characteristics of institutions - especially European ones - which are assumed to be comparable. When origins and development are thus transferred to a foreign context, native custom is deformed. It can

121 keep its own features only on the native plane on which it was formed and developed.

I have not felt, however, that it was necessary to abandon entirely the French terminology which is familiar to us; it is sufficient to make it fit its new role. Indeed, it would be very difficult to limit oneself to native terms, since it would be awkward and even impossible to find expression in these terms for abstractions which the writer's analysis brings out and of which the native has no knowledge.

A study of custom in its intimate associations thus requires both method and experience if one hopes to arrive at precise facts which have logical interrelationships. The results thus obtained are certainly significant since they show that, perhaps from the very beginning and certainly from a very long time past, the native character follows a path which it has itself chosen and which we can only suspect, rather than observe. This is because the concrete facts which are the landmarks of that history are subject to various interpretations.

Today, dislocated by the collapse - thanks to our inter-
177 vention - of the social framework in which he was developing,
182 the native character is working out new spiritual directives based
on its own past, making use of contributions of our civilizations whenever they are in accord with the native's own deepest tendencies. The present-day life of the Black man is merely the reflection of this *mystique*; hence, whatever may be our wishes in the matter and whatever may be the outward appearances, the Black man continues in all fields to be dominated by his past.

This fact would in itself justify a study such as the present
121 one - if there were need for justification - for, in the matter of
custom particularly, nothing that has happened in the past is unimportant when both the present and the future are closely and inevitably dependent on this past.

Orthez, February 22, 1923

[3]

Chapter 1

Origin and History

Preliminaries

131 As they have for a long time past, the Bambara today occupy in compact groups a vast region on either side of the Niger, which comprises most of the territory in the circles [administration division] of Bammako, Bougouni and Ségou in the French colony of the Upper Senegal and Niger.

162 According to the census (1), the following list shows the distribution of the Bambara in that colony:

Circle of Bougouni	146,966
" " Bammako	104,216
" " Ségou	109,758
" " Sikasso	30,000
" " Kita	2,339
" " Bafoulabé	2,100
" " Koutiala	30,055
" " Goumbou	22,110
" " San	20,103
" " Sokolo	19,996
" " Diénné	17,247
" " Niafounké	16,000
" " Nioro	9,355
" " Mopti	7,277
" " Bandiagara	928
Total	538,450

After the Mossi, this is the largest group in the colony of Upper Senegal and Niger.

---

1. In Haut-Sénégal et Niger [The Upper Senegal and Niger], by Delafosse.

121 This work deals only with the Bambara of Ségou and Kaarta since it has already been noted that, save for their specifically local history, [4] a study of their concepts and institutions is valid in general for all of the Bambara.

103 It is exceedingly difficult, besides, to be entirely certain
131 as to which of the Bambara actually belong to the Kaarta and

Ségou areas since the two designations do not correspond to any very exact geographical region. When a native speaks of Kaarta or of Ségou, he only vaguely understands the terms, and this with good reason.

101 I have noted elsewhere (1) that, etymologically speaking, the
103
131

---

1. In my work Les Khassonké [The Kasonke], which appeared in the series, Revue du Monde Musulman.

101 103 131 word which we write and pronounce Kaarta means "country of the Karé" or, more accurately, "the group of the Karé." Wherever there are Karé people they are called, in the Soninké language, Karu-ta, [5] which is contracted to Karta. From this we made Kaarta because we misheard the long first "a." The word Kaarta designates a particular area only because of the people who inhabit it, and its value as a geographical expression is acquired only by extension. Among the natives the term is used for various areas within the region which extends from Goumbou to Koniakari and from Nioro to the Senegal River. On our maps, Kaarta is bounded by Kingui on the north, Diomboko on the west, Senegal and Bélédougou on the south, and Kaniaga on the east. However, all of these names of cantons themselves have very vague meanings.

101 103 131 614 For the purpose of the present work, the word Kaarta takes on a special meaning. The Bambara who founded a clan at Sounsan-na in the Karé country are called Karta-n-ko in the Soninké language and Karta-n-ka-u (the Kaarta people) in the Bambara language. As a result, Kaarta has become the name of the areas occupied by the clan in its various peregrinations.

The "people of Ségou" acquired their name in quite a different manner, since they were named for Ségou, the capital of the clan. The country of Ségou should be understood strictly to allude to the to-da which, to be described in chapter 5, was, by and large the area surrounding Ségou and occupied by the chief and his family and followers. In a wider sense, the country of Ségou referred to all the territory under the authority of the Ségou clan. At the height of the clan's power, "the country of Ségou" occupied both banks of the Niger, following the axis of the river from Kangaba to Timbuktu.

101 131 631 Our European need to have things clearly defined may be satisfied by having the territorial limits of Kaarta and Ségou set forth on a map, but on the native level, with which this book is primarily concerned, such local definition has little relevance. These empires did not aim to dominate any given area but rather sought to exploit as large a number of individuals as possible without regard to country or race.

128 Note: In the following pages, as well as in the foregoing, words in Bambara or other Sudanese dialects which are used are italicized; see Chapter 7 for explanations. [Omitted in translation.]

[7] I. Origin

Name

101 The peoples with whom this work is concerned are known, generally speaking, by the name of Bambara, both to Europeans and to most of the natives. They call themselves Banmana or Bamana.

European writers have offered two theories to explain the etymology of the words Bambara, Banmana and Bamana.

According to one school of thought, the word Bambara derives from bamba or bamma (crocodile) and alludes to a tne (1) which is reputedly common to all natives known as Bambara. This theory is nullified by the fact that the taboo, which was supposed to be generally imposed, is actually imposed on only a few of the Bambara. Further, the suggested correlation has never been proved to exist between the name of the tne and either individual or collective denomination among the Bambara.

Other authorities suggest that, according to the Banmana themselves, the word Banmana means "rejection of a master" (ban-ma-na) and alludes to the legend which tells how, early in the thirteenth century, the Banmana left their native land and went to Toron in order to escape from the yoke of their Malinké conquerors. This etymology, which is linguistically defensible, would apply only to the people who immigrated to Toron, and it still does not tell us by what name they and their congeners were known before the migration.

1, A magico-religious taboo, see Chapter 2.

I have also been told that the words Bambara, Banmana and Bamana come from the Bambara root *ban'* or *ba*, meaning "to refuse." My informant, a Soninké, claimed that when their hegemony came to an end in the Ségou region, the Soninké noted a general rebellion among the serfs and said: "*u bara bango bè la*," which meant (1) "They have refused (to submit) [8] on all sides." And this same informant added that, when the rebels later returned and made peace with their masters, they put the following question: "*au mar' kan'*," meaning (2) "Under what conditions will you keep us?" The word Bambara would thus derive from the first expression and the word Marka (2) from the second.

1. According to the aforesaid informant.

2. According to the same informant.

I mention this interpretation as an example of the etymologies which are entirely made up by the informants and to which one can attach significance only after rigorous and critical investigation. In this case I have no doubt whatever that my informant's two expressions were invented for the occasion and that they are worthless; indeed, I cannot understand at all the translation of the second expression, *au mar' kan'*.

I am convinced that the natives simply do not know the origin of the name Bambara or its variants, or rather that they are incapable of explaining it.

However, it does seem likely that the words Bambara, Banmana and Bamana are actually derived from the same root *ba*. Thus, if the final *na*, a collective suffix, is removed from the word *banmana*, we are left with *banma*, a word which is comparable, morphologically speaking, to *finma*. The latter means "black" in Bambara and it may be replaced with *fin'* and *fi* without change of meaning: by analogy one is led to say that *ban'* and *ba* are, in the same way, equivalents of *banma*.

101 It is interesting to compare these two monosyllables with the Peul [Fulani] word *bal*, which also means "black" and which can also be spelled *ba* since its final *l*, like the *n'* in *ban'*, is merely euphonious. The comparison is valid because Peul is by origin a Negro language native to the area and, further, because a comparative study of the Sudanese dialects has shown much mutual borrowing of words.

From all this I conclude that the term Bambara and its variants likewise signify "black men."

Further, foreigners and their half-caste or naturalized offspring, all of whom we include under the name Peul, ruled over western Sudan in early times, and it is reasonable to suppose that the name Bambara dates from that period and represents the name by which the Peul rulers designated the natives. [9] Or, it may be safer to say that the word Bambara and its variants derive from the same root *ba*, meaning "black," which came from an ancient dialect of which the modern Peul language is also an offshoot.

However that may be, the designation Bambara, which is used generally throughout western Sudan, has many meanings today. For the Moslem, the Bambara is the infidel, the pagan, the drinker of alcohol; for the pastoral peoples (Moors and Peuls), he is the farmer and also the Negro. For Semites and those who claim to be Semites, he is principally the Negro. For those who were or are rulers, he is the slave; and for all he is the primitive man who is socially inferior.

101 578 The word Bambara has shared the same fate as the word Peul in that it is used simply as an epithet: the name Bambara is applied to all pagans (1), farmers, slaves and black men. Indeed

1. "... It is absolutely certain that in the minds of Sudanese Moslems in general and of those living at the mouth of the Niger in particular, the word Bambara is applied, not to any particular people, nor to a specific tribe, but rather to all Sudanese who have remained faithful to the native religion." (Delafosse, Vol. 1, p. 126).

101 the word has so thoroughly taken on a pejorative sense that its
578 use may be a grave insult. What an insult it would be for a
Moslem to be called a Bambara, i.e., an infidel, a pagan and
an alcoholic!

101 In the strictest sense, however, the word Bambara is applied by the Malinké and, following their lead, by the French only to natives who speak the Bambara dialect and who call themselves Banmana or Bamana. Barring specific exceptions, we shall henceforth use the word in this limited sense in the present work.

x173 It is evident from the foregoing remarks that the Bambara belong to very ancient indigenous families; indeed, they themselves consider this to be so, and they are so considered by others.

Native informants are likely to say that the Bambara are former slaves of the Malinké; but they also say that the Somono are former slaves of the "Ségou people." Later on (see Chapter 4), we shall see in what sense [10] this slavery should be understood. It was a characteristic result of the political form of the native governments.

101 In addition to the general name given to them or accepted by them, which applies to one or another group, the Bambara are designated by terms expressing their geographic distribution. There are, for instance, those who live at Bélédougou (called Beledugu-ka-u); those in the Kaarta area (Karta-n-kà-u); those at Ségou (Segu-n-ka-u); those around Bani-n-ko (Bani-n-ko-ka-u). Each of these expressions also has a political connotation; Ségu-n-ka-u is often used for members of the ruling party, which holds power at and operates from Ségou, and only the context or the drift of the conversation will make it possible to know what people are actually being discussed.

Among themselves the various Bambara groups often de-
scribe one another by nicknames. The "Kaarta people" ironi-
[302] cally call the "Ségou people" Tlu-kene-u, "those with a single
braid," because of a peculiar way of doing their hair, or Nya-ni-
Nyélé-u, because Nya and Nyélé are popular names for women
among the people around Ségou.

101 It is common, too, to call all the members of a clan by a
614 name derived from that of a clan founder or ancestor. Thus, the

B 101 614 Kaarta people are called Nya-Ngolo-la after Nya-Ngolo, an ancestor of the chiefs of the clan; and the Ségou people are called Barama-Ngolo-la after Barama-Ngolo, an ancestor of their clan.

B S 101 [567] Nicknames are also used between individuals of different tribes. The Soninké often call the Bambara Dyon-ko (slaves) because, having long been engaged in the slave trade, they sold many Bambara as slaves (1). The Bambara generally call the Soninké Marka (for Mara-ka). They still use the term Marka dialan'u (dry Marka people) to designate the Soninké who abandoned their own dialect in favor of the Bambara dialect. On the other hand, they use the term Marka kan'-fo-la-u (those who speak Marka) for those among the Soninké who have retained their own dialect.

1. See in the Kaarta chronicle which follows how Massa and others after him captured caravans of Bambara slaves belonging to Soninké owners.

In the Ségou region, the Bambara use the expression Bani-n-kono-u (birds of the Bani) for the Soninké people who live along the banks of [11] that river; their more general term for the Soninké is the surname Dyeme-ka-u, from Dyeme (or Dyime) meaning "a long-legged water bird" of the marabou species. According to the interpretation given to me, the names Bani-n-kono-u and Dyeme-ka-u allude to periodic journeys made by the Soninké to the large commercial centers to the south, especially Oucrodougou [Ouagadougou?].

The Ségou country was called Dyeme-ka-u by the Bambara during the period of the Soninké rule (1). On the other hand, when

the Bambara came into power, the Soninké called it *Dyon-kadugu* (land of slaves).

Origin

B
*173

The tradition which is generally accepted, and which was first reported by Raffenel and Quintin, has it that the ancestors of the Bambara of Ségou and Kaarta came originally from Toron, a region situated at the headwaters of the Milo and the Baoulé, both tributaries of the upper Niger. From there they presumably moved in a northeasterly direction and then spread out toward their present habitat and developed the empires of Ségou and Kaarta (2).

B
[174]

2. "An oft-reported tradition says that the Banmana came from Toron, the eastern province of Oussoulou, situated in the present colony of the Ivory Coast. It was on the route between Odienné and Sikasso, not far from the former. It seems, indeed, likely that the original habitat of the Banmana was located in the extreme southeast corner of the cradle of the Mandé family and that it extended from the right bank of the upper Niger, approximately near Siguiri, to the left bank of the upper Bagbé (or Bagoé), where it touched the territory of the Sénoufo [Senufo] people. The first conquests of the Mandingue [Mondingo]

*773

> emperors around the beginning of the thirteenth century established the Malinké people on the right bank of the upper Niger and no doubt forced the Bambara to settle between the upper Baoulé and the upper Bagbé, precisely where Toron is to be found." (Delafosse, op. cit., 283-284)

However, as is usually the case with history told by native traditionists this was by no means a mass migration but, rather, merely a traditional explanation for the arrival in the Ségou and Kaarta regions of the ancestors of the Kouloubali who founded the clans of Ségou and of Kaarta. I have no doubt whatever [12] that, long before their arrival, there were Bambara settled in Ségou and Kaarta in the very places they often still occupy today (1).

> 1. For example, from the time of his installation, and even during his father's lifetime, Massa[1] came into conflict with the Bambara of Niamala. And when he attacked the Soninké, the latter called for the help of their own Bambara people, who had been there for a very long time and who had nothing to do with any migration from Toron. The Bambara of Bélédougou claim that they have always been the masters of their lands, and they are so recognized.

On the other hand, according to reliable native informants who are known to be well-informed about the traditions, and whom I interviewed at Médine, Kita, Bammako, Ségou and Djenné and also according to the dyeli Karé Tamoura, (2) Toron

> 2. See the following section: History (Sources).

[1] [for information on Massa, see cat.#773, pp. 113 ff. -Analyst]

B *173 is not the cradle of the Bambara with whom we are here concerned, even though it was a region from which Bambara migrations originated. These same informants say that the ancestors of these Bambara came from Mandé, whose capital, in the most remote times, was Dakadiala, known today as Kirikoroni, in the canton of Kiri whose present-day cantonal headquarters is at Niagassola.

F 101 103 At this point, it seems necessary to explain the meaning of the word Mandé, which appears so often in the history of western Sudan.

Authors agree among themselves and with native traditionists that Mandé is the name of a territorial district which, at various times, was near the left bank of the Niger between Kangaba and Bammako. However, the boundaries of the area remain uncertain and variable as does the location of the capital, which tradition has placed at different periods at Dakadiala, at Tabou, at Kounfangué, at Figuira, at Kangaba, at Niani, etc. In point of fact, however, so far as we know, there is no country actually named Mandé and there has never been such a country. What then is this name?

It is agreed that the forms Mandé, Mandi, Manden, Mandin, Mandeng, Manding, Mali, Malé, Malel, Melli, etc., all of which are or have been used, are merely variants of the same expression in different dialects. [13] However, no one has interpreted the validity of these terms.

Now it appears that, in the Soninké language, the word Mandé (1) is made up of ma and de, linked by the connective n; the particle de, which corresponds to our prepositions "at", "in," and "at the house of," comes from a root meaning "place." As for ma, it means "master," "lord" or "king," so the word Mandé means "at the house of the king," or "place or residence of the king."

This is precisely the interpretation given by the Tarikh

1. The form Mandi can be analyzed in the same way in Soninké.

101 103 *el Fettach* for the variant *madugu* (2): "The word *madugu* is the name given in the Tekrour(western Sudan) to any royal residence, wherever it may be" (page 335 of the translation). The *Tarikh es-Soudan* also says that the word *madugu* means "palace of the king" (French translation, p. 151).

103 644 In principle, each chief establishes his capital wherever he pleases and, in view of the extreme uncertainties of political life in this part of the world, this residence is often moved. We shall see an example of this mobility in the case of the Bambara-Massa-si of Kaarta. In general, the same situation prevailed in the other empires, and there is no doubt that it was so for the Mandé.

That is how it has happened that the word Mandé and its variants have designated the most diverse localities which, at one time or another, have served as royal residences or, more often, as headquarters or capitals. Sometimes these places were referred to by their own names, with *madugu* added, e.g., Nianimadougou. Or *madugu* might accompany the name of the territorial district to designate the capital, e.g., Sanamadougou, near Sansanding on the Niger. The word *madugu* and its variants have often been used for no particular reason. So it is that the *Tarikh-es-Soudan* and the *Tedzkiret-en-Nisian* often allude to Madoho, Madoko or Madougou, a former royal residence of the king of Mali at Timbuktu. In the same way, Ibn Batouta never tells us the name of the capital he visited but merely calls it by the variant Mali, the equivalent of Madougou. This is the origin of the various names mentioned in the foregoing [14], which, etymologically speaking, might be applied to any headquarters or capital but which, because of long custom, refer only to the capital of Mandé, a territorial district that takes its name from the capital.

101 103 This double meaning of the word Mali or Melli, for example, meaning capital and country of the capital at the same time, is evident in the travel record of Ibn Batouta. The same

---

2. This belongs to the Malinké dialect, in which *dugu* means "place," not "earth."

French West African Natives FA2-
Malinke FA27

F 101 103 double meaning is no less evident in the Tarikh-es-Soudan, especially on p. 161 of the French translation. The same double usage is evident in oral traditions.

Thus it is understandable that the word Mandé has come to be considered as an equivalent of our words "empire" and "kingdom" when they are used in a geographical sense, and that, as a result, the term has varied in application because it depended on an ever-changing territorial domain subject to the domination of successive ma.

M F 103 642 However, it is not only from the geographical point of view that the term Mandé has remained indefinite or vaguely defined; the same uncertainty prevails on the political level. In a general way, Mandé is considered to be exclusively the empire of the Mandingue people, who are one of the subdivisions of the group called Mandé by the Europeans (1). In order to understand the meaning attached to the word "empire" in western Sudan, it is essential to place oneself on the native level and not on that of our European civilization from which the term is borrowed.

F B 103 642 [614] Briefly, the Sudanese empire is a system of clans. It is formed by bringing together of elements taken over from clans that have either disintegrated or are in the process of doing so. It acquires power and extension through the influence of the founder or, less frequently, of one of his successors, and then falls into decline at the hands of enemies or as a result of schisms which arise at the death of the ruler on whose success and "flair" its fortunes have depended.

It is this constantly repeated process of grouping, separation and regrouping which dominates the entire [15] history of the Sudanese empires and dynasties and which makes any study of the people so very difficult. The geographical nomenclature is,
F B 101 103

1. Mandé, as the name for a group of peoples or of native languages, is unknown to the Sudanese; in this sense it is used exclusively by the Europeans.

French West African Natives FA2
Malinke FA27

F B 101 103 of course, dependent on these social facts. Often a region is named after the people who inhabit it as, for instance, is the case with Kaarta. It may also derive its name from a dominant political group, and when a region has been ruled by successive groups, it acquires a series of superimposed names even though the territories to which they apply may not necessarily be identical; this, too, applies to Kaarta -- a poorly defined region.

This explains how it came about that different empires were lumped together under the same name, Mandé (and other variants). The empire ruled by the Kefta chiefs was merely the last to arise and it presumably dates from the beginning of the thirteenth century.

B *173 M 173 One tradition has it that the ancestors of the founders of this thirteenth-century empire came from the east -- specifically from Kong (1). Under the leadership of Kabala Simbo Kefta, they settled in Dodougou, a canton whose capital was at Tabou and whose chief, a Bambara of the Konnaté dyamu maintained his power with the help of a militarized group called Mandinké. This was a group similar to those composing the sofa, ton-dyon' or furu-ba-dyon' who supported the fortunes of the clans of Ségou and Kaarta. In the Soninké language the word mandinké means, literally, "a person of the master's (or lord's or king's) house- M [101] hold," and in the plural it means "the master's (or king's) people."

The canton of Kiri (2), adjoining that of Dodougou, was

---

1. I see in this precision nothing more than the usual polarization of which I speak on p. 45 , note 1 .

2. The Dodougou (abbreviated to Do) and the Kiri are, indeed, considered to be the oldest cantons of the so-called Mandé clan. In this connection, see Humblot, "Du nom propre et des appellations chez les Malinké ..." [On Proper Names

B

M
173

and Appellations among the Malinké...] in the Bulletin du Comité des études historiques et scientifiques de l'A.O.F. 1918, nos. 3 and 4.

inhabited by independent Bambara.

This clan or, as one is tempted to say, this empire of Keïta was formed in the thirteenth century after wars between Soumangourou Kanté and Soun Dyata Keïta and with the aid of various elements (3), including a group of Mandinké which

B
M

3. In the same way we shall see Biton forming furu-ba-dyon' from the ton-dyon', slaves captured from the chief of Dina, and from captives acquired elsewhere. In the same connection, see in the Tarikh el Fettach the curious story of the 24 slave tribes of the Songhaï clan which came from the Mandé clan.

[16] had been organized earlier by (1) a chief named Gourmanda[illegible]a.

B
[614]
M
567

1. Within the clan, the slaves, who always constitute the power of a clan, are divided into groups named in accordance with a particular aspect of organization. The Boula seem to have enjoyed a degree of consideration comparable to that attained by the Ton-dyon' at Ségou. Judging by the meaning of the word Bula, it would seem that they were "freedmen," and this is the meaning given by native traditionists. On the subject of the Boula, see the afore-mentioned work by Humblot. Boula women have the given name of Damba and they are addressed as Sakiliba, while the men are called Soussoro. This practice of giving a common name to a whole

Malinke FA27

M 567

> category of slaves is also found among the Rimaïbé people of Macina, all of whom may be called Tammoura or Tamboura.

B *173 M 173

This group was that of the Boula, who made a fortune from both Soumangourou and Soun Dyata by supporting alternately the one or the other until Soun Dyata finally prevailed.

M 101 173 B *173

These people, who are called Mandinké by the Soninké, Maninka by the Bambara, and Mallinké by the Peul, call themselves Mandinga. It should be noted, however, that the Mandinké do not date from the thirteenth century empire of the Keïta but are rather of earlier origin than that clan. It is my opinion that they derive originally from very ancient Soninké clan groups in the process of breaking up, from which they acquired their essential elements and their name. The name, indeed, refers to a social group which is identical with that of the furu-ba-dyon', described hereafter in Chapter 5, and the same group was established in the same way by the Bambara, i.e., by the Blacks, the natives of various races. In any event, this is said in the traditions told to me.

M B 174

Furthermore, I do not think that all the Bambara peoples who today occupy the area under consideration are accounted for by the migrations of the Bambara-speaking Bambara from the aforesaid Mandé region at the time when the Keïta clan took over that region in the thirteenth century. I believe that, in the geographical region known to us under the names Mandé, Toron, Baninko, Ségou, Bélédougou and Kaarta, there have been Bambara-speaking Bambara since well before the thirteenth century.

The Kouloubali

B *173

The migrations of which the traditionists tell us invariably refer only to the movements of [17] certain families who were more or less important and who had usually figured prominently in clan affairs. As far as Ségou and Kaarta are concerned, the traditions apply solely to the Kouloubali chiefs of these clans and clearly indicate that they found other similar Bambara families already long settled in these and surrounding regions.

*173 In addition to the traditions reported in what follows and emanating from the dyeli traditionists, Karé Tammoura and Gran Koaté, I was given the following explanations concerning the Kouloubali.

According to the first version, the sons of one Péné Kouloubali left Kéniéroba (1), northwest of Kangaba, in order to escape from the pursuit of their enemies. There were three brothers: Mamourou, the eldest, Nzan and Ngolo. They settled in Bani-n-ko at Dougouna, in the home of a blacksmith named Sékolo Balo. When their enemies followed them there, they fought for a year, and then Mamourou persuaded his brothers to flee. So they left, taking Sékolo Balo with them.

They crossed the Baoulé at Kana, thanks to the help of a poyon' who offered to ferry them since they had no boat. Ngolo, who was the last to cross, killed the poyon' and carried the body to Dionforongo (east of Barouéli) where he ate it.

[103] The three brothers came to Ségou-koro-si-do (2), then to Sinsala, so named because of the "enclosure" (sinsa) built there by the Bozo, and better known as Sansanding. There, Mamourou advised separating, the better to elude their pursuers. Mamourou returned to Ségou-koro-si-do, and his descendants are the Kouloubali of that region.

Nzan settled near Ségala in a place called Sanabala after his wife Sanaba, by whom he had a son Nto. Nto had a son named Kéfa, who fathered Sama. The latter had four sons; Sara, who lived at Salaga; Touman, at Toumanbougou; Fara, at Diakoro; and Demba at Donguélé.

Ngolo settled at Kourouma, where he became one of the ancestors of the Kouloubali of that region. He married a Moorish

(1) The period, undefined as always, certainly antedates the seventeenth century.

(2) Si-do: "the forest of butter-trees," a place said to be near Ségou-koro.

*173 half-breed named Bariké and by her had a son, [18] Dagoumou, who fathered Siratigui. The latter was himself the father of Mamourou, who fathered Dyiguina, who fathered Bo-dyan. This last gave birth to Mélé-fin and Mélé-dyé. Mélé-dyé's son, Sidi Bala, was put to death by the *fama* of Ségou, Ngolo Dyara.

According to another version, two Kouloubali brothers, Ntchi and Ntchian, left the Mandé area during the struggles between Soumangourou and Soun Dyata. Ntchi, who was the first to reach the river, bemoaned his lack of a boat and called upon his ancestors for aid. A *poyon'* suddenly appeared and said: "If the sons of Adam were not such ingrates, I should certainly have ferried you across." Ntchi begged the *poyon'* to have mercy upon him and his people and swore that, in return, the *poyon'* would forever after be *tne* for himself and all his descendants. The *poyon'* allowed itself to be persuaded and ferried Ntchi and his followers.

When Ntchian reached the river the same scene took place. But when all his people were safe, one of Ntchian's wives, by the Tangara *dyamu*, cried out: "If you don't kill this fish, our children, who are starving, will be dead by night." Pretending not to hear her, Ntchian mounted his horse and sought to leave. But his wife seized his bridle and once more begged him to kill the fish and to save her children. This time he did so.

That is why only the descendants of Ntychi consider the *poyon'* as *tne*.

Ntchi settled in Niamana, near Niansonna to the west of Baroéli, where he became the chief. Dissension arose among his descendants; so some of them went to Ségou near Ségou-koro and others to Kaarta.

Ntchian settled at Nani in the eastern part of Bendougou not far from the present village of Nionsira. Since he was of a quarrelsome nature, he feuded with the chief of Nani and forced him to leave. It is said that the chief had a flute made from the hinges of his door and that it was to the sound of this flute that he departed. He went to Farabougou, to Souala, and then to Ngonifembougou (still called Monimpé) near Dia-kolo.

Ntchian pursued him and settled at Dia-kolo. His descendants suffered the great famine that lasted for seven years and that

*173 is known as the solo (1); they sought [19] a remedy to this

[551] 1. Solo is a woman's surname.

calamity by emigrating. Some went to Dia-bolo near Djenné; others went to Nya Ngolo-la in Kaminiadougou.

Is there a relationship between the origin of the Kouloubali family just discussed and that of the Kouloubali founders of Ségou and Kaarta? I have no doubt that there is, because all the Kouloubali go back to a common ancestor prior to the thirteenth century, one of whose descendants, allying himself by marriage to the Kefta clan, founded the branch of Kouloubali composed of the so-called masa-rin' families (1).

[614] 1. By the term masa-rin', the traditionists mean, in addition to the ruling Kefta and their followers, various families who are closely connected with them. The following are prominently mentioned: the Kouloubali, the Konaté and the Kourouma. Not all the members of these dyamu, even the Kefta, are masa-rin'; only certain branches are.

The Bambara of the Tarikh-es-Soudan

175 The Bambara, established in the area with which we are concerned before or after the Kouloubali, whose traditions we have just discussed, have no precise traditions - at least none which give any detail. The general history of all of these peoples is doubtful.

To be sure, the Tarikh-es-Soudan does allude to the Bambara, but it is difficult to tell in what sense the term is used, since it often simply means "pagans." However, in the following citations, it seems to me that the Tarikh does refer to the Bambara here studied, all the more so because in this chronicle,

175 the principalities of Kala, Bendougou and Sébéridougou correspond to territories west of Djenné and Dia which have been under the domination of the clans of Ségou and Kaarta.

The Tarikh-es-Soudan reports: "When Askia Daoud was addressing the chief of Djenné, El Amin, he said: 'We put you at the head of a district and you are not watching over it properly, because the Bambara have managed to acquire privileges which they had ceased to have.' " This was in 1558 and the last words in the passage show that before that period the Bambara had enjoyed an important position.

According to the same chronicle, when the Moroccans arrived in 1691 [sic, probably 1501] [20] the countries of the middle Niger which had been enjoying relative peace under king Soughaï, were being terrorized, especially around Djenné, by the Bambara aided, incited and even led by the Peul chief of Macina.

In 1599 a great many Bambara had been recruited into the army of Macina by Hamedi Amina, the sultan of the country, who was stirring up a general rebellion against the Moroccans.

In 1600, on orders from the Moroccan pasha Djouder, the caïd [alcaide] El Mostapha-et-Torki led an expedition against Macina, and the Bambara, having been abandoned by the people of Macina, were cut off in a forest and massacred in large numbers.

In 1644, when his troops were fleeing before the combined forces of the pasha and the askia, Hamedi Amina had to flee also, leaving quantities of booty behind. He and his followers took refuge with the Bambara, who appropriated anything that came within their borders.

Finally, the Tarikh-es-Soudan mentions that in 1645 the Bambara rebelled against the chiefs of Sana and Farko and sacked Sibila, the capital of the Sana region.

It is of course true that account must be taken of the fact that Es-Sadi, the author of the Tarikh-es-Soudan, is likely to include all pagans under the designation "Bambara." However, there is no ground for assuming that the Bambara with whom we are concerned are not meant when it is a question of the regions mentioned in the citation. Indeed, the contrary is the case, since

175 no other pagan people of the area has such a long tradition of warlike actions.

*173 175 The old Sudanese chronicle never mentions a Bambara king. According to the traditionists, the Bambara villages of the area lived independently of each other before the time of Biton. They sometimes embarked on joint raids against certain neighbors or carried out other important enterprises together. On such occasions they used bands organized and equipped in line with the usual native practice (1).

1. See in the foregoing how they acted as mercenaries to the sultan of Macina, for example.

[21] There is nothing surprising in the fact that a chief of one of these bands may have succeeded in creating a kind of empire in the manner of a Samori. Indeed, according to Quintin (1) there is a tradition that a certain Kaladian Kouloubali,

1. See also Delafosse in this connection.

a descendant of Barama Ngolo and living at Markadougou-ba, established his authority over both banks of the Niger in the Ségou area around 1600, either by his own efforts or aided by his sons. The Tarikh-es-Soudan makes no mention of this ruler, nor does the dyeli Karé Tammoura. History in that part of the world abounds in missing links and divergencies of this kind.

Kaladian's empire probably did not last long in any case, but Biton Kouloubali, founder of the empire of Ségou which we shall discuss, was precisely the grandson of Kaladian through Soma and Danfassari.

2. History

Sources

Thus, a general history of the Bambara is yet to be written; all that is known in any detail relates to the clans of Ségou and of Kaarta and, even in this limited area, the knowledge is anything but well-documented.

*173
175

The literature on the subject that has already been published, as well as the accounts given here, necessarily rests on native traditions which are vague, confused and shrouded in legend, and it is difficult to establish real, precise and consistent facts from such sources. So it is that we shall later see, presented as a fact in the earliest history of the clan of Kaarta, that the old fa Siné only granted hospitality and a limited alliance to Sounsan because a bird had told him of the power that was eventually to accrue to the family of the fugitive.

Also in this connection there is, for example, a version concerning Mamari, called Biton Kouloubali, the founder of the clan of Ségou. Mamari had created a garden on the banks of the Niger for his mother. It was there, one day, that a "water genie" (dyiden) appeared to him at the very spot where Monseigneur Hacquart died. [22] The genie urged Mamari to follow and was so insistent and so persuasive that Mamari yielded (1).

1. On the subject of water genies, compare this legend with the tales entitled "Les Dyide de Djenné" [The Water Genies of Djenné] in Contes du Sénégal et du Niger [Tales of the Senegal and the Niger] by Zeltner, pp. 173 ff.

Drawn by his guide, he penetrated to the depths of the water without the least discomfort and so came to a miraculous city. There, the genie showed him a heap of gold and silver and a pile of grain and said: "Choose: gold and silver mean wealth; grain means power. Now what does wealth signify if one is at the mercy of a powerful man; the master controls everything. If, however, you choose the grain, sow it in an enormous field and work hard to have a large harvest. Then leave the harvest to the birds and your power will extend to all the lands touched by the marauding birds."

Mamari carried off the grain, preserved it carefully and, when winter came, sowed it in an enormous field. During the whole season he worked hard at cultivating and, when harvesttime

*173

175 came, everyone was astounded to see him leave everything for the birds.

The oracle was fulfilled at once. Biton ruled from Timbuktu to the Atlantic. And the dyeli, Karé Tammoura, who told me the legend, adds that thereafter there was a very strange thing at Ségou: a combination animal and plant which the Bambara called Sanu-so or "golden horse." Ahmadou, the son of Omar, had a mosque erected on the spot where Sanu-so was wont to appear but, all the same, it did not disappear until the arrival of the French. Even since then, there are those who say that on certain days strange lights appear at the spot on the Niger where Monseigneur Hacquart died and where the genie appeared to Mamari.

[171] This fable about a local genie is not in itself remarkable, but when compared to the legend about Ngolo Dyara (see later, p. 51) and to many other similar ones current in the Sudan (2), what it really is becomes clear: the figurative expression of a native mentality about which the European is usually very ill-informed and which deserves to be noted here briefly.

778 [23] Anything that departs from the average, the ordinary, or the normal -- power, wealth, success, ... illness, poverty, misfortune -- to any extraordinary degree or in a suspicious way, is, for the Bambara in particular and for the Black in general, the manifestation of an occult force acting either spontaneously or after provocation.

643 778 That is why, in the eyes of a native, a chief (a paramount chief, of course) is out of the common run, not so much because of the position he occupies as because of the magic powers attributed to him (1). Power is merely the reflection of his

2. See, especially, the legend of Ndyadyane Ndyaye in "Légendes et coutumes sénégalaises [Senegalese Legends and Customs] by H. Gaden, 1912, and the "Dyide de Djenné" in Contes du Sénégal et du Niger, by Zeltner.

643
778

1. Compare, on p. 31 and p. 49 , the conduct of Dina Wara and of Biton.

efficacies in magic and he himself is convinced that this is true. Everything he does is accepted without protest because his acts have a supernatural character. The only ones who can resist him are those who, like him, have special powers (2). Therefore he

[173]

2. Legendary traditions abound in magic combats; see especially the tradition concerning Dinga, the ancestor of the Wagadou people, and that concerning Samba Guéladio Diégui, the hero of Fouta.

makes a point of seeking the company and advice of initiates in matters that are hidden from the common herd. These are the sorcerers, magicians and marabouts, all of whom believe that they possess -- or appear to possess -- a share in the knowledge that allows its practitioners to influence the unseen. Sometimes he is one of them or becomes one, and in any event he is always, willingly or not, dependent upon them.

791
778
This is an age-old state of mind, which Islam has merely strengthened, for the Black man, whether Moslem or not, always regards the marabout as a diviner, a performer of miracles, a maker of philters, talismans and amulets, and a caster of spells. Many facts attest the truth of this observation, and the tales which follow will afford examples.

*173 It is understandable that with such beliefs[1] the Black man could hardly be expected to admit that the life of an important person, a powerful chief or a founder of an empire, could possibly be or have been banal, ordinary or simple. That is why supernatural, fictitious deeds make up such a large part of the native historical traditions that one may look in vain for any trace of the actions we see performed around us day after day. One must be very thoroughly accustomed to this delusion in order not to give way to discouragement at being unable to grasp

[1] [i.e., in magical and occult power with influence over the supernatural.—AuNysF]

*173 something whose strangeness places it outside our [24] understanding or what is worse, not to be deceived into interpreting this incoherent jumble simply to fit a preconceived theory.

*173 814 To these reflections of the native mentality must be added the deformations in the hands of the collectors of historical traditions (1): the *dyeli* among the Bambara. This word *dyeli*, meaning "master," shows the esteem accorded, in principle, to the archivist, which is what each *dyeli* should be. Indeed the job consists essentially [illegible] preserving from oblivion the genealogy and in celebrating -- by magnifying them -- the achievements of the personage to whom the *dyeli* is attached. As a result, the *dyeli* extends his inquiries to all who come into contact with his lord, so that in fact he becomes the historian of an entire family, an entire clan and even an entire tribe.

[555] The *dyeli's* great erudition and, even more, his skill in making the most of his superficial knowledge bring it about that the esteem in which he is held takes the practical form of gifts -- often so considerable as to make the *dyeli* very prosperous indeed. Therefore, the majority of *dyeli*, being less anxious to safeguard truth than to increase their own fortunes, flatter or slander, as required, those on whom they impose their services, so as to profit as much as possible. It is because of this sort of corruption that the *dyeli* is often scorned.

Dyeli who have kept their integrity are rare; those who possess extensive knowledge and sufficient critical sense to make a wise selection from the mass of contradictory traditions are rarer still.

In general, each *dyeli* works only within the very restricted limits of a clan tradition, plus a few family traditions; he is entirely ignorant of anything that concerns neighboring clans and families and, especially, people outside his own tribe and race.

The *dyeli* preserves in his memory the historical tradition and hands it down. Thus, since each *dyeli* works entirely independently, he can add any fantasies he pleases, spread them abroad, and pass them off for truth, which is accepted as such and passed on by others.

---

1. Here called "traditionists."

*173 These, in brief, are the difficulties encountered in deal-
814 ing with sources for native historical tradition. When Islam
217 introduced [25] a written language, there was created a new
212 category of archivists, the marabouts. They have added this duty
to many others; it cannot be proved that they have purged the
job of its former vices, but it may be stated categorically that
they have added a few new ones.

It is notorious that, in the Sudan, the Moslem traditionists have an ineradicable tendency to transpose everything into their own mentality. Further, since a manuscript gives a kind of quasi definitiveness to the oral tradition, including all its errors, it becomes almost impossible to eliminate these errors because of the unquestioning respect usually accorded a written document.

*173 There are also the non-literate Moslem traditionists:
814 ordinary *dyeli* who have been converted in the usual Sudanese
fashion, as described in Chapter 6, and who have abandoned none
[177] of the characteristics of their caste. They have merely added a
few peculiarities due to Moslem influence.

114 In drawing on these sources, European publications add new reasons for doubt. Most especially, because of a desire -- legitimate, in principle -- to bring some sort of order out of the incoherent mass of traditions, but also because of a need to make them fit a personal theory, the European author takes refuge in an hypothesis. Now there is no objection to this, assuming that the hypothesis on which the author bases his theories is clearly stated. Too often, however, the hypothesis is so well concealed or even so intricately entwined in the tradition that it is impossible either to discover what it is or to set an exact limit to its range. This new metamorphosis of tradition is not the least dangerous for historical truth.

115 It is to two non-literate Moslem *dyeli* that I am indebted
*173 for the traditions concerning the Ségou and Kaarta clans. My
interpreter, Souleïman Goundiamou (1), whose services as a guide and informant on native matters were invaluable to me, gave

---

1. Now chief of the village of Ambidédi (Gadiaga).

115 me the benefit of his experience in translating these tales. I
*173 hereby thank him most sincerely.

As far as Ségou is concerned, Karé Tammoura's story does not seriously modify the known general outline, but all the same it differs from earlier publications in its essentially native feeling, which I have tried to preserve. It is very interesting, for instance, to see how step-by-step [26] an empire developed out of a fla-n-ton': this change in a strictly native form of association is most instructive. It shows in detail how one of these Sudanese empires -- and not the least of them -- was organized. It is essential to know this if one is to understand the political history of this country. Community, brotherhood, clan, slavery, Islam -- all essential and too-little-known factors of Sudanese society -- are there to be seen, alive and just as they are.

In spite of its weaknesses and its lacunae, I am therefore giving, without change, the story told by the dyeli Karé Tammoura. This Ségou Bambara has occasionally allowed himself to cover the truth with a Moslem veil, because he is a convert; but it is easy to discern the facts under the poorly applied make-up.

115 My informant for Kaarta was principally the dyeli Gran Koaté, who was also a native of Ségou and a Moslem. He was for a long time attached to the person of Ahmadou, son of Omar, with whom he resided at Ségou and at Nioro, where he acted as a close confidant and was sometimes charged with important missions.

124 I feel obliged to point out that these two informants are not entirely responsible for the lacunae in their stories. I had had these two learned men brought from Ségou to Djenné, where I was commandant of the circle in 1902. In spite of my desire to learn as much as possible from them, I had to consider the demands of my post, which left me little leisure, and also had to avoid keeping them too long away from their homes. Hence, I was forced to cut short their long speeches. I do not think that I missed anything essential, but undoubtedly there was much to be gleaned from what had to be sacrificed for lack of time. I hope that one of my more fortunate successors may be able to fill in the lacunae in the stories set down here.

*173

[27] History of the Empire of Ségou
(As told by the dyeli Karé Tammoura)

Preliminaries

Origin of the Kouloubali of Ségou and Kaarta

A hunter coming from the east had a son named Barama Ngolo, who was born at Barama-n-dougou on the Bani; as he proceeded west, the same hunter had a second son, Nya Ngolo, who came into the world at Nya-Ngolo-la, a village in Kaminiadougou.

After their father's death, Barama Ngolo, Nya Ngolo and their brothers settled at Sounsan-na at the back of the Bani. One of the brothers having died there, Barama Ngolo accused Nya Ngolo of having caused the mishap and threatened to kill him. Thereupon Nya Ngolo fled to Massa-la, near Ségou, where he became shepherd of the flocks belonging to the Peul. His son Sounsan was with him.

Nya Ngolo died at Massa-la. When Barama Ngolo learned that the fugitives he sought were living there, he started out at once to capture them. On hearing this, Sounsan and his people went to Kounando, west of Ségou. Barama Ngolo proceeded to Dina, the headquarters of the canton to which Kounando belonged, to ask the chief to turn over the fugitives so that he could kill them. His request was refused, but, in order to preserve the peace, the people of Kounando forced Sounsan to leave the country.

The little band reached the bank of the Niger and, lacking a boat, were about to be caught by their implacable enemy. In desperation, Sounsan called upon his ancestors to come to his aid to save the lineage. His plea was answered: a poyon' suddenly emerged from the water and offered to ferry Sounsan and all his people across. That is why Sounsan vowed that the poyon' should henceforth be the tne of himself and all his descendants (1). [28]

1. Compare the following variant version, whose complete text also contains the legend of the poyon':

*173

> "Long, long ago, very probably before the seventeenth century, two Banmana brothers, named Niangolo and Baramangolo respectively and no doubt representing a strayed unit of a large-scale migration, came to the right bank of the Baoulé south of Baroučli (near the confluence of the Baoulé and the Bagbé), in flight from enemies driving them toward the northwest" (Delafosse, Vol. 1, p. 285).

Barama Ngolo and His First Descendants

Having given up hope of catching up with the fugitives, Barama Ngolo settled near Ségou-koro at Fa, where his son Soma was born. The latter became a famous hunter and supported himself by the chase. In the course of his wanderings he often sought hospitality from a Somono marabout, *alfa* Sénou Kané, who urged him to settle nearby.

At that time there were many villages in the Ségou country inhabited by the Bambara and Soninké. The Soninké were the ones who were strong and rich at that period and their principal village, ruled by the Boaré family (1), was more or less the headquarters of the region.

After he settled at Ségou, Soma married and had a son, *fa* Siné, who had three children: two boys, Mamari and Sérifbilé, and a daughter, Sana-ba. The daughter married Wara Dyara, chief of Dina, and since he was a powerful man, the alliance brought considerable renown to the family of *fa* Siné. Mamari accompanied his sister to Dina and there, thanks to his sister's complicity, he managed to learn the secret behind the prosperity and power of Wara Dyara. The secret was that the

---

1. This tradition agrees with that reported by Raffenel, in Vol. 1, p. 364.

*173 chief was served special food prepared according to rites known only to him. The basis of this food was goat's head, and the meal had to be eaten in complete darkness. Thus Mamari, admitted to the room by his sister, was able to share his brother-in-law's repast without being found out. It was because of this food that he was later to occupy the highest position in the country.

The fla-n-ton (2) of the People of Ségou and its Development

2. See Chapter 4, p.   for the
organization of the fla-n-ton'.

When he returned to Ségou-koro, Mamari lived mostly with his mother, whose favorite he was. For her he cultivated 263 [28] on the river bank the n-koyo, a kind of bitter pepper used in native cookery. He worked here virtually every day and, in the course of his labors, made the acquaintance of the water genie who taught him many magic practices which made him superior to other boys of his age. For these reasons, no less than for his unusual strength, they chose him leader of the ton' (ton-tigi).

The ton' members were young men of various races belonging to the villages of Doukounna, Si-do, Bignébougou, Sola, Banan-koroni, Ségou-Sikoro, Doua, etc. Mamari's mother, Sanou Saro, often made dlo (millet beer) or hydromel for her son's friends. In order to repay her kindness, which had gradually come to be habitual, the ton-den' [ton members] decided each to subscribe ten cowries to reimburse the good woman for the expenses incurred by the weekly drinking bout on Thursday. The assessment was known as di-songo, meaning, literally, "price of the honey," because of the purpose for which it was collected.

As time passed, the ton' became tyrannical toward its members. The frequent and large fines could be collected only by force and Mamari went so far as to put the recalcitrants

*173 in chains. Like the other members he himself suffered from this unfortunate development, and one day he was sentenced to a fine of 80 head of cattle for an infraction of the rules. He could not pay any such fine out of his own resources and in vain sought help from his father, who was no less poor than his son. In desperation he set off to see his sister at Dina. There his brother-in-law seemed to take an interest in the affair, listened patiently to the story and then advised him to return to Ségou where, he said, help would be forthcoming. Mamari then returned to Ségou, only to be followed shortly by his sister, with word that her husband had changed his mind and now advised him to refuse to pay. Outraged by this conduct, Mamari now found himself in a worse plight than ever. His sister understood his feelings and, without hesitating to make a sacrifice which she thought might save him, handed over all of her gold jewelry to be paid in place of the 80 head of cattle.

Mamari called the members together and gave them the jewels as a substitute for the cattle. However, on behalf of the [30] group, the dyala-tige Sibiri-ba Kouloubali, a native of the village of Doukounna, took the floor and said: "Our group was not organized for the purpose of acquiring treasure; we are gathered here to provide ourselves with the pleasures of living. The fines are not intended to enrich us but only to provide a communal stock of food. You were fined 80 head of cattle, and that is what we want. If you do not have them, go away and let us part."

Mamari crossed over to the left bank of the Niger to seek advice of Massa Taraoré at Dyané and to ask him to intervene. Massa Taraoré listened sympathetically and had him escorted to Doukounna to see the ton' arbitrator. The latter said: "In Mamari's ton' there are nobles from Doua against whom I am not competent to make a judgment; the settlement should be referred to the notables at Doua." The notables at Doua protested: "Since some of our own people are involved, our judgment might well be considered to be biased. So it would be better to call on someone who has no interest whatever in the affair, such as Tyéma Darko of Ségou-koro." When Tyéma was consulted he told Mamari: "Have patience, time settles everything."

*173 Mamari was unwilling to accept this advice; so in order to escape the hostility which he felt around him, he requested asylum from the Kouloubali of Binabougou, only to have them protest: "We are helpless people and, if we were to admit you among us, we should end by arousing the enmity of the powerful people of Doua. So stay where you are and we shall give all we can to help you."

Since he dared not return to Ségou-koro, Mamari went to Ségou-Sikoro where he hoped to win the support of the almami Ousman Dyiré. The latter did, in fact, intercede with the chief of Ségou-koro, who summoned the ton' members and told them: "Stop your quarreling, take back your leader and, in order to avoid a repetition of such dissension, limit your membership to people of the same class and separate yourselves from the nobles of Doua who are the cause of all the trouble." The young men agreed: "It is true that we are all farmers and that fines involving cattle are beyond our means; henceforth, all infractions of the rules will be payable in millet which we shall use to make dlo." Thereupon, Mamari resumed his office and the people of Doua were barred.

[31] From that time on, two rival groups lived side by side: the ton' of Doua, whose chief was Kassoum Boaré, the son of the chief of Doua, and Mamari's ton', comprising the people of Ségou-koro, Ségou-Sikoro, Doukounna, etc.

The young men's decision did not fail to alarm the heads of families. One of them, old Ménkoro Kouloubali, the father of the dyala-tige Sibiri-ba of Doukounna, sought out Mamari's father and said to him: "I see that our boys, who already do so little work for us, have now decided to waste our grain. Well, I warn you, the father of their chief, that if your son touches so much as a single grain of my harvest, I shall break his head." Fa Siné replied: "What can I do, since my son has never obeyed me? However, I shall tell him what you have said."

Fa Siné called in Mamari and, in the presence of the blacksmith Maliki, told him of old Ménkoro's visit and bitterly reproached him for leading such an irresponsible life. Mamari gathered his group together and, after telling them about his

*173 interview with his father, asked them to help him build a house where he could live independently. They set to work, and Mamari's house was soon built at Ségou-koro on the site of the future Biton-blon-da, the place where the ton' had been meeting up to that time. On Mondays and Thursdays, after a hunt to provide game, the members met there and had a feast. Each brought some sort of utensil and they prepared their own meals.

An old slave belonging to fa Siné, named bina (1) Bilali, had been attracted by the fine food and asked to be taken in as a "slave of the ton' " (ton-dyon'). He was admitted on that basis and became a sort of general factotum. A Soninké slave followed his example and was likewise admitted and given the important role of trumpeter. Using a horn which he sounded three times, he called together the members of the ton' when ordered to do so by Mamari. He was called ton-masa, "master of the ton'," because his summons was not to be disobeyed on pain of [32] a fine of ten jugs of millet beer for recalcitrants.

A Somono slave named Allah-doungo (lit., Allah's pleasure) also offered his services to the ton', and the organization increasingly became the refuge of men seeking to evade any authority they deemed excessive.

These recruits were the first ton-dyon'; all were slaves in quest of freedom. Soon, however, the movement they had started was extended, thanks to the influence of the ton-tigi's diplomacy.

One day Mamari's mother gave (1) a free gift of twenty jugs of beer to the ton', and Mamari used the occasion to tell the

---

[576] 1. Bina, whose literal meaning is "uncle," is here used as a title of respect.

[431] 1. It is entirely typical of native custom to give ostensibly free gifts in this way, when it is actually intended that the giver receive more than he gives. This is an example.

*173 members: "Sowing-time is at hand, and it would be a good thing if we were to cultivate for my mother and for Sibiri's mother." The *ton-den'* replied: "Since you ask us to work for Sibiri's mother too, we shall do so; if you had asked only for your own mother, we should have refused. We are not your slaves but are and intend to remain free men."

They worked for a fortnight in Mamari's mother's field and then for another fortnight in the field belonging to Sibiri's mother. Then, to express his gratitude, Sibiri's father, old Ménkoro, presented them with a wild ox and expressed a wish to join the *ton'*. Mamari slyly replied: "Ask my father." "Yes, yes, I know," said Ménkoro, "I was mistaken and I ask your pardon." He was accepted and brought with him Mya-Ngue Dembélé of Dina.

So it was that Mamari's *ton'* continued to acquire slaves; the slaves came in order to have an illusion of freedom, and the weak in order to have protection.

Rivalry between the *flá-n-ton'* of Ségou and Doua

The people of Doua could hardly fail to take umbrage at this prosperity, which was more and more a threat to [33] their domination. Therefore, Kassoum's *ton'* used all possible means to combat its rival, Mamari's *ton'*.

One day Kassoum and his followers sought out Mamari and insisted on an eventual reconciliation between the two groups. Mamari refused. Kassoum tried to stem the current of enmity and offered to take an oath as a guarantee of his good intentions. Mamari stopped him, however, saying: "No, let us not swear. In the first place, I can do nothing without the members of my *ton'* and, secondly, since you are strong and I am weak, an oath
695 between us would have no meaning." Kassoum was insistent, however; while they were talking, they came to a stone well and Kassoum pronounced the sacramental words, ate one half of a kola nut and let the other half fall to the bottom of the well. "That's all very well," said Mamari, "but that only binds you.

*173 If you want to come back in a week, I shall gather my men and we'll try to come to an agreement." So they parted, agreeing to meet in a week to go hunting together.

Mamari summoned the *ton-den*' and told them what had taken place. After some discussion, it was agreed to accept the invitation of the *ton*' of Doua.

On the day set, Mamari and the 400 (1) members of his *ton*' arrived promptly at the rendezvous. The hunt took place near Togou and no incident marred the harmony between the young men. However, on the way back, when the party reached Bignébougou, where Kassoum lived, the latter insisted on having the hunters take refreshment at his house where, he said, everything was in readiness to receive them. Mamari protested that nothing of the sort had been agreed upon and that, on the contrary, everyone was free to do as he pleased. He and his *ton-den*' intended to return to their usual meeting-place, while Kassoum and his men could likewise dispose of their game as they wished. The quarrel became so heated that the village elders rushed up to intervene and reprimanded Kassoum. Then Mamari said to them: "Never mind, no one can take what is in my hand unless he cuts off my [34] wrist. Let the people of Doua keep their game. But if any one of us Ségou people gives up his share, let it be said that his mother slept with a dog. Kassoum came to us of his own volition to seek a reconciliation and we agreed to it in order merely to demonstrate our willingness to live in peace. The present quarrel shows just how much credit should be given to his good intentions."

Mamari set out, accompanied by his followers carrying their game. Kassoum, however, had different ideas. Furious at

---

1. It is impossible to assign even an approximate value to the numbers given by the traditionists since they cannot be checked. The matter of the fine of 80 head of cattle is another example.

*173 the failure of his stratagem, he was anxious to do what he could to mitigate his ill-advised action. He ordered his horse to be bridled at once but, being too impatient to restrain himself, he jumped onto the only half-prepared mount and dashed off to bar Mamari's way. The two men swore at each other, and it looked as if the affair was about to turn out tragically when Kassoum's brother rushed up. Indignant at his brother's conduct and fearing serious consequences from the quarrel, he knocked Kassoum from his horse and punished him severely.

Kassoum wept; Mamari and his followers departed. Summoned by his father, Kassoum had to explain his escapade. "I had only the best intentions," he said, "and indeed, hoping to consolidate our reconciliation with Mamari, I had had beer prepared which I intended to offer to the whole party." "That may be," said his father, "but you went about it in such a way as to put us in a very delicate position. It is my order that henceforth you are to keep out of trouble."

That evening Kassoum, accompanied by most of his followers, went to see Mamari. He apologized on the pretext of a misunderstanding and begged that a new hunt be organized to mark the end of all these regrettable incidents. "Very well," replied Mamari, "but let us agree in advance as to where we shall set up our kitchen on the return." "Your choice will be ours," said Kassoum.

The hunt took place in the vicinity of Doukounna. On the return trip, Mamari brought up the rear. When they reached Doukounna, the village of the dyala-tige Sibiri-ba, the latter tried to force Kassoum and his people to stop there to do their cooking. Kassoum refused and a quarrel began. Someone informed Mamari, who ran up and sternly rebuked [35] Sibiri, forcing him to give up the idea. For the moment all was calmed down and it even seemed as if the good-will on both sides might be sincere. The two ton' remained separated but maintained a certain amount of comradely contact.

These events did Mamari no harm, and the composure he had displayed, no less than his qualities as an adroit politician, constantly brought new members into the ton'. So it was that the people of Banan-koroni, who had reason to complain of the people of Doua, prevailed upon oldMénkoro to propose them as proteges of the ton'. However, Mamari was not willing to put

*173 himself into the position of being in open conflict with the people of Doua, since he felt that he was not yet ready. So he simply sent back the following answer: "Let anyone at Banan-Koroni who desires to join the ton' present himself, and the members will decide." Six men from Banan-koroni were admitted under the sponsorship of Ménkoro.

When winter was approaching, Kassoum asked that a field be cultivated for him. Mamari persuaded his ton' to cultivate a field for his mother and for fodder for his own horse, a second field for Kassoum, and a third for Sibiri, the dyala-tige.

Old fa Séri, on learning of this decision, said to the other elders: "Our young men, who do nothing for us, who obey us only when they feel like it and who help themselves from our granaries to provide their beer, are now going to spend their time working on fields from which we'll not get a single grain. Don't you think we'd better put an end to this state of affairs?" An old marabout interrupted: "The boys are entitled to use their two free days, Monday and Thursday, to do whatever they want." This opinion was heeded and the young men were left in peace.

The harvest was very abundant and Mamari, particularly, had a great deal of millet. He divided it into two equal piles and, having called his father, said to him: "Here is the result of my companions' labor, and I am giving half to you. However, it must not be forgotten that those who have provided our food are not our slaves but rather, free men, [36] to whom we must show gratitude and generosity. Therefore, from this day forward, you will send to the ton' 10 gourds of couscous and 20 jugs of beer. Have no fear that you will lack for food. I need only give the order and every granary and every field will be pillaged."

The old man departed, delighted to have a son who paid such deference to his old age. However, either because of an excess of joy or for some other reason, he died soon after, and Mamari congratulated himself on having escaped his father's curse (1).

[172]

1. He built a house in the Djenné style at Ségou-koro, of which I have seen the last remaining vestige,

*173 consisting of a rectangular pillar
[172] worn away by the rains.

[765] According to custom, the members of the ten' settled down in front of the deceased's house for a week, singing, dancing and generally carousing in the usual way.

When this traditional period was over, Mamari asked them
to enclose his father's and his mother's houses within a single
wall. They set to work and built a wall with only one door,
[622] over which they placed the pyramidal ornaments used only for
chiefs' doorways. Within the enclosure they left the existing
division in two parts, and it was henceforth understood that the
part formerly occupied by Mamari's father would be reserved
for people from Doukoumna when they wished to stay in Ségou.

Kassoum was determined to show that he had been properly brought up and knew how to return courtesy; so, one day, he invited Mamari to a drinking party, planned especially in his honor. Mamari accepted and, on arriving, found that Kassoum, from impatience no doubt, had started the celebration so far ahead that he was already dead drunk.

According to the usual custom, Mamari ordered one of the
[273] ton-den', as it was his duty, to taste the dlo first (2). Lacking
a utensil in which to pour a small quantity of the beer, the
taster sipped from the crock itself. Kassoum jumped up in a
fury, crying out that the ton-den' was a disgusting person, and
[37] broke a gourd full of beer over the fellow's head. In turn,
Mamari became angry at Kassoum, whose manners struck him
as coarse and intolerable. Then, after much invective on both
sides, Mamari left the place to return home. Kassoum took up
his bow and arrows and set out after Mamari. However, since he
was slowed down by his drunkenness, he could not go far and his
arrows missed their mark. Mamari returned to Ségou and, for
the first time, installed himself in his father's house.

2. A precautionary measure to guard against poison.

*173 Once his drunken fumes had dissipated, Kassoum was seized with remorse and sent his friends to apologize to Mamari. As that move failed, he fined himself 100 jugs of beer and swore that he would prevail upon Mamari and his *ton-den*' to come and drink with them. However, all his advances were received with a categorical refusal: "The first arrow has been shot and all is over between us," said Mamari. Then Kassoum decided to resort to intimidation and force. He set forth, followed by a band armed with arrows and spears, to surprise Mamari, but found the latter's house abandoned.

Meanwhile, Mamari had been forewarned and had had the trumpet sounded to summon his *ton-den*'. He told them what had happened and his actions were approved. Kassoum, who had had to return home after six days of waiting and maneuvering, was put into chains by his father, who was furious at his behavior. Kassoum nourished an implacable hatred toward Mamari, and that is why, when winter came, he and his followers went to Si-do, near Ségou; they settled down there and did everything in their power to prevent Mamari and his people from cultivating their fields. This was a waste of time, however, since the young men did all the work at night. This state of affairs persisted for a year.

Then Mamari once more appealed to his sister. He went to Dina in order to bring back some help. Just at the time he arrived, his brother-in-law died and he was forced to prolong his stay without getting more than promises. After three months' absence, he returned to Ségou and called together the *ton-den*' to tell them of his efforts. On their side, they told him that the situation was no longer endurable; the impossibility of [38] getting the field work done was reducing them to poverty. After careful consideration, it was decided to appeal to the people of Doukouma and Banan-koroni to intervene with Kassoum and persuade him to put an end to hostilities. However, Kassoum held to his claims and Mamari continued to refuse to comply.

At this point, under cover of a dark night, Mamari and his men went to Si-do, destroyed the stockading erected by Kassoum's followers and carried off the wood to their *ton*'. The

*173 next day Kassoum and his party returned in broad daylight to reclaim the wood and destroy the buildings belonging to Mamari's ton'. This resulted in a fight, during which one of Mamari's followers killed a man in Kassoum's party. The latter retreated with his people, carrying off the body of their companion.

Kassoum's father now recognized the gravity of a situation which he had so far regarded as childish horseplay and, to avenge the murder of one of his subjects, swore to kill Mamari and ten notables of Ségou, Doukounna and Banan-koroni. He at once sent an order to the ton-den' to turn over Mamari and the murderer to him. "Never," replied the young men, "will any of us agree to arrest one of our comrades. We shall never hand over Mamari, either. Let the chief of Doua come and get them."

At this very moment, Mamari's sister, Sana-ba, arrived at Ségou. According to custom, the eldest son of her late husband was bringing her back to her family in order to obtain permission to marry her. She was escorted by 300 armed men, who were supplied with two pirogues filled with arrows and an ample quantity of spears. Mamari prevailed upon Sana-ba to persuade her escort to enter the ton', along with the Bambara chiefs from the left bank of the Niger who had come to Ségou to pay their respects to the widow of the powerful chief of Dina.

With all this support, Mamari now felt competent to deal with the people of Doua. For this purpose he built stockadings between Fa and Si-do; a month later he was attacked by the people of Doua, but he easily repulsed them and took the offensive. The enemy was dislodged successively from Doua and Bignébougou, where Kassoum was killed, and from Togou, where Damfé was killed. The vanquished took refuge with Mamadi Boaré at Kirango, where they were besieged by Mamari's ton-den'.

[39]

The Kouloubali

(1660-1735)

Mamari, called Biton, and his Descendants ([illegible])

Mamari, called Biton (1) (1660-1710). As his power

1. The name Mamari, among the

*173
551

1. The name Mamari, among the Bambara, is the equivalent of Mohammed. It is a common given name, even among pagans; the *dyeli* Karé Tammoura, perhaps because of his own conversion to Islam, used the name Mamari more often than the more common Biton. The cognomen Biton, is a hybrid adopted by the Peul as an equivalent for *ton-den'*. The same personage was formerly called *fa Tigi-ton'*, which also indicates Peul influence and which is, on occasion, shortened to *fa Tigi*, rendered by some who misheard the original as *fo Tige* and also *fo Tinye*.

[177]

*173 increased over his people, Mamari felt the stirrings of ambition grow. The defeat and rout of the people of Doua gave a definite orientation to his projects for domination. However, there was one thing he needed to carry out his plans: an army completely under his control.

As a start toward carrying out his designs, he sent a message to the people of Doukoumna and Banan-koroni, his oldest and most faithful allies, with a request that they send their elders to him on a permanent basis to form a council which he would consult on all appropriate occasions. The elders agreed to remain with him during the dry season, but they insisted on returning home in the winter to look after their own affairs and those of their people.

While these negotiations were proceeding, the young men of Doukoumna and Banan-koroni were fighting around Kirango on Mamari's behalf. When the latter could not overcome the elders' resistance, he resolved to use force (2). He caused a deep well

2. With the assistance of his new partisans, the people of Dina and those from the left bank of the Niger.

*173 to be dug in the courtyard of his house and then summoned the recalcitrant elders, ostensibly for consultation on urgent matters. When they had arrived, Mamari told them that he wished to interview them two by two in order better to know their opinion concerning the questions under consideration. The elders refused. Then, at a sign from Mamari, [40] men who had been posted at hand for the purpose hurled themselves upon the elders, massacred them and threw their corpses into the well, which was then sealed up. It is said that there were 740 elders and also that, since that time, people from Doukounna and Banan-koroni who reach Ségou in the evening never spend the night there.

Now deprived of their rightful leaders, the people of Doukounna and Banan-koroni were henceforth at the mercy of Mamari. He recalled the column from Kirango and, as soon as it had arrived, he summoned the young men of Doukounna and Banan-koroni. Without giving them any explanation, he ordered [308 567] them to wear their hair in the fashion of the *ton-dyon'*, i.e., to have their hair shaved off except for two locks at the forehead and another at the nape of the neck. The young men protested that they were free men, but Mamari told them: "Your elders are buried here because they persisted in acting like free men, and there are now only women and slaves in your villages." When they were told what had happened in their absence, the young men realized that any resistance was out of the question; so they submitted and went to swell the numbers of the *ton-dyon'*.

This bold act gave Mamari a permanent army and he was so well aware of the extent of his success that his pride was already openly displayed. "The Dyémé-ka-dougou," he said, "extends from the Mindaka watercourse to that of Sitadougou. On the other bank of the Mindaka, the country belongs to the people of Doua. Let it be well understood that you are either on their side or on mine. We shall no longer eat groundnuts in the *ton'* together, nor drink our rounds of *ton'* millet beer. I am the son of Allah and henceforth shall drink only a king's beer in a royal cup. Let those who want to drink with me remain, and all others depart. From now on, the only free men are Nyé Tyétigi of Banan-koroni and Mansa of Banamba. All the rest are my slaves. Therefore, let each village send me 100 men to make up my personal guard."

*173 All of these confusing events, however, did not fail to arouse resistance. The people of Doukounna and Banan-koroni, though unable to fight openly, nevertheless sought to avenge themselves upon Mamari. For this purpose they made common cause with the people of Doua. A man from Doukounna, along [804] with one from Doua who carried [41] 300 gros [gros = 1/8 oz.] of gold, went to Kong to seek an army to fight against Mamari. The people of Kong (1) agreed and provided a well-organized

1. Native traditions tend to center around great empires, capitals or paramount chiefs.

I have indicated that the origin of the Kouloubali, who founded the empire of Ségou, is connected with ancestors said by some traditionists to have come from Mandé and by others to be descended from a hunter from the east (see p. 30).

These two contrasting traditions reappear in connection with the siege of Ségou. The version given in this tale is also found in the Notice historique du Royaume et du Cercle de Ségou [Historical Note on the Kingdom and Circle of Ségou] and in Autour de Kita [Around Kita], p. 38. At this period Kong had an extensive sphere of influence, and M. Binger has shown how, by entirely commercial and peaceful means, it managed to acquire far-flung authority. Therefore, this version of a Kong army coming to attack Ségou and, on being defeated, retreating to the west and occupying Banan and then Mandé, seems suspect, because it is out of character with the practices of the Dioula [Diula] of Kong.

*173

Monsieur Delafosse, who thinks the story improbable, has a different explanation, based on traditions concerning the other center, Mandé.

force, which laid siege to Ségou. However, when the assailants failed to take Ségou, they gave up their plan and, heading east, captured Bala. Encouraged by this success, they returned to Ségou, which they besieged for nine months until Mamari's fall seemed imminent. But at that point the chief of Dina managed to break through under cover of darkness and to bring in provision. Thanks to this help, Mamari successfully attempted a sortie. The Kong forces were taken by surprise and cut to pieces. They abandoned a large number of rifles of the blunderbuss type, the first firearms ever seen in the region.

As a result of this event which, instead of lessening Mamari's prestige, actually consolidated his authority, he asked the chief of Dina to leave behind his armed force as a permanent arrangement. However, the chief refused, saying: "My men may remain here during the dry season, but they must return home in the winter to till the fields." Mamari was not satisfied and he maneuvered to such good effect that when the chief started home with his men, the latter abandoned him one by one. Enticed by Mamari's promises, all returned to enter his service and submit to him as ton-dyon'. The chief of Dina was very angry and bitterly reproached Sana-ba for her brother's conduct; indeed, their insults went so far that there was no possibility of [42] a reconciliation. As a result, Sana-ba fled, taking with her 400 men whom she left at Kégné while she herself proceeded to Ségou.

After having thus subdued a possibly troublesome ally, and having no further anxiety with regard to the Kong people, Mamari resumed his struggle against Kirango. He dispatched his son Ba-dyi to besiege the village, but the son was defeated and killed. Mamari vowed that his vengeance would be terrible and that nothing would avert the evil fate planned for his hitherto invincible enemies. Yet for the moment his threats remained empty, for he agreed with his followers that it would be very dangerous to seek to conquer at any price.

*173 In order to occupy his time, he undertook a preliminary organization of his domain. So as to preclude any surprise from the direction of Dina, he put his slave Mari, with 1,000 men, in charge at Tyi-la-bougou, opposite Niamina.

At that time, the Peul, who were centered near Ségou, were under the authority of one of their own people, named Dotyé Bari, himself a vassal of Mamari. One day Dotyé learned of the arrival of a large company of migrants from Bani-n-ko under the command of a certain Dyoba Fonba. Dotyé sent word to Mamari, who told him to keep an eye on the newcomers. However, Dyoba soon complained of Dotyé and demanded to be put under the authority of the chief, Tyéma Mamari. Mamari refused, and Tyéma, impressed by this show of defiance, left his village to come to Ségou, where he settled at Tyéma-bougou.

Dotyé had died in the meantime, and Mamari sent for Dyoba and set him up in the deceased's place. He summoned the dead man's son Bougari, under pretext of establishing the boy near him; actually, he required Bougari to furnish him a force of 1,000 men. These he considered as his own slaves and belonging to his mother, Sounou Saro; they were put in charge of Nankoroba Nzangué Dyallo.

Further, he sent his son Bakari -- a younger brother of Badyi -- to Djenné to be educated in the Moslem religion. Still another son, Dé-koro, was established at Ségou-bougou at the head of 6,000 Samaké, who had come from Ténétou. To this contingent, Mamari added another 12,000 men commanded by Kanou-ba-nyouma.

[43] He finally decided that the moment had come to march on Kirango. The expedition was completely successful. Chief Mamadi Boaré was killed and 16,000 captives fell into the hands of the victor, who distributed them among the chiefs who had aided him. One of these, Ngola Ké-ba, received 1,000 men, while four groups of 400 men each, under the over-all command of _fa_ Sira Taraoré, were forced to work in the fields at Farako. The old man, Ton-massa, received as his share 9,000 men and he settled at Kohin, south of Ségou-bougou, while a certain _fa_ Sira took possession of Ségou with a following of 400 persons. Finally, the young _sofa_ were put under the orders of

*173 Dyoni Kolé, that is, a man named Kolé who came from Dioni.

Mamari himself had no fixed residence and his presence in a vicinity was always a source of anxiety for any who might cause him displeasure. It is said that one day he told the almami Ousman, who was somewhat a friend of his: "I intend to establish my home at Ségou-Sikoro." "Fine! (1)" said the almami, who was ready to leave when Mamari shortly afterward added: "On second thought, I'd rather build a 'New-Ségou' (Ségou-koura)." "Fine!" repeated the almami Ousman. However, Mamari again changed his mind and summoned the almami Ousman Dyiré in order to hand over to him the responsibility for affairs at Ségou-Sikoro. Since the old Moslem had no wish to get too intimately involved with his turbulent neighbor, he declined the honor and invented an excuse for a trip to Togou.

[195]

Around this time, the Somono Tyéro people, migrating from the Bobo country, arrived at Ségou and obtained permission to remain there. Soon after, the people of Kong, who had recovered from their defeat, appeared on the frontiers of the Ségou country. Since they were warlike and well armed, they were redoutable adversaries and indeed they very nearly routed Mamari. It is said that in the decisive battle Mamari owed his victory solely to the Somono Tyéro people who routed the Kong forces by causing a swarm of bees to attack them.

[44] Old Ton-massa died during this engagement, and Mamari felt the loss all the more keenly because the soothsayers he had consulted predicted that his own run of good fortune would vanish with the old man. However, he arranged for a replacement for the deceased old man and gave his duties to a slave whom he bought from the Somono people at Néré-koro.

In that same year he modified the tax which had been required of his followers and proclaimed that in future instead of the di-songo, they would only have to give him the grain which

---

1. This expression "a nyana" is an evasive answer, often used to hide hostility. See many examples in Chap. 7 following.

*173 remained in the dust at harvest-time. This levy was called the nyon' dyu.

At about the same time he acquired two new slaves who were destined to play an important role in the country: one is still known as Nzan Fato and the other was Ngolo Dyara. The first was enslaved for stealing a beehive. Here is the story of the second:

Ngolo Dyara was born in the village of Nyouanna (1), which paid an annual tribute of millet to Mamari. Now, when Ngolo's father died, his uncle Ménkoro had to go to Ségou to make the payment because of the child's extreme youth and, under the pretext of initiating the boy into the proceedings, he took the child with him. As was his usual custom, Ménkoro stayed at the home of Danté Balo, the wife of a blacksmith who was a client of Mamari. Then, also according to his usual habit, he visited all of the dives and gambling-houses, where he managed to lose 130 of the 160 loads of millet intended for tribute. Thereupon, he sought out his hostess and told her that during the night some "young men" had robbed him, and he bemoaned the reception he was likely to get from Biton. The good woman allowed herself to be fooled and agreed to appease the master's wrath by offering Ngolo Dyara as substitute for the missing tribute.

When Mamari heard that the payment from Nyouanna was insufficient, he fell into a towering rage and, to punish this lapse, which occurred every year, he swore to sacrifice Ménkoro to his idols. But Danté Balo intervened and, by clever maneuvres, persuaded Mamari to change his mind and, for this time, to accept [45] young Ngolo Dyara as the balance of the payment. Mamari received the child as a hostage and gave Ménkoro 20 days to buy him back for 300 loads of millet. If the time ran out without any payment from Ménkoro, the child would belong to Mamari. This arrangement was agreed to, and Mamari ordered his blacksmith, Sdir-bilé, to proclaim the terms clearly so that, if the occasion should arise, no one could criticize him for enslaving a free man. Thereupon, Ménkoro went home alone.

---

1. "Niola, near Bogué, across from Niamina" (Delafosse, Vol. 2, p. 227).

*173 Mamari was soon charmed by the wide-awake countenance and quick intelligence of Ngolo and made him a boon companion and sharer of all his secrets. He gave him the key to the room where his idols were kept and taught him the rituals of their cult. He presented him to his wives, dressed him in red (1) and, in short, treated him as the most cherished of favorites.

A year passed before the people of Nyouanna put in an appearance; Mamari asked them if they wanted to claim the child. "No," they said, "for not only has the time-limit passed, but also we still have not the means to pay the tax agreed; when he accepted your proposal, Ménkoro knew perfectly well that he could never carry it out. Besides, the child has by now acquired habits from living among you which would make it unbearable for him to live with us." Mamari ordered the blacksmith to inform everyone of these statements so that it would be well known that Ngolo Dyara was now his slave both in fact and by law.

By dint of living so intimately with his master, Ngolo soon learned all Mamari's secrets. He knew, for instance, that on certain days Mamari bathed in water which had the virtue of strengthening and increasing his authority. It occurred to him that he could no doubt acquire a bit of this power if he bathed in the magic water. So every time the master took a bath, the child stood beneath the gutter that carried the water outside so as to share the wonderful effects of this magic practice. [46] But Mamari had noticed traces of footprints beneath the gutter on

---

[822] 1. Scarlet is a favorite color among the Sudanese. The tale here recounted shows three examples of this fact: the foregoing about Ngolo, another about Tonmassa, and still another about Deni-ba Bo. The last two examples would seem to indicate that red was especially reserved for chiefs. A similar conclusion is to be reached from analogous facts at Malli set forth by Ibn Batouta.

*173 several occasions and suspected the truth; so he used a trick. He pretended to take a bath and, while the water was running out, looked outside. He saw the child beneath the gutter and struck him with his iron-tipped stick.

Ngolo was terrified and ran off to tell his story to Danté Balo. The good woman interceded with Mamari and persuaded him to relent. Nevertheless, Mamari decided to separate from his favorite and summoned Kolé, the leader of the *sofa*, to whom he entrusted the child, saying: "Here's a bad boy; don't be afraid to make him work hard."

One day, when he had taken the *bila-koro* (1) in his charge to the field to cut fodder, Kolé sat down in a place called *Sirani-n-tu* (lit., forest of the little baobab tree) after the small baobab tree which grew there in the middle of a grove. The spirit of the place, who lived in the baobab tree, appeared to Kolé and said: "If you come tomorrow to this same spot and if you bring me a white ram, a white rooster and some rice, I will make it possible for you to become king of Ségou." Now Ngolo, who was wandering about nearby, had seen and heard everything. When he returned to Ségou he ran weeping to Danté Balo; when she asked what was the matter, he answered that a spirit had threatened to kill him unless he sacrificed a white ram, a white rooster and some rice. "Ah well," she said, "Cheer up, here's a white rooster and some rice, and you can take the ram from the master's flock. If anyone is surprised at seeing you with a ram, just say that I gave it to you." He followed her advice and arrived on time at the rendezvous, which Kolé, on the other hand, had forgotten.

After killing the rooster and the ram, in accordance with the rites with which he was familiar, and offering the rice, Ngolo saw the genie appear, while a distant voice said: "Ah, it's you, friend Kolé (2), I'm glad to see you obey my orders and, in return,

---

[56 / 291] 1. A young boy old enough to be circumcised and wearing a piece of cloth called *bila* between his legs, instead of trousers.

2. It is interesting to note that the genie

*173

> mistakes the identity of the person honoring him and takes him for Kolé. This is a fact worth noting because it often occurs. Do the native tales use this means of expressing some sort of inferiority? If so, what sort of inferiority?

I promise that you will be supreme ruler of Ségou on the sole condition that [47] you bring me the same offerings at the same time every year." Such was the pact which made Ngolo's fortune.

The next day a young sofa, to whom Kolé had confided his adventure, asked him if he had fulfilled the wishes of the genie of Sirani-n-tu. The absent-minded Kolé at once set out and, when he had completed the sacrifice, the genie, astonished at being disturbed, asked what he wanted. On learning that this was the real Kolé, the spirit told him that he had been outwitted by a cleverer person, who had been entrusted with the secret of success. However, to reward him for his effort, the genie promised Kolé great wealth and an exalted position if every year at the same time he would come and make the same offering.

Kolé left in a rage. Certain that only one of the young sofa could have overheard the secret and made use of it, he summoned all the bila-koro and threatened to give each of them 100 lashes unless they denounced the one who had dared to impersonate him. Ngolo was accused, but he denied the charge emphatically. Yet when Kolé required him to swear by the well, he refused. So Kolé went to Mamari and told him that Ngolo's conduct was absolutely intolerable and that it was becoming impossible to keep him. Mamari insisted, in vain, on having some exact details and finally ordered Kolé to assign Ngolo to the group of sofa whose special duty was to care for the horses, until such time as it would be possible to get rid of him.

An opportunity soon arose when Mamari was sending a caravan of 240 slaves to Djenné to be exchanged for horses. The marabout of Djenné, who housed the caravan, demanded a slave of his own choosing in payment for his hospitality. Charmed by Ngolo's intelligence and youth, the marabout's choice fell on him. This new master treated Ngolo well, but forced him to

*173 embrace Islam. Ngolo made rapid progress and soon knew half the Koran by heart; at this point, having made a plan, he one day presented himself in tears to his master, the marabout. The latter kindly inquired the cause of his distress, and Ngolo told him that, though born free, he had been given in pawn to Mamari. He further said that he had just heard his parents had arrived at Ségou to ransom him and that, not knowing where to find him, they would certainly leave for good, and henceforth [48] he would have to remain a slave. The marabout told him: "Since you now know most of the Koran by heart and can practice our religion properly, you are no longer a slave. I give you your freedom; return to your country whenever you like."

Ngolo set out at once for Ségou, where he received hospitality from a marabout to whom he recounted his story of wandering, concluding with the information that his master at Djenné, of his own accord, had set him free as a reward for his zeal and assiduity in practicing the Moslem religion. Ngolo begged his host to intercede with Mamari for his pardon. The marabout gave him an amulet and told him to mingle with the young men guarding Mamari's door, so as to have every chance of getting near the master who, under the influence of the charm, would readily pardon him.

Ngolo followed this advice. Very early one morning he went to the vicinity of Mamari's house and, having concealed himself among the women working about the place, he was able to stretch out among the guards without attracting attention. He was pretending to be asleep when the master left his hut, recognized him, struck him with his iron-shod stick, and asked what he was doing there. Once more he recounted his adventure in its most favorable light and, with the marabout's amulet clutched in his hand, implored Mamari's pardon.

Mamari summoned Kolé and turned Ngolo over to him. Very soon, Ngolo sowed discord among the young men. Two factions were formed: on the one side, Kolé's partisans, and on the other, Ngolo's. Each day fights broke out at the slightest pretext. Kolé was at his wit's end and went to seek Mamari, saying: "It's impossible to keep Ngolo, for he is undermining my authority by his intrigues." "Be patient, as I am," replied Mamari, "and I shall do for him so thoroughly that he'll never return."

*173 When Sidi El Mokhtar (1) arrived on a courtesy visit to Mamari, the latter, out of politeness, gave Ngolo to him [49] by way of a favor. Sheik Sidi El Mokhtar soon saw through Ngolo and was well aware that he would get no profit from the boy. So he told him: "You are destined for the highest places and your sons will rule Ségou. I leave you free to pursue your destiny; in return, however, I demand that you pledge yourself, as of today, to pay me a reward as soon as you occupy your predestined place." Ngolo refused to undertake any obligation and Sheik Sidi El Mokhtar, unable to overcome his resistance, let him depart all the same.

When he reached Ségou, Ngolo took refuge in the home of the Somono, Baré Tyéro, who took him to almami Ousman. The latter turned him over to Mamadou Kané, who presented him to Mamari. Mamari welcomed Ngolo as one welcomes one's fate. Again he sent for Kolé, but the latter was unwilling to cope with Ngolo and suggested a way to get rid of him. It happened that the post of tax-collector at Ségou-Sikoro had been vacant for some time; like his predecessors, the last incumbent had died of poison, and no one was anxious to take on the job. The irrepressible Ngolo would hardly fail to come to a prompt end in this dangerous post.

Contrary to expectations, however, Ngolo turned out to be a very able politician; not only did he have no trouble with the taxpayers, but he acquired many sincere partisans with the result that, at the time he married the wife who was to bear his son Boubou-dyé, there were more than a thousand people living under his authority.

Mamari had heard of a very learned marabout, named Karamoko Abdoullahi Diari, who lived at Niamina and he resolved to send for him. Kolé advised him to entrust the delicate

---

1. Sheik Sidi El Mokhtar was born around 1730 and died around 1811. There is therefore an error in the story -- an occurrence too frequent in native traditions to be worthy of emphasis.

*173 mission to Ngolo on the theory that the impetuous and violent young man could hardly fail to anger the old man, who would shortly do away with him by means of the occult practices known to marabouts. From the beginning, however, the old man realized that this was a man destined to accomplish great things; so he welcomed him kindly, gave him amulets and made him promise to follow his advice most exactly. Ngolo asked him to use his influence to effect a reconciliation with Mamari. So the old man warned Mamari that he could expect good fortune only if he lived in constant association with Ngolo, who "had luck."

[50] From that day forward, Mamari had Ngolo about his person. He added a thousand men to those already following Ngolo and, so that the latter could support his followers suitably, he gave him cattle and sheep. He had Ngolo live at Ségou-koro, and although the young man kept the name Sikoro Ngolo, he was 793 also given the title of *dyenfa*, meaning high priest of his idols. Of these, the two most important were *ba Kango-ba* and *na Ngolo-ko*, which he had brought from Kaminiadougou.

Further, the old marabout of Niamina told Ngolo of a young girl in the village of Diaba destined to bear children who would have a brilliant future. On the basis of the learned man's advice, Ngolo asked the girl's hand in marriage; but she was an only child and her parents were no more anxious to lose her than she was to leave them. Mamari intervened, and upon his order the girl was handed over to Ngolo, while her grieving parents were recompensed with a gift of ten slaves.

In any case, Mamari's prudent friendship for Ngolo by no means blinded him to his own interests. He extended his influence less by warlike means than by very clever diplomacy. When he had settled in the Ségou area, the country between Dina and Kirango had about 40 cantons which were independent of each other. He was skillful enough to impose himself gradually as overlord by making use of the dissensions which divided them. By means of adroit diplomacy and an occasional successful campaign, he managed to gain control of the whole area.

In order to eliminate the barriers which tribes or families stubbornly maintained between one another, he moved whole groups of populations from place to place. Or he would establish

*173 troops or allies in large numbers at points where loyalty seemed doubtful. So it was that he put the faithful Kolé in charge of 6,000 men and gave command over 8,000 to his dependent, Allah-n-siré. These two chiefs were likewise at the service of his favorite wife, the mother of his head son Ba-dyi. In the same way, Tyé-kouma took up a position at Nango with 6,000 men, while another force of the same size and under the command of Ngolo Ké-ba occupied Sama in order to prevent an attack by the Kouloubali of Mémana [51] and Sori-bougou. Mamari himself settled at Massala, opposite Sama, for the same purpose. Bani-n-ko was held in check by 9,000 people camped at Gassi and under the command of Kafa-dyougou.

In the direction of Dina, fears which, at a given moment, had been very real, were now at an end. On the death of the chief, his 70 sons were unable to agree, and the slaves, finding no master among them, offered themselves to Mamari. He divided them into three groups: a group of 6,000 men settled at Foni under the command of Si-dloki entrusted with the mission of keeping watch over Bo-dyan, chief of Simo-na; a second group numbering 4,000 men was under the leadership of Fané and stationed at Massala to guard against hostile action from Konka-dougou; and a third group numbering 3,000 went to Guén-ni, in the Kala area near Ségou, to oppose a possible invasion attempt by Nyarankan, chief of Diani.

To the east, the frontier required careful watching. The Doua people had more or less reoccupied Kirango and were once more a threat. A column directed toward Togou and commanded by Allah-n-siré was repulsed and Allah-n-siré himself was killed, but when Ngolo was sent out to retrieve the loss, he came out the victor. As a reward, Mamari put him in command of his personal guard of more than 3,000 young warriors. Thereafter, Ngolo was constantly on duty in the room adjoining Mamari's.

A certain Kelli-Kelli Dinké had quarreled with his brothers and asked Mamari to intervene by force of arms in the dispute. Mamari agreed to go himself, then yielded to the ton-masa's request to take his place. The ton-masa was roundly defeated and Mamari was about to go himself when his son Dé-koro insisted on being given the responsibility. When Dé-koro reached

*173 the scene, he grossly insulted the ton-masa, calling him a coward and an incompetent, and had him given 40 lashes in front of the troops. Then Dé-koro took the village and killed the chief.

On his return, the ton-masa complained bitterly to Mamari of the shameful treatment accorded him and he made no secret of his hatred for Dé-koro. On the advice of a friend named Dyon-kolo, Mamari commiserated with the ton-masa and assured him that in the future no one [52] would fail to show him the respect due him. In token of his regard and esteem, he gave [804] him 150 coudees [a measure of ca. 50 centimeters] of silk to make a bila and a belt such as were worn by the sofa; the ton-masa alone had this regalia. Finally, in order to obviate any possible discord between the ton-masa and Dé-koro, Mamari acceded to the ton-masa's request to be placed in the service of son Bakari, who was pursuing his Islamic studies at Djenné.

Soon after this serious event, Mamari died (1).

1. His dominion extended on both banks of the Niger from Dina to Timbuktu.

*Around 1670, Er Rachid, the first filalien or hassanide sultan of Fez, in the course of an expedition into the Sous, besieged the mosque of a Moslem religious officiant named Ali ben Haidara, who fled to the Sudan and took refuge with the Banmana emperor Biton Kouloubali, whose authority was beginning to extend as far as Timbuktu. Ali offered Biton beautiful women captives of Spanish or Portuguese origin whom he had brought with him. The Banmana prince was so taken with this gift that he permitted Ali to settle at Timbuktu with his family and pupils and promised him protection. Indeed, when the sultan, Er Rachid, in hot pursuit of Ali, encountered the Ségou army between Timbuktu and Djenné in the northern part of Massina, he met with

*173

> flat refusal on the part of Biton to turn over the fugitive. So the sultan returned to Morocco." (Delafosse, Vol. 1, p. 247). "Biton died of tetanus, after having wounded his foot accidentally on a sharp piece of iron." (Delafosse, Vol. 2, p. 286.)

Everyone who had any connection with the late leader brought or sent a contribution toward the funeral ceremonies. There were enough cowries to fill six warehouses, and Dé-koro decided to keep for himself their distribution to help the needy. The *ton-masa* opposed this view and wanted to have the treasure distributed among the poor at once. This disagreement, basically due to the enmity between the two men, might well have degenerated into active hostility, had Bakari's arrival not offered a diversion.

Bakari summoned all the slaves and in their presence picked up a marvelous piece of material, which had been given him by the marabouts of Djenné, and cast it into the air. It hung miraculously suspended over Bakari and his brother Dé-koro, who was seated beside him. Then the *ton-masa* tied a band of cloth around his own neck, humbly handed the ends to Bakari and said: "By the will of our master, I am and shall remain your slave."

On the fortieth day, Bakari was named chief. He settled [53] at Ségou-koro, while his brother Dé-koro withdrew to Ségou-bougou.

Bakari (1710) (1). Bakari's first act was to seek all those who had contributed nothing to his father's funeral. Among these were the people of Ki[illegible]go under Mamari-ntyéni, Boaré,

---

1. Dr. Quintin and M. Delafosse consider that Biton's immediate successor was Dé-koro and that Ali or Bakari was only an unimportant intermediary between Dé-koro and Ton-Massa.

*173 and Bakari decided to attack them. The ton-masa intervened, saying: "They are poor and they have not yet recovered from the disasters inflicted on them by your father. I am sure that it was due to no lack of good-will that they failed to fulfill their tributary obligations. In any event, it would be better to hear them before taking action against them." Bakari agreed and called upon Mamari-ntyéni for an explanation. Mamari-ntyéni refused to appear and sent the following reply: "I could not send cowries because neither I nor my people have any. Besides, why harry me for cowries I failed to send when you cannot agree what to do with those you have?"

This impertinence exasperated Bakari and he set out at the head of a large force to attack Kirango. However, by the time he had reached Dyam-bourou-bougou, his anger had subsided and he sent envoys to Mamari-ntyéni to invite him, once again, to make profession of loyalty. Mamari-ntyéni refused and swore that if Bakari continued to march on Kirango, he would cleave his skull from forehead to neck. Ignoring these threats, Bakari laid siege to the village and surrounded it for three months. Then, with winter at hand, the slaves murmured: "We've spent the whole dry season here and have obtained no decisive result in spite of our efforts. The winter season won't be any better -- in fact, worse -- and our fields will be producing nothing. We'd better go home."

These complaints came especially from Dé-koro's slaves, instigated by their leader, Kanou-ba-nyouma, and by their hatred of the ton-masa, their master's enemy. One day Dé-koro's people departed, but Bakari, though reduced to his own forces, was no less determined to take the [54] village. However, the difficult situation in which he found himself, the demoralization of his people and the dissatisfaction they displayed even about him, all conspired to undermine his strong constitution. He fell into a malady, brought on, it is said, by poison and sorcery. Unable now to lead, he returned to Ségou, where he died shortly after. Bakari reigned for six months; his funeral ceremonies were celebrated in the usual manner.

Dé-koro (1711-1736). On the fortieth day, Bakari was succeeded by his brother, Dé-koro.

*173

From the beginning he was at odds with the ton-dyon', who since Mamari's death, had been divided in their allegiance among the probable contenders for authority. And then, Dé-koro's refusal to live at Ségou-koro created such trouble for him that he had to yield, at least on the surface, for after all he came only to the Monday and Thursday meetings.

Since the situation was rapidly becoming untenable, he decided to assert his authority through force and terror. In order to break the resistance of the ton-dyon', he decided to get at them through their leaders. To Bilali, one of his father's oldest slaves, he said: "What have you got to talk about? You're nothing but a lazy good-for-nothing; you're the last one at work while I myself am there at dawn." A little later, in an access of insane rage, he had the old man seized and nailed to a baobab tree. The wretched corpse remained there all winter, horrible evidence of the anger and power of the master. The ton-dyon' trembled.

The winter season having passed, Dé-koro got together a column which he led against Kirango. However, his efforts were vain and, for fear of being abandoned by his troops, he returned to Ségou. He could not remain there long, for discontent grew around him and threatened to bring him ruin. So, after reorganizing his army, he crossed the river and attacked Doroni, a village on the left bank. His forces were unsuccessful and he had to retreat. Along the way his people got out of hand, some wanting to return to Doroni, some to proceed to Ségou, and others intending to take a rest. The last opinion prevailed and so Dé-koro spent a year at Sama with most of his men.

[55] Enraged at his reverses, which he attributed to lack of discipline among his people, he finally got back to Ségou and summoned the four principal chiefs: the ton-masa, Kanou-banyouma, Kafadyougou and Kolé. He told them in a terrible voice: "You no longer want to till the fields or to make war. This must stop!" "You'll get nothing from us," said the ton-masa, "because you treat us badly, and you have no success in fighting because you have no 'luck'." Dé-koro broke off the interview and commanded each of them to send him 60 men.

At Dé-koro's orders, the blacksmith fa Kourou placed each of the contingents of 60 men along each of the four sides of

*173 a square drawn on the ground, and at once the native masons, in Dé-koro's presence, built four walls enclosing the men. (1).

> 1. Raffenel gave a dramatic account of these events with the imaginative license of a griot.

"Thus, I shall live in this room in the midst of my slaves, and they will have no choice but to guard me," said Dé-koro. And the ton-dyon' trembled. Only the ton-masa had the courage to protest, saying: "If I had known the fate in store for my unfortunate companions, I should never have obeyed your orders." "Well," said Dé-koro, "on the day you refuse to obey my orders, I shall make a bench of your body and sit upon it."

When winter came, Dé-koro summoned the leaders of the ton-dyon'. He gave 12,000 mattocks to the ton-masa, 8,000 to Kafadyougou, and 11,000 to Kanou-ba-nyouma. To each he assigned an area to be cultivated since they had all refused to resume the war. Fassoun, Nyé-dingué-dou and Ngolo Ké-ba were left in peace because they agreed to follow him.

The ton-masa refused to cultivate the field assigned him because he wanted to farm near his village, and the two other leaders, assigned to similar work, shared his views. Dé-koro tried to overcome this opposition but, failing to do so, he ordered the ton-masa to go away to take Kirango. The ton-masa agreed and went with his followers to the walls of Kirango, where he was roundly defeated and forced to call upon Dé-koro for help. Dé-koro replied with a formal order to take the village. The ton-masa and his people returned to Ségou of their own accord.

[56] Matters remained unchanged for some time and the ton-masa limited himself to coming to Ségou-koro for the Monday and Thursday gatherings.

The situation was serious and might have taken a turn for the worse at the slightest pretext. Two old friends of Mamari, the founder of the clan, were aware of this. Of their own accord they came to Dé-koro and told him: "This cannot go on; you are heading straight for a catastrophe. Discontent surrounds you and grows worse each day. Agree to receive the ton-masa and have done with

*173 all this." Dé-koro replied: "I'm not responsible -- it is the *ton-masa*." The two old men then asked the chief of Kamana to intercede, but Dé-koro persisted in affirming: "I'm not the chief of Bélé-koro; the *ton-masa* is."

Appeals made to the *ton-masa* gradually brought about a lessening of tension, and one day he finally appeared before Dé-koro. The *ton-masa* knelt down and, improvising a halter from his blouse, put his hands behind his back and bent his head to the ground, saying: "I shall cultivate the great field at Ségou-koro this year."

The *ton-masa* kept his word and six of the slave leaders followed his example. A large area was under cultivation and so the harvest was large. When the millet had been threshed and the master, accompanied by his faithful *fa* Kourou, came to see it, the *ton-masa* cried: "Here is our work! Henceforth we are only farmers and you will have to get along with millet alone." Dé-koro was furious and had his *griot* proclaim that never more would the *ton-masa* touch a mattock and that he was to get his knife ready.

The *ton-dyon'* returned to their respective homes and, when winter came, did no farming. When winter was over, Dé-koro assembled the leaders of the *ton-dyon'* and proposed an attack on Tamani. The *ton-masa* said: "What's the use of attacking Tamani? It's only a village inhabited by the weak Marka people. It would be much better to fight against Nyé-n-tigui, chief of Soroko." Dé-koro agreed. A column started off, only to find, on arrival, that the village had been evacuated: Nyé-n-tigui had been forewarned.

Dé-koro's wrath was terrible. "This is your work!" he accused the leaders of the *ton-dyon'*. "It is you who have [57] warned Nyé-n-tigui of the fate awaiting him. Once more you have betrayed me. Well, be informed that my knife is ready; before too long I shall make use of it on the public square at Ségou and I shall not stop until a stream of blood flows down to the river."

He had a large place prepared for the proposed executions, and the terrified slaves no longer showed their faces in Ségou-koro.

*173 Dé-koro summoned the *ton-masa* and ordered him to assemble the *ton-dyon*' on a certain day, but on that day no one appeared. Thereupon, Dé-koro dispatched a Samaké to warn the slave leaders individually to turn up. They came and he asked them: "Why has no one been coming to the Monday and Thursday meetings for the last three months?" They replied: "You threatened us and we were afraid." He made an appointment with them a week from that day when they were to take an oath with him.

The general assembly desired by Dé-koro took place, but it did not result in the agreement for which he had hoped. The slaves decided among themselves to meet a fortnight later and to take matters into their own hands.

On the fifteenth day at dawn, the *ton-masa* entered Ségou bougou, Dé-koro's official residence. He went to the master's house and entered. There he met Dé-koro who, escorted by his blacksmith carrying a basin of hot water, was about to make his ablutions. Dé-koro had long since ceased to feel secure because the enmity and hatred which he sensed around him gave him no rest. He was afraid to be alone and his blacksmith was always with him. When he saw the *ton-masa* armed, he knew that something extraordinary was afoot and challenged him: "What are you doing in my house at this hour?" The *ton-masa* replied: "I have come to warn you that the hour has come to settle our accounts, for I have not forgotten the lashing you inflicted upon me." Turning to the blacksmith, Dé-koro told him to go and fetch spears. The latter obeyed, but at that very moment the *ton-masa* shot Dé-koro and, when the blacksmith reappeared, he killed him too beside his master. A *griot* named Koum-bilé, attracted by the noise, appeared just as the *ton-masa* was unfastening the piece of goat-skin which contained the chief's 643 amulets and talismans and appropriating the golden axe which was the insignia of command. Koum-bilé cried out and called for help; the *sofa* came up without hurrying. [58] The *griot* identified the *ton-masa* as the murderer, but they listened in silence and then helped him to hide in their ranks, whence he fled to So-finna.

*173

The Ton-dyon'
(1736-1750)

At around two o'clock in the afternoon, the time fixed for the general assembly, all the slaves were present. Unaware of what had happened, they had gathered as planned. Soon after, the ton-masa appeared, bearing a spear, a silken cord and the golden axe; he was followed by a young man. He stopped at the foot of a baobab tree in full view of the assemblage. He attached one end of the cord to his own neck and the other to the young man's; then with his spear he transfixed the young man, who fell down with a cry. The ton-masa seemed to have been dragged down in the fall and everyone rushed forward. However, they found the ton-masa seated on the corpse, his neck free of the cord and in his hand the golden axe, insignia of authority.

When Kanou-ba-nyouma asked him for explanation, he replied: "This is what I have done."

"You did wrong. You broke your promise because we had decided that we would all kill him together. But you acted alone so as to reap all the benefits for yourself."

"No, that is not true. I knew that such an act could not be performed by several men, whereas I was sure that I could carry it off on the strength of my hate."

"That's a lie! You were guided only by your personal ambition and you killed him only to take his place and to get his gold."

Ngolo Ké-ba intervened to say: "This discussion is painful and futile. The past is past, so let us deal with the present. Our master is dead; let us bury him."

Kon Bilali, Kanou-ba-nyouma and Kolé prepared the corpse and buried it. According to custom, the slaves spent seven days before the dead man's door. Kolé told the wives to retire to Ségou-koro and undertook to feed them.

[59] Then the ton-masa sent everyone away and set the date for a general assembly at Ségou-koro a fortnight from then.

Ton-massa Dêmbélé (1736-1740). On the appointed day, all the slaves turned up. Ton-massa (1), dressed in red, passed

1. He henceforth bears the title of his

*173 former function as his own name.

through the serried ranks and squatted against the wall on the spot commonly chosen by Mamari, the founder of the empire.

Kafa-dyougou was the first to come forward, prostrate himself, and say: "I, ni sege ton' koro-ba." All the rest followed suit.

After this marching past, Ton-massa summoned the marabouts and told them:

"Allah will judge between my master and me. Therefore, I don't ask your opinion about what is past, but I should like you to intervene between my brothers and me to make peace."

"The marabouts are conciliators who have nothing to do with our affairs," cried Kanou-ba-nyouma. "We are not having a dispute. Since it was you who did everything, it is you who have earned the command."

"Kanou-ba-nyouma, I have not asked your opinion. Only Kafa-dyougou here is qualified to make an unbiased statement."

"That's all very well," answered Kafa-dyougou, "but the fact is, you don't want to hear the truth."

Addressing the marabouts, Ton-massa said: "If we were to collect all our knives, there is no doubt but that we could find enough leather to make a single sheath. But if each of us wanted to make a sheath for his own knife, there would not be enough leather."

Turning to the slaves, he asked: "What shall we do with the master's wives? To whom shall we give them? Who will take Bakari's wife, who, Dé-koro's?"

Kanou-ba-nyouma interposed: "It's useless for you to bother about such matter. Everything belongs to you and we don't want anything. Is that all you want to tell us?"

"I've nothing to add," said Ton-massa; "I have my own wives and they are enough for me, that is why I thought those among us who had no wives might take the master's."

[60] "There's nothing more to be said, I tell you. So keep everything and we'll see about it later."

*173 "Very well," said Ton-massa, "I'll give you the cowries, you divide them, let's celebrate. We are free and life was made to be enjoyed."

Kanou-ba-nyouma thanked him on behalf of all and asked leave to retire with his companions.

Ton-massa kept with him Ngolo Dyara, Kolé and Na-n-koro-ba Nzan-gué.

He appointed another assembly for a fortnight later when offerings would be made to the dead and to the idols.

Everyone was prompt at the assembly.

Ton-massa said: "Now then, where shall we begin? With the dead or with the idols?"

"You ask our advice?" cried Kanou-ba-nyouma. "You paid no attention to our views when you killed our master! You wanted to be chief -- now exert your authority!"

"Very well, we'll begin with the dead," said Ton-massa.

[782] He sacrificed a young man to the shades of Mamari, the founder of the clan, and then ordered the sofa leaders to sacrifice two more, and Kanou-ba-nyouma still another. This was the first time that human sacrifices were performed on the tomb of the dead.

On the eighth day after this ceremony, Ton-massa called a general gathering of the slaves and, when all had arrived, cried out: "We buried a corpse but left a foot protruding." He alluded to Mamari's last-remaining son, Dyon-kolo, who lived at Oftala on the left bank of the Niger.

"We did away with Dé-koro only because he did wrong," said Kolé, "and we still have the same veneration for our master [Mamari] and his descendants. The right thing would be to bring Dyon-kolo here, where he can take his father's place and bring peace among us."

Kanou-ba-nyouma said to Ton-massa: "How will you ever be able to face a man whose brother you murdered? How will you explain your crime to him, a crime that has put you in his father's place? Nevertheless, I shan't oppose the idea simply to perpetuate our discord and, if it is the general will to bring Dyon-kolo back, so be it."

[61] Two Peul, named Bon-gué and Ndyan, were selected to carry out the delicate mission to Dyon-kolo. Upon reaching

*173 Dyon-kolo's village, they cleverly set forth the reasons for the catastrophe and concluded by saying that the "people of Ségou" were counting on him, the son of Mamari, to put an end to the discord which was so harmful to all. Dyon-kolo had been listening to all this with feigned patience, but suddenly broke out in great rage: "Do you actually think that I'm mad enough to court the same fate as my brothers? These walls," and with that he struck the wall of his house, "were erected by my father. Here I intend to remain and here I shall defend myself, even against all of you. Go away and never come back!"

When the Peul returned home and reported Dyon-kolo's words, Kanou-ba-nyouma exclaimed: "Well, we'll have to concede that he has kept his father's talent for clear thinking. He may be young, but he understands."

Ton-massa then came to a decision: "Since the man who should have been our master disdains us, it is I, a slave of our master before his first-born son arrived, who will henceforth command the land of Ségou. Be informed that you now belong to me. Every village must bring me 10,000 cowries on every Thursday and 5,000 on every Monday."

He had this proclaimed throughout the town.

Kanou-ba-nyouma said to him: "Why did you wait so long to announce your plans? Did I not say, the very first day, that you acted only in the interest of your own ambitions?"

"No, I merely carried out what we had agreed to do."

"We had not agreed that you were to do it alone. However, no matter. You are the chief; So command, and we shall obey. The future will take care of everything."

In order to break off all relations with Ségou, Dyon-kolo sent for his sister, ba Sana, who lived near Ségou-koro. In answer to this patently hostile act, Ton-massa sent a column, commanded by Ngolo Dyara. The latter attacked Dyon-kolo's people and took 40 prisoners, whom he sent to Ton-massa. Ton-massa sacrificed them to the idols and, having decided to deal finally with Dyon-kolo, called together the leaders of the slaves to ask them to provide a column to be sent against Oïtala.

[62] The column was organized and met at Farako on the day set.

*173 Ton-massa attacked Oïtala without success; his troops faltered and became disorganized. He caught the deserters and harangued them: "Where are you running? If you abandon this effort, our master's work will be forever compromised. You swore to obey me, our master's first child, so show that you are not perjurers." They heeded him and returned to the walls of Oïtala, which they besieged for a whole year. Every day Dyon-kolo made a sortie and pushed back the assailants commanded by Ngolo Dyara. But the attackers never gave up and constantly returned to the assault. The village was finally forced to surrender, and Dyon-kolo, who had fought bravely, was killed by Ngolo himself.

As a reward for these services, Ton-massa gave 1,000 people to Ngolo Dyara, "to mend the tears in his shirt."

After this affair, Ton-massa called a general assembly of the slaves and told them: "Now that the obstacles have been cleared away, it is proper to swear an oath of loyalty to my cause and also to arrange for the future succession to authority by indicating clearly those persons who should forever be forbidden to succeed."

"Since you see matters so clearly," said Kanou-ba-nyouma, "it is your duty to guide us and to indicate to us the names of those who must never succeed to power."

"It seems to me obvious," said Ton-massa, " that the 120 slave leaders, left behind by Mamari, should never seek to command."

"Ah well," said Kanou-ba-nyouma," that's a question which we don't ask you to solve."

"As far as I'm concerned," said Kolé, "I renounce my claim to authority and shall retire to Koni-m-ba to live in peace as a farmer."

No one else entered the discussion and, since the subject was dropped, the question of succession was not settled.

In order to be prepared for serious troubles, Ton-massa required 240 men of each sofa leader. He sent [63] the force so constituted to Massa-la to reinforce the garrison placed there by Mamari under the command of old Na-ba-dyé. He assigned Ngolo Dyara to Ségou-koro to be responsible for the security of Ségou-Sikoro, Ségou-bougou and Ségou-koura.

*173

[312]

As for Ton-massa himself, he settled at Kohin (1) and so effectively isolated himself from his subjects that he did not return to Ségou-koro for about a year. He returned then only because as chief he had to preside at the great annual festival which, in his absence, Ngolo had organized. Moreover, having arrived in the morning barely in time to preside over the ceremonies, he departed that same evening for Kohin. In that village he called a general assembly of the slaves and told them that, since he intended to return to Miniankala, his native place, he wanted before his departure a reciprocal oath to be exchanged to unite them forever. He caused his idol, Nko, to be brought in, enclosed in the skin of a black cat, and after having sacrificed a chicken, he said: "Nko, you may kill me if I ever betray the people of Ségou, but also kill the people of Ségou if they betray me."

Kanou-ba-nyouma interrupted: "No! You've no right to take an oath for us; you've spoken for yourself and it's our turn now."

Ton-massa went off to a distance.

Kanou-ba-nyouma sacrificed a chicken and, over the victim's palpitating body, said: "Nko, kill anyone who comes to Ségou to make his fortune and then goes away again. On the other hand, enrich any man who comes to make his fortune and remains."

However, Ton-massa persisted in his plan and departed.

A small escort of a few sofa under Mori-fin accompanied him. He crossed the Bani and halted at Fallo, where he had a stockade built that could protect him until the arrival of the column he had requested from Ségou. Four months passed, however, and the column did not come.

One day Kanou-ba-nyouma called a general assembly of the ton-dyon' and said: "Is there among you a [64] man with enough courage to go after Ton-massa?"

1. He is said to have started work on a canal which was to bring water from the Niger to Kohin (Quintin and Delafosse).

*173 Nzan-fato offered himself.

"No," said Kanou-ba-nyouma, "you are too young. This mission requires a great deal of experience, for the man will be risking his life."

Nzan-fato was so insistent that he was accepted.

"Very well," said Kanou-ba-nyouma, "go to Ton-massa and tell him, not in my name but in the name of all of us, that, if he is not back within a month, he will be deposed. The power he usurped is not of a kind that one can carry away. At the same time, order Mori-fin to leave Ton-massa as soon as the deadline has passed."

Nzan-fato executed his mission faithfully.

When the period of grace had expired and Ton-massa persisted in his attitude, Mori-fin returned to Ségou, leaving his chief surrounded only by his wives and guarded by a single sofa. Thereupon Ton-massa returned to Kohin, where he shut himself up completely for three days while he made his plans. Then he called together the leaders of the ton-dyon'.

To Kanou-ba-nyouma he cried: "You refuse to obey me!"

"No," replied Kanou-ba-nyouma, "But did you not rise to power through us? Now, we remain at Ségou, while you elect to go off and live in your own country far from us. Each of us has his own native place, too, but none of us goes back there, knowing that if ever we separate, our power will end. Follow our example and we'll do whatever you ask."

"Take care, Kanou-ba-nyouma, it's imprudent to disturb a vulture when he is feeding on carrion."

They went their separate ways.

Kanou-ba-nyouma called a meeting of the ton-dyon' for Monday at Ségou-koro. On the following Wednesday Ton-massa came and demanded a column to attack Konguéré. This was a ruse designed to have his people escorted to Minianka. The ton-dyon' refused to follow him. However, a certain Fasson, a native of the Kala region, agreed to lead warriors against the village in question on condition that they return to Ségou immediately after the fray. Ton-massa turned down this offer since it destroyed his plot. After much discussion and many intrigues, a band finally agreed to follow Ton-massa. The village

*173 was taken, but, in the course of the attack, Ton-massa was [65] wounded in the ear by an arrow which could only have been shot by someone behind him and by one of his own people. The wound festered so rapidly that it was necessary to put Ton-massa on a litter to carry him back to Kohin. There he died, almost completely alone.

He had ruled for four years and was interred at Kohin.

*173 643 *Kanou-ba-nyouma* (1740-1744). As was customary, the *ton-dyon'* came to Ségou-koro for seven days. On the eighth day, when all were about to return to their villages, Kanou-ba-nyouma sent forth a *griot*, preceded by a boy carrying the bow and quiver of Mamari, the founder of the clan. The crier announced throughout the town: "The royal post (1) is now vacant. Our master lived out his time and died; then followed the crime of the one who has just died. Now, let the man who feels strong enough to assume the vacant place take this bow and this quiver."

When the *griot* had covered the whole town, he returned to where the *ton-dyon'* were assembled and put down the bow and quiver in the midst of the group. Kanou-ba-nyouma then said: "Let the man who feels strong enough take these relics and the place of Mamari."

Ndyan, who was a Peul as was Kanou-ba-nyouma, then stated: "We Peul who guarded Mamari's sheep will also guard those of his successor. May the people of Ségou, therefore, pardon me for what I am about to say, for I speak in all sincerity and, I think, in conformity with the sentiments of this assembly. You are the only one, Kanou-ba-nyouma, who can take this place; it is your right as the oldest man after Ton-massa, who has just died."

These words were unanimously approved.

*173 "Very well," said Kanou-ba-nyouma, "I accept this bow and quiver, but the arrows must find their mark: we shall go to war." So, on the spot, he demanded a column and it was granted him. He attacked and took Niamina, then Sambou-na. Enriched by the spoils of the vanquished, he returned to Ségou-koro and rested there for a year. Then he summoned Da-sou, Ton-massa's son, from Kohin and ordered him to return the gold which

---

1. That is, the supreme command.

*173 his father, according to Kanou-ba-nyouma, had carried off [66] at the time of the murder of Dé-koro. Da-son in turn declared that he had found nothing of the sort in his father's estate, so Kanou-ba-nyouma put him in irons, hoping to recover some of the loot. However, Da-son made his escape.

At the beginning of the winter season, Kanou-ba-nyouma made many raids in the environs of Kohin, in the course of which 1,000 people of the village were slain, while 6,000 more were distributed among the warriors; as for Da-son, he fled to Bani-n-ko.

Kanou-ba-nyouma then turned against Kafa-dyougou and removed him from his command of 3,000 people. Outraged, Kafa-dyougou went to consult one Ténénkou-bilé, who lived at Tyo-fin-na and was reputed to be an adept in the occult sciences. By means of magic, he afflicted Kanou-ba-nyouma with a partial paralysis on the left side.

Kanou-ba-nyouma died after four years of suffering.

Kafa-dyougou (1744-1748). Kafa-dyougou, the eldest of the *ton-dyon* leaders, took the bow and quiver. The first thing he did was to turn on his associate, Kolé, the *sofa* leader, who fled to Dyarama-na in Miniankala.

After holding authority for four years, Kafa-dyougou died in mysterious circumstances.

Period of Anarchy
(1748-1750)

After the death of Kanou-ba-nyouma, no one dared to assume authority: the elders perhaps out of prudence and the younger men because they were not sure enough of the necessary support. All knew well that the post was a dangerous one. However, a few managed to collect partisans, and at one point it looked as if the issue was to be decided between Ngolo Dyara and Na-a-koro-ba Nzan-gué.

A meeting was held during which Nzan-gué explained: "I am now the eldest, for I belonged to Soumou Saro, Mamari's mother, and thus am entitled to command."

"That's possible," insinuated Ngolo, "but as far as I'm concerned, you are only a farmer and [67] I know of no warlike talents of yours to justify your claims to this bow and quiver."

Nzan-fato exclaimed in his turn: "Nzan-gué is only a woman. The only blood that he's seen -- and that reluctantly -- was on the day when he was circumcised."

Thereupon Ngolo Dyara, to emphasize the fact that he was separating himself from the pretender, put all the idols in a pirogue and took them to his house at Ségou-Sikoro. Since the idols counted for everything in the minds of the *ton-dyon'*, most of them followed him meekly.

Ngolo Dyara and Na-n-koro-ba Nzan-gué had been feuding for two years when one of Mamari's old followers, named Nzan-gué-ba, who lived at Kohin, intervened. He told Na-n-koro-ba Nzan-gué that Ngolo Dyara was planning to attack him, Nzan-gué-ba, and begged for help. Na-n-koro-ba Nzan-gué allowed himself to be cornered at Kohin, with 3,000 men, in his attempt to defend Nzan-gué-ba. The latter then informed Ngolo, who rushed up and besieged the village. Then Nzan-gué-ba said to Na-n-koro-ba Nzan-gué: "I don't want to get involved in your quarrel with Ngolo Dyara and, if I keep you here any longer, my people and I will be risking terrible reprisals. Therefore, leave my village." Na-n-koro-ba Nzan-gué and his followers departed and all were massacred, while 2,000 people of the village of Kohin fell into Ngolo's hands. However, instead of making them all prisoners, he sent them home and thus became very popular at Kohin. This act influenced two of Nzan-gué-ba's slaves to give themselves to Ngolo, and 2,000 others followed suit.

With his forces thus strengthened, Ngolo turned his attention to Nzan-gué-ba. He called the old man out from the town, ostensibly to confer with him, and when he came, unsuspectingly and without an escort, Ngolo ordered him to be seized and sacrificed to the idols.

Ngolo summoned all of the chiefs of *ton-dyon'* who were older than he: Ngolo Ké-ba of Sama; Na-ba-di; Tyé-koura of Nango; Si-dloki; and Fasson. These all came along as well as the *sofa*, for it was a Thursday.

*173 "Well," asked Ngolo," what are we to do now that we have eliminated the opposition?"

"Mamari gave each of us our share; so let it go at that," said Ngolo Ké-ba.

[88] This proposal, however, did not suit Ngolo, who had his own ideas. There was still one man in his way: Kolé, the old leader of the *sofa*. He proposed to summon Kolé and give him supreme authority; he had assembled the *sofa* only to assure himself of their support.

Bon-gué said: "We Peul are shepherds and not slaves, so we can express ourselves frankly in all sincerity. We think that you, Ngolo Dyara, are determined not to submit henceforth to the will of anyone. Your axe will in future cut only your own wood."

"I am ready," said Ngolo," to follow Kolé, for he is our eldest and we owe him respect and obedience. However, if he refuses to command us, I have decided to take the vacant post."

"Well," said Bon-gue," if you're so set on Kolé, you know where to find him; go and get him."

Ngolo sent for Kolé, but the latter refused to come. Ngolo himself went to Kolé and thrice swore an oath of loyalty to him, but the old man remained inflexible. Finally, he seemed to make up his mind and went to Dioni. Ngolo at once joined him there and presented him with Mamari's hat. Kolé repulsed this advance and said: "There are three chiefs older than I am: Ngolo Ké-ba, Nyé-dingué-dou and Fasson."

Kolé died soon after this meeting at Dioni.

After the traditional seven days had been spent at the door of the deceased, Ngolo Dyara once more summoned the *ton-dyon'*. "Now," he told them, "we must part; as far as I am concerned, so long as Mori-fin and Nzan-fato are loyal to me I have no anxiety about the future, for we shall live by pillaging."

So the separation took place.

When he came to Ségou-koro and saw the *ton-dyon'* ready to cross over to the left bank, where they lived, Ngolo called them back. "Our master," he told them," appeared to me in a dream and said: 'Do not let my children scatter; reunite them and give them a leader, for a body without a head cannot survive.' So come back in a week and we shall see."

*173 On the following Monday all meant to arrive promptly at the meeting; however, out of habit, instead of coming to Ségou-Sikoro [69] they went to Ségou-koro (1). [778] Ngolo went there too, bringing with him the four principal idols: *ba* Koungo-ba, Nyé-dingué-dou, *na* Ngolo-ko and Kolokoloni. Addressing the throng, he cried: "Someone must be chosen to look after these idols, for they are languishing in neglect. As for me, I shall keep the sacrificial knife."

"If the idols are languishing," interrupted Ngolo Ké-ba, "it's your fault, because our master has entrusted them to you. That's your duty, quite as much as guarding our master's houses at Ségou-Sikoro. For our part, all we want are guns and gunpowder."

"I can't give you guns and powder," answered Ngolo Dyara, "but I will give you all of Ton-massa's wives as well as the wives of Kanou-ba-nyouma and Kafa-dyeugou. I can't marry them myself because I've married Mamari's daughter. The powder and the guns remain my share."

"That's nothing but trickery," replied Ngolo Ké-ba. "Why should we need these women when we all have our own!"

"I'm not playing any trick," said Ngolo Dyara, "I'm [587] offering you these women because it is customary among us for brothers to marry the wives of their deceased brothers and, if I were to keep them for myself, you would certainly cry scandal and injustice."

"No, we shan't say anything, for we're at your mercy and very uneasy. We're caught like a rat in the claws of a cat."

"Well, I'll do you no harm, provided that you swear to leave me as the guardian of everything up to the time when we once more have a master."

He dismissed them and called a meeting of the chiefs for the following Saturday at Ba-dyi-soumalén-ba, on the left bank of the Niger. Each chief was expressly ordered to bring with him only his *kasa*-bearer (2).

---

1. Which was, for all practical purposes, their holy place.

2. The *kasa* is a kind of woolen coverlet

*173

[554]

2. The kasa is a kind of woolen coverlet from Macina. Persons of importance are accompanied by a bearer who carries the coverlet and spreads it out as a seat.

[70] On the day set, Ngolo Dyara secretly sent his son Ntyi across to the left bank with 2,500 horsemen.

Each chief appeared, with his bearer carrying a chicken and a red-haired dog for use in the ceremony of swearing on the idols. Ngolo himself brought a chicken and an ox.

When the time arrived, Ngolo went first to take his place in front of the idol. He killed a chicken in accordance with the rites and said: "Idol, make me guardian of the door of my master until the day when I replace him."

"That's no oath, and your words are inadmissible," cried Ngolo Kê-ba.

"Then show me what I must do."

"It's not my place to teach you how to behave before an idol whom you have been serving for years. What I say is, you are falsifying the purpose of this meeting. You have only to say: 'Idol, if I betray my brothers, you may cut out my heart and my liver, but if they betray me, do the same thing to them.'"

"I shall never say such a thing."

"Then let us part."

"You are the oldest men here. Speak first."

"No, it is your duty to begin and you have only a few words to say."

"I shan't say them. Let's leave."

Ntyi came up to say: "What is all this, father? Hasn't the oath been taken yet?"

Ngolo Kê-ba pointed at Ntyi and asked Ngolo Dyara in an ironical tone: "This is a kasa-bearer, too, I presume?"

Then addressing those present, Ntyi called out: "I can understand that you may be in no hurry to get over this, but I'm getting anxious to be the son of the king of Ségou. Come on, hurry up! You there, Fasson, take the oath!"

At that very moment the horsemen appeared. Fasson made no objection and the others followed suit meekly. When all had sworn, Ngolo Dyara, who had taken no oath, put the idols back into his pirogue.

*173

"What's this?" exclaimed Ngolo Ké-ba. "You haven't sworn any oath, Ngolo!"

"No, the oath is required only of slaves," replied Ngolo.

He set a general assembly for a week thence and required [71] each chief to bring him a contingent of 500 men for his personal bodyguard, which thus came to be made up of 12,000 men.

The Dyara

Ngolo and his descendants (Ngolo-si-du)
(1750-1861)

Ngolo (1750-1787). Ngolo entrusted Ségou-Sikoro to Mori-fin and he himself settled at Ségou-koro.

From then on, he was obsessed by a single idea: to see his native village and his relatives once more and to avenge himself for having been reduced to slavery for the sake of a few measures of grain.

Pretending that he wanted to offer a sacrifice on his father's tomb, he took a column to Nyouanna. En route he made successive halts at Kono-dimini in the watercourse of Massa and at Kéléko in the watercourse of Signa-na, before marching on Nyouanna. He ordered Nzan-fato, who did not know what it was all about, to seize the village. "But this is Nyouanna, your native village!" said Nzan-fato. "So it is, but do as I say," answered Ngolo.

The village fell, and among the prisoners were Ngolo's brothers, uncles, his whole kin group. He had them all securely bound and indicated those who were to be sacrificed immediately "to the drums of the ton-dyon'." He had his brother Ba-dyi placed apart and, as soon as they were alone, called a slave to loosen the bonds, pretending that they were too tight; soon after, he had him released completely.

Night came and they were alone; Ngolo threw him a shirt and asked:

"Didn't you have a younger brother?"

*173 "Yes, but he was given by my uncle to Mamari Kouloubali, the chief of Ségou.

"What became of him? Why didn't you ransom him?"

"I wanted to, but my uncle said that Mamari was keeping him by force. We learned later that Mamari had got rid of him, either by killing him, as some said, or by selling him, according to others."

"Where is your father?"

[72] "He is dead."

"And your mother?"

"She is dead too."

"Would you show me their tombs?"

"Willingly."

And, side by side in the darkness, the two men went off to find the tombs. Ngolo knelt beside his mother's grave and resumed the conversation.

"Weren't you with your brother when your uncle took him to Ségou?"

"Yes, I even stayed there for a few days to arrange for his food."

"Was your hostess not a woman named Dantẽ Balo?"

"Yes, she was."

"And when you left, your young brother accompanied you as far as Doukounna, did he not? Ah, I remember it well! For it was I, Ngolo, and I am your brother."

The two men embraced each other and wept.

The next day Ngolo sent Mori-fin with twenty men to raise two low mounds over the graves of his parents. He introduced to everyone his brother Ba-dyi, whom he had sit beside him so as to show the convincing family resemblance.

On the following day, Ngolo attacked and captured the village of Touro-kounna-na. There, he took prisoner his two maternal uncles, Sina and Sadyo, whom he reproached bitterly for having sold him and made no effort to ransom him. Then he sacrificed them to the "drums of the tou-dyon'."

Next day he attacked and destroyed the village of his maternal grandmother.

After all this, he returned to Ségou with large quantities

*173 of booty and, en route, passed through Dioni, ostensibly to visit Kolé's grave; in actual fact he went there to claim a contingent of 740 men from each of Kolé's sons.

During this same year he placed his son ~~Ntyi at~~ Bagamabougou in charge of 27,000 men. Then he sent for Ngolo Ké-ba and spoke to him thus: "No one has ever seen one cat catch rats for another; the cat who eats rats has hair in its excrement. This is just to inform you that I intend to work for myself alone and for my own people and that neither you nor anyone else is going to succeed me. My sons will be the only ones to take my place."

[73] "That's fine," replied Ngolo Ké-ba, "I don't want anyone's patrimony."

A week later, Ngolo sent Séri-ba to Farako with 9,000 men and instructions to keep an eye on Ngolo Ké-ba's activities. "My brother Ngolo Ké-ba," he explained to Séri-ba, "has assured me that he has no desire to inherit from anyone. Perhaps you are not so independent? If you'd like to inherit from him, you must earn the right to do so." He then assigned his griot, Tigui-ba, to the same place with 1,000 men and gave him orders to spy on Séri-ba, who was further placed under a close surveillance.

Ngolo summoned Tyé-koura from Nango, but since he was ill Tyé-koura sent along his son.

"Though Mamari Kouloubali set your father up at Nango with 6,000 men, he has never since that day set foot at Ségou nor sent any offerings for the idols. Go tell him to send me 3,000 men at once."

Tyé-koura replied: "Mamari gave each man his share and so much the worse for the one who couldn't keep it. I shall give nothing."

Ngolo attacked Tyé-koura and, after defeating him, parcelled out all his people as follows: a third to Kono-dimini; a third to Soro-la; and a third to Nka-ra. Further, he ordered Na-ba-dé to occupy Tyé-koura's village with 3,000 men, but Na-ba-dé refused. Then, to force him to obey, he told the people of Kon-dimini, Soro-la and Nka-ra to prevent Na-ba-dé

*173 from cultivating his fields and thus deprived him of 1,000 slaves, who, after settling at Massa, submitted to Ngolo Dyara. The latter established them at Somi-na near Ségou with orders to watch over Na-ba-dé.

Ngolo assembled the sofa and told them that he wanted to do something for his brother Dyi-di [sic]. He placed him at Dougou-fin with 7,500 men and assigned to him all the taxes paid by the region between Dougou-fin and Dyana-bougou (about 600 villages). This region was divided among five great chiefs, all friends of Mamari, as follows: Sigui-sogo Saro at Somo; Demba Kouloubali at Ourouma-na; Mamourou Kouloubali at Toukoto; Néné Kouloubali at Diaba; and Tammoura Saro at Monionko. None of them was willing to pay even a single grain [74] of millet to Dyi-di. So Ngolo, at the head of an army of 72 "foot" [units of foot-soldiers?] invaded the country of Somo. He took 140 villages in one day and brought the number of his troops to 20,000, placing them under the command of Dyi-di.

The other four chiefs made common cause and fled to Diaba. Ngolo attacked and took Diaba, whose chief, Néné Kouloubali, was his father-in-law. He took Néné Kouloubali back to Ségou but, in order not to distress his wife, Ma-koro, mother of his son Ma-n-son and daughter of Néné, he sent the latter back to Diaba with a contingent of 7,500 men.

One day Ngolo consulted Nzan-fato about what should be done about Yarouga Kouloubali, a friend of Mamari's, who had never sent any tribute to Ségou. Nzan-fato was not in favor of an armed expedition but thought, rather, that a fine of 500 captives would give Yarouga a clearer understanding of his obligations. However, Yarouga sent back word that he could not possibly pay any such fine; so Ngolo dispatched Gon-bilé with 2,000 men to Goni to keep an eye on Yarouga. At the same time he sent Somé-sigui-té-ma-é Dyara to Kala, also with 2,000 men, to prevent Yarouga from working his land and thus to make him see reason.

When Nyé-dingué-dou, leader of the captives, died, Ngolo Dyara sent the dead man's twin sons, Siné and Souo, to Nto-bougou.

*173 Further, he gave orders that Mamari's slaves were no longer to fraternize with his own slaves.

Around this time there arrived at Ségou one Sidi Baba Kouloubali, who explained that his visit was necessary in order to pay funeral respects to his dead relative, Dyon-kolo. However, Ngolo thought he detected rancor in this step and suspected that Sidi had come only to stir up trouble. So he drove him away, pursued him, and took his village (Kourou-na); during these events, Sidi himself died.

At Koutou-na [sic] Ngolo put Sila-maran Kouloubali, the deceased's uncle, in command and authorized him to give asylum to anyone fleeing from Ségou.

One day Ngolo consulted the marabouts as to how he should proceed in order to make sure that his name would never be forgotten. They advised him to dedicate one of his daughters to Allah, [75] and that is why he bestowed his daughter Nyé-koro on the marabout Mar-ka-ké Darbo of the village of Kala-bougou; her marriage payment included 10,000 slaves and a silver quiver. Then the marabouts told Ngolo to put golden rings in the ears of 120 crocodiles, saying: "In this way, your name will not perish as long as there are crocodiles in the river." In order to carry out this advice, Ngolo ordered the Somono chief, Baré Tyéro, to bring him 120 live crocodiles, and he had rings fastened in their ears.

Ngolo set up personal estates for certain of his children: Ma-n-son was given command of Mpé-ba-la with 2,000 men; Nyana-n-koro, that of Ségou-koro with 10,000 men; Péné Mamourou, that of Ségou-bougou with 10,000 men; Ba, that of Bia (near Togou) with 10,000 men; and Séri, that of So-fin-na with 10,000 men.

He gave his daughter Sanou in marriage to the chief of Saga-la (near Sokolo), one named Kassoum Kouloubali, and had her accompanied by 1,000 little girls, 1,000 boys and 1,000 young men.

Ngolo complained one day that his son Ntyi always returned to Ségou without any fanfare. When Ntyi heard this remark, he set out from his village, Bama-bougou, at the head of a strong army and went to attack Ségou, which he entered by the Banankoro-da. Ngolo pretended to be very pleased with

*173 this performance, but actually he feared lest he had given his son unsuitable ideas. So, the very next day, on the advice of his circle of attendants, he sacrificed his grandson, Ma-n-son's eldest son, for the purpose of combatting Ntyi's evil intentions.

Ngolo then led an expedition to the southern part of his lands against a coalition of 38 chiefs who had concentrated their forces at Miniankala. He marched against them and dispersed them in a single day, and then headed east against Falé, the chief of Bala-koungo, who had organized an opposition. He was victorious and went off to ask the chief of Minya (Faladougou) why he had never brought so much as a chicken for the idols. He then captured this chief and sacrificed him to the idols.

The expedition against the chief of Minya had lasted for three years, but, without stopping to rest, Ngolo declared war on Macina and for three more years fought against Sila-maran [76] Yéro. The latter was killed during the war and this permitted Ngolo to occupy even the Tombo [Dogon] country.

Still without stopping (1), Ngolo attacked Souma-koulou, a village on the left bank of the Niger near Sokolo; he killed the chief Sama and the ruptured [hernieux] Kilintin-kolonto.

But under the walls of the village of Si-bougou, he was himself killed by evil spirits.

Ngolo had ruled for sixteen years -- eighteen, if the period of anarchy is included -- during which time he had very great influence on events.

Ma-n-son (1787-1808). Ngolo's son-in-law, Mar-ka-ké Darbo, had the corpse placed in a pirogue to be carried back to Ségou; but at the high ground of Sansanding, the spirits threw the remains into the river. Then a piece of wood was wrapped

---

1. According to certain traditions, Ngolo Dyara is supposed to have made two expeditions into Mossi and Yaténga lands in the time of chief Kongo. However, there is no recollection of these attacks in Yaténga tradition.

*173 in a ox-hide in order to simulate the lost corpse, and the journey to Ségou continued. There Ma-n-son proceeded at once and all alone with the burial so that nothing should leak out. All these occurrences were kept strictly secret.

Nzan-fato handed over Ngolo's personal effects to Mar-ka-ké Darbo. When the latter reached Ségou, he sat down under a tree and sent word to Ngolo's children. They hurried up and, when they saw their father's garments, they broke into lamentations.

On the eighth day, Mar-ka-ké ordered Nzan-fato to call together all the "people of Ségou" in order to name a chief, supposed to be the eldest of Ngolo's sons. When everyone had arrived, Mar-ka-ké planted a stake on the ground in front of the house of Ton-ma-ké-blon-da, hung Ngolo's garments upon it, placed the idols around it and then summoned Ma-n-son, to whom he gave everything. Ma-n-son accepted, had everything carried into the dead man's house and himself went in.

Nyana-n-koro, who attended this ceremony with his brothers, protested vigorously. He demanded that Ngolo's effects be divided among all of his children and that the system of banga-bo be followed, since he thought that would eliminate Ma-n-son. Hoping to calm him, Ma-n-son told [77] Nyana-n-koro the circumstances of his father's death and explained how propriety had required the measures that had been taken and the secrecy that had been maintained. Nyana-n-koro, however, would not concede this, nor would he accept the fact that he, the favorite child of the late Ngolo, had been passed over. Furthermore, he claimed that occult practices had been used to cheat him of his rights.

After trying in vain to mediate, Mar-ka-ké sought out Ma-koro, Ngolo's widow, told her what was going on and informed her of the master's wishes: "'Ma-n-son is to take my place,' Ngolo had said, 'and his brothers are to succeed him in the order of their birth. Evil befall the one who fails to heed my wishes!'"

Ma-koro was only Ma-n-son's mother, but she had had the care of Nyana-n-koro since earliest infancy, for his mother had died in giving him birth.

*173 Since Ma-koro felt incapable of restoring peace between her children, she sought the intervention of Massa Taraoré, chief of Sou, near Diaba. The latter asked the help of Massa Taraoré or Sou ba, near Sansanding, and of Massa Doua-n-tan of Kama-na.

All three came to Farko, whither they summoned Ngolo's sons.

Ma-n-son came alone; Nyana-n-kolo was accompanied by two of his brothers. The three Massa insisted vigorously that Ngolo's last wishes be honored by his children and added in conclusion: "Didn't he himself have to wait a long time? He never complained, he never rebelled against the established order of succession." Nyana-n-koro remained inflexible and went off, saying: "My brother Ma-n-son has tricked me. He acted without my knowledge, treating me as something negligible. Any agreement between us is out of the question."

Ma-koro then appealed to the marabouts of Ségou-Sikoro and Togou. But Nyana-n-koro refused to heed their advice either. [428] "Under Moslem law," he asked, "what is done with the effects of a dead man?" "They are divided among his children," they replied. "Very well, that is what I want and what has been unjustly refused me."

Ma-koro summoned two other marabouts: Birama Kané of Sien and Kakamoko Abdoullahi Diari of Niamina. [78] In order to get rid of them, Nyana-n-koro gave each of them a mare, 100,000 cowries and 30 *gros* of gold, saying: "It's useless to insist; even if Ngolo himself implored me, I wouldn't yield."

Finally Nzan-fato, thinking to overcome Nyana-n-koro's stubbornness, appealed to those sentiments most likely to be susceptible of influence. "I'm older than your father," he told him. "You are my son and, if only for that reason, you should heed me; you cannot fail to respect the last wishes of your father." But Nyana-n-koro replied without emotion. "The time for words has passed -- all that matters rest between Allah and myself."

Nyana-n-koro opened hostilities one Sunday with a raid around Ségou; thus he took 200 prisoners, whom he carried off to

*173 Ségou-koura. The following month he seized another 100 prisoners.

Ma-n-son then had a deep well dug, and water was taken from the river only at night for fear of Nyana-n-koro's people. This state of affairs lasted for three months.

The winter season was at hand and Mori-fin complained to Ma-n-son: "You seem to pay very little attention to the disturbing situation in which we find ourselves, thanks to Nyana-n-koro's attacks. Yet we cannot live without eating and we cannot eat without cultivating our fields. But how are we to do so if we cannot leave town?" And he concluded by demanding a column with which to get rid of the assailants.

Si-dloki said the same thing and so Ma-n-son yielded.

On the site where the French headquarters is now located, Mori-fin set up a stockading. Nyana-n-koro attacked him there and carried off 1,500 people. He destroyed the stockade and carted off the lumber to Ségou-koura. The situation was becoming desperate, and Ma-n-son, fearing desertions, assembled the slaves and forced them to take an oath of loyalty. Nzan-fato was put in command of the troops; he established a redoubt at Douba-bougou, where he remained for a year, fighting Nyana-n-koro's men who were established in a fortified position not far away. Little by little, Nyana-n-koro's men made progress and forced Nzan-fato to draw back.

At this point, the slaves began to murmur: "Send word to our master that we're at the end of our rope! He or his [79] brother -- what difference does it make to us? Whatever happens, we'll never be any worse off than we are here. We're dying of hunger, while Ma-n-son doesn't care a bit, lives off the fat of the land and keeps his wealth jealously for himself. Tell him that if his behavior doesn't change, we've decided to find out whether Nyana-n-koro is as stingy as he."

Nzan-fato was much disturbed, for there are things which no chief likes to hear. He feared that if he spoke frankly he would arouse Ma-n-son's anger and that Ma-n-son might well think that he, Nzan-fato, had instigated the whole trouble. That is why he sought out Ma-koro and, after telling her what had

*173 happened, offered unassailable proof of his assertions. For this purpose he summoned the principal slaves to a spot where Ma-koro could hear them without being seen and asked them to state their grievances so that he could transmit them to Ma-n-son. Not only did they repeat their complaints, but they also threatened to desert to Nyana-n-koro's side, if satisfaction were not given them within a week.

Ma-koro called Ma-n-son to her and, in his presence, ordered Nzan-fato to tell all he knew. When Ma-n-son realized the imminent danger, he agreed to follow the advice of Ma-koro and Nzan-fato as to what should be done. He gave them the 31 keys to the storerooms, from which they helped themselves generously. Fifteen days later Nyana-n-koro was defeated. On being ejected successively from Ségou-kotra and Ségou-bougou, he fled to Ségou-koro, where dwelt some of the old sofa. However, the city fell three days later and Nyana-n-koro was captured along with his two brothers.

A shoemaker named Moussa quickly brought the news to Ma-n-son that his brothers, Nyana-n-koro, Dyon-kélé and Mamourou, were on their way to him. Ma-n-son ordered that they should not be brought into the city until after nightfall. That night he went to meet the prisoners. Along the road, he sat down under a silk-cotton tree and stopped the little group as it passed. With Nyana-n-koro at the head, the three brothers were walking with their arms tied behind the back under their ample shirts, a single cangue fastening all three together around the neck.

Ma-n-son said: "Nyana-n-koro, I greet you!" There was no reply. "Son of my master!" Still no answer. "Dyara!" Still no answer. "However," Ma-n-son continued, "this [80] is all your fault. It is the justice of Allah that strikes you. If you had captured me, what would you have done with me?"

Dyon-kélé replied: "Absolutely nothing."

Nyana-n-koro was furious and cried: "I should have sacrificed you to 'the drums of the ton-dyon'."

Ma-n-son told Nzan-fato to take his two young brothers to Bama-bougou and put them in chains. As for Nyana-n-koro, he was entrusted to Dyawé Dèmbélé, the chief of the Somono, with the proviso that Ma-n-son would take Nyan-n-koro back at the proper time. Then Ma-n-son returned to Mpé-ba-la.

*173

One day Nyana-n-koro told Dyawé Démbélé that he wanted to have an interview with his brother Ma-n-son. Both men started out for Mpé-ba-la, Nyana-n-koro having hidden a pistol in his shirt.

Ma-n-son was seated at his threshold. When he saw Dyawé approach, he scented a crisis. He arose, went toward him and asked: "What brings you here?" However, at the very same moment, he espied Nyana-n-koro hiding behind Dyawé and turned toward him. Taken by surprise, Dyawé and Nyana-n-koro were alarmed. Ma-n-son seized his brother by the arm, and the sudden movement made the pistol fall to the ground. Upon seeing it, Ma-n-son called Si-dloki and turned Nyana-n-koro over to him for safekeeping, berating Dyawé severely the while. Si-dloki in turn handed Nyana-n-koro over to a sofa, who took him into the house.

For some time, Ma-n-son seemed completely to have forgotten the affair. A month later he summoned Si-dloki and asked what he had done with Nyana-n-koro.

"I turned him over to a sofa."

The sofa was summoned and claimed to have shut Nyana-n-koro up in a little hut, which he pointed out. They went to the hut and opened it, but nobody was there.

No trace has ever been found of Nyana-n-koro and the little hut has always been "taboo."

Ma-n-son then sent for two of his brothers, Séri and Ba. To Séri he said: "What were you doing while Nyana-n-koro and I were fighting?"

"Cultivating my fields."

"I have no doubt you were; but how could such a struggle have been a matter of indifference to you? Ah, I know! [81] You hoped that we would both be eliminated and that as a result you would have no difficulty in taking over the supreme command. You are nothing but a hypocrite; nevertheless I'll do you no harm, even though you shall never be chief. You have 100 slaves; I forbid you ever to have any more or to do anything other than farm your land."

He made the same disposition of Ba.

*173 He settled both of them at Bama-bougou under the supervision of some ton-dyon'. Both remained members of the Dyara clan, but neither they nor any of their descendants had a right to succeed to power. Then, after reflection, Ma-n-son sent his brother Ba to Déné-bougou, where he had him walled up as punishment for having called him a fool. From then on, Ma-n-son had no enemies to fear in his immediate circle.

At the time of the struggle between Nyana-n-koro and Ma-n-son, Déssé Kouloubali, who hoped to take advantage of the situation, had approached the Niger. Once there, he could not decide which side to take, so he captured the village of Niamina which belonged to Ségou. This was a way of taking revenge for his own captivity in Ségou.

When Ma-n-son was free of further anxiety within his own dominions, he decided to punish Déssé's audacity as well as his indifference to the struggle with Nyana-n-koro. This was his first expedition outside Ségou. He took 60,000 horsemen and 30,000 foot-soldiers as well as his two sons, Da and Tyé-folo.

He summoned Nyényé-koro Boaré and said: "Why did you let my Mar-ka people be captured?"

Nyényé-koro, who was then chief of Mpé-ba-la, replied: "You hadn't entrusted them to me."

In order to show his wrath, Ma-n-son ravaged the entire canton of Missé-ka-la, which was under the direct authority of Nyényé-koro.

At Mori-bougou, he captured a man named Ntyi, whose bravery pleased him. He gave him command of 1,000 men and took him along to Kaarta.

In this province, at Guémou, he had his two sons circumcised.

He pursued the Massa-si with such fury that it has become legendary and, having forced them into a narrow mountain pass, he blocked the way behind them as if to cut off their return. Since Déssé [82] had died in the meantime, the chief of the Massa-si was at the time Moussou-koura Bo.

When he had conquered the Massa-si, Ma-n-son summoned Tyitya, chief of the canton of Dé-dougou (between Bélé-dougou and Foula-dougou), and told him: "You and your people

*173 must leave this country at once. There is not a single grain of millet in Kaarta and I need the resources of your whole canton to provision my troops."

Tyitya's only answer was to forbid Ma-n-son to enter Dé-dougou.

One of Ma-n-son's *griot* then said: "Master, take care and don't push this Bambara too far, for you know how vindicative the people of our race can be." However, necessity being imperious, Ma-n-son asked Tyitya, in the name of the latter's friendship with Ngolo, to leave his country so that the warriors of Ségou should not die of hunger.

A Bambara loves his village; so Tyitya refused. Three days later, Ma-n-son invaded Dé-dougou. He summoned Tyitya, but the latter informed him: "We cannot come to any agreement. I have consulted my chiefs and they agree unanimously that we shall never yield to a man of our own race."

"I knew," said Ma-n-son, "that I could not rely on Tyitya, since he sent 250 men to help Nyana-n-koro. Today the hour of my vengeance is at hand."

Tyitya tried to avoid disaster by offering to provide two baskets of millet for each horseman and one for each foot-soldier and thus to persuade Ma-n-son to abandon his purpose.

"The time for words has passed," said Ma-n-son. "Do you think that a man who can take all will be contented with half?"

Tyitya urged his brothers to emigrate, but they refused. The head village was made ready for defense, and among those who garrisoned the place were 750 light infantry, escorted by 100 musicians. Every exit was blocked and all the men went up onto the roofs of the houses, whence they taunted Ma-n-son and his army.

The next day, Ma-n-son came in person and leaned against the village wall; encouraged by this attitude, his men rushed bravely to the assault. However, the first [83] enemy volley killed 50 *sofa* chiefs and so the attack was abandoned.

Stockades were erected and a siege from a distance began.

A month passed without any change.

Since the other villages in the canton had been abandoned, the army lived off the country.

*173 A year later, with the winter season at hand, Ma-n-son's twelve wives came to him, saying: "Allow us to leave, for we are homesick for Ségou. If you force us to stay, we shall desert, since we are convinced that you will never take this village."

He called the griot and, in their presence, had the women repeat what they had said. After that, he gave them leave to depart.

During the rest of the night, the griot sang war-songs to Ma-n-son. In the morning, having assembled all his people, he went up to the tata and threw his silver bracelet into it. The assault was terrible; 71 chiefs were killed, including Ntyi of Moribougou. When he saw this brave man fall, Ma-n-son cried out: "All is lost! There is nothing for it but to return to Ségou."

Upon hearing these words, Na-dya Bala, a son of Tonmassa, said to Ma-n-son: "So this foreigner was dearer to you than your faithful followers. It's true that he was courageous, but this was his first campaign, while the rest of us have lost count of them. After all, it's merely one slave the less."

Another year passed. Finally, Ma-n-son's son Da thought of a stratagem. One night, having collected a lot of utensils, he had his people go to the opposite side of the village from that besieged by his father's army. By making an ostensibly muffled noise, he tricked the besieged inhabitants into thinking that a large proportion of the assailants was deserting. The village gates opened at once for people who thought that an opportune time to escape had come.

Da and his men, who were strategically placed, entered the village, where shouting and firing soon alerted the army to the success of the stratagem. For 15 days carnage prevailed in the village, but the chief remained hidden. Thereupon, Na-dya Bala went to Ma-n-son and told him: "I swear that I shall either bring Tyitya to you tomorrow or die in the attempt." As the price for his life, [84] Ma-n-son gave him 100 scarlet shirts, 100 scarlet silk cords -- in a word, 100 of everything he desired. The next day at sundown Na-dya Bala brought in Tyitya. "Many thanks, Démbélé [sic]!" cried Ma-n-son and further gave him 750 people "to repair the rents in his shirt." Later he added 1,000 people and 400 villages.

*173

Ma-n-son returned to Ségou, capturing Béba en route.

One day Ma-n-son summoned Dyira-ba, saying: "I know that, at the time of my quarrel with my brother Nyana-n-koro, you were living sometimes at Ségou-koro and sometimes at Ségou-koura and you never came to see me so as to avoid taking sides with one or the other of us." "I'm poor," said Dyira-ba, "and I didn't want to add to your discord." "That is to say, you enjoyed watching the decline of power of the Ngolo-la and you hoped, on the contrary, to see a resurgence of that of the Dounamba-a. However, I shan't do you any harm, first, because you are my father and also out of respect for the memory of my mother and grandmother. But to punish you, I shall take Nango and Massala away from you. You need only a few men to do your farming."

Ma-n-son gave Mpé-ba-la and Bama-bougou to Da. He placed Tyé-folo at Koké with 6,000 men. To Nyéné-m-ba he gave the command of Oïtala, including all that had formerly belonged to Dyon-kolo, and he strengthened Nyéné's force of 13,000 men by an addition of 4,000. He installed Sibiri and Nyanya at Diani with 10,000 men each. Fissa was placed at Nango with all of Dyiri-ba's slaves, except 400 who were left to Dyiri-ba. He assigned Songo-ba to Massa-la and Nyanya-ni-ntyéni to Séou (on the left bank).

After he had settled all these matters, Ma-n-son summoned Mamari from Kirango.

"I should like to buy your village," he said to him.

"Your father also wanted to do so," said Mamari, "and he offered in payment as many cowries as I could put in my tata. I refused because it was not I who built the village; it was left to me by my father and he inherited it from his ancestors. Now, as you know, a Bambara does not give up the village of his ancestors in return for cowries. Ask of me what you will, except that."

[85] "In a week I shall come to see you and we shall try to come to an agreement," said Ma-n-son.

Well before this interview, as soon as he had got wind of Ma-n-son's intentions, Mamari had persuaded his people to build new villages, mostly on the left bank of the Niger, such as

*173 Vélingué-ra, Gou-ma, Médi-na, Tyon, and Tayou. On his return from Ségou, he sent all his people to these new villages so that, a week later when Ma-n-son arrived, he found only Mamari at Kirango, who replied as follows to his proposals:

"I simply cannot sell the property of my ancestors; but, if you insist, I will give it to you."

"I couldn't possibly accept because my enemies would say that I had extorted it from you."

"Have no fear, I shall keep the whole affair secret."

Ma-n-son accepted and Mamari hastened to leave Kirango and go to Vélingué-ra to live.

On the eighth day, Kala-ké reached Kirango with 10,000 men to garrison the place.

When he heard about the evacuation of Kirango, Ma-n-son summoned the Sissé and the Khomma people from Sansanding. "Why didn't you come to greet me at Kirango?" he asked.

"You didn't even spend the night there," they replied, "and we shouldn't have had time to get there before your departure."

"You're nothing but hypocrites. When I was fighting with my brother, Nyana-n-koro, you supplied him with men and provisions and you didn't even acknowledge me."

He ordered them to bring in all of the heads of households at Sansanding; 3,500 of them came. He decided to put them to death, but sherif Ismail intervened. Ma-n-son deferred the carrying out of his wishes and turned the men over to So, the leader of his slaves. However, he changed his mind the next day and had them all brought to the public square to be executed. Sherif Ismail once more interceded and Ma-n-son gave in, saying: "All right, I give them to you as slaves." Thus, they all returned to Sansanding.

Souleyman, chief of Dina, came to Ségou to pay his respects to Ma-n-son. He presented him with 35 pirogue-loads of cowries. Ma-n-son could not refuse this gift but he was [86] deeply humiliated by it, since he understood perfectly that Souleyman had deliberately intended to show that he could give without counting. Ma-n-son swore to get his revenge.

*173 At Ségou, Souleyman was easily led to indulge in his well-known penchant for strong drink and, in an alcoholic stupor, he continually went around shouting that Ségou was just a land of slaves where he alone could do as he wished. These taunts enraged Ma-n-son.

One day, in the course of a drinking-bout, Souleyman got involved in a quarrel with a man named Siné-dyan, one of Ma-n-son's slaves or griot. During lunch, to amuse Ma-n-son, Siné-dyan told of his quarrel with Souleyman. Ma-n-son perceived that advantage might be gained from the affair and told Siné-dyan: "I should be delighted to have you make something of this ridiculous quarrel, but it has to be understood that I mustn't appear in it. As Souleyman is my mother's guest, he is sacred for me."

Siné-dyan returned to the public square and there found Souleyman drinking with Na-dya Bala, son of Ton-massa. He approached and said: "You, grandson of the brave Ton-massa, and you, grandson of the valiant Wara, you two are well suited to enjoying each other's company and celebrating together. If you like, I offer you 1,000 forked sticks and 2,000 straw mats to build a spacious room where you can be comfortable and enjoy life."

They accepted.

In order to meet the extraordinary expenses of these orgies, Na-dya Bala sold 7500 (1) slaves at Ségou and used the proceeds to buy beer (dlo). For the same purpose, Souleyman had as much sent from home as he could and, when his resources ran short, secretly took flight and returned to Dina.

Thereupon Na-dya Bala sought out Nzan-fato, told him what had happened and persuaded him to accompany him to see Ma-n-son. When Na-dya Bala had set forth his complaints to the latter, he concluded: "It is my opinion that such conduct deserves severe punishment. I ask you to pursue this coward who, after coming here to parade his wealth and humiliate us, has now fled secretly to avoid paying his share."

1. As noted earlier, these figures have no relevance.

973 Publicly, Ma-n-son opposed Na-dya Bala's project [87] but as soon as the young man had withdrawn he sent word to his mother, Ma-koro.

"Nzan-fato and Na-dya Bala," he said, "have decided to pursue Souleyman, and I cannot oppose them. However, since I have no interest in the affair, warn Souleyman and advise him to leave the country in order to forestall an irreparable misfortune. After that, we shall see."

Ma-koro summoned one of her trusted followers and gave him a pair of sandals, a white shirt and a skin bag full of couscous. She gave him careful instructions and told him to go along the river and to return by a different route so as not to meet Nzan-fato, who would surely give him trouble.

Ma-koro's envoy found Souleyman dancing and drinking. With great difficulty he managed to get him aside and, after delivering Ma-koro's message, said: "Put on these sandals and this blouse, take the skin on your shoulder, and emigrate. That's the wisest course; later, everything will work out."

Souleyman refused to leave the country of his ancestors.

During this time, Nzan reached Massa-la, the last village of the slaves of Ségou. There he held council and authorized his people to seize and to keep anything that fell into their hands in the country to the west into which they were to go. It was then for the first time that the griot sang: "In the shade of the leafy kaminya, the hen can't tell a grain of sand from a grain of millet."

Nzan's troops ravaged everything in their path and advanced rapidly upon Dina. When they reached Dina, Nzan set up his camp near the village and summoned Souleyman. The latter came, accompanied by his brothers, among them Na-dyé Kassoum who, three years earlier, had proposed to Nzan to betray Souleyman.

Opening the interview, Nzan said: "I shall begin by telling you, Souleyman, that we are here in spite of Ma-n-son. You indulged in extraordinary orgies at Ségou with Na-dya Bala, my son (1). Aren't you, a freeman, ashamed to have consorted

---

1. Not through natural filiation but due to friendly relations which had existed between Nzan and Na-dya Bala's father.

*173 with a slave and then to have decamped without paying your due?

"That's why we are here."

[88] "At Ségou you ran out of resources, but here you lack for nothing, and the matter must be settled.

"In order to show you that he has no part in this affair, Ma-n-son has instructed me to give you 20 boxes of guns, 10 loads of flints, 10 loads of bullets and some loads of salt and dried fish (1)."

1. Ma-n-son's conduct is a typical example of Bambara trickery.

Souleyman accepted Ma-n-son's gift and, after expressing thanks, added: "Since you and Na-dya Bala have come to have a drinking-bout, tell me what I should do."

"Let's do as we did at Ségou."

"No, we won't find here what is to be found at Ségou. Besides, I have a suspicion that you have come only to make war. I can't oppose you since my people are away; if you want to seize me, I can't prevent you."

"Well, set a time-limit after which we shall attack you, whether your people are back or not."

He asked for three days and his request was granted. On the fourth day Nzan attacked the village, which was defended on one side by Souleyman and on the other by Na-dyé Kassoum. The latter opened the gates to Nzan. Souleyman was captured by Na-dya Bala and killed at the foot of a cailcedra tree [Khaya senegalensis] in the village. Na-dyé Kassoum and the prisoners were sent to Ségou.

On his way back to Ségou, Nzan took Toumboulou and the chiefs of Damba, Kamikou, Kani-ké-dougou, Dyala-bougou and Séou.

When he reached Ségou, he posted a warning against freemen consorting with slaves.

As a reward, Ma-n-son gave Nzan 10,000 people and made Kassoum chief of the canton of Dina with headquarters at Kerké-la.

*173 When he was stricken with an incurable case of diarrhea, Ma-n-son realized that the end was near. He gathered his sons around him and advised them to remain united. Then he expressed his regrets at having been unable to take Koré-Samba-Nya-na and Bouba-n-koro. He regretted too, that he had not succeeded in subjugating Ma Dyala Da-tou, which had boasted that it would make Ma-koro's couscous taste bitter.

Ma-n-son had fought against Macina and Tombo, against the Touareg [Tuareg] and the Mossi, and had been successful against them all. During his reign, the country of Ségou proper (the to-da, "pot of gruel") extended as follows: on the east as far as and including the canton of Saro; on the north to the vicinity of [90] Ségué-la, Kourouma and Kokri; on the west to Kanga-ba; and on the south to Mpé-so-ba and Yanga-so.

The authority of the chief of Ségou was widespread but highly precarious, since there were not enough organized troops to enforce it. The tributary villages were supposed to pay more or less regular dues, whose nature and amount had been fixed when they were conquered.

Da (1808-1827). On the eighth day after Ma-n-son's burial, Da assembled his brothers and, addressing Tyé-folo, asked what they were planning to do. Tyé-folo kept silence, but young Kala-ké, proud at being consulted, wanted to speak. Da forbade him and once more inquired of Tyé-folo.

"What shall we do with our father's wives?"

"Nothing could be simpler," quickly replied Kala-ké, whom Da tried in vain to silence." First, Ma should be set aside as she was our father's principal wife." Tyé-folo can take your mother, Yo; and you can take Tyé-folo's mother."

"You are talking nonsense!" shouted Da, out of patience.

"But I'm only answering your question."

"Da," said Tyé-folo, "do as you like."

"Very well," concluded Da, "neither our mothers nor Ma and Koma will be taken by just anyone. With that settled, let's leave it there for the present."

When all was arranged, Da again summoned his brothers and told them through his griot, Tyé-tigué Bani-ntyéni:

*173 "As far as I am concerned, I ask as inheritance only my father's bow and arrows."

"Well, take them," exclaimed the irrepressible Kalaké, "since you are our eldest brother and since we have no wish to quarrel, as did our father and his brothers."

"All right," replied Da through his griot, "but don't forget that you must keep our father's death secret and act just as you did when he was alive. This is indispensable for the success of my plans."

The fact was that Bani, the chief of Samba Nya-na, had remained invincible only because of the precious amulets [91] he possessed against Ma-n-son. These magic powers naturally would not work against Da; so if Da were able to attack Bani before the latter heard of Ma-n-son's death and was thus forewarned, Da would unquestionably triumph. This was all the more likely in view of the fact that Da had asked a marabout friend of his for a victory talisman. In order to prepare this talisman, the marabout required one of Bani's sandals and some hair from his beard.

In order to obtain these indispensable ingredients, Da bribed with gold a pretty woman, who went to Samba Nya-na with all the necessary instructions.

As soon as Bani saw the pretty woman, he begged persistently for her favors. When she had yielded, she made use of his confidence to get him drunk. Thus she easily obtained what she had come for, and the talisman could be made.

Now the remarkable thing is that, though Bani had always been forewarned by the people of Dina every time Ma-n-son was about to attack him, Da's approach so took him by surprise that he learned of it only when the enemy was before the village gates. This was the work of the magic talisman.

The village was taken and Bani, trying to flee on horseback, was captured by the griot, So-touma. Now Bani had auburn
[82b] hair, one of those men whom the Bambara call Gon-bilé; they believe that if they put a red-haired man to death they incur the most frightful misfortunes. That is why Da merely removed Bani to Digon, where he died.

*173 When he had returned to Ségou, Da asked for a column to be led against Fon-ba-na, near Sikasso; this town was taken.

He destroyed Dya-kourou-ma, near Sansanding, because its chief was called Toto, a name which he disliked. He seized Toto's son and made him take a new name.

He captured Da-tou and put him to death.

"What have I done to you?" said Da-tou.

"You once said that you'd make Ma-koro's couscous taste bitter. I am proving that, on the contrary, you will make it taste good!"

On his return to Ségou, Da received a visit from Douga-koro, of Koré, who had come to pay him respects.

"Thanks for your visit," Da said to him, "old men are the [92] remedy of the young, and it just happens that I have some information to ask of you. Do you know of any villages in the Miniankala region which my father did not succeed in capturing?"

"No, I know of none; and, if there were any, I'm sure it would only be because he did not wish to take them."

"Come now, think it over!" and Da started to talk to other visitors. Douga-koro, much upset, asked leave to retire to his host's house in order to reflect. However, as soon as he was outside, he started for his village to warn the people of the imminent arrival of Da.

On the eighth day after this interview, Da summoned the chief of the Somono and ordered him to make all arrangements for a strong column to cross the Bani; with this purpose in view, the pirogues had to go down the Niger to Mopti and then up the Bani to the desired place.

Da destroyed Koré and killed Douga-koro. He made Douga-[55] koro's son prisoner and gave him the name M-fa-ni-moné-té-koun' (My father's soul no longer suffers), to which the reply was Den'-nyouma (good son). In the same way he had given Bani's son the name Malo-bora-m-fa-la (My father is no longer ashamed), with the reply Den'-nyouma (good son) (1).

---

1. This method of naming slaves was very common. See Les Khassonké [The Kasonke], p. 344.

*173 Da's subjects called him Ton-komo.

Tradition has it that Ton-komo continued to fight. Particularly, he captured Ntélé, chief of the village of Koté-mabougou in the canton of Bani-n-ko; Moussa Mariko, chief of Farko-la (Bani-n-ko); and Morbou, a Peul of Déné-naa, near Sokolo. He led a column against the Mossi, captured the country, and there founded three villages: Ségou-koro, Banan-koro and Mpé-ba-la.

When this last column had returned, Da decided to build a house at Banan-koro so as to leave a lasting monument to his reign, and 1,500 men were employed in the construction. During this period, Da maintained very close relations with one of his childhood friends, a Marka named Mama Dyétoura, who was a son of the chief of Tyén near Sansanding.

Mama was very powerful and very rich. Although he was a Moslem, he wore his hair long and braided and, out of vanity, ornamented it with pretty silver bangles. A handsome man, he was a favorite of all the ladies. Now, one [93] day when he was chatting with Da in the house under construction at Banan-koro, Da's wives came up and all of them marvelled at Mama's charms. Da took offense and, after he had returned home, summoned his wives one by one to find out what it was they so much admired about Mama. Each one replied: "You are the bravest of chiefs, but Mama is the handsomest of men."

Da was devoured with jealousy and ordered Mama to shave his head, ostensibly in conformity with Moslem law. Mama obeyed, but the ladies liked him just as well. Sensing danger he discarded all his elaborate clothes and never appeared before Da except when he was bareheaded and bedraggled like a poor man.

However, Da thought him still too popular with the ladies and one day told him: "Mama, I want you to wear a donkey's mane." "Very well," said Mama, "I'll speak to my father about it." Mama went to the house of his father who, at the very same time, received a golden razor from Da with orders to leave only a donkey's mane on his son's head. Shortly thereafter the old man, who was already ill, died without having carried out the instructions. Henceforth free, Mama refused to accept the humiliation required by Da.

*173 Da summoned the sofa leader, one Mpé-ba-la So, gave him 5,000 barrels of powder, and commanded him to capture Mama, to shave his head like a donkey's mane and to put on his forehead the cowrie shell which was the sign of an adulterous slave.

The sofa was beaten and, fearful of the master's wrath, took refuge at Togou with the marabout Kassoum, who undertook to intercede with Da. Da pardoned him, saying: "Let him return. He's been beaten, but that doesn't matter; I have lots of other slaves who will do what he failed to do."

He sent Dyogo Dyara, who was beaten too, but was also forgiven, thanks to the good offices of a freeman of Ségou-koro.

At that point, Da sent word to the slaves living at Baga-ma-bougou that the man who succeeded in carrying out the mission against Mama would receive 10,000 slaves as a reward. But the people of Baga-ma-bougou chased Da's envoy out of town without even listening to him.

When this envoy, whose name was Ma-nyouma, returned, a griot came and sat before Da's door and sang the whole night through; a blacksmith who was seated on the threshold of the [94] opposite house, followed suit. The next day Da went in person to Banan-koro, spent the night there and, at dawn, attacked Mama, only to be beaten in his turn. Sadly he headed back to Ségou, but when he heard the griot slyly sing: "Mama has broken Komo's antlers," he was filled with shame and turned back to renew his attack on Mama's village. He reached the village at nightfall and, on the advice of his intimates, resigned himself to postponing his undertaking until morning.

Da attacked at dawn but was unsuccessful and sustained heavy losses. He then decided to starve the village out, so he surrounded it from a distance, building stockades and then, worn out with repeated failures, he turned over the siege to his brother Kala-ké and himself returned to Ségou.

For a period of six months, Da showed no further signs of activity. Then he summoned the son of Bon-gué and the son of Bakari and sent these two Peul off to Mama in the greatest secrecy to ask him to forget the past and to come and take an oath of friendship.

*173 The two young men departed in the greatest anxiety; knowing Da, they were sure that their mission could only spell disaster for Mama and they were very fond of him. Therefore, they were very happy when he told them that he knew Da too well to trust his word.

However, Da refused to give up his new strategy and sent successively a number of freemen, who might be supposed to have enough influence to help his plan.

He finally learned that one Bala of Séga-la was the only man with enough influence over Mama to persuade him. At first, Bala refused to have any part in Da's plan, which he judged to be a trick, but gradually he allowed himself to be convinced of Da's sincerity in desiring a reconciliation, which Da knew how to affect. Bala then left to see Mama, convinced that he was working for the latter's best interests. When Mama saw him, he realized that further resistance was impossible since even Bala had yielded to Da's hypocritical persuasion; so it was with sinking heart that he agreed to accompany his friend to the village of the tyrant. However, before he left, he urged his brother to keep a sharp lookout and not to yield if he should fail to return.

[95] Da was encamped at Koungo-bougou and he had placed two wings of his column between his camp and Mama's village. The warriors in these sections were slaves devoted to Da, and Mama promptly called this fact to his friend's attention. As the two men advanced, the slaves became more and more hostile. The first ones had greeted them, but a little further on, they demanded various gifts, especially tobacco. Still further on, slaves pulled at their garments from right and left and, finally, a man lying on the ground near the path caught Mama by the leg and tripped him. He fell and at once the warriors set upon him and beat him to death. Bala, unable to resist the attack, ran up to Da who, when he saw him coming, went into his hut; but he came out again.

Bala came up, shouting insults, spitting in his face and saying: "I swear I shall never again pronounce words containing the syllable da, nor ever again eat anything whose name has the syllable da!" Bala and his descendants have never violated this oath. He crossed the river and never again set foot in Ségou.

*173 Da spent eleven more months in destroying Mama's village. Once installed there, in a spot which had cost him such great effort, Da felt that he was at the apogee of his power.

It is said that one day, in an access of mad pride, he told his griot:

"It is I who surpass in power all of Ma-n-son's children, and Ma-n-son himself accomplished very little compared to what I have done. Go and find out whether the tribute has arrived from Fouta."

"They have come," the griot reported back.

"And from Sahel?"

"They are here too."

"And from Egypt?"

"It appears that the men bringing them are at present at Sansanding."

"I have heard that a certain Mokhtar is fighting up north. Has his tribute arrived?"

"It is at Séga-la."

[86] "And what about the people who wear queues and who live on the other side of the forest of kola trees?"

"Their envoys are at Kogou."

And thus Da enjoyed making boast of his power.

One day he confided to his intimates: "I doubt if I can find any more victims for my Komo and I feel capable of taking on the companions of the prophet."

Sherif Ismail's son, Lamine, appalled by such heresy and such a display of pride, explained: "Take care! Such words always bring disaster."

"That's all right," said Da, "meanwhile I'm going to establish a village of white men (1)."

In order to carry out this project, he forcibly settled the Marka of Tinéni-m-ba at Banan-koro, and placed between Koukon-kourou and Djenné 200 heads of Bozo families. His horsemen

---

1. That is, of people reputed to be of non-Negroid origin.

*173 rounded up all the Bozo people settled on the Niger from Dina to Kanga-ba and moved them to Banan-koro.

Further, he captured 40,000 cattle on the shore of Lake Débo and divided them into 30 herds, which he entrusted to his Peul.

He had Tyan Mana, chief of Saro, gather up all of the Dioula [Diula] people settled at Kaya, at Koro-dougou, at Toun and at Komina (Bani-n-ko) and forced them to move to Banan-koro.

All at once, Da felt very ill. He sent for alfa Seydou Konnaté, a learned marabout of Sansanding, and asked him what he should do to get well.

"I can tell you only three things," said the alfa. "I warned you not to kill an only son, but you did so. During this very year a man will arise who will put an end to your power. Finally, and in spite of your wishes, your son Tyé-koura will not succeed you; the power will pass to one of his brothers. As for the illness with which you have been stricken, you will never recover." And with that he departed.

Four months after these predictions, the revolt of Ahmadou Bari broke out. The chief of Kouna-ri, Guéladyo Ahmadou-bodédyo, sent word to Da: "One of our marabouts is preaching a holy war and the people of Djenné are asking for help." In the first battle 7,000 men from [97] Banan-koro and Mpé-ba-la were killed, along with the Gon-bilé chief who commanded them. Da then gave special instructions to Salirou, chief of Saro, whose country, because of these events, was now the frontier of Ségou.

Three years after this first battle, Da abandoned his bow.

Tyé-folo (1827-1839). Tyé-koura, Da's son, lived at Mpé-ba-la, and the slaves surrounding him were determined to prevent anyone else from taking power, saying: "Our master's son is the only one who should command." Nao, the sofa leader, was especially active in promoting this view.

For eight months the slaves had a riotous time spending their late master's estate. They had forbidden anyone to pronounce the name of Tyé-folo and, indeed, even the word Tyé was outlawed.

One day the sofa of Ségou-koro and of Ségou-Sikoro sent for Tyé-folo, who was then living at Koké. He came in a hurry and was taken to his brother's house. He sent for Nso; when the latter arrived he found the door guarded by 750 sofa and he noticed in the three entrance rooms the guards were lying face downwards with axes in their hands.

Suddenly, Tyé-folo appeared before him in the middle of the court, all dressed in white and wearing a cow's tail hanging from his wrist, while all prostrated themselves around him. Nso joined the throng and took up the same position, crying: "Dyara!"

"You are the one who is the Dyara," replied Tyé-folo, "since you've been in authority for eight months and since you want your master's son for your chief."

"Ah yes!" exclaimed the clever rogue, "I want the son of my master to be chief, and you are my master's son, for I've known no other master than Ma-n-son."

"Very well," said Tyé-folo, "I give you 240,000 cowries with which you can celebrate, but first tell me where Tyé-koura is."

"I don't know, for he has fled."

Tyé-koura had indeed fled, seeing the direction events were taking, and had taken refuge with the Somono chief, whom he begged to intercede for him. Tyé-folo pardoned him, saying: "This child is not guilty, [98] since the whole affair is the fault only of the people of Ségou who thought to stir up discord between us so as to profit from our dissension."

Up to the time of his death, Tyé-folo continued the war against Sheik Ahmadou Bari.

Further, he captured Tinéni-m-ba and Ténén-kou.

He died under mysterious circumstances.

Nyéné-m-ba (1839). A brother of Tyé-folo and living at Oïtala, he ruled for only nine months.

Period of Anarchy
(1840-1843)

The death of Nyéné-m-ba ushered in a period of anarchy which the people of Macina sought to exploit for the purpose of

*173 subjugating the country of Ségou. However, the Peul, Bakari, a son of Dyan and chief of a group of the Fur-ba Fla-u, succeeded in gaining control of the ton-dyon' and held off the invaders led by a certain Blissi.

Bakari Dyan killed Blissi (1) and took numerous villages, notably Béléni-n-ko; the booty taken from these places paid for the orgies at Ségou.

The Dyara
(following)

Bén (1843-1849), called Kirango Bén. Finally, Tyé-folo's brother Bén, who lived at Kirango, was chosen.

There arose discord between Bén and Nko-n-tyé, father of Nto, which later on degenerated into an armed fight between Nto and Bén's son Kara-moro. The quarrel arose when Nko-n-tyé said to Bén: "If you do such and such a thing, you will surpass me." Now such a remark was only acceptable between equals and so Bén, who was seriously annoyed by this familiarity, loudly severed relations with Nko-n-tyé.

One day Bén quarreled with a slave named Bougari; the latter fled, pursued by Bén, who was armed [99] with a spear. Bougari sought to put himself under the protection of a powerful chief and, meeting Bakari Dyan, asked him to intercede in his favor. Bén came up at that moment and threw his spear. Bakari Dyan was wounded and the slave killed.

Bén captured Mourdia.

He attacked Kourou-ma but was beaten back. A marabout advised him to cease his warlike activities, saying: "If you resume them, you will die."

"Very well, then," he said, "I'll die, since in any case I shouldn't be able to survive the disgrace of failing to take this village." He took it and died.

---

1. See the story of this event in Chapter 7.

*173

Bén had ruled for eight years and two months.

Kon-maran (1849-1851). This was another of Bén's brothers and he ruled for seven or eight months.

Démba (1851-1854). This new chief conquered Birgo, Wassoulou and Gana-dougou. He died after three years and one month of authority.

Touro-koro Mari (1854-1856). Hardly had he been elected by the ton-dyon' when this son of Ma-n-son's went off to war and took Gamon in the province of Wassoulou. After that, he attacked Dyéïdi Sidibé, chief of Sogoni, and took 8,000 prisoners in two battles.

He attacked Koulou-koro (Koulikoro) in order to capture Bagui Ngolo Dyara, but the latter managed to escape and to reach Bélé-dougou.

The villages of Dyali-ba and Dya-n-ké-na in the Mandé country likewise fell into his power.

Touro-koro Mari quarreled simultaneously with the people of Ségou and with his brother Kégué Mari, who lived at Massa-la. He ordered an attack on Massa-la, but both the besieged and attackers fired blank cartridges and, when Touro-koro Mari expressed astonishment at seeing no one wounded, a slave replied: "We've had enough of your fratricidal wars; they will have to stop." The matter rested there.

One day Touro-koro Mari sent for his son Ba-dyi. He dressed him in Ma-n-son's garments, ordered all the troops to accompany him and told him to attack Ségou. The people of Ségou became alarmed at this seemingly senseless performance. [100] To this discontent was added the fact that Touro-koro Mari gave valuable gifts to El Hadj Omar and sent one of his sons to Omar to be educated.

Finally, one Thursday evening, all the sofa left Touro-koro Mari's house, only 40 bila-koro remaining behind. Touro-koro Mari's sons, who were playing nearby, were frightened by these preparations and took refuge among the Somono.

During the evening the slaves returned. They tied a scarf around Touro-koro Mari's neck and dragged his body outside. Kégué-Mari was summoned; in his presence Touro-koro Mari was

*173 dragged successively through all of the roads leading into Ségou and, finally, to Komo's forest. There Kégué-Mari said to him: "I have not forgotten that you had me tied up here, accusing me of adultery with one of your wives, nor that, as a punishment for the alleged crime, you forced me to eat grass and leaves. Remember, on that day I told you that even though I were lying on the ground, if I could touch you with my foot, I would lay you low. Now my time of vengeance has come. Ségou will be so ruined by you that peace will never return."

Then a stone was tied around Touro-koro Mari's neck and his body was thrown into the river.

Ali (1856-1861). Ali, a brother of Touro-koro Mari, was then summoned in these terms: "Come, for the key was mislaid while we were engaged in a certain little intrigue." "I shan't come," he replied, "for I know very well how you lost the key." "Very well," said they. "We killed your brother because he wanted to force us to become Moslems and also because he wasted the state's substance on expensive presents to the marabouts."

Ali's only adversary was El Hadj Omar. In order to circumvent an invasion by the people of Fouta-n-ké, he combined forces with the chief of Macina but failed to conclude a reliable alliance, and this failure was one of the causes of the downfall both men.

After his son Tata had been defeated at Oïtala, Ali himself was defeated in 1861 at Tio, near Sansanding, even though he was supported by an army from Macina. As a result of these victories, El Hadj Omar entered Ségou on March 10, 1861. Ali retired to Macina, whither he returned with a sizable army to attack Ségou. However, he [101] was ultimately beaten at Kogou and then went to settle at Touna on the right bank of the Bani.

After being attacked and defeated at Touna, Ali fled to Massina, where he was captured and put to death by El Hadj Omar in 1862.

The Bamara next chose Kégné Mari, Ali's brother, for their chief. From 1862 to 1870 he constantly harrassed the people of Fouta. He had returned to Touna to live.

*173 From 1870 to 1878, Nyéné-n-ba kept up a running fight with his predecessors' partisans after settling at Samba-la, not far from Touna.

Mamourou, who ruled for only a few days, was succeeded by Kara-moko, who had no fixed residence and who was plagued by serious family squabbles. Being unable to come to any sort of agreement with his cousins Togoma and Ma-n-son, both sons of Tyé-folo, he had them poisoned. He was himself poisoned in 1887.

175 When Colonel Archinard entered Ségou on April 6, 1890, he summoned Kara-moko's successor and gave him authority over the natives under the direction of a French resident, Captain Hunderberg. However, Mari Dyara, who had accepted this role, secretly organized a plot to assassinate the resident and thus put an end to our control. This treason was punished as it deserved: Mari was shot by the army.

Massa-si Bo-dyan was then called to occupy the post, but former hatred made his position untenable. Direct administration henceforth appeared to be the only possible solution to safeguard our interests.

History of the Empire of Kaarta

The Descendants of Nya Ngolo

*173 Sounsan (1). When Sounsan and his people had crossed
*173 the Niger with the help of the poyon', they proceeded in the direction of Lamballaré (2). There, at the village of Darigo, Sounsan

---

[551] [845] 1. As we shall see, the given name marks some event connected with the person's birth. It is common practice, when the delivery is difficult, to hang a rabbit's foot at the mother's side, hence the name Sounsan ("rabbit" in Bambara). The name Péné, used elsewhere, has the same etymology.

*173 564 Sounsan is said to have practiced the saddle-maker's trade at Kounando. It is told how one day he went with a kulé (a native carpenter) into the country to get some wood needed for a saddle. At one point the two became separated. The kulé found some honey and ate it, only to be taken sick. He threw up the honey on some stones and then went away. Soon after, Sounsan passed the spot and, seeing the honey, picked it up and ate it. When, on his way back, he learned how the honey happened to be there, he was so disgusted and cursed the kulé so roundly that, since that time, none of his people can touch a kulé with impunity. All members of that caste are thus tne (taboo) for that branch of the Kouloubali.

[103] 2. In the Soninké language, this is the name of the region watered by a swamp

*173
103
(lambe, in the local dialect) which, south of Ouossébougou, has its source near Dongué and ends in a pool at Ouaba. In Soninké, "Lamballaré" means literally "on the edge of a watercourse," and the Bambara use "Kodala" in the same sense. In Sounsan's day, this was a small canton ruled by the Soninké of Darigo, a village called Douabougou (market) by the Bambara and situated on one of the branches of the Segabala (of the maps), a tributary of the Baoulé.

According to Raffenel (Vol. I, p. 365), the Soninké village was called Baïko, a name unknown to me and one which seems likely to have resulted from a mishearing of the name Darigo. In any case, its identification with Bammako, as proposed by Raffenel, is unacceptable.

*173 accepted the hospitality of a blacksmith, fa Siné Dyara, asking the latter's protection from probable pursuit by Barama Ngolo. Fa Siné was poor but he is said to have understood the language of the birds and, at the very moment when he was talking to Sounsan, a passing bird told him that powerful chiefs would descend from his guest. That is why he said to Sounsan: "I'm a poor man, but I'll do all I can for you and your descendants. In return, I ask that you promise -- for yourself and for them -- these things: first, that you never kill nor imprison any of my people; then [104] that, every time the head of your family changes, a wife and a horse belonging to the dead man be given to the head of my family."

695 They swore on a copper anvil which was thrown into a well, and after that fa Siné told Sounsan where he was to settle.

Sounsan was still closely allied to some of the Taraoré, whose descendants now live in the Diangounté area. They gave him a wife named Dougo (1), who was the mother of his son Massa.

1. According to another version, Dougo

*173

> was given to Sounsan by the Peul of Massa-la when he spent some time among them with his father. According to Adam's account, Dougo belonged to the Koïta family but that would not prevent the family from being called Taraoré also, since that name is frequently borrowed as a mark of distinction, particularly among converts to Islam.

Further, he had a blood pact with one Kassi Konaré (or Konoré), who was a fugitive from Tamato in the Kala region as a result of family troubles (2).

> 2. Kassi is the ancestor of the Konaré called Kala-n-ka-u, that is, natives of Kala. Raffenel calls them Khonoré and Kala-ngou, terms borrowed from the Soninké people.

The Taraoré lived by armed pillage and they interested Sounsan and Kassi in their operations; booty captured jointly was divided into three equal shares.

At this time, Massa, Sounsan's son, was a strong, daring and courageous young man. He lived in the constant company of the "young men" (kama-len'-u) of Darigo and, above all, he never missed one of their raids. Indeed, oftener than not, he was the instigator and leader of their expeditions. So it was that one day he raided the village of Fallou, where he captured 25 persons and as a reward for his "luck," chose a boy named Siné Taraoré to become his first slave.

At ordinary times, Massa went hunting and never failed to share his game with his companions. Further, following his father's example, he was skillful at making and repairing saddles. Here too his qualities were much appreciated by the young men, who often told him: "We will do anything you command to show our devotion to you."

Massa told his father about these remarks, and the old man, shaking his head, said: "That is only flattery with a purpose.

*173 Still, if you think your friends are sincere, [165] have them swear on our idol Nko, which is wrapped in a monkey-skin -- have them swear that, if need be, they will not hesitate to fight even their own parents if you require it. Then, if they break their word, Nko will kill them."

So the young men swore on Nko to be loyal to Massa and his cause.

One day Massa led them in an attack on Sanou-ba Mamari Dyara at Fala-da-la, near Niamala in the canton of Lamballaré. The expedition brought back 18 slaves, of whom Massa took as his share, for "luck," one called Dyan-Koro-ba Dembélé.

Souman felt uncomfortable as a foreigner in the Soninké village of Darigo and so one day he confided to fa Siné: "I have decided to settle with my people at the place called Tomo-na (1)

1. Tomonda on the maps.

and I am going to build a house there."

The young men joined Massa in undertakings which, begun rather uncertainly, soon took on quite another aspect. Calling attention to the abundance of the harvest, Massa had no trouble convincing his friends that the ton' needed a safe place to store their resources: "For the people we are going to rob are quite capable of uniting against us, and then how would we resist them?"

So it was that, on the advice of his father, old Souman, Massa built a high and strong palisade surrounded by a deep moat and enclosing a virtually unassailable redoubt. This place was called Sinsa-ro (lit., "within the palisade") and also Souman-na (lit., "at Souman's"). (2)

2. A tradition reported by Raffenel calls it Kéniédougou (Vol. 1, p. 366).

One day there arrived from Kong a caravan of 740 slaves carrying guns and powder. Led by Marka merchants, the slaves were tied in pairs with ropes around their necks. It was the habit

*173 of the caravan leaders to entrust the slaves to the village chief at each halt and to remain outside the walls themselves to watch over their other merchandise. On its way to Darigo, the caravan stopped at Sounsan-na.

Since Sounsan was by now old and living very quietly, he turned over to Massa [106] the care of housing these transients. Massa invited the caravan leaders to lock up their slaves in his redoubt, with himself as guard, while three of the leaders would keep good watch at the gate. They accepted this proposal.

During the night, a slave named Sandyan Konaré approached Massa, saying: "We and you are of the same race, while we don't understand these people who are leading us. If you free us, we'll become your slaves and follow wherever you wish." At first, Massa refused; then, at Sandyan's insistence, he sought out old Sounsan for advice.

The latter said: "My son, you must seize this opportunity, for fortune favors only the daring. In order to satisfy yourself as to the true intentions of these people, have them take an oath on our idol Nko and, if they agree to it, do your best."

Sandyan and his companions took the oath.

In order not to endanger the plan, Massa freed only two of the slaves and gave them bludgeons, with which they killed the guards. Then, after freeing the rest, Massa mounted the roof of the redoubt and shouted to the people of Darigo that the slaves had rebelled and had assassinated their masters. The caravan leaders camping outside were terror-stricken and took to their heels, leaving behind all their merchandise. Massa put the guns and powder in a safe place.

After these events, Massa sent Mori-ba, son of _fa_ Siné, to ask his father whether the slaves ought to be turned over to the people of Darigo. _Fa_ Siné answered: "Let Massa keep the slaves, and I'll furnish him with enough bullets to resist the people of Darigo."

Further, in line with his own father's advice, Massa assembled the young men and told them frankly what had happened. The old man had said: "Force them to take a stand and, if they refuse to make common cause with you, Nko will kill them

173 because of their oath. On the other hand, if they approve your action, we shall keep the slaves."

The young men entirely approved of Massa's decisions and declared themselves ready to obey him. Massa then addressed the slaves, saying: "If you refuse to obey me, I shall return you to your masters; if you [107] follow me, we shall make war." (1)

1. A more exact term would be "armed pillage."

They renewed their oath of obedience.

Thereupon, being confident of his own strength, Massa notified the people of Darigo that he was not going to return the slaves. Then the people of Darigo made ready to attack him (2).

2. Raffenel also suggests that a similar sort of transformation of slaves into warriors was the basis of the empire of Kaarta. Others say that the affair took place under Séba-Mana (Traditions historiques et légendaires [Historical Traditions and Legends], Delafosse) and still others that it occurred in the time of Déssé-koro (Traditions historiques et légendaires, Delafosse). It is more than likely that this was the usual means by which adventurers used to gather bands of plunderers.

At this time Kassoum Konaré, the ancestor of the Usoubila-ka, arrived with a large fighting unit to ask for Massa's only daughter, Sata, in marriage. Massa agreed and absorbed his son-in-law's people into his own forces.

Old Sounsan, feeling his end at hand, prayed to Allah: "If my son is to gain power from the coming struggle, let me die at once; if not, let me live for ten years more." Three days later he was dead.

Massa and His Descendants (Massa-si-ou) (3)

3. "Native traditions often make out that Sonsa and Sounsa-Massa are one and the same person, to whom they give the title of massa or mansa, meaning 'king' in Banmana, so it is that the word massa-si or mansa-si should be interpreted to mean 'descendant of the king' and not 'descendant of a man named Massa' " (Delafosse, in Traditions historiques et légendaires, p. 52, note 4).

"The Kouloubali who were descended from Niangolo, the elder brother of Baramangolo, had adopted the title of Massa-si (descendants of the king) because they belonged to the senior branch."

It is evident that this interpretation does not correspond with my text. However, I have often been told by native traditionists that Massa-si meant "descendant of a man named Massa." It might be that Sounsan-Massa was a double name applied to a single person, as was the case for several Massa-si chiefs, including Seba-Mana, Gran-Forokoro, and Massa-Bakari. Even though a single person is meant, that would still be no obstacle to the assumption that the word Massa-si means "descendant of Massa" by an abbreviation of Soun-san-Massa, since we have analogous examples: Biton-si and Ngolo-si are used to designate respectively the descendants of Mamari-Biton Kouloubali and Ngolo Dyara. It is true that Massa-si, composed of massa meaning "king," may refer to a whole royal lineage, but it should be noted that among

*173
[643
551]

the Bambara with whom we are concerned, the expression Massa-si is only used when referring to the royal lineage of Kaarta.

Massa (1670-1690). In order to combat Massa, the Marka people of Darigo summoned the Bambara who were [108] under their authority and whose principal chiefs were the following: Tonnéguéla Mari-dyan Dembélé; Konikoni Tiénégué Dyara; Tiéma Dyara; and Sanou-ba-Mamari Dyara of Fala-da-la.

The siege of Sounsan-na began. Thanks to preparations made in advance, Massa was able to hold out for many months, while making sorties against the attackers.

However, neither side had prevailed when, in the eleventh month, Massa managed to escape during the night. Followed by the boldest of his followers, he fell on the village of Mari-dyan Dembélé, sacked it and, loaded with booty, managed to return to his tata. He appeared next day on the roof to taunt Mari-dyan and showed him his favorite wife and her finest embroidered blouse.

Such audacity gave the other chiefs food for thought; each of them reflected that Mari-dyan's fate might be in store for himself and so the Bambara chiefs took counsel. However, just as the discussion was about to get started, one of those present, Sanou-ba Mamari Dyara, withdrew, saying that he did not want to take part in any deliberations along with a one-eyed man, because the only result would be a disaster. He was referring to Konikoni Tiénégué Dyara who, indeed, had only one eye.

Upset by these circumstances, the allies parted to return home; so Massa was saved. However, at the instigation of the Marka people, the Bambara chiefs made all the trouble they could for Massa. They sent word to Ségou to the descendants of Barama-Ngolo that the fugitives vainly sought by their ancestor were still in their country and they offered to help in any undertaking against them (1).

1. Massa is reputed to have had 67 sons and 76 daughters. In principle, he imposed

*173

> exogamy, saying: "No one shall marry one of my daughters unless he is an inhabitant of the town." Then he charged his children never to take spouses from the Massa-si clan (Traditions historiques et légendaires, Delafosse, p. 53).

Béni Fali-Sékolo (1690-1700). Since Massa was by now a very old man, he abandoned active authority to his son, Béni Fali, called Sékoro, who was as strong and brave as his father. He continued his father's practice of armed pillage, assisted by his many brothers, the best-known of whom included: Gran, called Foro-koro; Séba, called Mana; Tyema, the son of Nya-nilé; Bo, son of Déni-ba; Massa, called [109] Bakari; Séri-ba and Allahi, who were twins; and Mo-siré-bilé.

Gran, called Foro-koro (1700-1709). Some say that intrigues by the Soninké and the people of Niamala were what persuaded the fama of Ségou, Mamari called Biton Kouloubali, to attack the Massa-si. After a siege that lasted for three years, Sounsan-na had to surrender. Foro-koro was taken prisoner and sent to Ségou, where he was put to death. His skull (1) was kept as a talisman by Biton.

Others, more explicit, tell how and why the attack was carried out against Sounsan-na. Mamari called Biton Kouloubali had given his daughter ba (2) Sana in marriage to Sana-ba Mamari (3) Kouloubali of Mourdia. When the wedding party that

[554
576]

1. Mamari made it into a box for his amulets and it was the basis of his magic.

2. The word ba, which literally means "mother," is here used as a title of respect.

3. Sana-ba Mamari means "Mamari, son of the woman named Sana-ba."

*173 was bringing ba Sana to her future husband reached Damfa, it was met by Foro-koro. He fell in love with ba Sana at first sight and carried her away from her attendants by force and made her his wife.

It was to avenge this affront that Biton attacked Sounsanna. It is said that he used magic arts to assure victory. He sent to Foro-koro a shirt (dloki) over which he had pronounced incantations and through which he had repeatedly stuck a needle while a marabout performed the appropriate rites. A Dioula was assigned the job of forcing Foro-koro to put on the fatal shirt. The Dioula went to Sounsan-na on a market day and took his place in the public square beside a well-stocked beer (dlo) seller. Foro-koro, being a bit tipsy, had noticed this luxurious dloki and asked the price, which was ten slaves. Although this had discouraged other purchasers, on the contrary it aroused Foro-koro's vanity. He agreed to pay the price and at once put on the dloki to show it off. Since the Dioula had accomplished his purpose, he was in no mood to await payment and, fearing reprisals, he fled.

The next day, when he had sobered up, Foro-koro found the price too high [110] and sent for the Dioula. The man's precipitate departure put him on his guard and, fearing sorcery, he discarded the splendid dloki. It was too late; the spell worked.

Foro-koro owed his life solely to the fact that his wife, ba Sana, loved him and prevented her father's wrath from prevailing. However, Biton's followers managed to satisfy their master's desire for revenge by taking advantage of a lapse in ba Sana's vigilance. They marked Foro-koro with the tatoo peculiar to the slaves belonging to the fama of Ségou, and one day, when ba Sana was temporarily absent, they seized Foro-koro, dragged him into the brush, put him to death and abandoned his body after cutting off the head.

It is said that ba Sana was so grief-stricken that she was unwilling to remain near her father. So she left Ségou-koro with all her slaves and settled in a place called ba Sana-bougou after her, and later re-named Ségou-bougou.

*173 Séba, called Mana (1709-1760). The destruction of Sounsan-na forced the Massa-si survivors and those still faithful to them to seek refuge elsewhere from the implacable hatred of Bitou. Some went to Bélé-dougou, others to Kaarta-binné (1)

> 1. In Kaarta-binné they had accepted the hospitality of the chief of that country, Soroko Dionné. They established themselves there, cultivated their fields, recouped their fortunes and then built a fortified enclosure. A caravan of 120 slaves led by people from Fouta arrived and, on orders from Soroko-Dioune [sic], the Massa-si gave them shelter. They either aided or provoked a revolt of the slaves, taking an oath of alliance with them as equals. However, the Massa-si retained the leading role and the right of interminage [from minage (?), tax on grain] (Traditions historiques et légendaires, pp. 54-55).

Among these fugitives were three of Massa's sons: Séba, called Mana; Bo, son of Deni-ba; Massa, called Bakari. There were also his [Massa's] daughter Sata and his four grandsons: Bo, son of Sira; Bo, son of Moussou-koura; Ntin or Ntén, or Ntégué-koro; and Sarhaba.

At this period the Kingui area was under Diawara power and it dominated all the surrounding cantons. However, grave dissension split the Diawara family into two parties; the party of the Sagoné and that of the Dabo-la. Implacably hostile to each other, they were fighting for power. The Dabo-la party was then in command and had its capital at Diara. Tourougoumbé was the [111] stronghold of the Sagoné. The chief at Nioro was the dyawando Bilali and the chief at Khagna-rémmé was Mansa Khagna.

Hoping to obtain valuable support, the Diawara Sagoné sent an emissary named Dia Doumbé Diawara to the Massa-si.

*173 The seers had predicted that if the first child born among the Massa-si after the arrival of the emissary turned out to be a boy, it would show that the decline of the Massa-si was only temporary. The contrary would indicate that the decline of the Massa-si would be complete. Now, at the very moment that Dia-Doumbé was greeting Séba Mana, word was brought that a woman named Ba-koro had just given birth to a male child whose father was Sira Bo: the child was named Ba-koro Tiéma.

Dia Doumbé carried out his mission by advising Séba Mana to send some gold to Mansa Khagna and to Souroukou Diani (1) to assure their neutrality while he attacked Markha-na, a Dabo-la village, where Dia Doumbé said that the Massa-si would find abundant resources.

Séba Mana followed this advice and had no trouble taking Makha-na.

After this success, Séba Mana decided to settle at Léé, but Mansa Khagna, inspired by the gold he had received from the Massa-si, thought that if he exterminated them he would obtain valuable loot. So he blocked the road to Léé.

Séba Mana was victorious and he killed 98 out of the 110 elder sons, who, according to custom, were riding white horses.

He continued on his way and settled at Guidioumé Makha-na, near the mountain of Goumbourou, where a petrified wedding [perhaps a rock formation?] is still to be seen (2). There, through the intermediation of Dia Doumbé, he accepted the surrender of Mansa Khagna.

As a mark of special deference, the Massa-si received the following gifts: two horses from Mansa Khagna; two horses from

---

1. Called Soroko Diouné by other traditionists, he was chief of Kaarta-Binné.

2. The legend of the petrified wedding is told by Raffenel, Vol. 1, pp. 219-220.

*173 the Diawara Sagoné; millet from Souroukou Diani; cattle from dyawando Bilali; chickens from the Diarisso; and strips of native cotton from the Marka. Later, when [112] their power had been restored, the Massa-si imposed these same gifts as tribute (1).

> 1. "At a time which seems to antedate Séba Mana, the Massa-si left Kaarta to go to the village of Guémou, where they were much feared. The Dyawara gave them a gift of seven thoroughbred horses; the Dyawando gave three fine heifers; and the Touré, grain and chickens. Then they came to Guidioumé with Séba-Mana at their head; the people of Guidioumé gave them 2,000 measures of grain; the Diafounou people, a thoroughbred horse and 500 measures of grain. From there they went to Mounia (Diafounou), north of Koniakari, and fought with the people of Khasso." (Traditions historiques et légendaires, p. 55).

Séba Mana finally settled at Léé. Three times he was attacked by the people of Khasso and three times he resisted them successfully, but his situation was nonetheless very precarious. In order to remedy this state of affairs, Déni-ba Bo (2) gave himself up as security for 67 horses to Suley, chief of the Dénianké. His griot Souleyman accompanied him.

> 2. According to the version reported by Delafosse, a certain Mansa Bakari (perhaps Massa Bakari) was sent to Fouta with gold to buy a relief army.

Déni-ba Bo supported himself by hunting and turned over his bag to a woman of the mabo caste who had attached herself to him. One day, this woman told him that she was on intimate terms with a genie who most often took on the guise of a small, *173 deformed horse. She gave him this horse, whose name was Kori, and asked the animal to take good care of Déni-ba Bo.

It came about that one day some Moors stole the herds of the Dénianké people. When this occurred, the war drum (tabala) called together all the men, who lost no time in following the thieves' tracks. At the time, Deni-ba Bo was out hunting and when he heard the news on his return, he asked Suley Ndyaye (3) [for permission] to join the pursuers. Suley agreed and allowed him to choose a horse. Deni-ba Bo chose Kori and, despite the ridicule of the onlookers, rode off on the ugly little animal.

As they rode along, Kori said: "We are going to find our warriors beaten by the Moors and wanting you to turn back. Don't listen to them. Order your griot to follow the tracks of the cattle and proceed as far as the Moors' camp. There you will find your griot on the other side of the camp from the spot where you will be and, at an agreed signal, both of you fire your guns. The Moors will think they are surrounded and will flee."

[113] Everything turned out just as Kori had predicted. The warriors tried to persuade Déni-ba Bo to retreat, but he refused and, upon reaching the Moors' camp, employed the trick suggested by Kori. It was entirely successful. The Moors fled, and Déni-ba Bo easily recovered the stolen herds and returned them to the village.

As a reward for this splendid achievement, the Dénianké women decided to ransom Déni-ba Bo and, for this purpose offered all of their jewels. Suley refused, however, preferring to release his debt prisoner himself. In return he asked Déni-ba Bo to bind himself by a blood-oath, telling him furthermore to take any of his property he wanted. At the suggestion of the mabo woman, Déni-ba Bo asked for his friend Kori and for the royal insignia which included a pair of trousers, a shirt, a red cap and turban, and a copper axe.

3. Chief of the Denianké.

*173 When he had been freed, Déni-ba Bo left at once to rejoin his brother Séba Mana. The latter was still shaken by an encounter that very morning with the Khassonké [Kasonke] who had had a column composed of 60 "foot." Mounting his horse, Séba Mana wanted to show his brother the scene of the battle. When they reached a small stream, the horses easily crossed over, but Séba Mana, who was very corpulent, hurt himself against the pommel of his saddle. With Déni-ba Bo's help he was able to reach home, but he fell gravely ill and died three months later (1).

*173
855
868

1. Séba Mana had established a special system of physical training for the young Massa-si boys. From the time they were weaned up to the age of twelve or thereabouts, they were brought up away from their families and were provided with a copious diet, consisting especially of meat which they ate almost raw. They were trained in boxing. Slaves bathed them morning and evening. When they reached the age of twelve, each received from the fama a complete set of clothes, a thoroughbred horse with harness and groom. They then returned to their father's house and were thus ready to swell the ranks of the army if need arose.

*173 Déni-ba Bo (1760-1780). The army of the Massa-si was still very weak since it had at that time only two "foot" instead of four. Nevertheless, Déni-ba Bo was determined to regain the land of his forefathers and said: "I intend to free myself from the n ti de and the n kho le (2)." He had cowries pulverized,

2. n ti de means "I say" in Soninké and n kho le means the same thing in Khassonké. Thus, Déni-ba Bo meant that he intended to free himself from both peoples.

*173 sprinkled Séba Mana's body with the resulting dust, wrapped it in [114] an ox-hide and placed it on a litter. He set out and in this manner reached Guémou, where he interred Séba Mana.

Then he marched against the Bambara of Niamala (near Mourdia) and, after defeating them, continued a vigorous offensive against all the enemies of his family. At Djigué he attacked Tiéma Dembélé, who had just returned from leading a column against Ségou. He took Djigué and killed Tiéma. He then turned against his uncle Sama Kouloubali and killed him at Kolo. Within three years he had taken and plundered 60 villages. In each village he used up the food provisions, enslaved the populace and circumcised the boys whom he then incorporated into his army.

Like his predecessors, he fought against the Khassonké; he besieged their capital, Koniakari, but was defeated. Not wishing to submit to a futile defeat, he decided to have himself killed in order to fulfill the prophecy that the Massa-si would rule over the land in which he died. Taking the saddle off his horse, he put it on the ground and sat down, expecting that the first Khassonké who found him would certainly kill him. He was discovered by three shoemakers who took him to Demba Séga, the chief of the Khassonké.

Since the latter had heard the prophecy, he did not want to put the prisoner to death; so he turned him over to his close friends. However, Madi, Demba Séga's son, together with the Diawara Dabola and some Bambara from Niamala, killed him in secret.

He had reigned for twenty years.

Sira Bo (1780-1789). Sira Bo established his headquarters at Guémou (southwest of Nioro) and continued to work for the restoration of the Massa-si power.

During the nine years of his reign, he made profitable conquests. He took Kita, the land of the Ba-fing, and the country of Ménou; he continued the struggle with Khasso with varying success; he conquered part of Bélédougou and occupied Guidioumé and Bakhounou.

*173 Déssé-koro (1789-1802). According to one tradition, Déssé was captured at the same time as Foro-koro and taken with him to Ségou where he is said to have been marked with the [115] tatoo (1) peculiar to the slaves of the Ségou branch of the Kouloubali. Authority would normally have passed to Déssé on the death of Séba Mana, but because Déssé's fate was uncertain it was offered instead to Sira Bo. The latter is said to have refused at first, but he accepted when his brother Mo-siré guaranteed that even if Déssé should return, the power would not be withdrawn. When Déssé returned ten years later, he respected the promise made by his brother Mo-siré and waited until the death of Sira Bo to take command.

Whatever may be the truth of the matter, Déssé took advantage of the quarrels that arose at Ségou upon Ngolo Dyara's death to capture Niamina. It is said that a small forest of baobab trees later arose on the spot where his troops had encamped.

When Ma-n-son had been relieved of the worst of his worries by his victory over Nyana-n-koro, he was anxious to avenge the capture of Niamina (2) and so turned his attention to

[304-567]

1. This well-known tatoo consists of three cuts on each side of the face running from the temples to the lower jaw in front of the ears.

2. The relations between Déssé and the people of Ségou are very obscure. Some say that, on being asked for help by Nyana-n-koro, Déssé stipulated that he would only agree to help if Foro-koro's skull were returned to him. When he had gained possession of the relic, he returned to Kaarta, promising to come back at the appropriate time. He did in fact return and encamped near Ségou after the defeat and death of Nyana-n-koro; he

Déssé. He besieged Guémou (3) on February 22, 1796, according

---

sent word to Ma-n-son that he owed his victory to the fact that he -- Déssé -- had not aided Nyana-n-koro.

Then Ma-n-son is said to have sent a challenge to Déssé. Ma-n-son's emissary is supposed to have appeared before Déssé bearing the choice of a hoe (daba), a fetter and a bit. This symbolism meant that if Déssé chose the hoe, he was declaring an end to warfare; if he accepted the fetter, he was acknowledging the authority of Ma-n-son; and, finally, if he chose the bit, it meant that he intended to go on with striving for domination. Déssé is said to have chosen the bit, and that is why Ma-n-son attacked Guémou.

[3] According to another tradition, he merely pillaged the Bélédougou region while one of his brothers was simultaneously ravaging the left bank of the Niger from Niamina to Bammako. After all this, Ma-n-son returned to Ségou.

It was another affair that again brought Déssé and Ma-n-son into conflict. A Bambara village on the left bank that was under the protection of Ségou had its cattle carried off by some Moors. The cattle were sold to some Kaarta people, and the Bambara from whom they had been stolen made claims in vain. When Déssé was informed, he sided with his people, and Ma-n-son, likewise favoring his people, carried the war into Kaarta.

*173 to Mungo Park. Déssé fled via Dioka to Tango

After having pillaged and destroyed Guémou, Ma-n-son attacked [116] Tango. Déssé fled once more and took a stand at Guidingouma in the Guidimaka area. Ma-n-son surrounded the place, hoping to starve it out, but time passed without result and, sensing fatigue -- always a bad adviser -- among his ill-supplied men, he appealed to Ali, chief of the Oulad Mbarek. Ali refused to budge. So Ma-n-son turned against this recalcitrant ally and marched on Diara. However, hearing along the way at Niono that the Oulad Mbarek people had left for the north, he decided against following them and went home to Ségou.

Rid of his enemy, Déssé returned to Guémou and, as this town had been destroyed, settled not far off at Dioka, which he fortified. Not long after, when a large caravan of slaves was passing through, he followed his grandfather Massa's example and became the leader of a new band of plunderers who joined the ranks of his faithful followers.

He continued his raids on the surrounding country until his death.

Ntin-koro (1802-1811. During his nine-years' reign, this Massa-si chief concentrated his efforts against the Kagoro people and conquered them. He also made some profitable raids among the Bambouc people.

Sara-ba (1811-1815). He spent the four years of his reign in pillaging Bélédougou, Birgo and Mandé.

Moussou-koura Bo (1815-1818). He was an implacable enemy of the Khassonké, a fact which earned him the title Fula-fo Bo ("Bo, killer of Peul"). Thanks to the intrigues of Kombossé Saféré, chief of Séro, he found himself master of the situation. After taking Koniakari and ousting the chiefs of Khasso, he became the ruler of Khasso on the right bank, so he assigned the area to one of his slaves named Fa-digui.

Bo-dyan Mori-ba (1818-1835). Bo-dyan set up his headquarters at Yelimané.

After forcing Fa-digui to submit, he raided the villages of the Gadiaga, Damga, Saloum and Bambouc areas in collaboration

*173 with the chief of Bondou. He thus found himself drawn into making peace with the chief of Khasso, who was an ally of the Bondou chief.

[117] Nyaralen Gran (1835-1844). We know nothing about this nine-year reign.

Mamari Kan-dyan (1844-1854). He left Yelimané for Khondié and then settled at Nioro. He was in command of the Massa-si when El Hadj Omar appeared. Before this, he had ousted the Diawara from Nioro, where he had settled; but he had had to fight for seven years with these same Diawara and his authority had only just begun to seem established when the Foutanké prophet arrived. Mamari Kan-dyan was unable to resist and fell into the hands of the invader. At first his life was spared but he was finally put to death, as will be described in what follows (see Chapter 6, Islam).

Those of the Massa-si who eluded El Hadj Omar fled to Bangassi (Foula-dougou), where they settled under the authority of their chief, Diringa Mori, who died 16 years later.

Under Boussei, who succeeded Diringa Mori, the Massa-si broke up into two groups: one settled at Guémou-koura (Kaarta-binné) and the other emigrated to Diani (Gadiaga).

On the death of Boussei there were new migrations. Modi Siré, son of Gran, settled first at Fata-fin and then at Félé-ba, villages near Badoumké; another group went to the Bondou area and settled at the village of Kidira.

Dama, who succeeded Boussei, abandoned Kidira and went to Goré, near Daramané, and then to Guémou, south of Diani (Gadiaga). There he divided the Massa-si into seven villages: Guémou, Dyidyan, Dyamé-khassé, Taroutallah, Madi-na, Nyaralén Dyogou and Moussa Makhana.

175 After the French had taken Nioro, Dama, who had always been hostile to the "people of Fouta," was called to Kaarta by Colonel Archinard. He settled at Farabougou and died there. When Ségou was captured by the French, we chose Dama's son, Bo-dyan, to govern there.

Dama was succeeded as chief of the Massa-si by Allahi, whose authority lasted for only nine months. He was succeeded

*173 by Mori-ba and then by Gossi, who left Fara-bougou for Lambé and finally went to Diabé.

[119] Chapter 2

Concepts

1. Beliefs

195 826 The Bambara, like ourselves, has a sense of inner life and he expresses it in his language through figurative expressions which, in a sense, localize his sensations.

The eye, whose lens reflects everything that goes on around us, is, for the Bambara, a kind of mirror of the inner life: to be sad, nye na-fin, means "to have a somber eye"; to be cheerful, nye na-dye, means "to have a bright eye"; to be beaten down, nye na-koro, means "to have an eye that is old."

The head is the seat of decision, will and pride. To be active, kun' kene, is "to have an ardent head"; to be tenacious, kun' gwele, is "to have a hard head."

All emotional life is concentrated in the heart. A man who has proper feelings, a son' ka nyi, "has a good heart"; one who is bad, a son' ka dyugu, "has an evil heart." In a more general sense, anything that acts within (kono) us is a be n-kono, literally "it is within myself," meaning "I think, I intend, etc."

It is noteworthy that for these people life resides especially in two organs, the heart and the liver. The most solemn oath among them always contains the phrase: i ka n son' ni m bien' ta or "take my heart and my liver," that is, "destroy me, annihilate me, by removing these two knots of life."

774 195 In addition to these figurative expressions, which are common to [120] all languages, there are abstract terms which serve to express all that we imply in the words "life," "soul," etc. In Bambara, ni is "physical life," characterized by the drawing of breath (ni), which begins and ends with life. Dusu is emotional or moral life; si is duration, in the sense of living and also of becoming.

774 The Bambara does not conceive of a body's shadow as being caused by the interception of light by that body. For him

774 it is a fluid emanated from the body itself and made manifest as much by the shadow, which may be seen in sunlight or in a bright light, as by the image which appears when the body is placed in front of a reflecting surface. This fluid is called dya.

774 The dya has the faculty of leaving the body when it is
asleep to wander wherever it wishes; the sight of its wanderings,
787 which the body can witness, constitutes a dream (sugo). Dream
is a kind of reality; it is in a sense the private life of the dya
in company with its fellow-dya. During waking hours, the dya
accompanies the actions of the body; during sleep, the body
must endure the dya's peregrinations, for there is no doubt but
that the dya rules the body it inhabits. Thus, waking a person
abruptly is virtually a criminal act because, if the dya is away
at the time, a too abrupt summons may break the link between
[761] the dya and the body, and such a rupture (sa) is death (sa). Be-
sides, the body has only a vague memory of the wanderings of its
dya, it experiences the consequences of this action. On awaking,
the body is exhausted by all these mad rushing about and fantastic
escapades, and it feels the effects of the dya's actions, either
good or bad.

In short, this dya is comparable to what some Europeans call a "double."

775 Further, it appears that the dya plays a crucial role in the "return" (sagi) to life, that is, rebirth, which is one of the most strongly held beliefs of the Bambara. After death, the dya is reincarnated in the same families; the Bambara even claim to have positive proof of this fact. Such and such a newborn child has such and such anatomical peculiarity of the deceased -- is this not a proof that the deceased wanted to show thereby that he was re-embodied? If a child dies very young, the body is mutilated in some agreed manner -- a finger is broken, for instance -- [121] and if later a child is born in the family with a similar deformity, everyone is convinced that the dead child has "returned": a sagira, "he has returned."

It is also believed possible for a dead person to be reincarnated far from his own people. All over Bambara country stories are retold of dead people who, more or less long after

It was then that Ma-n-son founded the village of Sirakoro, but he assigned no chief to it, keeping the direct administration of the place in his own hands.

Of the 740 chiefs of slaves who had sworn allegiance to him only 60 remained; he decided that they alone should continue to exercise their functions and that their respective posts should be hereditary.

[89] Ma-n-son called a general assembly and asked for a column to be used against Yarouga. The slaves refused on the ground that it would be enough to summon Yarouga to get satisfaction.

Ma-n-son crossed to the left bank with a small escort and summoned Yarouga. On the way, Yarouga was overpowered by the emissaries, dragged before Ma-n-son and at his orders put to death.

He was replaced by Ko-dyado, one of Ma-n-son's slaves.

Ma-n-son sought to find out whether the Peul chief, Bon-gué, had left any children. When he learned that there were five, he summoned the eldest to him and gave him 1,740 slaves and command over Sama-n-koro.

Then Ma-n-son called the other Peul chief, Ndyan, and said: "Why did you not tell me that Bon-gué had left five children?"

"They were so young!"

"That's a poor reason! The truth is that you profited by my being busy elsewhere to appropriate all of your brother Bon-gué's property. But no matter, I shall do you no harm. You may keep what you have, but you'll get no more."

Out of the twelve Peul settlements organized by Ngolo, Ma-n-son made two groups: one for Ndyan and the other for Bon-gué's children. This is how the two Peul tribes, Ndyan-na and Bon-gué-na, known as the *Fur-ba Fla-u*, were founded. When Ndyan died, he was succeeded by his son Bakari, more commonly known as Bakari Ndyan (Bakari, son of Ndyan) (1).

1. See in the following "texts" fragments of the legendary history of this Bakari Ndyan.

775 their death and more or less far away from the place where they died, have been seen living a new life.

The *dya* is then, as it were, the essence of individuality,
774 and the body, its material expression, takes on forms that are
775 somehow characteristic of the *dya*.

The *dya* is a fluid which has its own attributes. There are sorcerers who are thought to know ways to capture the *dya*, especially for the purpose of using it to make idols that can talk.

It is further believed that a part of the *dya* is indestructible because it is made up of another fluid common to all nature, which the Bambara call *nyama*.

The *nyama* has no shape, but it retains, as it were, a trace of the identity it had during its incarnation; so the name borne by the person who was animated by this *nyama* has an irresistible attraction for the *nyama* and the latter is forced to obey anyone who knows how to use this propensity to make it carry out his wishes. After death, the *nyama* retains human contacts and, in certain respects, continues to behave as it did during its corporeal lifetime. Its manifestations are seen by the Bambara in matters of vengeance: the *nyama* of an ancestor is especially attentive to the manner in which the ancestor's wishes are being carried out and it is relentless in punishing those who fail to comply. It is the *nyama* of the *fa* (father of a family or patriarch) who torments the accursed; it is the *nyama* of the victim who pursues the murderer; and it is the *nyama* of anything tabooed that strikes down the impious.

So it is that, for the Bambara, a human being is composed of a corporeal body (*su*) which serves as the outward envelope (*fure*) of a fluid element (*dya*), whose subtle essence (*nyama*) is merely a part of the universal energy which permeates all nature.

771 [122] To a certain extent the Bambara applies the foregoing ideas on human beings to all that surrounds him. However, it should not be assumed from this that he conceives of everything as being made exactly in his own image. To express abstract ideas, he uses concrete terms which may, however, give a false impression. There is no doubt whatever that the Bambara differentiates between himself and animals; he also distinguishes from vegetables or minerals.

771 In any case, these are questions which he does not ask
or which, at least, he has not considered in any way that would
cause him to make logical, even if fragmentary, syntheses.
His words and his acts are indications and sometimes even guide-
posts for us, but how uncertain and misleading they can be! And,
in the observation of current facts, how many at least seeming
contradictions there are! However, in the main, the analysis
given in the paragraphs above represents the basis of Bambara
dogma, since everything happens in reality as if the Bambara
were living in accordance with these principles.

That being the case, life results from the union of the
761 two parts of the body, while death is a result of their separation.
772 Whence come these two elements and who it is that decides
upon their union? No answer is possible. The Bambara say,
merely, that certain persons are reincarnations. Precautions
[844] taken during pregnancy and delivery show that childbirth is one
of those mysteries against which taboos must be observed as a
protection. The frequent and readily believed stories about
[845] women giving birth to monsters -- usually animals -- bear wit-
ness to the affinities which, in the minds of the Bambara, exist
between all creatures. But nothing specific is said about what
precedes and determines the birth of a child.

This is a secret to which the Bambara are, of course,
562 not indifferent. It is evidenced in the fact that women, through
778 whom man comes into the world, are held to be doubtful
creatures, at the very least, partly because of menstruation,
which makes a woman impure, and partly because of the mys-
terious travail she endures during the delivery of a child (1).

[774] 1. Women are also susceptible of being possessed continuously by a spirit (see the story of the Déni-bo Ba, p. 123). That is why, when a woman is several times widowed, she is suspected of being possessed by a jealous spirit who kills off her husbands. She is often even thought to be herself a sorceress.

562 This suspicion readily degenerates into disrespect, scorn and
778 hatred when a woman [123] is weak -- this being the usual
state of affairs. On the contrary, the feeling changes to super-
stitious fear if she resorts to occult practices and shows herself
[754] an adept at sorcery. Many old women are held to be very ex-
pert at such practices.

In the same connection, it should be noted that a new-
851 born child is also subject to scrutiny. For seven days after birth
it is not officially taken into the family, because it is thought
that during this period the infant may undergo metamorphosis un-
less closely watched over by its mother.

We shall see, through a study of their institutions, how the Bambara conceive of life and organize it.

Funeral practices will show us how the Bambara regard the idea of death.

And after death?

775 The Romans distinguished among spirits: the manes or
769 good gods (dü[1] manes) and the lemurs or evil spirits, both of
whom take an interest in the family.

The Bambara have analogous concepts.

Once it has left the body, the soul of a patriarch goes to join the souls of his ancestors, where it finds a spiritual family which protects the earthly family.

The manes (fa su-u) always like to frequent the places where their bodies lived, and that is why one keeps the things that belong to the deceased, why he is buried near his house or sometimes even under the floor, and why some families piously keep the skull of the departed to do it honor.

The entrance-hut (blon') is usually the site of the altar of
[778] the ancestors and of the family gods. The ancestral altar may be
a small board with a human mask, called kara, or a mound of
earth shaped vaguely like a human being. The manes are thought
to enter into these objects to receive the offerings and sacrifices
made to them.

It is sometimes thought that the world of the manes may be without light and heat but that otherwise they each continue the existence it had in life with the same passions, the same

[1] [dei ? —Analyst]

775 passions, the same preferences and the same [124] animosities.
769 The weak lead a passive existence in poverty and oblivion, whereas the powerful -- chiefs, heads of families, diviners -- are, on the contrary, active, intriguing and passionately devoted to the interests of their earthly families. They live among their fellow beings, who are incorporeal like themselves, just as their relatives live on earth. However, they all have powers superior to those of earthly men over winds and rain, farming and hunting, in short, over all things that constitute the visible world of man. All can manifest themselves to the living, and they like to choose a place where their presence and their action will be most useful and where they prefer to receive offerings, as in a grove, on a hill, or near a spring or a tomb.

Certain manes are thought to attain an increasingly eminent position in the invisible world through special activity, until they become pure spirits.

Woe unto him who fails to maintain cordial relations with his manes! Woe unto him who neglects the dead! The dead suffer from such negligence, become angry and seek vengeance. Hence the terrifying appearance of ghosts who come to bewitch the impious; hence the possession that disturbs a person's faculties to such a degree that it makes him dangerous to others and only exorcisers could restore them to their normal state.

Here occur the analogies with the lemures, for abandoned manes are easily captured through the sorcerers' artifices and then must do the latter's bidding. Further, all those who were cast off by society during their lifetime because of harmful activities, like those of sorcerers or criminals, the accursed also have their thurifers, whom they help with their supernatural powers.

775 Does this survival of the good and the evil have any purpose or any duration and, if so, what are they? Do people believe in immortality or eternity? Obviously the Bambara do not ask such questions and native practices do not seem to provide any answers. The one definite belief is in a survival which the Bambara can only conceive of in terms of ordinary life; the terms used to describe the other world bear this out. the dead eat,

776 drink, dress themselves, wear adornments, etc. -- in short, behave exactly like living men.

[125] All peoples use or have used such language in trying to express a concept which is by its nature impossible to make concrete. It is, therefore, perhaps premature to conclude that a Bàmbara cannot conceive of a strictly immaterial world for his manes. He is merely at present incapable of giving a description unencumbered with concrete terms in habitual use. However, it may be stated in general that the Bambara does not trouble himself about the why or how of things outside of what he sees or knows. Reality surrounds him and limits him. He makes decisions on the spur of the moment and also under the influence of time-honored empiricism which is the basis of custom. 812

776 We have pointed out that among the incorporeal souls are some who, through the right efforts, rise to such heights that they can enter the world of spirits. There are spirits, indeed, who have nothing of the human about them. What are their origin and nature? The Bambara say of them: ma si fa do, meaning "It is a kind of person." Here, too, the expression betrays the thought. Aside from the fact that the native vocabulary does not provide for expressions strictly immaterial, the Bambara has an inevitable tendency to use himself as an object of comparison. For him, the world of the spirits like that of the manes, is analogous to our own. But the manner in which he speaks of the spirits contradicts his words. A spirit is invisible, without a material body; if it appears, it does so under the most diverse forms, borrowed for a brief time. A spirit is often called "a wind," meaning "a fluid." It is also a weightless substance, so rarefied that it can go anywhere -- even to entering a living man's body, where it can perform all sorts of fantastic things (1).

For the Bambara, most spirits remain in this vague and inconsistent state. Only events, circumstances or the native's will occasionally tear some of them away from this chaos and transports them to the worldly scene (2). We shall speak of them

---

1. See Chapter 7.

2. Assuming for these and other similar

terms the same meaning of supernatural forces.

again in the chapter on brotherhoods.

[126] Spirits, genii and gods (1) known to the Bambara

1. See on p. 123 the tradition about the horse Kori who was the husband of a *mabo* woman.

may be divided into three classes:

First, manes who have become spirits. These are of ten wandering and ill-disposed spirits. That is why the word *nyama*, to which we have alluded, is often used in a pejorative sense. It is also perhaps believed -- by analogy again -- that some manes can become so perfect in evil that they become true evil spirits, just as others become, if not actually good spirits, at least indifferent ones.

A second category comprises genii of the place or gods of the earth (*nyana dugu-da-siri*). There is not a single spot that 823 is inhabited, cultivated, populated or, on the other hand, isolated and deserted that does not have its genie. However, only some of these genii have an organized cult. They are usually the protectors of those who inhabit, cultivate, frequent or visit the places in question, provided that they are suitably honored. They often reveal their presence by entering into direct relations with someone who is in their vicinity and telling him how they wish to be honored in exchange for protection (2); on other occasions they are only discovered by a "seer." In any event, the genie of a place has complete possession of whatever is in the place, and man can profit in one way or another only in accordance with his pact with the genie. In principle he has only a simple right of usufruct, different from and more extensive than our right.

2. See the story about the genie who revealed himself to Kolé (p. 51).

776

The third class comprises the enormous throng of genii of all sorts included under the vague and general term of nyana (3).

[177]

3. One also hears the word nyena. I do not think that this is a corruption of the Arab word jinn. In the first place, it was not Islam that introduced the concept to the Bambara, since it is common to all Blacks. Further, the word nyana is connected with a root nya meaning "powerful," "lord," "master," and nyena is only a dialectal variant.

The nyana may be divided into two categories: the [127] wandering and the solitary, for whom no permanent or formal cult is provided. They live pretty much anywhere. Some have a marked preference for being near men, for crossroads or for the vicinity of wells or springs. They also wander, invisible and ready for pranks, in the courtyards of houses where during the night they love to roam among the kitchen-ware. It is said that they put unclean things into the pots unless one has been careful to turn them upside down. It is even said that if any woman is so imprudent as to use a pot in which one of these wandering spirits has urinated, she will give birth to a sorcerer.

Others of these cult-less spirits throng the countryside and are the terror of travelers (1). Everyone has heard of Wokolo: a little black, hairy hunter who likes to live in the trees, along the paths and also in the brush, beside creeks. Others say that he likes to live in the si (Bassia Parkii) which we call the butter tree or karite. In any case one cannot escape his sharp arrows except

1. They can assume any form they like and take part in the life of humans under the most diverse forms. See p. 123 for the horse Kori.

776 by greeting him as soon as he is observed; if he is unarmed, the best thing to do is to jump on him and rain so many blows on him that he loses count. Then one can escape while he is still knocked out.

[779] The second category of nyana includes a motley array of spirits, all of whom have cults. The outward manifestations of these cults have struck anyone traveling in the country, and under their apparent diversity there are recognizable general traits. All are magic practices intended to make the spirits serve man's will. By this means, man tries to make use of supernatural forces of the same nature as those whose unfavorable action he fears. He resorts to the invisible for weapons of defense and of attack. However, these practices must never go beyond certain limits, which are not too well-defined, if they are to be legitimate. Beyond these limits it becomes illicit magic or sorcery, which is especially feared and, whenever possible, relentlessly punished (2).

2. See Chapter 7 on the suba.

[128] In reality, the whole mass of these facts is extremely confused. The licit and the illicit are intertwined to the point where they cannot be disentangled. However, there are perfectly clear cases where there seems to be no doubt about the distinction; but there are all possible gradations between strictly magic practices and unadulterated sorcery.

Theoretically, the nyana are all-powerful and are honored the more in proportion to these powers, since, in generally, it is their malevolent side that earns them their reputation. Homage is paid to them much more out of fear and terror than because of the kindness sometimes attributed to them. What a Bambara wants of them is the dyigi-seme, or "powerful master," who will protect him against everything and everyone and, if need be, help him against his enemies or give him the means of succeeding in some evil project.

A belief in a master of the universe exists among the Bambara, but the belief has borrowed from Islam a degree of

776 precision of which the native substratum seems unaware. In
any event, there is no Bambara word for "God" except the one
[177] brought by the Moslems -- "Allah," pronounced as Ngala. This
lack of a Bambara word may be explained by their custom of
avoiding pronouncing the name of powerful people for fear of
incurring their wrath.

There is no superior spirit of evil: Seïtane [Satan] is
[177] likewise a Moslem introduction. The Bambara does not visualize a hierarchy of spirits.

Finally, it must be concluded, from the existence of
776 many magic practices, that there is a belief in a kind of uni-
778 versal energy, which is diffuse by nature and which, by appropriate
789 means, one can capture and use as one likes. Certain genii or
gods are merely emanations of this invisible, imponderable and
active force, which no obstacle can stop and which can instantly
overcome space and strike at a distance. This is the basis of all
native magic.

## [129] 2. Morality and Customs

776 When, as among Catholics and Moslems, the after-life
is believed to be influenced by one's conduct in this life, there
577 is a rule which determines what is and what is not proper if one
wishes to earn the greatest possible rewards in the life to come.
The saints and pious men have shown the way to this end.

For the Bambara, however, the next life is merely a continuation of this one and he does not think that he can, by conduct, improve his chances in the next life since it offers no rewards or punishments for his day-by-day actions. Neither his manes nor his genii give him an example of conduct to guide him. Therefore, without thought of the future, he goes along solely concerned with the present; he seeks what will give him pleasure, tries to avoid what seems harmful, and all this in a groping way, as one walks in the dark.

577 Sometimes, it is true, he is led to behave with a degree
of decency and to avoid certain too shocking lapses, which would
626 expose him to reproach, alienate his friends and create for him

577 an uncomfortable situation among his own family; but under-
626 neath this surface, the evil shows through. It is not unusual to
577 be faced with a disconcerting absence of moral sense, ferocious
157 egotism, deep-seated duplicity, impudent treachery and cold, unperturbed cruelty (1). And one can see, perhaps in all of them, the scorn and even hatred felt for anyone who is unfortunate, weak, ill or abandoned. However, it should certainly be noted that there are also Bambara who display the most disinterested devotion, generous hospitality and remarkable courage; some even give evidence of that kind of inborn distinction which is to be found among even the most primitive peoples and which is the mark of superior people.

183 Thus, no code organizes Bambara rules of life. Everything depends upon custom, that mysterious thread, at once fragile and strong, which links the generations one with another [130] and which sustains the individual, though he is unaware of it, to such an extent that he is completely lost without it. Handed down by earlier generations, superstitiously preserved, it is imposed through fear of the punishment which will follow transgression. At first glance, custom appears to be an amalgam of the most heterogeneous elements and that is why we Europeans find it at once respectable and ridiculous, good and bad, useful and futile, sometimes atrocious and then again excellent. On closer study it is seen to exhibit, on the basis of feelings common to all humanity, an efflorescence peculiar to the native milieu, a natural morality which duplicates positive laws.

It is the nature of man to observe certain laws, to see the good and the bad in what surrounds him and, in his conduct, to display a leaning toward the good and an aversion to the bad. He recognizes within himself something which criticizes his actions from a similar point of view and, which, in fact, judges them.

---

1. The chronicle of Ségou, especially, attests this tradition of trickery and hypocrisy (see especially the tales about Ma-n-son, p. 93, and about Da, p. 101).

183 181 The Bambara has a very highly developed sense of this idea of justice and there is nothing he resents more than injustice or a denial of justice. His resentment is stubborn and his vengeance, which may be deferred under a show of indifference, is implacable. The chronicle of Ségou is rich in pertinent examples. There was Ngolo Dyara, bringing murder and disaster on his own relatives in order to satisfy his hatred for having been sold into slavery by his uncle and not ransomed by any of his relatives. There was Kégné Mari who, watching the murder of Touro-koro in the Komo wood, expressed his vengeance finally fulfilled by saying: "Remember how, falsely accusing me of adultery with one of your wives, you had me lashed? And how on that day I told you that even though I were lying on the ground, if I could touch you with my foot, I would lay you low? Here at last is the day of my vengeance!" Similar examples are innumerable.

If he is powerless against injustice, the Bambara will wait patiently and, each time he has to speak, will dissimulate his weakness in formulas which have a double meaning, such as
[195] O do!, meaning "That's it!" O nya-na, meaning "Oh well!" Tigi!, meaning "That's true"; and other similar expressions. At the same time, he is repeating to himself his proverb: don' m'i fantan', a bla R'a teme, meaning "Don't pay attention while you are weak," that is, "Wait until I am strong enough to take vengeance (lit., to pay you back)."

181 571 626 This instinctive feeling for justice accounts, in a certain measure, for the family bonds made up of reciprocal rights [131] and duties between parents and between them and their children and, by an analogy of which we shall see other examples, between master and slave and between chief and subject. The obligation to respect all pacts concluded in the form of vows, oaths or fraternal alliance rests on the same basis. And it is the same notion that inspires the repression of acts which are almost universally condemned: perjury, treason, false witness, slander,
[691] theft and murder. It sustains the tireless persistence of the pleader who will go through endless lawsuits to obtain redress for a wrong done to him or to one of his people. And it gives strength to public vengeance against the sorcerer.

183 However, there is superimposed upon this natural law its application, the so-called positive law. How very odd is the aspect of this natural law beneath its external surface! For there are as many ways of envisaging the application of natural law as there are legislators, and among the Bambara, in many respects everyone is his own legislator since each has his own custom. All these [individual] customs which jostle, cross, interpenetrate and superpose each other, constitute for the European a compact mass which he calls "custom," whose thousand facets are changeable, elusive, diverse and unstable. However, under these disparate exteriors emerge general traits which are, so to speak, the framework of custom, and this will be shown in the following study of institutions.

183 784 Among the laws which the Bambara imposes on himself or on his fellows, the most widespread and, in any event, the ones most noticed by Europeans, are the taboos (tne). The Bambara forbids himself, his relatives and his congeners to do or to say certain things; and the domain of these prohibitions has, theoretically, no limits. A hasty and therefore superficial and incomplete study of what may be called "the honorable name" (dyamu) has given rise to research by ethnographers on these taboos as they affect the limited area of the dyamu; they have chosen to study taboos especially in this connection.

In actual fact, however, the taboo (tne) penetrates the entire native milieu and is really its law. The purpose is to prevent any contact whatsoever with the invisible [132] on the theory that, should such contact take place, it would inevitably unleash severe punishment upon its author unless the latter had the time and the means to purify himself at once through ritual procedures. As a result, the only person who can state what a taboo is, is one who has knowledge of the invisible and can discern its presence when the ordinary person is aware of nothing. Knowledge is the prerogative of the old (koro) and of the master (fa), who represent the ancestors and are the guardians of custom. It is also the secret of a small number of "seers," whose natural methods are ordinarily reinforced by innumerable processes of mantic.

183 784 Thus used, taboo has organized and transformed the native milieu; it has established a line of demarcation between the sacred and the profane by removing from ordinary intercourse persons, places and objects connected with the invisible and considered to be impregnated by it. However, since by its very nature it forms an incontestable and nonappealable law, it has been the favorite means of anyone in authority wishing to impose his will without fear of protest. Thus the laity has, so to speak, had to submit to a arbitrary system of law that is essentially religious. Social regulations, rules of hygiene, medical prescriptions, culinary preparations, forms of courtesy -- all these are surrounded with taboos and all have absorbed from the tne the very essence of its vitality and its constraining force.

784 593 Within the family, which is the generating force of any collective group, the individual finds himself surrounded by taboos throughout his life. They are what establish and maintain the authority of the elders (koro-u) and especially of their head (fa). Taboos impose ancestral traditions which have developed separately and become gradually superimposition from earliest times to the present, the whole of which constitute, in fact, family custom.

784 [571] Patriarchy, brotherhood, the state, and all Bambara collectivities operate in the same way, since all collectivities are in a sense modeled on the natural family.

Religion, family, and society as a whole, in short the whole of Bambara civilization, have been and continue to be largely dependent on the tne.

## [133] 3. Mantic, Religion and Magic

787 Mantic. Among the Bambara, as among all the Sudanese, religion and magic are both based on a belief in a permanent revelation which the manes, the spirits and the gods give to men with regard to the events of their lives.

The various means by which man can come to know this revelation on the part of invisible beings are what is called divination or mantic. This is extra-rational knowledge since it makes known things which could not be learned through reason

787 alone and it applies to the future as well as to the present and the past.

Mantic differs from magic in that the latter allows man
787 to use certain methods so as to subordinate natural and extra-
788 natural forces, while the former is contemplative knowledge,
791 which does not impinge on the prerogatives of the divine but
merely puts divine thoughts into communication with human
understanding.

Further, theoretically at least, the diviner is not linked to any particular cult and is not to be confused with the priest, since he transmits the divine will outside of sacrifice, which is the priest's function. However, it also sometimes happens that the diviner is the oracle of a particular divinity and that the same person combines the functions of both diviner and priest as in certain cults described in what follows.

787 There are innumerable methods of divination. Before pointing out the principal traits of some of them, let us first note that there are cases when the divinity enters into direct relationship with a human being and speaks to him in human language. The chronicle of Ségou gives an example, in the legend concerning Kolé, head of Biton's guards, who was approached by a genie in the forest and told of the conditions on which he would be assured of his power. Ngolo Diara cheated Kolé of the benefits of the revelation by carrying out the sacrifice required by the genie before Kolé got around to it.

Dreams in which events take place just as they do in reality constitute one method of direct revelation. Frequently, however, there is a variation between dream and reality [134] which makes the meaning of the dream uncertain and therefore makes an interpretation necessary. Among the Bambara there are people who act as diviners by interpreting their own dreams. On being consulted about a problem, they claim to receive in a dream during sleep the correct information for throwing light on the difficulties involved.

A favorite method is that in which the diviner abandons himself to his god; he is possessed by the god and becomes his oracle. In the trance he is, so to speak, the instrument through

787 which the god speaks. In the brotherhoods of which we shall presently speak, the wara-mina-den' is, as the term indicates, "possessed by the god"; he is also said to be "the mouth of the god" (wara da). However, the diviner can speak only [198] unintelligible gibberish during trance, and so this half-human, half-divine language must be interpreted by the wara-tigi or high-priest.

During dream or divine possession, the invisible is brought within man's reach by a sort of inner illumination; both methods may be said to be intuitive divination. Other methods, even more widely used, are based on a different procedure. These methods purport to penetrate the divine intention and will by observation of external signs. How do these signs differ from natural phenomena?

The native pays very little attention to what we call [811] natural laws. He reasons by analogy and attributes any unfamiliar phenomenon to an invisible being endowed like himself with intelligence and will. The indications of this will are not precise, and it is up to each person to recognize and to interpret them. Divination based on external signs may be called deductive. The signs may be classified in two categories: those involving living beings and those involving inanimate objects.

787 825 Living beings. Theoretically, any animal is useful for purposes of observation because its actions, whose determining cause is unknown to the ordinary man, reveal to the seer the divine will or intervention.

Observations of this kind have given rise to many taboos (tne). Here is an example: while crossing a [135] stream an ancestor of the Samaké was caught by a crocodile and carried down through the water to the creature's lair, where he was abandoned. It happened that the man was merely stunned and when he came to, he pondered how he might escape. Suddenly he felt some grains of sand fall on his face and, seeking the source, noticed that a thread of light came in through a tiny fissure in the rock. The grains of sand were coming through this crack, and he realized that an ant lion (gere) was throwing them in an effort to show him how to get out; so he managed to enlarge the crack enough to escape. But, remembering the insect to

787 which he owed his life, he vowed that he and his descendants
825 would evermore respect it. That is why the gere is me for all the Samakè, the descendants of that ancestor.

Before beginning a fight with Blisi, Bacari Dyan, a Peul, wanted to know the outcome. A marabout told him to get two rams: "Name one Blisi and the other Bacari," he said," and watch them fighting." To be sure, during one of their combats, the ram named Bacari killed the one named Blisi and such, too, was the result of the fight between Bacari Dyan and Blisi.

But although a living animal can show the divine will through its actions, the dead body of one offered in sacrifice is no less informative. It is the duty of the seer or initiate to discover the signs of the divine will from the dying spasms, from the position taken by the body, or from the relative position of the entrails or the general constitution of each animal. This branch of mantic is called extispicy, from which are derived various methods of divination used by the Bambara.

It is common practice to sacrifice a chicken; if it falls on its back, with its feet extended away from the observer, the omens are thought to be unfavorable. If the feet point toward the observer, the omens are good. Any other position is doubtful and, if need be, the sacrifice is repeated until a categorical answer has been obtained.

Often enough a Bambara returning from a long journey wants to learn whether one or another of his wives has been faithful to him. He sacrifices a rooster and, after opening it, examines the scrotum; if it looks normal, the wife has been faithful, but if it shows [136] certain peculiarities, notably a reddish color, her guilt is proved.

787 Inanimate objects. Every Bambara possesses a set of divining cowrie shells. He almost always carries a stated number of shells -- usually 12 -- in a small bag. If he wants to consult the omens -- about the most varied sorts of enterprise -- he takes the cowries in hand and throws them onto the ground from a point not far above the ground. He reads the answer in the general arrangement of the group and also in the position of individual cowries relative to one another. If one cowrie is

787 surrounded by several others, this designates a powerful master surrounded by his proteges and promises aid. If one cowrie is stuck perpendicularly in another, that pattern is called "little girl in the gourd" and presages the birth of a girl. If two cowries are close together and turned in opposite directions, this is the symbol of sexual intercourse and presages the success of a love affair.

The kola nut is used as often as the chicken for divinatory offering. Here is how the method operates with respect to the *nyana dugu-da-siri*, of which we shall soon speak. After separating the nut into its two parts, the officiant brings them together again between his thumb and index finger and touches the ground with them, while asking the *nyana* to make known whether the offering is accepted. Then from a point not far off the ground, he casts the nut against, or a little in front of, that which is supposed to be the seat of the *nyana*. If the two parts both turn toward the officiant on the sides which were formerly in contact, the reply is favorable.

The officiant then repeats the proceedings in order to find out if the *nyana* agrees that he should make the offering. A new position, with one part turned toward the officiant and the other toward the ground, means that the answer is favorable once more. In case of doubt or failure, the process is repeated as many as three times.

412 Stones are also used as intermediaries for divination. On top of a flat stone -- usually one used for crushing condiments [137] is placed another stone, also flat but smaller. After having reflected deeply upon the object of his inquiry, the diviner holds the smaller stone with his fingertips and guides it slowly over the surface of the larger stone. He then interprets any slight resistance that developes as the smaller stone is moved around.

There is another method very similar to the one just described. The diviner places a gourd filled with water on some kind of rag or straw crown which water-carriers, in particular, place on their heads beneath the vessel to be carried. He rocks the gourd gently to and fro and then, as before, interprets the resistance produced.

787 With the same equipment the diviner sometimes operates differently. Setting the gourd firmly on the crown that supports it, he then taps it two or three times with his middle finger. Then, it is claimed, he can hear special sounds, which are revelations by the water-spirit and which he alone can understand.

In short, there is an endless number of divining practices
and here, if anywhere, the old saw which says that the spirit
blows where, when and how it listeth, is singularly appropriate.
And nothing is more accommodating than human credulity. It
[198] goes without saying that there are some remarkable ventriloquists among the Bambara, who give such talented support to inanimate objects that the latter become veritable oracles. A piece of horn stuck into the ground or a mute block of wood are thus transformed through such artifice into mediums that answer anyone on any subject.

[828] There are also many highly suggestible individuals who
[154] readily fall into wakeful or hypnotic states, during which they
reveal hidden things.

787 Another practice among the Bambara is the use of the
763 kolon' kala (1) which is specially amenable to hypnotic suggestion. When a suspicious death requires search for a murderer, the corpse is often used for the discovery. It is carried on the heads of [138] two impressionable young men, who are then assumed to be possessed by the soul of the deceased. The lugubrious remains are rapidly borne through the settlement or the countryside, disregarding obstacles, until it finally stops of itself at a spot where the murderer or some revelatory sign is to be found.

787 A kind of effigy is often used instead of a corpse. This is made of a kolon' kala to which is tied a little bag containing bits of the body (finger-nails, hair, etc.) and which is wrapped in a cloth. The effigy plays the role of the corpse.

[412] 1. This is the wooden pestle used in all native kitchens to crush grain and condiments.

787 The kolon' kala is used in the same way to discover stolen or lost objects. In that case it is wrapped in a loincloth belonging to the victim of the theft, along with something equally personal.

What are we to conclude from these divinatory practices? Are oracles based entirely on charlatanism and trickery? This would be a failure to recognize the credulity of the practitioners, most often the first to believe in their own practices.

771 Religion and Magic. There is nothing more involved, incoherent and contradictory than the cult customs of the Bambara. In order to give a clear picture of the essential traits, we shall follow an outline based on the distinction which becomes apparent on close analysis.

It can be stated that these people always honor the manes, the nyana dugu-da-siri and some other nyana, without presuming to impose human will upon them. Indeed, it may even be said that the Bambara make an effort to behave in a manner presumed to be pleasing to them.

However, the majority of the nyana are spirits suborned by man and serving his will.

Finally, there are appropriate rites which make it possible for humans to exploit a portion of the universal energy and to use it as they wish.

Let us say that the cult of the manes and of the independent
771 ent nyana are what constitutes the religion of the Bambara, while
789 the subjection of the spirits and the exploitation of universal energy properly constitute magic, which in its most feared form is called sorcery.

This distinction is obviously arbitrary. There is no custom that is not in some measure impregnated with magic, and this is so true that it is uncertain whether one should consider [139] religion to be a sort of purified magic and magic a perversion of religion or even its parasite.

Without seeking to decide this question, we shall simply point out that there is often a clear line of demarcation between religion and magic. All one needs in order to see the difference is to compare the cult of the manes with the practices of sorcery

771 789 used to capture the spirits of the dead. The native clearly shows how much he respects the cult of the manes and, on the contrary, how much he is disturbed and terrified by the practices of the suba (1). However, many practices cannot be so clearly differentiated because they have elements of both religion and magic. Such practices are held to be allowable and even desirable, illicit and hateful, depending on the point of view and the places, circumstances and persons involved.

If we keep in mind the foregoing remarks and limit ourselves to the most characteristic traits, it is possible to establish a parallel between religion and magic among the Blacks.

Both acknowledge the existence of an invisible world which is everywhere in contact with everything subject to our senses. But while religion in principle assumes man's dependence vis-à-vis this invisible world, magic operates on the theory that anything that exists comes within the power of "the one who knows" (don'na ba).

Since the Master of the Universe appears not to take much interest in what he has created, his creatures do not honor him but, rather, have recourse to the Spirits and Powers (nyana) who are willing to take a hand in human affairs. Religion organizes, for the benefit of these benevolent nyana, a cult designed to make sure of their good offices. Magic, on the other hand, forces them to execute its will.

775 Religion and magic both believe firmly in the dual nature of man; a finite body and a soul which survives this body. When death comes, this soul goes off to join the family of manes, who are bodiless souls like it. From that vantage point the soul continues to watch over the affairs of its relatives still in the world of men. Religion regards the manes as guardian spirits and strives to make sure the continuity of their [140] will and wishes. Magic treats (1) these incorporeal souls like the

---

1. See Chapter 7 concerning the suba.

1. Especially by means which give magic the character of sorcery.

771 nyana and seeks to use them for utilitarian ends.

789 By virtue of the beliefs on which it is based, religion engenders a certain degree of morality. Magic uses its knowledge to exploit the Universe for material profit.

In both camps there are initiates. Whereas the most
[791] famous adepts in magic live in a kind of isolation, where they
jealously keep the secret of their practices and where they exist
apart from human societies which at once honor and fear them,
[794] religion, on the other hand, displays its cults, if not exactly
publicly, at least in the circle of the faithful. The latter,
since they are usually completely familiar with the ceremonies
of the cult and with the high-priests, are the masters and most
venerated members of society.

Religion receives its most reliable support from the natural family and from the communities derived from that family. Legal magic has copied these organizations in the form of brotherhoods, which Europeans call "secret societies," a kind of spiritual family in which the members are only gradually admitted to all secrets.

Whereas the religion of the manes forms the strongest link that holds together the members of a community, and represents the framework of the society, magic on the other hand cares little for this union and in fact helps to disrupt it by the hatred it engenders. Thanks to magic, the individual feels competent to challenge the community and never fails to do so.

Let us look more closely into the traits characteristic of religion and those characteristicof magic.

By studying all that concerns especially the patriarchal and family communities and the associations growing out of these communities we shall be able to see the place occupied by the religion of the manes and of the spirits, as well as the effect of magic upon the basic manifestations of the life of these communities.

789 Since magic, in a sense, envelops every act of the native, it seems to us essential, at the start, to look into its characteristics so as to facilitate the understanding of all that is to follow, which is impreganted by magic in so many ways.

789 In connection with the brotherhoods, we shall see how magic has been organized [141] in the very heart of native society and we shall observe the stability and the repercussions of its work.

Magic

778 Universal energy. There exist individuals who are sub-
789 ject to certain phenomena, as yet imperfectly known or ex-
[774] plained, in which the human being is divided into two so that
on occasion his immaterial self lives a life independent of his body in a sphere inaccessible to corporeal sense. Such a man then enters a milieu from which he brings back visions and sensations that he can only describe vaguely and frighteningly in his habitual language after he has returned to a normal waking state.

Among the Bambara, occurrences of this kind have been observed and good use has been made of them, especially in the brotherhoods. They constitute a confirmation of belief in the invisible world, as do dreams. And the Bambara sees many other indications -- which escape us -- of the existence of this extra-natural world which envelops everything and which he conceives as a force sometimes active and sometimes inert, diffused or personified. It is this energy which is, as it were, set in motion by a curse, by the extreme expression of envy called "evil eye," by luck or by misfortune. A chief's authority derives the essence of its strength from this activity. And it is the reason for honoring the dead.

This invisible force, instantly transmissible to the greatest distances, is present in all things; it exists everywhere, in everything and in everyone. It possesses or acquires a greater or lesser power in certain objects and in certain people for a stated period of time or for a temporary period. It can be beneficent or maleficent, or both in turn. The ordinary man who touches such objects or such persons will usually be struck dead or, at the least, gravely affected, as he would be if he touched a high-voltage electric current. For the initiate who knows the secret of this force and who knows how to use it, this

778 789 is a virtue which exalts his own faculties to such an extent that it gives him a supernatural power that is terrifying to the uninitiated.

This property of transmission by contact accounts for the veneration which surrounds the possessions of eminent persons and those among the dead who [142] exercised power during their lifetime. Objects especially venerated are those that were in almost constant personal use: clothing, weapons, toilet articles.

The same property of transmission no doubt also accounts for the nature attributed to matter, which has been called continuity. Everything emanating from an object retains the occult energy within it, and, further, anything that "the man who knows" (don-na-ba) does to these detached parts affects the whole from which they came (1). That is why an undigested portion of food, if suitably treated by the magician, can spoil the digested portion of the same food. The chronicle tells of how this theory of the continuity of matter was used against Bani. By means of hair and a sandal, stolen from him, the magician paralyzed Bani's clairvoyance and put him at Da's mercy.

791 Magicians. It is the learning of the magician which, so to speak, brings order out of the chaos of the world. In the broadest sense of the word, his art, magic, is a kind of utilization of the occult. It is true that there is no Bambara, from a chief down to the least of the slaves, who does not act as his own magician, but there are specialists and some of them very famous. Besides, not everyone can be a real magician. Natural talents give some individuals the power to penetrate the invisible world and to feel at home there. Some are initiated by genii who have taken a fancy to them, as shown in the chronicle of Biton; others learn the craft from a relative or a well-known magician, either at no cost or at great expense.

---

[787] 1. Divination by means of the kolon' kala, previously described, is allied to this belief. The bits and pieces of the deceased act as the dead man himself would do in guiding the bearers of the kolon' kala.

791 Every magician (soma) (2) has his own methods: one may be intuitive and work from an inner light; another may operate only by deductive divination. All who lay claim to real power submit to rules which are often strange and rigorous and which dominate the most trifling activities of their lives. And all are fanatically determined to keep the secrets which, in their own eyes no less than in the eyes of the uninitiated, are the foundation of their mysterious powers.

[143] Very properly, the range of their investigations and their action is without limits, since everything is impregnated by the energy which is everywhere and in everything and which perhaps is everything, material form being merely one of its manifestations.

789 It is worthy of note that artisans are subject to the same
dislike as that for ill-famed magicians. It is not too hazardous
463 to deduce that manual labor once consisted of magic rites which
791 were held to be indispensable in conquering matter. This is
still evident in the case of blacksmiths and hunters.

791 Everywhere in the Sudan, blacksmiths are considered
and, indeed, behave like magicians. The extraction of iron is
326 surrounded by essentially magic rites in which only blacksmiths
may participate. After ritual preparation, they work naked while the job lasts and return to normal life only for a certain time after the work has been completed; even then they have to observe special rules. Their work is commonly thought to be tinged with magic. Their tools are impregnated by this invisible energy and, on certain days, the hut in which they are kept becomes a sort of temple, with the blacksmith as priest. The chronicle (1) attributes to fa Siné Dyara, a blacksmith who could understand the language of the birds, a role especially helpful to the Massa-si.

---

2. A sorcerer is a suba (See Chapter 7).

1. See p. 112.

326 Raffenel has given us an interesting portrait of one of
791 these Bambara blacksmiths, whom he called father Niany,
whose guest he was at Foutobi (Kaarta). He saw him act successively as fa, as priest of the manes and of the guardian spirits of the family, as doctor, and as exorcist. He was always alert, always excited and ever watching for the thousand manifestations of the invisible and hastening either to cooperate with them or to force them to do his will.

Here are some excerpts concerning the highly character-
752 istic personage, father Niany:

"I saw a small child die of a snake-bite," reports Raffenel (2); "the poor creature was hideous and swollen up like a balloon. Its mother had laid it [144] down in a field of millet which she was hoeing. A snake appeared (1) and bit the child. The mother misinterpreted its cries and offered her breast. Soon, however, the swelling became evident and the child had died within 24 hours." ....

---

2. In *Nouveau voyage au pays des nègres* [A New Journey to the Land of the Negroes], Vol. 1, p. 417.

[137] 1. "These snakes are 50 centimeters long and about 4 centimeters in diameter. Their back is gray, with very conspicuous black rings around the body. They have white bellies and a flat head rounded at the end. The part nearest the tail is covered on the upper surface by a series of vertical scales covering about a quarter of the length of the body. The tail is much smaller in diameter than the body. They like the outskirts of villages and are markedly fond of the roofs of houses." (Raffenel)

752 "A few days after the child's death, a woman in the house was also bitten, just a step from my hut and by a similar snake. Old Niany was summoned and came at once. I was not aware that he had any knowledge of medical matters but, on seeing the confidence shown him, I realized that this was not a new experience for him.

"His medication consisted, first, of ridiculous gestures and a spate of incoherent words spoken very rapidly. Then he brought out from under his boubou [robe] a small horn containing a black and oily ointment. The injured woman, who seemed very calm, prepared her own bandage and placed the ointment on the wound, adding some ground root which the old man took from another horn. When she had finished, it was Niany's turn. He muttered some more words, put his finger into his ears and took out some stuff, which was apparently there in quantity, and carefully spread it over the ointment. The woman then arose and returned to her work.

"I watched this treatment with a lively interest since I knew that I myself might have need of it at any time. For the same reason I often asked after the woman and was always told that she was getting on well. On the third day, I was told that she was completely cured and that there had been no swelling or pain to keep her from performing her usual chores.

"The snake that had bitten her was nevertheless of [145] the same type as the one that had caused the child's death. I saw and held in my hands both snakes; I saw the remedy applied and I have faithfully described it. Are we to believe in the virtue of grigri and in the omniscience of the Aesculapius of Foutobi, or must we give an unorthodox twist to the aphorism which says that faith conquers all?

"In any case, I firmly resolved to trust myself to the learned hands of Niany if the need should arise.

"When I went to Niany to congratulate him on his remarkable cure, I reminded him of the death of the child who had been treated in the same way. The singular logic of the blacksmith's reply has no doubt been encountered before: 'that's not at all strange,' he told me, 'since my remedy cures only those who believe in it and the little child did not believe.' "....

[811]

755 "(1) I have stated elsewhere that among Negro beliefs

1. Raffenel, op. cit., p. 463.

the tradition of the state of possession was carefully preserved. One evening I was present at a ceremony designed to drive a devil out of a woman's body. Father Niany, the universal man of Foutobi, was the exorcist. At the first rumor of this event, a throng converged on the woman's hut and I joined the crowd, curious to see what was going to happen. I saw a wretched woman rolling about on the ground in terrible convulsions in the midst of a circle of onlookers who let her thrash about without trying to help and merely watched her movements. There was great excitement when Niany appeared, and the circle opened to let him pass. He approached the woman, touched her, said a few words in a low voice, lifted her and placed her on a mat.

"The woman at once became calm, and father Niany, who seemed not at all impressed by his triumph, withdrew after speaking a few words in her ear. The crowd melted away, also without showing the least surprise at such complete and prompt success. I conclude that such happenings were not at all infrequent and that Niany had a special talent for driving devils out of women's bodies. I cannot [146] say what her trouble was, but when I saw her I thought that she was simply having an attack of epilepsy and I did not recognize the usual symptoms of that dreadful malady in the sort of convulsions she was having."

791
609
Though he was sure of his art, Niany nevertheless recognized its hazards. There is no magician who does not find another who is more powerful. A foreigner, that unknown creature, is a danger, because he may chance to possess secrets which might invalidate the cleverest methods. That is why Niany fears Islam. He has an idea, which to us seems strange, of what Allah may be, as compared to a miscreant like himself and, being persuaded of the continuity of matter, he applies it in a manner that we shall describe in the chapter on Islam.

791
609
821
Though he may have his doubts about Islam, Niany is no less suspicious of the maneuvers of the foreigner, Raffenel, who is staying with him.

791
609
821

"(1) One morning he came and complained bitterly that

1. Raffenel, op. cit., p. 322.

I was preventing the rain from falling and that I was causing a lot of trouble to the villagers. I could not imagine, at first, why he was thus berating me, but he explained. It was his considered opinion that the rain was very much annoyed with me for being too much interested in it. I was watching the raindrops and examining the clouds, and so the rain was getting its vengeance by refusing to fall. Father Niany resented my thermometers too, but his principal target was my barometer, to which he attributed all sorts of evil designs.

"On the following day he returned to the charge, accompanied by a deputation of farmers carrying their agricultural tools on their shoulders.

"'We've thought it all over,' said Niany, 'and we have decided that since you can stop the rain, you can also make it fall again. Therefore we have come to ask you to speak to the rain in our name.' " ....

"Two days later there came another deputation, but one which, this time, looked threatening. Among them were some [147] new faces.

"'We want you to make it rain,' said the leaders, with an angry glance at my barometer, 'for we have already waited too long. You will never convince us that what you do with your machines (they pointed at my instruments), while you look up into the air and write down the grigri, is innocent. Never before in this country, has the rain held off so long from falling and no one has ever before done what you're doing. Manage it as you will, but we must have rain by tonight.'

"The sky was filled with heavy black clouds which reassured me. .... An hour later the rain fell, but those wretches, no doubt fearing that my presence would interfere with its good intentions, pushed me unceremoniously into my hut and shut the door. By this ridiculous step they prevented me from watching the progress of a wonderful storm and noting the barometric pressure changes.

791
609 "Can one imagine being given such orders? All that
821 was left for them to do was to ask for the moon and the stars."

Niany is typical of many Sudanese blacksmiths, at least
791 of those who actually practice their trade, and it is no wonder
326 that the natives keep people of that caste at a safe distance and show them consideration, fear and a degree of scorn. For the Blacks, people as well as things connected with magic are inclined to take many forms.

791 Hunters also are magicians. One need only see a hunter start off to recognize that this is true. His person and his equip-
224 ment are covered with amulets that constitute a covering as well as an arsenal of magic weapons.

The Blacks have a different idea of animals from ours;
825 they too are powers with which one has to reckon. In proof of
778 this, there is no animal, however tiny, which cannot be, at some time or other, very dangerous and therefore worthy of respect. So animals are addressed as "master" or "lord." The animals always to be feared are never called anything else:
[552] wara-ba means lion; sa-ma, elephant; ma-li, hippopotamus; bam-ma, [148] crocodile. Etymologically, all these names indicate "master" or "lord."

These terms are not meaningless; they attest a belief that supernatural power is incorporated in animal species. The attentions paid to animals have no other purpose than that of
825 conciliating the good-will of this power or, at least, of avoiding
789 its wrath. The common practice of using animal debris (skin,
[237] horns, tail, hair, offal, etc.) to make magic charms is an application of the principle of continuity of matter, of the individual and of the virtues peculiar to them. A rabbit's foot is tied to a
[843] pregnant woman's side in order to hasten the child's arrival; a small bag of lion skin will make the child brave and strong.

It seems likely that the domestication of animals is a
231 happy result of magic practices. These tamed creatures are held
552 to be "weak ones" and are treated as such. However, some of
825 their names show a trace of the esteem in which they were once held and which is still shown on occasion: fa-li meaning "donkey" derives from fa meaning "powerful," just as nya-ri meaning "cat" derives from nya and has the same meaning, along with ba meaning "goat."

231 meaning "goat." In the case of the goat, there remain some
825 customs that are very suggestive. Its milk is the basis of the
most solemn of all oaths, that of fraternization; milk is also used to put out fires started by lightning and the hide is used to make sandals worn by widows during the period of mourning. The chronicle tells us that a certain dish made of a goat's head gives rise to the chief's power and sustains it (1). In spite of all this, the goat shares with the donkey a general scorn and they are considered to be the born companions of slaves. This is perhaps why some people refuse to allow either animal to come into the house. Indeed, it is believed that a rich and powerful man can be ruined if either of these animals enters his house or, even worse, if he touches them.

Magician's work. So it is that man is immersed in a
778 strange fluid. In the final analysis, everything, man included,
791 [149] is merely a manifestation of this fluid. Currents and
754 eddies have all forms of life at their mercy, and only the strongest are able to resist, control and even acquire in the struggle greater power than they would otherwise display. "The one who knows" can avoid or follow this chaotic movement; he can control himself and others. He is the real "master" (*soma*) and he alone can utilize this ever present and ever powerful invisible world.

What makes a magician can be described by a single
754 term: the magic weapon, to be used for defense as well as for attack, and indeed for anything else, by one who knows how to use it. Let us consider some of the examples in the Bambara arsenal.

For anyone who wants to destroy an enemy, the *so ma sama* (lit., "bundle of the person of the house") is a valuable weapon. It is a mysterious powder, kept in the horn of a hind, in which is placed a small stick. It is used in the following manner: let us suppose that a Bambara wishes to harm a person who is passing through the village. The Bambara secretly takes

---

1. See p. 31, in connection with Dina Wara.

the tiny horn in his hand, grasps the stick, and, after uttering maledictions against the person in question and saying his name, places the stick on his tongue, first lengthwise and then crosswise. After this manipulation in the pattern of a cross, he replaces the stick in the horn. When the traveler returns to his own village, the charm will take effect. If, on arriving, he is so careless as to sit down anywhere but on the bare ground, he will die. If he does sit on the bare ground, he will be safe.

If it is not the traveler whom our man wishes to harm, but someone in the traveler's village, the Bambara, after having gone through the afore-mentioned ritual proceedings against the enemy, will then seek out the traveler and engage him in polite conversation. Just as the traveler is about to take his leave, he will say to him: "Give my regards to So-and-So." When the returned traveler delivers the message, the person receiving it will suffer no harm if he repays in exactly the same way the compliments that have been conveyed to him; however, if he merely says "maraba" (thank you), he will die at once.

The so ma sama belongs to a category of magic weapons, which are especially and deservedly feared and which [150] the Bambara include under the general name, korti. There are endless korti, usually powders made of every imaginable and often repugnant ingredient (snake venom, the dung of wild animals, putrefied entrails from all kinds of corpses, etc.).

[278] Here, for instance, is the procedure used to make su-mugu. A very dry stalk of millet is inserted into the intestine of a dead animal through the anus and is left there long enough for it to become impregnated with the toxins produced by cadavers; it is then withdrawn and thoroughly dried before being pulverized. The resulting powder is kept in horns or boxes, either as it is or mixed with an ointment.

Many of these powders are put into the food or drink to be consumed by the victim. Various methods are employed for this purpose. A ready method is for the harmful powder -- notably su-mugu -- to be placed under a fingernail; then the

754 operator can drop it into the food or drink unobtrusively while serving the victim.

Some of the powders are tossed at the victim with a quick fillip and enter the skin through the tiniest abrasions.

All this is accompanied by the direst curses and constitutes what is known as korti su. These poisons act in various ways, some quickly and others slowly. It is said that the su-mugu only takes effect gradually. Its action is to be seen in a certain amount of swelling of the abdomen, which causes death within a few months. There is not a single native who is not terrified of the korti, and there are Europeans who have experienced the dangerous effects.

Some korti are not the effect of manipulations but rather of true spirits of evil set in motion by magic practices. The following is an example of the type called donna, which includes also the so ma sama and su-mugu. The symbol or material representation (boli) of this donna is a kind of ball, not very large. In order to use it, the operator places it on the blade of one of the native mattocks called daba. The spell is worked at night. The spirit is attracted by the sacrifice of a chicken and offerings of kola. The operator utters his curses against the people -- often far away -- and asks the spirit [151] to undertake vengeance. If the spirit agrees, a sound is heard which resembles the noise made by the flight of a dung bettle (1).

[825]

1. I have been told that this is the reason for the fear certain Bambara have of this insect.

This is the genie starting off on its mission. He will fatally sting the enemy during sleep and then return, announced by the same noise of flight as was heard on his departure. If the imitator should go to sleep while the spirit is away, he will himself be killed in the same way as the victim. He must stay awake for the spirit's return and again sacrifice chicken and kola to him.

754 The korti are counteracted by the kana, which are de-
755 fensive weapons, more particularly, curative. Based on the same principles and using similar ingredients, they are essentially

754 [755] designed to neutralize the effects of the *korti*. It was a *kana* ' that father Niany used against the snake bites (2).

2. See above, pp. 157-159.

A third category of magic weapons is that of the *siri-kun'* or "knots." Though not itself a genie, the *siri-kun'* is at least dependent on a genie, and it is by addressing a vow or an oath to the genie that one succeeds in obtaining revenge or avoiding the vengeance of another.

As its name would suggest, the *siri-kun'* is something that binds, that is, something that forces or paralyzes. It receives the obligations undertaken and sworn to by individuals in its presence and it will punish perjury. It renders helpless and paralyzes anyone against whom its intervention has been asked.

I have myself seen Bambara clutching a few bits of straw when they came to me to settle some lawsuit or other. They were following instructions and trying to make me submit to the *siri-kun'*, that is, to paralyze my capacity to take action against them (3).

3. The chronicle of Ségou tells of a similar action by Ngolo against Mamari (see p. 53).

All these dealings in criminal magic are performed in an atmosphere of the most disconcerting trickery and hypocrisy; often the most fawning neighbors are the most to be feared. That is why a Bambara [152] likes to have the assurance of a "powerful protector" (*dyigi seme*). He seeks him and often thinks that he has found him in the brotherhood of one of those all-powerful genii of which we shall have occasion to speak.

788 *Rites*. There is no magic without appropriate rites, which must be strictly observed. Any negligence makes the operation useless, even dangerous, for the performer. We saw how the initiator who went to sleep while awaiting the return of the spirit he had invoked was promptly killed by the spirit

788 as it returned to its point of departure. This was presumably because the operator had not done what was necessary to assure the reintegration of the supernatural power.

[779] There are thus rites that set in motion this universal energy, whether diffuse or personified -- rites that channel, direct and orientate this energy so that not only it will reach the goal sought, but also it will be kept from straying from the desired route, thus harming the very person it is supposed to aid. Similar means are used to forestall the misdeeds which may be committed by an agent mistakenly invoked. When Ngolo had aroused his son Ntyi's ambition, he thought he could conjure away its effects by sacrificing his two grandsons, Ntyi's own children.

Those actions that call upon, guide and reintegrate this universal energy, whether diffuse or personified, are what we call rites.

788
754 During the oath using kola, the operator has in his hand a sharp object (pin, thorn, etc.) with which he pricks or stabs through the nut, saying, for instance: "Take my heart and my liver and kill me, if...." (i ka ne son' ni m bien' ta, ni ...). These pricks indicate to the "power" with which the operator is concerned that, if necessary, it should take vengeance by piercing the guilty person, just as the kola is pierced by the pin (1).

In curses, all the imprecations used are so many indications, indeed sometimes instructions (2), as to how the [153] spirit invoked is requested to act.

1. The shirt sent by Ma-n-son to Forokoro was first pricked with a needle (p. 120).

[575] 2. At the time of admission to the brotherhoods, the most frightful threats are made against the traitor or perjuror in the form of curses indicating to the avenging spirit how he should punish: "May it enter through your anus and come out through your mouth, etc."

800 invoked is requested or required to act.

There are times when on the contrary, the native is
789 inclined to hold the energy in check, in order to avoid the
778 harm that would result from this sort of action. For this pur-
[784] pose he abstains from doing certain things; this is the origin
of many taboos (tne).

The acquisition of magic power in order to gain strength or to be able to act so as to avoid being affected by magic or, finally, to be able to get rid of magic power when one is permeated by it to a dangerous point -- all these involve appropriate actions or rites whose forms and conditions only magicians or others gifted with intuition can determine.

The chronicle shows that chiefs make use of magic to try to strengthen the supernatural power which is the basis of their position. Dina Wara secretly ate a special dish made of a goat's head; Biton took special baths, whose virtues Ngolo appropriated by trickery just as Biton had done with respect to Dina Wara, his brother-in-law. All sorts of comparable practices accounted for the increase of Ngolo's "luck," that modal quality of supernatural power which confers a degree of magic potency on the possessor. This so-called "luck" has, as it were, a kind of radiation, which confers special good fortune on whatever it touches. That is why the marabouts advised Biton to live in close proximity to Ngolo so as to take advantage of the favorable atmosphere.

778 This energy is attached to everything and, especially,
768 to objects that come into direct contact with anything im-
pregnated with it. What one wears on oneself thus becomes a sort of accumulator, and that is why the objects left upon a powerful person's death are so carefully preserved and constitute the most valuable part of his legacy. The chronicle tells us with what veneration the cap and weapons belonging to Biton were regarded.

778 Magic force is therefore acquired by means of appropri-
789 ate practices indicated by magicians; one shares its benefits
by living near those entrusted with it by applying to oneself what comes from such privileged persons. Here again is a result of the continuity of matter. Whatever the case, anything

778
789 emanating from the person or object impregnated with magic
force acts as if it were a part of that person or object. Often
[788] the magician or [154] ritual officiant spits on the person or
object involved in the rites. This is a means of transferring
one person's fluid to another.

Conversely, it is vital to know how to avoid contact
751 with, or even emanations from, a maleficent magic force.
789 That is the reason for the great number of mysterious magic
754 practices and the secret of the innumerable amulets that form
so many shields, to be placed presumably where they will best
protect against any blow. Therefore it is the magician's
prerogative to make amulets and to prescribe the conduct
necessary to preserve their efficacy.

It should be noted that protection set up against a given person is good only for him and is useless against a successor, for instance. The chronicle tells us that Bani, chief of Samba-Nyana, was successful in using certain artifices to prevent Ma-n-son from conquering him. But, kept in ignorance of Ma-n-son's death and having taken no precautions against Da, Ma-n-son's son and successor, Bani was conquered by Da, against whom his artifices availed nothing.

If one is caught in spite of precautions, what is to be done? Everyone is afflicted in one way or another in any event. A Bambara is always inclined to believe in some sort of supernatural intervention. He has on hand some sort of remedy, but more often he resorts to a "seer" for guidance or, if the case requires, to a magician's skill.

Native medicine is a mass of magic formulas and of remedies strikingly reminiscent of the pharmacopeia of the Middle Ages (see, in the foregoing, father Niany's operations).

[571] The individual does not live as an isolated unit but
rather as an integral part of a community. In the society in
789 which he lives, however restricted it may be, he progressively
783 occupies various situations. On both physical and moral levels,
he undergoes changes and, depending on circumstances, whether
fortunate or unfortunate happenings, changes take place within
him. In short, his magic potential varies. These variations
are always believed to concern the entire milieu, upon which
they may (in the case of illness or death) have disastrous effects.

789 The individual is therefore required to [155] undergo proper
783 treatment to return him to his normal, harmless state.

789 From this point of view, social life seems to give rise
to a series of rites involving the disintegration and reintegra-
788 tion or the aggregation of the individual in relation to the group
182 in which he lives. Birth, circumcision, marriage, illness, death and the performance of certain trades are all modes of existence, whose beginning and end usually involve three stages: separation from the common milieu, accomplishment of the act, and reintegration into the former milieu or aggregation in a new milieu. Between the first and the second state as well as between the third and the fourth there exists usually a kind of negative interval which we call marginal. This system, which comes to light upon an analysis of multiple facts, is actually subject to modifications or alterations which can change its physiognomy. Nevertheless, the basis of these ritual sequences is so well established that by comparing external manifestations with the theoretical system it is possible to understand them better and to restore to some of them, which have become badly mutilated, their real meaning, which the native is usually, if not always, unable to explain or to define precisely.

A detailed study of institutions will give an opportunity for concrete analysis of these ritual sequences, which a kind of age-old empiricism has transformed into laws of a sort. They have come to represent that part of custom which has acquired a kind of permanence by virtue of public acceptance.

It is apparent everywhere among the Blacks that events of a general character (birth, coming-of-age, marriage, illness and death) are surrounded by ritual practices that vary outwardly from place to place but may all fit our theoretical system of three stages with marginal periods. All denote a common basis of magic and all derive from a long-tried empiricism which has given them a peculiar and relatively stable physiognomy in terms of the milieu with which the rites are connected.

571 What we have just said about individuals must also ap-
182 ply to collective groups: the latter deal with each other or

571 182 with individuals in the same way as individuals deal with each other. They are not only moral persons, as we put it, but they are truly persons, [156] as evidenced by the Blacks' impulsive need for anthropomorphism.

812 Let us note, finally, that a Black does not abstract himself from surrounding nature; nor has he reached the stage of development at which man regards himself as a kind of intermediary between the natural and the supernatural. The Black is an integral part of nature and that is why he treats it like himself. Therefore, natural phenomena are subjected on his behalf to the same kind of ritual sequences as those followed in his own behavior.

Chapter 3

Communities

1. General Considerations

114 631 Native society is not simple, and Europeans studying these countries have used terminology which, not being defined, has obscured reality.

In particular, they have used the terms "kingdom" and "empire" to describe Sudanese states, and both authors and readers have taken these expressions to imply a social organization more or less analogous to those meant by these words in our country.

631 These empires or kingdoms, however, are simply clans, i.e., political groups that have imposed their authority on other groups whose members then become their tributaries, members of a caste, or slaves. Such an empire, if one wishes to use this term, has no exact geographical boundaries or, if one prefers, its boundaries are constantly changing. Furthermore, the country embraced by this term has two parts: territories which may be said to be under direct administration, in which the authority of the clan is directly imposed; and those territories whose position with respect to the ruling clan

631 is highly variable, ranging from complete subjection to quasi-independence.

The imperial clan, or, if one prefers, the dominant
565 clan, most often prevails over people of races other than that
[563] of its own members; frequently this clan itself includes, at least originally, diverse ethnic elements. [158]

If such heterogeneous associates are to live side by side without clashing, they must have a large body of common customs, and this indeed is the case. Wherever one studies it, the native milieu resembles a compartmented area whose individual sections seem, at first glance, to be isolated. At the top of the social structure there is a kind of nobility composed of the head of the clan, his family, and then the families of the clan; next come the free men, simply free or members of castes; and finally the slaves. In actual fact, a continual reciprocal movement between these elements welds all of them together.

614 The fact is that the whole social body exists only
596 through the severity of the life of the cells that compose it: the families. Among other characteristics, these families are very jealous of their respective independence; nevertheless, they are closely allied among themselves even as they freely absorb the foreign element constituted by the slaves.

It is, therefore, essential to concentrate our attention on the family cell in order to understand the essential element of native social life. This is all the more true in that all the native collectivities are, so to speak, modeled on the organization of the family.

The Bambara language has no word exactly equivalent to our word "family" in the legal sense (1). Different names are used to designate the collectivity under the authority of the

---

1. This is why we prefer the term "community," but in view of the remarks made here, the use of the word "family" will not be ambiguous.

614
596 fa (2), according to whether the group itself is meant or the place which this collectivity occupies.

571
575 Let us note at the start that any collectivity forming an association is a ton'; thus, this is the case for all persons under the authority of one fa, and from this point of view, each of them is a ton'-den', literally, "a child of the ton'," i.e., member of the ton'. The word ton'-denya derives from the same word and is commonly used as a collective designation for all the members of the same ton'. This is the equivalent of the French word [159] société [Ed., society, association] or confrérie [Ed., brotherhood, confraternity]. The head of the ton' is the ton'-tigi, a term by which honor is paid to the head of an important family, and which, in some respects, is the equivalent of our [Ed., French] words notable [Ed., person of note, dignitary] and notabilité [Ed., notability, principal person].

614
596 If one considers the family as an association of the issue of the same parents, the term ba-denya is used, derived from ba-den'. Since the word ba means "mother" and, in the broad sense, "progenitor," mother or father, the word ba-den' is used for any of their issue, hence "children," "brothers," and "relatives," while ba-denya means "fraternity" "kinship."

Although, in the restricted sense in which we shall use it, the word ton' refers to anyone living under the authority of the ton'-tigi, whether or not he is connected by descent, the more exact term, ba-denya, refers only to those whose

---

2. Fa means "lord," "master," "patriarch," or "father," depending on the circumstances. Within the family, it corresponds very closely to the titular incumbent of such rank and high office who led Mistral [Ed., a French poet] to call his father: "my lord father," or "the master."

614 descent is in the male line from a common male ancestor or,
596 even more narrowly, to uterine brothers and sisters. The two terms, ton' and ba-denya, have a meaning which differs from that of our word "family," which is defined in our legal terminology as "the totality of persons united by ties of kinship or affinity."

592 The Bambara family lives in huts which are connected by an enclosure or completely surrounded by the enclosure when its two extremities are supported on a kind of vestibule (blon'). The enclosure is called gwa in some dialects, whence the name gwa-tigi, a term of respect for the fa, master of the house.

Gwa, therefore, means "family" only indirectly, and it is very difficult to reconcile this word with the word "family," since the gwa houses people who are not members of the family and, on the other hand, does not house all the members of the family.

Besides, it should be noted that the word gwa in its meaning of "enclosure" is used to designate all sorts of agglomerations likewise enclosed, notably livestock folds. The variants wore and gore, which are more specifically applied to these folds, may also be used, and actually are in some regions, in forming the names of settlements. The form kore or kori, common in expressions of courtesy, has the same meaning; kori ka kende? means literally, "Is all the house well?" [160]

In some Bambara dialects, the word so is used instead of gwa. The primary meaning of the word so is also "enclosure" and, more especially, "hedge of thorns," by which all primitive establishments are protected; so-tigi has the same meaning as gwa-tigi. The word so also means "household," i.e., the contents of a house, including all within it, whether on a permanent or temporary basis and whether or not belonging to the family.

It is common practice, however, to use so and gwa in the narrow sense of "people of the family," i.e., those living under the authority of the same fa.

592 601 596 It may be said, in short, that there is no exact term for designating expressly and exclusively a collectivity

592 comparable to what our law defines as a family. In fact, the
601 four terms just discussed, ton', ba-denya, gwa, and so, are
596 all used for the purpose. It is what is intended by their use
that gives them their meaning, and depending on the region,
each term has a meaning made precise by usage.

The dwelling of the Bambara family usually includes
592 a fairly large number of huts of various kinds. Some are
342 cylindrical and built of native masonry with a conical straw
roof and, for a door, a slit or opening which does not extend
all the way to the ground. Others are parallelepiped, made of
native masonry, and ordinarily also provided with no opening
except the door.

Shelters (gwa), consisting of flat straw roofs supported
on forked sticks, are usually placed haphazardly or wherever
the master of the house wants them and are certainly not governed by any traditional rules or fixed orientation. All these
dwellings or out-buildings are enclosed by either a clay wall
or an unbroken hedge whose two ends are supported by the walls
[343] of the hut called blon' which serves as a vestibule for the establishment.

The altar of the ancestors and of the household gods is
[178] found in the blon'.

The houses of notables are somewhat more elaborately
arranged: instead of a single inner court, there are two, three,
or even more, sometimes graduated in extent. The master arranges his people in such a way as to divide into sections the
heterogeneous elements gathered together under his protection.
592 The domestic servants and the young [161] men, the women,
girls, and small children, and finally the eventual successor
are, as it were, fenced apart in their own blocks of dwellings,
while the fa himself is to be found in impressive isolation,
which lends weight to his authority.

Among great personages, especially among heads of
592 clans, this arrangement is the rule, and their isolation deep in
712 the interior is virtually a security measure. In the old days a
kind of fortress or redoubt, the tata, was built in the center of
the royal residence. Gunpowder, weapons, and all the means
of defense were kept there, and it was no easy matter to capture

592 this well-built structure in the midst of the inextricable maze
[712] of surrounding huts which were themselves surrounded by a
solid wall of native masonry.

The people of a single household are classed in three
[565] categories: free men (woro-u), members of castes (nya-maka-
la), and slaves (dyon'-u).

The freemen. Within the family, free persons are:
596 the men (tye-u), i.e., circumcised males; the moso-u, ex-
561 cised women; the den'-u, children of both sexes.

601 In accordance with their influence (faya) in the family, the men are called koro-u, old men, elders, or kamalen'-u, young masters. Among the old men the bina (uncles), brothers of the fa, hold the preponderant position; they form a kind of limited family council and generally work for the welfare of the community under the direction of the fa.

Among the women the following distinctions are made: the mothers, i.e., women under the control of a husband and who are actually mothers of children, ba-u; old women, moso-koro-u; grandmothers, mama-u; and finally unmarried girls, moso-de-u.

All children are called de unless they are specifically identified as de-n-ke, "boy," or de-moso or deni, "girl."

601 Furthermore, every male with any influence (faya) in the family, no matter to what extent, is called fa (1): [162]

1. In one way or another, therefore, every male is fa, since he exercises or will one day exercise faya. The word fa is jokingly applied even to very young boys just as ba is applied to little girls. These words may be used just like our familiar expressions when we say "Father X" or "Mother X" with no reference intended to any real state of fatherhood or motherhood.

In any case, the words fa and ba are also used as terms of respect, just as we

601

> say "master" or "mistress." One may even say that in ordinary usage fa and ba are equivalent to our "Monsieur" and "Madame," with all the shades of meaning these entail.

father by his children; husband by his wives; grandfather by all his descendants; and uncle by those who have claims on the family property.

The genitor, procreator, father is the wolo-fa, and all his descendants alike are called de in relation to him.

There is, properly speaking, no term meaning brother or sister, but one can say baden'-ma-ke or baden'-ma-moso. Children of the same father call each other koro (old man) or dua, duani (young), respectively, in order to indicate the eldest and the youngest and to designate agnate or uterine relationship. Strictly speaking, duani is the younger uterine brother.

There is no special term for nephew; brother's sons are de because they are under their uncle's authority, just as his own children are. Sister's sons do not belong to their mother's family, and they are de to their father's family.

Cousins, insofar as they are the issue of brothers, are also de in that they are all under the authority of the same fa, and since they consider themselves brothers, they call each other koro or duani, respectively.

601 602 There is a kind of cousin relationship between the children of a brother and a sister, with some precedence accorded to the former.

A kind of kinship likewise exists between the children of two sisters.

In short, true kinship exists only between persons who are dependent on the same fa.

601 As for affinals, they are all covered by the single term biran', literally, "one with whom we are in agreement."

The women, moso-u, as co-wives, call one another sina-u. With respect to their children and the other children in

601 the household, they are ba-u (mothers), and the title ba is commonly used out of deference or respect. Very old women are addressed as mama, "grandmother" or "ancestress." [163]

564 Members of castes. These are free men who are destitute and form a kind of clientage of important families. We shall discuss them later on.

567 Slaves. Only slaves entrusted with special duties lived in the house. When a master discerned qualities in a new slave that might make him useful in the house, he kept him in his own service and often treated him well and generously. Custom gave the children of such a slave a privileged position; since they were "born in the house" (wolo-so-u, they could not be sold except in the case of extreme necessity. All confidential servants were recruited from the wolo-so-u, and the eldest, most experienced, and most favored often acquired great influence in family affairs. They knew more about the secrets and resources of the community than most of its members.

Another category of slaves is made up of those who after three generations were ipso facto freed (dyongoron'-u). They have played an important role in native society.

2. The Patriarchal Community or Patriarchy

769 The ancestral spirit-god. In order to view a custom from its most expressive aspect, it is necessary to observe it in its fullest development and, at the same time, to note anything adventitious or foreign that modifies its appearance and procedure or alters its basis.

The cult of the ancestors is the very essence of the family, and the most characteristic manifestation of this cult is the funeral ceremonies for the head of a family, the patriarch (fa). Here, one is present at the transformation of a man into an ancestral spirit-god within the span of 40 days.

This period is an interval during which a link between the past and the future is formed in the present, whereby

769 continuity is established between the living and the dead, with the deceased acting as intermediary. Religious customs, magic, and civil law, all are intermingled in apparent disorder, and the casual or inexperienced observer is all the more confused inasmuch as diverse accessory or circumstantial features mask the essentials in being more obvious. [164]

Does not the same sort of confusion confront a foreigner in France who sees the funeral of a prominent citizen? If he is uninformed, how is he to recognize the religious rites and civil requirements which form the common basis of all funeral ceremonies, for the great and for the humble, brought to their highest development for the one, reduced to their absolute minimum for the other.

Therefore, the important thing to show here is the sub-
764 stratum on which all funeral observances rest. For the sake of
clarity, we shall divide the period of 40 days into four phases:
(a) from death to burial; (b) burial; (c) the funeral celebration;
(d) the period of mourning.

(a) From death to burial. As soon as death occurs, the
763 fact is announced to everyone by appropriate means.

The lamentations of the women burst forth, and this spreads the news in the immediate vicinity, while gunshots inform the whole settlement. These acts have something of the ritual that was carried out when a Bambara died in war. Raffenel has given us a remarkable picture of it.

"When a Bambara died in battle, three gunshots, fired
763 near the door of his hut by one of his companions-at-arms, an-
152 nounced his death to the family. Wailings answered this an-
nouncement, and the weeping women of the village came out
of all the huts to run to the house from where the signal had
been heard. Everything was abandoned in order to share in this
sorrow. First they wept, and then they ran to find out where the
mourning was...

763 "The warrior charged with this mission arrived at the door at a gallop. He pulled up his horse, slowly loaded his gun, shot it, reloaded it again, then again... , and when the third shot had rung out, he rode off with equal speed, without uttering a word, without giving a single detail... Two shots announced enslavement."

763 A gunshot today most likely signals the death of a
hunter or the father of a hunter. In any case, however, there
are always cries and vociferations by [165] the women, who
are joined by their friends, relatives, and neighbors.

Horsemen ride off to notify any of the sons of the deceased
who are away.

[567] Meanwhile, the chief of the slaves, the major-domo,
the confidential agent, or a friend or neighbor of the deceased
goes to inform the chief and the principal men in the village.

These personages come to the mortuary house at once,
764 spear in hand. After being received by the man temporarily
in charge of the house, they go to the deceased to discover his
identity and at the same time express their condolences to the
family represented by the person who received them; then they
withdraw.

In the mortuary hut silence descends while the women
prepare the body. They wash it with warm water usually
[824] scented with basil, *su-ko-la* (*Ocimum album* and *febrifugum*);
they dry it and wrap it in pieces of native white cotton material
or else dress it in its own garments, likewise white. A mat
[285] of coarse straw (*tyekala*, *kara*) is placed in the middle of the
room. A fine, flexible mat made of *iphène* leaves is put on
top of it, and the women lay out the corpse on the second mat.
Sometimes they place a grindstone on the abdomen to keep it
from swelling.

When these preparations are completed, the women,
[352 dressed in white native cloth, sit down in the native fashion on
516] tiny stools in the mortuary hut. Those who come in from outside
give evidence of terrible grief: they cry out, they weep,
[152] they cover their heads with a bit of cloth and hurry toward the
mortuary hut. As soon as they enter, they become quiet and
stop weeping.

152 Among the Bambara grief is never silent; it is custom-
764 ary to show it overtly. As soon as there is a crowd, the singing
767 begins in rhythm to the clapping of hands. One person or
another will be inspired to sing of the achievements and virtues
of the deceased. Professional weepers and mourners mingle
with the crowd, guiding and gradually encouraging the noisy
display.

764 The provisional master takes his place at the door or inside the blon', the vestibule of the house, and receives the condolences. [166]

Several days elapse between death and burial in order to give distant or absent relatives time to arrive. During this period the funeral songs become more and more elaborate and [533] are left to professional singers who are accompanied by various instruments: tom-toms, xylophones (bala), guitars. The singers, dancers, and mourners exert themselves all the more if they think there will be substantial rewards.

The children of the house (den'-u, de-u) are allowed a good deal of freedom during this period, as though the authority which had curbed them had ended with the life of the deceased. They are allowed to take hens and goats, to eat lavishly, sing, dance, and generally rejoice.

On the night preceding the burial, the deceased is placed outside under a shelter (gwa); the songs and dances [857] continue. It is customary for the children (de-u) of the house, led by the professional members of the funeral orchestra, to take part in the singing and dancing.

Relatives, friends, neighbors, and persons obligated to the family are expected to bring offerings in proportion to their rank or indebtedness so as to contribute to the meals and to [689] the funeral alms. This is a very strict obligation; any failure to comply not only shows a lack of respect for the dead, but is also an offense which the family must avenge. The chronicle of Ségou bears witness to this fact.

763 764 Along with the religious ceremonies, events of an entirely different nature take place. If the death should seem in any way suspicious, it is the duty of the family to investigate the matter without delay. It is particularly the heir presumptive, if he is present, who is required to take steps at once to clarify the matter; he questions the ancestors and consults seers and magicians. The funeral ceremonies are sometimes dominated and even conditioned by the results of these investigations and consultations. At the very least, it would be essential to obtain the lifting of the interdict imposed on the

763 deceased in case he had been killed by a genie (nyana). Sacri-
764 fices, alms, or the payment of a fine are necessary in that event, along with intervention by the priest of the nyana in question.

764 Most often, the body is turned over to a priest (nyana-n-tigi) [167] if the deceased was a member of a brotherhood.

[735] In any event, it is customary to give alms at the cross-roads near the village.

Further, the death of the fa puts an end (1) to the authority held by him, and this may have serious consequences, since for the moment everyone is virtually independent. That is why the servitor who had the master's confidence and who actually ran the establishment retains his role after taking certain precautions (2). In particular he must make sure that the movable property of the deceased is not carried off. He is familiar with these things, and he is the guardian responsible for them. He makes the women return the gold jewelry and valuable fabrics, puts everything in a safe place, and makes an inventory in the presence of the heir presumptive.

764 (b) Burial. The deceased may be buried in the ground within his hut or at least in a corner of his establishment. In former times there was a cemetery outside the village, often near the grove of the nyana dugu-da-siri (guardian genie of the village), and in such cases it was apparent that the more important the deceased, the nearer his tomb to the sacred place.

766 For persons of distinction there is usually a special kind
764 of grave. It is about two meters long, and while the opening

768
.357

(1) When a king of Kaarta died, the interruption in sovereignty often gave rise to serious anarchic disturbances.

(2) This was the role that Ngolo Dyâra was seeking when he asked to be placed as "guard at the master's door."

764 is two or three meters wide at the surface of the ground, it is
766 barely a meter wide at a depth of a meter and a half. Three
of its walls are vertical, and the fourth is sloping. At the bottom and along the whole length of this fourth side, a hollow is prepared to receive the body, which is placed on its right side with the head toward the south if the deceased is a man, and to the north in the case of a woman.

It is usual for the priests of the brotherhoods to dig the
764 grave. In the course of their work, following a special ritual, they collect various elements for [168] their magic. In any case, it is regarded as dangerous to handle anything having to do with death, and only a priest can do it with impunity.

When the time for burial is at hand, the touching ceremony of farewell to the dead takes place under the direction of the principal gravedigger. Wrapped in the mats on which it lay in the house, the body is placed under a shelter (geva) in the courtyard of the house. Everyone in turn pays his respects to the deceased and asks pardon. Everyone in turn, from the eldest to the youngest, comes forward, accusing himself of failings and faults and begging the deceased to grant him protection. All this is done through the mediation of the principal gravedigger who ceaselessly intones: "Pardon us! Do not be angry; we loved you and respected you; be happy and protect us!" Then everyone chants in unison: "Give us rain in the winter, make our harvests abundant; bring prosperity to our houses, and give us many children, wives, and wealth."

When this ceremony has come to an end, the gravediggers lift the corpse to their shoulders and, preceded by the weeping and lamenting children (de-u) and followed by the
[482] crowd of relatives, friends, and neighbors, they set off at a fast pace, almost on the run, toward the tomb. There, the body is put down beside the grave; the men stand around it with the women behind them. The sons of the deceased go down into the grave, open the mat, take hold of the body, and place it in the niche. They tear loose a corner of the shroud or shirt and hand the end of this torn fragment to someone present who holds it outside the grave. With wooden scoops or sun-dried tiles they

764 close the opening of the niche and carefully fill any cracks with earth moistened and kneaded on the spot.

During all this the women sing in a low voice and clap their hands, accompanied by muffled drums.

When all is done, the sons of the deceased come out of the excavation, and the principal gravedigger comes forward with his spade upside down on his shoulder and holding a gourd full of water in his hand. Silence falls, and the women and drummers are still. He pours some water at the head of the grave, saying: "See this water. Do not be angry, pardon [169] us, give us rain in the winter and an abundant harvest. May the wind blow from the east or from the west, from the north or from the south, as is best for us. Give us long life, many descendants, wives, and wealth." And the throng replies: "So be it (*o de ka ke*)."

With the back side of their spades the gravediggers then fill in the excavation. The women resume their singing in rhythm with the clapping of hands, and accompanied by subdued drums, they say: "Our *fa* is dead, but he will return! Young men, fill in the grave well so that no sorcerer (*suba*), no hyena, no wild beast can carry away the corpse."

764
778
789

When the grave is filled in, the person holding the strip of material still attached to the shroud pulls it so that it breaks. This bit of cloth is a precious relic for use in various magical performances. The magical bands called *tafo* are made from it and are tied around the waist to protect one from back ailments and spectral apparitions (1).

1. These are a few of the innumerable examples of magic practices which in the most diverse forms accompany all important activities.

The coarse mat which had served as a bed for the deceased is put upon the grave, along with a pair of his old sandals and his water jug. The finer mat is usually given to a friend or to a family, and it is then burned outside the village (1) [Ed., see footnote above].

764 Burials are never willingly held on either Wednesday or
789 Saturday (1) [Ed., see footnote above].

Finally, a small white chicken (2) to ward off bad luck is sometimes put into the niche just before it is closed off (1) [Ed., see footnote 1 above].

Upon returning from the burial, someone clubs the dead man's dog (1) [Ed., see footnote 1 above], unless he left express orders to the contrary. Some Bambara even go so far
[554] as to buy a dog with this posthumous honor in mind. This seems to be another magic practice to exorcise the ghost of the deceased (1) [Ed., see footnote 1 above].

When they have returned to the house, the brothers-in-law of the deceased eat the national dish, millet mush (to). When they leave for their homes, each is given a rooster or a hen in the name of the deceased, which they must eat en route before they reach home. If the fowl [170] were not eaten until they reached their villages, it would arouse the dead man's vengeance; his ghost (nyama) would haunt these impious persons. This too seems to be another magic practice to counteract the evil effects of death.

764 (c) The funeral celebration. As soon as the death has
been announced, it is the duty of every relative, neighbor,
431 friend, or anyone under any sort of obligation to the deceased to bring an offering in proportion to his rank or degree of obligation for the purpose of honoring the dead (1).

In certain cases, the total of these offerings is very large. The chronicle of Ségou tells us that when Ngolo died the cowries contributed filled seven huts, representing several thousand francs. Besides, people give whatever they wish or can afford: a horse, a cow, a sheep, fowl, cowries, gold, strips of native cotton, fabrics, grain, etc.

---

2. If the corpse is a woman, a fertilized egg is used.

1. We noted earlier the sanctions applied at the funerals of Biton and Ngolo.

764 574 Theoretically, all of this is supposed to be used to honor the dead, which is done in several ways. In the first place, it is obligatory to serve food and particularly drink to anyone who comes to present condolences. These meals and drinking bouts are a kind of communion since from everything consumed an offering is first made to the deceased and also [769] to the ancestors whom he has gone to join; it is a kind of communion with the departed members of the family.

These repasts and drinking bouts tend to develop into orgies, and the inexperienced or casual observer may think that they are carousals at the expense of the deceased. As a matter of fact, however, far from suffering a loss, the family of important persons receives more than it spends, at least for the time being (2). The more lavish the celebration, the more it is supposed to please the deceased and cause him to look favorably on his survivors.

764 735 In principle, everything not consumed is supposed to be given away as alms to the poor and not added to the family property. It is quite natural, therefore, that the poor of the village come to partake of the feast, and indeed, they are invited. They must be treated with much cordiality if the sentiment governing the feast conforms to the spirit of the custom. That is why the [171] chronicle tells of Nyana-n-koro, upon the death of Ngolo, claiming that the cowries given should be distributed to the poor, to travelers, and to all the needy; that is the true spirit of the custom, and that type of alms is particularly pleasing to the dead.

The funeral feasting continues for seven days, which are called dyansa, "alms." It is a time especially devoted to [537] condolences, called sanga-fo (1) "funerary discourse." The

---

2. The family will have to behave reciprocally toward the families who have thus shown their respect when deaths later occur among them.

1. Literally, "sayings (for the sake) of the dead."

764 period is sometimes reduced to three days, but a week conforms more to custom, as is shown by the Ségou chronicle cited earlier.

All this takes place "at the door of the dead," at the blon'-da, as the natives call it, that is, at the very place where the elder was wont to sit and where offerings were made to the ancestors. It is believed that the soul of the departed is there and will be gratified amidst this abundance honoring him and testifying to his kindness and also to his power. In the minds of the Bambara these repasts of communion form a very strong bond among those who partake of them. The act of eating consecrated food together is a kind of sacrament which binds the participants to mutual aid. A traitor is doomed to be cursed by the manes.

Magic, of course, can free a person from these bonds and even enable him to profit from these funeral gatherings to further the most nefarious schemes, but that does not alter the concepts on which the dyansa and the sanga-fo are based.

765 783 [824] (d) Mourning. The purification of the hut of the deceased takes place on the eighth day. Women pulverize tree bark -- from the cailcedra (2) especially -- put it in water,

and sprinkle this liquid about the hut which they then sweep.

They assemble with native brooms, sing, and do a kind of dance step; they collect the dirt and throw it away at a crossroads outside the village (3). The hut may then be re-

3. Preferably at the main crossroads (da-n-kun'-ba-la).

occupied. [172]

765 514 During the eight days following the burial, the daughters of the fa live together in strict seclusion. They spend their days in the blon', where they spin cotton and take their meals. To take care of their natural needs, they go out only in a body;

765 [514] twice a day, morning and evening, they go in procession, their heads covered with caps made of white cloth. They spend the nights together, in a single hut if possible.

[292] [783] The wives of the deceased go out only when it is absolutely necessary during the first moon after the death; they are dressed in white and wear a kind of white hood on their heads and sandals made of goatskin on their feet. At the end of the moon, at night and separately, they go to a sort of purification rite that takes place at the crossroads outside the village.

Up to the fortieth day there is a very gradual return to ordinary life. Then, and only then, the successor to the deceased is finally recognized and installed, as is shown in the chronicle of Ségou.

801 805 In closing, let us note how every ritual sequence rests on periods of time whose real meaning must be sought in magic. The astral religion of the Semites in fact taught that on the third, seventh, and fortieth day after death the moon acts more powerful to destroy the body (1). Apparently some such beliefs must account for the Bambara rites planned precisely according to these numbers. This seems all the more likely since the Sudanese commonly believe that the fortieth day marks the separation of the flesh from the bones of buried corpses.

1. See the meeting of the Academy of Inscriptions and Belles-Lettres of August 9, 1918, paper by Franz Cumont, "La commémoration des morts et l'astrologie [The Commemoration of the Dead and Astrology]," Journal Officiel (1918), p. 7224.

The Patriarchal Community

428 When the fa is dead, all his property remains jointly among his legal heirs, thus constituting a patriarchal community whose investigation has two parts: the community of persons and the community of property. [173]

I. The Community of Persons

596 614 Members of the community. The patriarchal community is made up solely of the legitimate descendants of the deceased fa: immediate descendants (sons and daughters), or his descendants exclusively in the male line (descendants of his sons and grandsons).

The descendants of the fa through his daughters are outside the community since they belong to the patriarchal communities of their respective fathers.

428 596 614 If, at his death, the fa leaves no male heirs, there can be no patriarchal community; his property is divided among his daughters or, if there are none, among his brothers. If only a father or mother or some other ascendant were left, his property would go to them, or if he leaves only daughters, his property goes to them, but in either case there will no longer be a community.

848 596 614 578 Legitimacy is the necessary and sufficient condition for inclusion as a member of the community. A legitimate child is one born of a marriage, that is, of a union between two free individuals that conforms to custom. When slavery introduced concubinage into the household, however, the rule was relaxed because a free man was unwilling to have his sons slaves. In practice, therefore, maternity resulting from intercourse with a free man frees his concubine from slavery, and the children of the union become members of the community. This dangerous privilege is often contested by agnate brothers born of free mothers.

Given the diversity of conjugal bonds, ranging from marriage to free union, it is easy to imagine the discussions that

848
596 arise on the subject of legitimacy. During the fa's lifetime,
614 his authority imposes whatever solution pleases him, but when
578 he is gone, the disputes involving status are all the more violent
for having been suppressed or evaded for so long.

These disputes gain strength also from the difference in
614 rank which the members have within the community. The
596 totality of prerogatives of all kinds which raise the fa above
all others constitutes a kind of superior dignity whose essence
is the omnipotence covered by the word faya, from which
came the title fa [174] (master, lord). It is in reference to
the faya that the members of the community are ranked.

Only male members can advance claims to the faya,
[562] and because they can do this, they can all call themselves fa.
On the other hand, women can never hold this authority; they
are fantan'-u, "powerless."

Among the fa-u there are distinctions based on degree of
596 kinship and on age; those most closely related to the fa will be
614 the first to receive the honors about to be described. Male
601 descendants in the first degree form a sort of senate of which
561 the eldest is a kind of president-by-birth; he is truly the fa,
the actual representative of the deceased. The one immediately following him by rank in terms of age is his syere (follower), his heir presumptive at the head of the community. The other senators, usually brothers of the fa, are uncles (bina-u) to the descendants of the second degree and their children. By reason of the authority associated with the position of bina-u in the community, this kinship term has come to be a title of respect which is bestowed on men toward whom one wishes to show particular esteem (1). Because of their age, all the senators of the community are commonly called koro-u, "the elders," and the fa is first among them.

---

1. It is worthy of note that in Uncle Tom's Cabin, Miss Stowe explains that among the slaves in America the word "uncle" had precisely this meaning as a title of respect and honor.

561 596 614 Among the rest of the men in the community, one distinguishes those who, being circumcised, are married and even fathers of families or who are about to become one or the other; these men are called kamalen'-u, literally, "the young masters." Finally there are the uncircumcised: first, the adolescent boys called soli-ma-u, "people of the soli," that is to say, who will soon be circumcised; the others are small boys (den-tye-u).

596 614 The fa, his election and installation. The personage in the community on whom all attention is concentrated is the fa.

Even if during the life of the fa his successor is known, it does not always happen that the replacement will follow as was intended. [175]

In the first place, the designated heir is free to refuse the faya for any reason he pleases, including solely that of personal convenience. The chronicle of Ségou relates that Biton's son, who lived at Oftala, refused the faya because of the excesses of the "people of Ségou."

More often, however, the faya eludes claimants for two main reasons.

No one can become fa if he does not belong to the community. Hence, anyone who ceases to be a member of the community, whether voluntarily or not, cannot attain the faya. One may cease to belong to the community either in fact or by law. The former condition would include prolonged absence, enslavement, settling abroad without hope of return, etc. This brings about a kind of suspension of the exercise of rights, but not their abrogation. On the other hand, when the member expressly renounces the community or when he is excluded by the decision of the fa (1) and the senate, he is

1. So it was that Ma-n-son decreed that his brothers Séri and Ba were excluded from the faya, because they merely looked on as spectators when he was struggling with Nyana-n-koro and had thus shown themselves hostile to the fa.

596 614 deprived of his rights, he and subsequently those who would represent him; the branch of the family of which he is head is henceforth dead so far as the family is concerned.

In the second place, no member of the community [848] attains the faya unless he fulfills certain conditions, of which the first are legitimacy and primogeniture.

The fact that the claimant is a member of the community [578] implies that he is legitimate. Since it does happen, however, that the question may not have actually been investigated or, by the wish of the fa, not even been raised, the legal heirs who would be injured and intriguers who seek any pretext -- and there are always some of these persons -- raise the question, and infinite complications often follow.

Primogeniture is equally subject to challenge, and the opposition everywhere finds it a convenient motive for their [595] machinations. It is, indeed, understandable that in polygamous households, with the wives sometimes residing in various places apart from the husband, simultaneous or at least close births give rise to disagreements as to which son was in fact the first-born.

Finally, even though he may actually be the eldest legitimate son, the claimant may find himself passed over because of measures taken [176] against him by the late fa. It appears that although custom favors the eldest legitimate son, it yields to the expressed wishes of the fa if the senate agrees to his rejecting the candidate. This is a grave step and one which may lead to the most violent reactions.

This raises the question of whether special talents or aptitudes should be required of the claimant, over and above those of legitimacy and primogeniture. For example, can he be required to be healthy, active, and a good administrator? It appears that the senate may choose to eliminate a person it deems unworthy. This applies particularly to a free man who has voluntarily fallen from that state by living like a caste member or a slave. By this behavior he has already excluded himself from the community, but it sometimes happens that his actual exclusion has not been noted or announced before the question of accession to the faya arises.

596 614 Most often, however, the debates are concerned either with legitimacy or with primogeniture, and it is by no means rare for a fa, before his death, to insist that the one chosen be the one designated by custom and to threaten to call down curses on anyone who should try to bypass him or to reject his authority (1).

1. Ngolo and Ma-n-son both acted in this manner, according to the chronicle of Ségou.

In associations which have adopted a community organization analogous to that of the family, the election of a head is determined solely by these factors. It may be concluded that these are the bases consecrated by custom and that any other arrangements can only result in the worst kind of disagreement.

567 578 596 614 There is confirmation for this. Where slaves are numerous and well organized, they may refuse to recognize the new fa and choose another from among the members of the community. They may even decide to give themselves to a foreign master on the pretext that the fa imposed upon them by custom does not meet with their approval. This is a disaster which jeopardizes the wealth, strength, and even the unity of a family, for it can happen, in order to deal with the crisis, that a compromise is made which more or less ignores the regularly designated fa. This results in wrangling which usually ends with a schism in the community.

The history of these countries tells of many such cases, [177] because the slaves, upon becoming powerful, made the law in the families. The chronicle of Ségou thus relates that the slaves belonging to Dina Wara gave themselves to Biton upon the death of the former. It goes without saying that endless intrigues always precede such defections. The really successful fa, such as Biton, earned their reputations as able politicians and increased their fortunes precisely by their [662] ability to avoid such disasters in their own communities, while stirring them up elsewhere.

596 614 In principle, even a duly recognized *fa* is not installed until 40 days after the death of his predecessor. When there is no dispute, he in fact functions as *fa* at once; when, on the other hand, there is disagreement, the period may be extended.

The 40 days do not create an hiatus between the two administrations. When the new *fa* is installed, however long a time may have passed since the death of the predecessor, his *faya* is considered to date from the day of the latter's death. That is why the temporary official makes an inventory accounting for everything, if possible in the presence of the new *fa*, so that there will be no question when he turns over the inheritance.

Thus, this delay imposed by beliefs (ascribable, apparently, to magic) governed by respect for the mysterious workings of nature, has given rise to a kind of suspension of civil affairs, which allows the community to accept only a chief whom it recognizes because he fulfills the conditions required by custom.

Once he is recognized and installed, the *fa* continues in office no matter what befalls him; he cannot be removed for any reason whatsoever. When he is physically and morally unable to act, however, he is replaced by his eventual successor. So it was that when Sounsan was very old, he relinquished the *faya* to Massa who, in turn, did the same thing with respect to Béni-Fali.

It may even come about that the chosen *fa* is absent for an indefinite period. This happened, as we have seen, in the case of Dessé-koro, who was a prisoner at Ségou. He was not superceded, but in order to avoid the difficulties of an indefinite interregnum, Sira Bo was asked to take over the *faya*. He agreed only on condition that he would not be dispossessed if Dessé-koro should return. Mo-Siré, "little brother" (*duani*), i.e., uterine younger brother of Dessé, [178] promised in Dessé's name that Sira Bo would remain *fa* as long as he lived. When Dessé returned, he respected the promise made in his name by his *duani*. This is a typical example of the manner in which compromises can be made with custom.

596 614 The functions of the "fa." The duties of the fa are many and complex; for the sake of clarity, we shall study them under three headings: cult; relations between communities; administration of property (which will be studied in connection with community property).

596 614 782 Cult. Religion gives considerable strength to the family since nothing is decided without consulting the manes and the gods. Raffenel has given us a picture of old Niany praying to his manes on behalf of his absent son: "O my God, I command my son to your case since he has gone away on a mission important to all of us. Be with him on his journey. Preserve him from the wicked and from all misfortune so that he may once again enter by this door through which he departed and before which I am now kneeling. I implore you, O my God, to restore him to my love and to that of his mother, his brothers and his sisters (1)."

[114] 1. In spite of deviations due to Raffenel's desire to give a personal and literary touch to what he reports, the essential points of this prayer are accurate, and that is why I quote it.

[787] The chronicle of Kaarta tells us that old Sounson begged for early death as a sign that his lineage would be powerful in the future. Also, in order to make a prophecy come true, Deniba Bo submitted to the fatal blows of the Khassonké to make sure that his people would conquer the country.

After all, no one is free of fear of the gods, not even those whom one would take for brave spirits. Raffenel tells us that Bouo, his informant, feared the wrath of the god whose secrets he had revealed. The chronicle of Ségou tells that Ngolo, thinking he had aroused the wrath of his manes by encouraging evil desires in his oldest son, Ntyi, did not hesitate to sacrifice his [179] own grandson, the son of the aforesaid Ntyi, an atrocity which bears witness to a faith that was as profound as it was barbarous.

596 614 787 It is the duty of the fa to see to the cult. He projects everything that happens to him personally to the supernatural plane so as to come to conclusions that will guide his own conduct. He discerns in the most ordinary dreams indications of what will please the dead. Furthermore, the people around him point out the signs of divine will that they have observed. If, as happens in great houses, the fa is obliged to turn over part of his responsibility to the family gods to one of his confidantes, the latter will not fail to keep him informed of anything significant that may be revealed.

[771] Thus, daily life is unceasingly dominated by the supernatural, and every important event is conditioned by these beliefs. This is readily seen in all the family institutions: birth, circumcision, marriage, and death.

[577] It follows that the moral behavior of the family is a concern of the fa. Whenever something abnormal or painful occurs, the fa looks into it. Do the dead perhaps have reason to be dissatisfied? Have they been neglected or offended? He questions them, and if he finds confirmation for his suspicions, he at once seeks to appease the manes in whatever way they desire. If the trouble persists, he investigates further, and sometimes everyone in the house is questioned or, if one prefers, made to confess, even infants. Could one of them, moved by ill feeling, have uttered maledictions when invoking the dead?

614 596 783 [578] When the fa himself is ill, this general confession is virtually obligatory. This is because the absolute authority of a fa can hardly fail to arouse hatred, and hatred, a bad counselor, makes people resort to magic to rob the more powerful of life. Fear that the elder's "clairvoyance" will discover the wickedness in the depths of one's soul and punish it usually induces the guilty person to obtain a pardon for his wrongdoing by confessing it, and then everything returns to normal.

596 614 Upon the death of the fa, it is the first duty of his successor to try to discover, by any means, the causes of death and to avenge it if need be.

[763] Everything which the old fa was wont to honor, which forms the spiritual treasure [180] of the family, must also be

596 honored by the new fa, and there is nothing to prevent him
614 from adding to the treasure.

The basic cult of the family is the cult of the ancestors.
769 Although the dead are frequently buried outside the family residence, their souls are thought to live in the blon' of the dwelling.
[343 The blon' is a hut with two openings on opposite sides, one
592] to the street and the other to the interior, usually the courtyard. It is impossible to enter or leave a house without going through the blon', where there is always a guard, at least in important houses. The ancestors are usually represented in the
778 blon' by a group of crude, conical clay figures of a man and
769 woman, the latter identifiable by the exaggerated breasts. Sometimes the symbol of the dead is a small board about a meter long, twenty centimeters wide, and a little more than a centimeter thick; at one of its extremities a slight protuberance vaguely suggests a head, a kind of ellipsoidal cylinder with eyes, nose, mouth, and chin faintly carved on one side. On the side with the face, the board has a checkerboard pattern, often of alternating black and red squares, probably to indicate the material of a loincloth. The lower extremity of the figure has a semicircular portion cut away to give the effect of legs spread apart when the effigy is set up.

769 Whatever form it may have, the representation of the
dead is called kara (1) and serves in some manner as an altar
782
778

1. In Soninké, kara means "to die" and "death."

on which libations are poured and to which are attached the remains of the sacrifices made to the dead (su-u). Nevertheless, it is also a very widespread practice to make libations and sacrifices before the door of the blon' and, more rarely, before the door of an inner hut. In this case the liquid is poured and
[775] the remains smeared on the vertical edge of the opening. This practice is based on the belief that the souls of the dead ancestors like to return to the place where the fa liked to sit during his lifetime. Undoubtedly, the ancestors are regarded as guardians of the threshold; they are [181] honored as such because it is believed that they prefer to be honored in this way.

769 778 782 This is the place where on important occasions the fa receives congratulations or condolences, which are addressed not only to him but also to the ancestors who, though invisible, are nevertheless present.

769 782 When the fa wishes to make an offering to the ancestors (fa su son'), he squats before the door of the blon' with his head bare and a chicken in his hand. He addresses the most recently deceased (1), saying: "I offer this chicken in my own name and in that of my children. Jointly with our dead fathers and mothers, preserve us from sorcerers who eat souls (suba) and from the evil of the wicked; protect us from sickness and disaster; guard our health; give us good wives and healthy children; bring success to our work in the fields, and give us rain."

787 If the offering is being made for a particular purpose, the fa is explicit about it and speaks just as he would to a living person. He concludes by asking that the victim reveal the response by the way it falls as it dies. Then he cuts the chicken's throat and dribbles the blood on the wall at either side of the door of the blon'. He than resumes his crouched position, and after throwing the fowl a short distance, he watches its convulsions and waits for it to fall motionless. Usually the position is regarded as favorable if the animal dies with its legs in the air and its feet turned toward the officiator; if the feet are turned away, the response is unfavorable. Often, just as he completes the offering, the fa announces what position he considers favorable or unfavorable.

The fa gives the sacrificed chicken to his wife to be cooked, and then he divides it among the members of the family; this is truly a communion.

1. It seems that the ancestors form a kind of chain in which the first invisible link is the ancestor most recently deceased and the first visible link is the current fa.

769 782 As a substitute for the chicken, it is very common to offer some *dege*, a bit of millet coarsely ground and thrown in a little water. The *fa* keeps this liquid in a small gourd. It is perhaps [182] reasonable to think that this is the most ancient manner of honoring the dead and, in particular, calling for their protection in obtaining the two essentials of life: grain and water.

[273] An equally common libation is made with *dlo*, a kind of millet beer which every Bambara enjoys drinking to the point of intoxication. The dead could hardly fail to be pleased with an offering of what they had enjoyed so much on earth!

[276] One must conclude, too, that offerings of kola nuts please the dead because it gives them a chance to enjoy a favorite treat. The officiator chews the kola nut and then spits out his saliva mixed with the juice and remains along the walls of the *blon'*.

Such are the ordinary offerings, but on special occasions the quantity and importance of the gifts are increased according to the desired results. When many people are present and the
[781] house is prosperous, the victims are oxen and sheep. It should not be forgotten that the flesh of these consecrated victims, eaten in common, makes a very strong mystical bond between the participants; it is a true communion. It is generally conceded that the bond created by drinking consecrated liquids together is much less strong.

776 778 In addition to his ancestors, every Bambara has as his special protector, one of those gods (*nyana*) which are created wholly by the work of the magician. Every family has one or more *nyana*, whose priest is the *fa*. The *boli*, the symbol and altar of this type of divinity, is usually hidden from the uninitiated; it is put into a leather or canvas sack, a gourd, or a pot. The *nyana* of Sounsan, the ancestor of the Massa-si, was a *n-ko* whose *boli* was kept in a monkey skin. The *boli* is taken out of its cover so that libations can be poured over it and animal remains smeared on it. If there is some objection to exposing it, the offering is put on the cover.

769 794 Everything that takes place relative to the cult of the *nyana* is analogous to that described for the cult of the ancestors.

769 794 It has the same base: request, offering, communion. In addition, there is a liturgy appropriate to each nyana, in particular, the mysterious sayings that attract the god and make him [183] the actual servitor of the person uttering these sayings, rather than a benevolent protector. This shows the antithesis as to final ends between religion and magic, as was set forth in Chapter 2 of the present work.

596 614 778 The fa also has the responsibility of maintaining the efficacy of magic weapons; he must fulfill all the obligations required by each of them. Among them there are true nyana, sometimes independent, sometimes a part of the great nyana. Mostly they are amulets or talismans whose virtue depends on certain rites or simply on the observance of certain interdicts.

596 614 778 Finally, the fa is the guardian of custom and family relics, which likewise have a religious basis since custom, after all, is the continuing will of the generations, the imperious mandate of the ancestors, the table of law of the manes. Any transgression of custom is certain to bring the worst disasters. The relics are ordinary or ceremonial objects left by the successive fa. Some of them are so strongly associated with the patriarchal office that on special occasions or in certain circumstances the fa is forced by custom to wear these objects impregnated with the virtue of the ancestors. The cap and weapons of Biton at Ségou were of this nature, and such is the case among the Massa-si.

596 614 Relations between members of the community. Theoretically, the powers of the fa over the members of the community are absolute. He can hire them out, offer them as security, sell them, and even put them to death (1). He also

1. Note how Ma-n-son got rid of some of his brothers.

has the right to use whatever belongs to them,(2) both persons

2. Ngolo sacrificed his son's son.

596 and property. On the other hand, he also has duties toward
614 them, for it is the essence of the institution to support its
members.

All the acts of the *fa*, even the arbitrary ones, are,
561 according to law, under the control of the senate. It should
578 not be forgotten that the members of the community are di-
596 vided into two hostile groups: that of the "elders," which in-
614 cludes the *fa*, and that of the "young masters." The *fa* could
hardly [184] keep the common property all to himself, so he shares it more or less as he pleases, and naturally, the elders are among the most generously treated. The young men seldom get any such favors, hence their resentment against the elders, due largely to envy of their favored position.

596 It is customary for a *fa* when he becomes the head of a
614 patriarchy to leave the management of his own community to
his eldest son (1). This separation of interests is essential in order to prevent the *fa* from despoiling the patriarchy to benefit his own community. The history of these countries shows how often this rule is broken by ambitious men who hope to profit by the general confusion to build up a considerable fortune. Among both the elders and the young men they find willing accomplices, and as their power increases, they extend their extortions. There are many signs, however, of the fragility of their despotism, which they themselves recognize. They usually, therefore, take pains to settle the question of succession in advance hoping to avoid the collapse of their achievements. Wasted effort! Custom, which they have ignored, regains its rights when they die and often does so during their lifetime. This is a logical explanation of the fact that

[554
492] 1. The eldest son, or better, the first-born son, thus occupies a privileged position, and in Kaarta he is usually provided with a white horse to make him conspicuous. See p. 122 about the death of 98 first-born sons mounted on white horses.

596 614 most of the great empires have survived their founders for only a short time.

More often than not, a "young master" has a position in the community which is considerably less pleasant than that of a domestic slave who lives alongside him and ostensibly under his command. A domestic slave can escape or stir up all sorts of difficulties that result in the diminution of the patrimony. There is no such thing to be feared from a member of the community; should he be punished, banished, or leave, the common property does not suffer. If he goes away and is successful, he will not fail to share his good fortune with the community. Indeed, anyone who loses interest in the welfare of his community runs the risk of being cut off from it. He must actually live with the community; if not, he is treated as a dead member. [185] He must be present for anything that transpires. The chronicle of Ségou gives an example. Quarrels broke out among Ngolo's sons when he died. Nyana-n-koro, who had been favored by his father, thought that this affection designated him as the successor to the deceased. Ngolo, however, had expressly chosen Ma-n-son in conformity with custom. Nevertheless, confident of winning, Nyana-n-koro tried to oust Ma-n-son by force, but in vain. In the course of these fratricidal struggles, certain members of the community remained neutral, hoping in this way to retain the good will of the victor. They gained nothing, however, because Ma-n-son was the winner and turned against them. He sentenced his brothers Séri and Ba to a sort of exile from the community, giving each of them a token share of the estate and ordering them not to increase it.

421 596 614 Since property is held in common, the fa is obliged to give some benefits to all the members of the community. This is why, when necessary, he provides the marriage payment that enables a young man to found a family; he ransoms persons who have been enslaved; he provides for the sick when their expenses are high; he pays civil, judicial, or other debts when the debtor is forced to pay and the community is responsible. These payments, however, which are made with the approval of the senate, are regarded as loans to the recipient with his consent, he is henceforth in debt to the community. He will not only have to repay

421 the loan but something in addition, and he will always show
596 his gratitude for it. If the repayment drags on and on, as
614 usually happens, the community does not withdraw his right to the debt, which is never lost; it watches for a turn for the better in the debtor's affairs, meddles in his business, and plagues his widows and children for all it can get from them after his death. The rapacity of the community uses the old debt as an excuse for seizing everything left by the debtor.

466 Every member of the community, strictly speaking, is
596 at the service of the community and must therefore cooperate to assure its prosperity. If he cannot work himself, or does not
614 wish to, in the fields, for instance, he must provide a substitute in the person of one of his children or his own slaves. To the extent that he cannot find the means to exempt himself, [186] he is treated as one of the "poor" and is forced to work.

166 It is easy to understand that the young men often leave to make their fortunes elsewhere in order to escape a power that is so suspicious, troublesome and all-pervading. Some of them never return, either because they have managed to create an independent life for themselves, or because they are more comfortable at a safe distance from their authoritarian elders. More often, however, the young man, having founded an independent family far away, keeps in close touch with his community and watches developments there in case he may one day be able to profit from them.

578 The young men who stay at home form a party of intrigue
561 which is forever at war with the fa and the senate. Their opposition weakens, however, as they approach the age at which
885 they too will participate in the faya to which they aspire. Gradually, as one changes from kamalen' to bina, he acquires the same niggling authoritarianism which then arouses the animosity of the new kamalen'-u.

562 In concluding this study of the members of the commun-
583 ity, the situation of girls remains to be discussed. Like the boys, they belong completely to the community, which, as a result, has the right to make as much profit out of them as possible. So, since exogamy is the rule, the community cedes the girl in usufruct to whoever pays the bride price, and because she will

562 inevitably leave the community, she can never claim any
583 authority. Thus condemned to perpetual powerlessness, a
woman never has the right to any position other than an inferior one in native society. Motives based on interest or affection may modify her situation more or less to her advantage, but they will not change her basic rights, which are at the root of all disputes about women, between spouses or between communities.

II. The Community of Property

421 What is the property of which the patrimony is composed?

It is impossible to provide a detailed list, which would, in any case, he endless. Nor should we limit ourselves to the definitions of our legal system, which are too narrow. From the native point of view, patrimonial property [187] may be divided into three principal categories.

[776] First, there are the gods; the manes, or souls of the ancestral protectors of the family; and the nyana, the gods created by the magician. Some of them protect only the community, while others are also concerned with other collectivities. Finally, there are the innumerable magic weapons, which are gods of a sort. In the discussion of the duties of the fa, I spoke of these gods, and they are also mentioned in other parts of this work.

A second category of property is made up of the recipro-
421 cal rights of the community and its members, on the one hand,
424 and of the community and similar collectivities, on the other.
I have just explained the first, and the second will be dealt with later in the chapter under the heading "Relations between Communities."

Finally, all the things that are particularly valued make
421 up the third category: gold; cattle and sheep; grain; agricul-
422 tural, industrial, and commercial products of all kinds; dwell-
423 ings; etc. Three points related to this last category require
special consideration: agrarian usufruct, conjugal usufruct, and slaves.

421 Finally, the status of a community is, as it were, syn-
424 thesized and symbolized by the "honorable name" (dyamu), by
596 which this collectivity titles itself and which it considers one of
614 its most precious possessions.

Agrarian usufruct. Ownership of land does not exist.

423 Each family has a right of use, uncertain in principle but permanent in fact, over the lands assigned to it in the domain of the genie-protector (nyana dugu-da-siri).

It may happen that a single family is the sole beneficiary of a given domain because it is the only one linked to the genie protecting the place.

More generally, various families are under the protection of the same local genie, whose domain in that case includes the parts exploited in common as well as the fields expressly assigned to individual families under its protection. The agrarian usufruct which is included as part of the community property exists with respect to these individual fields.

This usufruct differs from that recognized by our law. It is the dugu-tigi and his council who allot the common lands, and the process always involves wrangling and [187] deals. In principle, the plot assigned remains indefinitely with the family benefited if it is continuously farmed and an annual fee is paid. Following the land for several years is permitted. The family exploiting the land may use it in any way, and its right is as complete as possible, short only of alienating it. The family may lease, cede, or pawn its usufruct. If a transaction involves a foreigner, however, it may not be concluded without the consent of the dugu-tigi, who consults his council. In general, any action which might conceivably injure the welfare of the community as a whole must be submitted to the dugu-tigi for approval before being undertaken.

The usufruct comes to an end under the following circumstances; when a family permanently leaves the community governing the fields; when the dugu-tigi and his council decide to dispose of the land for reasons which they are not required to give; when a family gives the land up voluntarily or has been deprived of it because it has been used in a manner contrary to the interests of the agrarian community.

476 461 567 [361] The patriarchal community draws its subsistence from this agricultural exploitation, and as a result, a kind of work organization has developed. Patriarchal communities or important families have agricultural land in various regions and these tracts are often far apart. Some members of the community or a group of slaves are therefore settled in each domain, sometimes on a permanent basis, sometimes for the period of clearing and cultivating the soil, sometimes for the period of harvest.

Theoretically, every member of the community and every slave must work for the community from dawn to around noon every day during the farming season. Two days, however, Monday and Thursday, are given to these persons for work in their own fields. Anyone who cannot or will not work has the right to provide a replacement from among his dependents.

There are, of course, many exceptions to these rules. In the first place, everyone works according to his position. Among the poor, the master works as hard as the slave, if not harder; among people in comfortable circumstances, the master merely controls and directs the work, sometimes reserving a particular job for himself. In important communities, field work [189] is almost exclusively the duty of the slaves, under the surveillance of their leaders and following the orders of the fa, who either supervises it himself or has a member of his entourage do so.

583 589 768 Conjugal usufruct. When she marries, a woman is given in usufruct in exchange for the bride price. This usufruct is community property exactly like the things used for the bride price.

When a fa dies, the disposal of the conjugal usufruct included in the estate is a serious matter. Since the conjugal usufruct is of the same duration as the life of the woman, the death of the husband has no legal effect on the situation of his spouse. Since it is understood, however, that the widow has no sexual obligations to her husband's heirs, the usufruct is reduced in that respect. Such is the lot of widows when the heirs decide to keep them without marrying them and the women elect to remain.

583 Most often, however, the heirs either marry the widows
589 or send them home, or the women leave of their own volition.

768 An heir who marries a widow of the deceased must take
[587] her back to her family, obtain their consent, and pay them a new bride price, required because a new usufruct is involved. The chronicle of Ségou shows us how this custom operates. Upon the death of Dina Wara, his son escorted to Ségou his father's widow, Biton's sister, whom he wanted to marry. He made sumptuous gifts in order to obtain consent.

In the case of a widow who is sent home or who leaves of her own accord, responsibility for the bride price already paid rests with the party who broke the contract, i.e., with the person who sent the widow away or, if she left of her own accord, with her family. The question of responsibility for the bride price is an important one, since usually neither party has either the means or the desire to make it up. As a result, every effort is made to evade payment, and it is common practice to resort to the most shameless bargaining of the woman involved. A husband is sought who will agree to pay the bride price asked by the one having rights over her, but most often, partial payment will be made when the woman is returned, the creditor's impatience is calmed by gifts, and the balance of the bride price remains wholly or partly unpaid [190] at the time of the debtor's death. This obviously results in insolvable complications during and after the marriage (1).

1. Concerning the lot of widows, see the discussions about the widows of Biton and Ngolo in the chronicle of Ségou.

567 Slaves. Enslavement comes about in many ways, but the three principal ones are force, birth, and the result of obligations.

727 Force has perhaps been the primary cause of enslavement. A person who surrenders is the chattel of the conqueror, but the treatment given him varies in accordance with his previous situation. Was he a man of position? If he is violent, he is killed or sold; if it is thought that his relatives will pay a high ransom, he is kept. If he is clever enough to arouse sympathy, he often is

567 727 well treated; if his captivity continues for a long time, he may even found a family and live like a free man on parole, required only to remain where he is. Time takes care of many things. Under the same circumstances, a woman of quality usually becomes the wife of the conqueror.

People belonging to a caste escape slavery by entering the service of the conqueror to perform their customary trades.

It is only humble people -- the majority -- whose lot is often terrible; dragged far away, sold and resold, they often fall into the hands of bad masters.

Theoretically, a female slave's children are always slaves. 567 A child born in slavery belongs to the mother's master and shares her fate. If she is the master's concubine, the child is born free and thereby frees the mother.

A contract slave is not always master of his own fate. Since the fa has absolute authority over his people, it is he who makes the contract which binds them.

[681] A free individual may fall into slavery as a result of his crimes or misdemeanors (2); it is in this way that an incorrigible thief becomes the slave of the chief to whom he is sent for punishment.

Many poor people, attracted by the favored lot of the [191] wolo-so in large communities, go into voluntary slavery in hope of a comparable position. All the Sudanese empires had these voluntary slaves, who came in great numbers from all directions.

Where there are many slaves, they form what is called dyon'-kuru or dyon'-futu, depending on the place, that is, "an assembly of slaves," and their leader, who represents them with the master, is an important personage by virtue of their strength. When the community to which these slaves belong is an ancient one, they are divided into groups, each of which is named for the fa under whose authority it was organized. In theory, the leader of each group is its oldest member, and the leader of the

---

2. Nzan Fato became a slave for stealing a beehive (p. 49 above).

567 slaves (1). The master often keeps this paramount head near

1. This appears to be the application of a kind of right of seniority, analogous to that of primogeniture.

him as his confidential agent; otherwise, he buys a slave or selects a free man for this high post and thus better controls the situation. In such a case, the paramount leader recognized by the slaves is merely the spokesman for his congeners in their dealings with the master.

[304] Among the Kouloubali the wolo-so have a characteristic tattoo formed by three broad incisions from temple to lower jaw on both sides of the face. Far from feeling humiliated by this mark, every wolo-so is as proud of it as though it were a sign of noble origin. Many free men have adopted this tattoo in order to pose as members of the great Bambara family.

The status of a slave is not immutable, but generally includes three stages described by the following names: san'dyon', "a slave acquired through trade"; dyon'wolo-so, "slave born in the house"; and dyongoro, "freed."

A newly purchased slave is put under observation. If he appears to be intractable or vicious or is afflicted with a serious disease (epilepsy, Leprosy, sleeping sickness, nyctalopia), one gets rid of him as soon as possible.

If he proves to be docile, devoted, industrious, and a good worker, he is kept. He is given a job in the house or is [192] placed with an old servant to be trained or with an artisan to be taught a trade.

A female slave in the same circumstances who becomes a mother at once finds her situation improved (1). Her child is

1. The father's identity is of no importance, since the children all belong by law to her master.

wolo-so, "born in the house," and she acquires the same

567 status (2). The wolo-so is not usually sold or, more accurately, he will be disposed of only in the most desperate circumstances. The master's wealth and prosperity are dependent on the wolo-so.

Indeed, the wolo-so is a kind of member of the community; nothing happens in the community without his knowing it and participating in accordance with his position. It is true that he is required to work for the community, but no more nor less than any of the "poor people," and he often succeeds in establishing for himself a position that is considerably better than that of a child of the house. He and all of his dependents belong to the master, but barring the most serious circumstances, the master will not take anything away from him. On the contrary, the master furnishes him an enviable lot: he provides for his marriage and sets him up; he entrusts him with the management of property, often very valuable; and he treats him with a degree of affection not always displayed toward his own family because jealousy brings tensions and hatred between members of the community. Thus, the wolo-so often profits by his status rather than suffers from it.

Like the members of the community, he may exempt himself from the labor of the community by sending one of his children as a substitute and paying an annual fee in addition to certain services (3). If he is really prosperous -- and this is

2. It should be noted that there is an analogy here with the case of a concubine who becomes a mother; because her child by a free father is free, she becomes free *ipso facto*.

[352]

3. In general, the fee consists of a certain number of measures (*moudd*) of millet, approximately enough to feed an adult for a year. The services consist of work on the upkeep of buildings, repairs on the roofs and walls of the huts.

567 unlikely -- he may even own slaves himself and use them as substitutes.

Thus the relations between master and slave gradually become very different from what our European minds imagine. A master is bound to his *wolo-so* [193] by a thousand ties: he admits them to the cult; he marries their daughters; he circumcises their sons along with his own; and he allies himself with some of them by fraternization or an oath.

Even if he does not have such close contact, the *wolo-so* who is freed from labor, who perhaps lives at some distance or, if nearby, in virtual independence, is henceforth a *dyongoro*, that is, "freed." The link is not severed, and the freed man is a kind of relative. He is interested in everything that happens in his master's community and is present upon all important occasions, never coming with empty hands. Reciprocally, he is never treated like a stranger by the master. The master contributes to every event concerning him: he helps him get his sons married and established; on the occasion of the *soli*, he assembles his children along with his own, which gives them a degree of common solidarity.

The admission of the *wolo-so* to his master's community is shown publicly by the fact that the *wolo-so* bears the *dyamu* of his master.

It would be an exaggeration to claim that the house slave's situation is always so fortunate; it depends on many different factors (1).

1. A slave is seldom permitted to buy his freedom; the slave himself does not seek this redemption which would free only him and leave his family and most of his property in the hands of the master.

551
596
614 *The dyamu.* This is the name given to himself by the native, bestowed upon him by others, or inherited from his ancestors, but in any case one that has become such an honor that merely to pronounce it is enough to bring forth a show of homage toward one who bears it, for example, Kouloubali, Dyara, Dembélé, etc.

551
596
614
This is because the dyamu in itself sums up the history of the community that bears it; it implies everything involving the ancestors, as well as the achievements of present members, their ignominies, and even their fraternal, conjugal, political, and supernatural alliances.

One might imagine that one or another of the characteristic aspects covered by the dyamu would serve to identify the bearers of the same name, but the Europeans who study the native milieu have long been accustomed to identifying those who bear the same dyamu by means of [194] their respective tne (interdicts), and the natives do the same (1).

1. When this was first being done, there was an error of interpretation and hasty generalization which falsified the results. The tne which accompanies the dyamu was made analogous with totem, and it was stated that the dyamu and the name of the tne object were one and the same. Careful study has established that there is nothing to the alleged correspondence.

For the Black, any of his fellows who bears the same dyamu as his and shares with him one or more tne is regarded as a relative, even though he may belong to a different people.

Among individuals of different peoples, certain dyamu, although dissimilar, are regarded as equivalent and are interchanged, because those who bear them have common tne (interdicts).

As a result of one of the alliances that will be described later under "Relations between Communities," the tne of one party henceforth become the tne of the other, and vice versa, and this leads to the equivalence of dyamu. Marriage sometimes has the same effect when the union is an important one, greatly desired, or even more, is the sort of marriage that forms indissoluble bonds and an unshakable solidarity between families.

3. The Family Community or the Family

Conjugal Union (furu)

581 One of the most essential elements of the community based on descent is legitimacy, and one of its sources is in the lawful conjugal union which we call marriage. There are other kinds of conjugal union, but none has such definite effects.

Custom as it concerns marriage has its fullest expression at the time of the first marriage, when the spouses are brought under community control. We shall study all the details of custom in such a case, which will facilitate relating it to the various other situations. [195]

I. Marriage

First Marriage

Marriage is the union of two free individuals of the opposite sex for the purpose of founding a family. Certain conditions and formalities are required prior to the union of the spouses.

582 Conditions. Since there is no native institution that enables a Black to know for certain how old he is, there is no definite age requirement, as there is in our legislation. On the other hand, since marriage involves sexual union, capability for this union is theoretically required of the future spouses. Nevertheless, although a male is considered marriageable only if he has reached puberty and is circumcised, a female is often married even before her first menses. Furthermore, there is nothing to prevent the marriage of an old man, however old and decrepit he may be (1).

1. Although we are giving facts here that are not always relevant to the first marriage, we do so in order to avoid having to return to them later on when they will be out of their natural context.

582 It is not unusual for an old man to marry a very young girl; indeed, it is common. Although a young man rarely marries a very old woman, a woman may marry a man much younger than she is as a result of the customs involved with inheritance.

Kinship in the direct line is an obstacle, *in infinitum*. Certain collateral relatives may not marry each other: uncle and niece, aunt and nephew. Marriage is also an obstacle in [587] some cases: a man may not be the husband of two sisters simultaneously, although he may marry them successively; the same restriction applies to a mother and daughter and an aunt and niece.

A man may not marry the wife of his son, nephew, or younger brother.

No marriage can take place between free persons in good standing and people of caste or, still less, slaves.

584 *Impediments*. From the opening of negotiations to the moment when the woman is handed over, there is a very long interval [196] of time during which impediments may arise.

First marriages, with which we are here concerned, are community affairs. A young man who would undertake the matter on his own would be most imprudent for he is no more his own master than is the girl, and their wishes are not of the least importance; this is an occasion for the *fa* to bring off a profitable deal. The *fa*, therefore, opposes any match which does not suit his plans and, indeed, forces the young man to share his views. If the latter rebels, the refusal of the *fa* to recognize the marriage will deprive the wife and children of any claim to legitimacy in the eyes of the community which he heads. There is no legal recourse possible against such a decision, because each community is answerable only to itself for matters concerning it.

The girl is even more completely under the control of [562] the community than the young man. Destined to be given in usufruct, she is entirely at the mercy of those holding this right over her. If she rebels, she runs the risk of being brutally brought to task through every means of coercion and, if in such circum- [851] stances she has children, they can be taken from her by the community, to which they will then belong. Custom gives her no rights over them whatsoever.

584 Thus, the fa of the two communities manage the entire transaction. Does this mean that the young people have no way of influencing the decision of the "elders"? No, because here, as elsewhere, all sorts of intrigue affect the decision of the fa. He must take account of the views of those around him; he is aware of their feelings, and he is just as likely to subordinate his interests to affection as to hatred. He is perfectly well aware, as is his entourage, that although he can impose his will, even though arbitrary, while he lives, all he has achieved may collapse at his death if his work was ill supported.

In short, the rigidity of the principles which put the "young" at the mercy of the "elders" is, in fact, more often [182] than not relaxed in favor of the young people's desires. The solidarity between members of the community makes them give heed to the opinions of others; it is this need to minimize differences of opinion that makes any family affair drag on endlessly. Discussions, agreements, and reciprocal gifts characterize the [197] bargaining and compromise which are so great a part of the transactions. From this it is apparent what an essential role is played by the numerous intermediaries who are called in to prevent clashes and to mitigate friction, but too often turn to exploiting community difficulties.

In any event, these discussions serve to publicize these transactions just as we achieve the same end through legal means.

The request and agreements. The request is made by an [564] intermediary. In Kaarta this is a man of caste, usually a dyeli (griot), accompanied by a free man. Elsewhere, notably at Ségou, he is sometimes a middle-aged man, known for his experience in such matters, who in this role is called furu-bolo-ma-tigi, "marriage director."

The furu-bolo-ma-tigi goes to the house of the fa of the girl, states his mission, and if he is favorably received, offers him some kola nuts which he has brought with him. He returns home with a promise that the request will be considered.

The fa does in fact consult his entourage and especially his ancestors and gods. The furu-bolo-ma-tigi returns with offerings to be used in questioning the ancestors and gods; if the reply

584 is unfavorable, that is by no means the end of the matter, for both ancestors and gods usually allow themselves to be persuaded, for a price. When the reply is, or becomes, favorable, the furu-bolo-ma-tigi gives customary presents to the fa and to the girl's family. Henceforth, the two communities, that of the young man and that of the girl, are united by a bond that can be broken only for the gravest reasons, and even then a rupture will usually give rise to serious disagreements.

[583] It is at this point that the parties agree, not without much argument and bargaining, on the amount, type, and mode of payment of the bride price and the date on which the girl will be handed over.

Between the time of the agreement and the release of the woman, there is a period which is often very long and in some cases several years. This interval is used by the girl's mother to prepare the things she will give her daughter (clothing, household utensils, etc.). [198] The fiancé, meanwhile, needs the time to accumulate what he has promised to pay when the girl is given to him.

584
602 From this moment on, the relations between the two communities are very strictly governed. Native etiquette forbids the fiancée henceforth to meet or to take meals with her future brother-in-law unless a third party is present. The same applies to the young man and his future mother-in-law. The fiancé must constantly show that he takes an interest in anything that concerns his future affinal family. He must attend funerals and festivals or at least send a material contribution consistent with his wealth and social standing. When field work is in progress, it is customary for the fiancé's fula-ni to appear in a body and ceremoniously share the work. This demonstration of solidarity is mostly more noisy than helpful; the work is wholly simulated, but the proceedings always end in dancing and copious drinking.

583
184 Bride price (1) and gifts. The woman is not turned over

---

1. In certain regions (Bougouni, Sikasso, Koutiala, San) there is no regularly constituted bride price; the bridegroom's

583 [184] family gives the bride's family a young girl to replace the one taken away.

until all or a portion of the agreed bride price has been paid and especially not before the customary gifts have been received.

The nature and value of the bride price and gifts vary since they depend on the wealth of the future husband, the rank of the woman and family customs. Among the poor, the bride price is small: a few handfuls of cowries, a chicken, a few [435] kola nuts, a few lengths of native cotton. An average bride price is worth, in all, 25,000 to 30,000 cowries (about 25 to 30 francs). Among the rich, the bride price may include one or more slaves, gold jewelry, silver, fabrics, clothing, etc.

The same is true of the gifts; everything depends on the families involved. It is customary around Ségou, however, for the fiancé to give his bride a large piece of native material called kundugu fini, a dloké (a kind of blouse), and a pair of sandals with very thick soles. He must also, if he can afford to, give her a slave to do the kitchen work, a cow, jewelry, etc. [199]

He must also give presents to the girl's parents in accordance with his means.

The totality of the bride price and gifts is called furu-fen', literally, "the property of the marriage." As soon as part of this furu-fen' is handed over to the furu-bolo-ma-tigi, he takes it, [273] escorted by some of the fiancé's friends, to the girl's fa. All of these proceedings, of course, involve jugs of native beer (dlo). The notables of the place, the dugu-tigi, the "elders," and even the kamalen', come at once to congratulate the family, to share in the drinking, and to receive a share of the furu-fen'.

The fiancée is often a little girl, and in that case the duties of the young man and his family go on for several years. The giving of gifts is repeated, to an extent commensurate with the young man's wealth and the standing of the girl's family. 431 583 At the time of harvest it is customary for the fiancé to send one or more baskets of millet, each weighing 20 to 40 kilos, and from time to time, a jug of beer, 20 to 30 liters. On the

583 occasion of funerals or religious ceremonies, he brings offerings
431 (fowl, kola nuts, millet, salt, etc.). The ceremony at which his contribution is indispensable is the da woro (1). On this occasion the furu-bolo-ma-tigi is entrusted with important gifts for the girl (clothing and jewelry) as well as for the relatives assembled (food of all kinds).

583 Just as the amount and nature of the furu-fen' vary, the manner of payment and the time set for the payment of the bride price are likewise left to the discretion of the parties. There may be a single payment or there may be installments, either before or partly before and partly after the bride is handed over. From the material point of view, the persons of the bride and groom are actually of no importance. The fa who gives the bride price wants a girl from the family with which he wishes an alliance, and all that matters is that the girl be marriageable at the date agreed upon, provided that she is handed over in accordance with the agreement. In the same connection, the person giving the bride price is not required to have the whole amount needed at the time of [200] the agreement; it is sufficient that he be in a position to pay when the amount falls due. This explains certain usages which might otherwise seem odd.

[584] It often happens that a fa arranging a marriage speaks for a very young girl or even for one not yet born. If the child is handed over before nubility, the marriage is not consummated until after the first menses. We have mentioned above that in such cases the marriage payment involves repeated gifts for years.

583 Another very curious method of paying the bride price
231 is to follow a custom called "the mare's foot." Its essential features are as follows.

A person giving bride price has a mare that he could sell to pay off the obligation, but he prefers to promise one or more of the foals or, as the natives say, one or more of "feet." This method of turning a brood mare to account without selling it is common among the natives of western Sudan.

---

1. See p. 264 below.

583 231 If the payer has promised "a foot," he turns the mare over to the recipient, who will have to feed it and breed it. The latter keeps the foal and returns the mare after the foal is weaned; the risk is his, unless a major catastrophe occurs, and he must prove that such was the case.

If two "feet" are called for, the mare is as it were, jointly owned, each person alternately taking care of the animal and exploiting it for an agreed period. The first foal is jointly held, and after it is weaned, the contracting parties equalize the costs by alternately caring for the mare and the foal. This continues until three foals have been born and weaned. Then the mare and one of the foals goes into one share and the other two foals in another; the share allotted to each party is determined by drawing lots.

When he has completed the payment of "feet," the payer can obtain the woman without having paid any of the bride price since her family has the mare as security.

584 It may happen that one or the other of the fiancés dies. In principle, it is well to bear in mind the material standpoint involved: persons are secondary in concluding the affair; the two *fa* look out for their respective interests while finding a solution to the difficulties that [201] arise during the period of betrothal, often a very long one. The dead fiancé is not uncommonly replaced by one of his brothers (1), and the girl by one of her sisters (2); nothing changes in either case. If the fiancé or fiancée cannot be replaced in this way, the disposition of the *furu-fen'* already received by the girl's family is decided by agreement between the parties. Sometimes the proceeds are divided, with half going to each community; at other times they may be returned to the groom's family, or conversely, they may be left with the bride's family.

1. More commonly by one of the sons of the fiancé's community.

2. More commonly by one of the daughters of the fiancée's community.

584 Though disrupted marriage arrangements are rare, this may happen through a variety of causes and is settled by agreement or, in case of conflict, by arbitrators.

585 Delivery of the bride. Because this act involves a change of status for the parties concerned, it requires the ritual practices of a magical character of which we saw an example in connection with the funeral of a fa. Their purpose is to make sure that change takes place without harm to anyone.

When the payer has fulfilled his obligations and behaved according to custom, the girl must be given to him on the date agreed upon. On that day, the furu-bolo-ma-tigi and the fiancé's friends, accompanied by musicians, appear at the home of the girl's parents to receive and lead away the bride. The parents agree, but the girl has disappeared. The newcomers start at once to look for her, but she cannot be found because her relatives and friends help her to hide. The hunt arouses both sides and leads to brawls; as the excitement reaches its height, the girl is found. Only the intervention of the dugu-tigi himself can put an end to the conflict. He gives his permission to the furu-bolo-ma-tigi to take the girl away and advises her to follow.

Then the furu-bolo-ma-tigi and his companions, acting as an escort, [202] take the girl toward the exit from the village. Just as she is about to leave the enclosure, however, she refuses to go a step farther, and the young men pretend to do violence to her in order to force her to accompany them in spite of her cries. She fights and screams until she is beyond the limits of the village territory. Then she suddenly becomes calm, wraps herself in the large piece of cloth given by her fiancé, and gaily follows her companions, who carry her furu-fen' and have by now joined the group of the furu-bolo-ma-tigi. The troop of young men bring up the rear and make a great racket with drums and trumpets and from time to time give the traditional [583] marriage cry: "kuyo! kuyo! (1)."

1. This simulated abduction must be interpreted as a separation rite,

585 The well-known cry of the *wara-mina-den'* of the fiancé's brotherhood is heard at various points along the way; the god is watching over his disciple's fiancée and chasing evil spirits from her path.

When they approach the fiancé's village, the young men go to the head of the procession, while the fiancée's companions take their places behind her. The whole troop begins to dance to the rhythm of the drums and trumpets. The women seem to hold back and take a long time to reach the entrance to the village a few hundred meters away.

At this moment, the *wara-mina-den'* utters a loud and final cry; his mission is accomplished.

The women of the village welcome the newcomers and lead the girl to her husband's house. Other women join the procession. Several groups of singers are formed, and the dancers proceed slowly to the couple's house. There, in an inner court, the crowd settles down; everyone drinks, eats, dances, or sings as the spirit moves him.

The dressing of the bride begins as soon as she arrives. Her hair is taken down; the string and the beads she wears about her hips are removed; and she is helped with her bath. Then, wrapped in a white skirt cloth, she lies down on the nuptial couch.

Her husband joins her after escaping from his roistering friends.

At daybreak there is a sudden shot. Loud and frequent shouts of "*kuyo*! *kuyo*!" rise above singing [203] and the noise of an orchestra. The old women burst into the nuptial hut, carrying warm water for the ablutions. The husband comes out and goes off to sit on a mat in the courtyard with the *furu-bolo-ma-tigi* and his friends.

The bride appears wrapped in her marriage skirt; behind her the old women wave a piece of linen that gives visible evidence
[533] of the accomplishment of intercourse, and *dyeli-moso* (*griot* [Ed., feminine]) sing of love. The young girls who accompanied the bride surround her at the exit from the courtyard and lead her to a hut arranged so that she may rest there. For eight days she has all her meals there, and seated on a mat, with a white veil on her head, she spends the days spinning with her companions.

585 The husband spends the whole day after the wedding night in his hut, where relatives, friends, and neighbors come to congratulate him and present minor gifts of food. He invites them to eat and drink. The wedding is thus prolonged for several days, depending on the husband's wealth, during which time the couple is at the disposal of the guests.

[556] Rich families like to show off the trousseau, jewels, and gifts bestowed on the bride, so during the whole day after the wedding night everything is paraded with great pomp through the village by people of caste who proclaim the items and exaggerate their value. Toward evening the presents are shown one last time to the bride, who sits on a low bench with her face hidden behind a kind of tray, woven with grass, which she holds in her [533] hand. Drums and other instruments make a great uproar, while a female griot, standing behind the bride, sings love songs. Every[302]one admires the bride's hair, which is artistically braided in a flat crest with two small braids on each side of the face hanging in front and behind the ears. The women finger her jewels as they admire them and her thick-soled sandals.

To conclude the ceremony, the furu-bolo-ma-tigi gives cowries to the leader of the singing, and guns are fired for the [481] last time. Then the bride gets up, glides over the ground without lifting her feet, and enters the hut with her companions, while the guests retire. [204]

Second Marriage

595 The number of wives is limited only by the necessity of providing each one with a suitable living. This means that, theoretically, polygamy is a privilege of the rich. Some men practice it in order to pass as rich men, which flatters their pride, while others use it to gratify a sensual temperament. Most often, however, people in modest circumstances have several wives solely for economic reasons.

When an only wife has young children and no servant to help her, she is extremely overworked. When this is the case,

595 she herself urges her husband to take another wife who will share some of the housework and relieve the situation. As a result, polygamy in this form resembles an association in which, through division of labor, each person seeks to provide his own support and to contribute to the general welfare.

Second marriages are identical with first marriages except that they are celebrated with somewhat less ostentation. Furthermore, a married man is more independent of his community in the material sense, and sometimes he is likewise more independent of the wife.

II. Other Types of Conjugal Union

588 595 Besides marriage there are innumerable kinds of conjugal unions, such as agreements between capable individuals, that at times have legal consequences, some of which are even extensive. All these kinds may be grouped as two types: concubinage and free union.

595 Concubinage. This is a union in which at least one of the parties is a slave. It is very common for a master to treat one or more of his slaves like wives. Some men like the arrangement because it does away with all the difficulties arising from the bride price and the often exasperating involvements with an affinal family. Concubinage practiced by a free man has the disadvantage, however, of [205] his children being his slaves, since children retain their mother's status. It is true that this custom has been circumvented. It is accepted that the female slave is regarded as free once she has borne a child to a free husband and he has recognized it. This, however, does not erase the original stigma; children borne of free wives always [578] consider themselves superior to their siblings whose mother was a slave. Family tensions arise out of this, which become acute upon the death of the fa.

Concubinage, practiced on a large scale by free men, has, indeed, perverted all the communities. Polygamous households have had grave difficulties because the wives, being different in rank and yet forced to live side by side, have sacrificed everything to their resentments and hatreds.

588 Free union. This type of union rests on simple consent by the two parties without any bride price.

583 In principle a woman who has ceased to belong to a husband belongs to her original community, and she can make no decisions concerning her future without its consent. If she ignores this, the community can always intervene to force her to break off any engagement she may have made, and to this end it may use any means of absolute control.

[672] This suffices to explain why a man who agrees to a union of this kind usually finds himself in the most serious difficulties. Not only can his wife and children be taken from him without redress, but he can be sued for damages by the community to which the woman belongs.

It does sometimes happen, however, that certain women are released from the authority of their communities. These include women who are sole survivors of a community and, more commonly, those who have bought their freedom by dubious means. A free man who lives with such women achieves a union that to a great extent has the same effect as marriage. [206]

The Family

592 583 The household. The lawful household is based on marriage. In order to grasp its essence, account must be taken of the interplay of two elements which are perfectly distinct but always closely involved in all human affairs: interest and sentiment. In a lawful household the essential interest is the bride price whose nature must be defined in order to understand its overwhelming importance.

583 Bride price is what is paid in exchange for a wife. It is understood that the status of the woman thus handed over does not change; if she was free before the event, she is still free after the payment of the bride price.

586 The marriage tie is such that it can always be broken by one or the other party; the one breaking the contract simply loses the bride price in the sense that if the husband initiated the rupture he cannot expect anything already paid to be returned. If the initiative was taken by the wife (or her community), then she must return what has been paid. Whatever the cause of rupture, however, the children always belong to the husband.

583 Finally, if the union is still in effect at the time of the
768 husband's death, the wife's community theoretically regains
authority over her, provided that the bride price is paid back.

These three definite points show that lawful union, or
581 marriage, legally speaking, is essentially a kind of usufruct of the
626 woman to the advantage of the husband, and the price is the
bride price. As a result, the woman's community is obliged to see to it that the husband enjoys his rights. Hence, when a wife misbehaves, no matter how, the husband reports it to her community which takes steps to bring the erring girl to terms for fear of having to refund the bride price. On the other hand, the husband is expected to treat his wife in a manner worthy of her, that is, with consideration for her origins, and if he fails to do so, he risks the consequences of breach of the marriage contract.

There are, therefore, reciprocal rights and duties required of the spouses. Based on the marriage contract, these rights and duties are reinforced, completed, or, more generally, influenced by ethics no less than by the feelings of the [207] couple in relation to each other and to their respective communities.

581 This is why a girl from a great house with high standing (1) cannot be treated like a common concubine, even though the husband may prefer the concubine to the wife, because the free daughter of a powerful house, richly dowered, is virtually independent in the household. If she is sufficiently well off, she may even live in a house of her own, and since her only obligation is the sexual conjugal duty, she receives her husband as she would a lover.

On the other hand the free woman of modest circumstances and, even more, of lowly birth is her husband's companion in wretchedness. She does all kinds of work, even the hardest and most disagreeable, and she desires no rupture that would deprive her of the only affection that sustains her, the love of her children.

562
[554] 1. Thus, in the western Sudan, the daughters of the Massa-si are treated with great deference.

562 Between the omnipotence of the first and the humble
lot of the second there is every possible gradation. This is all
581 the more true in that, thanks to polygamy, lawful households
595 may be found in association with the free unions and concubin-
age desired by the husband, in such a way that the position of
each person in the family, already affected by all these con-
tingencies, is, in the last analysis, dominated by the absolute
authority of the *fa*. We shall see this clearly in connection
with filiation, and it is no less apparent regarding wives, ex-
cept for those already described who have sufficient influence and
the means to live virtually independent of the rest of the
family. Although in fact a wife who was not paid for has no
regular position and her children legally do not belong to either
of their parents, although a concubine does not even count as a
person, according to custom, and her children are their genitor's
slaves, merely by the will of the *fa* either of them may have an
enviable pre-eminence in the family, especially envied by the
lawful wives.

Under these circumstances, it may be admitted that con-
593 jugal duties, obedience, fidelity, and their counterparts, the
562 rights to help and assistance, have nuances that vary from one
situation to another. It is true that a wife must obey her hus-
band and that he is allowed to resort to [208] corporal punish-
ment to control her, which he does not fail to use. She is not
completely at his mercy, however. For instance, he can re-
quire her to live in a given place; nevertheless, if it has been
agreed that she is not to leave the tribal territory, and this usually
tacitly understood, he may not take her away. He can force her
to do household chores, but if she is free, he cannot require her
to do servile tasks. In the same way, he cannot rent out her
services, put her up as security, or sell her.

The duty of reciprocal fidelity is most often very vague.
837 Admittedly, this is not expected of the husband, and indeed,
the wife often encourages his lapses from virtue on the theory
that this indulgence will attach him to her. As far as a wife's
misbehavior is concerned, a husband does not always give it
much importance and is sometimes not at all averse to profiting
[848] from it. If children result from her indiscretions, he is not dis-
tressed in the least about accepting or denying them.

595 A husband owes his wife food, clothing, and lodging within his means, and unless he has imprudently acquired too many wives, everything will be kept within the proper limits. In any event, he must be impartial toward all his wives on one particular point if he wants domestic tranquillity: he must honor each of them in turn with his favors.

In theory, a husband is supposed to treat his wives alike in all things, although it is apparent from the foregoing that this is practically impossible. Besides, it is usually agreed that the first wife, no matter who she is, whether slave or free, has certain prerogatives. She acts as a kind of mother to her co-wives, supervises their work and their pursuits, and issues all the supplies. With reference to her husband, she acts as confidante and adviser.

851 Filiation. This is to be regarded as the totality of facts which, for the sake of clarity, we shall divide into two groups: birth, and giving a name. [209]

843 Birth. A pregnant woman, by virtue of her condition, is subject to a kind of special regime whose special features are the following.

In principle, she must forego sexual relations from the moment she feels the child move until two or three months after its birth. This is not done for reasons of hygiene, but rather because the child is thought to require it as a kind of deference, without which it will die.

[262] From the standpoint of diet, the expectant mother should be well and even abundantly fed. When possible she is given the heart and liver of slaughtered wild animals; these are centers of life which, if eaten, will strengthen the child's soul and make the child a courageous individual. [261] [443] A pregnant woman often wants some of the yellow or red clay which is sold in the markets, which for some unknown reason she will eat as if it were chocolate.

She must refrain from visiting dying people, attending funerals, going into mourning, or mingling with crowds, all this in order to avoid any contact that might injure the fragile soul she is carrying.

843 A Bambara has no very exact idea of the duration of pregnancy. His deductions, based on appearances alone, lead him to believe that a child born completely formed must have been in the mother's womb longer than one less well-formed.
[845] Besides, it is believed that conception may be due to some spirit who had relations with the woman (1). Children born with some strange or abnormal characteristics are thought to be the result of such affairs, and the fact that some women give birth only to stillborn infants is attributed to the same cause.

The pregnant woman is advised to go about her domestic chores up to the very moment of [210] her confinement and, in particular, to continue to grind grain, no doubt to facilitate labor, especially for those who are mothers for the first time.

844 When the labor pains begin, the woman retires to her hut, accompanied by matrons famed for their experience in these matters. Men, including the husband, may not come near the patient.

845 If there is a breach presentation or any other complication, the women do what they can, based on their personal experience, the inspiration of the moment, or the current superstitions. As a last resort they call in the magician or the marabout, which amounts to the same thing. Neither one is allowed to see the patient, but must work from the outside, using magic passes, incantations, or prayers and prescribing suitable remedies.

844 To deliver the baby, the mother ordinarily squats with her hands behind her head or kneels with her hands against the wall. The eldest or most skillful of the attending matrons ties the umbilical cord and then cuts it. This operation is often badly done and causes the umbilical hernia with which so many natives are afflicted and which is regarded, indeed, as a deformation in

1. See above, in the chronicle of Kaarta, the tale about Deni-ba Bo, who had relations with a mabo woman who claimed a connection with a spirit in the form of a horse.

844 good taste. The placenta is buried outdoors near the hut or sometimes in the floor of the hut itself. The mother is washed and often given an infusion to drink which is alleged to stop bleeding.

The baby is washed several times and then anointed with vegetable fat (1) (se tlu) or butter made from cow's milk. Its head is massaged to give it a nice shape, and then the baby is wrapped in a white cloth.

The child is usually not fed for the first 24 hours, although it is sometimes given a few drops of goat's milk, a beverage with mystical qualities. It is then given the breast.

851 At the earliest possible moment the father must be informed of the birth and sex of the child. Indeed, he is brought in by the woman who cut the cord, and the mother shows him the baby, pointing out any body characteristic which seems to her a manifest sign that the child is a reincarnation [211] of a deceased member of the family or other evidence that there has been some influence from the invisible world.

[203] The same woman informs the local authorities (dugu-tigi, nyana-n-son-na-ba, etc.) and the people in the vicinity; the news spreads rapidly.

846 The mother resumes her normal activities as soon as possible and is often on her feet within 24 hours. In any event, she never remains in bed for more than a week, unless it is absolutely impossible for her to get up. For seven or eight days, however, she remains in seclusion. Furthermore, particularly in Kaarta, her food is prepared exclusively by girl friends of her choice.

The detachment of the umbilical cord marks the end of
[751] this period of seclusion. In Kaarta the cord is preserved and placed in a small bag which is tied around the baby's neck; later on it will be made into a precious talisman. It is only after the detachment of the cord that the child is considered to be definitely

---

1. Known to Europeans as karite, originally a Soninké word.

846 born. In this we see another of the interim periods which accompany any change of status (death, marriage, circumcision, etc.). The real entry of the child into social life is marked by giving it a name.

553 851 Giving the name. Naming the child is the prerogative of the father, and he must take into consideration the various circumstances or incidents which marked the birth; through this act the child is received into the family.

At Ségou, family heads, relatives, neighbors, and friends are all invited to this ceremony, especially the dugu-tigi or, more exactly, the nyana-n-son-na-ba. In order of rank and seniority they arrive on the day set and squat in front of the entry to the courtyard which gives access to the mother's hut. The religious leader (nyana-n-son-na-ba) enters the mother's hut and shaves the head of the child whom the mother holds on her knees.

While this is going on, the women, relatives, neighbors, and friends approach in single file, singing, clapping their hands, and at intervals shouting: "Kuyo! Kuyo!" They give millet and cotton to the mother.

After shaving the baby's head, the leader puts his hands on the child, strokes its back and chest, and spits in its face to ward off evil spirits. Then he emerges and sits outside among his people. [212] The father then gives him eleven kola nuts, and the family heads in turn give him 40 to 50 cowries; all this is placed on a woven tray.

At this point, the leader asks the father what name he has selected for the child. Before answering, the father requests that the kola nuts and cowries be divided, they constitute the tua sara "price of the name." Two kola nuts and half of the cowries are given to the mother; the rest is divided among the family heads present. These are the ni wuru, "kola of life," and the tua kolo, "cowrie of the naming." Then the father makes known the name and the reasons for his choice. What are these reasons? It may be some obvious sign that the child is a reincarnation of someone deceased, some incident marking the child's birth, etc. Everyone congratulates the father on the happy event and expresses good wishes for the baby and blessings on the parents.

553 Women are not admitted to the men's circle. Gathered
near the mother's hut, they know that a name has been given,
851 but do not know what it is. The woman who tied the cord then
[562] washes the baby three times in warm, soapy water and, taking
water into her mouth, sprinkles the tiny body from neck to lower
back three times. She then expresses her good wishes. Carrying
the child, she goes to the door of the hut, where the father
and family heads are waiting, and asks the name. Then she returns
to the women and places the child on the lap of an old
woman who blows into the baby's ears three times and then shouts
in each ear: "Kuyo! Kuyo! i tua dara, "that is, "Kuyo! Kuyo!
[854] your name is ...." The child is then wrapped in the narrow
swaddling band which the mother will henceforth use to carry
him on her back, and if it is a boy, the baby is rolled three
times over the blade of an ax, or if a girl, over an iron implement
for picking cotton. While this is going on, everyone is expressing
best wishes.

[184] In Kaarta the ceremony is somewhat different. A beef or
a sheep killed in front of the mother's hut, and dege [Ed.,
coarsely ground millet in water] is also prepared. The baby's
head is shaved, and the hair is placed on the dege. Each guest
[564] puts his right hand on the edge of the gourd and a griot expresses
good wishes for the newborn child. Then the guests dance around
the dish of dege; the hair is removed from it and given to the
mother to keep. [213] Then if the occasion warrants it, the
[304] three lines of tattooing peculiar to the Koulouhali are made on
the baby's face with a dagger. Finally the griot takes the child,
carries it around the crowd, and returns it to the father, who must
then make known the chosen name. When the father has pronounced
the name, the griot again takes the child and, making
a trumpet of his hands, cries out to him three times: "your
name is...."

551 In principle, the name (tua) recalls some circumstance
surrounding the birth. A posthumous child is usually given his
father's name, as though he were the reincarnation of the father,
or more commonly, he is called Fa-n-ko, "posthumous" (literally,
"the one who came after the fa"). If the baby shows some resemblance
to a deceased person, he is named for the person or,

551 more often, called sagi, "the one who has come back." A woman who was barren for a long time gives her child the name of the agent to whom she attributes the cessation of her sterility: Nyana-m-ba, "the great nyana"; Mori-ba, "the great marabout," etc. She does the same thing if she has triumphed over some evil spirit through the aid of some such intermediary, but in that case it is usual to abandon the child at birth; a substitute mother will rescue it. This is a "castoff" child (fili), and from this comes his name, Fili. Such a child may be named for the place where it was abandoned, Sunkun', "refuse heap," for instance, or for his rescuer, Numuke, "blacksmith," or Dyelike, "griot." A child who survives after a series of stillbirths is regarded as the incarnation of an evil spirit finally defeated, and the spirit in question is, so to speak, stigmatized by having the child called Malo-bali, "shameless," or Tuantan', "anonymous." The tua is often merely the name of the month, day, or season of birth: Tenen' "Monday"; Sunkalo, "month of Ramadan"; Sama, "winter season." Twins are both called Fune, literally, [845] "alike," but they are sometimes purposely differentiated by calling one of them Sio and the other Sie-koro (1); if the twins are

1. See Humblot.

girls, they are called Wassa and Bafune (1) [Ed., footnote above]. In the Bani area, the next child born after twins is called Konimba (1) [Ed., footnote above]. A child born when it had appeared that the mother would have no more children is called Kosa (1) [Ed., foot note above], literally, "business completed." There are families [214] who always use the same name for the eldest sons. Among the Massa-si at one period this name was Bo (1) from which come: Musu-kura Bo; Sira Bo; etc. (meaning

1. Bo is etymologically the same as Ngolo.

"Bo, whose mother was Musu-kura"; "Bo, whose mother was named Sira"; etc.). In Ségou the Kouloubali likewise adopted

551 the tua Ngolo, from which come Nyana Ngolo, Barama Ngolo, Solo-Ngolo, etc. In the family of the Bambara chiefs of Femay (2) (a canton in the circle of Djeimé), the eldest son was given the name of the paternal grandfather; the second son was called Moussa; the third, Abdoullah; the fourth, Ngizi; and the fifth, Souleyman. The girls were called, in order of age: first, Fatouma; second, Awa; third, Nyele-ba or Nye-ba; fourth, Dyomene; fifth, Kounadi; and the sixth, Aminata (2) [Ed., footnote 2 above].

There are other names very commonly used for the eldest child: Ntyi and its endless variants for boys; Nya or Nyele for eldest daughters. The last two are so common in the Ségou region that the Soninké derisively designate the Bambara of that area with the expression, Nya ni Nyele-u, "the people of Nya and [606] Nyele." Since husband and wife are forbidden by custom to pronounce the names of their respective parents-in-law, complications arise when, as often happens, a child is named for them. Respect for the interdict is preserved by using a paronym: for a boy, Tye-koro, "the old man"; for a girl, Moso-koro, "the old woman." To satisfy this same interdict, there are true synonyms locally: thus, for Mussa the name Dyigi is used; for Mori-ba, Bo-dyan. Individuals are often designated by these double names whose two parts are synonymous; thus, there are the Mussa-Dyigi or Dyigi-Moussa, the Bodyan-Moriba, and so forth.

The foregoing are some of the characteristic traits that show how individuals are named among the Bambara, but actually the subject is inexhaustible.

846 After the name-giving ceremony, the mother resumes her normal life, although she must still observe certain prohibitions: notably, there must be no sexual intercourse for the first three months; and during the same period she must not change her coiffure nor leave the village. Once this period is over, she covers herself with jewelry, [215] beads and pieces of amber -- borrowed from neighbors or relatives, if need be -- rubs the baby with butter, and goes to present him to the local notables.

---

2. See Humblot.

853 A child is nursed for two or even three years, and theoretically, a woman should abstain from sexual intercourse throughout this period. In practice, however, the period of three months mentioned above is the limit of such abstention.

854 Childhood. While he is small, the child remains with his mother, whether she cares for him herself, has him cared for by a slave especially designated for the duty, or turns him over to one of her daughters.

During the nursing period of two or even three years, he is carried astraddle by his mother or some other person entrusted with his care until his legs are strong enough for him to run about the house and its vicinity.

857 At about six or eight years old, he is drawn into the juvenile organization known as n-tomo, and he never fails to join it as soon as he is welcome. Little girls are less free; they are kept at home and put to work at household duties, such as bringing water and wood and watching the fire.

881 Puberty. As we shall see, the n-tomo prepares the child for the soli, a ceremony which marks the most important event of his life, civil puberty. The essential but not the only rite involved in this ceremony is circumcision. In principle, the soli is limited to pubescent boys and this implies that all who go through the ceremony have physically reached puberty. Aside from the fact, however, that this condition is reached at differing ages, the boys who undergo the ceremony differ in age because the soli does not take place every year, owing to the considerable expense involved.

882 When the soli is behind him, a boy is no longer a child; he is not exactly a man either, but rather is a "young master," a kamalen'. Since he is admitted to the brotherhoods, apparently his discretion can be counted on, and he is considered competent to take an oath so he can be called upon to testify in a dispute. Also, if he is enterprising enough to attract attention to himself, he is given trifling missions which inspire him to persevere. Fur-
882 thermore, since by now he has been made sophisticated by his
836 companions in the n-tomo, his relations with his female companion

882 [836] in the [216] *soli*, the *n-golo-moso*, and with other girl friends are not merely platonic; indeed, sexual licentiousness is common.

As in everything else, a girl's life is more restricted. For her, the *soli* is merely a way of being presented to society, as we would say, that is, a means of attracting a prospective husband.

884 *Coming-of-age, guardianship, deprivation of civil rights.* It is obvious from the above that a Bambara has no way of knowing his age with any certainty. At best, he can estimate it by referring to some important event known to have occurred at about the time of his birth.

Since this is the case, we can see that coming-of-age has no correlation with chronological age. The individual's physical development and, still more, his intellectual maturity are signs that lead his family to grant a *kamalen'* the rights that distinguish a man from a boy. The most important of these rights is assuredly that of taking a wife and founding a family.

As a matter of fact, the *soli* marks the point after which the young people of both sexes are deemed competent to contract [582] marriages. Indeed, girls of 16 or 18 years of age and boys over 25 are rarely unmarried. It should further be understood that a girl may be betrothed at birth or even when she is being carried in the womb, as has been explained above.

429 562 Guardianship is intended to protect the individual from the follies of inexperience and the natural weakness of the female sex, a weakness to be understood here to include not only actual lack of physical strength but also incompetence imposed by custom which forbids a woman any power whatever over community rights or property. This is why young men are subject to guardianship until the *fa*, in council, recognizes their right to exercise the prerogatives of man's estate. In principle, women are subject to guardianship throughout their lives.

429 During his married life, the father is the legal administrator of any properties coming to his minor children, and he usually employs such property with discretion since he is legally bound to render an account when the children reach their majority.

429 A person who is away for a long or indefinite period [217] delegates the direction of the family community for as long as necessary to a friend or relative. This substitute, however, is expected to act only in accordance with the customary counsel and the family of the absent person.

[586] In case of divorce, the children always remain with the father. A divorced woman again comes under the guardianship of her own community.

768 429 When the mother dies, the father retains the administration of her property which belongs jointly to her children. If, however, one of her sons is married or of marriageable age and is competent, all such property is supposed to be handed over to him to administer in his capacity as fa of the uterine community.

When a father dies, his minor children are placed under the guardianship of the patriarch under whose authority the deceased was living. If he was independent, guardianship would be set up in accordance with his wishes which he would not have failed to make known.

In any event, if one of his sons is married or of marriageable age and sufficiently competent, he becomes fa of the familial community which gradually, as the younger sons grow up and establish families of their own, becomes a patriarchy such as we have described above.

[641] According to native law, deprivation of civil rights does not exist. In fact, however, persons who by reason of ill-health or senility are unable to comply with custom in carrying out their functions are supplanted by such persons as are designated by custom to replace them at the time of death.

596 614 Faya. The faya is the authority and power of the fa over all his dependents. It has the same character, differing only in extent, whether it concerns a familial or a patriarchal community.

Familial faya. Within the family, the fa theoretically has complete authority over everything that constitutes this community. It makes little difference whether he acts on his own initiative or whether he allows himself to be swayed by the

596 614 opinion of those around him, his intimates and friends. He exercises the right of agrarian usufruct over the lands under cultivation, and he may dispose of movable property without restriction. As regards persons, his own issue [218] are at his mercy, and he profits from their labor. He can hire them out, put them up for security, sell them, and even put them to death. He has the right of conjugal usufruct over his wives, and his slaves are merely chattels.

Patriarchal faya. This differs in extent from the foregoing. Anything connected in whatever way to the patriarchal community itself or to the family communities under its authority comes under the patriarchal *faya*.

Though the maintenance of this power presents no problems in theory, practice is quite another matter.

The fact is that the *fa* of a familial community is completely subject to a patriarch only if, being connected through the male line, he has some property in the patriarchy or intends to claim rights in it.

If this is not the case, the familial *fa* acts as though he did not belong to the patriarchy, and the latter can only treat him accordingly. This is what happens when a "son" goes off, establishes himself far away, and prospers there by his own efforts and at his own risk. Breaking all agnatic ties, he in fact frees himself from any authority that his patriarchy might seek to impose upon him.

This has produced innumerable dissident branches which have the same *dyamu* but which can only hypothetically trace their descent through the males back to a common male ancestor.

Inheritance. It is necessary, first, to know whether the
428 deceased was a *fa* or a *fantan'*, that is, whether he exercised the authority of a *fa* or was under the authority of a *fa*.

Let us say the deceased was a *fa*.

In principle, if he was *fa* of a family, everything belonging to him remains undivided under the new *faya* of his eldest son.

If he was *fa* of a patriarchy, a new patriarch succeeds him.

It is unnecessary to belabor these points or the consequences of the variations in view of the details given above.

428 Now let us say the deceased was a fantan', that is, he did not exercise a faya. [219]

A son who dies before becoming fa rarely leaves any property. If he should by chance do so, such wealth theoretically belongs to the community of which he was a member. The disposition of property from special sources must be settled according to the nature of the source. Thus, property which the deceased may have inherited from his mother would go to his uterine heirs.

What has just been said of a son applies all the more to a daughter, since, after all, she is nothing more than a kind of property belonging to the community.

428 567 The most hapless fantan' is the slave. In principle, he could hardly be expected to leave an inheritance since even his own person does not belong to him. In fact, however, the situation is quite different. A slave generally does have some property and may even be very rich. His fa allows him the use of his property for his lifetime, and it is current practice for him to leave it likewise to his children. As a result, everything transpires just as though the deceased were a free man, and what we have said about other communities applies to this type of community which, strictly speaking, has only a kind of de facto existence. The action of custom, in freeing the slave, gives him access to the position of a free man without depriving him of what his fa has allowed him to enjoy. In the end, this enjoyment of use is gradually transformed and strengthened by inheritance until it is the equivalent of similar rights to property which are accorded to men born free.

596 614 Order of succession. Patriarchal community. The fa is the eldest of the surviving males who are direct descendants in the male line of the fa who founded the community.

428 596 614 Familial community. 1. The eldest surviving son of the deceased; upon his death, succession follows the same pattern as for the patriarchal community.

If there are only daughters, the property is divided among them.

428 2. If there are no children, the collateral males and, 596 lacking the~~m, the wives~~.

3. If there are no collateral relatives, the ascendants.

614 4. If there are no ascendants, the surviving spouse.

5. If there is no surviving spouse, escheat occurs: [220] the inheritance reverts to the head of the settlement, the dugutigi, when this settlement is independent; otherwise to the head of the clan, the fama.

596 614 The community and the individual. The result of the foregoing is that the individual, whoever he may be and whatever his situation, has no value except as a member of a community (1); it is the community that exists and has an identity, while the individual exists and is identified only through the community and for the community.

An individual who exists apart from any faya is, therefore, an anomaly, and this situation comes to an end as soon as the individual himself becomes fa.

596 614 There are cases, however, when an individual is put out of his community because of his own action or because of circumstances, and extraordinary changes of status result.

626 Anyone driven from his community for bad conduct loses his rights to the faya in that community.

564 558 If his disqualification results from the practice of a trade regarded as degrading, he falls into what the Bambara call nyama-ka-la and Europeans call "people of caste." Henceforth he is not only excluded from his community, but he lives apart from all persons not declassed; he is a free man of inferior standing. He usually lives under the protection of a community of persons not declassed, earning his living from it and deriving from it such consideration as may be sometimes given him.

564 463 Among the Bambara, the nyama-ka-la include: the numu, blacksmiths, whose wives are usually potters; the loro, who work with copper; the garanke, who work leather; and the kule, who work with wood and are sometimes saddlers.

---

[567] 1. A slave has no rights because, as a person, he belongs to no community.

564 463 The hunters (donso), who form powerful and feared associations, and the somono [Somono] and bozo [Bozo], who are fishermen, have a less restricted status than the above-mentioned artisans.

The dyeli who has fallen to the level of a domestic factotum is the most scorned of all. He receives some consideration and, in exceptional cases, notable esteem only through his worth as family archivist.

564 The term nyama-ka-la is derived from nyama [221] meaning "ordure" or "outcast," and these people are outcasts. They are scorned. Some are particularly feared: the blacksmiths and the dyeli. The former are reputed, not without cause, to be given to the practice of magic and even sorcery. The dyeli have a fancy for poisoning.

754

Since persons of caste are free, they may contract marriage, that is, a lawful union, and found families just as free, non-caste persons do. Their male children naturally inherit the father's status which, thus, is handed down indefinitely through the male line.

Ordinarily they intermarry within the caste although sometimes a member of one caste may marry a member of another.

558 564 Any non-caste individual who marries a member of a caste automatically loses status. A woman who does so is henceforth considered to be a person of caste, and her children necessarily have the status of their father. A man is less seriously affected, and it is not at all rare for a man of standing to have a wife of caste. This is indubitably a misalliance; children of such a union are not highly regarded, and this reflects on the father.

564 On the other hand, it is entirely normal and common to have persons of caste among one's friends. There is hardly a person of consequence who does not have several of them as boon companions.

Although the fact of belonging to a caste carries with it a definite status, the caste member is not necessarily expected to practice the traditional trade. A member of the numu caste may very well know nothing whatever about ironwork and may

564 engage only in agriculture. Furthermore, casual or temporary practice, in one's own home, for instance, of one of the reputedly menial trades is not considered degrading.

567 596 614 Theoretically, enslavement does not exclude an individual from his own community nor in any way demean him in relation to it (1); if he returns, he recovers his rights just as though he had never been away.

On the other hand, at the place where he is a slave, an individual belongs to no community (as a person), and that is why he has no rights and is treated as a chattel.

567 We have shown earlier how, aided by time and circumstances, a slave may manage to escape some of the limitations of his status, but strictly speaking, [222] he can never escape this status. If in fact, as the chronicle says of Ngolo Dyara, a slave succeeds in attaining a position whose importance would seem to obliterate the stigma of servitude, the blemish of slavery nevertheless remains indelible.

4. Relations between Communities

596 614 621 The true social unit is the community. Even when no special organization links them, communities are often linked by numerous bonds. This involves no distinction by race, incidentally, since more often than not ethnically diverse peoples live together in the same region.

These bonds between communities may be classified under two heads: kinship and alliance.

Kinship

[602] The influence of kinship is very extensive. Thus, a single patriarchal community includes the familial communities

---

1. For example, Déssé-Koro, taken in captivity to Ségou, returned to Kaarta where he exercised the faya of the Massa-si.

596 of all the male members of the community, and agnate and
614 uterine communities coexist in each familial community.
621 Furthermore, every familial community automatically becomes
602 a patriarchal community upon the death of its head, and it is
then composed of its own familial communities.

What actually happens, then, is that under the original patriarchal community are grouped an ever increasing number of other patriarchies or families, each of which includes its agnate or uterine communities. When the original patriarchy is an old one, it is obvious that a large number of persons will be living under its aegis, all of whom have dyamu and tne in common.

It may happen, however, that through time and a variety of circumstances branches become separated from the trunk, and to mark their new status, to perpetuate the memorable achievement of their founder, some of these groups have adopted a special dyamu and particular tne. At first the new dyamu is simply added to the original one, but later on the new one comes to be the only one used. However that may be, the principal characteristics [223] of the original community still persist, with a few new traits merely superimposed.

Since every secondary community in turn generates like communities, it goes without saying that the communities most distant from the original one have only a few traits in common with it, but their kinship never becomes extinct.

What are the effects of this kinship? On the one hand, it requires all concerned to observe their common duties to the community: in particular to respect ancestral traditions relative to the cult; to give mutual aid; to recognize the authority of the current fa who, for his part, is obliged to protect all his relatives, no matter how remote the connection.

As far as outsiders are concerned, kinship requires everyone to respect all pacts between communities. One can often observe fidelity to these alliances which may be hundreds of years old. If by chance people who have previously never seen each other learn of their respective dyamu and the attendant obligations, they will at once assume the reciprocal obligations contracted by their ancestors.

Alliance

596 614 621 784 The types of alliance between communities appear to differ widely, but in actual fact all alliances are based on a religious or magic rite and, more generally, on an oath.

Four forms of alliance particularly deserve attention: the *tne* or interdict, the oath, marriage, and the common cult.

I. *The tne*. The native regards the invisible world as a duplicate of the visible world, complete with communities. He carries the analogy even to those things which we call inanimate objects. That is why, when a native binds himself to an interdict, he is not promising to respect such and such a person or thing but, rather, the community of which he believes the person or thing to be a representative. Besides, just as the interdict applies to the whole community to which the object of the interdict belongs, it also binds all the members of the community whose *fa* instituted it. [224]

The basis of the alliance is the oath of the *fa*, any infraction of which automatically brings the most dreadful calamities upon the guilty party. It is like a sacrament, which the descendants of the *fa* must respect *in infinitum*.

The chronicle of Ségou shows us how such an oath happens to be made. Upon reaching the Niger, and having no means of crossing it, Ntchi in his peril called upon his ancestors for help. His prayer was answered: a *poyon'* appeared and ferried him and his people to the opposite shore. In gratitude for this service, Ntchi swore that the fish would henceforth be sacred to him and to his descendants. By this act, all *poyon'* became *tne* for Ntchi and his descendants, although this does not mean that there was a cult of the fish. It was a kind of alliance or covenant, analogous to one between human communities and with similar effects; it entailed some sort of reciprocal brotherly mutual aid. In practice, a Kouloubali descended from Ntchi must never, under any circumstances whatsoever, voluntarily harm a *poyon'*, his *tne*, on pain of the most disastrous consequences. If he has done so inadvertently, he can atone with sacrifices or appropriate penance, which his own intuition or a diviner suggests. He must always, in so far as the need arises,

596 assist his tne, while showing it the greatest respect. The mysti-
614 cal basis of this alliance sometimes causes the native to behave
621 in a particular way toward his tne: he will not look straight at
784 it; he will not touch it, unless absolutely forced to do so, and
then he will apologize and ask forgiveness.

Anything may be the object of a tne, but there is probably not a single Bambara family which does not have some animal as tne. Expressions which the natives in general and the Bambara in particular use to make foreigners understand their relations with this animal tne have made many Europeans think that the native regards the animal as a relative in the literal sense of the word. This is not the case, as we have just seen, and consequently Bambara totem is a purely European invention (1). [225]

---

1. It should be understood that the tne has many sources besides one mentioned here, which is the only one pertinent to this chapter. Thus, Bala refused to pronounce any word having the syllable da (p.); Sounsan abstained from the kulé (p. , footnote 1).

596 II. The oath. In native society, a man who is ambitious
614 or merely anxious to establish a powerful community can do so
621 only with the support of faithful allies. Massa and Biton not only
608 succeeded in dominating their young companions, but they also
bound them closely through the oath and the cult.

Undoubtedly all the founders of powerful communities have not proceeded in exactly the same way, but all of them have employed analogous methods. An isolated individual can accomplish nothing in this social milieu where everything rests on these strongly organized collectivities, the communities. Any Bambara eager for well-being and peace will seek out and attach himself to a "powerful protector" (dyigi seme) capable of providing him with this security, even if it means the loss of his own

596 freedom. That is why any important fa is invariably surrounded
614 by a small group of intimates who are bound to his fate, often
621 by a reciprocal agreement based on an oath.

608 One of these sacramental alliances is particularly solemn; its purpose is to create a kind of kinship analogous to that which links blood brothers. There is always a profound difference between natural and contractual brotherhood, since the former exists and produces its effects independently of the will of those involved, whereas the latter exists and is valid only within the limits agreed upon by the contracting parties (1).

For a pact of brotherhood (dyonge) (2), the contracting parties, whether two or several, proceed as they see fit, either in public or privately in the presence of only close relatives and intimates. Each party to the agreement pricks his forearm and extracts a few drops of blood. The blood thus obtained is mixed with a small quantity of goat's milk in a receptacle. Calling upon the ancestors or some god chosen for the occasion to bear witness, each party in turn promises with a solemn oath to consider the others as his brothers. At the same time, he repeats the [22[illegible]] conditions of the pact and finally sips some of the liquid.

This is the closest alliance that two Bombara can contract (1). Among other things, it forbids one to marry women

---

1. It should be noted that fraternization in its symbolic form has a necessary consequence which is not obligatory for other types of alliance by oath: it obligates the descendants of the contracting parties just as much as those undertaking the contract.

2. This term unquestionably derives from the verb siri, "to link, to unite."

1. Blood-brotherhood was contracted

596 between Deni-ba-Bo for the Massa-si
614 of Kaarta and Suleyman Ba for the
621 people of Fouta.
608

belonging to the other's community, at least virgins or women reputed to be such. This is because a first sexual contact is likely to result in some flow of blood, and brotherhood imposes a terrible punishment on anyone who sheds the blood of a blood-brother or one of his people. As is apparent, the obligation undertaken by the contracting parties holds for all their descendants, regardless of sex and in infinitum. Henceforth there is a very close solidarity between the two communities, who are so bound to mutual aid that, in practice, anything (including lies, slander, and perjury) is permissible to overcome a common enemy or, in any event, to help the ally in trouble.

596 In place of the brotherhood oath, many other forms of
614 oath can be used. Thus, the chronicles tell of Sounsan and Fa
621 Siné forming an alliance with an oath which was undoubtedly
695 binding, because the anvil on which it was sworn was afterwards
cast into a well. Nko, Sounsan's god, received the oath under which the "young men" who were Massa's companions allied themselves to the latter's fate. At Ségou, the tondyon' likewise swore loyalty on the idols.

These sacramental agreements are endlessly varied, but they bind the parties only under the stipulated conditions, especially as regards the respective communities of the fa who take the oath.

596 III. Marriage. There is no better way for a Bambara to
614 show his attachment to someone whose alliance or friendship he
621 desires than by giving him as a wife one of the girls of his own
583 community and providing her with a generous dowry. This is one
of the most solemn forms of alliance between communities (2).

2. People united by marriage are called furu-nyuan' (spouses) and biran' (allies).

576
614
621
583

This conjugal union differs clearly from [227] ordinary forms of marriage. In view of the fact that the husband gets a wife without paying a bride price for her, the wife is not given in usufruct, and therefore she must be treated with the greatest consideration or she may be taken back. The situation can only be normalized if the husband is rich enough to present to the donor a gift equal to or preferably, if possible, greater than the dowry brought by the wife, or he may give a similar gift to the wife (1).

1. Such property is the wife's paraphernalia.

In these situations also, the procedure varies a great deal. The donor may offer a girl from another community and provide her with a dowry. This is what Biton did in order to bind Ngolo to him: Biton gave him a girl designated by the marabouts as one of the elect, and he also provided the girl with a rich dowry.

The significance of such alliances can be estimated only when one has some knowledge of the intentions of the parties involved, especially those of the donor. We shall see one important type in the chapter on Islam, the marriage of Allah.

IV. The common cult (2). The territorial community.

2. Communities may be united under the protection of the same god. Here we shall study only their union under the protection of the "genie, master of the earth" (*nyana dugu-da-siri*). Other common cults will be studied in the following chapter, "Brotherhoods."

In the mind of the Bambara, the earth, together with everything in it, is the property of the spirits. As a result, no one may make use of it or presume to settle on or cultivate an unused field without first going through certain ceremonies.

For this purpose, either on his own responsibility or, more often, with the aid of "the one who knows" (*don-na-ba*), a

311 Bambara seeks the "genie, master of the earth" (*nyana dugu-da-*
621 *siri*) or, more exactly, determines where this genie dwells. It
776 may be a spring, a hill, or a rock; often it is a fine tree, in-
794 variably surrounded by a grove or at least with a grove nearby.
Then, always following the same procedure, he finds out the conditions under which the genie will allow someone to settle in his domain in order to live there and cultivate the lands. Thus, a contract is worked out which governs the man's exploitation of the genie's territorial domain. As a result, provided he worships the genie in the manner required, the man [228] will be able to work under the protection of the god. Anyone who has had a share in the contract, even if only through representatives, will likewise profit if he scrupulously observes the conditions.

621 The establishment of a village requires the cooperation of
622 several communities, each represented by its *fa*. One of these *fa*
793 will either appropriate the leadership or be chosen as the rep-
794 resentative or chief of the others. Sometimes he may be merely
primus inter pares; otherwise he may have managed to have his primacy conceded by the rest. It is this chief who treats with the genie in the name of the whole village; thus, he becomes the "high priest of the genie" (*nyana-n-son-na-ba*) with the essential function of "making the offerings" (*son*) required by the cult. Furthermore, he administers the earthly domain of the genie and is therefore called *dugu-tigi* (master of the earth).

To the *nyana dugu-da-siri* is usually attributed the same *dyamu* as that of its high priest, just as though the genie belonged to the spiritual family of the priest. This is a result consistent with the mentality of the Bambara.

621 The same mental state accounts for the custom in certain
776 villages of dedicating a living animal, often a ram, to the
778 *nyana dugu-da-siri* and believing it to be the god's mount. The
[825] animal is allowed to wander freely about the village, and its
mischief is never punished; indeed, the people enjoy caressing and indulging it. The animal takes on some of the attributes of the genie and is, as it were, endowed with certain supernatural virtues, so only good can come from contact with it.

621 Theoretically, each settlement has only one genie, but
776 actually it may have several, especially if it has been settled by

621 776 successive groups, each recognizing a genie-protector. In that case, the genie first recognized and worshiped takes precedence over the others. In any case, social life requires each segment to respect the gods of its neighbors, and this respect carries with it a certain amount of superstitious fear.

311 621 794 It is evident from the foregoing that occupying and cultivating land poses certain problems for the settlement benefited, and these may be grouped under three heads: the cult of the genie-protector; the exploitation of the land; and the organization of the territorial community.

793 794 The cult. This is mainly supported by the high priest, whose principal duty is to "make the offerings" (son') to the "genie" [229] (nyana), hence his title nyana-son-na-ba. He is assisted by the council of fa, one of whom, the syere (follower), may replace him in case of need. The office of high priest is for life and is inherited in the same way as his faya. This continuity shows that the genie is actually regarded as a kind of spiritual ancestor of the priest, as we have seen from the fact that it is given the same dyamu as its high priest.

794 796 The cult ceremonies are very simple. They consist of offerings made by the high priest, who at the same time indicates to the genie the purpose for which they are being made. The most solemn ceremonies take place when millet is sown and harvested. For these occasions, every worshiper is expected to bring a contribution in proportion to his resources. The kind of gift is not specified; everyone brings whatever he can or whatever he wishes, usually animals (sheep, beef, fowl, etc.), grain, and especially millet beer (dlo).

782 796 778 + During these general gatherings, from which no one is excluded, only the high priest and the members of the council enter the sacred grove or approach the genie's abode. There, the high priest makes known the purpose of the sacrifice: to thank the genie for his past favors; to offer him the gifts brought by everyone; and to ask him to continue to protect the community so that its prosperity may be assured. Then the victims are sacrificed, and their blood is sprinkled on the tree trunk or whatever object or place is reputed to be the home of the genie.

782 genie. The same is done with libations of dlo or the juice of
796 kola nuts. Since anything offered to the genie is supposed to be
[784] consumed on the spot, an orgy lasting for several days usually
follows.

782 In addition to these two great obligatory ceremonies
especially concerned with the exploitation of the land, the god's protection is sought by similar, but much simplified means in all affairs whether they concern the entire settlement (wars, disasters), a particular patriarchal or familial community, or even a single individual. Through the high priest as intermediary, the offering and the request are made for the purpose indicated by the petitioner, who often promises to make a further gift to the genie when his wish has been granted. Vows of this type are made very frequently.

794 The cult of his high [230] priests and of all the im-
portant men of the settlement is tied in with the cult of the
769 genie, obviously a consequence of the fact that the genie is the spiritual patron of the community which honors him; its members are his children and with him form what amounts to a family. So, in line with what happens in a patriarchal or familial community, the territorial community also holds an annual festival for the dead, during which special honor is paid to noted personages, among whom deceased high priests have first place.

311 Exploitation of the land. The high priest in charge of
the cult likewise regulates everything concerning the exploita-
621 tion of the terrestrial domain of the genie, and in this capacity
423 he is known as the dugu-tigi (1), master of the earth. In this
773 office he has the help of the council of fa, and in important matters he must follow their advice.

With the help of this council, he allots the land when

---

1. In line with common practice, I shall henceforth use this title to designate both capacities, the high priest and the master of the earth.

311 the community is founded. His permission is required before
621 anyone may build a dwelling in the portion reserved as the seat
423 of the community; the village is therefore kept within precise
793 limits. In practice, however, everyone builds wherever he
pleases if there is no objection. If there is an objection, the
dispute is settled by the *dugu-tigi* and his council.

Outside the village proper, the terrain includes fields
423 which, either at the start or during the course of settlement,
621 are allotted in perpetuity to the various *fa* of the community
by the *dugu-tigi* in council. Each *fa* and his dependents have
indefinite use of the same fields, although by law the authority
which assigned them may take them away without being required to justify the act. This use is a kind of usufruct that is
more extensive than that of our law, since the beneficiary may
[425] use the land without restriction, except that he may not alienate
it. The tenant, however, may not use the land in any way that
might be prejudicial to the community as a whole without the
consent of the *dugu-tigi* and council. For example, such would
be the case if he proposed to give his right of use to an outsider.

Any land not specifically allotted [231] and anything it
produces or contains belongs, theoretically, to the member of
the community who cultivates it. Certain fruits or produce, however, are sometimes reserved for the community as a whole:
the leaves or fruit of the baobab, karite, *nété*, tamarind trees,
etc.; the fish in certain ponds, watercourses, fluvial zones,
[476] etc.; the game in certain cantons, etc. On the dates set for
these collective enterprises by the *dugu-tigi* and his council,
the people proceed in a body to gather fruit, harvest the crop,
fish, or hunt. Sometimes each person is allowed to keep what
he has gathered; sometimes all the proceeds are collected for
the *dugu-tigi* to distribute according to custom. There are also
special regulations governing the extraction of matter or materials from the ground.

621 *Organization of the territorial community.* The duties
of the *dugu-tigi* and his council are not limited to directing the
622 cult and regulating the use of land. Anything that happens
within the territorial community concerns the *nyana-dugu-da-siri,* because the members of the community are his children

621 622 (den'). Proof of this is seen in the fact that any important happening in a native's life is supposed to be reported to the dugu-tigi and in certain cases requires an offering or, as it is called, homage (bunya). We have seen this in the case of birth, giving a name, circumcision, marriage, and death. It is no less essential in cases of public disaster (epidemic, persistent drought, invasion, war).

621 622 692 In theory, the dugu-tigi does not intervene of his own accord in the private affairs of the patriarchal or familial communities which, when taken together, constitute the territorial unit we usually call a village (1). When a quarrel between relatives cannot be settled by the fa concerned, however, he asks for the intervention of the dugu-tigi and his council. If dissension arises between the people of different communities, the same arbitration is usually requested. As a result, a kind of tribunal of conciliation has evolved, which can only suggest what the parties should do or refrain from doing in order to put an end to the dispute. Theoretically, the dugu-tigi has no right to enforce the [232] verdict (1), because the communities are extremely jealous of their independence. As a consequence, they yield only to the extent that is in their best interests.

It may happen, however, that the dugu-tigi, supported by his council, does exert authority when he has the power and is seconded by notables who make common cause with him for

---

1. The territorial community among the Bambara is called dugu, a term which at the same time means "land" and "among," "to," "within," etc., and which is preceded by a name recalling some circumstance involved with the founding of the village.

1. That is why litigation may be indefinitely prolonged.

621 various reasons. Thus, the dugu-tigi in council can invoke
622 police powers to maintain order in the community and even act
692 as a tribunal to punish those whose misdeeds in any way endanger the persons or property of members of the community.

Since the genie is expected to ensure the prosperity of
621 the faithful, it is the duty of the dugu-tigi to come to the assist-
622 ance of members of the community who are unfortunate or in-
[735] digent.

He must also maintain the relations of his community with the outside world, that is, with neighboring territorial communities and all other groupings, analogous or otherwise. He can act independently only in matters which we call purely administrative; for other matters he must have the assent of the council of fa, above all for any matter involving the disposal of community property.

It is obvious that all the roles of the dugu-tigi involve
621 expenses that are often considerable, but for this purpose he has
622 access to goods from many sources. In the first place, offerings
651 made to the nyana are of various kinds; they are not always consumable, and even if they are, they are usually consumed only in part. The remainder belongs to the dugu-tigi. It is customary to give bunya (gifts of homage) to the dugu-tigi on many occasions: a hunt, a fishing expedition, millet harvest, etc.; to thank him for an allotment of land, or for some other service. Community property is farmed out for fees payable at fixed times, and tribute is paid in the same way. Most of the various kinds of infractions committed within the community are punished by fines received by the dugu-tigi. Incorrigible malefactors become slaves of the community, and the produce of their labors [233] goes to the dugu-tigi. Anything found abandoned on land belonging to the community is turned over to the dugu-tigi, in whole or in part.

In case of need arising through some exceptional emergency (war, an expedition, public works of various kinds, etc.), the dugu-tigi may have recourse to what we should call an emergency assessment, i.e., he may ask the members of the community for special contributions for the purpose.

621 622 651 652 These are the principal resources of the community treasury, which is held and administered by the dugu-tigi with the help and under the control of the fa. The dugu-tigi may use the treasury to help him perform his duties honorably, to assist unfortunate or indigent members of the community, to receive the guests of the community in a suitable manner, and to meet emergencies.

661 Under no circumstances does this treasury constitute any part of the personal fortune of the dugu-tigi. Only usurpation, which is fairly common under various guises, alters this state of affairs. In the same way, it is not uncommon for this wealth to be divided in some measure among the members of the council, who in one way or another appropriate it. Such abuses, no matter how common, do not in the least alter the principle that legally such wealth is and remains exclusively the property of the community. [234]

Chapter 4

Brotherhoods

1. The End of Childhood

794 881 General considerations. The cult of the ancestors and of the nyana dugu-da-siri are not enough for the Bambara in his efforts to make sure of the protection, help, and services of the invisible world. The magician has created for him some renowned protectors or servitors which are powerful and formidable: the nyana of the boli.

The cult of these gods gives rise to spiritual families whose members are so closely linked by the bonds of fraternity that we may safely say that these groupings are brotherhoods. All these brotherhoods share the common characteristic that no one can be received into them before having submitted to a certain rite called soli (1) or bolo-ko (1), terms which etym

---

1. Soli is the word for the action of piercing, emerging, laying an egg, or

794
881

being born; bolo-ko literally means "affair involving birth."

etymologically mean "birth."

Having entered the family through physical birth, a child enters a new phase of his life through the spiritual birth represented by the soli. Through this rite, a child in fact ceases to belong to sexless childhood and becomes: the boy, a man; the girl, a woman. Let us look at the stages of this change of status which is truly the principal event of a native's life.

857 Until he is about seven years old, a small boy lives in daily contact with his mother, only slipping away, as time goes on, to play nearby with his friends.

During this period, one can already observe the influence [235] of the native milieu on the development of his young soul. He has watched cult and magic practices, and he too plays at being a magician to kill or capture rats, lizards, and other small animals for his little feasts. He collects roots with simulated rites and attaches them to his toy bow so as to ensure the success of his hunting, believing that he has attracted a spirit by promising an offering of the blood of his victims. He is already a little hunter, seeking mysterious procedures through which game can be and ought to be put at his mercy without danger to himself.

881 794 Around the age of seven, he is thinking about the crucial act of his life, the soli, one of whose rites is that of circumcision.

Observance of the soli, complete with public circumcision and preceded and followed by membership in a brotherhood, is not absolutely indispensable. When, by reason of circumstances, a child lives in an isolated situation, he undergoes the soli within the family circle, without fuss, and this in no way lessens the validity of the act.

881 794 561 571 There is no doubt, however, that nothing but absolute necessity will make a Bambara do this; he loathes such wretched economy, which in any case seems inappropriate to such an important occasion (1). On the contrary, he loves to take part in

1. Besides, since no exact age limit is

881 561 571 744 imposed and since there may be as much as six or seven years' difference in age between the oldest and youngest children participating in the same soli, it is obviously possible for a candidate to arrange to be included at some point within this range of ages so as not to be an isolated case.

881 571 744 a noisy demonstration and to share in all of the rejoicing the brotherhoods provide for their members. This is by no means the least of the reasons for the spread of these brotherhoods, to which the n-Tomo (2) is really the front door, since no one is admitted to a brotherhood unless he is soli-ma, and the specific final object of the n-Tomo is the soli.

n-Tomo

561 857 881 The n-Tomo is an association which, in preparation for the soli, bands together boys (3) of about seven to fourteen years

Each [236] n-Tomo normally includes all the boys due to be circumcised, without distinction by race or rank. Each member is called n-Tomo-den'; the eldest is the leader or n-Tomo-tigi, and he is assisted by a syere or "follower." New members are received every year at the time of the annual festival, and they must pay an entrance fee (a chicken) and a few cowries

2. n-Tomo is the term used in the Ségou area; in Kaarta the term n-Tori is used.

3. Little girls have no organized society to prepare them for the soli, but they have agreements among themselves and, in addition, are chosen as n-golo-moso-u by the n-Tomo-den'-u.

561 and take an oath of secrecy. The boy leaves the n-Tomo
857 after the soli. Girls are not admitted.

881 The n-Tomo-tigi and his syere organize the association so as to assure it some property which in principle is collective property. Through common abuse, however, they are the primary if not the sole beneficiaries of it. They persuade their comrades to cultivate a field whose produce will provide the food for their club feasts. The entrance fee is augmented by force, spontaneously or at the order of the n-Tomo-tigi: gifts, collections, theft, hunting, fishing, etc.; in short, anything may be collected by individual or collective effort to form a kind of common treasury.

857 There is no collectivity, however, without its spiritual
773 patron. The n-Tomo meets out-of-doors, at the foot of a tree (1) believed to be the chosen home of a genie-protector.

(1) The name "n-Tomo" comes from this. It has been thought that the term was simply the name of the tree where the genie-protector lives and that it was the tree which the Bambara call "n-Tomo." If this were true, why should people in Kaarta use the term "n-Tori" when the tree called n-Tomo does not change its name? It has been suggested that n-Tori is another word meaning "toad" and came from the peculiar "cry" characteristic of the society.

It is my belief that the two terms, "n-Tomo" and "n-Tori" designate the same grouping in different regions and have one and the same meaning: meeting, assembly.

The n-Tomo-tigi is the high priest of this genie; as such he receives the oaths of the neophytes and has a certain degree of authority over the whole band, which enables him to punish any misdeed committed by a n-Tomo-den'. He does not hesitate to use corporal punishment.

857 use corporal punishment.

From this early age, therefore, a Bambara is subject to the corporate discipline which will henceforth dominate his whole life, for the same sort of discipline prevails in the adult brotherhoods.

The genie-protector is honored by offerings, [237] sacri-
857 fices, and ritual dances. When they perform these dances, the
292 n-Tomo-den' take turns wearing the ceremonial mask and cos-
[782] tume. The mask has the form of a human face surmounted by
a number of vertical horns (five to eight of these) and decorated with a few cowries. The costume consists of a dloki (a kind of blouse with wide sleeves) and a pair of long trousers, which completely cover the body. If the costume is yellowish-brown (basa) or white (dye), the association is called "n-Tomo-fin' (black n-Tomo)" or "n-Tomo-dye (white n-Tomo)," respectively. Is this costume supposed to represent the adepts' conception of their protector's appearance? No. As in all sects, it is intended to differentiate the officiant from the profane world (1).

[534] 1. Some of these associations give a
kind of public performance from which
they derive profit. Notably, they exhibit a kind of puppet called peremperen'
(dancers) which members of the n-Tomo
manipulate in a more or less comical
manner; often one of the puppets rep-
[831] resents a man and the other a woman, and
their movements abound in the obscenities
which are so popular with the onlookers.

831 A wooden phallus (or a small board) is commonly used to
857 summon the n-Tomo-den' to meetings. This is tied to the end
[534] of a rope and whirled like a sling, producing a noise which the
operator can vary and which carries a considerable distance.
This apparatus is called n-Tomo-ulu, translated as "dog of the
[195] n-Tomo." It should be noted that the words used in the brotherhoods usually have a double meaning, with a special sense under a vulgar form. For instance, the word ulu means both

857 "dog" and "the sexual parts of a man," and it seems evident
831 that the expression n-Tomo-ulu should be taken in the latter
195 sense. This is all the more likely since in the similar organization among the Khassonké the same apparatus is called khe-fengo, literally, "thing of a man," that is, "sexual parts of a man."

857 The great festival of the association takes place every year after the harvest and does not differ essentially from the
796 one celebrated at the same time by all the brotherhoods. It involves offerings and sacrifices to the genie-protector, communion by the n-Tomo-den' at a corporate banquet, and the admission of new members. The following is a detailed description. [238]

At the instigation of the n-Tomo-tigi, the brotherhood's field has been harvested and to the grain collected has been added whatever the boys could obtain from their families or friends by any means, even theft. From this millet the n-Tomo-
[273] tigi has had dlo (beer) prepared, which is drunk in great quantities on such occasions. The "elders" (koro-u), relatives, and friends can be counted on to send their contributions in kind.

Each n-Tomo-den' is given a little outfit appropriate to the occasion. The ceremonial costume is put in order; the dloki and trousers are washed and ironed, if need be, and the mask is rubbed with vegetable butter (si tlu) to give it gloss.

On the day set, everything is in readiness. Many gourds of dege (1) and to (2), numerous jars of beer (dlo), and also some kola nuts have been assembled, along with sacrificial victims.

857 The n-Tomo-den', each leading a chicken on a string,
796 go to the meeting place in single file, with the n-Tomo-tigi
782

[258] 1. Dege is made by putting coarsely ground millet into a small quantity of water.

2. A native mush.

857 and his *syere* at the head. There, the *n-Tomo-den'* squat at
796 a little distance from the *n-Tomo-tigi,* who takes his place in
782 front of them, facing the tree where the guardian genie dwells, in order to perform the libations and sacrifices. First he takes a small gourd and pours the *dege* it contains against the trunk of the tree; he cuts the throat of a chicken and dribbles its blood on the tree in the same way; next, in a jet of saliva, he spits on it the juice and particles of kola nuts which he has chewed for the purpose; finally, he fastens a few of the chicken's feathers in the smear of blood. As he makes each of these offerings, he says to the genie: "Look here, I offer you this chicken, protect us, defend us against the wicked and against evil genii. Give us enough to live well. Save us from illness. Give us rain to make our fields fruitful and be propitious to our families."

He speaks thus for everybody, after which each one comes in turn to offer his sacrifice and to make personal requests through him as intermediary.

The admission of new members follows. Each of them
857 pays his entrance fee and then, prostrate before the genie,
796 swears never to reveal anything to the uninitiated, [239] above all to the women." If you betray your brothers," says the *n-Tomo-tigi,* "may the genie kill you!" The new member repeats: "May he kill me!"

At this point the victims are cooked, and while they are
[535] being prepared, the *n-Tomo-den'* dance in turn, dressed in the ceremonial regalia. Their steps are accompanied by the beating of drums, and they twirl a flexible stick as they dance. When the victims are cooked, the banquet begins. Everyone eats and drinks as much as he can; a special treat of kola nuts brings the banquet to a close.

857 On this day each *n-Tomo-den'* is expected to take one of
796 his gifts or some other personal possession and make a present of
572 it to his *n-golo-moso* (1). This is how one names the young
[431]

1. *N-golo-moso,* literally, "woman of the birth," is the companion associated with the rite which he is to undergo.

857 796 [672] companion whom each n-Tomo-den' is required to choose upon his admission into the sect; she is his special girl friend and his relations with her are not merely platonic.

The meal is over by mid-afternoon, and the band returns to the village for a public performance during which the
857 796 members beat one another. First, the n-Tomo-tigi and his
785 syere advance to the middle of a circle of onlookers, relatives, friends, and others; the mothers wrap cloths or scarves around their hips and stomachs to protect them from serious injury. Onlookers sing and clap their hands. The n-Tomo-tigi holds his whip aloft with his arms outstretched, and the syere immediately flogs his head and shoulders, front and back, his thighs, legs, and feet; he keeps this up, the victim uttering not a single cry of pain, until he can strike no longer, either because he is exhausted or because his whip is broken.

Then it is the turn of the syere to be flogged in the same way. Following this, the n-Tomo-den' in pairs flog each other until it is the turn of the very youngest who, being less hardened, weep and scream and run away at the first blow. This naturally gives rise to laughter and mockery among the onlookers, who had greatly admired the stamina of the others.

In some places each n-Tomo-den' flagellates himself.

What is the meaning of this practice? It seems likely that originally its purpose was to emphasize the secrecy required of the n-Tomo-den' by giving them a chance to show that they would not violate [240] their oaths even under blows. It should be recalled that flogging was the common method of obtaining confessions, always considered the best proof of guilt. Thus, the practice of flagellation would to some extent enable the adepts not to confess under blows (1). The practice is also a means of preparing the boys to undergo circumcision without flinching, since it is a signal disgrace to show or expose pain at that time.

---

1. Flagellation is also practiced in certain brotherhoods for no apparent reason except that of hardening one against pain. See "The Koré" below.

881
304

Soli (2)

The single word soli is used for what we call circumcision and excision. This is because a Bambara has in mind not this or that surgical operation, accessory in nature, but rather the ceremony which for boys and girls alike marks the passage or, more accurately in line with the etymology of the word soli, the fact of being born to a new status.

881 The soli does not take place every year, because it involves considerable expense for the families, which they cannot always meet. At the instigation of the boys who must undergo the soli and who, therefore are called soli-ma-u (people of the soli), the family heads assemble at the call of the nyana-n-sonna-ba to decide whether or not the soli will be held. If the decision is affirmative, the boys and girls then take steps to make sure that the festival (nyara, "orgy, wedding") will be as elaborate as possible. In principle, the date coincides with the third day of the festival of the sheep.

Guided by their elders, the young girls (soli-ma-muso-u) [262] go from door to door to solicit millet for the banquet (3) which they are expected to give the elders (koro-u) on the second day of the feast of the sheep. The period of the ceremonies of the soli actually begins with this meal. [241]

In the afternoon of this day, the boys make the customary sacrifice to their genie-protector, dancing in his honor in ceremonial costume but without flagellation.

---

2. The word soli is used in Kaarta; at Ségou the term is boloko or ngolo-ko, literally, "affair of birth."

3. The menu includes couscous (basi), and it is called soli-kili-basi, "basi of the solicitation for the soli," on account of the source of the millet used to prepare it, solicited by the children.

881 302 On the same day the young girls in certain localities have a characteristic ceremony. One of them whitens her face, breast, and back with a mixture of milk and ashes. Thus daubed, she dashes out of the village brandishing the spatula (to-n-galama) which is used to stir mush (to) in the pot; her companions follow her, shouting. The band goes around the village four times in this fashion, each time stopping at the crossroads. At these points the girl who is bedaubed throws handfuls of food (1), provided by her companions, to the spirits,

[262] 1. Usually basi (couscous) made with fish.

crying: "Dege dule (2)." Her companions reply: "Naloma (3)."

2. Literally, "thick mush."

3. That is, "fool."

881 527 [273] [576] The eve of the soli (soli-si). During the evening preceding the soli, the families concerned enjoy an ample meal, accompanied by innumerable jugs of beer (dlo) as is the custom at all festivals among the Bambara. This is a time of special merriment, of shining faces and greasy hands, and it is good form for the men and boys to belch noisily, saying repeatedly: "ne ne fa," literally, "I am full," that is, "I am replete." [301] The women wander about the lanes, wrapped in their best skirts, with balls of amber in their hair and small silver or even gold rings in their ears and nostrils and rather heavy bracelets on their [482] arms and ankles. Some carry jars of dlo on their heads, while others carry gourds full of couscous, dege, or hot sauces which are often nauseous with smoked or spoiled fish. After the meal everyone gathers on the public square, forming a wide circle whose center is reserved for the dancers; piles of dried millet [373] stalks are used to make bright fires which illuminate the scene and warm the audience.

881 302 The "boys of the soli" (soli-ma-tye-u), their heads

881 [302] freshly shaved (4), their bodies rubbed with vegetable butter (si tlu), [242] arrive in single file. Greeted by the onlookers, they take their places in the front row. Shouts, noisy conversation, and songs are intermingled and make a racket which is interrupted by the arrival of the "girls of the soli" (soli-ma-moso-u). With their hair in a tangle and dressed in short skirts (1) reaching from the navel to the knee, they enter one behind the other, walk around the assemblage, and finally take their places in a group near their mothers and friends.

The assembled men drink around the fires.

881 533 534 All the drums are there, and as soon as the girls appear, the drummers rush to their instruments. There are big drums resting on three legs (denu-ba), others which hang from the shoulder, and still others carried under the arm. Young women shake bits of iron (kinge) as one shakes castanets, and there are other iron instruments provided with rings. Old women pound on gourds turned upside down in pots filled with water.

The noise is deafening, and it is dominated by songs in honor of the ancestors shouted by the whole assemblage as loudly as possible. Then the whole crowd, where the tipsy are in the majority and where everyone is at the highest possible pitch of excitement, starts a frenzied dance accompanied by songs usually improvised.

881 787 While all this is going on, the adepts of the major brotherhood (2) are outside the village, noisily driving out the

---

4. Just as their heads were shaved at birth.

1. Blue for Moslems and yellowish-brown (basa) for the purely pagan Bambara.

2. The Komo around Ségou; the Nama in the Kaarta area.

881 evil genii in order to preserve the "people of the soli" (*soli-ma-u*)
787 from their bewitchments.

881 *The soli.* The *soli*, this make-believe birth, is marked
by a bloody operation, circumcision for the boys and excision
304 for the girls. The fact that the ceremony does not get its name
from this operation demonstrates that it is merely show; it is
merely a rite of separation between the previous state and the
new one (3). The operation takes place at dawn.

[171] 3. That is why among other peoples the operation does not exist or represented by a mere slash on the thigh (among the Koniagui).

Boys. The blacksmith who is to circumcise the boys waits outside the village under a tree. Assisted by members [243] of the sects and especially by the *Komo-tigi*, he performs the operation behind a loincloth hung up as a screen. The boy stands erect, and the blacksmith draws out the prepuce and cuts it off, after having determined approximately the proper place to cut. The patient is expected to show no weakness; on the contrary, he exerts himself to say a few words to show his courage.

As soon as the operation is finished, a gunshot announces the news to the elders crouched about the village fires, and a female *griot* proclaims it to the bystanders. The *Komo-tigi* takes a few *nyanka* leaves, burns them, and goes to place the ashes on the boy's familial *kara*. The boy runs off to rejoin his companions under the tree especially chosen for this reassembly. All the boys will spend their days there, on the fringe of society with which they are forbidden to mingle. They return to the village only at night, to sleep in a hut reserved for them.

881 A man reputed to know how to care for circumcised
boys lives with them, takes care of them, and closely supervises
304 them; this is the *sema-tye*. Every day abundant food is brought
292 to him for his patients. The latter wear a *dloki* (blouse) and
kursi (trousers) made of cotton cloth, blue or yellow-brown (*basa*)
depending on their affiliations (1), and their headgear is usually

---

1. The *basa* color is much in demand

881 among the Bambara, while the Marka
304 use cloth dyed indigo-blue.
292

a high cap with strings extending from the earlaps. They can only leave the place where they are assembled, even for the needs of nature, under the leadership of the *sema-tye* and shaking a stick of wood to which are attached bits of broken pottery. This rattle is called *n-koso-m-bara.*

881
304 They pass the time plaiting mats, gossiping, laughing, and pestering passers-by. On market days they are permitted to block the paths leading to the village and to collect a tithe from the traders.

The officials of the sects often visit them in their retreat.

Girls. The blacksmiths' wives who are to remove part of the clitoris await the girls outside the village under the trees. Some matrons assist them. Each child in turn runs up to the operator and squeezes herself between [244] the legs of the matron who exposes the clitoris. The excised clitoris is laid [789] in a little woven basket and is carefully preserved for making talismans.

The completion of the operation is announced in the same way as for the boys, and the *Komo-tigi* likewise puts the ashes from *nyanka* leaves on the familial *kara.*

The girl then rejoins her companions in the hut reserved for them in each section of the settlement. There they are under the surveillance of an old woman, the *sema-moso,* who knows how to take care of them and who sees to it that they behave properly. They are very well fed.

881
[514] Wrapped in skirts, they lean on canes of dried millet stalks when they walk and shake a gourd pierced with holes and filled with pebbles. They go out only for the needs of nature and then all in a body. They warn the passers-by by shaking their rattles and singing improvised songs. As they near paths outside the village, they intone a refrain.

Soli da woro (1). The seclusion of the soli-ma ceases

---

(1) Literally, "sixth day of the *soli.*"

881 on the sixth day. Just as a baby is admitted to the family on the seventh day after its birth, so on the sixth day after the surgical operation which has, as it were, marked the end of childhood, one attains a new status.

The sixth day, da woro, is the most important festival
881 of the soli. All the relatives and friends are invited and even
786 the most distant make great efforts to be present. Each one
sends or brings his contribution to the orgy-like meals which go
on and on, that day and the days following. The fiancés of the
girls must be represented and send gifts. Married brothers and
sisters must come, bringing their respective wives and husbands.
It is an occasion for feasting and drinking, and it goes on as long
as the provisions last, i.e., for several days.

881 The essential part of the ceremony, for which everyone has come, takes place on the evening of the sixth day. The onlookers gather in the public square where there will be [245] dancing, but usually only the women and girls remain there; the men and boys go outside for the admittance of the soli-ma-tye to the leading brotherhood of the village (Komoya, Namaya) (1).

Sometimes, however, there is no separation of the sexes, either because there is no active brotherhood or because the high priest has set a later date for the admittance ceremony.

In any case, the performance within the village is particularly for the girls, soli-ma-moso. Wrapped in a cotton coverlet with blue and white stripes, called dampe, each girl lies between her mother's legs (2) on a white cloth laid upon a mat.

While the boys, soli-ma-tye, are noisily shaking their
[534] rattles, n-koso-m-bara, the girls, soli-ma-moso, flourish their
pebble-filled gourds.

---

1. We shall describe this admittance when we discuss the brotherhoods.

2. Or those of a relative or friend of her mother.

881 535 In a compact group, the women and girls of all ages and stations shuffle slowly around the orchestra, while the men drink and sing around small fires of dry millet stalks.

From time to time, upon being invited to do so, one of the girls, soli-ma-moso, gets up, rattles her gourd, and joins the dance with slow, deliberate steps.

At dawn, when they are about to return to their huts, the girls, soli-ma-moso, make one last circuit, and then each one, with her heels together and her hands crossed above her head, makes three leaps into the air. She does this three times.

The Bambara themselves interpret these various details
881 concerning girls, the soli-ma-moso, as symbolic. The girl's
201 position between her mother's legs recalls physical birth. The
white cloth represents the one that at her mother's marriage
bore witness to virginity and reminds the girl that she will have
to give similar proof to her husband. The dance done with
slow, measured steps is the symbol of a child learning to walk,
and the nine leaps that close the ceremony attest to the fact that
the girl is now an adult. A final rite shows the parallelism between the soli and [246] birth: on the sixth day, the nyana-n-
[302] son-na-ba shaves the head of the soli-ma-moso (1).

1. In place of the braided coiffure, young girls wear the magic cord with nine knots, called tafo, on the crown of the head, and this is connected to a similar one, called dyo, at the nape of the neck.

881 End of the soli. On the seventh day, before noon, all the soli-ma-moso go to the well or to the river to wash the soiled clothes and to scour the pots and gourds used for the festival. Then all return to the discipline of the soli: the boys under their tree, and the girls in their huts. The sema watch over the youngsters, who by now are bored with the discipline. About three weeks must pass after the operation before all the soli-ma completely recover.

881 At the end of this time, the nyana-n-son-na-ba and his council having come to an agreement with the sema to end the period of seclusion, each leader performs certain magic passes, under the boys' tree and near the girls' huts, to dispel any evil. The Bambara are convinced that so long as the period of convalescence is not officially closed the circumcised boys or excised girls are as much a danger to society as society is to them; that is why they must spend this period in seclusion. 881 783 Furthermore, anything used by them during their seclusion is impregnated with this evil and may spread it.

Therefore, as soon as the interdict is lifted, everything is collected to be burned at sunset (2). Near the trees outside the village the mats, the n-koso-m-bara, the gourds, millet stalks, rags, etc., are all piled up, and the nyana-n-son-na-ba sets them afire. The boys and girls jump over the fire three times; they are then free to return to the village. They run home promptly to adorn themselves for the festival celebrating their return.

881 Once more there are lavish meals and interminable drinking bouts, followed by a general gathering in the public square. People come from all directions, among them appallingly decrepit old women who try to manage everything. [247]

291 On this occasion, the boys, soli-ma-tye, appear for the first time in true man's attire, full trousers, cap with earlaps, and an ample new shirt. With lance in hand, they swagger about and simulate the behavior of warriors; they are now tye-kura, "new men."

881 301 The girls also are decked out to excess in women's attire. Wearing several skirts and adorned with all the jewelry relatives

789 2. However, personal effects (the boys' kursi, dloki, and baufla, and the girls' tafe) are not burned; along with their stains, these are impregnated with virtues which make them particularly valuable for talismans, amulets, and other magic weapons.

881 and friends have kindly lent for the occasion, they advance
301 shyly. In some areas, notably in the Bani region, they wear bundles of cowries, from the bride price already paid for them, around the hips and hanging on each side of the head (1).

[302 171] 1. Bambara girls who have gone through the soli have their heads shaved. Among other peoples, on the contrary, girls have their hair braided like women for the first time, but to the braid is added a tuft of the hair shaved off seven days after birth; this hair has usually been lost, but a small tuft is made to simulate it.

881 Boys and girls, following the old women who lead them,
[535] dance around the orchestra, and then all sit down in a circle. The nyana-n-son-na-ba takes the floor. He speaks in a low voice, and, as is proper, his words are repeated in a loud voice by a herald. He proclaims the end of the soli, recalls its principal events, and indicates clearly which children have participated in the rite; each boy and girl is specifically named. He will also be sure to point out that the soli is an immemorial cus-
[578] tom among the Bambara and that there is no worse insult than to treat a Bambara as uncircumcised. He closes by inviting everyone to eat, drink, and celebrate in the joy and harmony appropriate to such a festival.

[535] Dancing is resumed, and the boys and girls of the soli take part. The festivities continue as long as the refreshments last, usually several days.

To end it all, no one leaves without giving at least a few kola nuts to the heroes of the festival, the boys and girls.

The last phase is the thanks given by the soli-ma to those who assisted at the da-woro. In noisy bands, boys and girls dash about the village in two distinct groups. The girls' group is headed by the soma-moso who is called masa (queen), followed by the masa-ma-kono (vice-queen) and the masa-ma-kono-segere [248] (follower of the vice-queen); the last girl in the

881 group is called kule. In the same way, the boys go about in a group headed by the sema-tye, called masa (king), followed by the masa-ma-kono, the masa-ma-kono-segere, etc.

In this way, the whole country learns which boys and girls have completed the soli.

The Fla-n-ton'

561 Those who have belonged to the same n-Tomo-ya and have gone through the soli together remain bound together for
572 life; they are fula-ni ("peers," "twins") because they were born
575 on the same day to sexual and social life. Wherever they may be and whatever their respective rank, two fula-ni consider themselves equals even if one of them is a chief and the other a slave; the latter in particular has the right to speak his mind without fear (1). Theoretically, therefore, the fula-ni is the friend on whom one may safely rely, and he is usually a member of the council, small but very powerful, which every fa likes to have around. It is to him that the fa confides his troubles, his joys, his plans, and his personal affairs. He is present at all the celebrations and mourning of the family. On serious or important occasions, he represents his friend who often entrusts him with the supervision of his household during an absence and appoints him guardian or trustee of his children after his death. He is a brother who may be loved more than agnate or uterine brothers. At the same time the fulani-ya does not necessarily produce a type of brotherhood analogous to that brought about by the blood pact. Rather, it engenders a kind of mutual assistance which is strengthened by the organization called fla-n-ton', "assemblage of people of the same age," i.e., those "born" at the same soli.

The young people from the same soli form a fla-m-bolo, literally, a band of persons of the same age.

---

1. See in Chapter 7, "The Man with Three Braids." [Not translated.]

561 575 A fla-n-ton' usually includes the young people from three consecutive soli, so it is an assemblage of three fla-m-bolo. Thus, Bambara society is composed of a certain number of fla-n-ton', and all the people are distributed among them, from the most recent tye-kura (new men) to the tye-koro (elders) who are the most advanced in age. [249] Since the women also have their fla-n-ton', it is reasonable to say, from a certain point of view, that the soli is the basis of life and of the social organization.

[571] Each fla-n-ton' is independent, but it maintains the best of relations with its immediate neighbors, the one preceding it, the one following it, and the one of the women of the same soli. Thus, the fla-n-ton' have a certain solidarity among them, which is shown by the custom of each fla-n-ton' honoring its immediate neighbors by offering them some of the food from its corporate meals. It should be noted, also, that whenever discord arises within a fla-n-ton', the neighboring fla-n-ton' intervene to make peace; a special arbiter may even be chosen to smooth out the difficulties involved in such an affair (1).

1. In this connection, note the difficulties between the ton' of Kassoum and Biton as reported in the chronicle of Ségou above.

Wherever he goes, a Bambara will look up people of his own age, i.e., those who went through the soli at the same time. He can always count on their friendly welcome and practical help.

In each fla-n-ton' there is a chief, ton-tigi, chosen in various ways depending on the place and the people. He may be the son of a notable; he may be a house slave. A syere (follower) assists him or replaces him. A dyala-tige, or assigner of shares, has the function of enforcing discipline and distributing the food at the group banquets; this is usually a house slave. Finally, a ton-dyeli serves as general factotum and herald; a person of caste has this role. From the point of view of the

561 575 association, each fula-ni is a ton'-den'.

The bachelors and some of the married men regard the fla-n-ton' simply as a means of having a good time in the company of boon companions. Anything brought by an individual member goes to swell the common fund which is most often used to organize feasts and drinking bouts. At these banquets, it is customary to comply with rules which appear curious at first sight and which must be obeyed unless the member wants to pay a fine into the common fund. Thus, anyone who acts on his own prior to or contrary to an order from the ton-tigi, anyone who comes or leaves, blows his nose, [250] spits, sneezes, and so on, without permission, is fined. Aside from the profit to the common fund, the procedure has its uses in making the ton-den' amenable to discipline.

In principle, the treasury of the fla-n-ton' is supposed to be used only to succor poor, embarrassed, or unfortunate members, who are expected to repay with interest insofar as they are able to do so. In theory, also, all of the ton-den' can count on moral and material aid from their fla-ni whenever there is need for it. It goes without saying that this fine spirit of altruism is rarely put into practice.

The fact of the matter is that the young masters (kamale-u) make use of the organization to resist the omnipotence of the elders (koro-u); malcontents of all sorts take refuge in it; adventurers find it useful in promoting their schemes. We shall see how the two most powerful Bambara empires were built on the fla-n-ton'.

2. General Considerations Concerning the Brotherhoods

Origin of the Brotherhoods

177 794 There is no reason to suppose that the Bambara brotherhoods are not purely native institutions; similar organizations are to be found all over Africa, particularly in areas untouched by Moslem influence. All of them follow similar principles made manifest in ways characteristic of African occultism.

177 794 There is no doubt, however, that in the case of the Bambara with whom we are here concerned this native foundation

177 794 has acquired various elements brought in from the outside world by Berbers, Arabs, and others, or by Sudanese pilgrims returning from the Orient. In any event, this foreign occultism -- usually oriental -- certainly did not give rise to or greatly modify the local Sudanese occultism; it merely strengthened its organization, its institutions, and its methods by adding new knowledge.

The legend (1) which claims that the nyana of the boli are a Moslem importation does not mean that these "gods" were introduced [251] actually and exclusively by such means. It means only that pre-existing native institutions have received foreign support from pilgrims or others returning or arriving from the Orient.

1. Reported below in the chapter on Islam.

Dogma

794 Are these brotherhoods based on a more or less secret teaching of cardinal truths? It does not seem to me to be risky to say that they are not. Everything in these cults may be summed up as empirical practices which are believed to have the effect of forcing a "god" (that is, an extranatural force) to serve man. The aim is essentially utilitarian and worldly: to acquire a "powerful protector" (dyigi seme) for defence, for offence, and especially for the purpose of attaining sufficient power for the realization of all desires.

Such an alliance with a god by means of a cult compels one to behave in certain ways, but discipline of this type does not lead to the improvement of either the individual or the society through the acquisition of what we call moral qualities or virtues. It is all the more obvious, then, that the brotherhoods are not trying to assure their members entry into a supernatural world; they can barely claim to assure them protection and a modicum of material well-being. A spiritual mysticism is unknown to them (1).

1. However, see Chapter 7. [Not translated.]

Methods

774 Are the rites and magical practices used in the brother-
789 hoods efficacious?

Here, as in all matters, the Blacks operate by feeling their way, imitation, or adaptation, all incomplete. Just as an ignorant man is perfectly capable of accidentally starting a clockworks whose mechanism he does not understand and so can either start or stop it, put it out of order, or break it, so a Black can sometimes, by a kind of empiricism, get results similar to those of the magnetizers, hypnotists, magicians, and alchemists of all times and places.

Without plan or method, the Sudanese magicians and sorcerers [252] have nevertheless not worked in vain. In the process of arousing the native's emotional temperament and keeping it ever aroused, they have created an atmosphere favorable to the rise and propagation of psychic phenomena. Any type of spirituality would benefit from this age-old process by which the Sudanese soul is all the better prepared to broaden its mystical tendencies toward the cult of the manes which the magicians have carefully kept within the material domain of immediate utility.

We have never heard of a single magician who, when he seeks to penetrate the invisible, has sought to understand its arrangement so as to regulate his own life with a view to attaining a privileged position in that world invisible to us. Each of them is merely trying to obtain a fragment of the universal energy in order to realize his worldly designs. Still, this continual striving toward the supernatural has often strengthened the feeling toward the manes through the spirituality that has been aroused. Thus, as magic loses its power, man's desire for the supernatural, lacking a goal, augments the cult of the manes until it goes on to something higher. Thus a new spirituality is created on the native plane, which is easily oriented toward revealed religions when they know how to receive it.

Nyana

794 776 Each brotherhood is founded on the cult of a spirit (nyana). What we call "spirit" to indicate its immateriality, the Bambara from another point of view calls "power," "master," "lord", etc., for such is the meaning of the words nya, nyana, nama, dyara, komo, faro, etc., by which he designates the innumerable "gods" of his pantheon, thus affirming his subjection to this invisible restraint upon him.

It is the magician who creates the nyana of the boli worshiped by the brotherhoods with which we are here concerned. His incantations call up a kind of echo from the invisible; his persistent and peremptory practices produce a sort of personification of his desire in the depths of the universal and diffuse energy, because he "names" the thing he wants. The nyana thus created, which he attracted by "naming" it, is retained by offerings and sacrifices, just as a person is seduced by presents. Finally, he forges a link with the nyana through communion. From that point on creature and creator are [253] so closely bound to each other that neither can refuse anything to the other; they form a single being whose visible aspect is completed by the invisible.

Judging from statements, concepts, and practices, this is the native belief as to the mysterious work of the magician. The latter creates as many nyana as he likes, and he draws at will on the invisible which he fashions and rules.

Boli

794 778 Mankind in general and the native in particular need to give material support to their speculations. The magician and the believer alike need to have at hand the nyana, this essence which is personified by being "named." Appropriate procedures make the nyana come to that altar which at the same time is its symbol and which the Bambara call boli (1).

1. Otherwise known as buri. It should be noted that in ordinary language the

784
778

terms nyana and boli are used interchangeably. This is natural enough since the latter is merely the symbol of the former.

Each nyana has a boli which in form and substance is peculiar to it. Anything may be used to make boli: horn or hair of the hare, hind, or cattle; nails or claws; animal venom or excretions. It is not unusual to find parts of a human body put to use. As the chronicle tells, the war drums of the ton-dyon' were elevated to the rank of boli and were then adorned with the craniums and jaws of human beings sacrificed to them. Often the ball tied to the end of a piece of rope or leather and used to beat the tabala [Tr., big drum] is a human hand which has been severed and wrapped in a leather cover. [727 782]

Certain of the boli, particularly those of the Komo and the Kono, are said to be made of a child's torso; those of the Tyi-wara and Nama are made of wood, and those of the Duga of horn.

All sorts of shapes are employed: men, animals, doll-like figures, balls, small crowns, etc. The principal boli, called boli-de-n-fa, is accompanied by subsidiary ones called boli-de.

The boli is also given sex: one is male, another female; and it is said that there is a kind of mystical copulation [254] from which at the time of initiation are born the spiritual sons of the nyana.

Among boli should be noted those made of forked sticks, such as the n-Golo and the Tyi-wara, both patrons of brotherhoods of young men (1).

771 1. If one makes certain comparisons, the forked stick seems to deserve special attention. Among the Khassonké, for instance, the soli-ma always build their seclusion hut (bire) with a forked post in the center. This post, called biri-makho (master of the hut), is a tree trunk chosen

171 and cut by the *gankurango* (magician-protector of the *soli-ma* among the Khassonké) because it is so placed in the forest that the normal progress of the sun follows the axis formed by the two branches of the fork. There is thus some relation between the sun and the forked tree called *biri-makho*. Perhaps the same relationship accounts for the sleeping position of the boys in the *bire*: they always lie with their heads toward the center post and their bodies forming the spokes of a wheel around it. During the *soli* ceremonies the same Khassonké *soli-ma* use a short wand forked at one end.

The forked stick with mystical significance is also found among the Koniagui.

It is not possible, given the present state of our knowledge, to be specific about the origin or significance of this symbol. For the same reason, we cannot say whether it can be related to the lyre-shaped stones found in the mysterious collection of rocks discovered in Gambia, in which there is thought to be discernible a clearly defined cult of the sun (cf. *Bulletin du Comité d'études historiques et scientifiques de l'A.O.F.*, 1920, No. 1).

791 778 To the European these *boli* are thoroughly repulsive objects. Since magic utilizes everything (2), all kinds of things are used to make them, and during the sacrifices, blood, hair, feathers, viscera, etc., are usually placed on the *boli*. The result is usually a repugnant sight. The native, however, seems to pay no attention to this repulsive aspect which so horrifies

2. And particularly things which are considered repulsive in ordinary life.

794 Europeans. The Black sees only the symbolic altar which he
778 venerates. Besides, in theory at least, the boli does not acquire its prestige in the eyes of the Black from its strange or bizarre nature; the fact that it is consecrated confers upon it its sacred character and its ritual use. That is why, in general (3), the destruction of a boli no more means the destruction of [255] the corresponding cult than destroying a statue of Buddha would mean the annihilation of Buddhism.

The making and consecration of a boli are matters not easily accessible to the profane. Here is what Raffenel's informant, Bouo, told him about a boli belonging to the Massa-si: "The sorcerers first sought a very rare tree. They approached it in a procession, dug a hole at its foot, and after invocations in an unknown tongue gathered parts of its roots with bizarre ceremonies. Using the same invocations and ceremonies, they procured some hairs from the tail of a black horse. So that these ingredients should answer their purpose, they had one of their number take off his trousers and shirt and then pick up the objects (1). The bark and the horsehair were placed in an earthen vessel and remained there for half a day over a hot fire. During this last day the proxy of the magicians prostrated himself, face to the ground, seven times seven times, while reciting prayers in a language which no one could understand.

---

3. I say "in general" because there are exceptions. The skull of a chief named Sama, who ruled over a village called Gniningo in the Gangaran area, was the boli of a cult created by that chief. When the skull was destroyed, that put an end to the cult, since it was impossible to replace this unique object.

1. It is common for a sorcerer to remove all his clothing for the performance of his duties.

794 778 "After the creation came the consecration. The Kouroubari and the leaders of the people witnessed it. A white ox, a red ox, and a red rooster were sacrificed for the occasion (2)."

2. Raffenel, *Nouveau voyage au Pays des Nègres* [New Journey to the Country of the Negroes], Vol. 1, p. 237.

246 The *boli* is usually hidden from the uninitiated; it is put in a sack or other receptacle, and except during ceremonies it is stored with other cult objects in a kind of temple often resembling a miniature native hut and called *nyana*-*bon*', "hut of the *nyana*."

776 Obviously there are differences between the various *nyana*, because peculiar practices call up unlike spirits. In any event, however, the captive spirit is, as it were, a slave of the magician, who treats it as such and even sells it, along with instructions for its use. There are magicians who go from place to place, making and selling *nyana* and other magic weapons, and 443 there are recognized markets where one can always [256] obtain the *boli* of the most popular *nyana*. The markets at Bélédougou, Bendougou, and Follona are especially well known.

Trade in Boli

794 778 438 The chronicle of Ségou tells that Biton, the founder of the empire, acquired his principal idols in the Bendougou region where the popular markets of Moribala, Kourbadougou, and Diali are located.

Itinerant merchants deal in all sorts of cult objects, and there are settled traders who are sometimes very well known, like a certain Minkoli who made *boli* and was so famous that his village is named after him: *Minkoli ka dugu* (village of Minkoli). I have never been able to find out, however, which village in the Bendougou area was the home of the famous Minkoli.

By such means the cult of a given *nyana*, once it has been created, spreads to some extent, depending on the degree

794 to which its creator chooses to reveal the ritual of initiation.

778 The head of a family, just like an isolated individual
438 or the head of a large community, will not fail to acquire, for a monetary consideration, exclusive possession of one of these powerful boli, which becomes his personal protector. Sounsan, the ancestor of the Massa-si, had with him the nyana n-Ka; Biton, the founder of the empire of Ségou, possessed several famous nyana: na n-Golo-ko (1), Nye-n-dinge du (2), and ba Kung-o-ba (3). [776] Generally speaking, these private cults cannot spread, but when their possessor becomes a powerful chief, they migrate rapidly. This is what happened to Biton's cults; his followers took up the worship of his idols.

794 When an individual becomes the acknowledged possessor of a nyana the result is an alliance with this nyana, which in the native language is called furu, the same word as that used for the
[833] conjugal union of a man and a woman. Indeed, the installation of a renowned nyana in its master's village gives rise to rejoicing [257] similar to that occasioned by a wedding; hence, the following expressions: a ye boli furu, "he is united with a boli"; a ye boh' furu gosi, "he has effected a union with a boli"; a-ta boli konyo kera, "he has celebrated the wedding of his boli." On the day of such festivals, the master of the nyana (nyana-tigi or boli-tigi, surrounded by his acolytes, offers dlo to his guests who have come to greet him and give him presents. At nightfall, when the uninitiated have withdrawn, the clergy and the adepts in a procession take the boli to the "sacred wood" where the first cult ceremony is held, characterized principally by dancing and singing.

1. Literally, na-n-Goloko, "the mother concerned with birth" or, freely translated, "the goddess who presides at birth."

2. Nye dinge du, "the deep orbit of the eye."

3. Ba-kung-o-ba, "mother of the great bush."

778 435 The cash value of boli varies considerably. At the most it is between 30 and 40 francs, payable in kind or in cowries. The cost is increased, however, by gifts to the seller and his acolytes who come to instruct the new clergy in their functions. As a result, considering the various kinds of refreshments, dogs, goats, and chickens, as well as kola nuts and millet beer (dlo), the price may actually come to 100 francs.

778 794 Since the nyana-tigi (master of the nyana) has full control over his nyana, he may admit anyone he likes to the benefits of his cult. Well-known cults have been much sought after, and as they developed, they became complicated. As the importance of a cult increases, its ceremonies are amplified and augmented in proportion to the number of people taking part in them. Initiation requires a fee, and a clergy becomes necessary. This is the way that these cults, established through participation, have given rise to associations which the Europeans call "secret societies" but which might better be called "brotherhoods," because of the spiritual filiation uniting the affiliates.

Mysteries and Liturgical Equipment

Everything that concerns the brotherhood of the nyana is shrouded in mystery; for various reasons, everything is concealed (do, as the natives put it). It is, indeed, a principle of magic that power exists only insofar as its essence evades the investigation of its adversaries. The uninitiated therefore, must not know the basis of the supernatural power of the nyana, because, if they knew, they would be able to acquire the means of [258] destroying it, resisting it, or at the very least rendering it inefficacious. Anything related to the nyana is bound to it and is, so to speak, an integral part of the nyana by virtue of consecration: the clergy and the liturgical equipment. That is why both are do and why every effort is made to hide them, in their magical aspect, from curiosity of the profane. By extension, however, all members of a brotherhood of any nyana of the boli in Bambara country are identified as do-u, "the hidden people."

794 Some of the clergy use a disguise when officiating in
[292] public; furthermore, the ceremonies are held only at night.

Finally, in the presence of the profane, the initiated
[198] use a special language for everything referring specifically to
the cult. The greatest secret of all is the name of the *nyana*,
[551] because anyone who knows the name has complete power over
the spirit it designates.

794 From the point of view of the disguised clerical body,
this secrecy is virtually impenetrable. A disguised person loses
298 his human personality and is withdrawn from the natural world.
It is an accepted fact that it is dangerous for those not affiliated
to intercept his glance through the tiny openings in the mask;
undoubtedly his person on that occasion is impregnated with a
fluid whose emanations are fatal to those who, not being
affiliated, are unprotected against them.

Some of these disguises include a headdress or mask
and for the body a kind of costume usually made of long strips
of vegetal material; is this, as has been suggested, simply a
means of dominating the herd of adepts and even more the pro-
fane through the terror such regalia inspires when seen at night
by the flickering light of torches and bonfires? It seems more
probable that one must put this matter on the plane of the
supernatural in order to understand it. Dangerous wild animals
[825 are believed to be incarnations of evil and powerful gods, and
776] an attempt is made to present an outward appearance consistent
with the terror merely seeing them inspires, in order thereby
to acquire the supernatural qualities that characterize them (1).

1. There is no doubt that some individuals, under the influence of the role of wild beast that they are portraying, have been led to commit actual murders during ritual observances. I have often heard this asserted in connection with the *dyara* (lion).

794 It should be noted that the costume, gestures, [259]
782 dances, songs, and music of the *dye-n-fa* and their acolytes

794 782 are all designed to attract and capture the god and, for this purpose, to transfer the officiant from our world to the supernatural one. I have never heard anyone claim that the costume and the various actions of the officiant were intended to counterfeit the nyana, nor that the boli in any way represented the native's idea of the god.

The Clergy

793 Even though, in theory, familial nyana are inherited, those worshiped by the brotherhoods are usually bought. The head of the brotherhood is called the nyana-tigi (master of the nyana) (1), whether he has inherited the office, been elected to it, or has imposed himself by virtue of being the most prominent founder of the brotherhood. It is he who keeps the boli, hence his title of boli-tigi, and who knows all the secrets of the cult. His duty is to direct the cult and to administer the brotherhood, and this gives him considerable local prestige.

The initiates of higher rank are called dye-n-fa-u, "masters of the truth." The nyana-tigi chooses his aides from this group, particularly the person who, "seized by the god" 787 791 (wara-mina-den"), becomes the "oracle" (wara-da). The role of medium requires special persons who can go into a trance under the influence of the animating spirit, and the wara-da has the duty of choosing and training the person who will succeed him or replace him, if the need arises (2).

All the initiates are to some extent diviners through practices which are peculiar to them, and the brotherhoods often

---

1. Ordinarily the word nyana is replaced by the specific name of the nyana, Komo, Nama, Nya, etc.

2. These dye-n-fa students are called soma-de (elder sons) in the Komo brotherhood.

793 provide instruction in deductive divination, which usually requires two years of study.

This clergy is recruited and formed by co-optation, and it includes, besides the persons already mentioned, the muru-kala-tigi (3) or "sacrificer," who kills the victims, and a dyeli or "herald" of the god.

794 The rank and file of the faithful are called nyana-den u, sons of the nyana (1) [Ed., see footnote 1 above]. In order to be accepted as nyana-den', it is necessary [260] to take an oath and to pay an entrance fee. The terms of the oath used in the brotherhoods reveal that, in sum, the nyana-den' promises secrecy, obedience, and solidarity, as we shall show in what follows. Certain aides of the clergy are selected from among the common run of the faithful, for instance, the da-ro-tigi or da-ro-ta-la, who is a kind of beadle.

The Treasury

The performance of liturgical ceremonies is not the only function of the clergy; it also constitutes a kind of council to administer the property of the brotherhood, for the cult is not gratuitous. First, admission to the brotherhood requires the payment of a fee, and the same is true whenever an individual is nominated or promoted to an office. Furthermore, an important contribution, in proportion to the individual's resources, is required for any important ceremony. Finally, fines are imposed on the faithful and even on outsiders as punishment for wrong doings.

794 -681 Fines assume many forms, whether they are to atone for a wrong committed by one of the faithful against the brotherhood or the god, whether an outsider is to be punished similarly for arousing the wrath of the nyana, or for reasons sometimes known only to the clergy who levies them. The nyana-tigi and

---

3. Literally, "he who holds the handle of the knife."

794 681 his acolytes are exceedingly zealous in discovering wrongdoings and the guilty parties and in requiring material proof of repentance, which they determine and try to multiply since they appropriate the whole profit, albeit abusively. Theoretically, these fines are not very heavy and are paid in kind (fowl, a goat, a dog, some kola nuts, millet, beer), but, when multiplied, they become a heavy burden for the debtor. He cannot evade this method of extortion, because his persecutors, in league against him, use every means, even criminal, to force him to pay.

794 421 426 Strictly speaking, all the property belongs to the nyana; it is by rights the common property of the nyana-den' and in principle is not to be privately appropriated nor alienated. It is to be used only for the needs of the cult, for assisting needy members, and in exceptional cases for loans to outsiders at exorbitant interest. For that matter, the nyana-den' who gets a loan from the common fund must repay it [261] as soon as his affairs take a turn for the better and, insofar as possible, add a certain amount in order to show his gratitude. It sometimes happens that an outsider is aided out of the common fund; this is a kind of charity which is both a good advertisement and extremely profitable.

794 421 The common property is not to be appropriated by any dignitary or member of the brotherhood for his own benefit. Although there is certainly not a single native who is unaware of this regulation (1), it is all too evident that abuses have led to extraordinary perversions. The clergy regularly appropriates the property of the nyana to its own use, and in order to increase the profit, they do not hesitate to commit actual crimes that enable them to exploit the terror they inspire, which they are careful to nurture and to reinforce.

---

1. Raffenel writes (op. cit., p. 239): "The victims' flesh and other objects become the property of the poor."

The Operation of the Brotherhood

794 A brotherhood is a spiritual family whose internal affairs are conducted like those of a community with natural filiation. The nyana-tigi has the role of fa, and the assemblage of dye-n-fa-u, reinforced by the initiated and the leading believers, serve as the community council. Thus, questions confined to the cult and to administrative matters are dealt with by the nyana-tigi acting alone or with his council, just like the fa in the community. Therefore, the description of the latter's duties which has been given above will suffice to explain by analogy the practices in the brotherhoods. There are, however, certain details peculiar to the brotherhoods, and these will be set forth in what follows.

The Cult

794 786 The cult is made public during certain ceremonies, of which the two most important are the one at the time of sowing and the other at the time of harvest. It is accepted as fact in the brotherhoods that at planting time the boli copulate so as to produce issue at the time of harvest, hence the hymn to Nama which says: "boli fyerela ka den' (the boli has flowered to bring forth fruit)." These ceremonies are accompanied by orgies [262] during which the celebrants, both men and women, are said to indulge in sexual licentiousness. It may be concluded from these two series of happenings that the rites seek by appropriate mimicry to encourage the fruitfulness of nature.

794 776 825 There are other indications which show that it is indeed toward nature that the rites are directed. In certain brotherhoods, notably the Kore, the costumed officiants who farm the cartege pretend to be wara-u (wild beasts), suruku-u (hyenas), golo-u (monkeys), and other terrifying inhabitants of the bush (1).

---

1. They are all called wara or sogo, terms used for all wild animals. It should be noted that every nyana is called wara (power, lord).

794 It is not rash to suppose that in this case they are symbolizing
776 the role, probably primordial and in any event primary, of
825 the nyana to control the supernatural and particularly malevolent forces of the bush. As a matter of fact, the most popular and important nyana are the protectors of the harvests which represent virtually the only property of the natives. One of the nyana is even especially concerned with agricultural work (2);

[461] 2. In the native vocabulary, "to work" (tya-ke, short for tyi-ya-ke) primarily means "to work in the fields."

this is Tyi-wara (god of agricultural work), ~~who~~ presides over the first clearing of the land at the beginning of the ~~winter~~ season.

In any case, whether the animal is regarded as the visible form of a spirit or, if one prefers, the perceptible manifestation of a supernatural force, the belief is strengthened by the common practice of the interdict (tne) and, still more, by the magical acts required of a hunter.

Another aspect of this belief is seen in the choice of an animal to represent the mount of the nyana dugu-da-siri.

It is for a similar reason that the brotherhoods usually
794 adopt the name of an animal: for the Nama this is usually the
825 hyena (suruku) (3); for the Komo, the hyena (suruku) or the

[552] 3. The hyena is often designated by the words nama-koro (old Nama) or suya-koro (old sorcerer) when the speaker does not want to use the animal's real name (suruku). There is a whole vocabulary for use to "avoid" the names that are dangerous to utter, and the name of the hyena is one of them.

elephant (sama); for the Dyara, the lion; for the Kono, the ostrich (kono-ba), etc. It is said that the cries, the shouts, and

794 the sounds of the [263] trumpets to announce the meetings
825 imitate the cry of the animal (1).

[534] 1. This is true of the Dyara. In the brotherhood of that name, a cry like a roar is drawn from an instrument made as follows: the hollow trunk of a palm tree is covered at one end by a tightly stretched skin; a long thong or rope runs down inside the trunk from the center of the skin; the operator pulls the rope tight, then lets it slip through his hand by jerks, and having achieved a certain facility, he succeeds in producing a noise like a roar.

000 Can it be that the costumes made of bark strips, the strange masks, and the mimicry of the people who wear them are connected with mysteries which are now unknown to us, either because they have been adopted without understanding and thus deformed beyond recognition, or because they are the last vestiges of far older cults, today unfathomable since they no longer exist?

Did Egypt inspire these cults, as some people believe? Or rather was Egypt herself influenced originally by a preexistent Black civilization whose last surviving traces she kept alive by altering them? This is an unlimited field for speculation.

Generally speaking, the cult is in abeyance on Monday
794 and Thursday of each week. The same days are holidays from
805 communal work and are left to the "poor people" for their own profit. There must be some connection between these two facts, and it should further be noted that, as a result, the religious week is reduced to five days. A question naturally arises, therefore, as to whether the week as now observed is truly native. It seems likely that the week is an oriental contribution, more specifically Islamic. It could be a coincidence that Islam organized slavery, and when a seven-day week was adopted, two days were allotted to the gens de poëste, as used to be said in France.

794 in France. The question is too complex, however, to be
treated here.

794 For important ceremonies, the faithful bring the *nyana-tigi*
782 a contribution in proportion to their means; each of them
brings grain, livestock, fowl, cowries, cloth, etc., and no one
is so poor that he cannot furnish one or more jugs of beer (*dlo*).
Everything thus collected is offered to the *nyana* at the general
meeting of the faithful through the intermediary, the *nyana-tigi*.
In accordance with [264] established ritual, the victims are
slaughtered and libations made. Then the *nyana-tigi* gives thanks
to the god and asks him to continue to protect his worshipers.
Finally, all or part of the food is eaten at a joint banquet. This
is a true communion, by means of which the god and his
worshipers on the one hand, and the worshipers among them-
[786] selves on the other, are closely bound together. These banquets,
which often last for several days, degenerate into orgies.

Internal Discipline

794 A result of the cult is that the brotherhood forms an organized
body in which each member is subject to a discipline
that may be summarized under these three terms: secrecy,
obedience, solidarity.

Secrecy is obligatory, especially for anything having to
do with the cult. Divulging the mysteries carries with it a
[688] punishment which, depending on circumstances, may vary from
a simple reprimand to condemnation to death, with fines,
flogging, etc., as intermediate forms. People who are known
to be unable to keep a secret are, on that account, excluded
from the brotherhoods of *nyana*; this excludes women, children,
certain people of caste, etc.

The obedience required of the faithful is shown by the seemingly fantastic rules enforced during the official banquets of certain brotherhoods. Members are fined for very odd infractions: sitting down, getting up, spitting, etc., before being given permission or being asked to do so. This is obviously a means of swelling the common fund, but it is also a means of making the adept realize that he is subservient to the sect.

794 Besides, this submission, if one may call it that, is
merely a corollary of the solidarity existing between nyana-den'.
This solidarity is shown to the profane whenever litigation
arises outside the sphere of the brotherhood; nyana-den' do not
[696] hesitate to bear false witness for the sole purpose of helping a
guilty co-member evade the sanctions of profane jurisdiction.

For failure to fulfill his obligations or for any other wrong considered reprehensible by the brotherhood, the nyana-den' comes under the jurisdiction of this brotherhood.

Fearing the supernatural retribution which his misdeeds
[783] [265] may provoke and seeing portents of it in apparently inexplicable things that cause him pain and surprise, the nyana-den' himself seeks pardon through some kind of expiation, determined by his own intuition alone or by one of the clergy.

On other occasions, the guilty person fails to denounce
himself, not merely by deliberate design but sometimes because
[787] he is not aware of his wrongdoing and its consequences. In that
case it is the wara-da (oracle) who reveals it in a trance.

794 The clergy is led, by means of self-accusation, denun-
695 ciation by witnesses, or accusations based on the most varied
imputations, to learn, to investigate, to adjudicate, and to
punish the acts of the faithful in material as well as spiritual matters. In the process of carrying out its duties in this respect, the clergy uses every imaginable means of obtaining information and of examination, but the proof of guilt that they particularly want is confession.

The various procedures used to persuade the accused to confess his wrongs may be put under three headings: oath, torture, and divination.

When an oath is taken, the boli is provided with an accessory known as the siri-kun' (knot), to which seven straws are attached. The person taking the oath (kali boli la, "to swear on the boli") then pronounces the usual formula: "May the nyana take my heart and my liver if I lie." When two people exchange this oath in order to vouch for their respective statements, they are said to have "tied the boli" (boli syen'), and it is believed that anyone who perjures himself will be put to death

794 695 by the god. It is conceded, however, that a perjurer may redeem himself by gifts and sacrifices whose nature and value are decided by the clergy.

Torture includes the most diverse types of moral and physical constraint thought to be efficacious in getting a confession: usually flogging, imprisonment, starvation, mutilation, and other tortures, often horrible. A method that often succeeds and that is commonly used is to offer up the unknown guilty party to the wrath of the nyana; it is not at all rare for the guilty person to confess at the first signs of discomfort due to auto-suggestion. It is so firmly established that the wrath of the nyana is always implacable and terrible that innocent persons, accused only for the sake of exploiting them, have been known to confess abominable crimes which they [266] never committed, for instance, in cases of accusation of sorcery.

[787] Divination comes to the support of the inquiry, and the deity's revelations are combined with endless spying among the members.

It goes without saying that these various methods of inquiry are not used alone; they are combined so as to provide mutual support.

On the basis of findings made in this way, the clergy passes judgment and has the sentence carried out in a despotic and often mysterious manner (1).

794 696 The penalties are varied and arbitrary; the importance of a misdemeanor is not determined in advance on the basis of specific characteristics. Rather, everything depends on the clergy's interest in the case, and this interest is influenced by the most appalling intrigues. Therefore, even though the accused is guilty of the most terrible crimes, he may escape punishment entirely provided he can satisfy the demands of the

---

1. Indeed, most of the brotherhoods owe their terrifying reputations to the fact that sentences resulting in death or disappearance have been carried out by ways and agents who remain mysterious.

794 clergy. On the other hand, an innocent man will be over-
696 whelmed by mental and physical torture if he is unable to give
his executioners what they demand.

681 Corporal punishment includes flogging, chains, starvation, torture, and death by all imaginable methods. Pecuniary punishment includes fines, confiscation, and pillage. The condemned man is also sometimes forced to labor for the clergy or is even enslaved by them.

Social and Political Role of the Brotherhoods

794 By its actions, the brotherhood, an artificial family,
776 tends to take the place of the natural family whose organization
it has borrowed and whose cult it has banished. It is easy to ac-
769 count for this.

The cult of the manes is the framework of the family and of the communities derived from it. The brotherhood has cleverly managed to set up such a cult by specially honoring the manes of its high priests, its famous members, and its eminent worshipers. [267]

Gradually, the *nyana dugu-da-siri*, protector of the territorial community, has given way to the *nyana* of the *boli*, a more powerful god since his territory is unlimited.

It is true that in spite of everything the tradition remains,
and even though they are largely over-shadowed by the *nyana* of
the *boli*, the manes of the ancestors and the *nyana dugu-da-siri* are
still venerated. Though sowing and harvesting are celebrated
731 with great pomp by the brotherhoods, still, when a disaster,
epidemic, or terrible drought occurs, sacrifices are promptly of-
782 fered to the manes and the gods of the place. People may fear
their anger, but they also have confidence in their good will,
and it is felt that their severity can always be tempered. On the
other hand, the *nyana* of the *boli* are supposed to be basically
evil, and their worship seems intended to ward off their malignity
rather than to obtain their favor.

794 This duality in religion brings about extremely compli-
621 cated interrelationships which bind the communities and

794 621 brotherhoods together, although the latter seem to dominate the former. These brotherhoods hem in the communities they dominate by abusively extending their jurisdiction far beyond its proper limits. Indeed, the faithful are not the only ones who are subject to the judgments handed down by the brotherhoods, whose clergy make decisions affecting not only members involved but often also third parties in the neighborhood or even people from neighboring or distant regions. The brotherhoods are tyrannical toward their own members and no less so to strangers, who often see no way of escaping persecution short of asking to be received into the ranks.

794 661 182 Thus, it is apparent how a brotherhood increases in size and in power as time passes. Each year it takes in the young people at the end of the *soli*, and as a result all the communities are at length absorbed by it live in it and for it (1). It

---

1. The following is a typical example.

[778] In the village of Marenna (Fouladougou Arbala), the natives belong to the cult of Ba-ku. This *boli* consists of a small sheaf of roots of the indigo tree. For every newborn child the *nyana-tigi* makes and consecrates a small Ba-ku, which he places in a gourd and puts in the temple of this *nyana*. At the time of the *soli*, the child becomes affiliated with the cult, takes the *boli* placed in the gourd for him at birth and henceforth wears it on his person. All the families in Marenna are thus closely involved in the cult of Ba-ku, being, as it were, engendered by this god to whom each person owes both physical and spiritual birth. Ba-ku comes from Sangaran, and his high priest is a Dyara; that is why he is invoked and called by the expression *Ba-ku Dyara Sangaran-ka*. The word *ba-ku* literally means "tail of a

794
661
182

goat," and, indeed, that describes the appearance of the little bunch of roots. It is possible that the word Ba-ku is merely the profane name and that the real name of the nyana is kept secret.

claims eminent rights over every person or thing it touches, as a consequence of the supernatural power of the nyana protecting them. [268]

So it is that the brotherhood, by what might be called divine right, comes to play a political role which is inconsistent only because it was not designed to play such a role. Let an ambitious man come forth, one who knows how to make use of the organization and its redoubtable power for his own ends, and the brotherhood then becomes the cradle of a veritable political state.

So it is that when the regular authority cannot firmly resist its encroachments, the brotherhood becomes a kind of high judge and uses that high office to establish a reign of terror which exploits the defections due to hatreds its own machinations have aroused and encouraged. This wretched [578] game naturally brings repercussions within the brotherhood itself: the nyana-den' are at each other's throats, and the grimmest dramas accompany the indulgence of the lowest instincts. The chronicle of Ségou bears witness to these facts.

It is, unfortunately, by no means unusual for the established authority to condone these crimes through weakness, interest, or membership in the brotherhood. As a result, innumerable regions have fallen into anarchy.

794
182
578

That is why and how the brotherhoods have been the cause of a great deal of unrest in the native milieu. As a refuge for escaped slaves, malcontents, vagabonds, intriguers, in a word, for all enemies of public order, the brotherhoods everywhere set themselves up in opposition to regularly constituted authority, and when they are unable to take it over, seek to thwart it by taking the head into partnership.

The dynastic convulsions of most of the Sudanese empires, especially that of Ségou, are in large part explained by the usurpations of these great brotherhoods of nyana.

794 The family, too, has been assailed, perverted, [269]
182 and disorganized, because dissident elements found support in
578 the brotherhoods that made it possible for them to combat their
"own people" in the communities and sometimes even to bring
about their downfall.

Moreover, within the community, they set up the cult of *nyana* of the *boli* in opposition to the cult of the manes. In associations of communities, the *nyana dugu-da-siri* has been gradually abandoned in favor of these imperious and jealous *nyana* of the *boli*. Although the latter could not entirely eliminate the former because of their failure to appropriate the rights over the land, they have nevertheless eclipsed it by their all-encompassing authority. So it has come about that *nyana* of the *boli* have been created who are honored as protectors of the citizens, although they do not own the soil.

It is remarkable that these destroyers of the natural family always seek to organize themselves as artificial families by taking on certain characteristics of the family: communities of inalienable spiritual and temporal property; communities of the dead and the living; the cult of the manes of the high priests, etc.

It is the secular action of these laboratories of magic that has most strongly shaken the foundations of native society. Only a strong power could contend with them effectively, and such a power has seldom presented itself. Islam has often been their implacable enemy and yet has actually strengthened them by introducing a knowledge of oriental occultism.

3. Some Important Brotherhoods

794 The cult is the essential framework of all the brotherhoods. One must know its principal characteristics in order to understand the organization and operation of any brotherhood. Each *nyana* has its special cult, characterized by particular traits, of course, but these differences do not change the basic elements in which all cults of *nyana* resemble each other.

Therefore, although descriptions of all the different cults would no doubt bring out an interesting variety of details,

794 still -- aside from the fact that this would not appreciably alter the broad lines already indicated -- the present state of our knowledge makes it possible to describe in detail only a few great brotherhoods which are widespread among [270] the Bambara with whom we are here concerned; these are based on cults of Komo, Nama, Kore, and Nya.

The Komo

794 173 The Komo is held in particularly high esteem in the Ségou area. According to the accepted legend, the Komo was brought from Mandé country, where it is supposed to have been introduced by El Hadj Moussa. El Hadj Moussa, having failed to obtain pardon for his sins during a visit to Mecca, turned to the study of magic. He obtained the Komo in exchange for a miraculous shirt (dloki) which some sorcerers had woven for him and which had the faculty of growing longer or shorter at the pleasure of its owner (1).

> 1. Another example of miraculous cloth, in that case a gift of the marabouts of Djenné, is referred to in the chronicle of Ségou in connection with the installation of Bakari, son of Biton (p.).

El Hadj Moussa is also supposed to have brought a no less miraculous canoe from Mecca, which is still preserved in the greatest secrecy in a swamp in the vicinity of Kouri, near Naréna, in Mandé country.

Finally, he brought back many boli. As he was coming up the Niger, some of them fell into the river and were transformed; the n-tigi (silurids or torpedo fish) is thought to be the result of such a transformation. [825]

According to another legend, the Komo was brought from the Orient, not by El Hadj Moussa but by Fa Koli Sissokho, a follower of El Hadj Moussa.

Whatever may be the truth of the matter, the Bambara are convinced that the Komo was brought to Ségou from Mandé

794 173 country and that the Bambara Massa-si, who had fled to Gadiaga, received it, in turn, from one Namori or Nyamori, a former slave who had been initiated into the mysteries of the Koré and who, for that reason, was named Kor-dyuga.

794 778 Over and above the general characteristics already noted, the Komo has the following peculiarities.

It is said that to make it perfect the boli of the Komo requires the body of a degeni, that is, of a very young boy. Thus, the body of the Komo of Tiguini (20 to 40 kilometers from Ségou) is said to be none other than the body of the grandson [271] of its founder. The same thing is said of the boli of the Komo at Kégué in Bani territory.

This boli-den'-fa is equipped with three iron tubes, and the whole thing is called tama gengen-ba (1). There is a horn at the end of one of these tubes, with an opening serving as a mouthpiece. The sound drawn from this trumpet of sorts by the wara-da announces a meeting of the Komo.

The usual accessories accompany the boli-den'-fa: korti, kana, and siri-kun', which we have already mentioned.

When not in use for ceremonies, all this equipment is [281] put into baskets similar to those used to transport cotton. The tama-gengen-ba are wrapped in a tiger skin. A hut with a conical roof, similar to the native huts, serves as a temple and holds all the regalia. It is called the Komo-bon' (hut of the Komo).

When he is on duty, the wara-da, "oracle" of the Komo, 793 794 778 is dressed in a special costume consisting of a mask and a cloak. The mask is surmounted by horns and does not cover the face, but rather is affixed to a stick hidden in the folds of the cloak; it goes up and down at the pleasure of the wara-da, who is completely

1. The term Komo dyoloro, meaning "chain of the Komo," is used in front of the uninitiated. The wara-da, oracle of the Komo, is called dyoloro samana, "he who drags the chain" of the Komo. In the special language of the cult, "sacrificing to the Komo" ~~is expressed~~ by an bi nege son' (we pay homage to the iron).

793
794 covered by the cloak made of feathers from guinea fowl and
778 chickens. Beneath this garb, the wara-da performs all sorts of
acrobatics. Skillfully manipulating the mask and the cloak during ritual dances, he gives the illusion, in the light of the fires, of a fantastic creature whose cries, transmitted through the horn, terrify even the initiated.

793 In addition to the wara-da, the clergy includes: a
794 Komo-tigi, high priest; some muru-kala-tigi, sacrificers;
a da-ro-tigi, porter, who announces and prepares for the meetings; and a Komo-dyeli, herald. There are also student wara-da, called soma-den' (literally, "elder sons" in the special language), who act as assistants, and finally, there are many other auxiliaries who form a cortege with the wara-da when he carries the boli in nocturnal processions. These people are grouped together under the term tie-den' or tigi-den' ("sons of the master" in the special language). Conspicuous among them are the ta-tugu who [272] carry the flaming torches which are so characteristic of the nocturnal processions.

When the wara-da makes known the revelations of the god, he speaks through the tube with the horn. Since he uses the special language and since the tube distorts the sounds, the Komo-tigi must interpret for him. It is the Komo-dyeli who shouts the revelation which echoes through the night.

794 At the time of the two great annual ceremonies, the
wara-da takes the boli and the other liturgical equipment to the
796 sacred grove. The Komo-tigi directs the ceremonies. The
sacrifices are entrusted to the muru-kala-tigi among whom are to be noted: the one who brings the victim and who, when the ceremony takes place in the temple, leads it across the threshold (1); and the one who removes the victim and carries its body

1. This door is then called nyena-ma don'-da, "entry of the living," in the special language, and the muru-kala-tigi who brings the victim in is called da-kuna-sigi or "master of the fatal (literally 'bitter') door."

794 over the threshold (2). The ceremonies are announced and
796

2. Then the door is called su-bo-da, "exit of the corpse," and the sacrificer is called moso-bolo (literally, "woman's hand").

[534] accompanied by a strident, wild orchestra made up [illegible] drums (denu-ba) which are accompanied by iron instruments, called kinge, consisting of pieces of metal that are struck against each other or shaken to obtain sound from the rings attached to them. The "cry" of the Komo, which the wara-da shouts through his horn, is accompanied by a kind of reed pipe played by his companions.

[782] There is nothing unusual about the offerings, sacrifices, or communion. The blood of the victim is used to wash the boli and the priests, as will be described for the Nama.

Processions held at night are always very effective, and they strike terror into the hearts of not only the uninitiated but also the initiated themselves. This long cortege, lighted by the torchbearers who shout and dash about like madmen while the wara-da gives the "cry" of the Komo, makes a very strong impression on everyone who sees or hears it (3). [273]

794
796
292

3. Elsewhere, the Komo meets in the daytime, and in the old days, notably in Bobo country, it was very popular (cf. Binger, Du Niger au golfe de Guinée [From the Niger to the Gulf of Guinea], Vol. 1, p. 379, and Monteil, De Saint-Louis à Tripoli par le Tchad [From Saint-Louis to Tripoli via Chad], p. 88). We have already seen that all the officiants in the brotherhood are called dou, "the hidden people," because of the disguises they affect. "The dou are persons ludicrously disguised, wearing clothing on which are sewed bits of da-fou (native

794 796 292 hemp), palm fibers, and leaves.
On their heads they wear a cap or
calotte, also made of hemp and
surmounted by a yellowish-red wooden
crest or a bird's beak, also of wood.
There are two holes in the calotte for
the eyes. These dou are given free
dlo by the populace which makes up
their cortege. They wander about the
village and fields day and night..."
(Binger).

794 [796] There is never any cult service or ceremony on Monday or Thursday.

The clergy serves as an administrative council for the property of the Komo-ya (brotherhood of the Komo) in accordance with the general principles already noted. The Komo-tigi of Tiguini, we have been told, is especially famous for respecting the principles which give the treasury of the brotherhood an exclusively fraternal character.

The Komo-ya are mutually independent, and all have experienced the kind of deviations which give rise to political action. The Komo has played a preponderant role in the affairs of the clan of Ségou, as is evident from the chronicle.

794 796 539 Young men are taken into the brotherhood during the harvest festivals. They appear before the circle of initiates, while those present sing:

Da woro-na nana,
Bolo-ko den da woro-na,
Toto man na ko la-nyini.
Sira bo nin' ye, ko dugu le den',
Sira bo nin' ye ko dugu le sira.

Translation: "The sixth day has come, the sixth day of the newborn (1), and there has been no accident. Let us show the

1. That is, those who have just been born to a new status through the soli or bolo-ko.

794 way to this child, the way which the village follows."

796 One by one they pass before the wara-da who, dressed 539 in full regalia, is supposed to receive their oath. The oracle places the tube with the horn on each boy's head in turn, and the following dialogue takes place:

--Mun' b'i kun' (What is it you have on your head?), asks the oracle.

A kala be n kun' (I have his symbol (2) on my head). [274]

> 2. Kala, literally, is the cylindrical part of a thing; here, in the special language, it is a way of alluding to the tube with its horn and thus is a kind of symbol of the Komo.

I y'a ye wa (Have you seen it [the Komo])?

Ne m'a ye (No, I have not seen it).

I y'a fo ma min'ye, k'i kun' ti ki' son' n'i bien' ta a k'ifa (If you speak of it to anyone, may it [the Komo] smash your head and may it [the Komo] take your heart and your liver and kill you).

A ka ne fa (May it kill me).

I sirila nyama-n-fu dyala la (You are bound by the bark thong of the nyama) (1).

[824]

> 1. An allusion to the strips of bark from the nyama tree (Bauhinia reticulata), which make up the common costume for concealing the officiants during the ceremonies. It is simply a way of saying: "Do you agree to join?" And the reply is equivalent to: "Yes, for as long as I shall live."

Ne si sirila a la (My life is bound by this thong).

Ni si m'a fo ma si ye, Komo k'i kisi (If you speak to no one about all this, may the Komo protect you [literally, "save you"]).

A ka ne kisi (May he protect me).

794 796 For a certain length of time, the new members are kept in seclusion while being instructed by initiates, especially the older ones, who see to it that they learn the songs and dances and become familiar with the special language. It is in the course of this instruction that they are given certain formulas to use for recognition among the *komo-den'* (sons of the Komo). The following are two examples and by no means the only ones; each *Komo-ya* has its own formulas, and in addition the adepts of the various *Komo-ya* are readily inclined to fraternize, especially when they are alone, far from their respective groups. In such cases, the identical principles of their cults bring them together, and they question each other at once:

[539] --*E b' a la wa* (Are you a member)?

--*M ba' la* (I am).

--*N'i b'a la, tyoko dyira r na* (If you are, show me the secret sign).

[201] This sign varies and is completely arbitrary. Sometimes it involves raising the hand with the fingers spread apart in a certain way; at other times, twigs are placed in a special pattern, and so on. [275]

The Nama

794 This cult arose at an unknown date at Missango (Bélédougou). The head of the Nama at Missango is addressed respectfully as *Fura-tigi-ba*, meaning literally, "grand master of the *fura* (*fura* specifically means "leaf" of a tree and, by extension, "remedy"). This is one of the expressions with double meanings which are so common in the brotherhoods: *Fura-tigi-ba*, the great physician, great savant, grand master.

The Nama is also called Nama-koro and Suya-koro, and a certain Nama is called Siriman 'fin'.

[778] Objects used in worship include; the *Nama-kon-golo-u* (craniums of the Nama), which are a kind of headdress, usually made of *linge* wood and shaped like fantastic birds; the *wara-se* (literally, "foot of the *wara*"), a small wooden board about a meter high with three horns affixed to it; and a similar board with two horns, called *nye-bla*.

794 [778] There are, of course, the usual accessories: kana, korti, siri-kun', pottery, bells, horns, and so forth.

Most of these objects are stored in a small hut called Nama-bon', similar to the native huts.

794 778 The ceremonies take place in a grove which is reserved for the purpose. If there appears to be not enough privacy in spite of the dense foliage, or for some other reason, a palisade (dyase) or a few straw mats are put up to form an enclosure. In the special language of this brotherhood, the term for offering a sacrifice to the Nama is dyase son' (literally, "to honor the palisade").

794 The assemblage of the adepts of the same Nama constitute a Nama-ya, Nama brotherhood. Persons who wish to form a Nama-ya appeal to an existing Nama-ya to obtain the secrets or, more accurately, the rules governing the brotherhood: the mysterious words and acts by which the god (wara) is summoned and made amenable to his worshipers; cult objects; organization and role of the clergy and of the common worshipers; the liturgy, etc.

The fundamental ceremony by means of which the priest and his god are united is called furu, "union, marriage," in the special language of the brotherhoods. [276] Once a year, through the furu of the Nama, males and females, the Nama-de-u (spiritual sons of the Nama) are born. Behind this realism, required for the ordinary adept, is there not hidden a profound meaning for the initiate; is not close union with the diety a "spiritual marriage" in all the great religions? Possibly the special language is not intended merely to hide secrets from the prying curiosity of the profane, but is also intended to hide a profound meaning, today unknown to almost all the initiates, but felt and perhaps even known, at least vaguely, by some of them!

793 794 In every Nama-ya there are various functions and ranks, corresponding to different grades of initiation. The grand master, Nama-tigi, is often the person who contributed the most for the expenses of founding the Nama-ya; he directs and watches over the cult and is therefore a feared and formidable personage.

793
794 He is assisted by the *dye-n-fa-u* (masters of truth), among whom those who wear the headdress called *Nama-kongolo* are the oracles (*wara-da*) of the Nama. Other assistants have the duty of holding the horned boards (*wara-se* and *nye-bla*) during the ceremonies.

One adept serves as factotum under the title *da-ro-tigi* (master of the entrance) (1).

This clergy is recruited by co-optation, and anyone named to it or promoted in it must pay for the privilage. The cleric is even more bound to secrecy than the common worshiper, since any indiscretion on his part would reveal the secrets of the cult.

794 The common adherents or the faithful are called *Nama-de-u* (children of the Nama), that is, spiritual sons of the Nama, but we shall see that when allusions are made during the ceremonies to a kind of material birth, this is plebeian mythology.

---

1. During the night when the Nama goes about the village to drive out sorcerers, the *da-ro-tigi* runs ahead of the *dye-n-fa* who wear the *Nama-kongolo*. Shaking his bell, he warns people off the road followed by the *dye-n-fa*, and he carries a torch to reveal the inquisitive. If he finds any such person, he warns the *dye-n-fa* in the special language to halt or to change their course. Then he questions the intruder, chases him off with blows, curses him, or, on the contrary, takes him into the group. He is thus truly "the one who guards the entrance," but he is like a concierge rather than a master who agrees or refuses to receive the visitor whom the concierge has admitted. We have pointed out an analogous emphasis in the title of *ton'-masa*, given to the head of the servants of the *ton'* even though the term literally means "head of the *ton'*."

794 In order to be Nama-de, the individual must be approved [277] by the clergy, pay a fee, and promise not to betray in any way the secrets of the brotherhood, never to injure a fellow-member and especially never to testify against him, to contribute to the expenses of the cult by making annual offerings in proportion to his means.

The adepts are legally responsible to the Nama-ya for all their acts. This spiritual family is infinitely more tyrannical than the temporal family since, in order to consolidate its authority, the clergy does not hesitate to use any means even criminal; fines are the most profitable for pecuniary returns. The totality of entrance fees, gifts, offerings, and fines constitutes the treasury of the Nama and hence of the Nama-ya. The Nama-tigi administers it with the help of the council of the dye-n-fa. It is current practice for this clergy to appropriate all the property for its own use. This does not, however, nullify the principle that any unfortunate adept, whatever the reason for his situation, has a right to ask for aid from the common fund on condition that he repay the loan with interest when his situation improves.

This material exploitation of the cult of the Nama can be seen in another form: although not an adept of the Nama, one can obtain its good offices for a price fixed by the clergy. The other means of exploitation, extortion and political deviation, discussed above, are likewise practiced by the Nama-ya.

It is the material role of the Nama-ya which really interests the majority of the natives. It is the showy exhibitions, accompanied by prolonged orgies that are mischievous, which have given the Nama, as well as the Komo, a bad reputation, albeit well deserved.

There is no real hierarchy among the Nama-ya. The Nama-tigi of Missango is held in particular esteem, and, in general, any Nama-ya keeps on good terms with the group that initiated it, but there is nothing like what might be called an archbrotherhood. On the contrary, any Nama-den' certainly has access to any Nama-ya, and this fact makes it likely that, under given circumstances, there may be very widespread solidarity. In the old days it was very useful to be a member of a Nama-ya

794 if one had to travel, since the Dyuola [Diula] and other travelers were at the mercy of the whims and banditry of the [278] Nama-den' (1) and only avoided them to a certain extent by claiming to be of the Nama-den'. Even Moslems often became adherents of the Nama; all that was required of them was absolute secrecy and a few gifts in exchange for the secret passwords.

794 796 782 There are two great annual ceremonies: one at planting and the other at harvest, the dates for both decided by the Nama-tigi and his council. Each of them involves offerings, sacrifice, communion, and a nocturnal procession. Young members are usually admitted at the harvest ceremony.

The initiates gather for the sacrifice before the temple (Nama-bon'). Only the Nama-tigi and his clergy may enter the sacred place; the common worshipers remain outside. The sacrificial animals are brought up. Two sacrificers (muru-kala-tigi), naked to the waist, stretch their arms toward the four cardinal points and spit three times in each direction. Two dye-n-fa, also naked to the waist, hold the pieces of wood bearing horns and face the faithful. Three times the sacrificers utter the cry, "ture-dyo," twice alternating this cry with another, "dyo-Nama." They invoke the god two times, and then they slaughter the victims, sometimes inside the temple and sometimes outside.

The blood is carefully collected in receptacles, and the ashes of straw are added to it. All the cult objects, especially the boli itself, are smeared with the mixture. The Nama-tigi and the other principal initiates remove their clothing to anoint themselves with the same mixture and do not put on their garments again until the blood has dried on their bodies.

[796 437] 1. Cf. Monteil, Binger, op. cit.; at the time of the great annual festivals of the Komo, all trading was halted for several days. Strangers could be sure of being respected only by claiming membership in the brotherhood. The same was true of the Nama.

794 The food is eaten by those attending the ceremony;
796 the millet mush which constitutes the meal is supposed to have been prepared by the wives of the dignitaries. This communion is the most important act of the ceremony.

When night comes, the procession of the Nama takes place. Its aim is to rid the village and its environs of sorcerers, the eaters of souls known as [279] suba (1), and to discover and destroy the objects called siri which bear witness to the measures taken by the sorcerers to harm the natives.

The ritual cries of ture-dyo and dyo-Nama break into the racket of trumpets and drums while the Nama wanders about. The dye-n-fa, wearing the symbolic headdress (Nama-kongolo) and preceded by the da-ro-tigi tinkling his bell to warn people to clear the way, is followed or surrounded by torchbearers (called ta-tugula-n-tigi) who shout a hymn in praise of the god.

[539] A dyigima so Nama fambali: He is our host, mighty Nama.
A fyerela ka den': He blossoms in order to bear fruit.
Suba yo, nin kera malo-ko ye: Oh! Suba (2), shame on you!"

One of the persons in his entourage shouts defiance and curses in all directions, aimed at the suba, the eaters of souls.

It is during this procession that the dye-n-fa, at the instigation of the bearer of the symbol, discover the siri-fen' (2) [Ed., see footnote 2 above]; these are the objects used by the eaters of souls to accomplish their sinister designs or are the remains of their macabre repasts. Here it is a knife, there a pot, elsewhere a bit of human flesh (or so it is claimed)! All these things are dug up amidst cries, exclamations, and imprecations by the whole company.

A suba discovered in the course of these proceedings is hotly pursued, and it is said that, exhausted by the chase and

---

1 See Chapter 7 below. [Not translated.]

2. Literally, the "bonds" (see Chapter 7 below). [Not translated]

794 overpowered by the god, he always comes to die near the temple.
796 When this happens, the wretch's corpse is left there, naked; his
clothing is thrown to the roof of the temple where it remains for
a long time as an example. The siri-fen' are also displayed near
the temple, within sight of the women, who are allowed to come
and look at them.

It is just prior to these solemn sorties of the Nama that the clergy begins the proceedings to admit the youths who have just completed the soli. In the center of a circle of the faithful in front of the temple, they take their oath of secrecy:

794 --I y'a fo ma min' ye, boli k'i son' ta, k'i been'ta, ka
796 [280] dun' i dyu fe'ka bo i da fe: if you speak to anyone, may
539 the boli take your heart and your liver, may he go in through your
anus and go out through your mouth.

--O ka ke: Let it be so.

-- Ni e ma fo ma ye, k'i kisi suba-u ma k'i son' si la, k'i son' keneya la: If you tell no one, may he protect you from the suba, grant you descendants, and give you good health.

-- O ka ke: Let it be so.

The new members must pay an entrance fee of a franc
and ten kola nuts and must go through a kind of initiation. For
a fortnight they live apart under supervision and are required to
learn the songs and dances under the tutelage of the clergy and
[198] old men. They are told the significance of the words with
double meanings, which constitute the language peculiar to the
brotherhood, and are also given the formula of recognition, of
which the following are some examples:

-- E b'a la wa? (Are you one of us?)

-- Ne b'a la (I am).

-- Fere tyon' kan' (Show the sign).

He shows it and explains it. The questioner then concludes:

--Dya! e b'a la, ko! (You are indeed one of us)!

794

The Kore (1)

[193]

The Kore is particularly popular in the Bani region, that is to say, the riverine area of this tributary of the Niger, in the part that is on a line with Ségou.

This brotherhood has the peculiarity of having a cult which honors the three divinities always worshiped by the Bambara: the manes, the god of the soil, and the nyana of the boli. [778] Therefore the site of the brotherhood is the chosen site of the god of the soil, usually a tree within a grove (Kore-tu, "grove of the Kore") near the village. A kara, that is, the little board symbolic of the dead, and a surku-kongolo (skull of a hyena), the boli of the Kore and for that reason called the Kore-kongolo (skull of the Kore), are kept here.

The clergy and its assistants form a large body of personnel that includes all of the faithful. [281]

In addition to the high priest, Kore-tigi, there are the "people of the kara" (kara-ma-u) and the persons who wear masks, called wara-u (1) (wild beasts) or sogo-u (savage animals), among whom are hyenas (suruku), lions (dyara), and monkeys (suba). The persons in costume, called Kor'dyuga (2), are for the

1. One also hears "Kote" and, in the Bani region, "Kwere." It should be noted that these three words, Kore, Kote, and Kwere, all have an ending which is frequently found in Soninké but not in Bambara.

1. The terms wara or sogo are usually applied to all those who have some function, from the suruku to the ngoni-sama.

2. The term seems to come from the Soninké language: Kore yugo or Kor'-dyuga, "man of the Kore." The expression Koré-duga-tigi is a corruption

794 of Kore-dyuga-tigi and has the same meaning.

most part strangely accoutered dancers, each of whom dresses
301 as his fancy dictates. As ornaments, the Kor'dyugs wear strings of beautiful red beans, which are inedible, called n-go ble. These beans are about the size of a large dragée and throughout the western Sudan are used as protection against evil spirits.
292 These dancers have a leader, the Koro-duga-tigi or Kor'dyuga-tigi, who is further distinguished by a kind of cloak made entirely of bits of reed stalks. On his head he wears a conical hat made of the same reeds, and in his hand he carries a long wand from which hang birds' skulls, packets of sorghum straw, gourd stems, etc. In addition to the dancers, the clergy is accompanied by
785 flagellants (bisa-tyi-la), torchbearers (ta-tugu-la-n-tigi), and people who lash themselves with bundles of thorns (the ngoni-sa-ma-u).

534 Of course, the Kore has its orchestra, which includes drums (denu-ba), a kind of castanet (kinge), and gourds filled with seeds or pebbles (nkude) and pierced with holes.

794 796 The cult has the usual ceremonies, with the two great festivals at the times of planting and harvesting. On these occasions the Kore-tigi officiates, as the nyana-n-son-na-ba does with respect to nyana dugu-da-siri. He makes the offerings, performs the sacrifices, and sets forth the requests at the foot of the sacred tree, after having thanked the god-protector. The kara and the Kore-kongolo are sprinkled with the blood of the victims; thus, the manes and the nyana of the boli are honored simultaneously.

764 There is always a meeting of the brotherhood when a Kore-de dies. There are offerings, sacrifices, and communion with all the offerings, which require one or more days of orgies to be consumed, depending on the importance of the deceased, because elders in [282] important posts like that of nyana-n-son-na-ba, etc., are particularly honored at their death.

Young men are admitted only once every seven years, and it is at this time that the ceremonies are most elaborate.

794 796 At dusk on the day selected, the clergy proceeds with the greatest pomp to the Kore-tu (grove of the Kore). The orchestra, composed of drums (denu-ba), bells (kinge), and gourds (nkude), leads the procession. Then come the high priest (Kore-tigi) and the kara-ma, "people of the plank of the dead" (kara), which one of them carries. Finally comes the dense crowd, motley and noisy, of wara-u, Kor-dyuga, bisa-tyi-la, ta-tugu-la-n-tigi, and ngoni-sa-ma.

Everyone is performing his role. The masked men imitate the beasts they represent; the costumed Kor'dyuga act like clowns; the flagellants make their switches hiss. Thus the crowd approaches the Kore-tu amidst a great din, but only the clergy may enter it. The bearer of the kara takes his place under the sacred tree. On orders from the Kore-tigi, silence falls for the reception of the Kore-de postulants.

The latter form a line facing the tree and the kara. They [516] prostrate themselves in the dust for the duration of the sacred hymn of the Kore, which begins with the words, "Dyante Kore de-u." When they rise, they are dyante-ma-u, "affiliates."

The members thus admitted remain in the sacred grove for 15 days and are not allowed to return to the village. There they are instructed by the "elders." Then they are assigned to the different groups of wara; theoretically, an eldest son enters the group to which his father belongs, while the rest of the sons may choose whichever group they prefer. In addition to his duties during ceremonies, each wara has a certain job: the hyenas (suruku) guard and patrol the sacred grove and question the inquisitive to learn whether they are members (dyante ma); the Kore-duga see to the maintenance of the grove, clearing its environs in order to guard against the grove's being damaged by brush fires.

794 796 786 The offerings and the sacrifices, and then the communion repast, follow the ceremony of admission and are accompanied and followed by dancing and singing. The orgy then goes on for several days, as long as food remains. The various groups assemble for their dances, and the ta-tugu-la-n-tigi start the proceedings. With a flaming torch [283] in each hand, they chase each other, singe each other's backs and chests, and in the

794 process, let loose a rain of sparks which the Kore-duga zealously
776 put out with leafy branches. Then each dancer, carrying what
786 is left of his torch, kneels before the drums, making an obscene
gesture which arouses the laughter of the onlookers and giving
the cries, roars, or laugh of the "wild beasts." Elsewhere, the
nyoni-sa-ma are roaming among the drinkers, tearing at them-selves with thorns. Flagellants lash themselves with switches
[785] that leave cuts from which the blood flows. They stiffen themselves against the pain and keep up this cruel sport, which once
again the Kore-duga mitigate by binding up the wounds.

There appears to be no doubt that during these orgies the most shameful excesses are committed without the slightest restraint.

The Nya

794 This brotherhood is highly esteemed in all the Bambara villages in the cantons of Say and Karadougou. It is less common in the canton of Séladougou; in the canton of Saro, five-sixths of the villages are loyal to it. It is rarely found in Nyansannari, and outside these areas in the circle of Djenné, there are only a few scattered Nya brotherhoods in the Bendougou and Ségou areas.

The cult arose in the Bendougou region. As has been
[443] noted above, the villages of Moribala, Kourbadougou, Diali, etc., are market villages where all the boli are found, together with directions for using them.

778 The boli of the Nya consists of a piece of wood from 25
to 30 centimeters in length and from 10 to 15 centimeters in
794 height and width. It is wrapped in an absorbent material, usually cotton. The blood of the victims and the liquid of the libations are poured on this boli, and then hairs or feathers and bits of entrails, eggs, and kola nuts are stuck to it, giving it a
repulsive appearance. It is true that the boli is often concealed
[281] from inquisitive eyes by putting it in a container made of an old
piece of the hide of a she-goat. However, since the container is given the same treatment as the boli it contains, it is just as disgusting.

794 This boli-den'-fa is provided with the usual boli-de:
[778] kana, korti, siri-kun', etc. [284]

[346] A hut with a conical roof serves as temple (Nya-bon').

An orchestra accompanies the ceremonies; it includes
[534] a kind of harp, made by the natives and peculiar to the Nya,
plus large numbers of the usual drums, bells, and trumpets.

Since the Nya is acquired by purchase, the high priest (Nya-tigi) is theoretically the person who contributed most generously to this purchase. The office may also be attained by inheritance or by election. The truly religious role, however, is that of the wara-mina-den', the medium through which the god reveals his will or his desires and who is, therefore, the oracle (wara-da) of the Nya. A certain amount of training by appropriate methods is necessary to acquire the degree of extra-lucidity claimed by the wara-mina-den', and that is why they are recruited by co-optation.

794 Under the influence of the Nya, the wara-mina-den' falls
into a trance. His speech, hesitant and strange, is incomprehen-
787 sible to the common people. The Nya-tigi then approaches to receive and to interpret the oracle. The inspiration of the wara-mina-den' may be spontaneous or it may be provoked and deliberately sought by him. For example, when a person dies, the wara-mina-den' questions the Nya, either at the request of the interested parties or of his own volition. For this purpose, he retires to the temple (Nya-bon'), concentrates on the point to be clarified, and after meditating, withdraws (1). He then sometimes falls asleep, and while he sleeps, the Nya reveals the truth to him in a dream. On other occasions the wara-mina-den' falls into a trance, and the spirit speaks through his mouth. One way or another, it is learned whether the death is to be attributed to the Nya and, if so, why. Or it is made plain that it is the work of the suba and under what form, human or otherwise, they are hiding. Or, finally, it is learned whether some other nyana struck down the deceased.

1. These details were given to me by a wara-mina-den' of Soun-Bambara.

794 [787] Furthermore, every wara-mina-den' is able to read the will of the Nya and, more generally, to reveal the acts of the invisible by means of the divination practices which we have already mentioned.

[782] The sacrifices are performed by the muru-kala-tigi, and a dyeli (herald) serves as factotum, just as in the other brotherhoods. [285]

794 796 The faithful are initiated and called to participate in the cult to an extent determined by the clergy; they are called Nya-ko-den'-u, literally, "those who follow the Nya." In order to be admitted, an individual must give a chicken and 120 cowries. The next day, in the presence of the Nya-tigi and the wara-mina-den', the chicken is sacrificed on the boli by the muru-kala-tigi. The candidate is present, and in his behalf the Nya-tigi asks the Nya for protection against the suba, snakes, korti, and the evil eye. Then the neophyte is led to the sacred grove to be ritually purified with consecrated water contained in a vessel used exclusively for this purpose (1).

[783] 1. Every year at the time of harvest, the clergy undergoes ritual purification by washing in the sacred water. When a Nya is inaugurated, this purification takes place at the first harvest after the installation.

[731] The two great annual festivals are celebrated at the times of planting and harvesting. Similar ceremonies take place in connection with important events (epidemics, public catastrophes, etc.). For these ceremonies, during which the Nya is supposed to give revelations about the event in question and to answer various other questions troubling the faithful, the wara-mina-den' undergo special preparation and at the proper time drink a very [273] heady beverage (2) which, they say, brings on their extra-lucidity.

[641] 2. I learned most of these details about the Nya during a criminal trial brought against the wara-mina-den' of Soun-Bambara,

794
796
273
[691]

> near Djenné. The son of the chief of that village drank the special liquid, in spite of the fact that the wara-mina-den' had told him not to do so, and died. The latter was accused of having poisoned him, but when he explained the circumstances before the native tribunal, he was acquitted.

It is said that this drink is made by soaking any sort of root found while digging graves and seasoning it with pepper, salt, and red peppers. The beverage, which is highly intoxicating, is ritually consecrated.

794
796 Excited by this beverage and by the songs and dances of a crowd which is itself warmed with drink, the wara-mina-den' during major festivals acts as a visionary who freely reveals the will and desires of the god. On the evening before these important ceremonies and for several evenings before that, all the clergy and their aides meet for a kind of rehearsal of the dances and songs. It is then that the young men prepare for the major roles they will later play. The [286] wara-mina-den' is particularly concerned with the training of the man who will replace him in case of need.

There is nothing of special interest to note about the brotherhood's treasury, which is acquired and appropriated just as in other brotherhoods. The political action of the Nya and its relations with the communities are also such that they require no special attention. [287]

Chapter 5

The Clans

1. General Considerations

631 It is usual to use the word "empire" or "kingdom" to describe the form of government of most of the Sudanese states and particularly those founded in Kaarta and Ségou by the

631 Bambara, with whom we are here concerned. Each writer, however, uses these terms to refer to an ill-defined type of authority, sometimes without even attempting a critical comparison with similar institutions in our own countries.

This uncertainty is accompanied by other such doubtful similarities, which result in confused conceptions. Is it not common to speak of feudalism, of a feudal system, to describe the kind of hierarchy among various native chiefs? In the Sudan, however, there is no connection between man and the land com-
423 parable to that which was the basis of the feudal system. Indeed, no such meaning is possible, since the Sudanese does not recognize any right of ownership of land. Therefore, political ties between native chiefs are never based on land; how then can one speak of a feudal system?

614 621 631 As a matter of fact, the social unit is the community based on the family; it develops into a patriarchy and expands into a tribe and a people. Its members are united by blood ties, which are confirmed by the ancestor cult. [288]

Since they are proud and jealous of their freedom, communities seek to remain independent. Their relationships, however, determined especially the occupation and exploitation of a common territory, force them to give up this independence, and joining together in the same cult, the sign of their spiritual solidarity, they form a dugu (1).

1. This word is not without ambiguity. On the one hand, it means "that which is below," hence, "the soil"; on the other hand, it means "place," "residence," or "at the home of." It is understood to mean "territory" or "country" occupied by a human collectivity, and by an easily understandable deviation, it likewise designates the organization which governs this collectivity in relation to this territory.

614 621 631 The dugu have definite territorial domains, and they, too, prefer to live without the subordination of any one of them to the others. There are relationships between some of them, such as some being offshoots of others and, due to proximity, many matrimonial unions have bound them together.

Unavoidable necessity also often forces the dugu to form leagues, coalitions, or more often associations called kafu' (literally, "union"). Depending on the circumstances, a chief is elected by the association or he usurps the authority over it. This sometimes results in the creation of a political or administrative organization. The Ségala area, also called Sénébala, is an example. "It has a local history of several centuries, hereditary chiefs of several dynasties, social and matrimonial bonds and customary institutions which have persisted for generations; it is a nation and a fatherland" (2).

2. In Marty, Etudes sur l'Islam et les tribus du Soudan [Studies on Islam and the Tribes of the Sudan], Vol. 4, p. 105.

614 631 661 It also may happen that someone who becomes a chief will be so enamored with the exercise and the profits of power that with the support of his followers -- relatives or others -- he will manage to retain permanent control. This association is what we here call a clan; the Bambara designate it by the word ton', applicable to any association.

As an organism of authority, this clan may be defined as an oligarchic government founded for the sole purpose of subjugating, by any means, the individuals it can reach for the sake of exploiting them. Those who are enfeoffed to this government are called "the people of So-and-So" or "the people of such and such place" by the Bambara, as by other natives, [289] for example: the Massa-si-u (1),

1. From another point of view, Massa-si-u means "descendants of Massa," and hence, "the tribe of Massa."

614 631 "the people (of the clan) of Massà"; the Segu-n-ka-u (2),

> 2. From another point of view,
> Segu-n-ka-u means "the people of
> the country of Ségou."

"the people (of the clan) of Ségou."

104 128 Since we are always obsessed by our own system of organization, these terms appear in our writings as village (dugu), canton or province (kafu), and empire (ton', which is a clan).

Because of the convenience of expressions that are familiar to us, we shall use this terminology in this study, and it seems essential to define briefly the value of these terms in native society in order to avoid ambiguity which, to say the least, gives rise to distorted delusions.

173 563 631 In Kaarta and the Ségou country before the time of the two great clans whose history we have given and whose development and operation we are about to describe, there were dugu which usually had no connections or at most were joined in some ephemeral kafu. These kafu were composed of a majority of Bambara mixed with Soninké and people of other races. The Soninké dugu were noted for their prosperity, sometimes even wealth, and this gave them a degree of pre-eminence over the Bambara dugu. This prosperity rested on the labor of a slave population that the Soninké had managed to acquire for the most part by commercial dealings.

This de facto hegemony usually had no corresponding political or administrative organization; its only outward sign was the scorn with which the Soninké regarded the less fortunate Bambara and, conversely, the sullen hostility of the Bambara toward the rich Marka (as they called the Soninké). As a consequence, local quarrels broke out from time to time which sometimes developed into bloody conflicts. The early history of the Massa-si clan is a good example of this state of affairs, to judge by the record in the chronicle cited above.

173 631 The Ségou-Kaarta regions, under the authority of Mandé and Songhaï clans, were in this state, in semiobscurity because they were outside the zone of direct administration by these clans.

173 631 Their people, [290] except for the payment of required tribute, lived as they pleased and followed their own customs as long as the latter did not offend the dominant clan.

2. Clan of the "People of Ségou"

Development of the Fla-n-ton' of Ségou-koro

575 561 According to the chronicle cited earlier, the origin of the clan of Ségou must be attributed to the development of a fla-n-ton'.

Those persons who have undergone the rite of soli together are united in a fla-n-bolo (band of peers); the fla-n-bolo of three consecutive soli form a fla-n-ton' (assemblage of peers). The members call themselves ton'-den' in relation to the association, and fla-ni in relation to one another.

In each fla-n-ton' there is a ton'-tigi (head of the assemblage) elected by the ton' den', who is just as likely to be a wolo-su (slave born in the house) as the son of a notable; a dyala-tigi (distributor), likewise elected by the ton'-den', is especially charged with the distribution of food for the group's banquets and with the enforcement of regulations; a ton' dyeli is a kind of beadle appointed by the ton'-tigi who has him make preparations for meetings, assemble the members, announce orders, etc., and he is usually a young person of caste. There are people of all races and of all ranks in the fla-n-ton', and in the association there is theoretically, complete equality among them. Indeed, this equality explains the term fla-ni-u (peers) which they use among themselves.

In principle the aim of the fla-n-ton' (1) is to establish

1. As we have noted, there are fla-n-ton' for women as well as for men, but we are not considering them here; their role is insignificant from the present point of view.

575 561 a sense of solidarity among the ton'-den'. In reality, the bachelor ton'-den' are principally concerned with amassing as much food as possible for the sole purpose of treating themselves to copious and merry banquets from time to time; for this purpose, all means are acceptable. Each member brings to the group whatever he can lay his hands on; in addition, the society assesses its members for contributions to swell the common fund. [291] First, there are the entrance fees and assessments in kind, particularly of grain. Then there are fines for infractions of the rules, involving penalties whose purpose is simply the enrichment of the group's treasury. At certain meetings, for instance, the most ordinary acts may not be performed unless permission has been given by the ton'-tigi or the dyala-tigi. A member who squats, rises, speaks, sneezes, or laughs before being authorized to do so is fined. Finally, the society goes on organized hunts, and the game thus acquired is distributed among the members on the basis of strict equality.

[527] Ordinarily the ton'-den' meet twice a week, on Monday and Thursday; these are the free days allotted to the poor people (fantan'-u), that is, people who are wholly under control.

The ton'-tigi can make no important decision without the prior advice and agreement of the ton'-den', but this does not mean that his role is negligible. His initiative determines the orientation of acts, and he later sees to their execution. Therefore, if he is a clever man, he actually has almost sole command over an organization capable of exerting powerful pressure on the native milieu, which by nature is amorphous, because a fla-n-ton' is not an isolated group. It is linked with the one that preceded it and the one immediately following it by a kind of solidarity, so that native society, from this point of view, is made up of an uninterrupted series of fla-n-ton' closely bound to each other, since the same chain of relationship prevails for women and since every male fla-n-ton' has a brotherhood relationship with the corresponding female fla-n-ton'.

[627] If a difference arises between members of the same fla-n-ton', the "elders" of the preceding fla-n-ton', i.e., the one immediately older, intervene as conciliators to settle the quarrel.

575 561 628 When differences arise between fla-n-ton', an arbitrator is chosen by these fla-n-ton'; in some regions, there is even an arbitrator designated in advance.

Among all these fla-n-ton' the most conspicuous is the one having the largest number of young bachelors known as "the young masters" (kamalen'-u). Being much given to idleness, the kamalen'-u are troublemakers and rebels who seek all the [292] material pleasures and devote their talents to opposing the fa, the bina, and those who, as masters of the community, impose on the young the whole weight of an authority which is absolute and often niggling.

This explanation makes it plain that the post of ton'-tigi is no sinecure. In order to maintain his role honorably, the ton'-tigi must be capable of exerting his authority in subtle and shrewd ways, for the ton'-den' are touchy and undisciplined, and they are quick to claim the equality which is the basis of their association, even to the point of egalitarian mania or egalitarianism. Therefore, it is interesting to note that the regulations, fantastic at first glance, which inflict penalties for performing the most trivial acts are actually very effective; they correct in fun, but they represent a kind of restraint that encourages the development of discipline. Breaking with ordinary life, they tend through repetition to form habits which taken together make 661 up what we call esprit de corps. In any event, the development which we are about to describe shows conclusively that to maintain and conserve his power the ton'-tigi must exert authority by dissimulation, by persuading those most easily offended that he is subordinating his own acts to their wishes and at the same time appearing to the faint-hearted as an imperious and audacious leader. Furthermore, he must render service to everyone and know how to turn projects and adventures, even the riskiest, into profit for the community.

Since he is the target of the hostility of the elders, who often suffer from the activities of the ton'-den', and since he is constantly envied by some of these same ton'-den' for his success, he acquires the kind of experience which makes him a crafty and sly politician, completely devoid of scruples.

*173 We shall see how Mamari (called Biton) Kouloubali managed to prevail over the tyrannical egalitarianism of the

*173 fla-n-ton' and to rise step by step to absolute despotism.

The son of a poor Bambara farmer, Mamari Koulouballi was chosen ton'-tigi by his "peers" because he was strong, brave, and lucky (1).

His fla-n-ton' had two hostile factions, [293] poor Bambara and well-to-do, even rich Soninké, which led to conflict. The Soninké resented a Bambara ton'-tigi, and the Bambara derived a certain amount of satisfaction from humbling the arrogance of the Soninké.

The most famous of the latter, Kassoum Bouré, son of the chief of the Soninké dugu of Dona (1), tried by all possible means to force Mamari to resign his office of ton'-tigi so that he could replace him. This constant intrigue was aggravated by an increase in the cost of fines. It is true, of course, that fines imposed on ton'-den' are an accepted source of revenue for the fla-n-ton', but they consist solely of foodstuffs, especially millet which is used to make the native beer called dlo in Bambara. According to the chronicle, however, through the influence of Soninké machinations, very considerable fines were imposed, and Mamari himself was given a fine of 80 (2) head of cattle. It was a triumph for Kassoum, because such a fine, far exceeding Mamari's resources, put him in a critical position.

1. According to legend, he was regarded as well-versed in occult lore and dealings with genii. Legend, however, always attributes remarkable qualities to its heroes.

1. Better known under the name of Markadougouba (literally, "great village of the Marka").

2. The figures have only relative significance, of course, and they vary with the different traditionists.

*173

In order to extricate himself from this crisis, Mamari appealed to his sister, Sana-ba, wife of an important chief, Wara Dyara, whose residence was at Dina on the Niger, upstream from Ségou. Sana-ba offered Mamari her gold jewelry to clear himself, but, again at the instigation of the Soninké, the jewelry was refused in order to force Mamari to declare himself insolvent and thus to bring about the separation of the ton'-den'.

The chronicle reveals in detail this internal struggle which was destined to have far-reaching consequences. In the end, the matter was settled by the "elders" who recognized the original cause of all the trouble. They advised the separation of the two antagonistic elements. This advice was followed, and two fla-n-ton' were formed: one composed of the Bambara with Mamari as ton'-tigi, and the other of the Soninké under Kassoum.

Mamari's fla-n-ton' resumed its normal life once more. The ton'-den' met on Monday and Thursday of each week. [294] They prepared their own meals from what they obtained by hunting, but Mamari's mother provided the dlo and mead. In order to reimburse her, each ton'-den' was assessed a donation which, because of its destination, was called di-songo (price of honey).

These festivities and the pillage required to support them angered the "elders," and the fa, Si[illegible], Mamari's father, ordered his son in the presence of a blacksmith to give up this disgraceful way of life. The young man made use of this threat to persuade his companions to help him build an independent dwelling. This house was erected at Ségou-koro on the spot where the fla-n-ton' usually met and where, later on, was built that part of Mamari's residence -- by then he had become fama of Ségou -- which was called Biton' blon da' (entrance of the house of Biton) (1).

[172]

1. In 1902 I was shown the last vestige of this structure, a square pillar of sun-dried brick in the last stages of disintegration.

From that time on, the fla-n-ton' had a reputation that attracted everyone who was anxious to escape from the overly

*173 strict limitations of native society. First of all there were poor wretches and slaves. Drawn by the good food and the certainty of escaping from the authority of their masters, they abandoned themselves completely to the fla-n-ton' and became its slaves; these were the first ton'-dyon' (slaves of the ton') (2). As is the case with everything that had to do with the ton', Mamari had absolute authority over them. He chose one of them to call the ton'-den' to meetings by blowing a trumpet; this person was called ton'-masa (master of the ton') because his summons was [687] so imperative that anyone who failed to obey was liable to a fine of 20 jugs of beer (dlo). Furthermore, the ton'-masa was a kind of head over his congeners; he transmitted Mamari's orders to them and supervised the execution of them.

The ton'-dyon' were not the only ones who worked for the ton'. Just as the ton'-den' had built a dwelling as ordered by Mamari, they likewise undertook the cultivation of a field of millet.

In short, organized and disciplined, Mamari's ton' prospered. This prosperity aroused the envy and hatred of the [295] fla-n-ton' of the people of Doua, who slyly tried to bring about its downfall. Kassoum first tried to bring about a reconciliation in order to reunite the two ton', but he ran up against the opposition of Mamari, who wanted nothing further to do with these dangerous confreres.

Kassoum changed tactics and encouraged a series of reciprocal invitations between the two ton', which narrowly missed causing serious fights. Mamari, however, managed to keep the situation in hand.

The fields of the ton' produced a fine crop, and Mamari gave half of it to his father, advising him to use it for generous gifts to the fla-n-ton' so as to strengthen his son's influence over his followers. The old man was deeply touched by his son's behavior; he died soon afterward. The chronicler notes that on this occasion Mamari once again managed to extricate himself

---

2. The word ton' will henceforth be used as an abbreviation of fla-n-ton'.

from grave danger; his father had been on the point of putting a curse on him for having evaded his authority and for living on the fringes of society.

The ton'-den' paid funeral honors to fa Sine. In accordance with the usual custom, they celebrated for seven days in front of the old man's hut. Then Mamari persuaded them to build a wall enclosing the huts belonging to his father and mother. It was agreed that the part of the enclosure which had been occupied by fa Siné would henceforth be reserved for people from Doukounna passing through Ségou.

An event of the greatest importance then occurred.

After a quarrel with Mamari, Kassoum fined himself 100 jugs of beer (dlo) and swore that he would force Mamari and his followers to come and drink them. All his entreaties, curses, and threats being in vain, at the beginning of the winter season Kassoum and his followers took up a position near Ségou-koro at Ségou Si-do. By all sorts of stratagems they managed to put a stop to the work of Mamari's men in the fields, a common procedure among the natives to bring enemies to heel.

A year passed without any improvement in the situation. Mamari went to Dina to solicit the cooperation of his brother-in-law, Wara Dyara, through the good offices of his sister. He returned to Ségou at the end of three months, discouraged by his lack of success. He was overwhelmed by the complaints of his followers, and at [296] their insistence he asked the people of Doukounna and Banankoroni to try to effect a reconciliation with Kassoum.

Kassoum refused to negotiate, and the quarrels grew more heated. One day Mamari's people made off with the wood used for a stockade by Kassoum's people and took it to Ségou-koro. The next day Kassoum's followers recovered their wood in broad daylight and burned the dwellings of Mamari's ton'. During the ensuing fight one of Kassoum's men was killed.

In order to avenge this murder, Kassoum's father declared that Mamari and ten notables from Doukounna and Banankoroni must be handed over to him. This claim, of course, resulted in endless palavers.

As the native expression puts it, "the words had gone on for eight months" when, after the death of Wara Dyara, his

*173 eldest son appeared with an imposing array of followers to return Sana-ba to her family and to get permission to have her as his own wife. Since the death of his father, Fa Sine, Mamari was the fa over Sana-ba, and he made good use of this circumstance.

Indeed, he succeeded in drawing into his ton' (1) both the new chief of Dina and the Bambara chiefs from the left bank of the Niger who had come to Ségou to pay their respects to the widow of the redoubtable chief of Dina. These new ton'-den' put their armed men at his disposal, and with the support of these additional forces, Mamari accomplished two enterprises which actually mark the real establishment of the clan.

First of all, he repulsed the attacks of the Soninké and, taking the offensive, chased them out of Doua. He had his troops pursue them to Kirango where the fugitives had taken refuge, and his followers laid siege to the place. The hegemony of the Soninké was henceforth overthrown.

Mamari was well aware of the extent of his success, which gave free rein to his ambitions. He realized that to consolidate his authority once and for all he would have to take advantage of this situation, especially since he had powerful allies at his command. Therefore, he resolved to make his ton'-den' recognize him as fa. Since this was a risky operation, he prepared for all possible eventualities.

With the "young men" deliberately kept occupied at Kirango, he [297] summoned to his house the "elders" who were fa over these young men. They came. He said that he wanted to interview them two by two, but they refused, fearing some trick. He asked them to settle near him permanently as a kind of senate, which was a disguised means of keeping them at his disposal. They again refused, being frightened by his insistence and saying that they had to return home to supervise the work in the fields. Mamari realized that their decision was irrevocable and that they would always stand in the way of his projects. He

---

1. That is, he ensured an effective alliance.

*173 had foreseen this, and to eliminate this obstagle, he had had a well dug, into which the "elders," were thrown, killed at his order by some of his men who had been posted nearby for the purpose.

Mamari then took another step. He recalled the besiegers from Kirango, and when they arrived, he ordered them to wear the ton'-dyon headdress. When they protested, he told them that their "elders" had been massacred because they opposed his wishes. Overcome by force, the young men were transformed from ton'-den' to ton'-dyon'.

It is said that at this moment Mamari could not resist making a public display of his triumph, and his words show, with emphasis and some temper, what had so far been accomplished: "We shall no longer eat the pistachio nuts of the ton' together, nor shall we drink the beer of the ton' together; I am the son of Allah..."

With this situation in hand, he was no less audacious and successful in accomplishing a new coup. He asked his allies -- who had so successfully aided him in the outcome of the affair -- to leave their armed men with him. They refused. He worked on these warriors so cleverly and made them such tempting promises that the men had hardly reached their homes when they returned to join the ton' and so swelled the number of ton'-dyon.

Henceforth, the fla-n-ton' ceases to exist; transformed, developed, it gives way to the furu-ba (1) (great union, great association), whose chief, Mamari, is called fama (lord) and whose power rests on the [298] furu-ba-dyon' (slaves of the furu-ba), among whom the ton'-dyon' form a kind of aristocracy.

Of the three elements of the fla-n-ton', ton'-tigi, ton'-den', and ton'-dyon', only two survived after Mamari eliminated the ton'-den'. This elimination did not, however, change the character of the ton'-dyon', who were slaves, not of Mamari himself, but of the association which they formed with him.

---

1. In the broad sense, furu means "union alliance"; in a narrower sense, "marriage, conjugal union."

*173 Theoretically, Mamari could only direct, supervise, and organize them, but in actual fact he exploited them to his own advantage. Upon the death of the ton'-masa, he decapitated them, in a manner of speaking, when he failed to appoint a replacement from their ranks. He then transformed the ton' into a brotherhood by affiliating the ton'-dyon with cults in which he was concerned and of which he was the grand master; his design was to hold their loyalty through this religious bond. Finally, he attached them to his own community by placing the leaders of the ton'-dyon' under the surveillance of members of that community.

It was at Mamari's death that all the consequences of this absolutism became apparent, an absolutism which attempted to destroy all the principles governing native society. At this point, the ton'-masa played a double role: he first intervened as guardian of Mamari's inheritance, because he had been the latter's personal slave; then he acted as the representative of the ton'-dyon in recognizing their subjection to Mamari's son and personal heir. Thus, the fa of Mamari's community became the fama of the clan.

The tragic death of Dé-koro marked the end of this combination, because the natural family which had provided the fama had died out, or at least the ton'-dyon' thought that it had.

Actually, once they were relieved of the master imposed on them, the ton'-dyon' showed that in their view the egalitarianism of the ton' had only been in eclipse. By the simple expedient of calling themselves "sons of Mamari," they recovered for the ton' all the property that Mamari and his children had usurped. The implacable resistance that prevented any ton'-masa from setting up a new tyranny for his own profit proves that everything tended to revert to the point of departure, that is, to the state of fla-n-ton'.

This, however, was impossible. The imbalance due [299] to the suppression of the ton'-den' was irreparable, because a person's rank cannot be effaced, and the former ton'-den', now ton'-dyon' and hence fallen to a lower estate, could not rise again. But there was something that did not survive, the type of empire which Mamari thought he had definitively established outside and above the ton', first for himself and then for his natural heirs.

*173 Henceforth, the fama in the furu-ba was no more than primus inter pares, just like the ton'-tigi in the old fla-n-ton', taking into consideration the evolution by which the furu-ba developed from the fla-n-ton'.

Ngolo Dyara succeeded only in making the office of fama, thus understood, hereditary for his descendants, just as had been done with many positions of dyon'-kuntigi before his time.

This progressive consolidation of an ever increasing number of high offices and the de facto independence regained by most of the members of the clan resulted in the formation of a society whose members took pride in their ton'-dyon' origins, considered themselves free, and even regarded themselves as free men of rank. This is perhaps the essential role of slavery in these areas, as a channel of social renovation and ethnic fusion.

It is appropriate to close this survey by an analysis of the various components of the clan and an explanation of their functions.

Furu-ba dyon' and Ton'-dyon'

614 567 In the course of time, the organization and function of the furu-ba created by Mamari underwent various modifications.

The essential element of the clan is the ton'-dyon', because after all everything depends on it. We have learned the origin of the ton'-dyon' above. The number of slaves of the furu-ba was increased by the many captives taken in the course of raids, pillaging, and warfare, but the ton'-dyon' is an aristocracy within the furu-ba-dyon' by virtue of seniority and also because some of the characteristics [300] of free men have somehow survived in those of the ton'-dyon' who were originally ton'-den'.

Undoubtedly one of the causes of the unrest that always stirs up the furu-ba is this deep yearning everyone has for freedom. They do not know how to attain it, however, first because they are dominated by an ancient atavism for servitude that burdens all the Sudanese, and also because each man who desires freedom for himself intends to use it to enslave his brothers. These are the confused feelings that give such an equivocal aspect to all the events related in the chronicle.

614 The ton'-dyon' of the furu-ba is a kind of person of caste:
567 he cannot cease to be ton'-dyon', and his children will live and
die as ton'-dyon'. He is subject to the despotic authority of the
fama. For a free man, it is certainly a fall to become a ton'-dyon',
but for a slave, on the contrary, it is an improvement in
status. Among the ton'-dyon' there are all sorts of people; this
was the case in the beginning and has continued to be so as time
passed. Although slaves obtained from armed forays were an
[727] important element in the totality of the ton'-dyon', there were
undoubtedly many men, free but poor, who were glad to join
the ton'-dyon' so as to protect themselves from the depredations
of these hardly commendable persons and also to gain the right
of using the same procedures themselves.

Among the ton'-dyon', therefore, there are people of all races and all conditions; indeed, this is so true that all the dyamu are mingled under this common label.

Within the furu-ba, the ton'-dyon' formed a category apart and always retained the prerogatives which in native society accompany seniority. The ton'-dyon' were the "elders." Prisoners reduced to slavery formed the furu-ba-dyon', properly speaking, and they were grouped in series, each taking its origin from the fama who organized it. There they followed the usual path. Barring favorable circumstances which might allow them to escape the wretchedness of the early days of captivity, they started out as members of the gang of slaves-of-all-work, often considered as a kind of medium of exchange and for that reason called san'-dyon'-u (slaves of exchange). Once they were adopted by a community, a woman acquired the status [301] of wolo-so when she bore a child, while a man might achieve comparable status by gaining the confidence of his masters.

The wolo-so became a dyongoron when he was in a position to send his children to work in his place and to pay an annual fee.

Once he reached the status of wolo-so, the slave became, in actual fact, a person of caste. In principle, he could not be sold, he had the right of ownership, and he could leave property to his children. Indeed, he was often better off than a man who was free but poor.

614 567 The status of this caste-slave carried over to his decendants ad infinitum, even in the case of those persons who rose to the highest positions. Thus, the Dyara of the family of Ngolo Dyara kept the stigma attached to the servile status of their ancestor (1). In practice, the wishes of an all-powerful master could change the status of those under his authority since, as we have seen, the fa made the law. However, this arbitrary will did not leave a man without recourse, as we saw in the chronicle in the case of the aforesaid Ngolo in his relations with Mamari. If one could appeal to the good offices of someone close to the fa, it was often possible to make him change his mind.

614 631 The furu-ba dyon' (ton'-dyon' or furu-ba dyon', properly speaking) were under the orders of "chiefs of slaves" (dyon'-kuntigi-u). There are supposed to have been 120 of these chiefdoms under Ma-n-son, according to the words attributed to Tonmassa in the chronicle. According to the same source, the number rose to 140, and then Ma-n-son reduced the number to 60 hereditary posts with authority over a varying number of furu-ba dyon' who were scattered about in the various regions subject to the clan, the whole subservient to the decision of the fama. The chronicle shows us how the fama established or broke up these chiefdoms for the greatest variety of reasons. Whenever he had an enemy who needed watching, an attack to be prepared, a country to be exploited, or a service to be organized, he conscripted men wherever he liked, ordered whole populations to move, and appointed a chief to take command of the enterprise and to carry out his orders, whenever and however he wished.

Among the dyon'-kuntigi there was a hierarchy [302] based on seniority theoretically and also on the importance of the duties; as a result, some of them were great chiefs. One of these, called the ton'-masa, came to be the supreme chief over the ton'-dyon in particular and all the furu-ba dyon' in general. In the fla-n-ton' the ton'-masa had the duty of convening the ton'-den' and of watching the ton'-dyon' to see that they

---

1. See Raffenel, Vol. 1, p. 371.

614 631 performed the work ordered by the ton'-tigi. The ton'-masa had the same duties in the furu-ba: he made sure that the furu-ba dyon' executed the orders of the fama while acting as intermediary of the dyon'-kuntigi. Since, in short, he represented all the furu-ba dyon', his office gradually tended to put him in opposition to the fama. In the last analysis, what can a fama accomplish if he is opposed by a ton'-masa with all the force of the furu-ba dyon' behind him? That is why Mamari thought he would be able to rely on the devotion of the holder of this high office if he chose him, not from among the furu-ba dyon', but from among his personal slaves. He bought a slave and made him a ton'-masa.

*173 614 631 The furu-ba dyon' were first used, though not exclusively as might be thought, for armed forays, variable in scope, from which everyone profited: Mamari, first of all, by increasing prestige and by extending the areas under his sway; the furu-ba dyon', and Mamari too, by adding to their fortunes. The sons of Mamari, obviously anxious to perpetuate their acquired position and not run the risks of brigandage, decided to turn the activity of the furu-ba dyon' toward agriculture. This new orientation gave rise to a crisis, since it was not at all to the taste of one faction which included a large number of furu-ba dyon'; hence there arose internal quarrels, in which one episode was the murder of Dé-koro.

It was during these disturbances that many of the ton'-dyon' and dyon'-kuntigi conceived the idea of dropping out of sight to live independently on the proceeds of the property of the furu-ba entrusted to their case. Successive fama naturally tried, by terrible examples, to bring the rebels to terms, but they succeeded only temporarily by means of force, and when their power declined, these usurpations multiplied. Some of them were sanctioned definitively by the hereditary rights accorded to the 60 posts. [303]

The Fama

614 The second element in the clan was the power of direction, organization, and surveillance, and the holder of this power

614 was called fama (1) (lord).

1. Etymologically, fama or fa-ma, "the powerful," from fa, "power, authority."

Mamari played a dual role: fa of his patriarchal community and at the same time fama of the clan. His successors followed the same practice. However, in order that his duties as fama may be carried out honestly, custom requires the incumbent to turn over the authority and the property of his patriarchal community to his eventual successor, thus retaining a merely honorary fa-ya, so as to avoid confusion whose origin and consequences are easy to imagine.

421 614 In reality, all the property of the furu-ba which the fama held for his use and exploitation always belonged to the clan, and consequently, in principle, was supposed to profit only the clan. When the fama retained his duties as fa, the property of the furu-ba and that of the patriarchal community were likely to be inextricably intermingled, and in the process a considerable fortune would be built up for the community. This wealth, dishonestly acquired, so aroused envy and criticism among the furu-ba dyon' that many of them tried -- sometimes successfully -- to enrich themselves in no less questionable a manner and also sought to lay hands on the estate of the fama because of the clan property taken into it.

In the last analysis, indeed, the only reason for belonging to a clan -- and this is its essential trait in common with the fla-n-ton' -- the possibility of enriching oneself in every way possible; each member of the clan hopes to appropriate as much of the property as possible. On the other hand, each member tries to prevent his brothers from doing likewise, on the pretext of that equality which legally is the basis of the relations between clan members. This hypocrisy dominates the whole life of the clan. It inspires all the acts of the fama in the course of his duties, and it also animates each furu-ba dyon' to such a degree that every one of them aspires to become fama. [304]

614 The fama receives his powers by election, the form of which has changed very little since Mamari's time.

614
*173 Mamari had been elected by the ton'-den'; by means of successive usurpations, whose progress we have shown, he achieved a kind of despotism whose entire gain he was unable to hand down to his descendants, in spite of his wishes.

For his descendants, election followed their installation in office by the ton'-masa, who at the same time publicly announced the assent of the furu-ba-dyon' by a symbolic gesture in which he presented himself to the new fama wearing a loincloth around his neck and put its two ends into the hands of the fama. Under the protection of the deity called ba Kongo-ba, which Mamari had bought in Bendougou, an oath was taken which formed an unbreakable bond between the two elements of the clan.

The election of Tonmassa Dembélé as fama was the result of discussions following the coup d'état which he himself carried out, and it is probable that this election, too, was followed by an oath of loyalty on the part of the dyon'-kuntigi in one or another of the ways already described.

In the case of the successors of Tonmassa Dembélé, the choice of a new chief was preceded by gatherings at which it was announced that the place was vacant and open to the person who could take over Mamari's bow and quiver. Then the election was held, and it was followed by a ritual banquet..

614
*173
782
[776] For this banquet, an ox and a slave were ritually slaughtered in the hut used as a temple for ba Kongo-ba (1), to whom the victims were sacrificed. The corpses were then cut into pieces, cooked together, and stirred frequently to make sure that they would be well mixed. A part of this macabre dish was served in the same hut and in the same gourd to the

---

1. A literal translation of the name was given to me, "Mother of the Great Bush," wherein "mother" is equivalent to goddess." There is an allusion to the ceremony described here in the journal of Isaac (second voyage of Mungo Park), which uses the name Kogno-ba, a variant of Kongo-ba.

614 782 *173 dyon'-kuntigi who had acted as electors. When it was time to eat, they squatted on the ground around the gourd with their backs to it, and in this position and without turning their heads to make a choice, [305] they dipped into the dish and took a piece which might be animal or human. This meal constituted a communion by which those partaking of it were so closely linked that ba Kongo-ba was supposed to kill any one of them who should commit perjury by failing in the loyalty he owed to the man elected.

614 *173 The choice made was then definitive, and the man elected was put through a test intended to indicate the length of his reign. To make this test, the newly elected chief's throat was wrapped in one of the cotton bands used to make native loin-cloths; two of the bystanders pulled the two ends in opposite directions while the victim feverishly plunged his hands into a gourd containing a mixture of small pebbles and ground baobab leaves. The number of pebbles he managed to pick out in one try was the number of years in his reign. When this number of years had passed, the fama was strangled with the strip of cotton. If his rule had been popular, however, he was left in office until the first complaint was lodged against him.

Such is the tradition. Though it is acceptable in essentials, it is less so in certain details when comparison is made with the chronicle which makes no reference to this uniform death by strangulation or to determining in advance the length of the reign.

One thing that is certain is the oath of loyalty which followed every election and which was also often demanded by the fama during the course of his reign. This oath unquestionably had a sacramental form, characterized by a communion under the patronage of the idol. What the chronicle has to say about the election of Ngolo Dyara shows that the man elected was also required to participate in the oath, thus making it reciprocal. [661] Ngolo managed to avoid taking the oath, and so his electors bore the whole burden of it; this is one of the means by which despots of all lands pave the way for their tyranny.

Relations between the Elements of the Clan

614
596
A study of the clan of Ségou is fortunately clarified by comparison with the organizations which we have discussed earlier: communities and brotherhoods. [306]

The influence of the community and the brotherhood on the clan is clearly shown by the two traits which reveal the consistent effort made by the fama to fuse the clan with his own patriarchy. First, there is the connection of the important ton'-dyon' chiefs and, through them, of all of the furu-dyon' to the fama. This is achieved by placing each of these dyon'-kuntigi under the patronage of an influential member of that patriarchy. Under Mamari and Ngolo, for instance, each of these dyon'-kuntigi was attached to the mother, wife, son, or brother of the fama. The ton'-masa himself asked to be put under the protection of Bakari, son of Mamari.

[794] From another viewpoint, the liaison between the clan and the patriarchy of the fama is made even closer by the participation of the ton'-dyon' in the personal cults of Mamari. Some of them were leading officients of the cults; it was precisely this circumstance that enabled Ngolo to dominate his companions.

It is therefore not too rash to state that under these conditions the clan is merely a kind of extension of the patriarchy of the fama. Besides, the ton'-dyon' always made a point of the bonds which in so many ways linked them to Mamari and which established a real brotherhood between them. That is why, first of all, their cult honored Mamari as though he were an ancestor. Secondly, it was the reason for the mode of succession which was imposed during periods of anarchy, bringing to power the man longest in Mamari's service. Finally, for the same reason, when the fama dies, the ceremonies are exactly like those for a patriarch.

614 There is another consequence: the prosperity, the power, and even the existence of the clan depend essentially on the personal qualities of the fama. When he is equal to the task, the clan is rich and powerful. If he lacks authority or is unable to assign each member a position and a role and keep him there, opposition will at once arise. By its very nature, such opposition inevitably separates the elements that go to make up the clan,

614 and from that moment on everyone seeks to enjoy his freedom and his property for his own profit. The end result is complete disorganization, and only the emergence of a new and enterprising despot can stop it.

614 575 Fundamentally -- and this is a new aspect of the question -- the clan retains the ineradicable imprint of the fla-n-ton' from which it took its origin. The aim has not changed: to assure to each member the [307] largest possible number of those material satisfactions which are so dear to the Bambara. The means likewise remain the same: in spite of appearances to the contrary, it is a type of solidarity based on a strictly egalitarian communalism (1).

> 1. The innate penchant of the Black for this sort of egalitarian justice is affirmed by legendary episodes wherein an individual is honored and proclaimed chief because he was able to make strictly equal shares. Cf. the legend of Ndyadyane Ndyaye, in Legendes et coutumes sénégalaises [Senegalese Legends and Customs] by Henri Gaden, and the Djide of Djenné, in Contes du Sénégal et du Niger [Tales of the Senegal and Niger] by Zeltner.

The resources of the clan are in every respect analogous to those of the fla-n-ton. Just as the latter profited from the [579] thievery, banditry, and raids of its members, so the clan derives its main resources from successful raids and pillage.

The fla-n-ton' provided for its drinking bouts by means of the di-songo and the crops of its ton'-den' or ton'-dyon'. In the clan, the di-songo persisted for a time and then was replaced by a similar fee, the nyon'-dyu. The work required of the ton'-dyon' was minimal at first during the period of active warfare, but then Dékoro peremptorily sent them into agriculture. Ultimately the furu-ba dyon' came to be primarily agriculturalists.

The foodstuffs of the fla-n-ton' were equally distributed among the ton'-den' by the dyala-tige, under the direction of the ton'-tigi. Within the clan, property is also held in common and

614 Within the clan, property is also held in common and
575 administered by the fama who distributes it among the dyon'-
[421] kuntigi. The latter, in turn, make a further distribution as it is needed.

In the fla-n-ton' the important thing was provisions, material well-being. The same thing is true in the clan. The ton'-dyon' are interested in the profit to be derived from the association, and their feeling for the state is embodied in a very prosaic word, to-da, literally, "the pot of mush." Indeed, this is the principal item on the menue of any fraternal feast of the fla-n-ton'.

614 421 The property of the clan, as of the fla-n-ton', is theoretically jointly held by all the members, but since there is a large amount of it, some sort of sharing is necessary, first to consume it and then to reward zeal and fidelity and to encourage emulation and devotion. As a result, the basic egalitarianism is altered. From the clan's beginning it was conceded that a substantial part of the wealth should go to those [308] who had done most to acquire it. Thus, the leader of an expedition had a prior right because of his "luck," and he and his men further received the wherewithal "to repair the rents in their shirts," i.e., to indemnify them for damages suffered during the expedition.

[727] Each warrior kept his own loot, except for unusually valuable things which went to the clan and therefore to the fama who represented it. The part of the loot not taken by individuals was distributed by the fama after abstracting the best and largest part of it for himself.

Strictly speaking, no one actually owned any of this wealth, since all of them, even the fama, merely held it on very precarious terms. Through the caprice of the clan, anyone could [562] have everything taken away, and this applied to persons as well as to things, because the wives and children of the ton'-dyon' were, like himself, the "chattels" of the clan.

The passage of time softened the outward form of these principles; barring abuse or notorious misconduct, each individual had indefinite use of what was allotted to him and handed it on to his descendants. This usufruct, incidentally, was broader than that of our law. In addition, Mamari arrogated to himself a kind of eminent right: he appointed himself -- through usurpation facilitated by his power -- the dispenser of offices and wealth

614 421 and kept considerable property for himself. For their part, the *ton'-dyon'*, pleased with their lot, carefully kept out of sight so as to be able to enjoy what they had been given and what they had managed to add to it.

These usurpations tended to become stabilized through inheritance, although not without dreadful disturbances.

614 *173 After Mamari, the office of *fama* was handed down within his family until the day when the assembly of the *ton'-dyon'*, dissatisfied with Dékoro's regime, decided to "change the seed," a quaint metaphor for the clan's determination to have a more amenable *fama*.

The ease with which Dékoro was eliminated (and others after him) also shows that the *fama* was, and after all could only be, what the *ton'-dyon'* allowed him to be. This makes it clear that the spirit [309] of the *fla-n-ton'* never died; the *fama* merely appeared to be more than *primus inter pares* at times when his personal influence temporarily made him master of the situation.

At such times, then, he may have governed without the opposition of the majority, but such a period of dominance has always been personal and temporary. In reality, dissension was [578] ever present and was made manifest in fratricidal quarrels, during which the *fama* seemed to be principally concerned with gratifying personal grudges.

The chronicle shows us that the fama was at the mercy of the *ton'-dyon'*; without them he could do nothing. The Monday and Thursday meetings, which were a condition of his authority, continued for a long period of time. In any event, this assembly (*furu-ba*) was the whole of the clan. In ordinary times, the assembly was stimulated by the pleasure of drinking the beer which the *fama*, like the *ton'-tigi* before him, always provided. Worship of the clan idols was also the occasion for some of these meetings, accompanied by eating and drinking. The *fama* invariably made every effort to use these gatherings, usually disorganized, to further his own interests as well as those of the clan.

When Mamari's authority was well established, these meetings no longer played any deliberative or even consultative role, except in the gravest circumstances when the very existence of the clan was at stake. It was logical that the council of the

614 *173 dyon'-kuntigi should replace them; the dyon'-kuntigi always exercised an influence over the ton'-dyon' for whom they acted as spokesmen. Besides it was easy to convene the dyon'-kuntigi, and as their experience increased, they came to be competent and tried collaborators for the fama.

As time went on, however, the council was neglected. The extension of the to-da kept the important dyon'-kuntigi away from Ségou, and as a result the fama became increasingly despotic. He was always sensitive, however, to the influence of his immediate circle, that is, the people of his house (his mother, wives, children, brothers, and other relatives) and
[567] especially his familiars (1). The latter constituted a kind of privy council in which the leader of the slaves, whether [310] or not he belonged to the ton'-dyon', played an important role. Ordinarily these familiars were of lowly birth: people of caste or domestic servants in the house of the fama. Deeply involved in their master's life, they were at the root of the intrigues surrounding him.

The fama realized that his authority was deprived of its strength when he lost contact with the ton'-dyon', because a clan languishes almost to the point of extinction when those who compose it lose touch with one another. Therefore, the fama would convene the assembly, not, as in the past, in order to learn its wishes, but rather to request or even require from it a solemn affirmation of loyalty before the idols. In any case, the assembly always met at least once a year to renew the oath of religious faith and to admit the "young men."

The assembly took an effective role only at the election
[578] of a new fama, and it is plain that over the years this power of

---

1. So it was that in his fratricidal quarrel with Nyana-n-Koro, it is clearly apparent that Ma-n-son was guided by the shrewd suggestions of Nzan-fato; in his quarrel with Souleyman, his intimates were his advisers.

614 consultation likewise underwent changes. In the beginning there
*173 was no great amount of dissension within the furu-ba, but gradu-
578 ally, as the importance of the clan grew and the wealth of influential members increased, divergent opinions arose, held by strong and determined partisans. Then the dyon'-kuntigi were opposed among themselves, and the recurrent periods of anarchy bear witness to the consequences of these internal quarrels.

Organization of the Clan

614 The army. The office of fama is dominated by the need
721 to ensure the prosperity of the clan since, in theory, the clan's only reason for existence is that of procuring for its members as many material satisfactions as possible.

The usual way to make a fortune among these people was through armed pillage. When a fama was elected, the bow and quiver symbolized the clan's activity, and according to the reasoning of Kanou-ba-nyouma, it was essential that the arrows should hit someone. Thus, it was necessary to go to war. That was the way to acquire slaves, by means of which the great -- and everyone aspired to be such -- satisfied their desires. That is why the essential organization in the clan was the armed force. [311]

614 This organization was based on the distribution of the
701 slaves among chiefdoms (dyon'-kuntigi-ya). Observed as a whole, the army was composed of a certain number of sections called sen' (literally, "foot"). This was not a specific unit, but merely the name used to designate an organized group under the leadership of a chief. Each sen' had a variable number of men. The bolo (literally, "arm") was a "band" made up of a likewise variable number of sen' and commanded by an important chief.

614 When the army was drawn up for battle, it faced the
726 enemy with a central mass called disi (literally, "chest") made up of the corps of sofa, flanked on the right and the left by bolo called, respectively, kini-n-bolo (right arm) and numa-n-bolo (left arm) (1). Each of these bolo were made up of furu-ba dyon'

1. Note this anthropomorphism applied to the army, which thus included head, arm, feet, chest.

614 surrounded by *ton'-dyon'*. Behind the *disi* there was a special
726 reserve composed only of *ton'-dyon'*; this was the *ton'-koro-bolo.*

The *fama* himself designated the leader (*keli-tigi*) of all
614 the expeditions of war. This might be one of the *dyon'-kuntigi* or
701 some member of the community of the *fama*; sometimes the *fama* himself might take command.

The personal protection of the *fama* was the duty of the corps of *sofa.* In principle, considering the etymology of the name, the *sofa* were supposed to take care of the horses; this does not mean that they were necessarily horsemen or even grooms. The youngest served as pages and sometimes as grooms; the older ones were confidential aides to whom the *fama* entrusted missions. The *sofa* constituted one part -- and by no means the least important -- of what might be called the household of the *fama*: an assemblage of persons employed for various duties under the immediate authority of the *fama.*

[727] They were recruited from young prisoners taken in raids and other operations of war.

When the *fama* led an expedition which was engaged for some time or when he took part in some important affair, he liked to arrange and to preside over the *soli* of the boys of the conquered people and to have one or more of his many children take part. [312] This was a means of assuring himself of the devotion, generally regarded as unfailing, of these *soli-ma* whose "birth" into man's estate he had honored and who, by virtue of the ceremony itself, were thus linked to some of his own children. Mostly these young men would then swell the ranks of the *sofa.*

This army, which might be said to be a regular army, theoretically received everything it needed from the *fama*: mounts, equipment, weapons, ammunition, etc. This justified the very considerable share of booty kept by the *fama* himself; he was thus repaid for what he had furnished, was provided with resources needed to replace what had been destroyed, and finally, was able to add to the store of equipment needed to make war. There was also the special need to increase the clan's treasury with a view to all possible eventualities.

The army was augmented by allied or volunteer contingents. The allies had a solemn agreement with the clan, based on a

614 religious and reciprocal oath. Their contribution entitled them
701 to a share of the booty. Volunteers, who enlisted for an engagement or a whole campaign, came in under conditions settled in advance.

The *fama* furnished the allies, just as he did the volunteers, with whatever they needed and deducted the amount from their share of the loot. Sometimes a third party, not involved in the expedition, provided mounts, equipment, and weapons for the enterprise in exchange for a prearranged reward.

In short, armed pillage was a business directed by the *fama*, who could admit interested participants if he so desired. If the operation were successful, the clan gained predominance over
[727] the conquered regions, which the *fama* then exploited as he saw fit. The booty was the first result of the enterprise, and it served both to pay the expenses incurred in the affair and to swell the treasury of the clan.

This explains why the clan's army, for a consideration, hired itself out to anyone who asked for support, as an ally, as a mercenary force, or in any other capacity. The army might simply intervene in a quarrel of its own accord when there seemed to be profit to be gained (1). [313]

1. See below how the *fama* of Ségou lent his support to a *marabout* of Sous. The Bambara also intervened on numerous occasions in the internal quarrels of Khasso, Boundou, Fouta, etc. Their role as mercenaries is clearly shown in the *Tarikh es Soudan*.

614
701 The *ton'-dyon'* were distinguished by a special hair ar-
569 rangement. Their heads were completely shaved except for three
[302] tufts of hair which formed two braids on the crown of the head and one at the nape of the neck.

The slaves of the household of the *fama* could be recognized by their well-known tattoo (1) which consisted of three

[304] 1. In general, it is risky to depend

parallel cuts from temple to lower jaw on either side of the face. Furthermore, these people borrowed the *dyamu* of the *fama* (Kouloubali, Dyara, etc.), just as certain servants in some of the French provinces are called by their master's name because they are members of the household bearing that name.

614
701
411
The elite troops (*sofa*, *ton'-dyon'*, etc.) were armed with axes (*sukala*) (2). Important chiefs also had axes, the insignia of command, sometimes made of precious metal, such as copper or silver. The axe carried by the *fama* was made of gold and enchased (3).

The spear (*tama*) was often regarded as a weapon of distinction also. The ordinary warriors were armed with bows (*kala*) and arrows (*bimye*), the latter usually poisoned.

[177] Guns (*marfa*) gradually came into use, imported by native traders (Dyula). The chronicle claims that the first firearms were introduced among "the people of Ségou" in Mamari's time by an army from Kong and that these guns were of the blunderbuss type.

614
567
701
304
incautiously on tattooing as a distinguishing mark of race or even of rank; the tattoo described here has not only been used by people of various origins, but has even been appropriated by all kinds of people as a form of snobbishness.

2. An instrument's name derived from *suka*, a variant of *sua*, meaning "to pierce." The men armed with axes were, in fact, assigned the special task of "making a breach" in the wall inclosing the settlement under attack.

3. The chronicle relates that Tonmassa, after murdering Dékoro, carried off the golden axe, the symbol of supreme command.

614
701
411 Chiefs and other notables carried a short sabre (m-pan) slung from their shoulders. These were probably Turkish in origin and were largely ceremonial weapons.

614
714 The troops wore no specific uniform. Only a few of the more important personages were recognizable by certain insignia, and it sometimes happened that certain individuals were honored by distinguishing marks. The chronicle tells us that Mamari [314] had Ngolo Dyara outfitted in red, a uniform particularly desired. Likewise, he gave Tonmassa a pair of trousers that were unusually wide and consequently attracted everyone's attention.

534
614
701 Drummers (dunu) and trumpeters (buru) made up a military clique which also included men who played xylophones (bala) and various accessory instruments, especially bells (tana, veleni, etc.), and gourds half-filled with pebbles or grain.

766 The drum beaten to sound a rally, which was, therefore, in a manner of speaking, the announcer of war, was the tabala. The cylinder, bowl-shaped and usually made of wood or sometimes pottery, was covered with an ox-hide, often untanned, which was stretched by thongs tied under the drum. In theory, this drumhead was always changed at the death of a fama, when the skin was broken as a sign of mourning (1), and was replaced by the hide of the ox sacrificed in honor of the deceased. The tabala was carried horizontally between two men by means of leather grips and a third individual beat it by means of a ball attached to his wrist by a leather thong.

Other drums were of varying sizes and shapes. Some were carried under the arm (dunkan") or slung from the shoulder (tama); others, mounted on three feet (dange), presented a horizontal

---

1. It should be noted that the destruction of the drumhead is comparable with the killing of the dead chief's dog and the presentation of a dead chicken to his relatives. All these are obviously "intentional breaks."

534 beating surface. The most highly regarded was the denu-ba;
614 made of a hollowed cylindrical trunk with fairly thick walls,
701 the denu-ba is sometimes more than a meter high, with its
lower third often slightly tapered with an adze. The drumhead
is made of strong hide, reinforced in the center by a patch of
leather sewed to it and stretched on pegs driven into the sides of
the drum a few centimeters below the upper edge. When it is to
be played, the drum is inclined on a fork that supports it. The
drummer uses a kind of wooden hook, cleverly curved for
elasticity and provided at one end [315] with a rounded part,
often formed by a swelling contrived for the purpose or at other
times made of a leather ball. The drummer's free hand provides
the syncopation.

In certain cases, two denu-ba are used together; the
drummer strikes them in such a way as to obtain a variety of
sounds to form the basis for conventional harmony. Thus, the
soldiers not only were trained to obey appropriate flourishes, but
also were kept in touch with distant battalions by means of the
drums. When it was skillfully played, the denu-ba made it possi-
[202] ble to transmit information for considerable distances, because
other drummers would retransmit it in turn. That is why it has
[778] been said that the denu-ba can talk and no doubt why it was so
highly regarded by the ton'-dyon' that they considered it an
oracle and honored the god who spoke through the drum by making
the denu-ba the boli of this god. Hence, human victims came to
[782] be sacrificed to the drums of the ton'-dyon', especially under
Ngolo, according to the chronicle.

Trumpets (buru) were formerly made of ivory. The
[237] Tedzkiret speaks of the ivory trumpets used by a certain Bambara
named Maro, and Mage relates that Ahmadou, Sultan of Ségou,
gave the Bambara their ivory trumpets on the occasion of the
Moslem festival.

These ivory trumpets, however, have disappeared, no
[237] doubt carried off by traders. Trumpets made of horn, which were
used concurrently with the ivory instruments, have been substi-
tuted for them. The horns of the large antelope are much in de-
mand for this purpose. An opening is made a few centimeters
from the pointed end, and the trumpeter makes the sound through
this opening. The only result is a loud but monotonous noise.

534 614 701 The xylophone (*bala*) consists of a table made of strips of hardwood, with a gourd under each strip, like a resonator; the size of each gourd depends on the note desired. A section of the gourd is stopped by the vibrating surface which is a white material very closely woven like a cobweb. When it is played well, the *bala* produces various tunes, but they seem very thin compared to the noise of the drums and the shrieking of the trumpets. [316]

The accessory bells are of no particular interest.

538 701 No expedition of any consequence ever set out without a *griot* (*dyeli*) (1). The *griot* has acquired a deplorable reputation because of the fact that too often he uses his fluency to exploit the rich and powerful. This should not hide the fact, however, that the *griot* has often played a role not lacking in grandeur. In addition to being the official archivist of one or more families, he was also, in the native sense, a kind of epic bard who told his
[534] tales in song, accompanying himself on a stringed instrument similar to a guitar or a rudimentary harp. When told by him, the traditions, involved with those miracles so dear to the native, had something of the quality of our medieval epics. In that respect, at least, the *griot* truly deserved his title of *dyeli* (master).

Unfortunately, however, being reduced to earning his keep by making use of his information, he resorted to slander and calumny. This made him so much to be feared that in order to buy his silence the victims despoiled themselves for his benefit, as did those whom he intoxicated with base flattery.

538 701 726 In the army the *griot* stirred and encouraged the brave men. On the eve of an important engagement or shortly before it, a large assembly customarily was held, and roused by the epic poems of the *griot* no less than by the war ~~dances~~ and copious libations, the warriors promised under oath to perform such and such acts of great courage. It was then the duty of the *griot* to take public note, so to speak, of this commitment and later,

---

1. See above, pp. *et seq.*, on the *dyeli*.

538 when the action had occurred, to celebrate the glory of its
701 author. If, however, events showed that there had been mere
726 bravado, the griot was then expected to stigmatize the braggart's
cowardice -- something he never failed to do, since he found it just as profitable as to celebrate the glory of a hero.

At a critical hour when the army threatened to yield to the baser instincts engendered by rout, panic, and defeat, the griot often had the fortunate ability to arouse failing courage, sometimes [317] with cutting sarcasm, sometimes by exalting the lofty achievements of the ancestors, sometimes by setting forth in a tragic light the lot of the defeated. The chronicle shows him in this role when Ma-n-son, held in check by the stubborn resistance of Tyitya, sees himself -- final disgrace -- abandoned by his wives who have decided to return to Ségou. All through the night the griot sang battle songs, and at dawn the terrible assault proved that the army had recovered its spirit.

This handler of words was undoubtedly a formidable "master." He was said to know words that kill, since he was aware of the actions dominating every person's life. When Ma-n-son's twelve wives came in a body and told him that they had resolved to return without him to Ségou because they were all the more homesick when they felt that defeat was at hand, he ordered them to repeat their words before the griot whom he had summoned. With their action thus publicly noted, he gave them leave to depart, knowing that he would be able to avenge himself for their desertion whenever he decided to do so.

The songs of the griot, retold and repeated by the warriors and the people, gave memorable actions ineffaceable lineaments. The chronicle tells us that when the expedition against Dina was undertaken, the griot improvised the song which begins: "In the shade of the bushy kaminya tree, the hen cannot tell a grain of millet from a grain of sand." This meant that, in the confusion of battle, a warrior can make no distinctions. In fact, the country was completely laid waste during this expedition, and the booty was so abundant that forever after the griot had only to sing this song to arouse the warlike ardor of the ton'-dyon'.

538 A man of high rank is always accompanied by his griot,
814 who is both a confidant and a mere factotum. It is true, of course,

538 814 that the *griot* is often a wretched character, an insignificant parasite living at the expense of everyone. There are those among them, however, who carry out their duties as archivist very faithfully and who are sincerely devoted to their masters, great and generous lords in the native fashion whose interests and reputations such *griot* ably defend.

It is *griot* of this last type who transmit the reliable historical tradition from which we have borrowed the foregoing accounts. There [318] is no doubt that these *griot*, true "masters" (*dyeli*) of historical traditions, have played a considerable role in native society. Therefore their words should never be passed over lightly, although obviously they should be subjected to judicious criticism.

The To-da

614 631 In origin, evolution, and contingencies, the clan developed from the social bases already studied, community and brotherhood, of which it is, in the last analysis, only an amalgamation. As a result, its various manifestations are similar to those of these institutions, even though possessing its own peculiarities.

One of the most characteristic features of the clan is the *to-da*, which was the familiar term used by members of the clan for the region in which they lived. The word literally means "the pot of mush" and alludes to the essential element in the corporate [539] banquets of the *fla-n-ton'*. As the saying goes: "*furu-ba to, to kadi, na ka ko,* (at the corporate meal the mush is good and the sauce is bad.")

The *to-da* originally was limited to Ségou-koro and its immediate environs, i.e., the small number of villages affiliated with the *ton'* either voluntarily or by force. It progressively extended its sway along the Niger: first on the right bank as far as Kirango; later almost to Dina; finally it extended its influence over a broad area on both sides of the river from Kan ga-ba to Timbuktu.

This territory was organized in various ways. The key region ran along the Niger from Dina to Kirango, and the sector

614 between Ségou-koro and Kirango was the area under what we
631 would call direct administration, because this zone was occupied
substantially by the fama, his community, and his ton'-dyon'.

614 Ségou-koro, which had witnessed the birth and the de-
velopment of the clan, had remained Mamari's capital; he pre-
794 ferred to live there, and he had installed the protective idols of
the clan there. Thus it was, so to speak, the seat of the brother-
[778] hood, whose four principal idols continued to be known under the
names of ba Kongo-ba, na n-Golo ko, Nye-dinge-dun', and
[776] Kolo-koloni. [319]

The fama was the high priest, and the other officiants of the cult were chosen from among the ton'-dyon'; that is why Ngolo Dyara was dye-n-fa. Any follower of Mamari or his successors was affiliated with the cult of these idols. The adepts who lived far from Ségou-koro founded branches which in certain ways ~~were~~ so dependent on the capital that Ségou-koro was for a long time regarded as a holy city.

We have no detailed knowledge concerning the cult of these important idols; we only know that in general they did not differ greatly from what we have already said about the nyana of the boli. The annual festival was exceptionally solemn and brought the faithful from even quite distant regions. The fama, of course, presided over the ceremony which involved certain essential rites: a renewal of religious faith, the reception of new
614 members, and an oath of loyalty to the fama.

794 The four deities mentioned above were not the only ones
776 in the Bambara pantheon at Ségou (1); others were added, some bought and others invented out of the extravagant faith of the ton'-dyon'. Among the latter should no doubt be included the drums of the ton'-dyon', which are mentioned several times in the accounts and which are presented always in a very bloodthirsty light. Ngolo sacrificed his most hated enemies to the drum-idols,

---

(1) In Les Bambara [The Bambara], Father Henry mentions, in addition to ba Kongo-ba and na-n-Golo-ko, two other idols, Kuantara and Safolo.

614 beginning with his relatives, to avenge his hatred toward them
794 for selling him into slavery. It seems likely that the establishment
776 of these ferocious deities may well date from the time of
this despot and perhaps was due to his personal initiative.

The "people of Ségou" also held in high esteem the deities of the people they conquered. Indeed, there is no doubt that they constituted the most precious part of the booty of war. The Toucouleur [Tukolor] relates that when they entered Ségou-Sikoro they found an idol in chains; it was the protective deity of a group of the Nono-n-kobe people of the cliff of Bandiagara. With the evident intention of keeping this conquered people forever enslaved, the Bambara had captured their god and were having its cult observed by its own priest, kept captive likewise for the purpose (2). [320]

2. See Desplagnes, *Le plateau central nigérien* [The Nigerian Central Plateau], p. 175.

The chronicle shows that the Komo also figured in the Ségou pantheon, and if one refers to what we have said about this brotherhood, he will understand the important role it played in the *to-da* since the *fama* himself acted as *Komo-tigi*.

614 There is absolutely no doubt that cannibalism was in
794 favor on certain definite occasions and, according to appropriate,
761 ritual, especially, at the time of the election of a *fama*. It is
[266] obvious, in any case, that under the despotic rule of the clan
human life had little value. The atrocities of Dékoro, the passiveness of his victims, the help given him in the execution of his worst crimes by the very people who were directly threatened -- these are not isolated cases. They are indicative of the basic Sudanese temperament in general, which, if not innate, at least is affected by a very ancient atavism. It is because this kind of arbitrary command over the lives of individuals has been practiced for so many centuries that the Bambara often remain impassive in the face of death. They consider its unforeseen occurrence, even when sudden and the result of man's

614 own action, as a possible daily eventuality which should cause
794 no surprise.

761 The practice of this implacable ferocity must also be considered the natural source of that kind of burning faith, as intransigent as it is horrible in our eyes, which is capable of nullifying all the feelings of affection that we regard as natural. When Ngolo realized that he had aroused dangerous ambitions in his son Ntyi, he decided that he could not escape the danger he himself had created except by a sacrifice in keeping with the contingency, and with his own hand and without hesitation, he sacrificed Ntyi's son, his own grandson.

Stubborn Bambara are often heard to say: "You may kill me; I will not yield." Tyitya's resistance shows that this is no idle boast; this same affair also shows the aspiration toward equality, so basic in the Bambara, which makes it impossible for him to bow before his fellows. Another example of the same quality is to be seen in the resistance of the "elders", whom Mamari, even he, could subdue only by murder.

To complete the description of the somewhat mystical
794 features of the clan of "those of Ségou," let us recall that after
614 [321] Mamari's death he was honored by a cult: on the part of his
769 natural descendants because he had been their *fa*; on the part of the people of the clan because he had been *fama*; and finally, on the part of the faithful of the idols' cult because he had been the high priest. Under this aegis there was a fusion of sorts of all the people who recognized mutual bonds because they were all spiritual sons of Mamari. This relationship was the excuse used by the *ton'-dyon'* when they usurped supreme power, and the right of the leaders of the *ton'-dyon'* to succeed to the office of *fama* was in fact settled by the expedient of treating this relationship as though it were true descent. This cult took its characteristics from the cult of the idols. When Tonmassa began his duties
[782] as high priest, his first act was to honor the manes of Mamari, and the offering was the same as that always made to *ba Kongo-ba* when a new *fama* was elected: a man and an ox.

Such are some of the characteristics of the faith that
614 united the "people of Ségou" by ties which, without metaphor,
794 can be called bloody. It is true, of course, that the clan's

614 leading men made use of the cults to realize their ambitious
794 designs and to gratify their personal hatreds. From that point of view it can indeed be said that religion was a means of domination. It would be altogether too simple, however, to say that these cults had no other reason for existence than to maintain terror as the basis of the power of the fama. Any such facile opinion should be discarded, because the facts should be evaluated, not from the outside, but rather in the native milieu. It then certainly appears possible that they are of the same order as the many phenomena already examined.

This powerful religious focus animated the whole clan. Impetus, direction and control belonged to the fama, whose role was conditioned, as we have seen, by the attitudes of the furu-ba dyon' and especially of the ton'-dyon', both of which were represented by the dyon'-kuntigi who were, in a sense, their agents. Was it not inevitable that there should be a kind of spiritual current, supposedly emanating from the idols, which inspired the fama and the furu-ba dyon' and then returned to the idols in the form of a cult? How could such a constant preoccupation with the supernatural not make a deep impression? This preoccupation haunts the natives everywhere and always, [322] and they express it in ways that are in perfect harmony with their world, however ridiculous they may appear to European logic and reason.

614
621 The Ségou area acquired special importance because of the presence of the community of the fama, which settled there under remarkable circumstances.

It is usual in any important community for the first-born son to be set apart. Destined to succeed the fa upon his death, he is prepared for his future responsibilities by being given the management of a portion of the joint property. As the fa grows older, the role and the importance of this eldest son increase.

*173
614 When a community is sufficiently wealthy, a privileged position is likewise given to the eldest sons of the other wives of the fa, because he is always forced to distribute favors equally among his various wives whose jealousy may have far-reaching effects. Upon the death of a fa, many difficulties arise, stemming from his all too obvious preferences. An example of this was the

*773 614 fratricidal warfare that broke out when Ngolo Dyara died. Nyana-n-koro, the son of a wife who was free and also a favorite, had been favored by the fa during his lifetime. He therefore was not willing to take second place to Ma-n-son, whose mother was the eldest wife but had been a slave.
